The Home Arts curriculum is designed to meet the needs of those students who wish to apply their knowledge to the various problems of home living. This curriculum is based on the *general major* in arts and sciences with a field of concentration in Home Economics combined with two other fields to be selected by the student in consultation with the Home Arts adviser and the Dean of Arts and Sciences. (For specific information on the *general major*, refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.) By appropriate selection of courses, the student may prepare for the fields of journalism, radio, community recreation, home service in industry, merchandising, and several phases of social work.

The outline of courses listed below is suggested as a plan for the *general major* with Home Economics as a field of concentration.

### Lower Division

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| P.E. (activity courses) | ½ | ½ |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Psychology 1, General | 3 | – |
| Health Educ. 21, Principles | – | 2 |
| Chem. 2A-2B, General | 3 | 3 |
| Home Econ. 1, Home and Fam. Life | – | 3 |
| Electives (see lower division requirements) | 6 | 4 |
| | 15½ | 15½ |

| | *Units* | |
|---|---|---|
| **Sophomore Year** | *1st Sem.* | *2d Sem.* |
| P.E. (activity courses) | ½ | ½ |
| Home Econ. 61A-61B, Nutrition | – | 3 |
| Home Econ. 5, Food Preparation | 3 | – |
| Home Econ. 10, Clothing | – | 3 |
| Soc. 50, Contemp. Soc. Prob. | 3 | – |
| Soc. 51, Principles | – | 3 |
| Electives (complete lower division requirements) | 9 | 6 |
| | 15½ | 15½ |

Prepare for U. S. History-Constitution requirement for graduation.

Suggested electives for the first two years: Biol. 10A-10B or 1; Zoo. 20; Physics 2A-2B; Speech Arts 2A-2B; History 17A-17B; Health Educ. 90; Art 6B, 61B.

### Upper Division

Home Economics courses to satisfy the general major in home arts should be selected from the following:

| | *Units* |
|---|---|
| Home Econ. 101, Clothing Selection | 3 |
| Home Econ. 105, Family Meals | 3 |
| Home Econ. 135, Marriage and Family | 3 |
| Home Econ. 160A, Textiles | 2 |

| | *Units* |
|---|---|
| Home Econ. 160B, Non-Textiles | 2 |
| Home Econ. 150, Home Management | 3 |
| Home Econ. 170, Child Care | 3 |
| Home Econ. 102, Child Growth and Development | 3 |

The General Major consists of 36 upper division units representing three fields with 9 to 15 units in each field. Six units in the lower division in each field is normally required as preparation for the upper division. The two fields in addition to Home Economics should be selected in consultation with the adviser in Home Arts.

## INTER-AMERICAN RELATIONS

This curriculum, designed around the general major, provides (1) a basis for a more effective understanding of the opportunities and problems of international relations in the western hemisphere; (2) facilities for a basic education and training for a business or professional career involving international relations.

Competition for opportunities in international affairs is severe. Preparation for employment as a foreign representative of an American business organization implies concentration in economics. Students pursuing this curriculum as a guide for training for the Foreign Service should include additional courses in foreign language, history, political science, geography, and economics, in order more effectively to prepare for the competitive comprehensive examinations required for appointment to the Service and for entrance to the Foreign Officers Training School at Washington, D. C.

A high school program should include three units in one foreign language, preferably Spanish.

### Lower Division

| Freshman Year | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem.* |
| P. E. (activity courses) | ½ | ½ |
| Health Educ. 21, Principles | 2 | – |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Spanish | 0–3 | 0–3 |
| Natural Sci. (including Geog. 1. See lower div. requirements) | 3 | 3 |
| Hist. 8A-8B, Americas | 3 | 3 |
| Psychology 1, General | – | 3 |
| Electives | 2–5 | 1–4 |
| | 16½ | 16½ |

| Sophomore Year | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem.* |
| P.E. (activity courses) | ½ | ½ |
| Natural Science | 3 | 3 |
| Econ. 1A-1B, Principles | 3 | 3 |
| Pol. Sci. 1A-1B, Intro., or 71A-71B, Am. Gov't | 3 | 3 |
| Electives (including additional Spanish if needed) | 6 | 6 |
| | 15½ | 15½ |

### Upper Division

| Junior Year | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem.* |
| Econ. 195, Inter. Econ. Rel. | – | 3 |
| Pol. Sci. 150A-150B, Inter Rel. | 3 | 3 |
| Hist. 173A-173B, Expansion U. S. | 3 | 3 |
| Span. 104A-104B, Span.-Am. Lit. | 3 | 3 |
| Econ. elective | 3 | – |
| Electives | 3 | 3 |
| Exam. in U. S. Constitution | – | – |
| | 15 | 15 |

| Senior Year | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem.* |
| Econ. 190, Foreign Trade | – | 3 |
| Econ. 198, Invest. and Report | 3 | – |
| Hist. 161, Mexico and Carrib. | 3 | – |
| Hist. 162, So. Am. Since Indep. | – | 3 |
| Geog. 116, Latin America | – | 3 |
| Geog. 121, North America | 3 | – |
| Electives from econ., hist., pol. sci., or geog. to complete the general major | 3 | 3 |
| Electives | 3 | 3 |
| | 15 | 15 |

## PRE-JOURNALISM CURRICULUM

Students desiring to emphasize journalism in working for the A. B. degree should take a general major with journalism as one of the three major fields of study. (For explanation of the general major, refer to: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.)

The curriculum suggested below recognizes the widely held contention that for work in the newspaper, magazine, or publishing fields more than vocational training is needed. A competent journalist must have a broad educational background, with particular emphasis on the social sciences.

For specialized journalism (such as foreign correspondence, scientific, financial, or political reporting) the student should include specialized courses. Additional social science courses are recommended as electives.

Students preparing to transfer to other colleges for degrees in journalism should ascertain entrance requirements of the prospective college, and should mold their programs accordingly.

For students undecided upon any field of specialization within journalism the following curriculum is suggested:

### Lower Division

| Freshman Year | Units<br>*1st Sem.* | <br>*2d Sem.* |
|---|---|---|
| P. E. (activity courses) | ½ | ½ |
| Health Ed. 21, Principles | 2 | – |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Psych. 1, General; 5, Principles, or 11, Applied | 3 | 3 |
| Hist. 4A-4B, Mod. Eur. or 8A-8B, Americas or 17A-17B Amer. Civil (if 17A-17B elected, must be in Soph. Yr.) | 3 | 3 |
| Natural Sci. (see lower div. requirements) | 3 | 3 |
| Journ. 92, Special Projects | 1 | 1 |
| Commerce 2A, Pers. Use Typewrit. | – | 3 |
| | 15½ | 16½ |

| Sophomore Year | Units<br>*1st Sem.* | <br>*2d Sem.* |
|---|---|---|
| P. E. (activity courses) | ½ | ½ |
| Journ. 51A, Elements | 3 | – |
| Journ. 51B, News Gathering and Reporting | – | 3 |
| For. Lang. (if not completed in high school) | 3 | 3 |
| Natural Science | 3 | 3 |
| Econ. 1A-1B, Principles; or Sociol. 50, Contemp. Soc. Prob., and 51, Principles | 3 | 3 |
| Lib. Sci. 10, Use of Library | 2 | – |
| Journ. 92, Special Projects | 1 | 1 |
| Elective | – | 2 |
| | 15½ | 15½ |

### Upper Division

On acquiring upper division status, the student should confer with his adviser to plan courses meeting specific and specialized needs and the requirements for the A. B. degree with a general major, including the U. S. Constitution and American history graduation requirements.

# LABORATORY TECHNICIAN—CLINICAL, MEDICAL, OR PUBLIC HEALTH

The license for medical technologist requires five years of experience as a clinica technician to qualify for examination for licensure. The clinical laboratory technician qualifying examination for licensure requires six months apprenticeship, while the public health bacteriologist licensure requires six months in a public health laboratory or twelve months in a clinical laboratory. The student should plan his program in consultation with his adviser.

## Lower Division

| Freshman Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Health Ed. 21, Principles | – | 2 |
| Psychology 1, General | 3 | |
| Chemistry 1A-1B, General | 5 | 5 |
| English 1, Comp., and 2, Lit. | 3 | 3 |
| Zoo. 1A, General, or Biol. 10A-10B, General | 3–4 | 0–3 |
| Social Science | – | 3 |
| Electives | – | 3 |
| | 15½ | 16½ |

| Sophomore Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| *Chem. 5, Quant. Anal. | – | 3 |
| Bacteriology 1, General | 4 | – |
| **Physics 2A, General | 3 | – |
| **Physics 3A, Phys. Meas. | 1 | – |
| **Physiology 1A, 1C, General | – | 5 |
| Foreign Lang. (if needed) | 3 | 3 |
| Social Science | 3 | 3 |
| (See U.S. Hist.-Const. requirements) | | |
| Elective | 2 | 2 |
| | 16½ | 16½ |

## Upper Division

| | Units Jr. Yr. | Units Sr. Yr. |
|---|---|---|
| *Chem. 101, Organic | 4 | – |
| *Chem. 114, 115, 116, Biochem. | 5 | 3 |
| Bact. 102, 103, Bact. and Sero. | 5 | 4 |
| *Bact. 105, Bact. Metabolism | – | 2 |
| *Bact. 106, Virology | 2 | – |
| *Zoo. 128, Parasitology | 4 | – |

| | Units Jr. Yr. | Units Sr. Yr. |
|---|---|---|
| *Zoo. 109, Hematology | 3 | – |
| Electives (to satisfy A.B. or B.S. degree requirements including major and minor. Recommended: Zoo. 100, 104, 108, 126) | 5 | 18 |
| | 28 | 27 |

---

* Not required for Public Health Bacteriologist.

** Not required for Clinical Laboratory Technician nor Public Health Bacteriologist.

## PRE-LEGAL CURRICULUM

The entrance requirements of schools of law range from two years to three and four years of pre-legal work. The lower division requirements of the arts and sciences curricula should be met in full whether the pre-legal curriculum extends over a period of two, three, or four years.

The following curriculum is designed to meet the recommendations of standard American schools of law for a broad and liberal education. For the majority of pre-legal students a general major with concentration in economics, political science, and history, or a major-minor combination in these fields will constitute the most effective preparation for later professional study in law and for later activities in the field of business.

### Lower Division

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| P.E. (activity courses) | ½ | ½ |
| Health Ed. 21, Principles | – | 2 |
| Foreign Lang. (if needed) | 3 | 3 |
| Natural Science (see lower division requirements) | 3–6 | 3–6 |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Com. 14A-14B, Accounting | 3 | 3 |
| Psychology 1, General | 3 | – |
| Electives | – | 4 |
| | 15½ | 15½ |

| | *Units* | |
|---|---|---|
| **Sophomore Year** | *1st Sem.* | *2d Sem.* |
| P.E. (activity courses) | ½ | ½ |
| Natural Science (if needed to complete requirements) | 3 | 3 |
| Econ. 1A-1B, Principles | 3 | 3 |
| Philosophy (6 units selected from 1A-1B, 3A-3B, 20) | 3 | 3 |
| Pol. Sci. (6 units selected from 1A-1B, 71A-71B) | 3 | 3 |
| Electives | 3 | 3 |
| | 15½ | 15½ |

### Upper Division

In the junior and senior years the student will plan his course with the counsel of his adviser in terms of the field of law in which he plans to work, but keeping in mind the entrance examinations and other requirements for admission to schools of law. The course selected will be drawn from the preferred and recommended lists below. Optional courses, that is courses not found in the preferred and recommended lists, may be taken to satisfy the general major pattern requirement, but only with the consent of the student's pre-legal adviser. These courses are not to be considered as general electives.

The student must complete a master plan approved by the pre-legal adviser and filed with the Registrar.

*Preferred List*

Economics 133, 150, 151, 170.
History 151A-151B, 172A-172B, 175A-175B.
Philosophy 121, 129.
Political Science 139A-139B.
Psychology 145.
Sociology 173, 174.

*Recommended List*

Economics 102, 110, 111, 128, 131, 135, 142, 171, 172, 185, 190, 195.
English 106, 120, 126A-126B, 129, 131, 192.
History 111A-111B, 121A-121B, 143A-143B, 175A-175B, 179A-179B, 181A-181B.
Philosophy 101, 111A-111B, 130.
Political Science 105, 111A-111B, 120, 121, 122, 140A, 140B, 142, 143, 150A-150B, 152, 153, 154, 158A-158B, 198.
Sociology 152, 170, 174, 187.
Speech Arts 162, 191, 192.

## LIFE SCIENCE VOCATIONAL CURRICULA

Students planning to enter any of the terminal curricula listed below should include in their high school program the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, 3 units.

### Lower Division

| Freshman Year | *Units* 1st Sem. | *Units* 2d Sem. |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Engl. 1, Comp. and 2, Lit. | 3 | 3 |
| Zoo. 1A-1B, General | 4 | 4 |
| Social Science (see lower division requirements) | 3 | 3 |
| Chem. 1A-1B, General | 5 | 5 |
| | 15½ | 15½ |

| Sophomore Year | *Units* 1st Sem. | *Units* 2d Sem. |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Botany 2A-2B, General, or Botany 1 | 4 | 4 |
| Bact. 1, General | 4 | – |
| Psychology 1, General | – | 3 |
| Speech 2A, Fundamentals | 3 | – |
| Social Science (complete lower div. requirements) | 3 | 3 |
| Electives (see lower div. requirements) | 2 | 6 |
| | 16½ | 16½ |

Prepare for U. S. History-Constitution graduation requirement.

### Upper Division

Work in the upper division should be planned in consultation with the Chairman of the Division of Life Sciences. A terminal curriculum is offered leading to the following occupational fields: Entomology, fish and game, and wild life. Courses may be selected from those listed below.

### WILD LIFE, FISH AND GAME

General Entomology
Economic Entomology
Medical Entomology
Systematic Entomology
Cold Blooded Vertebrates
Parasitology
General Physiology
Ecology
Taxonomy of Plants
Microtechnique
Mammalogy
Ornithology
Economic Biology
Organic Chemistry
Statistics
Public Administration

## PRE-MEDICAL CURRICULUM

The entrance requirements of medical colleges ordinarily range from three to four years of pre-medical work. The lower division requirements of the liberal arts curricula include the general requirements of standard medical colleges and should therefore be met in full whether the curriculum extends over a period of three or of four years. All plans for pre-medical work should include an arrangement of courses to meet the requirements of the medical college which the student expects to enter.

A student who is pursuing a four-year pre-medical curriculum should major in chemistry or zoology in his junior and senior years, and must meet all upper division requirements for the A.B. degree in the liberal arts curricula.

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, 3 units. Two units of Latin are recommended.

### Lower Division

| Freshman Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Health Ed. 21, Principles | 2 | – |
| Chem. 1A-1B, General | 5 | 5 |
| Psych. 1, General | – | 3 |
| Engl. 1, Comp. and 2, Lit. | 3 | 3 |
| French or German (if needed) | 3 | 3 |
| Elective | 3 | 2 |
|  | 16½ | 16½ |

| Sophomore Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Zoology 1A-1B, General | 4 | 4 |
| Chem. 5, Quantitative Anal. | 3 | – |
| Soc. Sci. | 3 | 3 |
| French or German (if needed) | 3 | 3 |
| Elective | 3 | 6 |
| Prepare for U. S. Constitution — American history, graduation requirement. |  |  |
|  | 16½ | 16½ |

### Upper Division

| Junior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Phys. 2A-2B, General | 3 | 3 |
| Phys. 3A-3B, Physical Measure | 1 | 1 |
| Chem. 101, Intro. Organic, and 102, Organic Chem. Laboratory | 4 | 3 |
| Zool. 100, Embryology | – | 4 |
| Zool. 106, Comp. Anat. of the Vertebrates | 4 | – |
| Electives | 4 | 4 |
|  | 16 | 15 |

| Senior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Upper division requirements and electives for the major in chemistry or zoology, the minor and the degree | 15 | 15 |
|  | 15 | 15 |

## PRE-NURSING CURRICULUM

A student who plans to complete a curriculum in nursing leading to a degree and a certificate in nursing in another collegiate insitution should ascertain the lower division requirements of that institution.

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, 3 units; domestic science (foods), 1 unit; 2 units of Latin are recommended. See separate bulletin for Bachelor of Science Degree in Nursing Education.

| Freshman Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Health Educ. 21, Principles | – | 2 |
| Biol. A, Solutions and Dosage | 2 | – |
| Chem. 2A-2B, Fundamentals, or 1A, General | 3–5 | 0–3 |
| Home Econ. 61A-61B, Nutrition | – | 3 |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| French or German (if needed) | 3 | 3 |
| Electives | 3–6 | 2–5 |
|  | 16½ | 16½ |

| Sophomore Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Psych. 1, Gen., and 11, Applied | 3 | 3 |
| Econ. 1A-1B, Prin., or Sociol. 50, Contemp. Soc. Prob., and 51, Principles | 3 | 3 |
| Bacteriology 1, General | 4 | – |
| Physiology 1A, 1C, Human Physiology | – | 5 |
| Zoology 8, Human Anatomy | 3 | – |
| Electives | 3 | 5 |
|  | 16½ | 16½ |

## PRE-OPTOMETRY CURRICULUM

The high school program should include the following subjects: Elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; foreign language, 2 units.

The following curriculum prepares for junior standing in university schools of optometry. Student should consult the cagalog of the school to which he expects to transfer.

| Freshman Year | *Units* *1st Sem.* | *2d Sem.* |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Chemistry 1A-1B, General | 5 | 5 |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Speech Arts 2A, Fundamentals | – | 3 |
| Foreign Language (if needed) | 3 | 3 |
| Soc. Sci. (or electives) | 5 | 2 |
| | 16½ | 16½ |

| Sophomore Year | *Units* *1st Sem.* | *2d Sem.* |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Physics 2A-2B, General | 3 | 3 |
| Physics 3A-3B, Physical Measure | 1 | 1 |
| Psych. 1, General | – | 3 |
| Math. 3A, Plane Anal. Geom. | 3 | – |
| Soc. Sci. (complete requirement) | 3 | 3 |
| Physiol. 1A, 1C, Human | – | 5 |
| Health Ed. 21, Principles | 2 | – |
| Chem. 101, Intro. Organic | 4 | – |
| | 16½ | 15½ |

## PRE-PHARMACY CURRICULUM

The high school program should include the following subjects: Elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; foreign language, 2 units.

Some colleges of pharmacy offer a four-year curriculum, others a six-year curriculum of pharmacy. Students should ascertain the extent and requirements of the curriculum of the college of pharmacy they expect to enter. Colleges of pharmacy which offer the four-year curriculum normally permit not more than one year of credit in time for work completed in an institution other than a college of pharmacy. Colleges of pharmacy which offer a six-year curriculum normally permit not more than two years of credit in time for work completed in an institution other than a college of pharmacy. At San Diego State College the following pre-pharmacy curricula are offered:

| For the Four-Year Curriculum | *Units* *1st Sem.* | *2d Sem.* |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Chemistry 1A-1B, General | 5 | 5 |
| Zoology 1A-1B, General | 4 | 4 |
| Botany 1, Introduction | 4 | – |
| Math. 3A, Plane Anal. Geom. or Math. 1, Alg. and Trig. (Prerequisite: Math. C and D or two years of high school algebra and ½ year of Trig.) | – | 3 |
| | 16½ | 15½ |

| For the Six-Year Curriculum | *Units* *1st Sem.* | *2d Sem.* |
|---|---|---|
| Freshman year same as for the four-year curriculum. | | |
| P.E. (activity courses) | ½ | ½ |
| Foreign Language (if needed) | 0–3 | 0–3 |
| Social Science (recommend including Hist. 17A-17B) | 6 | 6 |
| Physics 2A-2B, General | 3 | 3 |
| Physics 3A-3B, Phys. Meas. | 1 | 1 |
| Psychology 1, General | – | 3 |
| Health Ed. 21, Prin. | 2 | – |
| | 15½ | 15½ |

The following courses are also commonly required or recommended: Chemistry 5, Quantitative Analysis 101, Introductory Organic 102, Organic Chemistry Laboratory, Physiology 1A, Human Physiology or Zoology 20, Human Anatomy and Physiology.

## PUBLIC ADMINISTRATION CURRICULUM

The Public Administration curriculum is an adaptation of the *general major* designed for students interested in taking the junior administrative examination for entrance into local, state, or federal government service. It is also designed to prepare students for graduate work in the field of Public Administration. Students planning to enter graduate work in this field should consult with the adviser in Public Administration in planning the student program.

The outline of courses suggested below is for the purpose of guiding the student in planning the *general major*. For further information on the *general major* refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

### Lower Division

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| P. E. (activity course) | ½ | ½ |
| Health Educ. 21, Prin. | – | 2 |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Psych. 1, Gen., and 5, Prin. | 3 | 3 |
| Geog. 1, Elements (Nat. Sci.) | 3 | – |
| Foreign language (if needed) | 3 | 3 |
| Electives (see lower div. requirements) | 3 | 4 |
| | 15½ | 15½ |

| | *Units* | |
|---|---|---|
| **Sophomore Year** | *1st Sem.* | *2d Sem.* |
| P. E. (activity courses) | ½ | ½ |
| Pol. Sci. 71A-71B, Am. Gov't | 3 | 3 |
| Econ. 1A-1B, Principles | 3 | 3 |
| Hist. 17A-17B, Am. Civilization | 3 | 3 |
| Electives (to include Math C, or equivalent, and completion of lower div. requirements) | 6 | 6 |
| | 15½ | 15½ |

### Upper Division

| | *Units* | |
|---|---|---|
| **Junior Year** | *1st Sem.* | *2d Sem.* |
| Pol. Sci. 140A-140B, Prin. Pub. Admin. | 3 | 3 |
| Econ. 131, Pub. Finance | – | 3 |
| Econ. 140, Statistics | 3 | – |
| Soc. Sci. (Upper div. courses to apply toward the third field for the general major, to be selected in consultation with adviser) | 3 | 3 |
| Electives | 6 | 6 |
| | 15 | 15 |

| | *Units* | |
|---|---|---|
| **Senior Year** | *1st Sem.* | *2d Sem.* |
| Pol. Sci. 139A-139B, Am. Const. Development | 3 | 3 |
| Pol. Sci. 198, Sp. Studies | 3 | – |
| Econ. upper div. electives selected with approval of adviser | – | 3 |
| Electives, including upper div. units to complete 40 u.d. units for grad. Selected with approval of adviser | 8–10 | 9 |
| | 15 | 15 |

## RECREATION CURRICULUM

The curriculum in recreation is arranged under the plan of the general major to provide a program to train for recreation and camp leadership, work with youth groups, and related activities. See description of the general major in section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

Consultation with an adviser in the Department of Physical Education is advised in selecting courses and fields of study for the general major.

### Lower Division

| | Units |
|---|---|
| Health Ed. 21, Principles | 2 |
| Phys. Educ. | 7½–8 |
| Activity courses: 3 for men; 6 for women, selected from the following: 2A, 3A, 3B, 4, 5, 6, 9, 11A, 13, 14, 18 | |
| Phys. Ed. 43, Prof. Act. (Men) (2) | |
| Phys. Ed. 51, First Aid (2) | |
| Phys. Ed. 53, Phys. Ed for Elementary Schools (2½) | |
| Soc. Sci. (to include Sociol. 50, Contemp. Soc. Prob., and 51, Principles | 12 |
| Psych. 1, General | 3 |
| Foreign Lang. (if two years not completed in high school) | 6 |
| Natural Sci. (Phy. Sci. 10, Photography, or Astronomy 1, Descriptive, Botany 4, Calif. Plants, Geol. 2A, General. Include laboratory science if needed) | 12 |
| Engl. 1, Comp., and 2, Lit. | 6 |
| Speech Arts 2A, Fundamentals | 3 |
| Electives | 8–8½ |
| Prepare for U. S. Constitution and American History graduation requirements. | |
| | 60 |

### Upper Division

| | Units |
|---|---|
| General Major | 36 |
| 1. Sociology. 9–15 units selected from: | |
| 173, Criminology and Penology (3) | |
| *174, Juvenile Delinquency (3) | |
| 190, Fields of Social Work (3) | |
| 110, Race Relations (3) | |
| *185, Comm. Welfare Org. (3) | |
| *187, Urban Sociology (3) | |
| 2. Physical Education. 9–15 units selected from: | |
| 145, Prof. Act. (men) or 156A-156B (women) (2) | |
| 146, Prof. Act. (men) or 161 (women) (2) | |
| *165, Community Recreation (3) | |
| *170A-170B, Recreational Leadership (4) | |
| *183A-183B, Field Work in Recreation (3–6) | |
| 3. Select a third field for the general major from the following: Speech Arts, psychology, art, music, education, biological science, after consultation with adviser. (9–15) | |
| Psych. 106 or Educ. 102B-102C | 3–6 |
| Psych. 145 | 3 |
| Educ. 174, Audio-Visual-Radio Educ. | 2 |
| Electives | 13–16 |
| | 60 |

---

* These courses are required.

## PRE-SOCIAL WORK CURRICULUM

The professional curriculum in social service prepares for admission to graduate work in recognized American schools of social work. This curriculum should be pursued by those who plan careers in federal, state and local welfare work; social work in public schools including preparation for a teaching credential; family and children's private case work agencies; social settlement work; county probation work; child welfare agencies; statistical and investigational work in private and public agencies; work in public institutions for the defective and delinquent; medical social service and psychiatric social work in hospitals and clinics; executive positions in social work; and social work in numerous other organizations.

The lower division requirements of the arts and sciences curricula include the general requirements of recognized professional schools of social work and should therefore ordinarily be met in full. The outline of courses below meets the requirements for the general major. For description of the general major, refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

The following subjects should be completed in high school: elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; foreign language, 3 units in one language.

### Lower Division

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| P. E. (activity courses) | ½ | ½ |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Biol. 10A-10B, General | 3 | 3 |
| Foreign Lang. (if needed) | 3 | 3 |
| Psych. 1, Gen., and 11, Applied | 3 | 3 |
| Electives (include natural science requirements. Recommended: Speech 2A-2B, Fund.) | 3 | 3 |
| | 15½ | 15½ |

| | *Units* | |
|---|---|---|
| **Sophomore Year** | *1st Sem.* | *2d Sem.* |
| P. E. (activity course) | ½ | ½ |
| Econ. 1A-1B, Principal | 3 | 3 |
| Soc. 50, Contemp. Soc. Prob. | 3 | – |
| Soc. 51, Principles | – | 3 |
| Pol. Sci. 1A-1B, Intro., or 71A-71B, Am. Govt. | 3 | 3 |
| Health Educ. 21, Principles | 2 | – |
| Electives (include natural science, if needed. Recommended: anthropology) | 4 | 6 |
| | 15½ | 15½ |

Prepare for U. S. History-Constitution graduation requirement.

### Upper Division

| | | *Units* |
|---|---|---|
| Soc. 103, Elem. Soc. Statistics | | 3 |
| Soc. 187, Urban Sociology | | 3 |
| Soc. 190, Fields of Soc. Work | | 3 |
| Soc. elective | | 3 |
| Econ., nine units selected from: | | 9 |
| 150, Labor Problems | (3) | |
| 170, Govt. and Business | (3) | |
| 185, Soc. Insurance | (3) | |
| 195, Inter. Econ. Relations | (3) | |
| 102, Comp. Econ. Systems | (3) | |
| 131, Public Finance | (3) | |
| Psych. 145, Social Psychology | | 3 |
| Psych. 150, Abnormal Psychology | | 3 |

| | | *Units* |
|---|---|---|
| Psych. 151, Clinical Appraisal | | 3 |
| Pol. Sci., six units selected from: | | 6 |
| 140A-140B, Prin. Public Admin. | (3) | |
| or 142, State Govt. | (3) | |
| 143, Mun. and Co. Govt. | (3) | |
| Zoo. 165, Human Heredity, or 155, Genetics | (3) | |
| Upper division elective | | 4 |
| Additional electives | | 20 |
| | | 60 |

## PRE-VETERINARY CURRICULUM

Most colleges of veterinary medicine require but one year (32 units) of pre-veterinary college work. There are a few colleges which require two years and it is best to consult the bulletin of the college to which admission is desired for special requirements.

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| P. E. (activity courses) | ½ | ½ |
| Chemistry 1A-1B, General | 5 | 5 |
| Zoology 1A-1B, General | 4 | 4 |
| English 1, Comp., and 2, Lit. | 3 | 3 |
| Psychology 1, General | 3 | – |
| Health Educ. 21, Principles | – | 2 |
| Electives | 3 | 2 |
| | 16½ | 16½ |

| | *Units* | |
|---|---|---|
| **Sophomore Year** | *1st Sem.* | *2d Sem.* |
| P. E. (activity courses) | ½ | ½ |
| Physics 2A-2B, General | 3 | 3 |
| Chem. 101, Intro. Organic | 4 | – |
| Zoo. 100, Embryology | – | 4 |
| Statistics (offered in Econ., Psych., or Soc.) | 3 | – |
| Social Science | 3 | 3 |
| Electives (recommended: Math, Foreign Lang., Entomology) | 3 | 6 |
| | 16½ | 16½ |

# ANNOUNCEMENT OF COURSES

## COURSE NUMBERS

Courses numbered from 1 to 99 are lower division (freshman or sophomore) courses; those numbered 100 to 199 are upper division (junior or senior) courses; those numbered 200 to 299 are graduate courses (see section on Admission and Registration for information concerning eligibility to enroll in these courses) those numbered 300 to 399 are professional education courses to be taken at the graduate level.

## CREDIT FOR UPPER DIVISION AND GRADUATE COURSES

Freshmen are not admitted to upper division courses.

A sophomore may enroll in an upper division course for lower division credit provided he has earned an average grade of not less than 1.5 in all college work undertaken, and provided he receives the instructor's permission to enroll in the course.

A second semester sophomore may enroll in an upper division course for upper division credit without the foregoing grade limitations provided the units earned in the upper division course or courses are in excess of the 60 units required in the lower division.

A student with sophomore standing may carry upper division courses for upper division credit provided that he has the written approval of the chairman of the department and the Dean of Arts and Sciences or the Dean of Education.

Graduate credit for courses numbered 200 to 299 is limited to students with graduate status. (See section on Admission to Graduate Study.)

## UNITS

Figures in parentheses indicate the unit value of the course.

One "unit" represents 50 minutes of recitation or lecture, together with the required preparation, or three hours laboratory work each week for a semester of 18 weeks.

## SEMESTER IN WHICH COURSES ARE OFFERED

Roman numeral I indicates course is offered in Fall semester. Roman numeral II indicates course is offered in Spring semester.

Following the course title are designations of credit and the semester in which course is offered. Examples:

(3) I____________________________________Three units. Offered first semester
(3) I, II_______________Three units. Offered first semester and second semester
(3-3) Year, I
Three units each semester. Year sequence beginning in the first semester
(3-3) Year, I, II
Three units each semester. Year sequence beginning either semester

Although the college fully expects to carry out the arrangements planned in the list of courses, it reserves the right to make changes. Classes in which the enrollment does not come up to the minimum number set by the State Department of Education may not be offered or may be postponed.

## PREREQUISITIES

Prerequisites for courses are stated. A student should not enroll in a course for which he is not eligible.

Admission to all graduate courses requires graduate status and permission of the instructor.

## PROVISIONAL COURSES

Courses number 40 to 45 are open only to students who are in the provisional program. Other students (those not having provisional status) are not eligible to take these courses.

# AESTHETICS

## IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is not offered in aesthetics; however, certain courses in this field are required as part of the majors in art and in music. For specific information, refer to these departments.

A *teaching major* is not offered in aesthetics; however, certain courses in this field are required as part of the teaching major in art and in music for the general secondary and the special secondary credentials in these fields. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is not offered in aesthetics.

A *teaching minor* is not offered in aesthetics; however, certain courses in this field are required as part of the teaching minor in art for the general secondary, the general junior high school, and the special secondary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A-1B. Survey of Music** (2-2) Year, I

Correlation of music and other arts. Elements, structure, instrumental timbre of music. Folk music of various countries. Attendance required at local concerts. Previous musical background not required. No credit for music majors.

**5. Art Orientation** (2) II

An illustrated lecture course dealing with aesthetic meaning and its relation to the structure of art products. Designed to increase both understanding and appreciation of the visual world in general and of the fine arts in particular.

**50. Appreciation and History of Art** (2) I

A survey of art development in the painting, sculpture, architecture, and handicrafts from dawn of art to the Renaissance. Illustrated.

**51. Survey of Mexican Art** (2) I

A study of Mexican and Middle American Art from earliest time to present.

**52A-52B. Survey of Oriental Art** (3-3) Year, I, II

A study of the art of the great cultures of the Orient. (52A is a prerequisite for 52B.)

### Upper Division Courses

**100. Great Music** (3) Summer

A listening course designed especially for the layman and concert-goer. Masterpieces of instrumental and vocal music will be performed by means of recordings and by local musicians. A study of artistic trends and their effect upon musical composition and performance. Correlation of musical art and other arts. No prerequisites. No credit for music majors.

**102A-102B. Music History** (2-2) Year, I

The various movements in the development of music as related to the other arts. The chronological development of the art of music with particular emphasis on the larger works. Considerable attention is given to the works of modern composers. Many symphonic works are studied from the orchestral scores. Music majors are required to complete additional assignments for full credit. Prerequisite: Aesthetics 1A or 1B.

**138. Introduction to Aesthetic Appreciation** (1) I

Major forms of expression and aesthetic experience in art, music and literature, presented by an interdepartmental staff through lectures, demonstration, and panel discussions. Not open to students with credit for Comparative Literature 138.

**150. Appreciation and History of Art** (2) II

The period from the Renaissance through the modern school treated in the same manner as in Aesthetics 50.

**162. History and Philosophy of the Dance** (2) I (Offered 1951-52)

Historical background and appreciation of dance, with special emphasis upon the development of art in America. The justification for dance as an educational and creative art medium and its place in the curriculum. Not open to students with credit for Physical Education 162.

# ANTHROPOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is not offered in anthropology; however, upper division units in anthropology may be planned under the *general major* program. Students wishing to use anthropology as a field of concentration in the *general major* should include the following courses in the lower division: Anthropology 1A-1B, 2 or 3; Geography 1, 2 or Geology 1A-1B; Sociology 50, 51; recommended: Spanish or German. The following supplementary fields of study are recommended in the upper division with a view to later specialization in anthropological work: For *archaeology:* Art, geography, geology; for *physical anthropology:* Psychology, statistics, and zoology; for *museum work:* Art, education, and psychology. For further information on the *general major*, refer to the section on the Bachelor of Arts Degree.

A *teaching major* is not offered in anthropology; however, it may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of the requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in anthropology. The minor must include at least 15 units of work in anthropology, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in anthropology for the general secondary credential; however, anthropology may be used as a part of the *social science minor* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the requirements for the teaching minor for these credentials.

**1A-1B. General Anthropology** (3-3) I

Origin and antiquity of man. Theories of human descent. Classification of races. Origin and early development of civilization.

**2. Physical Anthropology** (3) I

An introduction to the studies of primatology and anthropometry. The comparative anatomy of the monkeys and great apes, the emergence of the anthropoids, the reconstruction of early man from fossil evidence. The landmarks, measures and indices used in the metrical study of the living human body and skeletal material. Sexual differences and growth changes in the skull and skeleton. Medico-legal applications.

**3. Survey of Archaeology** (3) II

A review of the history of modern archeology and a discussion of its methods. The development of archaeological techniques in reconstructing the ancient cultures of the Mediterranean world. The problems of present day archaeology in the Near East, the Orient and the Americas. The principles and basic techniques used in the excavation of sites and the reporting of findings.

**54. Social Anthropology** (3) II

An anthropological study of social institutions in primitive and civilized societies. The evolution of family organization, religion, property right, and government traced in elementary and advanced civilization.

### Upper Division Courses

**151A. The North American Indian** (3) I
Pre-Columbian cultures of the North American Indian. The origin and migration of New World peoples. Industries, arts, crafts, social organization, religion and other phases of American Indian civilization.

**151B. Indian Civilization of Middle America** (3) II
The development of civilization in Pre-Columbian Mexico and Central America: Aztec, Mayan, and related cultures.

**152. World Ethnography** (3) I (Not offered in 1950-51)
The cultural patterns of representative aboriginal peoples. Industries, arts, social organization and supernaturalism considered with a view to environmental adjustment, historical development and functional interrelation. Ethnological theories reviewed and applied in interpreting illustrative aboriginal societies.

**153. Primitive Religion** (3) II (Not offered in 1950-51)
Beliefs and ritual of primitive man. Magic and religion. Forms of animism and polytheism. Primitive mentality and the supernatural.

**161. The California Indian** (3) Summer
A survey of native California Indian culture with stress on the Indian groups of Southern California. The industries, arts, social organization, folklore and religion will be considered as revealed through the study of living peoples and archaeological evidences.

**165. Ethnology and Race Psychology** (3) I (Not offered in 1950-51)
The biological basis of race, somatic and serologic typology, racial mentality, tests and their ethnopsychological significance, abnormality in ethnic groups. Race and culture; ethnic aspects of demography.

**172. Indian Cultures of the Southwest** (3) Summer
Indian cultures of the past and present in the Southwestern states. Arts, crafts, architecture and religion as revealed through archaeology and ethnology.

**199. Special Study** (3) I, II

## ART
### IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is offered in art. Every student who plans to major in art, whether under the liberal arts program or the teacher training program, should complete the following basic courses: Aesthetics 5 or 51, and 50, Art A-B, 6A-6B, and 14A. Under the liberal arts program the student majoring in art may choose either a group of courses in which the crafts are emphasized or a group of courses in which the graphic arts are emphasized. One of the following plans should be selected:

Emphasis on crafts: The student should add to the list of basic courses required of all art majors the following courses: Lower division: Art 6D, 7, 61B and four units of art electives; upper division: Aesthetics 150, Art 106A or B or C, 106D, 111A, 117A-117B, 119A-119B, and four units of art electives. This program points in the direction of industrial design, interior design, cabinet making, sculpture, weaving, textile design, ceramics, etc.

Emphasis on graphic arts: The student should add to the list of basic courses required of all art majors the following courses: Lower division: Art 15A, 16A, and 4 units of art electives; upper division; Aesthetics 150, Art 106A, 112A-112B, 115A-115B, 116A-116B, 117A, and 6 units of art electives. This program points in the direction of illustration, portraiture, landscape painting, mural design, poster design, production illustration, advertising design, fashion design, etc.

A *teaching major* in art is offered for the general secondary credential and the special secondary credential. Students planning to teach art in the secondary schools should add to the list of basic courses required of all art majors the following courses: Lower division: Art 61A-61B, and six units of art electives; upper division: Aesthetics 150, Art 116A, 112A, 106A, 119A, 195, and six units of art electives. Speech Arts 140A should also be completed. For further information, refer to the outlines of requirements for the special secondary and general secondary credentials.

## Minor

A *minor in arts and sciences* is offered in art. The minor must include at least 15 units of work in art, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in art for the general secondary, the general junior high school, and the special secondary credentials. Art may be offered only as a second teaching minor for the general elementary and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

## Art Appreciation, History and Orientation

For courses in appreciation, history of art, and art orientation, see aesthetics. Many students, regardless of the field in which they may be majoring, recognize the need for an intelligent approach to the subject of art and art appreciation. However, due to the erroneous popular feeling that art is a subject requiring "talent," these students may refrain from enrolling in art courses. For students who desire a better understanding of art, but who do not hope to acquire any of the art skills, the following courses are recommended.

| | *Units* |
|---|---|
| Aesthetics 5, Art Orientation | 2 |
| Aesthetics 50, History and Appreciation of Art | 2 |
| Aesthetics 51, Survey of Mexican Art | 2 |
| Aesthetics 52A-52B, Survey of Oriental Art | 6 |
| Art 8, Costume and Home-furnishing | 2 |

Other courses which require certain skills but which are not beyond the ability of the average college student are:

| | |
|---|---|
| Art 61B, Crafts | 2 |
| Art 6A, Design | 2 |
| Art A, Drawing and Composition | 2 |
| Art 94, Costume design | 2 |

## Lower Division Courses

**A. Drawing and Composition** (2) I, II

Problems involving perspective to develop ability to draw still life, furniture, exteriors, interiors, and the like. (High school equivalent may excuse the student from this course.)

**Art B. Drawing and Composition** (2) I, II

Drawing of mechanical and natural forms by the use of line and value. Emphasis on proportion and structure. Some quick sketching, gesture and contour drawing. Prerequisite: Art A.

**6A. Design** (2) I, II

Fundamentals of design and composition and theory of color. Basic course used as a prerequisite for all advanced work.

**6B. Design** (2) I, II

Original work in creative design and representation with special stress on modern tendencies. Prerequisite: Art 6A.

**6D. Design** (2) I, II

Study of the principles of design through the making of furniture. Prerequisite: 6A.

**7. Line, Color and Display** (2) I, II

The principles of line, color and arrangement applied to store and window display. Study and observation of windows, color and materials used in display. Building models and practical problems in arranging colors, textures, and forms in windows to fit different kinds of merchandise. (Students taking this course for upper division credit, Art 107, will be required to do additional work.)

**8. Costume and House Furnishings** (2) I, II

An appreciative study of modern architecture and modern house furnishings with emphasis on the spirit of gracious living and an appreciative study of the modern dress with emphasis on suitability to the figure, the personality and the occasion.

**14A. Lettering** (2) I

Fundamental art principles applied to lettering. Practice for quick, accurate lettering; original problems using letters as design. Prerequisite: Art 6A.

**14B. Posters and Commercial Art** (2) II

The application of lettering to posters, newspaper and magazine advertising, and other forms of commercial art. The study of composition combined with lettering and special study of modern tendencies in publicity. Prerequisites: Art 6A, 14A.

**15A-15B. Life Drawing** (2-2) Year, I, II

Drawing from the nude model. Prerequisite: Art A-B.

**16A-16B. Painting** (2-2) I, II

Semester I: Composition of still life in oil. Semester II: Landscape and more advanced composition in oil. Prerequisite: Art A-B.

**17A-17B. Sculpture** (2-2) I, II

Creative design in such materials as clay, wood, stone, concrete, etc. Prerequisites: Art 6A-6B.

**61A. Crafts in the Elementary Schools** (2) I, II

A foundation course which develops unification of work of the elementary grades through activities and experiences. These experiences grow out of environmental activities. They include study and working of clay, lumber and tools, textiles, and cardboard construction. Prerequisite: Art 6A.

**61B. Crafts** (2) I, II

Problems involving the application of design principles to various fields—pottery, textiles, weaving, metal work, wood-carving, and book-binding. Prerequisite: Art. 6A.

**94A-94B. Costume Design** (2-2) Year, I, II

Original designs of modern costumes suitable to the individual or to distinct types; the drawing of fashion figures; the rendering of fabrics and textures. Prerequisite: Art 6A.

**95A-95B. Interior Decoration** (See Art 195A-195B)

## Upper Division Courses

**106A-106B. Printmaking** (2-2) I, II

Study of print crafts which includes the making of linoleum blocks, wood engravings, etchings and lithographs. Prerequisites: Art A. B. 6A.

**106C. Illustration** (2) II

Same as 160A-B except that printmaking is applied to problems of book illustration. Prerequisites: Art A, B, 6A.

**106D. Advanced Furniture Design** (2) I, II

(See Art 6D) Prerequisite: Art 6D.

**107. Line, Color and Display** (2) I, II

(See course description under Art 7)

**111A-111B. Industrial Design** (2-2) Year, I, II

Design of objects for manufacture with reference to their use, materials, and in accordance with factory practices and machine techniques. Practice in the techniques of presentation, working drawings, renderings in perspective and scale models. Prerequisite: Art 6A-6B.

**112A-112B. Design and Composition** (2-2) Year, I, II

Imaginative organization of space by means of color, dark and light, perspective, and textures of various materials. Prerequisites: Art A-B, 6A-6B.

**115A-115B. Life Drawing and Painting** (2-2) I, II

Drawing and painting from nude and costume models. Prerequisite: Art A-B.

**115C-115D. Advanced Life Drawing and Painting** (2-2) Year, I, II
Painting from nude and costume models and advanced composition in oil. Portraiture. Prerequisite: Art 115A-115B.

**116A-116B. Advanced Painting** (2-2) Year, I, II
Painting in oil from still life, landscape, or models, stressing composition. Prerequisite: Art 16A or 16B.

**117A-117B. Sculpture** (2-2) Year, I, II
Creative design in such materials as clay, wood, stone, concrete, etc. Prequisites: Art 6A-6B and 17A or 17B.

**119A. Ceramics** (2) I
Building of pottery on the basic techniques of coil, slab, mold making, and slip casting. Ceramic sculpture, glazing and kiln operations: Art 6A.

**119B. Ceramics** (2) II
Study of glazes and elementary clay technology. Mold making, slip casting with application to individual creative problems. Prerequisite: Art 119A.

**166. Special Studies**
A student with the necessary grade point average may apply for work in an upper division art course and register for Art 166, Special Studies. (See Honor Group.)

**194A-194B. Costume Design** (2-2) Year, I, II
For description, see Art 94A-94B. Prerequisite: Art 6A.

**195A-195B. Interior Design** (2-2) I, II
The consideration of the house as a unit; the arrangement of garden, house, floor plan, and furniture as functional and decorative problems. Prerequisite: Art A and 6A, 195A is a prerequisite for 195B.

### Graduate Courses

**200A-200B. Special Problems** (2-2) I, II
A graduate course in which students may carry out projects in various fields of art under the direction of faculty members who are specialists in the field chosen. Students registering for this course must apply for work within a certain field after discussions with the art faculty.

**Art 199. Special Problems in Art**
Admission by permission of chairman of department.

## ASTRONOMY
### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is not offered in astronomy. Students desiring to prepare for advanced work in astronomy should include the following courses: Astronomy 1, 2, 3, 9, and 10; Mathematics 3A-3B, 4A-4B; Physics 4A-4B-4C; a reading knowledge of French and German.

A *teaching major* is offered in astronomy; however, astronomy may be used as part of the general science major for the general junior high school credential. For specific information, refer to the outline of requirements for the general science teaching major for this credential.

### Minor

A *minor in arts and sciences* is offered in astronomy. The minor must include at least 15 units of work in astronomy, nine units of which must be from courses carrying upper division credits.

A *teaching minor* is not offered in astronomy; however, astronomy may be used as part of the *general science minor* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the requirements of the teaching minor for these credentials.

## Lower Division Courses

**1. Descriptive Astronomy** (3) I, II

A cultural course planned to develop an appreciation of astronomy with emphasis on the solar system. Attention is given to the methods by which astronomical knowledge has been gained. A six-inch refractor and an eight-inch reflecting telescope are available for observation.

**2. Modern Astronomy** (3) II

A study of the stellar system in the light of modern research, especially photographic and spectrographic. Prerequisite: Astronomy 1 or permission of the instructor.

**3. Surveyor's Course in Practical Astronomy** (3) II

The principles of spherical astronomy adapted to the needs of engineering students. Computation and observation. Two lectures and one three hour laboratory period each week. Prerequisite: Surveying 1A or permission of the instructor. Astronomy 1 and 9 desirable.

**9. Practice in Observing** (1) I, II

A course designed to supplement Astronomy 1. The course will include constellation study, use of astronomical coordinates, and descriptive observations of celestial objects with the telescope. One evening laboratory period each week Recommended: Astronomy 1 or concurrent registration in Astronomy 1.

**10. Advanced Observational Astronomy** (1) II

A continuation of Astronomy 9. More advanced problems in observing will be taken up such as the determination of azimuth by observations of Polaris, transit observations, astronomical photography, etc. One three-hour evening laboratory period each week. Prerequisite: Astronomy 9.

**12. Elementary Navigation** (3) I

A study of compass corrections, time, line of position, use of celestial coordinates, etc. A few class hours devoted to the use of tables such as H.O. 214 for the solution of astronomical triangle. One laboratory period each week. Prerequisite: Astronomy 1 or permission of the instructor.

## Upper Division Courses

**101. Principles of Astronomy** (3) I

A course designed particularly to provide background for teachers. It consists of two lectures and one laboratory period each week. Students will be required to become familiar with the prominent constellations, brighter stars in the sky, and with the general characteristics of the solar and stellar system.

**103. Astronomical Optics** (2) II

This course aims to acquaint the students with the optics and methods of testing an astronomical telescope. The course consists of one lecture and one laboratory period each week. The student is required to grind a four-inch astonomical mirror. Prerequisite: Astronomy 1 or permission of instructor.

**105. Historic Development of Astronomy** (3) I (Not offered in 1950-51)

A study of the more important problems and astronomical concepts in the light of their historical development. Particular attention is given to the biography and contributions of the more important astronomers, such as, Galileo, Kepler, Newton, Herschel, Bessel, etc.

**107. Method of Least Squares and Computing Practices** (3) I

Fundamental principles with applications in the fields of astronomy, physics, and engineering.

**110. Introduction to Study of Variable Stars** (3) II

A study will be made of the various types of variable stars, their spectra, periods, methods of observing, etc. In the laboratory the light curve of several typical variables will be observed. Two lectures and one laboratory period each week. Prerequisite: Astronomy 2. Astronomy 9 desirable.

**112. Elementary Astrophysics** (3) I

A lecture course in the application of physics to astronomy: Much of modern astronomical research is in the field of astrophysics. An occasional laboratory period will be substituted by appointment for the lecture period. Prerequisites: Astronomy 2 or college physics.

**199. Special Problems** (1 or 2) I, II

Admission by consent of instructor. Credit and hours to be arranged in each case. Open to students who have completed three units in astronomy.

## BACTERIOLOGY

### IN THE DIVISION OF LIFE SCIENCES

Major work is not offered in bacteriology. Courses in this field are recommended for students who are preparing to teach science in junior high school or life sciences in high school.

### Minor

A *minor in arts and sciences* is offered in bacteriology. Lower division requirements: Bacteriology 1, Chemistry 1A-1B. Recommended: Zoology 20 or Physiology 1A. Upper division requirements: Chemistry 101, Bacteriology 102 and 103. Recommended: Chemistry 102, 114A, 115, 116, Bacteriology 105, 106, and 199.

A *teaching minor* is not offered in bacteriology.

### Lower Division Courses

**1. General Bacteriology** (4) I, II

An introduction to bacteriology. Effects of physical and chemical agencies upon bacteria; biochemical activities of bacteria; microscopic examination and cultivation of bacteria; the bacteria of air, water, soil, milk and dairy products, other foods; industrial applications. Introduction to disease-producing bacteria. Two hours of lecture and six hours of laboratory per week. Prerequisite: Chemistry 1A or 2A.

### Upper Division Courses

**101. General Bacteriology** (4) I, II

Lectures and laboratory work of Bacteriology 1 with additional work to be prescribed by the instructor. Prerequisite: Chemistry 1A or 2A.

**102. Advanced Bacteriology** (5) I

A survey of the agents of disease and methods of host resistance. Laboratory experience in diagnosis and immunologic techniques. Three lectures and three laboratories per week. Prerequisites: Bacteriology 1 or 101, and Chemistry 101. Recommended: Biochemistry, physiology.

**103. Serology** (4) II

A survey of the principles and techniques used in serological diagnosis of disease agents. The course is planned for students interested in clinical laboratory technology. Three lectures and three laboratories per week. Prerequisites: Bacteriology 1 or 101, and Chemistry 101. Recommended: Biochemistry, physiology.

**105. Bacterial Metabolism** (2) I

A course to provide a basic knowledge of the principles by which micro-organisms derive energy to support the life processes. Prerequisites: Bacteriology 1 or 101, Chemistry 101. Recommended: Biochemistry.

**107. Virology** (2) I

A survey of viruses and Rickettsias as agents of disease. An introduction to virological techniques, and routes of infection with further consideration of concepts of epidemiology, diagnosis, pathology, host-responses and methods treatment. Prerequisite: Bacteriology 102, 103, or equivalent.

**199. Special Problems** (1 or 2) I, II

Work other than is outlined in the regular courses. Admission only by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open to students who have completed at least 15 units of work in the life sciences (including courses in bacteriology) with grades of A or B.

# BIOLOGY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is not offered in biology; however, courses in biology may be used as part of the *life science major in arts and sciences.* Refer to the description of the *life science major* in the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

A *teaching major* is not offered in biology; however, Biology 10A-10B may be used for the year course required in a biological science for the *general science major* for the general junior high school credential or the *physical science major* for the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor* is not offered in biology; however, biology may be used as part of the *general science minor* for the general junior high school and special secondary credentials. For specific information, refer to the outlines of requirements for the teaching minor for these credentials.

### Lower Division Courses

**A. Solution and Dosage** (2) I

Arithmetic review with computing of dosage, percentage of solutions, apothecaries weights. Two hours per week.

**1. Survey of Biology** (3) I, II

A survey of life science with emphasis on the biology of man in relation to modern life. Three lectures and one hour of demonstration and discussion per week. Not open to students with credit for Biology 40, 10A-10B, Zoology, 1A-1B, Botany 1 or 2A-2B.

**10A-10B. General Biology** (3-3) Year, I, II

A year course with three hours of laboratory per week. Designed for students not intending to specialize in botany or zoology. Not open to students with credit for Biology 1, 40, Zoology 1A, 1B, Botany 1, 2A or 2B. Biology 10A is prerequisite for 10B.

# BOTANY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in Arts and Sciences* is offered in botany. Lower division requirements: Botany 2A-2B, Chemistry 1A-1B or 2A-2B. Recommended: German, French or Spanish, Zoology 1A-1B, Bacteriology 1. Upper division requirements: A minimum of 24 upper division units, at least 18 units of which must be in botany and six of which may be related courses in bacteriology, chemistry, geology, zoology, selected with approval of departmental representative.

A *teaching major* is not offered in botany.

### Minor

A *minor in arts and sciences* is offered in botany. The minor must include at least 15 units of work in botany, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in botany; however, botany may be used as part of the *general science minor* for the general junior high, the special secondary, the general elementary, and the kindergarten-primary credentials or as part of the *life science minor* for the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

## Lower Division Courses

**1. Introduction to Botany (4) I, II**

Designed primarily for students who desire a general acquaintance with the fundamentals of botany. Not open to students who have credit for Botany 2A or 2B, but may be used as a prerequisite to upper division courses. Three lectures, and one laboratory per week.

**2A-2B. General Botany (4-4) I, II**

Year course covering fundamentals of structure, general behavior, morphology and relationship of plants, including an introduction to classification and distribution of seed plants. Two lectures and six hours of laboratory work per week. Botany 2A is a prerequisite for 2B.

**4. California Plants (2) II**

Classification and ecology of representative orders of wild flowers, trees, and chaparral of San Diego region, including practice in the use of keys. One lecture and three hours laboratory per week. Occasional Saturday field trips.

## Upper Division Courses

**102. Mycology (4) I**

A study of the different groups of fungi. Special attention will be given to the parasitic and economic forms, their life history, structure, and classification. Prerequisite: Botany 2B.

**107. Plant Physiology (4) II**

The activities of plants, including food manufacture, absorption, conduction, transpiration, respiration, growth and movement. Two lectures and two laboratory periods per week. Prerequisites: Biology 10A-10B or Botany 2A, and Chemistry 2A-2B or equivalent.

**112. Cultivated Trees and Shrubs (3) I**

Recognition of the common cultivated trees and shrubs of the San Diego region. Trips to local parks and private gardens. One lecture and three hours per week laboratory or field work.

**114. Plant Taxonomy (3) II**

Identification, classification and distribution of representative orders of flowering plants. One hour lecture and six hours per week of laboratory and field work. Prerequisites: Botany 2A-2B, or 4.

**126. Plant Pathology (3) II**

A practical course dealing with the principles of disease in plants, control measures, and quarantine procedures. Emphasis is placed on the determination and control measures of those pathogenic organisms which affect crops, trees and shrubs and nursery stock. Two lectures and one laboratory period per week. Prerequisite: Botany 2A-2B.

**150. Readings in Biology (2) II**

Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles,, ecology, economic zoology, zoogeography, breeding habits and animal behavior. Not open to students with credit for Zoology 150.

**153. Economic Biology (2) I**

Study of the uses of plants and animals to man and the ways in which they injure him and his possessions. Consideration is also given to general methods of control and conservation. Prerequisite: Zoology 1A, Biology 1, or Biology 10B. Not open to students who have credit for Zoology 153.

**155. Genetics (2) II**

Principles of plant and animal genetics. Primarily for science majors. Two lectures per week. Not open to students with credit for Zoology 155. Prerequisites: Biology 10A-10B, Zoology 1A-1B or Botany 2A-2B.

**156. Genetics Laboratory** (2) II

Experiments and demonstrations illustrating the mechanism of heredity in plants and animals. Six hours of laboratory per week. Prerequisite: Zoology 155 or Botany 155, or concurrent registration in either. Not open to students with credit for Zoology 156.

**162. Agricultural Botany** (2) I

A study of California crop plants, their general identification, cultural methods, and regional distribution. Field trips to be arranged. Prerequisite: Botany 1 or Botany 2A-2B.

**199. Special Problems** (1-2) I, II

Work other than is outlined in the above courses. Admission by permission of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open only to students who have completed at least 15 units of botany with a grade A or B.

## CHEMISTRY

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in chemistry. Two plans are provided: One for students expecting to enter chemistry as professional chemists; the other for students intending to use chemistry in a related field. In addition, varying degrees of concentration in chemistry are available in the teaching major in physical science and in the chemical engineering option of the engineering major.

A *teaching major* is offered in chemistry for the general secondary credential or as part of the *general science major* for the general junior high school credential or as part of the *physical science major* for the general secondary credential. For specific information, refer to the outlines of the requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in chemistry. The minor must include Chemistry 1A-1B plus at least nine units of credit in upper division chemistry courses.

A *teaching minor* is offered in chemistry for the general secondary credential or as part of the *general science minor* for the general junior high, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of the requirements for these credentials.

### Curricula for Chemistry Majors in Arts and Sciences

Plan A, outlined below, is recommended for all students who intend to become professional chemists and leads to the A.B. degree. It is based upon the recommendations of the Committee for Professional Training of Chemists of the American Chemical Society, and qualifies graduates for many types of positions as chemists and provides the training required by most universities for admission to graduate work in chemistry. This department is on the approved list of the American Chemical Society.

Plan B is designed for students who do not intend to become professional chemists, but who desire the major in chemistry as part of a general education or in preparation for training in a related profession. By proper choice of electives, graduates can meet the requirements for admittance to medical schools. This plan is also suitable for students interested in teaching in secondary schools who desire more intensive chemical training than that required in the physical science major.

The recommended sequence for courses for each plan is presented below. All courses except electives are required. Some variation in sequence is permissible with the consent of the faculty adviser.

A major for the B.S. degree is offered in Chemistry. The requirements are the same as those for the A.B. degree except, (1) no foreign language is required, and (2) the student's program must lead to a four year occupational objective approved by the chemistry department adviser for the B.S. degree.

| | *Units* | |
|---|---|---|
| **Plan A** (For chemists) | *1st Sem.* | *2d Sem.* |
| First year | | |
| Chemistry 1A-1B | 5 | 5 |
| † Physics 4A | – | 4 |
| Mathematics 3A-3B | 3 | 3 |
| English 1 and 2 | 3 | 3 |
| Psychology 1 | 3 | – |
| Health Education 21 | 2 | – |
| Physical Education | ½ | ½ |
| | 16½ | 15½ |
| Second year | | |
| Chemistry 5 | 3 | – |
| Chemistry 101 | – | 4 |
| † Physics 4B-4C | 4 | 4 |
| Mathematics 4A-4B | 3 | 3 |
| German 1, 2 | 3 | 3 |
| Social Science | 3 | 3 |
| Physical Education | ½ | ½ |
| | 16½ | 17½ |
| Third year | | |
| Chemistry 102-103 | 3 | 3 |
| Chemistry 110A-110B | 3 | 3 |
| Chemistry 105 | 0–3 | 3–0 |
| Minor | 3–0 | 0–3 |
| Social Science | 3 | 3 |
| German | 2–3 | 3–2 |
| Elective | 2 | 2 |
| | 16 | 16 |
| Fourth year | | |
| Chemistry 111 | 3 | – |
| Chemistry elective | – | 2 |
| Minor | 3 | 3 |
| Electives | 9 | 10 |
| | 15 | 15 |

| | *Units* | |
|---|---|---|
| **Plan B** (For related professions) | *1st Sem.* | *2d Sem.* |
| First year | | |
| Chemistry 1A-1B | 5 | 5 |
| Physics 2A-2B | 3 | 3 |
| Physics 3A-3B | 1 | 1 |

| Fourth year | | |
| Chemistry elective | 3 | 2 |
| Minor | 3 | 3 |
| Electives | 9 | 10 |
| | 15 | 15 |

## Lower Division Courses

**1A-1B. General Chemistry** (5-5) Year, I, II

General principles of chemistry with emphasis on inorganic materials. Three lectures and six hours of laboratory per week. Qualitative analysis is included in the second semester. Prerequisites: Elementary algebra and plane geometry. Recommended: High school chemistry, physics, and additional mathematics.

**2A-2B. Fundamentals of Chemistry** (3-3) Year, I

A general course including inorganic, organic, and biological chemistry for students not intending to take further work in chemistry. Emphasis is placed on applications of chemistry to everyday life. Two lectures and one laboratory period per week. Not open to students with credit for Chemistry 1A-1B.

**5. Elementary Quantitative Analysis** (3) I, II

Theoretical consideration of the principles of gravimetric and volumetric analysis. Practice in standardizing reagents and analyzing samples. One lecture and quiz, and two laboratory periods per week. Prerequisite: Chemistry 1A-1B, and facility in the use of logarithms and slide rule.

---

* Should include preparation for minor.

† The physics sequence, 1A-1B-1C-1D, formerly offered, will fulfill the requirement of Physics 4A-4B-4C for students who started physics before September, 1949.

## Upper Division Courses

**101. Introductory Organic Chemistry** (4) I, II

An introductory study of the chemistry of carbon compounds, both aliphatic and aromatic. The laboratory work illustrates properties and reactions of typical compounds and stresses development of technique. Three lectures and one laboratory period per week. Prerequisite: Chemistry 1A-1B.

**102. Organic Chemistry Laboratory** (3) I, II

Synthesis of typical aliphatic and aromatic compounds. Study of the theory and practice of laboratory operations. Approximately the last third of the course is devoted to the systematic qualitative analysis of organic compounds. Three laboratory periods per week. Prerequisite: Chemistry 101.

**103. Intermediate Organic Chemistry** (3) II

A continuation of Chemistry 101. Further study of types of aliphatic and aromatic compounds, their derivatives and interrelationship. Introduction to mechanisms of organic reactions. Three lectures per week. Prerequisite: Credit or registration in Chemistry 102.

**105. Advanced Quantitative Analysis** (3) I, II

Advanced work in the theory and practice of volumetric, gravimetric, and electroanalysis. One lecture, one quiz, and two laboratory periods per week. Prerequisite: Chemistry 5.

**110A-110B. Physical Chemistry** (3-3) Year, I

Theoretical principles of chemistry with emphasis on mathematical relations. Three lectures per week, problems and reports. Prerequisites: Physics 2A-2B, or equivalent; Math. 4B, or equivalent; Chemistry 5 and 101, or permission of the instructor.

**111. Physical Chemistry Laboratory** (3) I, II

Physico-chemical apparatus and measurements, with emphasis on technical report writing. Discussion period and three laboratory periods per week. Prerequisite: Chemistry 110B, or concurrent registration with permission of the instructor.

**114. Biochemistry** (3) I

The chemistry of carbohydrates, fats, proteins, enzymes, vitamins and hormones. Nutrition, intermediary metabolism and chemotherapy are discussed. Three lectures per week. Prerequisite: Chemistry 103 or by permission of the instructor. Recommended: Elementary biology or zoology.

**115. Biochemistry Laboratory** (2) II

Laboratory work in the testing, synthesis, isolation and analysis of biochemical materials. Chemical rather than biological considerations are emphasized. Two laboratory periods per week. Prerequisites: Chemistry 5, credit or registration in Chemistry 114. Recommended: Chemistry 155.

**116. Clinical Chemistry** (3) II

Lectures and laboratory work on the chemical composition of blood, urine, milk and body tissues. One lecture per week and two laboratory periods per week. Open primarily to students enrolled in the Laboratory Technician Curriculum. Prerequisite: Chemistry 115.

**118. Colloid Chemistry** (2) II (Offered 1951-52 and alternate years)

The theoretical principles of colloid chemistry and the preparation, properties and practical applications of colloids. Two lectures per week. Prerequisite: Chemistry 101, 110A and 110B.

**122. Glass Blowing** (1) II

Elementary training in the manipulation of glass. Prerequisite: Chemistry 1A-1B. One laboratory period per week.

**127. Advanced Inorganic Chemistry** (3) II (Offered 1950-51 and alternate years)

A lecture course dealing with such topics as the physical basis of the periodic system, complex inorganic compounds, and the nature of the chemical bond. Three lectures per week. Prerequisite: Chemistry 1A-1B. Recommended Chemistry 110A-110B.

**144A-144B. Principles of Chemical Engineering** (3-3) Year, I
Industrial stoichiometry, flow of fluids, heat transfer, unit processes and types of industrial equipment. Three lectures per week, problems and reports. Prerequisite: Credit or registration in Chemistry 110A.

**155. Instrumental Methods of Analysis** (2) I
Theory and practice of modern methods of instrumental analysis, including use of pH meters, colorimeters, spectro-photometers, and other analytical devices. Discussions, reports, field trips, special individual projects. Two laboratory periods per week. Prerequisites: Chemistry 5 and 101. Chemistry 105 is recommended.

**199. Special Problems** (1-2) I, II
Supervised individual work in specialized branches of chemistry. Admission only by the consent of the instructor. Hours of credit to be arranged in each case. Open only to students who have shown ability to do A or B work in chemistry.

### Graduate Courses

**200. Seminar** (2-2) I, II
An intensive study of some phase of advanced chemistry.

A. Advanced Organic Chemistry
B. Chemical Kinetics
C. Chemical Thermodynamics
D. Molecular Structure
E. Electrochemistry
F. Advanced Biochemistry
G. Spectrographic Analysis
H. Photochemistry
I. History of Chemistry

**290. Bibliography** (1) I, II
Exercise in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3) I, II
An individual study course designed primarily for candidates for the master's degree.

**299. Thesis** (3) I, II
Guidance in the preparation of a project or thesis for the master's degree.

## COMMERCE

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in commerce with concentration in one of the following sub-fields: (A) Accounting, (B) Banking and Finance, (C) Business Administration, (D) Marketing, (E) Insurance, (F) Personnel Administration, (G) Office Management, (H) Secretarial. In addition to meeting the general lower division requirements for all students (except the foreign language requirement), the following courses are required of commerce majors in the lower division: Economics 1A-1B; Commerce 2 (not required in Marketing or Secretarial sub-fields. Students in the Secretarial sub-field are required to take 1A-1B and 5A-5B), 14A-14B (students in the Secretarial sub-field take 16A-16B instead), 18A-18B; Geography 1, Geography 10 or equivalent (not required of students in the Marketing sub-field); English 8 and 2. Students in the Marketing sub-field must also include Commerce 20, 24, 25, 27 and Art 7. Students in the Personnel Administration sub-field must include Commerce 3A-3B-3C, 20 and Psychology 11. Students in the Office Management sub-field must include Speech Arts 2A. Students in the Secretarial sub-field must include Commerce A, 1A-1B, 5A-5B.

Upper division requirements: A minimum of 24 upper division units. The following courses must be included for students majoring in (A) Accounting, (B) Banking and Finance, (C) Business Administration, (D) Marketing, (E) Insurance, and (F) Personnel Administration: Economics 111 or 170 or Commerce 123; Economics 140; Commerce 121; and 15 units selected from one of the following sub-fields:

A. *Accounting:* Com. 118A-118B, 160A-160B, 161A-161B, 162, 164A-164B, 165A-165B, 166.
B. *Banking and Finance:* Com. 133, 134, 137, 154; Econ. 131, 135, 142.

C. *Business Administration:* Com. 118A-118B, 123, 125, 126, 127A, 133, 134, 137, 153, 154, 184; Econ. 128, 135, 142, 150, 166, 170.
D. *Marketing:* Com. 120, 123, 124, 137, 153, 154, 184, 185, 186, 187A-187B, 188, 189, 196; Home Econ. 160A-160B.
E. *Insurance:* Com. 118A-118B, 125, 126, 127A-127B, 128A-128B, 128C-128D, 128E-128F, 133, 134; Econ. 133. Recommended: Econ. 170, Soc. 50, 51, 153.
F. *Personnel Administration:* Com. 103A, 121, 153, 154; Econ. 150, 151, 154, 185; Psych. 105A, 121, 145, 152.

Students majoring in (G) *Office Management* must include the following courses: Com. 103A, 105A-105B, 108, 121, 153, 154, 161A; plus nine units of directed electives selected from: Com. 113A-113B, 137, 162; Econ. 135, 140, 142, 150, 170; Psych. 121.

Students majoring in (H) *Secretarial Subfield* must include the following courses: Com. 103A, 105A-105B, 108, 113A-113B, 153; plus nine units of directed electives selected from: Com. 121, 123, 164A-164B, 186, 188; Econ. 111, 135, 142, 150, 170, with approval of the departmental adviser.

For a complete outline of the curriculum in commerce, refer to the section entitled: Preprofessional and Vocational Curricula.

A *teaching major* is not offered in commerce; however, certain courses in this field are required as part of the *teaching major in business education* for the general secondary credential and the special secondary credential in business education. For specific information, refer to the outlines of the requirements for these credentials.

### Minor

A *Minor in arts and sciences* is offered in commerce. Lower division requirements: Commerce 14A-14B; Economics 1A-1B. Upper division requirements: nine units of upper division commerce courses selected from one group as outlined above under the major. Students who elect the marketing group must complete Commerce 24 and 25 or 27 in the lower division.

A *teaching minor* is not offered in commerce; however, certain courses in this field are required as part of the *teaching minor in business education* for the general secondary, the general junior high school, or the special secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

Note: Courses in commerce may not be used to meet any part of the lower division social science requirement, nor may they be used as part of a social science major or minor.

**A. Business Mathematics** (1) I, II
A practical course in the mathematics of business. A thorough study of interest, compound interest, discount, insurance rates, etc.

**1A-1B, Typewriting** (3-3) Year, I
Development of a command of a keyboard, acquisition of speed and the artistic arrangement of typewritten material with special reference to commercial forms, tabulation and billing. (1A is a prerequisite for 1B.)

**2. Mathematics of Finance** (3) I, II
Interest and annuities; amortization; sinking funds; valuation of bonds; depreciation; mathematics of building and loan associations. Prerequisites: Two years of algebra in high school, or equivalents.

**2A. Personal-Use Typewriting** (3) I, II
A short course designed for those not wishing to enter the business office but desiring a knowledge of the use of the typewriter. Five hours laboratory practice.

**3A. Office Machines: Rotary Calculator** (1) I, II (1st six weeks of semester)
A six-weeks course designed to teach students the operation of the rotary calculator. Operations basic to statistics, accounting, and other areas needing this skill will be stressed.

**3B. Office Machines: Key-Driven Calculator** (1) I, II (2d six weeks of semester)
Same as 3A, except the key-driven calculator is substituted for the rotary calculator.

**3C. Office Machines: Printing Calculator** (1) I, II (3d six weeks of semester)
Same as 3A, except the printing calculator is substituted for the rotary calculator.

**4. Introductory Typewriting** (1) I, II
A short, introductory course building the fundamentals of typing in a six-weeks period. Students enroll for the first six weeks, the second six weeks, or the third six weeks in a semester. Not open to Business Education or Secretarial majors.

**5A-5B. Shorthand** (5-5) I
An intensive course designed for the practical preparation of office secretaries. A thorough study of the Gregg System. Development of the ability to read and write shorthand rapidly and correctly, both literary and commercial. The shorthand speed necessary to pass a civil service examination is attained by the end of the year. (5A is a prerequisite for 5B.)

**6A-6B. Advanced Shorthand** (3-3) I
Development of speed in writing and transcription. Advanced dictation on letter forms, legal forms, speeches, and literary and technical material. Prerequisite: Commerce 5A-5B or equivalent. (6A is a prerequisite for 6B.)

**English in Business** (See English 8)

**14A-14B. Principles of Accounting** (3-3) I, II
The balance sheet; profit and loss statement; the opening, conducting, and closing of books for different kinds of businesses; organizations, reorganizations, dissolutions, and consolidations, etc., keeping in view the best modern accounting practice. Five hours lecture and laboratory. (14A is a prerequisite for 14B.)

**16A-16B. Secretarial Accounting** (3-3) I
Course in secretarial accounting covering the principles of accounting and the application of those principles to the accounting work done by secretaries and teachers of business. Required for four-year secretarial and business education majors. (16A is a prerequisite for 16B.)

**18A-18B. Commercial Law** (3-3) I, II
The fundamental principles of business law. Cases showing the actual application of the principles to commercial and business transactions. The subjects covered: Contracts, sales, agency, negotiable instruments, insurance, and wills. Either semester may be taken first.

**20. Consumer Problems** (3) I
Consumer incomes; bases of consumer choice-making; practical problems of buying food, clothing, shelter, transportation, insurance, etc.; family budgeting; market structure and functions seen from the consumer's point of view. Not open to students with credit for Commerce 120.

**21. Organization and Management of Small Business** (3) I
Problems confronting the small business man with regard to finance, organization, management. Reasons for failures and success in small business.

**24. Retailing** (3) I, II
Study of retail stores, emphasizing the problems of store managers and merchandising executives; store location, organization, personnel, sales promotion, buying and handling of merchandise, inventory, turnover, and control methods. Problems of profitable operation under changing conditions.

**25. Salesmanship** (3) I, II
Theoretical and psychological backgrounds of salesmanship, newer concepts of selling; the selling of ideas and services; steps in a sale: Attention, interest, desire, closing; the development of clienteles and of good will; the personal factor in salesmanship.

**26. Applied Salesmanship** (2) II

Practice in selling; supervised work in cooperating stores, or outside selling; relationships between theory and practice. Prerequisite: Commerce 25 and permission of instructor.

**27. Advertising Principles** (3) I, II

Advertising as a sales promotional tool in marketing activities; consumer, market and product analysis; advertising media; preparation of advertisements; measurement of advertising effectiveness; economic and legal aspects of advertising; public relations; advertising campaigns.

**65A-65B. Record Keeping.** (1-3 each semester) Year, I

Application of accounting practice and principles to accounting practice; the technical arrangement of accounting forms, records and reports found in business. Prerequisite: Commerce 14A or 16A. Commerce 65A is a prerequisite for 65B.

**103A. Office Management** (3) I, II

A study of the functions of the office, duties of the office manager, organization of the office, communication functions, physical facilities involved, personnel relationships of management and worker, and the controls necessary for efficient output.

**105A. Office Systems** (3) I, II

A course designed to develop fundamental skills in the figuring and bookkeeping machines used in offices, together with their interrelating functions as these affect office systems.

**105B. Office Systems** (3) I, II

The relationship of voice-writing, addressing, and duplicating machines to office procedures and routines is studied and skills developed in these areas of use.

**108. Records Management** (3) I, II

Intensive survey of the various means of preparing, keeping, storing, and disposal of office records to facilitate the efficient management of business. Various systems of records management will be studied together with the equipment and supplies required.

**113A-113B. Secretarial Office Practice** (5-5) Year, I

Practice in the duties and routines of office work as required of the stenographer and secretary with special emphasis on the shorthand dictation and transcription problems arising in various types of offices. Prerequisite: Commerce 1A-1B, 5A-5B, or their equivalent.

**118A-118B. Advanced Commercial Law** (3-3) Year, I, II

An advanced study of the law of personal and real property, partnership, corporation and the laws regulating trade and trade practices and competition. Elective for commerce majors.

**120. Consumer Income Management** (3) I

Functions and responsibilities of consumers; problems of choice-making; planning expenditures for housing, household operation, insurance and investments. Economics of installment buying, borrowing procedures, control of frauds, legislation affecting consumers. Not open to students with credit for Commerce 20.

**121. Business Administration** (3) I, II

Problems of business administration as an interrelated whole. A discussion of the problems of the business administrator with particular reference to the character of the problems involved and to the control policies and devices of the manager. Prerequisite: Economics 1A-1B.

**123. Marketing Principles** (3) I, II

Study of marketing functions; activities of producers, wholesalers, retailers and other middlemen; channels of distribution; integration of marketing activities; price policies; government regulation. Prerequisite: Economics 1A-1B.

**124. Marketing Administration** (3) II

An advanced course dealing with all the phases of marketing utilized in most distributive campaigns. Solutions of practical problems faced by producers, wholesalers, retailers and other middlemen in the marketing of their products. Prerequisite: Commerce 123.

**125. General Insurance** (3) I

Economic theory of risk; transfer of risk; distribution and prevention of loss; types of insurance carriers; problems of rate making; the insurance contract; coverages; special forms of life, fire, marine and casualty insurance; state supervision.

**126. Casualty Insurance** (3) II

The nature and reasons for existing practices in compensation and casualty insurance. The social and legal bases of insurance, fundamental principles of rate making, policy provisions, state regulation and state insurance. Prerequisite: Commerce 125.

**127A. Life Insurance—Principles and Practice** (3) I

Types of life insurance companies and associations, home office and agency organization, types of contracts, surrender value, policy loans and extended insurance, surplus and dividend policies, reserves, group, industrial and social insurance, and state supervision.

**127B. Life Insurance Salesmanship** (3) II

Special problems of life insurance selling, with emphasis on the psychological aspects of insurance selling, on specific techniques for finding prospects, for managing the sales interview. For students interested in life insurance selling, and those planning to obtain life underwriter's certification.

**128A-128B. Advanced Life Insurance** (3-3) Year, I

An advanced course in life insurance. The emphasis is on preparation for the C. L. U. Certificate. 128A is a prerequisite for 128B.

**128C-128D. Advanced Life Insurance** (3-3) I

Prepares the student for Part D of the Chartered Life Underwriters examination showing how life insurance strengthens banking credit, financial structure of corporations, and partnerships; also, life insurance as an investment. Commerce 128C is a prerequisite for Commerce 128D.

**128E-128F. Advanced Life Insurance** (3-3) Year, I

Prepares for part of the Chartered Life Underwriters examination. Covers the four sections, "Life Insurance Fundamentals," "General Education," "Law, Trust and Taxes," and "Finance"; teacher proficiency in the analysis of cases or problems. Commerce 128E is a prerequisite for Commerce 128F.

**133. Corporation Finance** (3) I

The corporate form of organization, instruments of long-time finance, methods of raising capital, efficient financial management, the financing of reorganizations, and governmental control. Prerequisite: Economics 1A-1B. Not open to students who have credit for Economics 133.

**134. Investments** (3) II

Investment principles and practices with emphasis upon problems of the small investor, such as tests of a good investment, sources of information, types of stocks and bonds, mechanics of purchase and sale, investment trusts, real estate mortgages, and the like.

**137. Credits and Collections** (3) I

The credit man and his work, including the instruments with which he works, sources of credit information, the technique of his department, collection methods, legislation for the protection of debtor and creditor, and credit insurance.

**153. Personnel Administration** (4) I, II

Problems in the management of personnel relations, including techniques of selecting, training, supervising and rating employees. Methods used by management in job evaluation; wage and salary payment plans; employee services; health and safety; union relationships; stimulation of interest.

**154. Wage and Salary Administration** (3) I

Problems of job analysis; major techniques of job evaluation, including ranking, classification, point system, factor comparison; problems of wage and salary administration, incentive pay methods; merit rating plans. Not open to students with credit for Political Science 146.

**160A-160B. Advanced Accounting** (3-3) Year, I

An intensive study of the corporation, its accounting and financial problems; thorough study of the balance sheet; depreciation; factory accounting, etc. Prerequisite: Commerce 14A-14B. (160A is a prerequisite for 160B.)

**161A-161B. Cost Accounting** (3-3) Year, I

Principles and methods of cost accounting in the mercantile establishment an in the factory. A study of industrial accounting procedure, the forms used, and thei application to practical problems. 161A is a prerequisite for 161B.

**162. Accounting Systems** (3) I

The accounting systems used in various types of business and financial concerns Some practice in devising and installing systems. Prerequisite: Commerce 14A-14B

**164A-164B. Income Tax Procedure** (3-3) Year, I

A study of the laws and a consideration of the problems arising from state an federal income, inheritance and corporation tax. 164A is a prerequisite for 164B.

**165A-165B. Auditing** (3-3) Year, I

The fundamental principles of accepted procedures of auditing and related types of accounting engagements. 165A is a prerequisite for 165B.

**166. Financial Statements** (3) I

The construction, composition, analysis and interpretation of accounting reports with particular emphasis on the form, content and phraseology of reports. Prerequisite: Commerce 160A-160B.

**167. Governmental Accounting** (3) II

A comparative study of accounting systems used by municipalities, counties, and the State of California; detailed comparisons with commercial practice; procedures in handling budget accounts, appropriations, and encumbrances; subsidiary records; cost records; internal checks; auditing.

**184. Sales Management** (3) I

Consideration of problems confronting the modern sales executive; selection, training, compensation and control of the sales force; sales analysis; sales quotas; sales costs and budgets; market and product research and analysis; coordination of personal selling with other form of sales effort.

**185. Advertising Copy and Layout** (2) I

Introduction to principles and techniques of copy writing; types of copy; preparation of layouts; mechanical methods employed by the artist, engraver and printer; legislation and regulations affecting advertising claims. Prerequisite: Commerce 27, or permission of instructor.

**186. Store Management Problems** (2) I

Locations, buildings, layouts and fixtures; store supplies and maintenance; receiving, marking, storing, wrapping and delivering merchandise; customer service, adjustments, credit and collections; expense control. Prerequisite: Commerce 24, or permission of instructor.

**187A. Buying Techniques** (2) I

Merchandising in department and specialty stores; customer demand; functional bureaus that aid in buying; stock plans; merchandise resources; foreign buying; trading techniques; terms and discounts; credit and shipping terms; the regulation of trade practices. Prerequisite: Commerce 24, or permission of instructor.

**187B. Merchandising Techniques** (2) I

Methods of dollar and unit control; pricing, turnover, inventory methods and control; legislation; budgets; arithmetic of merchandising; profitability of specific methods of merchandising. Prerequisite: Commerce 24, or permission of instructor.

**188. Advertising Media** (2) I

A thorough coverage of advertising media. Market characteristics; rates and sources of information; evaluation of media; problems of coverage, duplication, costs and scheduling; advertising salesmanship. Prerequisite: Commerce 27, or permission of instructor.

**189. Advertising Problems** (3) I

Principles of advertising applied to the solution of actual advertising problems encountered by business firms. Estimating opportunities for effective use; promotional campaigns; selection of media, retail advertising, national advertising, advertising agencies; advertising services of publishers. Prerequisite: Commerce 27 or permission of instructor.

**196. Work Experience** (2)

Supervised work in cooperating stores or offices; relationship between theory and practice in specific business conditions. (Takes place of Commerce 26.) Prerequisite: Permission of instructor.

**198A-198B. Investigation and Report** (1 to 3 each semester) Year, I

A comprehensive and an original study of a problem connected with business under the direction of one or more members of the commerce staff. Prerequisite: Senior standing and permission of the instructor. 198A is a prerequisite for 198B.

## Graduate Courses

**200. Readings in Current Literature in Business Education** (2) I

Specialized reading in one or more phases of business education, followed by a discussion and written report of the value of each article read.

**203. Secretarial Administration** (2)

An intensive study of the problems of office management and their solution. The relation of records, reports, budgets and manuals to managerial control. Prerequisites: Commerce 3A, Commerce 14A-14B, 121.

**1A-1B. Principles of Economics** (3-3) Year, I, II

The basic principles of economics: Business organization and production; money, credit and banking, depression problems; prices, competition, and monopoly; income distribution; public finance; international trade; economic systems. Aims of course: Foundation for further study, business pursuits, and intelligent economic citizenship. Prerequisite: Sophomore standing. 1A prerequisite for 1B.

## Upper Division Courses

**100A. Intermediate Economic Theory** (3) I, II

Advanced economic theory with special reference to value and distributio Special attention is given to marginal utility theory, and to the contribution of moder economic thought. Prerequisite: Economics 1A-1B.

**100B. Intermediate Economic Theory** (3) II

Essentially a continuation of 100A, with emphasis on the income approac employment, and the Keynesian analysis. Prerequisite: Economics 1A-1B. (Con pletion of Economics 100A recommended, but not a prerequisite for 100B.)

**102. Comparative Economic Systems** (3) II

The economic aspects of laissez-faire and regulated capitalism, cooperative socialism, communism, nazism, fascism. Experience in Russia, Germany, Unite States, Great Britain. Criteria for evaluating economic systems. The individual an government in each system. Planning in a liberal capitalistic society.

**105. Economics of Consumption** (3) I

An analysis of the determination of consumer demands, the relationship of th consumer to the price system, the effects of consumption and saving upon income an employment, the effects of monopoly and advertising upon consumers' welfare.

**110. Economic History of Europe** (3) I

A general survey of economic development from the Middle Ages to the present Particular attention is given to the impact of the Industrial Revolution on nationa economics, particularly on England's commerce and industry.

**111. Economic History of the United States** (3) II

A comprehensive survey of American economic development and of nationa legislation in the field of industry and commerce.

**128. Land Economics** (3) I

Real estate in its various aspects: Property rights, transfer of title, valuation finance, selling, property management, taxation, insurance, city planning, etc., with special emphasis upon problems as they exist in San Diego.

**131. Public Finance** (3) II

Principles and practices of taxation and public expenditures. Economic effects of public spending, debts and taxation. Financing social security and other services. Fiscal policy and prosperity. Relation to inflation and deflation. Special emphasis on social problems involved.

**133. Corporation Finance** (3) I, II

The corporate form of organization; instruments of long-time finance; methods of raising capital, efficient financial management, financing of reorganizations, and government control. Not open to students who have had Commerce 133.

**135. Money and Banking** (3) I, II

The elements of monetary theory. History and principles of banking with special reference to the banking system of the United States. Prerequisite: Economics 1A-1B.

**140. Statistical Methods** (3) I, II

Statistical method in the social sciences. Tabular and graphical presentation. Frequency and time series analysis. Index numbers and correlation techniques. Prerequisite: Mathematics A-B, and C, or equivalent. Not open to students with credit for Sociology 103, Psychology 104A, 104B.

**142. Business Cycles** (3) I

Fundamental factors in business cycles are analyzed and cycle theories are examined. Study of current business conditions begins early in the course and develops into practical application of forecasting methods to both business and other data. Prerequisite: Economics 1A-1B.

**150. Labor Problems** (3) I

A study of labor organizations and their policies, wages, strikes, unemployment, social insurance, child labor, labor legislation, plans for industrial peace, and other labor problems.

**151. Principles of Labor Legislation** (3) II
Federal, state and local laws and regulations concerning labor problems, industrial relations, and governmental policies with respect to labor; important court decisions; the make-up and functions of commissions and boards; labor union attitudes with respect to legislation and the courts.

**170. Government and Business** (3) I, II
General survey of governmental activities affecting business; the state as an entrepreneur and manager; governmental assistance to business; governmental regulation of business in its historical, legal and economic aspects, including recent developments in the United States and abroad; proposed policies.

**171. Transportation** (3) I
The development of railway transportation; railroad financing; rates and rate making; governmental regulation; government operation of railroads during the war; recent development of motor and air transportation. Prerequisite: Economics 1A-1B.

**172. Public Utilities** (3) II
The growth of public utilities in the United States; economics of public utility rates; valuation; public regulation and its legal basis; public ownership. Prerequisite: Economics 1A-1B.

**185. Social Insurance** (3) I
Old age pensions, health insurance, unemployment insurance, and Social Security Act. Strength and weakness of existing systems.

**190. Principles of Foreign Trade** (3) I
National welfare and foreign trade. Principle of comparative costs, comparative advantages in various nations. Foreign exchange and the balance of payments, financing foreign trade. Regulations over trade and obstructing factors. Techniques of exporting and importing. Doctrines of international trade.

**195. International Economic Relations** (3) II
Important aspects of international cooperation and conflict in the economic sphere, conditions essential to future cooperation. The quest for foreign markets, raw materials, investment opportunities and population outlets. Commercial policies, international economic conferences and organizations. Colonial rivalries and postwar problems.

**198. Investigation and Report** (3) I, II
Designed to stimulate independent study and investigation; to furnish guidance in the collection, organization, and presentation of factual material; to improve the technique of term reports. For economics majors only.

**199. Special Study** (1 or 2) I, II
Designed exclusively for seniors with a major in economics.

### Graduate Courses

**200A-200B. Seminar in the Development of Economic Thought** (2-2) Year I, II
A critical study of the development of economic thought and of contemporary economic thought, in order to provide a clearer understanding of major economic problems of the day.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3)
An individual study course designed primarily for candidates for the master's degree.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

# EDUCATION

## IN THE DIVISION OF EDUCATION

### Major

A *major in arts and sciences* is not offered in education; however, education is major for the general elementary and kindergarten-primary credentials. For specif information, refer to the requirements for these credentials.

A *teaching major* is offered in education for the general elementary and kinde garten-primary credentials.

### Minor

A *minor in arts and sciences* is offered in education. This minor consists of minimum of 15 upper division units in education selected from Education 102A-102I 102C-102D, 115A-115B with the approval of the Dean of Education.

A *teaching minor* is not offered in education.

Students will be admitted to education courses only when they are admitted t teacher education or have permission from the Dean of Education. Students who tak a minor in education must have been regularly admitted to teacher education. (Se Admission to Teacher Education).

### Lower Division Courses

**A. Review of Arithmetic** (0) I, II

**H. Review of Handwriting** (0) I, II

**R. Review of Reading** (0) I, II

**S. Review of Spelling** (0) I, II

Noncredit courses designed to increase competence in the skill subjects. Fo students who do not qualify on the respective sections of the Fundamentals Tes required of all applicants to teacher education.

### Upper Division Courses

**100B. Methods and Materials of Instruction and Audio-Visual Aids**
Major (2) Minor (1) I

Professional courses in specific teaching fields taken just prior to or concurrently with the first directed teaching assignment. Each course emphasizes the application of best practice with reference to each subject area named.

Subject fields for sections in 100B are as follows:

100B-A, Methods in Art
100B-B, Methods in Accounting
100B-BE, Objectives and Curricula in Business Education
100B-E, Methods in English
100B-L, Methods in Romance Language
100B-MA, Methods in Mathematics
100B-ME, Methods in Merchandising
100B-MU, Methods in Music
100B-PE, Methods in Phys. Ed. (Men)
100B-PE, Methods in Phys. Ed. (Women)
100B-SC, Methods in Science
100B-S, Methods in Shorthand
100B-SA, Methods in Speech Arts
100B-S.SC, Methods in Social Science
100B-SS, Methods in Secretarial Subjects
100B-T, Methods in Typing

**102A. Measurement and Evaluation in Elementary Education** (3) I, II

The use of intelligence and achievement tests in the diagnosis and improvement of learning; construction of objective examinations; problems of evaluation in education; the elements of statistical techniques.

**102B. Child Growth and Development** (3) I, II

Study of the mental, emotional, social, and physical development during childhood and early adolescence. Directed observation required. Not open for credit to students with credit for Home Economics 102.

**102C. Growth and Development of the Adolescent** (3) I, II

To improve understanding of adolescent physiological, psychological, social, and emotional development. Field work with adolescent groups in the community is required.

**102D. Measurement and Evaluation in Secondary Education** (2) I, II

Problems of evaluation in secondary education, construction of examinations, the elements of statistics, the selection and interpretation of standardized measures, and appraisal of audio-visual instructional materials. Field work required. Prerequisite: Education 130.

**105A. Introduction to Psychological Testing** (3) I, II

The basic principles of testing. The selection and critical evaluation of group tests of intelligence, personality, aptitude, interest and achievement. Prerequisite: One of the following courses: Psychology 5, 11; Education 102A, 102D. Not open for credit to students with credit for Psychology 105A.

**112A. Methods in Teaching Americanization Classes** (2) Extension only

Methods used in teaching the various grade levels found in Americanization classes, including those preparing for their naturalization. Includes discussion of new skills and techniques in learning to speak, read, and write English; aids in organizing and conducting classes; and in helping teachers to understand backgrounds of foreign born.

**115A. History and Philosophy of Education** (2) I, II

Historical backgrounds and underlying philosophies upon which the public school system has been established. Emphasis on the meaning of education, educational aims and values, and democracy and education. Prerequisite: Senior standing or the equivalent; minimum of 12 units of education.

**115B. Secondary Education** (3) I, II

An introduction to understanding the development of secondary education and its present status as a social institution. Topics developed include: Curriculum; teaching methods; audio-visual instructional materials; organization and administration; guidance; and objectives. Field work required.

**116. Directed Teaching** (3-12) I, II

Systematic observation, participation and teaching under supervision in the campus elementary school, the affiliated elementary, junior high and senior high schools. During each semester of student teaching a weekly conference period is required as indicated in the time schedule. Prerequisite: Admission to teacher education; education program approved by Director of Elementary or Secondary Education.

**117A. Elementary Music Education** (2) I, II

Objectives of music teaching; study of the child voice; and organization of song material by grades. Procedure in presenting rote songs, ear training, elementary notation, music reading, and part singing. Prerequisite: Music 1A, or the equivalent. Not open to students who have had Music 7A.

**117B. Methods in Instrumental Music** (2) I, II

The theory of organizing and conducting school bands and orchestras, and the selection of materials. Provides practical experience in conducting a children's orchestra and teaching sectional groups. Systematic planning for pupils of various ages and abilities.

**119. Art in the Elementary School** (2) I, II

Discussion of the elements and principles of art and their place in the art expression and appreciation of the elementary school child. Laboratory experience in elementary school problems. Not open to students taking the elementary credential. Prerequisite: Art 6A.

**122. Social Studies in the Elementary School** (2) I, II
The purpose, scope, organization and development of instructional procedures the social studies in the elementary school. Development of curriculum units and th analysis of teaching materials. The summer course provides observation in the demonstration school.

**123. Science in Elementary Education** (3) I, II
Elementary science and its relation to instructional units in the social science the construction and use of equipment, the effective use of audio-visual aids, the use environmental resources, and the use of texts and supplementary material.

**125. Curriculum in Elementary Education** (3) I, II
A survey of the following elementary subject areas: The language arts, mathematics, music, science, and the social sciences. Emphasis upon the selection of conten teaching methods, and materials as they relate to social needs, psychological principle and the nature of the learner.

**126. Literature in Elementary Education** (3) I, II (Irregular)
Criteria for the selection of children's literature, children's reading interests, th development of units of instruction in the social studies, the use of the verse choi dramatic readings and similar procedures, and the use of the library.

**129. Arithmetic in Elementary Education** (2) I, II
For teachers of arithmetic in the elementary and junior high school. Emphasis i placed upon the understanding of the systems of notation and language techniques Opportunity will be given for the development of instructional materials an procedures.

**130. Educational Psychology** (2) I, II
To develop understanding of the applications of psychological research for effective classroom teaching. Observation and field work required. Prerequisite: Psychology 1. Not open to students with credit for Psychology 130.

**134. Behavior Problems in Early Childhood** (1) Summer
Lectures and related readings on the typical behavior problems of two to twelve year olds, for teachers and parents.

**136. Reading in Elementary Education** (3) I, II
Scientifically developed procedures for determining reading readiness, beginning reading, independence in work recognition, vocabulary development, word analysis, standards of attainment, types of reading programs, and the selection, preparation and use of reading materials.

**138. Workshop in Family Life Education** (3) Summer
Series of lectures, discussions, and laboratory sessions devoted to furthering understanding of the problems of family life education. The student will have an opportunity to develop units suitable for a program of family life education. Community agencies will participate in the workshop.

**143. Adult Education** (3) I, II
A study of the aims and scope of adult education and its function as a part of the public school system. Individual and group work will be emphasized. Admission by permission of the instructor.

**144. Diagnosis and Remedial Treatment of Difficulties in Reading** (3) I, II
The causes of reading difficulties and the procedures for diagnosis and remedial treatment. Practical work with children with reading problems. Primarily for principals, supervisors and teachers-in-service. Prerequisite: Education 102B or Education 102A, and Education 136, or one year of successful teaching experience.

**145A. Organization and Administration of Music Education** (2) I, II
Theory of the general principles of music administration; correlation of music with the various subjects in the public schools; music tests; creative work.

**145B-145C. Instrumental Conducting Methods** (1-1) Year, I
Baton technique. Scores will be studied of works suitable for various levels of advancement for school orchestras and bands. Practical experience in conducting actual groups will be given in class.

**146. Education Practicum** (Kindergarten-Primary) (4) I, II

A continuation of Education 148 and will accompany Education 116 in the kindergarten. A study of the theory of early childhood education providing experience with children of nursery school and kindergarten ages. Prerequisite: Education 147, 148.

**146B. Interpretation of Early Childhood Behavior** (3) Summer

For kindergarten-primary teachers treating the analysis and interpretation of early childhood behavior. Emphasis on understanding and interpreting the causative factors in typical behavior of children to parents, social workers, teachers, and others concerned with the guidance of kindergarten-primary children.

**147. Education Practicum** (10) I, II

Required of all students who expect to receive a credential which will qualify them to teach in the kindergarten or in the elementary school. Students should take the course during the next semester after admission to teacher education, which is usually the first semester of the junior year. Registration is strictly limited to those who have been approved by the Committee on Admission to Teacher Education.

The content of the Education Practicums include both classroom participation (directed teaching) and the study of the principles of education. Education Practicum is a unified course which deals with the interpretation and intelligent application of theory and practice in elementary education. The child and accumulated knowledge are studied as one affects the other. The psychology of learning is interpreted while the college student is immediately associated with children in the process of learning. Daily classes are held in which the psychology and philosophy of education are studied and analyzed as systems of knowledge and concurrently interpreted in reference to the actual teaching participation to which the student is assigned for one hour daily. The course includes Reading and Elementary School Methods (3); Elementary Art Education (1); Elementary Music Education (1); Language Arts (2); Arithmetic (3); Observation Audio-Visual-Radio Instruction is integrated with the course, equivalent to 2 units.

The course is taught by college teachers who supervise in the Campus Elementary School, and other faculty members.

**148. Education Practicum** (12) I, II

This course is a continuation of Education 147 and is required of all students who are candidates for the general elementary credential or the kindergarten-primary credential. An extended analysis is made of the psychology of education in various fields and application is made through directed teaching in grades 4 to 6. The course includes Elementary Social Studies (2); Elementary Science Education (1); Elementary Art Education (1); Elementary Music Education (1); Education Psychology (learning process and theory of audio-visual education) (3); additional 4 units for General Elementary only: Curriculum in Elementary Education (2); Directed Teaching (2); Audio-Visual-Radio Instruction (0). Prerequisite: Education 147.

**149A. Laboratory in Elementary Education** (3) Summer

A general course in observation and theory, including a study of arithmetic, reading, language, music, science, social studies, art, spelling. Students in this course will observe in the summer demonstration school and discuss with the staff the teaching procedures.

**149C. Laboratory in Rural Education** (6) Summer

Obervation in a one-room multigraded summer demonstration school. Students will observe demonstrations, discuss procedures with the staff, and prepare material for their own schools.

**149D. Workshop in Elementary Education** (3 or 6) Summer

To meet the needs of individual or groups of teachers who desire to study selected problems in elementary education. The observation of classroom teaching will be provided for members in attendance. Interested persons should correspond with the Director of Elementary Education, San Diego State College.

**155. Principles of Guidance** (3) I, II

A study of the basic principles of guidance and their function in the educational process.

**156. Guidance Conference** (1) Summer

A series of lecture and discussion sessions centering on current problems i counseling and guidance. Designed to serve the needs of any person desiring to kee informed of developments in this area. Admission upon permission of the directo of this conference.

**158. Supervision of Child Welfare and Attendance** (3) Summer

Content includes laws relating to children, guidance principles, social case work agency relationships, conference techniques, home visitation methods, employmen supervision, attendance work, child accounting, familiarity with testing techniques

**161. Legal Aspects of Education** (3) I, II

A study of the school law of California, important court decisions, rulings of th California State Superintendent of Public Instruction and the Attorney General historical and current trends, and comparative data from throughout the United States.

**171. Audio-Visual Conference** (1) Summer

A series of lectures, discussions and demonstrations, centering on problems in the use of audio-visual instructional materials. Designed for teachers, administrators, audio-visual representatives, and others interested in current developments in this area. Course may be taken twice for credit.

**174. Audio-Visual-Radio Education** (2) I, II

A study of audio-visual-radio aids as they affect learning. Analysis and development of materials of instruction and their presentation; operation of equipment.

**174BE. Audio-Visual Business Education** (3) Summer

A review of the skills and knowledges necessary to use audio-visual aids, followed by intensive study and research in the literature available and by practice with the materials and techniques that apply to business education.

**175. Creating Audio-Visual Materials for Classroom Use** (3) I

Practice in the creation and evaluation of instructional materials, such as 35 mm. film strips, 16 mm. films, scripts, recordings and other audio-visual materials. Prerequisite: Education 174, or equivalent.

**176. Problems of Speech Correction and Articulation** (3) (Irregular)

Analysis and discussion of the major articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Not open to students with credit for Speech Arts 176.

**177. The Teaching of Lip Reading** (2)

History, theory and methods of lip reading. Aids for the classroom teacher; program and materials of instruction for the specialized teacher. Opportunities for practice teaching are offered. Not open to students with credit for Speech Arts 177.

**178. Problems of the Hard of Hearing** (2)

The adjustment of the hard-of-hearing group with emphasis on the public school child. State and county hearing programs; technique of audiometry; use of hearing aids; educational, classroom, and social problems.

**179A-179B. Nervous Speech Disorders** (3-3) Year, I

Classification and study of speech defects and disorders. Training in corrective technique for public schools; observation. Required for the Special Secondary Credential in Correction of Speech Defects. Not open to students with credit for Speech Arts 179A-179B.

**181. Exceptional Children** (3) I

Characteristics and adjustment problems of mental, physical, and emotional deviates; emphasis upon the mentally handicapped.

**182. Curriculum and Methods for Mentally Retarded Children** (3) II

Selection, organization and presentation of curricular materials for mentally retarded children.

**183. Practicum for Teaching Mentally Retarded Children** (3) Summer

Analysis and interpretation of educational procedures utilized with the retarded learner. A demonstration class will be available for observation. Education 182 must be taken prior to, or concurrently with, Education 183.

**184A. The Secondary School** (4) I, II

To orient the student toward his function as a teacher in the public secondary schools, including basic principles, history and philosophy of education, and audio-visual instruction, and to understand the school as a social institution. Field work required.

**184B. Development and Learning** (4) I, II

To acquaint the student in secondary education with the nature of development and the learning process, with consideration of mental hygiene, guidance and the place of audio-visual aids. Field work required.

**184C. The Teaching Process** (4) I, II

To develop teacher competency at the secondary level in relationships and planing with the pupil, the community, and the profession, including classroom management, audio-visual education, lesson planning, evaluation, and co-curricular activities. Field work required.

**189. Workshop in Secondary Education** (3 or 6) Summer

Designed to meet the needs of individual or groups of teachers who wish to develop or continue the study of some problem with the consultation of the College Staff and the San Diego County Curriculum Staff.

**191. Driver Education** (2) Summer

A workshop type course designed to prepare teachers of the course in high school. Enrollment by permission of the instructor.

**199. Educational Problems** (1-6) I, II, and Summer

For senior and graduate students in education who have shown ability to work independently. Problem to be chosen after consultation with a staff member. Admission by permission of the staff. Credit and hours to be arranged.

## Graduate Courses

For general requirements for admission to graduate courses, see statement on Admission to Graduate Status in section on Admission and Registration. In addition to these general requirements, 12 units of professional education are prerequisite for enrollment in all graduate courses.

**207. Educational Sociology** (3)

A study of the social, economic, political and moral setting in which present day American education functions. Prerequisite: Education 115A, or equivalent, teaching experience.

**220. Advanced Educational Psychology** (3) I, II

Advanced study of the research and its application to learning and human growth. Prerequisite: Educational Psych. 130, or equivalent, teaching experience.

**230. Guidance Problems in Secondary Education** (3) I, II

Individual and group study of the theory and practice of guidance with emphasis upon practical problems of the members of the class. Prerequisite: Education 155, or equivalent.

**232. Problems in Vocational Guidance** (3) I, II

To prepare teachers for vocational guidance in the secondary schools. Includes occupational information, vocational aptitude measurement, and educational guidance. Prerequisite: Education 230, or equivalent.

**233. Guidance Counseling Techniques** (3) I, II

Designed for school counselors. To stress the understandings and procedures necessary for effective interviewing. Prerequisite: Education 230, or equivalent.

**233B. Guidance Counseling Techniques** (3)
Continuation of the work of Education 233. Prerequisite: Education 230 and 233, or equivalents.

**237. Research in Guidance Problems** (1-3) I, II
Individual study by graduate students who have demonstrated exceptional ability and a need for such work. Admission by permission of the Director of Secondary Education and instructor.

**238. Field Work in School Guidance** (3)
Application of the principles and procedures in testing, counseling, and related personnel work in the public schools. Weekly seminar sessions with college and cooperating staff. Prerequisite: Permission of instructor and 12 units in guidance and related areas.

**239. Workshop in Pupil Personnel Services** (3) Summer
Application of principles and procedures to specific situations for improvement of pupil personnel services. Individual problems emphasized. Prerequisite: Teaching experience and permission of director of workshop.

**241. Problems in the Teaching of Arithmetic** (3)
A study of research and practice in the methods of teaching and in the curriculum of elementary and junior high school arithmetic. Prerequisite: Education 129 or equivalent.

**242. Problems in the Teaching of Reading** (3) I, II
Advanced study of trends in reading instructions. Topics include developmental sequences in reading skills and abilities, reading in the content fields, individual differences, and interests. Students will develop individual projects or problems. Prerequisites: Education 136 and 144 or equivalents.

**243. Seminar in Social Studies in Elementary Education** (3)
Advanced study of problems in teaching social studies in the elementary school with emphasis on the study of the scientific research in the field. Prerequisite: Permission of instructor.

**244. Seminar in Language Arts in Elementary Education** (3)
Advanced study of problems in teaching language arts in the elementary school, including spelling, literature and written and oral communication. Emphasis will be on the study of scientific research in the field. Prerequisite: Permission of instructor.

**245. Seminar in Elementary Education** (3) I, II
A study of the methodology of research with particular reference to the basic research in the psychology and teaching of the elementary school subjects. Prerequisite: 12 units in elementary education and permission of the instructor.

**250. Curricular Problems in Secondary Education** (3) I, II
Present status and development of the secondary school curriculum. Emphasis upon individual study and development of solutions of problems of the students. Prerequisite: 12 units in secondary education and permission of the instructor.

**252. General Education in the Secondary School** (3) Summer
A course designed for teachers in service. A study of the function and implementation of general education in the secondary school. Prerequisite: 12 units in secondary education and permission of the instructor.

**254. Advanced Problems in Secondary School Instruction** (3)
An analysis of the scientific research and philosophical principles in secondary school instruction. Prerequisite: Teaching experience and permission of instructor.

**256. Recent Trends in Secondary Curriculum** (3) I, II
Current practices and trends in secondary schools. Extensive individual work on related problems of interest to members of the class. Prerequisite: 12 units in secondary education and permission of the instructor.

**257. Workshop in Intercultural Education** (4)

A cooperaive workshop sponsored by the college and the San Diego City Schools to study trends in intercultural education in American schools, including units, curricular and instructional materials and techniques. Enrollment only by application to the Dean of Education.

**258. Research in Curricular Problems** (1-3) I, II

Individual study by graduate students who have demonstrated exceptional ability and a need for such work. Admission by permission of the Director of Secondary Education and instructor.

**260. Federal, State, County and City School Organization, Administration and School Law** (3)

A study of the organization, administration and supervision of federal, state, city and county school systems. Includes school finance, housing, law, and business administration.

**262. The Organization and Administration of Elementary Schools** (3)

A study will be made of the problems of personnel, local finance, curriculum, plant, community relations, and legal aspects of elementary schools. Required as a prerequisite to Education 266. Prerequisite: Teaching experience.

**263. The Organization and Administration of the Secondary School** (3)

Topics will cover all aspects of the duties of a secondary school administrator, including personnel, finance, curriculum, equipment and supplies, public relations, transportation, and law. Prerequisite: Possession of a valid General Secondary Credential and permission of the instructor.

**264. Elementary School Supervision** (3)

Principles and practices of supervision and methods of evaluating instruction and the curriculum in elementary education. Prerequisite: General Elementary Credential, teaching experience, Education 262, or equivalent, and permission of the instructor.

**265. Secondary School Supervision** (3)

For those who will be responsible for the supervision and evaluation of the curriculum and teaching methods in the secondary school. Prerequisite: Possession of a valid General Secondary Credential, teaching experience, and permission of the instructor.

**266. Field Work in Elementary School Administration and Supervision** (2) I

Study of the administration and supervision of an elementary school, for the Elementary School Administration and Supervision Credentials. Field project required of all students under the direction of a college staff. Prerequisite: Education 262 or 264, or equivalent.

**267. Field Work in Secondary School Administration and Supervision** (2) II

Study of practices as they are found in secondary schools relative to administration and supervision; to insure direct contact with existing programs and procedures through faculty guided projects. Prerequisite: Education 263 or 265, or equivalent.

**268. Seminar in School Administration** (3) Summer

An intensive study of selected problems in finance, business administration, and other topics in the field of school administration. Provision will be made for individual work on special topics of interest to students.

**270. School Finance and Business Administration** (3)

A study of public school finance at state and local levels, and an analysis of public school business administration procedures in elementary and secondary school districts. Includes study of state school law. Prerequisite: Valid Elementary or Secondary Credentials.

**274A. Utilizing Audio-Visual Materials in the Classroom** (3) I

A critical analysis of research evaluating the use of visual, auditory, and other sensory materials in education. Prerequisite: Education 174, or equivalent.

**275. Administering the Use of Audio-Visual Materials** (3) II

Organizing, supervising, and coordinating audio-visual centers as an integra part of educational systems. Prerequisite: Education 174, or by permission of th instructor.

**278. Educational Leadership** (3)

An analysis of the factors and practice in procedures of group and individua leadership in four areas: (a) the community; (b) the teaching staff; (c) the studen personnel; (d) the professional field of educational administration and supervision Prerequisite: Permission of the instructor.

**290. Procedures of Investigation and Report** (2-3) I, II, Summer

Emphasizes procedures in selecting and writing a project or thesis. Methods of investigation and reporting data. Extensive survey of an area of professional literature to analyze techniques and style. Separate sections for elementary and secondary levels

**298. Special Study** (1-3)

An individual study course designed primarily for candidates for the master's degree.

**299. Thesis**

Guidance in the preparation of a project or thesis for the master's degree.

**316. Directed Teaching** (3-3) I, II

Systematic observation, participation, and teaching under supervision in an affiliated high school. Thirty clock hours of student teaching will usually earn one unit of credit, but the credit finally allowed will depend upon the nature and quality of the teaching done. Any work below a C grade is unacceptable for credit in this course.

No student can enroll in this course until he has completed at least 10 units of work in education.

During the semesters in which the student takes his assignments in student teaching, he must meet with the college supervisor one hour each week for conference and discussion of problems encountered in his teaching.

Students who have had student teaching in preparation for the junior high school or special secondary credential should confer with their departmental and educational advisers concerning partial fulfillment of this requirement as the result of having completed the student teaching required for the credentials mentioned above.

# ENGINEERING

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in engineering. Lower division requirements. Physics 4A-4B-4C; Mathematics 3A-3B, 4A-4B; Chemistry 1A-1B, Engineering 21, 23, or their equivalent. Upper division requirements: A minimum of 24 upper division units including the group required of all engineering students as outlined in the Engineering Curriculum in the section entitled: Preprofessional and Vocational Curricula.

A *teaching major* is not offered in engineering.

### Minor

A *minor in arts and sciences* is offered in engineering. The minor must include at least 15 units in engineering, nine units of which must be from courses carrying upper division credit. The courses selected must be a logical sequence approved by faculty adviser.

A *teaching minor* is not offered in engineering.

### Lower Division Courses

NOTE: Courses in engineering may not be used to meet any part of the lower division natural science requirement, nor may they be used as part of a physical science major or minor.

**1A-1B. Plane Surveying** (3-3) Year, I

Two lectures and one three-hour field period per week. Semester I: Use, care and adjustment of surveying equipment. Introduction to standard procedures and techniques. Prerequisites: Engineering 2, or equivalent, Math. D, and sophomore standing. Semester II: Computations and map making; land, topographic, and city surveying. Prerequisite: Engr. 1A.

**2. Mechanical Drawing** (3) I, II

Freehand lettering, use and care of drafting equipment, simple orthographic projection, introduction to problems of dimensioning. Open to students lacking credit for a year course in senior high school mechanical drawing. Not open to students with credit for Industrial Arts 2.

**21. Descriptive Geometry** (3) I

Fundamental principles of descriptive geometry and their application to engineering problems. Solutions of point, line and plane problems; curved lines and surfaces; intersections of surfaces. One lecture and two three-hour laboratory periods per week. Prerequisite: Engr. 2, or equivalent, and sophomore standing.

**22. Machine Drawing** (3) II

Standard drawing methods and procedures, complete sets of working drawings of simple machine parts, gears and cams; includes tolerance dimensioning, sectioning, threads and fasteners. One lecture and two three-hour laboratory periods per week. Prerequisites: Engr. 21, Math. 3A-3B.

**23. Materials of Construction** (2) II

A concise presentation of the physical properties of the common materials used in structures and machines, with brief descriptions of their manufacture and fabrication. Two lectures per week. Prerequisite: Sophomore standing.

## Upper Division Courses

**100A-100B. Elements of Electrical Engineering** (3-3) Year, I

Theory and characteristics of electrical equipment with emphasis on industrial applications. Lectures and problems. Semester I: Direct current circuit analysis. D. C. motors and generators. Introduction to alternating current circuits. Prerequisites: Math. 4A, Physics 4B, or permission of the instructor. Semester II: Alternating current circuit analysis. Transformers, alternators, induction and synchronous motors, conversion apparatus, and transmission lines. Prerequisite: Engr. 100A.

**101A. Electrical Engineering Laboratory** (2) I

Laboratory determination of the characteristics of direct current machinery and circuits, single phase alternating current circuits. One three-hour lab. and report per week. Prerequisite: Engr. 100A, or taken concurrently.

**101B. Electrical Engineering Laboratory** (2) II

Laboratory determination of the characteristics of single phase and polyphase circuits, machines, and related equipment. One three-hour laboratory period and report per week. Prerequisite: Engr. 100B, or taken concurrently.

**102A-102B. Analytical Mechanics** (3-3) Year, I

Lectures and problems. Emphasis on engineering applications. Semester I: Principles of statics which deals with the conditions of equilibrium of bodies acted upon by forces. Prerequisites: Physics 4A-4B, Math. 4A. Semester II: Principles of dynamics which deals with the fundamentals of rectilinear and curvilinear motion of particles and rigid bodies, and the rotation of rigid bodies. Prerequisite: Engr. 102A.

**104. Communications** (3) II

Power amplifiers, oscillators, modulators and detectors. Radio transmitters and receivers for amplitude modulation and frequency modulation. Television systems. Antennas and radio wave propagation. Prerequisite: Physics 102 or permission of the instructor.

**105. Hydraulics** (3) II

A general course in hydraulics including the fundamental principles of hydrostatics and hydrodynamics stressing design considerations of orifices, weirs, piping systems and canals. Prerequisites: Math. 4A, Physics 4A, Engr. 102A.

**106. Hydraulics Laboratory** (2) II

Laboratory determination of the characteristics of fluid flow through pipes, orifices, weirs; characteristics of various types of hydraulic machinery. One three-hour laboratory period and report per week. Prerequisite: Engr. 105, or taken concurrently.

**122. Machine Design** (4) I

Individual design of a useful machine encampassing fundamental considerations of simple machine parts. Practical design methods utilizing professional literature are stressed. Three lectures and one three-hour laboratory period per week. Prerequisites: Engr. 23, 102A, 140.

**124. Radio Measurements** (2) II

A laboratory course on measurements of the parameters of resonant circuits at radio frequencies. Study of the properties of oscillators, modulators, detectors and wave guides. Prerequisite: Previous or concurrent enrollment in Engineering 104. Students with credit in Physics 124 may not receive credit for this course.

**128. Applied Engineering Thermodynamics** (3) I

The fundamental theory and principles of heat power engineering; the various types of heat power equipment and their operation, the practical application of basic theory to efficient operating practices is stressed. Prerequisites: Math. 4A, Physics 4B.

**129. Heat Power Laboratory** (2) I

Testing of steam generators and heat balance of same; steam turbine; reciprocating engine; internal combustion engines for heat balance; flue gases, fuel oils, lubricating oils and boiler feed water. Emphasis upon standard operating procedures. One three-hour laboratory period per week. Prerequisite: Engr. 128, or taken concurrently.

**130. Route and Construction Surveying** (3) I

Application of surveying to engineering problems. Methods of route surveys for highways, railroads, utilities. Construction surveys for buildings and other structures. Earthwork computations. Two lectures and one three-hour field period per week. Prerequisite: Engr. 1B.

**131. Advanced Surveying** (3) II

Special problems in surveying. Methods of geodetic surveying, map projections, U. S. public land surveys, and photogrammetry. Two lectures and one three-hour field period per week. Prerequisites: Astr. 3 (may be taken concurrently) and Engr. 1B.

**140. Strength of Materials** (3) II

Elastic properties and strength of engineering materials. Analysis of types of failures. Stress analysis and deformation of simple structural and machine members. Photoelasticity. Lecture and problems. Prerequisite: Engr. 102A.

**141. Materials of Engineering Laboratory** (2) II

Theory and operation of testing machines and auxiliary apparatus. Conduct of tests to determine significant characteristics of commonly used engineering materials. Included are heat treatment of metals, metallographic tests, and photoelasticity. One three-hour laboratory and report per week. Prerequisite: Engr. 140, or taken concurrently.

**142. Stress Analysis** (3) I

Determination of stresses in trusses, beams, and frames. Combined stresses; space structures; general theorems relating to elastic systems; statically indeterminate structures; deflections; analytical and graphical methods of solution. Lectures and problems. Prerequisites: Eng. 102A-102B, 140.

**145. Internal Combustion Engines** (3) II

Application of theory of thermodynamics to internal combustion engines. Essential features of design, operating characteristics, and application of gasoline, diesel, and gas engines, and the gas turbine. Lectures and problems. Prerequisites: Physics 4C, Math. 4A. Recommended: Engr. 128.

**150. Industrial Electronics** (3) II

Photoelectricity and its applications; rectification and inversion; theory and applications of thyratrons and ignitrons including welding; radio-frequency heating; electrostatic precipitation; motor control and introduction to servomechanisms. Prerequisite: Physics 102.

**156. Aerodynamics** (3) II

Mechanics and thermodynamics of air; wing characteristics; drag; wind tunnel testing technique; propellers and power plants; aircraft performance; stability and control. Introduction to compressible aerodynamics. Lectures and problems. Prerequisites: Engr. 102A-102B.

**199. Senior Report** (2) I, II

Investigation of specific problems of advanced nature. Preparation of report. Prerequisite: Advanced senior standing.

NOTE.—In laboratory courses special emphasis is placed upon the preparation of neat, concise, complete and intelligent reports.

# ENGLISH

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in English. Lower division requirements: At least 15 units of work, including English 1 or 41, and 12 units of electives, of which six must be in a year course. Upper division requirements: A minimum of 24 upper division units in English and comparative literature, selected with the approval of a departmental representative; two years of lower division work in a foreign language or the equivalent reading knowledge of a language as determined by examination.

Prospective majors of sophomore standing may, with the consent of the course instructor, and subject to general college regulations (credit for Upper Division and Graduate Courses is in section on Announcement of Courses), substitute six units of upper division electives for six units of required lower division work, such upper division units to be selected from the following: English 116A, 116B, 118A, 118B, 119A, 119B, 126A, 126B, 101A, 143A, 143B.

Students of Junior or Senior standing may substitute for any deficiencies in lower division requirements in English (except English 1) an equivalent number of units of upper division courses selected from the following: English 151, 116A, 116B, 120, 118A, 118B, 119A, 119B, 126A, 126B, 101A, 143A, 143B, 159.

A *teaching major* is offered in English for the general secondary or junior high school credential. For specific information, refer to the outlines of requirements for these credentials. English majors who have been admitted to candidacy for the general secondary credential may satisfy the foreign language requirement by one year of lower division foreign language, or equivalent, if 9 units of professional education units have been completed.

### Minor

A *minor in arts and sciences* is offered in English. The minor must include at least 15 units of work in English, including English 1 or 41, and at least 12 units of electives, of which nine must be from courses carrying upper division credit.

A *teaching minor* is offered in English for the general secondary, the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Comparative Literature

For courses in world literature, giving credit toward the English major or minor or toward the Comparative Literature minor, see Comparative Literature.

### Credit in Course Sequences

All elective year courses in the department may be begun in either semester, and either semester may be taken for credit.

## Lower Division Courses

**A. English Fundamentals** (2) I, II

The elements of composition, including drill in grammar and usage; exercises in vocabulary building and in fundamental reading skills; theme writing. Credit in this course is equivalent to passing the English A examination and may be counted toward graduation as an elective but not to satisfy lower division English requirements in any curriculum.

**R. Reading Laboratory** (0) I, II

A semi-tutorial service offered by the English Department to those wishing to improve reading ability, or secure individual help with study problems. Open to all students at any level of college work. Consult department chairman.

**W. Writing Laboratory** (0) I, II

A semi-tutorial service offered by the English Department to those wishing assistance in writing projects, either remedial or advanced. Open to students at any level of college work. Consult department chairman.

**1. Freshman Composition** (3) I, II

Study and practice in the expression of ideas and factual materials; principles of organization and of effective style, with emphasis on exposition. Prerequisite: Satisfactory English A examination or credit in English A.

**2. Freshman Literature** (3) I, II

A course designed to develop college reading skills through practice in the analysis of materials at varying levels of difficulty. Prerequisite: English 1 or 8.

**6A-6B. The Study of Literature** (3-3) Year, I

A basic course in reading imaginative literature with insight and vividness. Methods of developing an informed and trained critical attention to literary works, motion pictures, and radio presentations.

**8. English in Business** (3) I, II

Theory and practice of business correspondence. Business letters as applied to salesmanship; problems in writing credit and collections letters, applications for employment, adjustment letters, and sales letters. Prerequisites: English A, Cross English Test and Commerce 2A or its equivalent. (A satisfactory score on the college entrance English test may be substituted for English A.)

**10. Recreational Reading** (1) I, II

Development of personal tastes for leisure-time reading through lectures and written reports. May be taken a second time with new materials.

**50A-50B. Survey of American Literature** (3-3) Year, I

Semester I: Major American writers from the beginning to 1860. Semester II: American literature from 1860 to the present.

**52A-52B. Masterpieces of World Literature** (3-3) Year, I

A chronological survey from Homer to modern times. The first semester stresses the classical epic and tragedy. The second semester, beginning with the Renaissance, stresses prose fiction, the drama, and the essay. Not open to students with credit for Comparative Literature 52A-52B.

**56A-56B. Survey of English Literature** (3-3) Year, I

The study of some important works of English literature from the Anglo-Saxon period through the Victorian age, with emphasis upon the literary history of each period.

**60A-60B. Literature and Personality** (3-3) Year, I

The close study of a limited number of the great creators of literature. The goal of the course is to derive, from markedly different specific works, orderly and generalized methods for the interpretation of great literature.

**61. Sophomore Composition** (3) I

An elective course designed to give further training to the student who wishes practice in writing beyond the freshman level. Prerequisites: English 1 and English 2, or equivalent.

**62. The Short Story** (3) II

A practical course in writing, including a study of short story techniques and purposes, and the writing of complete short stories. Prerequisites: English 1 and English 2, or equivalent.

**63. Foundations of the Language** (3) II

A study of the important features of English grammatical structure, with emphasis on present-day usage. Designed to make more significant the native language through a study of the elements which compose it.

### Upper Division Courses

**106. Creative Writing** (3) I

A writing workshop in which students are given opportunity to criticize each other's work. Emphasis on narrative and description, but freedom to pursue whatever writing forms may interest the student most. May be taken a second time with new material.

**110. Recreational Reading** (1) I, II

An advanced course in the group reading of modern drama, poetry and fiction.

**113. American English** (3) I (Offered in 1951-52)

The development of American English; regional and cultural differences in pronunciation, grammar, and vocabulary.

**116A-116B. The Age of Elizabeth** (3-3) Year, I

Semester I: Poetry and prose, exclusive of drama. Semester II: The drama to 1642, excluding Shakespeare.

**117A-117B. Shakespeare** (3-3) Year, I

The first semester gives special emphasis to the histories and comedies; the second, to tragedy and the dramatic romances.

**118A-118B. Eighteenth Century English Literature** (3-3) Year, I

The first semester emphasizes the social satire of Swift, Pope, Addison, Steele, Dryden, Gay, Prior; and also the first stirrings of the romantic revolt in a number of important poems and prose works. The second semester is devoted to Johnson and Boswell and their circle and to a significant romantic literature antedating the romantic outburst.

**119A-119B. Nineteenth Century English Poetry** (3-3) I

Semester I: The culmination of the romantic movement in the poetry of Wordsworth, Coleridge, Byron, Shelley, and Keats, in relation to the thought of the revolutionary period. Semester II: Tennyson and Browning with their contemporaries and successors, relating English poetry to nineteenth century life and thought.

**120. The Age of Milton** (3) II

A study of the literature of the earlier seventeenth century, with emphasis on Jonson, Donne, and Milton. Consideration is given to the political, religious, and social backgrounds of the seventeenth century.

**126A-126B. Nineteenth Century English Prose** (3) I

Semester I: Romantic and mid-Victorian prose writers, including Coleridge, Hazlitt, Lamb, DeQuincey, Carlyle, Landor, Macaulay, and Mill, related to the literary, political, and social movements of the period. Semester II: Late nineteenth century essays of Arnold, Thomas Huxley, Newman, Pater, Ruskin, and Stevenson. Study of scientific, aesthetic, and ethical backgrounds.

**129. Contemporary British Literature** (3) II

Selected prose and poetry of England and Ireland from 1914 to the present, including Shaw, Yeats, Synge, Joyce, Maugham, Huxley, D. H. Lawrence, Eliot, the Oxford poets, and the principal authors belonging to the two wars.

**131. American Literature: 1820-1860** (3) I

The study of the important romantic writers, with emphasis on the New England group.

**132. The Frontier and American Literature** (3) I, II

The influence of the frontier upon American literature studied through various regions and movements. Examinations of source materials, biographies, and representative writers.

**133. American Literature: 1860-1910** (3) II

The rise of realism in American literature. Influences, foreign and native, which promoted the movement. Definition of realism. The literary creed of the realists. The romantic attack and the realist defense.

**134. American Literature: 1910 to the Present** (3) I, II

Ideas and forms in representative poetry and prose.

**135. American Colonial and Revolutionary Literature** (3) I

The Puritan system of thought and way of life, and the literary and intellectual movements of the eighteenth century, studied in the works of such representative writers as Mather, Franklin, Paine, Freneau, and Brockden Brown.

**143A-143B.** (3-3) Year, I

The history of the English novel from its beginnings to the present century. Emphasis in the first semester will be on the eighteenth century and in the second semester on the nineteenth century.

**149. The Study of Poetry** (3) II

A course proceeding from simpler to more complex poetic productions, and designed to bridge the widening chasm between the poet and the ordinary man. Emphasis on current directions in poetry, and on poetry as an oral and auditory art.

**151. Chaucer** (3) I

A study of Chaucer's works, with emphasis on "The Canterbury Tales" and "Troilus and Criseyde."

**152A-152B. Survey of Drama.** (3-3) Year, I

Study of selected tragedies and comedies from Asiatic, European, English, and American literature, with emphasis upon the human problems depicted therein and upon the timelessness of certain themes, such as those of Electra and Medea. Lectures, discussions, and reports on readings. Not open to students with credit for Comparative Literature 152A-152B.

**162. Magazine Fiction** (3) I

Coaching in constructing and writing short stories for commercial publications. Admission by consent of the instructor.

**166. Honors Course** (3) I, II

Special study open to members of the Honors Group in English (see The Honors Group under General Regulations). May be repeated with different materials.

**191. Advanced Composition** (3) I

A course designed for prospective teachers of secondary school English. This is not a methods course, but a content course in grammar, composition, and journalism. Required of all teaching majors in English; open to other students as an elective.

**192. The English Language** (3) II

The study of the history of the English language, of its words and structure, of the changes in inflections, pronunciation, vocabulary, and meaning, and of its use as an instrument of communication and human living. Open only to seniors and graduate students.

**195. Literary Criticism** (3) I

A historical survey of the principles and practices of literary criticism from Greek times to the nineteenth century. Readings in the works of Aristotle, Horace, Longinus, Sidney, Boileau, Dryden, Lessing, Sainte-Beauve, Coleridge, and Arnold. Open only to senior and graduate students.

**199. Special Problems** (1-3) I, II

Students who have demonstrated ability in literary studies may enroll for work other than that outlined in the regular courses. Admission only by permission of the instructor with whom the work is to be done.

### Graduate Courses

**203A-B-C-D. The Critical Study of a Major Author** (2-2-2-2) I, II
A seminar in (A) Shakespeare, (B) Arnold, (C) Mark Twain, or (D) Emerson.

**213A-B-C-D. The Study of a Cultural Period Through Its Literature** (2-2-2-2) I, II
A seminar in (A) the Renaissance, 1500-1660, (B) the Enlightenment, 1660-1780, (C) The Romantic Revolution, 1780-1830, or (D) Industrialism and Democracy, 1830-1914.

**223A-B-C-D. The Study of a Literary Problem** (2-2-2-2) I, II
A seminar in (A) Regionalism in American Literature, (B) the Utopian Theme in Literature, (C) the Idea of the "Gentleman," or (D) European Influences in American Literature.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3)
An individual study course designed primarily for candidates for the master's degree.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

## FRENCH

### IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in French. Lower division requirements: French, 1, 2, 3, 4, 5, 6; German 1, 2, or Spanish 1, 2, or Latin 1, 2; History 4A-4B. Upper division requirements: A minimum of 24 upper division units, at least 21 units of which must be in French, including French 199. The remaining 3 units may be selected from Geography 118; History 121A-121B, 131A-131B, 141, 142, 143A-143B, 144A-144B; or Comparative Literature 101A, 140A-140B, 152A-152B, 155, 158, 159, in consultation with the Chairman of the Department. An average of C grade or better is required in upper division major courses.

A *major in arts and sciences* is offered in Romance Languages. For specific information, refer to Romance Languages in the section on Announcement of Courses.

A *teaching major* is offered in French for the general junior high school credential. For specific information, refer to requirements for this credential.

### Minor

A *minor in arts and sciences* is offered in French. The minor must include at least 15 units of work in French, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in French for the general secondary, the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credential. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1. Elementary** (3) I, II
Pronunciation, oral practice, readings on French culture and civilization, minimum essentials of grammar.

**2. Elementary** (3) I, II
Continuation of French 1. Prerequisite: French 1 or one year of high school French.

**3, 4, 5, 6.** Will take place of French C, D, in the fall semester of 1951.

**10. Conversation** (2) I

Practice in the spoken language; practical vocabulary, conversation on assigned topics; simple dialogues and plays. Prerequisite: French A or two years of high school French.

**11. Conversation** (2) II

Continuation of French 10. Prerequisite: French 10, French B, or three years of high school French.

**15. French Civilization** (2) I

The major currents and characteristics of French culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

**16. French Civilization** (2) II

Continuation of French 15. No prerequisite.

**B. Elementary** (5) I (Offered for last time in Fall of 1950)

Intensive study of French grammar and syntax; daily written work discussed in class; class drill in conversational idiom and pronunciation; reading with oral discussion and resumes; diction; introduction to contemporary prose writers. Students who have had two years of French in high school should register for French B for which only four units will be allowed. For specific information, consult the chairman of the department.

**C-D. Intermediate Reading** (3-3) Year, I (Offered for last time in Spring of 1951)

Reading and composition; study of standard prose as a basis for class work, collateral reading with résumés and written reports; dictation. Prerequisite for C: French B or three years of high school French. Prerequisite for D: French C or four years of high school French.

**SC. Scientific Reading** (2) II

Reading taken from the fields of chemistry, physics, medicine, zoology, biology, etc. Outside readings of books and periodicals, with written reports. Prerequisite: French B or equivalent.

### Upper Division Courses

**101A-101B. Conversation and Composition** (3-3) Year, I

Translation into French from moderately difficult English prose. Outside reading of modern French prose, with written reports in French monthly. Readings and oral discussions in French of various facets of French life and culture.

Prerequisite: French D, or its equivalent, with grade of C.

**105A-105B. Modern French Drama** (3-3) Year, I (Offered in 1953-54)

Plays of Victor Hugo, de Vigny, de Musset, Scribe, Augier, Dumas fils, Pailleron, Brieux, Hervieu, Maeterlinck, Rostand, and others read and discussed as to subject matter and technique. Outside reading and reports. Prerequisite: French D, or its equivalent, with grade of C.

**107A-107B. Eighteenth Century Literature** (3-3) Year, I (Offered in 1952-53)

The works of Montesquieu, Voltaire, Rousseau, the Encyclopédistes, and others. Prerequisite: French D, or its equivalent, with a grade of C.

**110A-110B. Modern French Novel** (3-3) Year, I (Offered in 1951-52)

The French novel from Victor Hugo to the present day, including such authors as: Hugo, Dumas, Stendahl, Balzac, Flaubert, Loti, Anatole France, Bourget, Bordeaux, Bazin, Barrès, Romain Rolland, A. Gide, Marcel Proust, and others. Class reading, outside reading, and reports. Prerequisite: French D, or its equivalent, with grade of C.

**111A-111B. Seventeenth Century Dramatic Literature** (3-3) Year, I

Reading in class of plays of Molière, Corneille, and Racine. Outside readings and lectures on the background of the seventeenth century in France. Prerequisite: French D or its equivalent, with a grade of C.

**199. Comprehensive Reading and Survey Course** (3) II

Designed to fill up the gaps in the reading done in courses. Class meeting once a week for guidance, reports, and quizzes. Required of all seniors majoring in French.

# GENERAL LANGUAGE

## IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in general language.

### Lower Division Courses

**20. Latin and Greek Word Derivation** (3) I

A general and elementary course in philology. A study of Latin and Greek roots of most frequent occurrence in English, and of the English words derived from them. No prerequisite.

**30. Pronunciation of French, Italian and German** (1-3) II

A course designed especially for the use of singers, radio announcers, etc. No prerequisite. This course may be taken for one, two or three units of credit depending on the individual student's need. Credit in this course does not count toward the 6-unit foreign language requirement.

# GEOGRAPHY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in geography. Lower division requiements: Geography 1, 2; Geology 1A-1B. Recommended: A reading knowledge of French or German. Upper division requirements: A minimum of 24 upper division units in geography, or 18 units in geography and 6 units selected from related fields with approval of the departmental representative.

A *teaching major* is not offered in geography; however, courses in geography may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines for requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in geography. The minor must include at least 15 units of work in geography, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in geography for the general secondary credential; however, it may be used as a part of the *social science minor* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to requirements for these credentials.

### Lower Division Courses

NOTE.—Geography 1 or 3 may not be used to meet any part of the 12-unit social science requirement. Geography 1 or 3 (but not both) may be used to meet part of the 12-unit natural science requirement.

**1. Introduction to Geography: Physical Elements** (3) I, II

The nature of maps, weather and climates of the world; natural vegetation; land forms and their associated soils, with reference to their climatic relationships; the seas and their coasts. One field trip. This course is classified as a natural science. (See lower division requirements.)

**2. Introduction to Geography: Natural and Cultural Regions** (3) I, II

The regional differentiation of the world by human activity; areal bases of economy and nationality. Prerequisite: Geography 1.

**3. Elementary Meteorology** (3) I, II

An elementary study of the earth's atmosphere and changes in it which produce our weather and influence human affairs. Special attention given to local conditions, instruments, and records. Aeronautical meteorology stressed in the fall semester. This course is classified as a natural science. (See lower division requirements.)

**10. Economic Geography** (3) I, II

Beginning course in economic geography designed for commerce and economic majors. Prerequisite: Geography 1.

## Upper Division Courses

**112. Geography of California** (3) II

The physiographic regions of California and the cultural landscapes developed by the successive cultural groups. Prerequisite: Geography 1 or consent of instructor.

**113. Climatology** (3) I (Not offered in 1950-51)

A survey of the principal classifications of climates of the world; regional characteristics of climate; relations to soils, vegetation, and human activities. Prerequisite: Geography 1 or consent of instructor.

**117. Geography of Northern and Eastern Europe** (3) I

A study of the cultural development of the countries of northern and eastern Europe in relation to physical background and historical evolution. Prerequisite: Geography 1 or consent of instructor.

**118. Geography of the Mediterranean Area** (3) II

A study of the cultural development of the countries of Southern Europe, Western Asia, and North Africa in relation to physical background and resources. Prerequisite: Geography 1 or consent of instructor.

**119. Geography of South America** (3) II

A study of the physical regions and human geography of South America, including a review of the history of colonization and the exploitation of resources. Prerequisite: Geography 1 or consent of instructor.

**120. Geography of Middle America** (3) I

A study of the physical and human geography of Mexico, Central America, and the islands of the Caribbean, including a review of the history of colonization and the exploitation of resources. Prerequisite: Geography 1 or consent of instructor.

**121. Geography of North America** (3) II

The natural regions of North America, their formation and economic and historical development. Prerequisite: Geography 1 or consent of instructor.

**124. Geography of Asia** (3) I

The cultural regions of Asia, their physical environment, and historical development. Prerequisite: Geography 1 or consent of instructor.

**135. Geography of the San Diego Area** (3) II

Directed individual urban and rural field work in the San Diego area; the mapping of a small area and making its geographic interpretations. Prerequisite: Geography 1 and 2 or consent of instructor.

**141. Advanced Economic Geography** (3) I

A survey of the raw materials of world trade; their production and distribution as related to major geographic regions of the world. Prerequisite: Geography 1 or consent of instructor.

**145. Conservation of Natural Resources** (3) II

Nature and extent of mineral, soil, water, forest, and wild life resources and their conservation; with particular emphasis on the United States, against a general background of world resources. Conservation philosophies and practices, and their geographic bases. Prerequisite: Geography 1 or consent of instructor.

**166. Honors Course** I, II (Credit to be arranged)

To be arranged after consultation with the chairman of the department. (See the Honor Group).

**199. Special Studies** (1-3) I, II

### Graduate Courses

**200A-200B. Seminar** (2-2) Year, I

**290. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3)

An individual study course designed primarily for candidates for the master's degree.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

# GEOLOGY

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is not offered in geology. Students preparing for later professional training in geology should plan on completing Chemistry 1A-1B; Physics 4A-4B-4C; Mathematics 3A-3B; Engineering 1A-1B, 21A; and Geology 1A-1B, 21A-21B.

A *teaching major* is not offered in geology; however, courses in this field may be used as part of the *general science major* for the general junior high school credential. For specific information, refer to the outline of requirements for this credential.

### Minor

A *minor in arts and sciences* is offered in geology. The minor must include at least 15 units of work in geology, nine units of which must be from courses carrying upper division credits.

A *teaching minor* is not offered in geology; however, courses in this field may be used as part of the *general science minor* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A. Physical** (4) I

The composition, origin, and distribution of earth materials, and their modification through mechanical and chemical process of change. Three lectures and one three-hour laboratory period weekly with related field study during the semester. (Not open to students who have had Geology 2A except for one unit upon the completion of the laboratory section.)

**1B. Historical** (4) II

Theories of earth origin, and the evolutionary history of the earth as traced through rock and fossil records. Consideration of the Paleontologic Sequence. Three lectures and one three-hour laboratory period weekly, with arrangement for field study and conference during the semester. Prerequisite: Geology 1A or equivalent.

**2A. General** (3) I

Similar to Geology 1A but without laboratory. Emphasis upon origin and development of earth's surface features. Open to all students except those already presenting credit in Geology 1A. Two lectures and one demonstration and discussion hour weekly.

**2B. Physiography of United States** (3) I

A study of the land forms of the United States and their physiographic history as illustrative of universal geologic conditions. Two lectures and one discussion hour weekly. Prerequisite: Geology 1A or 2A.

**21A-21B. Mineralogy** (3-3) Year, I

Study of the common minerals and rocks. Use of the blowpipe, simple chemical reagents, and the petrographic microscope, but with emphasis upon sight determination. Prerequisite: High school chemistry, or equivalent.

### Upper Division Courses

**100. Structural Geology** (3) I

The evolution and description of the structural and topographical features of the earth. Faulting, folding, and orogenic forces with practical illustrations from the North American Continent and California geologic conditions. Lectures, discussions, and occasional field trips. Prerequisite: Geology 1A-1B or 2A-2B.

**101. Museum Work** (1-2) I, II

Selection and preparation of materials for the college museum collections. Emphasis upon creation of self instructive displays for use on the elementary and secondary as well as the collegiate level. Prerequisite: Geology 1A-1B, and consent of the instructor.

**102. Geology of California** (2) II

Directed reading and group discussion of California geologic literature. Designed to acquaint the student not only with the important structural and geomorphic units of the State but with the variety of important source materials of geologic literature as well. Use of bibliographies, state and federal surveys, research publications, etc. Prerequisite: Geology 1A-1B, and consent of the instructor.

**108. Field Geology** (1-4) I, II

Field instruction in geologic methods. Reconnaissance of adjacent unmapped areas with preparation of a geologic map and accompanying report. Work accomplished primarily on week-ends with minimum classroom activity during the week for organizational details. Prerequisite: Geology 1A-1B, and consent of the instructor.

**199. Special Study** (1-2) I, II

Individual work in field, library, laboratory, or museum under staff supervision. Open only to qualified students upon consultation.

## GERMAN

### IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in German; however, students desiring to carry advanced work in German should consult with the Chairman of the Department of Foreign Languages.

### Lower Division Courses

**1. Elementary** (3) I, II

Pronunciation, oral practice, readings on German culture and civilization, minimum essentials of grammar.

**2. Elementary** (3) I, II

Continuation of German 1. Prerequisite: German 1 or one year of high school German.

**3, 4, 5, 6.** Will take the place of German C, D, in the Fall semester of 1951.

**10. Conversation** (2) I

Practice in the spoken language; practical vocabulary; conversation on assigned topics; simple dialogues and plays. Prerequisite: German A or two years of high school German.

**11. Conversation** (2) II

Continuation of German 10. Prerequisite: German 10, German B or three years of high school German.

**15. German Civilization** (2) I

The major currents and characteristics of German culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

**16. German Civilization** (2) II

Continuation of German 15. No prerequisite.

**B. Elementary** (5) I (Offered for last time in Fall of 1950)

Pronunciation, reading and grammar, with practice in simple conversation, narration and description, both oral and written. Students who have had two years of German in high school should register for German B for which only 4 units will be allowed. For specific information, consult the chairman of the department.

**C-D. Intermediate Review and Reading** (2-2) Year, I
(Offered for last time in Spring of 1951)

Reading and composition; study of standard prose as basis for class work; collateral reading with written reports; German conversation, with texts read as a basis; dictation. Prerequisite for C: German B or three years of high school German. Prerequisite for D: German C or four years of high school German.

**SC-SD. Scientific Reading** (3-3) Year, I

First semester, readings in scientific reader on chemistry, physics, etc.; occasional written reports on scientific subjects read outside of class; sight reading. Second semester, readings in special scientific or technical works; weekly written reports required; sight reading. Prerequisite for SC: German B with a grade of C or three years of high school German; for SD: German SC, German C, with a grade of C, or four years of high school German.

### Upper Division

**101A-101B. Advanced Conversation and Composition** (3-3) Year, I
(Not offered 1950-51)

Translation into German of moderately difficult English prose. Free composition in German, written and oral. Outside reading of modern German plays and prose, dealing with various aspects of German life and culture, with written reports and oral discussions in German. Oral and written practice in conversational German. Prerequisite: German D, or equivalent, with grade of C.

## HEALTH EDUCATION

### IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

Major is not offered in health education.

### Minor

A *minor in arts and sciences* is offered in health education. The minor must include at least 15 units of work, nine units of which must be from courses carrying upper division credit. Courses will be determined in consultation between student and departmental representative.

A *teaching minor* is offered in health education for the general secondary, the general junior high school, and the special secondary credentials. Physical education majors may use health education as a second teaching minor only. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**21. Principles of Healthful Living** (2) I, II

An approach to the personal health problems of college students. Scientific health information is provided, and an attempt is made to promote wholesome attitudes and desirable practices relating to healthful living. Required of all freshmen.

**65. Community Health** (3) I, II

Community health problems; the role of the citizen, of the public, and of community health agencies in promoting and protecting the health of the community.

**90. Physiology of Reproduction** (1) I, II

A series of lectures and discussions dealing with normal and abnormal physiology and anatomy of reproduction; facts and frauds in sex hygiene, and related topics.

### Upper Division Courses

**151. Health Education for Teachers** (2) I, II

The teacher's function in the different aspects of the school health program; environment, services, and instruction. Special attention is given to materials and material sources, and to community relationships and resources. Separate elementary and secondary sections.

**152. Health Education Programs** (3) I

The construction of the health education program including objectives, scope and sequence of instruction, teaching methods, source materials and evaluation procedures; practice in building instructional units.

**153. Administration of the School Health Program** (3) II

Administrative responsibilities and procedures in organizing and conducting the school health program. Principles, policies, and practices involved in instruction, service, environment, and community relationships. Partially fulfills Health and Development Credential requirement for nurses.

**199. Special Study in Health Education** (1-3) I, II

Extensive review of pertinent literature, individual research, and advanced study of problems in the profession. Credit will range from one to three units according to the type and amount of work. Approval of the Department Chairman required.

### Graduate Courses

**202. Problems in Health Education** (2) I, II

Current problems in Health Education, studied through a review of the literature, discussion of trends, observation of school situations, together with the analysis and evaluation of actual problems. Written reports required.

## HISTORY

### IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in history. Lower division preparation for the major: History 4A-4B, or 8A-8B, or 9A-9B, and either Political Science 1A-1B, or 71A-71B, or Economics 1A-1B. Two of the above history courses are recommended for students planning to major in history, and it is suggested that History 4A-4B be included as one of them. No freshman shall enroll in more than one lower division course in history during any one semester without the permission of the department. Upper division requirements: A minimum of 24 upper division units in history, including History 199, and a minimum of a year of concentration in each of three of the following fields: (a) Ancient and Medieval; (b) Modern Europe; (c) United States; (d) Latin America; (e) Pacific Area and the Far East. These courses must be selected under the guidance of the chairman of the department. A reading knowledge of one foreign language is strongly recommended.

A *teaching major* is offered in history for the general secondary credential. History may also be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in history. The minor must include at least 15 units of work in history, nine units of which must be from courses carrying upper division credit including a year course.

A *teaching minor* is offered in history for the general secondary credential or as part of the *social science minor* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

## Explanation of Courses

NOTE: History 17A-17B does not count toward credit for a major or minor in history.

Any history course, with the exception of History 270A-270B, may be taken either semester, the A part not being a prerequisite to the B part.

## Lower Division Courses

**4A-4B. History of Modern Europe** (3-3) Year, I, II

A survey of European society, institutions and politics from about 1500 to the present. Fall semester: 1500-1799. Spring semester: 1799 to the present.

**8A-8B. History of the Americas** (3-3) Year, I

Survey of the history of the western hemisphere from its discovery to the present time.

**9A-9B. History of the Pacific Ocean Area** (3-3) Year, I

A general survey of the history and civilization of the peoples of the Pacific, with special emphasis upon exploration, trade, international rivalries, and social evolution of the island areas.

**17A-17B. History of American Civilization** (3-3) Year, I

Survey of the political and social development of the United States, with emphasis upon the rise of American civilization and ideals.

NOTE: This course is not open to freshmen.

## Upper Division Courses

**111A-111B. Ancient History** (3-3) Year, I

Fall semester: Greek history to the Roman conquest. Spring semester: Roman history to the fourth century A.D.

**121A-121B. Medieval History** (3-3) Year, I

Survey of the main events of European social, cultural, religious, political and economic history, between 500 and 1300 A.D.

**131A-131B. Renaissance, Reformation and Counter-reformation** (3-3) Year, I

A history of personalities and events connected with the social, political, cultural, economic and religious change between 1300 and 1600.

**141. Europe in the Seventeenth and Eighteenth Centuries** (3) I

European thought, politics and international relations from the Thirty Years' War and Louis XIV to the Seven Years' War.

**142. The French Revolution and Napoleonic Era** (3) II

Study of conditions in France prior to 1789, the Revolution, 1789-1799, the organization of France and Europe under Napoleon, character of his empire, and the reorganization of Europe at the Congress of Vienna.

**143A-143B. Europe in the Nineteenth Century** (3-3) Year, I

Reaction in Europe, the development of nationalism, the impact of industrialism, and the background of World War I. Covers period 1815-1914.

**144A-144B. The World Wars** (3-3) Year, I

Developments from 1914 to the present. Semester I: World War I, the peace settlements, and the background of World War II. Semester II: World War II and its aftermath.

**151A-151B. History of England** (3-3) Year, I

Survey of political, constitutional, social and economic developments since 1066. Designed for pre-legal students, majors in English, and as a background for American History.

**156A-156B. History of British Expansion** (3-3) Year, I

Study of the growth and development of the British Empire from the first overseas empire to the present. History 156B not open to students with credit for Political Science 160.

**161. Mexico and Caribbean Countries** (3) I

Special attention to relations between the United States and these countries, and to recent developments in Mexico.

**162. South America Since Independence** (3) II

Republics of South America. Development of nationality, struggles for political stability, exploitation, diplomatic and commercial relations with the United States, and other international problems of South America. Survey of present-day conditions.

**171A-171B. Rise of the American Nation** (3-3) Year, I

Semester I: English colonization in North America, development of colonial institutions and political customs, and areas of international conflict during 18th century. Semester II: The Revolution and establishment of the government under the Constitution of 1787. Covers period to 1814.

**172A-172B. Constitutional History of the United States** (3-3) Year, I

Colonial governments, formation of the national Constitution, historical development of constitutional government, and significant phases of American constitutional law. Not open to students with credit for Political Science 139A and 139B.

**173A-173B. The Expansion of the United States** (3-3) Year, I

Lectures and readings on Jacksonian democracy, territorial expansion and the Mexican War, the slavery controversy, Civil War and Reconstruction, and attention to the growth and progress of the United States to the close of the nineteenth century.

**175A-175B. The United States in the Twentieth Century** (3-3) Year, I

The rise of the United States to the position of a world power; social and economic problems posed by the machine age; political action and adjustment, actual and proposed, intended as solutions for these problems.

**176A-176B. History of American Foreign Policy** (3-3) Year, I

Lectures and readings in the field of American foreign relations since 1776, with special emphasis, in the second semester, upon affairs since 1900. A general survey course. Not open to students with credit for Political Science 158A-158B.

**179A-179B. Intellectual History of the American People** (3-3) Year, I

A study of the ebb and flow of ideas in the United States since the founding of the English colonies, with special attention devoted to social and political thought.

**181A-181B. History of the West** (3-3) Year, I

The American frontier: Expansion, exploration, settlement and building of the new states, with emphasis upon frontier problems of defense, communications, finance, etc.; the development of cultural institutions. A critical examination of the causes, effects and results of the frontier experiences of the American people.

**189. History of California** (3) I, II

The economic, social, intellectual, and political development of California from the earliest times. Emphasis will be on the founding of California, international struggles for California; American conquest and Gold Rush Era; development of California as a state.

**191A-191B. History of the Far East** (3-3) Year, I

Particular emphasis during the first semester upon the history, both internal and international, of the Far East through the nineteenth century. The second semester will be devoted to a consideration of developments in the twentieth century.

**192. History of Russia** (3) II

A general survey emphasizing the period since Peter the Great; the Russian Empire's relations with its national minorities; Tsarist experiments in political and social reform; revolutionary socialism; the development of the U. S. S. R.

**193. History of China** (3) I (Offered in 1950-51 and alternate years)

A survey of Chinese history and institutions from antiquity to the present.

**194. History of Japan** (3) I (Offered in 1951-52 and alternate years)

A general survey of the political, economic and social development from the foundation of the empire to contemporary times. Special attention will be given to religions, philosophy, literature and the arts.

**199. Special Course for Advanced Students** (3) II

Required of all students with a history major in liberal arts and those working toward a General Secondary credential with a history major. To be attended during the senior year.

### Graduate Courses

**270A-270B. Seminar** (2-2) Year, I

Required of all candidates for the General Secondary credential with a history major, and for the M.A. degree in history. Prerequisites: 16 to 18 units in upper division history, including 199, or permission of instructor. 270A is a prerequisite for 270B.

**290. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

## HOME ECONOMICS

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is not offered in home economics; however, students may elect a *general major* with the field of concentration in home economics. For specific information on the home arts curriculum, refer to the Home Arts Curriculum in the section entitled: Preprofessional and Vocational Curricula, and for further information on the general major, refer to section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

A *teaching major* is not offered in home economics.

### Minor

A *minor in arts and sciences* is offered in home economics. The minor must include at least 15 units of work in home economics, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in home economics for the general secondary, general junior high, and special secondary credentials. Home economics may also be used as a second minor for the general elementary credential. For specific information, refer to the outline of requirements for these credentials.

### Lower Division Courses

NOTE—Courses in home economics may not be used to meet any part of the 12-unit social science requirement, nor may they be used as part of a social science major or minor.

**1. Home and Family Life** (3) I, II

Consideration of necessary preparation for marriage, family budgets and money management; recreation, entertaining and social usage; finding a home, its furnishings and equipment with consideration of arrangement and care; child care, proper training and guidance. Open to men and women.

**5. Food Preparation** (3) I

Principles of food selection, preparation and service with consideration of aesthetic and nutritional values. Experience in food preparation and meal service.

**10. Fundamentals of Clothing** (3) I

Selection of clothing with self-analysis as a basis; wardrobe planning and buying procedures. A study of commercial patterns and principles of garment construction. One lecture and two three-hour laboratories per week.

**11. Clothing Design** (3) II

Selection and construction of children's and adults' garments; care, repair and make-over problems of clothing. One lecture and two three-hour laboratories per week. Prerequisite: Home Economics 10 or equivalent.

**55. Household Equipment (2) II**
Selection, methods of operation and care of household appliances. Equipment of various types used and tested for efficiency and cost of operation. Efficient kitchen arrangement and storage space.

**61A. Nutrition (2) II**
Practical problems of nutrition including food requirements, food selection, and food habits. (For men and women.)

**61B. Nutrition Laboratory (1) II**
Nutrition principles applied to food preparation, meal preparation, and special diets.

**62. Food and Nutrition (3) II**
Selection, purchase, and service of meals with a consideration of nutritional needs of family groups, food habits and social customs. Open to all students except prenursing students.

### Upper Division Courses

**100. Advanced Clothing Design (3) II**
Design and construction of tailored silk and wool garments, informal and formal type dresses. Costume assembling. Prerequisite: Home Economics 11 or equivalent.

**101. Clothing Selection (3) I**
Aims to develop taste in dress through a better understanding of the relation of art principles, psychology, fashion trends, personality and physical characteristics to individuals. History of costume is studied briefly as an aid in understanding recurring cycles in fashion. A consideration of buymanship information necessary in wardrobe selection to insure satisfaction and economy.

**102. Child Growth and Development (3) I, II**
This course deals with a study of the mental, emotional, social, and physical development during childhood and early adolescence. Directed observation required. Not open to students who have credit for Psychology 106 or Education 102B.

**105. Family Meals (3) II**
This course deals with the planning, preparing, and serving of attractive, well-balanced meals for different income levels, and for various occasions. The student will have responsibility for menu making, food purchasing, and meal management.

**135. Marriage and the Family (3) I, II**
Preparation for marriage. Prediction scales for evaluating success or failure in marriage. Parent-child relationships; factors in successful and unsuccessful marriages; higher education and the birth rate; married women in industry and professions; desertion and divorce. Not open to students who have credit for Sociology 45 or 135.

**150. Home Management (3) I, II**
Integration of the learning activity around a living situation with emphasis on cooperation and establishment of family goals. Management of time, energy, and money in relation to family living. (Open to men and women.)

**160A. Merchandise Analysis—Textiles (2) I**
Properties, uses, selection and care of textile fibers and fabrics. The aim is to develop judgment in the evaluation involved in the selection of textiles. (Open to men and women.)

**160B. Merchandise Analysis—Nontextiles (2) II**
Properties, uses, selection and care of metals, glass, rubber, fur, enamels and plastics. (Open to men and women.)

**161. General Textiles (2) II**
Factors involved in fundamental weaves, fabrics, color, and finishes with reference to selection of fabrics for home decoration and clothing. Relationships to durability and cost are emphasized. Open to all students except merchandising majors.

**170. Child Care and Development (3) I, II**
A study of the prenatal and pre-school periods of child development. Directed observation and participation in the nursery school.

# INDUSTRIAL ARTS
## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is not offered in industrial arts at this time; however, all the lower division requirements can be met during a two-year period. Upper division courses are also offered as facilities will permit and other courses are planned and will be added as soon as possible. Courses are designed for two objectives: (1) leading toward professional education with a Special Secondary Credential, and (2) for general education. The General Shop courses are designed to contribute to better family living and in them special emphasis is given to individual interests and objectives. Some of the other courses, while designed for prospective teachers, should also prove valuable to students desiring practical shop training on an elective basis.

A *teaching major* is not offered in industrial arts at this time; however, students planning to complete the Special Secondary Credential in industrial arts should take the following courses in the lower division in addition to the general lower division requirements: Mathematics C, D, and E, unless completed in high school; Chemistry 2A, or a year of high school chemistry; Physics 2A-2B; Art 2; Speech Arts 2A; Industrial Arts 2 or 21 and 51 or 52; Industrial Arts 41 or 42, 61 and 71.

### Minor

A *minor in arts and sciences* is offered in industrial arts. The minor must include at least 15 units of work in industrial arts, nine units of which must be from courses carrying upper division credit.

A *teaching minor* in industrial arts is offered for the general junior high, special secondary, and general secondary credentials. Industrial arts may also be used as a second minor for the general elementary credential. For specific information, refer to the outline of requirements for these credentials.

### Lower Division Courses

NOTE: Courses in industrial arts may not be used to meet any part of the 12-unit physical science requirement, nor may they be used as part of a major in the physical sciences.

**2. Mechanical Drawing** (3) I, II, Summer

Use and care of drafting equipment, freehand lettering, technique of the finished drawing including inking, simple orthographic projection, introduction to dimensioning problems, simple section and auxiliary views, fundamentals of pictorial drawing in isometric, oblique, and cabinet projection. One lecture and two laboratory sections per week. Not open to students with credit for Engineering 2.

**21. Industrial Drafting** (3) II

Introduction to industrial drafting procedures. Principles of orthographic projection as applied to aeronautical and machine drawings, sheet metal, furniture and related production drawings, and electrical and pipe layouts. One lecture and two laboratory sections per week. Prerequisite: Industrial Arts 2 or one year of high school mechanical drawing.

**31. Introductory General Shop** (3) I

A general course introducing basic operations in wood, bench and sheet metal, forging, foundry, welding and electricity with special consideration given to the needs of the individual and the homemaker. One lecture and two laboratory sections per week.

**32. Intermediate General Shop** (2) II

Additional training in any two of the fields of wood, metal, welding, forging, or simple machining, to meet the needs and objectives of the individual. Two laboratory sections per week. Prerequisite: Industrial Arts 31 or permission of the instructor.

**41. Elements of Metalwork** (3) I

Demonstration and practice in the use of hand tools commonly used in bench and sheet metal including fundamentals of pipe fitting and welding. Discussion of the principles and techniques of metalworking for the prospective shop teacher. One lecture and two laboratory sections per week. (Required for the Special Secondary credential in Industrial Arts.)

**42. Elements of Machine Operation** (3) I, II

Demonstration and practice in the safe operation of machine shop equipment including drill, milling machine, shaper, and precision grinder for the shop teacher. May be substituted for Industrial Arts 41 to meet requirements for the Special Secondary credential in Industrial Arts. One lecture and two laboratory sections per week.

**51. Elements of Woodwork** (3) II

Training in the use of hand tools commonly used in the woodshop. Discussion and demonstration of the principles and techniques of woodwork and woodworking machines for the teacher. One lecture and two laboratory sections per week. (Required for the Special Secondary credential in Industrial Arts.)

**52. Advanced Woodwork** (3) I

Demonstration and practice in the safe operation of woodworking machines including the lathe and in the fundamentals of furniture joinery. Training in setting up and maintaining machines. One lecture and two laboratory sections per week. Prerequisites: Industrial Arts 51 or one year of high school woodwork.

**61. Elements of Electricity** (3) II

Demonstration of the basic principles of electricity as related to the home and to industry; practice in the use of tools, meters and materials in the laboratory and as applied to home appliances and the design and construction of simple devices suitable to the high school shop. One lecture and two laboratory sections per week. (Required for the Special Secondary credential in Industrial Arts.)

**62A-62B. Applied Electronics Laboratory** (3-3) Year, I (May not be offered in 1950-51)

Practice in the construction and testing of electronic devices, such as radio receivers, television receivers, photocell systems, vacuum tube voltmeters, special control, and testing devices. Two hours of discussion and six hours of laboratory per week. Prerequisite: Industrial Arts 61 or permission of instructor.

**71. Elements of Transportation Machinery** (3) I

Demonstration and study of the theory of internal combustion engines as applied to transportation. Practice in maintenance, tune up and minor repair of automobiles. Consideration of the problems of safe driving and the development of the necessary habits and attitudes. Two lectures and one laboratory section per week. (Required for the Special Secondary credential in Industrial Arts.)

## Upper Division Courses

**121. Advanced Mechanical Drawing** (3) I, II, Summer

Lettering practice, orthographic and isometric projection of machines and parts and of furniture. Theory and practice of dimensioning, working and production drawings, reproduction and principles of perspective. Intended for the prospective teacher. One lecture and two laboratory sections per week. Prerequisite: Industrial Arts 21.

**141. Advanced Metalwork** (2) I, II

Additional demonstration and practice on metalworking machines including press work, welding and forging, sheet metal forming, metal spinning and pipe layout and fitting. Two laboratory sections per week. Prerequisite: Industrial Arts 31 or 41.

**143A-143B. Advanced Machine Shop Practice** (3-3) Year, I, II

A year course in the principles and practice of machine tool operation stressing tool making, instrument work and modelmaking. One lecture and two laboratory sections per week. Prerequisite: Industrial Arts 42 or permission of instructor.

**146. Forging and Welding** (2) (May not be offered in 1950-51)
Principles and techniques of forging and welding including oxy-acetylene and electrical as applied to repair work and the fabrication of ornamental metal work. Two laboratory sections per week. Prerequisite: Industrial Arts 31 or 41.

**151A-151B. Furniture and Cabinet Making** (2-2) (May not be offered in 1950-51)
A year course in advanced woodwork problems. Design and construction of furniture and mill cabinet work. Two laboratory sections per week. Prerequisite: Industrial Arts 51 or 52.

**152. Finishing and Painting** (2) I
Theory, demonstration and practice of a wide variety of wood and metal finishing processes, including fillers, stains, varnishes, enamels and lacquers. Two laboratory sections per week. Prerequisite: Industrial Arts 31 or 51 or 52.

**153. Patternmaking and Woodturning** (3) II
Demonstration and practice of the principles of patternmaking and woodturning. Development of skill in woodturning operations. One lecture and two laboratory sections per week. Prerequisite: Industrial Arts 51 and 52 or equivalent.

**190. Experimental Shop** (1 or 2) I, II
Individual shop work on complex projects on an experimental basis. Prerequisite: Permission of the instructor.

**193. Industrial Arts Organization and Management** (2) II
Study of the organization of Industrial Arts in secondary schools, review of project requirements and methods of developing student participation in shop management. Two lectures per week.

**194. Recent Trends in Industrial Arts Education** (2) I
Survey of current trends and practices in the field of Industrial Arts in Secondary Education. There will be opportunity for individual work on related problems of interest to members of the class. Two lectures per week.

## JOURNALISM

### IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts* and sciences is not offered in journalism. Students desiring major work in journalism at this college should plan for a *general major* with the field of concentration in journalism. For specific information regarding this plan, refer to the curriculum in pre-journalism in the section entitled: Pre-professional and Vocational Curricula, and to the description for the general major in the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

### Minor

A *minor in arts and sciences* is offered in journalism. The minor must include at least 15 units of work in journalism, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in journalism.

### Lower Division Courses

**51A. Elements of Journalism** (3) I
Theory of news writing; introduction to the newspaper as an institution in modern society. Prerequisites: Sophomore standing and grade of B in freshman composition, or consent of instructor; and Commerce 2A (may be taken concurrently) or equivalent, with 30-word-per-minute performance.

**51B. News Gathering and Reporting** (3) II

Practice in writing news copy, both for class criticism and for publication in *The Aztec.* Prerequisite: Grade of C or better in Journalism 51A.

**92. Special Projects** (1-3) I, II

Special work in journalism by arrangement with instructor. Work on *The Aztec,* yearbook, other publications, with consent of instructor. (NOTE.—A maximum of six units of Special Projects allowable toward a general major or journalism minor requirements. As elective credit, such units not limited except at instructor's discretion. )

### Upper Division Courses

**101A. Magazine Article Writing** (3) I

The technique of the magazine article; article types; research techniques. Prerequisites: Junior standing, with average grade of B in all previous composition and journalism courses, *plus* permission of instructor.

**101B. Magazine Article Marketing** (3) II

Market analysis; slanting; the business of writing. Production of at least two full-length magazine articles, and marketing of same, required during the course. Prerequisite: Journalism 101A with grade of C or better.

**151. Advanced Editing and Reporting Techniques** (3) I

Editing copy, writing headlines, making up pages, handling telegraph copy. Practice in specialized forms of journalistic writing. Prerequisite: Journalism 51A-51B.

**191A-191B. City and County Newspaper Practice** (1 to 3-1 to 3) Year, I, II

A special course in applied journalism during which students work on nearby daily and weekly newspapers by special arrangement with editors. Prerequisite: Journalism 51A and 51B with grade of B, *plus* permission of instructor.

**192. Special Projects** (1-3) I, II

Special work in journalism by arrangement with instructor. Work on *The Aztec,* yearbook and other publications, with consent of instructor. (See "Note" under Jour. 92, above.)

## LATIN

### IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in Latin.

### Lower Division Courses

**1. Elementary** (3) I, II

Study of the Latin language and Roman culture, with reading of selected prose passages.

**2. Elementary** (3) I, II

Continuation of Latin 1. Prerequisite: Latin 1 or one year of high school Latin.

**B. Elementary** (5) I (Offered for last time in Fall of 1950)

Thorough study of Latin grammar with daily written exercises and the translation of selected passages from Caesar, Cicero, and Pliny. The importance of these authors and their culture to western civilization will be considered. Students who have had two years of Latin in high school should register for Latin B for which only four units will be allowed. For specific information, consult the Chairman of the Department.

**C-D. Intermediate** (3-3) Year, I (Not offered in 1950-51)

Survey of Latin poetry with chief emphasis upon Vergil's *Aeneid.* Selections will be read from Catullus, Horace, Ovid, and others. Parallel European poetry will be considered. Latin B or equivalent is a prerequisite for Latin C. Latin C or equivalent is a prerequisite for Latin D.

# LIBRARY SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

*Major* and *minor* work are not offered in library science.

### Lower Division Courses

NOTE.—Library science may not be used to satisfy any part of the 12-unit social science requirement, nor may it be used as part of a social science major or minor.

**10. Use of the Library** (2) I, II

The chief object is to give a working knowledge of some of the resources of the library which every teacher and student should understand—the decimal classification, the card catalog, periodical indexes, and the most important reference books, together with some instruction in the preparation of bibliographies. The course will be a requirement of those students added to the library's staff of student assistants, although it will not prepare the student to become a librarian.

# LIFE SCIENCE

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in life science. Lower division requirements: Zoology 1A-1B or Biology 10A-10B; Zoology 20 or Physiology 1A; Botany 2A-2B or Botany 1 or Bacteriology 1; Chemistry 1A-1B or 2A-2B; Physics 2A-2B-3A-3B. Recommended: Geology 1A, Astronomy 1. Upper division requirements: A minimum of 24 upper division units in zoology, bacteriology and botany of which 6 units may be from a related field. The plan for this major must be with the approval of the Chairman of the Division of Life Sciences.

A *teaching major* in life science is offered for the general secondary credential. A teaching major in *general science* is offered for the junior high school credential. For specific information refer to the outlines for this credential.

### Minor

A *minor in arts and sciences* is offered in life science. Lower division requirements: Biology 10A-10B or equivalent; Zoology 20; Chemistry 2A-2B or 1A. Recommended: Astronomy, geology, physics. Upper division requirements: At least 9 upper division units in zoology and botany to be selected with the approval of the Chairman of the Division of Life Sciences.

A *teaching minor* in life science is offered for the general secondary credential. A teaching minor in offered in *general science* for the junior high school, special secondary, general elementary and kindergarten-primary credentials. For specific information, refer to the outlines for these credentials.

# MATHEMATICS

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in mathematics. Lower division requirements: Mathematics 3A-3B, 4A. Recommended: Two or more of the following: Astronomy 1; Economics 1A-1B; Commerce 2; Engineering 1A, 21; Physics 4A-4B or 2A-2B-3A-3B; 10 units of French or German. Upper division requirements: A minimum of 24 upper division units in mathematics or 18 units in upper division mathematics and 6 upper division units from related areas. The selection of courses must be approved by the Chairman of the Department.

A *teaching major* is offered in mathematics for the general junior high school credential and for the general secondary credential. For specific information, refer to the outline of requirements for these credentials.

## Minor

A *minor in arts and sciences* is offered in mathematics. The minor must include at least 15 units of work in mathematics, nine units of which must be from courses carrying upper division credit. The selection of courses must be approved by the Chairman of the Department.

A *teaching minor* is offered in mathematics for the general secondary, the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

## Lower Division Courses

NOTE: Courses in mathematics may not be used to meet any part of the 12-unit natural science requirement.

**A. Basic Mathematics** (Algebra) (3) I, II

Fundamentals of algebra and arithmetic with applications to everyday problems. For students who have had less than two years of high school mathematics or need training in this area.

**B. Basic Mathematics** (Geometry) (3) I, II

Fundamentals of geometry including applications to everyday problems. For students who have had less than two years of high school mathematics or for students who need training in this area. Prerequisite: Mathematics A or its equivalent.

**C. Intermediate Algebra** (3) I, II

An extensive review of elementary algebra followed by quadratic equations, simultaneous equations, ratio and proportion, variation, progressions, etc. Prerequisite: Elementary algebra and geometry or Mathematics A-B.

**D. Trigonometry** (3) I, II

Plane trigonometry with special attention to logarithms and those aspects needed in analytic geometry and the calculus. Prerequisite: Mathematics C or its equivalent.

**E. Solid Geometry** (2) II

Properties of lines and planes. Calculation of areas and volumes. Prerequisite: Mathematics C or its equivalent.

**S. Slide Rule** (1) I, II

Theory and use of the slide rule. Practice in performing the fundamental operations of arithmetic. Some attention is given to more involved computations. Prerequisite: Trigonometry or Mathematics A-B or equivalents.

**1. Algebra and Trigonometry** (3) I, II

Review of algebra and trigonometry. Further study of identities, graphs, solution of algebraic and trigonometric equations, determinants, and mathematical proofs. Prerequisite: Two years of high school algebra and trigonometry.

**3A. Plane Analytic Geometry** (3) I, II

Equations and loci, conic sections, coordinate transformations, Cartesian and polar coordinates, and parametric representation. Prerequisite: Mathematics 1 or trigonometry and passing of qualifying examination. (Qualifying examination will be given during the first week of the semester.)

**3B. First Course in Calculus** (3) I, II

Introduction to differential and integral calculus with applications. Prerequisite: Mathematics 3A.

**4A. Second Course in Calculus** (3) I, II

Differentiation, integration, infinite series, and applications. Prerequisite: Mathematics 3B.

**4B. Third Course in Calculus** (3) I, II

Partial differentiation, successive integration, applications, and a brief treatment of solid analytic geometry. Prerequisite: Mathematics 4A. (Solid geometry is recommended). Not open for credit to students with credit for Math. 117.

**7A-7B. Mathematical Analysis** (3-3) Year, I

Designed for students who do not intend to prepare for a professional career in physical science or in engineering but who desire or need one year of college mathematics. Consideration is given to the processes and applications of algebra, trigonometry, and differential and integral calculus. Prerequisites: High school algebra and plane geometry. 7A is a prerequisite to 7B. Students with credit for Math. 1 or 3A will not receive credit for 7A. Students with credit for Math. 3B will not receive credit for 7B.

### Upper Division Courses

**104. History of Mathematics** (3) II

History of mathematics down to early modern times. Prerequisite: Mathematics 3B or 7B.

**105. College Geometry** (3) I

A synthetic treatment of the points and lines associated with triangles and quadrilaterals, similarity, inversion, rules and compass construction, etc. Highly recommended for all teachers of high school geometry. Prerequisite: Mathematics 3B or 7B.

**106. Projective Geometry** (3) I (Offered in 1951-52)

Concurrence of lines, collinearity of points and other properties of figures not altered by projections; construction and study of ellipses, hyperbolas, and parabolas by means of projections. Prerequisites: Mathematics 3B or 7B and permission of instructor.

**111. Theory of Algebraic Equations** (3) I, II

Determinants, complex numbers, and theory of algebraic equations. Prerequisite: Mathematics 3B or 7B.

**112. Analytic Geometry of Space** (3) II (Offered in 1951-52)

The coordinate systems in space; lines, planes, and quadric surfaces; applications. Prerequisite: Mathematics 4A.

**117. Intermediate Calculus** (3) I, II

Essentially the same as Mathematics 4B. Additional special work for advanced students may be assigned. Prerequisite: Mathematics 4A. Not open for credit to students with credit for Math. 4B.

**118A. Advanced Mathematics for Engineering Students** (3) I, II

Introduction to differential equations, vector analysis, Fourier series, hyperbolic, elliptic, and Bessel functions. Prerequisite: Mathematics 117 or its equivalent.

**118B. Advanced Mathematics for Engineering Students** (3) I, II

Introduction to partial differentiation, partial differential equations, line and surface integrals, complex variables, etc. Prerequisite: Mathematics 118A.

**119. Differential Equations** (3) I, II

Ordinary differential equations of first and second order with applications to geometry, physics, and chemistry. Prerequisite: Mathematics 117 or its equivalent.

**121. Advanced Calculus** (3) II

Review of the fundamental concepts of the calculus, partial differentiation, series, line and surface integrals, etc. Prerequisite: Mathematics 118A or Mathematics 119.

**124. Vector Analysis** (3) I

Vector algebra, differentiation of vectors, gradient, divergence, and curl. Applications to geometry and physics. Prerequisite: Mathematics 117 or its equivalent.

**140A-140B. Mathematical Statistics** (3-3) Year, I

Graphical and arithmetical characterization of observed frequency distributions. theoretical discrete and continuous frequency distributions including binomial, Poisson, and normal distribution; linear and multiple correlation, large and small sample theory including Student's T, Chi-square, and the F distributions with applications. Prerequisite: Mathematics 117 or its equivalent.

**199. Special Study** (1-2) I, II

Supervised individual study in selected mathematical topics. Prerequisite: Permission of instructor.

### Graduate Courses

**201. Concepts of Geometry From an Advanced Viewpoint** (2) I

An introduction to the fundamental concepts of geometry and the processes of mathematical thinking in this area. Recommended for candidates for the general secondary credential. Prerequisite: One upper division course in geometry.

**202. Concepts of Algebra From an Advanced Viewpoint** (2) II

An introduction to the fundamental concepts of algebra and the processes of mathematical thinking in this area. Recommended for candidates for the general secondary credential. Prerequisite: One upper division course in algebra.

**204. Advanced Work in the History of Mathematics** (2) I

Intensive study of specific phases of the history of mathematics with attention to implications for teaching mathematics. Prerequisite: Mathematics 104.

# MUSIC

## IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is offered in music. Lower division requirements: Music 1B-1C-1D, 4A-4B, 4 units of applied music (study of piano, voice, or orchestral instrument); Aesthetics 1A-1B. Upper division requirements: A minimum of 24 upper division units in music selected from the following: Music 105A-105B, 106, 107, 119A, 120A, 121A-121B, 128; 4 units of applied music, Aesthetics 102A-102B, and 4 units of music activity (Music 109, 110, 111, 112, 113, 114, 115, 125, 126, or 130). As laboratory work, each music major is required to carry one music activity per semester. It is recommended that both vocal and instrumental activities be included at some time during the college course. At least a C average in upper division music courses is necessary.

At least two months before graduation, each senior music major will present a recital before the music faculty. At this time, the faculty will select those students who are to be granted the privilege of a public recital.

A *teaching major* is offered in music for the general secondary credential and the special secondary credential in music. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in music. The minor must include at least 15 units of work in music, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in music for the general secondary, the general junior high school, and the special secondary credentials. It may be offered only as a second teaching minor for the general elementary and the kindergarten-primary credentials. For specific information, refer to the outlines of the requirements for these credentials.

### Lower Division Courses

(Descriptions of courses in the field of music appreciation and history of music are listed under *aesthetics*.)

**1A. Musicianship—Fundamentals of Music** (3) I, II

The elements of music; scale construction; elementary music theory; drill in music reading both with syllables and with words; ear training, elementary music dictation. Basic course for all general elementary credential students. Music majors receive no credit toward graduation. All music majors are required to register for Section 1, only.

**1B. Musicianship—Music Reading and Ear Training** (2) I, II

Tonal and rhythmic dictation; rhythmic writing; sight singing. Basic course for majors and minors. Prerequisite: Music 1A.

**1C-1D. Musicianship—Advanced Music Reading and Ear Training** (2-2) Year, I
Tonal work in minor keys; modal scales; dissonant triads and seventh chords; interval feeling in all chords; rhythmic progression and elementary forms; rhythmic, melodic and harmonic dictation. Prerequisite: Music 1B. 1C is a prerequisite for 1D.

**2A. String Instruments** (1) I, II
Beginner's class in violin, viola, 'cello and string bass. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

**3A. Woodwind Instruments** (1) I, II
Beginner's class in oboe, clarinet, flute and bassoon. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

**4A-4B. Elementary Harmony** (3-3) Year, I
Scale construction, intervals, by-tones and diatonic harmonies. Transposition and original composition in the simpler forms. Prerequisites: Music 1A-1B, or the equivalent, and at least one year of piano study. 4A is a prerequisite for 4B.

**5A. Percussion Instruments—Drums** (1) I, II
Snare drum, bass drum, cymbals and small instruments of percussion group techniques from beginning work through all phases of concert and marching band requirements.

**5B. Percussion Instruments—Mallet Played** (1) I, II
Necessary technique and applied elementary theory to prepare the student in the fundamentals of playing the Tympani, Glockieuspiel, Xylophone, Marimba, Vibraphone, Orchestra Bells and Chimes.

**6A. Brass Instruments** (1) I, II
Beginner's class in trumpet, French horn, baritone, trombone and tuba. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

**7A. Music Materials for the Elementary School** (3) I, II, Summer
Study of the song material in the state music texts and in the supplementary texts. Appreciation materials applicable to the elementary school. Required course for all general elementary credential students. Prerequisite: Music 1A.

**9A-B-C-D. Treble Clef Sextette** (½-½-½-½) I, II
Members selected by auditions from Treble Clef (Music 10).

**10A-B-C-D. Women's Glee Club—Treble Clef** (½-½-½-½) I, II
Entrance upon examination.

**11A-B-C-D. Men's Quartet** (½-½-½-½) I, II
Members selected by auditions from Men's Glee Club (Music 12).

**12A-B-C-D. Men's Glee Club** (½-½-½-½) I, II
Entrance upon examination.

**13A-B-C-D. Orchestra** (1-1-1-1) I, II
Permission of the conductor required for membership.

**14A-B-C-D. Vocal Ensemble** (½-½-½-½) I, II
Members selected by auditions from Choral Club (Music 15).

**15A-B-C-D. Choral Club** (½-½-½-½) I, II
Entrance upon examination.

***16A-B-C-D. Individual Study of an Orchestral Instrument** (1-1-1-1) I, II

***17A-B-C-D. Individual Study of Voice** (1-1-1-1) I, II

***18A-B-C-D. Individual Study of Piano or Organ** (1-1-1-1) I, II
Prerequisite: The ability to play artistically hymns and folk songs of the type found in the Golden Book of Favorite Songs.

---

* See explanation below for conditions under which credit may be given for music study under private instructors.

**20A-B-C-D. Chorus** (½-½-½-½) I, II
Open to anyone interested in singing standard choral works. No examination required. No public performances.

**24A. Beginning Instrumental Ensemble** (½) I, II
Open to all instrumental students. Group playing of simple orchestral and band scores. Prerequisite: Music 2A, 3A, 6A, or equivalencies, one or more.

**24B. Intermediate Instrumental Ensemble** (½) I, II
Construction of group performance of orchestral and band scores of more advanced grade. Material covered will prepare the student for minor parts in either concert orchestra or symphonic band. Prerequisites: Music 24A or equivalent.

**25A-B-C-D. Marching Band** (1-1-1-1) I, II
Permission of Conductor required for membership.

**26A-B-C-D. Symphonic Band** (1-1-1-1) I, II
Permission of the Conductor required for membership.

**28A-28B. Piano** (1-1) Year, I
Fundamental playing and reading technics for the pianoforte. Emphasis upon playing by ear, and the development of interpretative ability. For beginners only. No credit for music majors and minors.

**28C-28D. Continuation of First Year Piano** (1-1) Year, I
Study of more advanced piano literature. Considerable emphasis upon ensemble piano playing and accompanying. Prerequisites: Music 28A-28B, and consent of instructor. No credit for music majors. Credit will be given to music minors. 28C is a prerequisite for 28D.

**29A-29B. Class Voice** (1-1) Year, I
A class for beginners in the vocal field taking up the problems of breath control, tone placement, articulation and enunciation. Frequent performance before class required. Limited to 15. 29A or equivalent is a prerequisite for 29B.

**29C-29D. Continuation of First Year Voice** (1-1) Year, I
Study of more advanced songs with attention being given to interpretation, as well as continued work on tone, articulation and placement. Frequent performance before class required. Limited to 15. 29C or equivalent is a prerequisite for 29D.

**30A-30B. Chamber Music** (1-1) Year, I
String and woodwind ensembles. The consent of the instructor necessary for admission to class.

**31. Opera Technique** (2)
Training in the interpretation and characterization of light and grand opera. Specific work in coordination of operatic ensemble.

## Upper Division Courses

(For description of courses in the field of music appreciation and history of music, see *aesthetics.*)

**101. Survey of Harmony and Musical Form** (2)
A review of diatonic and chromatic harmony, modulation, and musical form. The material covered will serve as refresher study for the Colleague Examination under the California Plan of the Music Teachers Association of California. Not open to music majors or minors.

**105A-105B. Advanced Harmony and Composition** (3-3) Year, I
Study of the possible types of modulation and chromatic harmonies: Continuation of harmonic analysis and original composition. Prerequisite: Music 4A-4B. 105A is a prerequisite for 105B.

**106. Counterpoint** (2) I
Study of the five species of counterpoint with much practice in writing in such forms. Application of contrapuntal style to modern composition. Prerequisite: Music 4A-4B.

**107. Form and Analysis** (2) II
Aural and visual analysis of music forms through a consideration of structure, harmonic content, and style. Prerequisite: Music 105A-105B.

**109A-B-C-D. Treble Clef Sextette** (½-½-½-½) I, II
Members selected by auditions from Treble Clef (Music 110).

**110A-B-C-D. Women's Glee Club—Treble Clef** (½-½-½-½) I, II
Entrance upon examination. A maximum of 2 units in glee club may be counted toward the A.B. degree.

**111A-B-C-D. Men's Quartet** (½-½-½-½) I, II
Members selected by auditions from Men's Glee Club (Music 112).

**112A-B-C-D. Men's Glee Club** (½-½-½-½) I, II
Entrance upon examination. A maximum of 2 units in glee club may be counted toward the A.B. degree.

**113A-B-C-D. Orchestra** (1-1-1-1) I, II
Permission of the conductor required for membership. A maximum of 4 units in orchestra may be counted toward the A.B. degree.

**114A-B-C-D. Vocal Ensemble** (½-½-½-½) I, II
Members selected by auditions from Choral Club (Music 115).

**115A-B-C-D. Choral Club** (½-½-½-½) I, II
Entrance upon examination. A maximum of 2 units in choral club may be counted toward the A.B. degree.

***116A-B-C-D. Advanced Individual Study of an Orchestral Instrument** (1-1-1-1) I, II

***117A-B-C-D. Advanced Individual Study of Voice** (1-1-1-1) I, II

***118A-B-C-D. Advanced Individual Study of Piano or Organ** (1-1-1-1) I, II

**119A. Instrumental Conducting** (1) I, II
Conducting and reading of orchestral scores.

**120A. Vocal Conducting** (1) I, II
The theory of vocal conducting together with practical experience gained from directing the college chorus. Prerequisite: Upper division music major or minor.

**121A-121B. Instrumentation and Arranging** (2-2) Year, I
Arranging of music for full orchestra. Selected works of pupils to be performed by standard orchestras. 121A is a prerequisite for 121B.

**124A. Beginning Instrumental Ensemble** (½) I, II
Open to all instrumental students. Group playing of simple orchestral and band scores. Prerequisite: Music 2A, 3A, 6A, or equivalencies, one or more.

**124B. Intermediate Instrumental Ensemble** (½) I, II
Continuation of group performance of orchestral and band scores of more advanced grade. Material covered will prepare the student for minor parts in either concert orchestra or symphonic band. Prerequisites: Music 24A or 124A, or equivalent.

**125A-B-C-D. Marching Band** (1-1-1-1) I, II
Permission of conductor required for membership.

**126A-B-C-D. Symphonic Band** (1-1-1-1) I, II
Permission of the conductor required for membership. A maximum of 4 units in band may be counted toward the A.B. degree.

**128. Methods in Teaching Piano** (3) Summer
Teaching of beginning intermediate and beginning piano. Survey of materials available for child and adult classes. Special consideration of the problems of the adult beginner. Supervised teaching of beginning students in individual lessons and in class groups.

---

* See explanation below for conditions under which credit may be given for music study under private instructors.

**130A-130B. Chamber Music** (1-1) Year, I

String quintet and woodwind ensembles only. Permission of the instructor necessary for class membership.

### Graduate Courses

**200A-200B. Special Problems in Music** (2-2) Year, I

A graduate course in which students may carry out projects in various fields of music under the direction of faculty members who are specialists in the field chosen. Students registering for this course must apply for work within a certain field after conference with the music faculty.

**203. Musicology** (2) I

Survey of bibliography and methods of research in music history and literature. Emphasis upon inter-relationship of musical developments and trends in other arts. Completion of an acceptable thesis in fields of investigation chosen by the student. Prerequisites: Aesthetics 102A-102B and permission of the instructor. Advanced courses in Harmony, Composition, and Form and Analysis are desirable.

**206. Composition** (2) II

Music composition in the larger forms. Students will be required to submit a complete work in one of the larger musical forms as thesis in the course. Prerequisites: Music 105A-105B, 106A, 107A, 121A and permission of the instructor.

## CONDITIONS UNDER WHICH CREDIT MAY BE GIVEN FOR MUSIC STUDY UNDER PRIVATE INSTRUCTORS

Credit may be allowed for private instruction in music under the following conditions:

1. The applicant for such credit must be a regularly enrolled student in the music department of the college.
2. The instructor giving such private work must be approved by the Music Department. All private work and the names of all such teachers must be registered in the office of the music department chairman at the beginning of the semester.
3. In the case of first semester private study, a placement examination conducted by the music department faculty at the beginning of the semester will show the status of the student at the beginning of his work.
4. Evidence that the standards of the Music Department have been met will be shown by an examination conducted by the music department faculty at the end of the semester.
5. Ten clock-hours of lessons, and 100 hours of practice per semester are required for one unit of credit.

## PHILOSOPHY

### IN THE DIVISION OF SOCIAL SCIENCES

*Major* work is not offered in philosophy.

### Minor

A *minor in arts and sciences* is offered in philosophy. The minor must include at least 15 units of work in philosophy, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in philosophy.

### Lower Division Courses

NOTE: Courses in philosophy may not be used to meet any part of the 12-unit social science requirement, nor may they be used as part of a social science major or minor.

**1A-1B. Introduction to Philosophy** (3-3) I, II

The major problems of philosophy and some significant approaches to their solution. The treatment is primarily critical and analytic rather than historical. Through free class discussion, each student is encouraged to develop for himself a world-view. Prerequisite: 1A is prerequisite for 1B.

**3A-3B. History of Philosophy** (3-3) Year, I

The development of the major concepts of philosophers in the western tradition. Relations of philosophy to science, art, religion, and social and political conditions. 3A covers the ancient and medieval period, 3B the modern. 3A is not prerequisite for 3B.

**20. Logic** (3) II

The use of logic in science and practical life. Analysis of fallacies. Logic and language. Formation and validation of hypotheses. Interpretations of probability. The logic of experimentation.

**101. Contemporary Philosophy** (3) II

The major philosophical issues, movements, and figures in American and European philosophy of the twentieth century. Prerequisite: 3 units selected from Philosophy 1A, 1B, 3A, or 3B.

**110. The Philosophy of John Dewey** (2) II

(Offered in 1951-52 and alternate years)

The background, development, and influence of John Dewey's thought. His philosophy of education as related to his logical, epistemological, metaphysical, psychological, ethical, and esthetic theories.

**111A-111B. Theory of the State** (3-3) Year, I

The nature of the state, its organization and activities, and its relation to the individual and to other states. Special attention is given to recent developments in the field of political thought. Not open to students with credit for Political Science 111A-111B.

**121. Deductive Logic** (3) II

Definition, classification, and division. The forms of reasoning. Analysis of propositions. Immediate inference. The syllogism. Dilemmas. Modern symbolic logic.

**129. Social Ethics** (3) I

Ethical issues of contemporary life. Individualism vs. collectivism; democracy vs. dictatorship; ethical problems arising in law, medicine, business, government, and interpersonal relationships.

**130. Theory of Ethics** (3) II

A study of significant and typical value theories and systems and of the concrete problems such theories seek to explain. The emphasis will be placed on moral values. The student will be encouraged to examine critically his own system of values.

**136. Philosophy of Art** (3) II

The nature of esthetic experience. The principal theories of art, both traditional and contemporary, are studied at length, both in relation to actual artistic production and to the role of art in society.

**137. Philosophy of Science** (3) I

A critical examination of the basic concepts and methods underlying contemporary scientific thought. Contributions of the special sciences to a view of the universe as a whole. Prerequisite: 3 lower division units in philosophy.

## PHYSICAL EDUCATION

### IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

### Major

A *major in arts and sciences* is not offered in physical education.

A *general major* is offered in the field of recreation. For specific requirements, refer to the outline for the curriculum in recreation in the section on Preprofessional and Vocational Curricula, and for further information on the general major to the section on Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

A *teaching major* is offered in physical education for the general secondary and the special secondary credentials. Refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in physical education or in recreation. The plan for these minors must be approved by the departmental representative. A minor consists of at least 15 units of work in one field, nine units of which must be upper division credit. For further information on the minor in recreation, refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

A *teaching minor* is offered in physical education for the general secondary, the general junior high school, and the special secondary credentials. It may be offered only as a second teaching minor for the general elementary and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

A *teaching minor in recreation* is offered only as a second minor for students majoring in physical education. Nonphysical education majors may select recreation as a teaching minor for the general junior high school or the special secondary credential. For specific information, refer to the outlines of requirements for these credentials.

Candidates for a teaching credential in physical education should refer to the section on Admission to Teacher Education, and to the curriculum outline entitled: A.B. Degree with Special Secondary Credential in Physical Education.

With the exceptions listed, all lower division students must elect one or more courses each semester. Two units of activity credit must be offered for graduation. Exceptions: (a) Veterans of World War II; (b) students over 25 years of age. Students carrying fewer than 12 units during any semester may postpone taking physical education, but not be exempted therefrom. No permanent excuses from required activity courses will be granted. The college physician, in conjunction with the chairman of the department, will consider stringent cases on an individual basis and recommend.

## MEN'S DEPARTMENT

A medical examination is given each student when entering and recommendation is made as to type of activity most beneficial. Developmental physical education classes to care for special needs are offered. The content of the required courses is planned to give each student an opportunity to participate in many activities of carry-over value, developmental nature, and recreational interest. An opportunity is afforded for students to participate in competitive sports and intramural programs.

Freshmen are required to choose from courses numbered 1-10. Sophomores and upper division students may choose from all courses offered. An activity course may be taken for credit once only. The complete uniform will be furnished by the student.

### Lower Division Courses

### ACTIVITY COURSES

**1A-1B-1C-1D. Developmental Physical Education** (½) I. II

**2. Basketball** (½) I, II

**3. Boxing** (½) I, II

**4. Gymnastics** (½) I, II

**5. Soccer** (½) I

**6. Softball** (½) II

**7. Touch Football** (½) I

**8. Track and Field** (½) I, II

**9. Volleyball** (½) I, II

**10. Wrestling** (½) I, II

**13. Archery** (½) I, II

**14. Badminton** (½) I, II

**15. Fencing** (½) I, II

**16. Golf** (½) I, II

**17. Handball** (½) I, II

**18. Tennis** (½) I, II

**19. Bowling** (½) I, II

**20. Swimming** (½) I, II

**23. Sailing** (½) I, II

### INTERCOLLEGIATE SPORTS

**30. Baseball** (½) II

**31. Basketball** (½) I

**32. Cross Country** (½) I

**33. Football** (½) I

**34. Golf** (½) II

**35. Gymnastics** (½) II

**36. Tennis** (½) II

**37. Track** (½) II

**38. Wrestling** (½) II

## WOMEN'S DEPARTMENT

A medical examination is given each student when entering and recommendation is made as to type of activity most beneficial. Developmental physical education classes to care for special needs are offered. The content of the required courses is planned to give each student an opportunity to participate in many activities of carry-over value, developmental nature, and recreational interest.

Freshmen are required to choose from courses numbered 1-10. Sophomores may choose from all courses offered. An activity course may be taken for credit once only. The complete uniform will be furnished by the student.

The individual activities, tennis, golf, archery, badminton, swimming, and dancing are offered through the year. Candidates for the special secondary credential in physical education must select one as a major activity and two others as minors. Skills in the activities must be maintained as prerequisite to the senior course, Physical Education 185.

### Lower Division

### ACTIVITY COURSES

**1A-1B. Fundamental Skills** (½) I, II
Practice in efficient fundamental body movements.

**2A-2B. Folk Dancing** (Men and Women) (½) I, II
2A is a prerequisite for 2B.

**3A-3B. Modern Dance** (½) I, II
Practice in dance techniques and rhythms. 3A is a prerequisite for 3B.

### TEAM SPORTS

**4. Fieldball, Soccer, Speedball** (½) I, II

**5. Softball, Volleyball, Hockey** (½) I, II

**6. Basketball** (½) I, II

**11A-11B. Ballroom Dancing** (Men and Women) (½) I, II
11A is a prerequisite for 11B.

**12A-12B. Advanced Modern Dance** (Men and Women) (1-1) Year, I
Laboratory experiments in advanced choregraphy and percussion accompaniment. Prerequisites: 3A and 3B.

**13A-13B. Archery** (½) Year, I, II

**14A-14B. Badminton** (½) Year, I, II

**16A-16B. Golf** (½) I, II

**18A-18B-18C. Tennis** (Beginning, Intermediate, Advanced) (½-½-½) I, II
18A is a prerequisite for 18B; 18B is a prerequisite for 18C.

**19. Bowling** (½) I, II

**20A. Swimming** (For non-swimmers only) (½) I, II

**20B. Swimming** (Intermediate) (½) I, II

**21. Life Saving** (1) I, II
Learning of safety in and on the water and the ability to assist or rescue a person in danger of drowning. Course content qualifies for the American Red Cross Life Saving Certificate.

**22. Water Safety Instruction** (1) II
Methods and materials for teaching swimming. Course qualifies for American Red Cross Swimming Instructors Certificate. Prerequisite: P.E. 20B, or equivalent, and American Red Cross Senior Life Saving Certificate.

**23. Sailing** (½) I, II

## PROFESSIONAL THEORY COURSES

### Men and Women

### Lower Division Courses

**43. Professional Activities** (Men) (2) I

Presents an opportunity for majors to develop the skills and techniques of the dance as well as other phases of the activity program. Organization and presentation of materials are emphasized.

**44. Professional Activities** (Men) (2) II

Emphasis is placed on acquiring the skills, teaching techniques, and development of knowledge and interests in the combative activities, tumbling, apparatus, and stunts.

**51. First Aid and Safety Education** (2) I, II

Accepted procedure in meeting the emergencies which arise daily in any of the many places where the physical education teacher is called on for first aid. Attention to the prevention and minimizing of common accidents. Course contents qualifies for American Red Cross Certificate.

**53. Physical Education in the Elementary School** (2½) I, II

The State program in physical education for the elementary school forms the basis of the course. Candidates for the Elementary Credential are required to take the course section which includes two lectures and two laboratory periods per week. Candidates for the Special Secondary Credential in physical education may take the course section which includes two lectures without laboratory periods.

**72. Introduction to Physical Education** (2) I, II

History and principles of physical education and sports movements of the world. Objectives of the modern school program are studied and an effort is made to give to the student a basic philosophy and background for his professional training.

### Upper Division Courses

**145. Professional Activities: Team Sports** (Men) (2) I

The skills, rules, teaching techniques, officiating, and organization of materials in such sports as soccer, touch football, softball, hockey, basketball, and others are emphasized.

**146. Professional Activities: Individual Sports** (Men) (2) II

The skills, rules, teaching techniques, officiating, and organization of materials in such sports as handball, tennis, badminton, archery, golf, and others are emphasized.

**147. Professional Activities: Coaching Baseball and Track** (Men) (1-2) II

Organization of practice sessions, drills for developing fundamental drills and special abilities. Problems of scheduling, handling teams and game strategy are taken up. Rules, sessions, and officiating techniques are given attention.

**148. Professional Activities: Coaching Football and Basketball** (Men) (1-2) I

Organization of practice sessions, drills for developing fundamental skills and special abilities. Problems of scheduling, handling teams, and game strategy are taken up. Rules, sessions, and officiating techniques are given attention.

**155. Applied Anatomy and Kinesiology** (3) I

Anatomical and kinesiological analysis of human structure and movement. Application of analysis relative to mechanical principles as influenced by efficiency factors of body functions. Prerequisite: Zoology 8.

**156A-156B. Sports Methods** (Women) (2-2) Year, I

Analysis of skills in basketball, hockey, soccer, speedball, volleyball, and softball; methods of presenting sports to large groups; study of rules and officiating. Prerequisites: Physical Education 4, 5, and 6.

**160. Teaching of Body Mechanics** (Women) (2) I

Efficient use of the body in daily living; evaluation and classification of exercises, methods, and practice in planning and presenting material.

**161. Folk Dancing Materials and Advanced Techniques** (Women) (2) I

Folk customs, festivals, and costumes. Selection of dance materials for various age groups. Practice in advanced techniques. Prerequisite: Physical Education 2A.

**162. History and Philosophy of the Dance** (2) I (Offered in 1951-52)

Historical background and appreciation of dance, with special emphasis upon development of art in America. The justification for dance as an educational and creative art medium and its place in the curriculum. Not open to students with credit for Aesthetics 162.

**164A-164B. Methods in Modern Dance** (2-2) Year, I

Methods in the teaching of modern dance techniques and choreography. Selection of materials and course planning for the secondary school. Prerequisite: Physical Education 12A-12B, or satisfactory examination in dance skills.

**165. Administration of Community Recreation** (3) I

The principles of organization and promotion of leisure time and recreation activities. Content consists of a study of recreation leadership, the growth of the recreation movement, the operation of areas and facilities, program of activities, features, services, organization and administration problems. A required course for Recreation minors.

**168. Physiology of Exercise** (3) II

A non-laboratory course emphasizing the relation of physiology to muscular exercise in physical activities. Prerequisites: Physiology 1A and Zoology 8 or equivalent.

**170A-170B. Recreational Leadership** (2-2) Year, I

Principles and practices in recreational leadership. Methods of instruction and special techniques in the activities of the recreation program. Attention to crafts, music, social programs, drama, special projects, dance, sports, campcraft, and outdoor education.

**177. Individual Program Adaptation** (3) II

The adaptation of programs for the typical individual, including physical examinations, training and prescribed exercises, follow-up, instructional problems, and evaluation.

**184A-184B. Field Work in Recreation** (1 to 3-1 to 3) Year, I

Observation and participation in supervised group activities in the field. Practical experience in the various public and semi-public community recreational agencies.

**185. Techniques of Individual Sports** (Women) (1) I

Rules and teaching methods and testing individual playing techniques and knowledge in tennis, archery, badminton, and swimming. Prerequisite: Senior standing.

**190. Administration of Physical Education in the Secondary School** (3) I, II

Problems and practices in the organization and administration of the secondary school activity program. Study, selection and adaptation of activities, examination, and grouping of pupils, use and evaluation of tests. Selection and maintenance of equipment and facilities.

**199. Special Study in Physical Education or Recreation** (1-3) I, II

An opportunity is presented for extensive review of pertinent literature, individual research and advanced study of problems in the profession. Prerequisite: Approval of the chairman of the division.

## Graduate Courses

**200. Evaluation Procedures in Health, Physical Education and Recreation** (2)

A study of tests and measurements in the profession with practice in their use, construction and interpretation of results.

**201. Developmental Physical Education** (2)

Intensive study of postural divergencies, lack of physical development, and methods of correcting such conditions through exercise are studied. Practice in making physical examinations, constructing individual exercise programs, teaching remedial exercises, as well as ethical procedures and limitations are considered. Prerequisite: Applied Anatomy and Kinesiology.

**203. Problems in Physical Education** (2)

A survey of current problems facing the Physical Education profession is studied through a review of the literature, discussion of trends, observation of school situations together with the analysis and evaluation of actual problems. Written reports are required.

**204. Problems in Recreation** (2)

A survey of current problems facing the Recreation profession is studied through a review of the literature, discussion of trends, observation of school situations together with the analysis and evaluation of actual problems. Written reports are required.

**298. Special Study** (1-3)

An individual study course designed primarily for candidates for the master's degree.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

## PHYSICAL SCIENCE

### IN THE DIVISION OF PHYSICAL SCIENCES

### Lower Division Courses

*Major* and *minor* work not offered in physical science.

**1A. Introduction to Physical Science** (3) I, II

A general course presenting the nature of man's physical universe with materials chosen from astronomy and physics. Not open to students who have had a high school course in physics with grades of A or B, a college course in physics or astronomy, or Physical Science 40.

**1B. Introduction to Physical Science** (3) I, II

Emphasis will be upon materials chosen from geology and chemistry to show the origins of natural materials and their use. Not open to students with a high school course in chemistry with grades of A or B, or a college course in chemistry or geology. Physical Science 1A not a prerequisite.

**10. Introduction to Photography** (3) I, II

A consideration of photographic optics and chemistry; nature of light and image formation; photographic emulsions, exposure and development. Composition and lighting. Will not satisfy laboratory requirements in physical science for the A.B. degree.

### Upper Division Courses

**110. Photography for Teachers** (3)

Designed for more mature students to learn photographic skills useful in teaching.

## PHYSICS

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in physics for the A. B. degree. Lower division requirements: Physics 4A-4B-4C; Mathematics 3A-3B, 4A-4B; Chemistry 1A-1B or their equivalents. Recommended: A reading knowledge of French or German. Upper division requirements: A minimum of 24 upper division units in physics including Physics 105A-105B, 110, three units chosen from 102 or 170, and 199 (two units). Six of the 24 units may be selected from a related field with approval of the student's departmental adviser.

A major in Physics is offered for the B. S. degree. The requirements are the same as those for the A. B. degree except, (1) no foreign language is required, and (2) the student's program must lead to a four year occupational objective approved by the physics department adviser for the B. S. degree.

A *teaching major* is offered in physics for the general secondary credential or as part of the general science major for the general junior high school credential or as part of the physical science major for the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in physics. The minor must include at least 15 units of work in physics, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in physics for the general secondary credential or as part of the *general science minor* for the general junior high, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

NOTE: A maximum of 12 units of lower division physics credit may be applied toward the A. B. or B. S. degrees.

**1A-1B-1C-1D. Principles of Physics**
(Discontinued. Equivalent course is 4A-4B-4C.)

**2A-2B. General Physics** (3-3) Year, I
This course is for liberal arts and certain pre-professional students who do not desire intensive physics preparation. Lectures, demonstrations and discussions. 2A, Properties of Matter, Mechanics and Heat. 2B, Electricity, Magnetism, Sound and Light. Prerequisite: Two years of high school mathematics.

**3A-3B. Physical Measurements** (1-1) Year, I
A laboratory course to accompany Physics 2A-2B. 3A: Properties of Matter, Mechanics and Heat. 3B: Electricity, Magnetism, Sound and Light. One three-hour laboratory per week. Prerequisite for 3A: Concurrent or previous registration in Physics 2A. Prerequisite for 3B: Concurrent or previous registration in Physics 2B.

**4A-4B-4C. Principles of Physics**
The following sequence of three courses is designed to give a thorough background in the fundamental principles of physics, with applications to practical problems. Each course three lectures and one three-hour laboratory per week.

**4A. Mechanics** (4) I, II
The mechanics of solids and fluids. Prerequisites: Credit for Mathematics 3A, or concurrent registration with permission of instructor. Not open to first semester freshmen.

**4B. Electricity** (4) I, II
Magnetism, electricity and elementary electronics. Prerequisite: Physics 4A.

**4C. Heat, Sound and Light** (4) I, II
Heat and elementary thermodynamics, sound and light. Prerequisite: Physics 4B.

**22. General Radio** (2) I
Theory of vacuum tubes and their applications to communication, television, and industry. This course may be taken for credit in addition to the maximum 12 units of lower division physics toward the A. B. or B. S. degree.

### Upper Division Courses

**102. Basic Electronics** (3) I
Principles of electron tubes and resistance loaded amplifiers. Negative feedback, and its application to regulated power supplies, cathode followers and direct coupled amplifiers. Prerequisite: Physics 4B or 1C.

**104. Communications** (3) II
Power amplifiers, oscillators, modulators and detectors. Radio transmitters and receivers for amplitude modulation and frequency modulation. Television systems. Antennas and radio wave propagation. Prerequisite: Physics 102 or permission of the instructor.

**105A-105B. Analytical Mechanics** (3-3) Year, I

Fundamental principles of Newtonian mechanics by elementary vector methods. 105A: Statics and kinematics of rigid bodies. 105B: Dynamical principles underlying linear and rotary motion of rigid bodies, with additional work in vibration and impact. Prerequisite: Physics 2A-2B or 4A and a working knowledge of calculus.

**106. Optics** (3) I

A study of reflection, refraction, dispersion, interference, diffraction, double refraction and polarization, with applications to optical instruments. Also wave propagation, radiation, spectra and the nature of light. Prerequisite: Physics 1D or 2B-3B or 4C.

**107. Electrical Measurement** (2) II

The theory and application of electrical measurements, including the measurements of current, voltage, power, resistance, capacitance and inductance. Stress on determination of probable errors of measurements. An hour lecture and a three-hour laboratory per week. Prerequisite: Physics 1C or 2B-3B or 4B and a working knowledge of calculus.

**110. Alternating Current Circuits** (3) I

The operator j applied to circuits containing resistance, capacitance and inductance; series and parallel resonance; coupled circuits; transients; practical circuit elements, networks. Prerequisite: Physics 4B and Mathematics 4A.

**112. Heat and Thermodynamics** (3) I (Offered in 1951-52)

A study of the thermal properties of matter with an introduction into the kinetic theory of gases and the laws of thermodynamics. Prerequisites: Eight units in physics and a working knowledge of calculus.

**114. Acoustics** (3) II (Offered in 1951-52)

A study of wave motion and its application to the production, transmission and reception of sound. Material in architectural acoustics, speech and hearing, and acoustical instruments is presented. Prerequisites: Physics 1C or 2B-3B or 4C.

**122. Electronics Laboratory** (2) I

An experimental study of electron tubes and their associated circuits. Study of cathode ray oscilloscope, vacuum tube voltmeter, characteristics of power supplies, amplifiers and filter systems. An hour lecture and a three-hour laboratory per week. Prerequisite: Previous or concurrent registration in Physics 102, or permission of instructor.

**124. Radio Measurements** (2) II

Laboratory measurements of the parameters of resonant circuits at radio frequencies. Study of the properties of oscillators, modulators, detectors and wave guides. An hour lecture and a three-hour laboratory per week. Prerequisite: Previous or concurrent registration in Physics 104.

**126. Optical Measurements** (2) I

An experimental study of lenses, optical systems and instruments, including the study of the wave character of light and the measurement of the wave length of light. An hour lecture and a three-hour laboratory per week. Prerequisite: Previous or concurrent registration in Physics 106, or permission of instructor.

**128. Experimental Atomic Physics** (2) I

Measurements of the specific charge and the charge of the electron. Measurements and analysis of data in radio activity, X-rays, cosmic rays, atomic spectra. Prerequisite: Previous or concurrent registration in Physics 158, or permission of instructor.

**132. Heat and Pyrometry Laboratory** (2) I (Offered in 1951-52)

Laboratory work selected from experiments in thermal expansion, specific heat, heat of combustion, radiation, calibration and use of various temperature measuring devices. An hour lecture and a three-hour laboratory per week. Prerequisite: Previous or concurrent registration in Physics 112, or permission of instructor.

**134. Acoustical Measurements** (2) II (Offered in 1951-52)

Experimental study of wave motion, velocity of sound in various media, diffraction, refraction and reflection of sound, microphone and loudspeaker characteristics. An hour of lecture and a three-hour laboratory per week. Prerequisite: Previous or concurrent registration in Physics 114, or permission of instructor.

**144. Acoustics of Music** (3) I

Fundamentals of acoustics and audition underlying musical phenomena presented in descriptive and nonmathematical terms. Prerequisite: A technical understanding of music.

**148. Introduction to Modern Physics** (3) II

A nonmathematical course covering recent developments in the field of physics, including X-rays, radio-activity, cosmic rays, atomic and nuclear energy. Prerequisite: Upper division standing. Not open to students who have credit for Physics 4A-4B-4C, or equivalent.

**152. Advanced Electronics** (2) I

Theory of vacuum tubes, ultra-high frequency systems and selected topics from contemporary electronics. Prerequisite: Physics 104.

**158. Atomic Particles** (3) II

A study of experimental evidence for the existence and properties of the elemental atomic and nuclear particles. Introduction to the fields of atomic and nuclear physics. Prerequisite: Physics 4A-4B-4C, or equivalent.

**160. Circuit Analysis** (3) II

A study of filter design, transmission lines, and network analysis. Prerequisite: Physics 110.

**166. Honors Course** (Credit to be arranged) I, II

An individual study arrangement for students admitted to the Honors Group. Enrollment through the department chairman, subject to the approval by the Committee on Honors. For requirements for admission to this group, refer to The Honors Group in the section on General Regulations.

**170. Electromagnetic Theory** (3) II

Electrostatics and magnetostatics treated by vector methods; chemical and thermal effects; motion of ions in electric and magnetic fields; magnetic field of a current; electromagnetic induction and radiation. Prerequisites: Physics 110, and a working knowledge of vector analysis and differential equations.

**199. Special Study** (1-2) I, II

Reading and laboratory work on a special problem in physics selected by the student. Each student will be assigned a member of the staff who will supervise his work. All candidates for the A.B. or B.S. Degree in physics are required to enroll for 2 units of this course during the upper division work. Credit, hours and topics to be arranged in each case.

## Graduate Courses

**200. Seminar** (2-2) Year, I, II

An intensive study of some phase of advanced physics.

A. Mathematical Physics
B. Theoretical Mechanics
C. Kinetic Theory of Gases
D. Advanced Acoustics
E. Advanced Electronics and Electricity
F. Electromagnetic Radiation
G. Atomic Physics
H. History of Physics
I. Fluid Mechanics

**290. Bibliography** (1)

Exercise in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a Master's project or thesis.

**298. Special Study** (1-3)

An individual study course designed primarily for candidates for the Master's degree.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis in physics for the Master's degree.

# PHYSIOLOGY

## IN THE DIVISION OF LIFE SCIENCES

*Major* and *minor* work are not offered in physiology. Courses in physiology, however, may be used as part of the major in zoology and are recommended as part of the lower division requirements for the major in psychology. For specific information, refer to these departments.

### Lower Division Courses

**1A. Human Physiology** (3) II

A lecture course considering the functions of the human body, and including a brief review of the microscopic and gross anatomy of the structures discussed. Prerequisites: Elementary chemistry and high school or college biology or zoology. Three hours of lecture per week. Credit reduced to 2 units, for students having credit for Zoology 20.

**1C. Human Physiology** (2) II

A study of the human functions through laboratory experiments and demonstrations. Prerequisites: Physiology 1A completed or in progress. Six hours of laboratory per week.

### Upper Division Courses

**101. General Physiology** (4) II

Fundamentals of plant and animal functions. Two lectures and two laboratory periods per week. Prerequisites: Biology 10A-10B or Zoology 1A-1B and Chemistry 1A-1B or Chemistry 2A-2B.

# POLITICAL SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in political science. This major consists of 36 units of work in political science and closely related work chosen from the fields of economics, geography, history, philosophy, psychology, and sociology. Under the direction of the chairman of the department, the 36 units will be distributed as follows:

(a) Required courses: Political Science 1A-1B and 71A-71B (one year-course of which should be taken in the lower division) and Political Science 199.

(b) Eighteen upper division units in political science distributed among two of the following group: Group I: Theory and government—courses numbered 100-139; Group II: Administration—courses numbered 140-149; Group III: International affairs—courses numbered 150-179.

(c) Six units of upper division work selected from the related fields listed above, this work to be chosen under the direction of the chairman of the department and to be outside the field of the student's minor.

Students majoring in political science are advised to become as familiar as possible with the related fields listed above. Majors should have a reading knowledge of at least one foreign language.

A *teaching major* is not offered in political science; however, courses in political science may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in political science. The minor consists of 15 units of work, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in political science for the general secondary credential; however, courses in political science may be used as part of the *social science minor* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. Refer to the outlines of requirements for these credentials.

## Lower Division Courses

**1A. Introduction to Government** (3) I, II

Theories and principles of government, with special attention to the problems created by modern industrialism and population pressures.

**1B. Introduction to Government** (3) I, II

A comparative survey of selected foreign governments: Their constitutional principles, political institutions, and governmental problems.

**71A-71B. Introduction to American Government and Politics** (3-3) Year, I, II

Semester I: Governmental organization in the United States; the federal system; the organization, powers and functions of the legislative, executive and judicial branches of the government; the relations between federal, state and local units of government.

Semester II: Expansion of governmental functions and the development of means of democratic control; an examination of the increased use of government as an instrument of social control; the history, motivation, methods and control of political parties; nominations, elections and minority groups; pressure politics.

NOTE—Not open to freshmen.

## Upper Division Courses

**101. American Institutions** (3) I

The principles of the Constitution of the United States of America, and a survey of the political and social institutions which have developed under the Constitution.

**105. American Political Thought** (3) II

A survey of the development of American ideas concerning political authority from the period of colonial foundation to the present time.

**111A-111B. Theory of the State** (3-3) Year, I

The nature of the state, its organization and activities, and its relation to the individual and to other states. Special attention is given to recent developments in the field of political thought. Not open to students with credit in Philosophy 111A-111B.

**120. Political Parties** (3) I

A critical analysis of the political party as a part of the process of government; party organization and activities; nominating and campaign methods; theories and functions of the party system; party responsibility. Special emphasis will be placed upon the function of the two-party system in American government.

**121. Basic Factors in American Politics** (3) I

An analysis of American political, legal, economic, and social factors in their relation to our political system and the public interest.

**122. Propaganda and Public Opinion** (3) II

A study of the forces which mold the American public mind, the practice of propaganda, a description and analysis of public relations, pressure groups and their effect in American public life.

**136. Administrative Law** (2) I

The law of public office and public officers, powers of administrative authorities, scope and limits of administrative powers, remedies against administrative action.

**137A-137B. Constitutional Government** (2-2) Year, I

Modern government and politics; its theoretical foundations, institutions and problems. Emphasis will be on American experience with useful comparisons with other countries. Either semester may be taken first.

**139A-139B. American Constitutional Development** (3-3) Year, I, II

A study of the work of the Convention of 1787 and of significant phases of American constitutional law. Not open to students with credit for History 172A-172B.

**140A-140B. Principles of Public Administration** (3-3) Year, I

Semester I: The administration of public services, staff and line functions, theories of organization and practices, and procedures of different types of governmental agencies.

Semester II: Principles and problems in governmental budgeting, performance and capital outlay, budget procedures, organization and administration of personnel programs, controls over administrative behavior, responsible bureaucracy and professionalism in the public services. Not open to students with credit in Political Science 147A-147B.

**142. State Government** (3) II

A study of the political structure and its operation used in the carrying on of the functions exercised by the states; state-federal relations; state-local government relations; particular emphasis on California government.

**143. Municipal and County Government** (3) I

A study of the organization and its operation used to carry into effect the functions assigned to local governmental units; particular emphasis upon local government in California.

**144. Introduction to Public Personnel Administration** (2) I

An introduction to the field, giving general coverage of the problems involved in recruitment, placement, supervision, etc., of public employees. Prerequisite: Permission of instructor.

**145. Public Personnel Management** (2) II

An advanced course involving detailed examination of management of personnel in public service. Prerequisite: Permission of instructor.

**146. Wage and Salary Administration** (3) I

Problems of job analysis; major techniques of job evaluation, including ranking, classification, point system, factor comparison; problems of wage and salary administration, incentive pay methods; merit rating plans. Not open to students with credit for Commerce 154.

**147A-147B. Public Administration** (2-2) Year, I

Administrative organization. Relationship between federal, state, and local governments. Budget, personnel, management, and control. Not open to students with credit for Political Science 140A-140B.

**148. The Government of Metropolitan Areas** (2) I

A study of the governmental problems of metropolitanism; overlapping of governments, services, planning and financing. The use of intergovernmental contracts for public service, proper public service areas, and special authorities.

**150A-150B. International Relations** (3-3) Year, I, II

An historical and analytical consideration of the basic factors—historic, geographic, economic, ideologic, and strategic—which underly and condition the modern conflict between the "sovereign state" and the "community of nations." Fall semester: Origins and development through the nineteenth century. Spring semester: Twentieth century experimentation and conflict.

**151SP. The Contemporary World** (1) II

A series of lectures by members of the faculty on selected problems of the current international scene. Reports required of students enrolled for credit.

**152. International Organization** (3) I

A critical analysis of the organization by which the international community seeks to provide for the exercise of legislative, administrative and judicial functions on the international level: Diplomatic and consular corps; conferences; administration through commissions and unions; amicable procedures for settlement of disputes; The League of Nations-United Nations experiment.

**153. Principles of International Law** (3) I

The function of law in the international community. The historical development of the ideas and rules of international law and their place in the modern diplomatic and legal structure.

**154. International Law and the Courts** (3) II

A case study of the application of the rules of international law in national and international courts.

**158A-158B. American Foreign Policy** (3-3) Year, I

Lectures and reading in the field of American foreign relations since 1776, with special emphasis, in the second semester, upon affairs since 1900. A general survey course. Not open to students with credit for History 176A-176B.

**160. Government of the British Dominions** (3) II

Development of the new British Empire and imperial relations of the self-governing dominions; government of Canada, Australia, New Zealand, and South Africa; conditioning historical, economic and racial factors. Not open to students with credit for History 156B.

**162. Government of England** (3) I

The structure and functioning of English parliamentary system with emphasis upon present day political principles and parties.

**165. Governments of Latin America** (3) II

The governments of leading and representative Latin American states. Emphasis on the background and evolution of current political institutions and philosophies.

**167. Government of the Soviet Union** (3) I

Theory and practice of government in the Soviet Union, with some attention to Russian foreign affairs.

**198. Special Studies in Government** (2-6) I, II

Directed study and research in the field of government. Admission by permission of the instructor.

**199. Special Studies in Political Science** (3) I, II

Directed study in research techniques in the field of political science. Limited to Political Science majors.

### Graduate Courses

**200A-200B. Seminar in Government** (2-2) Year, I, II

**290. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized biliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3)

An individual study course designed primarily for candidates for the master's degree.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

## PSYCHOLOGY

### IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in psychology. Two plans are provided: One for those students expecting to pursue the study of psychology beyond the A.B. degree; the other for those students who wish to extend their general education in the field of psychology.

The lower division requirements for all majors are: Psychology 1, 5, and 6; 6 units in biology, physiology, and/or zoology; 3 units in philosophy; and 6 units in anthropology and/or sociology.

The upper division requirements for each major will be determined by the plan selected by the student, but a minimum of 24 upper division units in psychology is required for a major.

A *teaching major:* A major in psychology may be combined with two teaching minors for a general secondary credential. Refer to the outline of requirements for this credential.

### Minor

A *minor in arts and sciences* is offered in psychology. The minor must include at least 15 units of work in psychology, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in psychology.

### Plan A Major

Plan A is for a non-professional major in psychology and is designed to provide the student with a greater understanding of his expanding group relations leading to happy and effective family and community living. The recommended pattern of courses for this program is not designed to facilitate graduate and professional study in psychology.

The upper division requirements for Plan A majors: Psychology 106, 131, 145, and electives to complete the major. It is expected that each student under Plan A will select, with the assistance of his adviser, a pattern of courses in line with his particular objectives in pursuing Plan A. For most students in Plan A, the following courses will be found particularly helpful: Psychology 105A, 107, 122, 132, 150, and 152.

To facilitate the purpose of Plan A the following courses in other departments are recommended as electives: Anthropology 1A-1B; Biology 1 or Zoology 1A-1B; Economics 1A-1B and 102; Health Education 90; Philosophy 1A-1B; Zoology 114 and 165; and courses in home economics.

### Plan B Major

The purpose of Plan B is to facilitate the specific preparation of those students who wish to pursue graduate and professional preparation in Clinical, Industrial and Personnel, and Theoretical-Experimental Psychology. To this end, three separate programs are suggested under Plan B to provide an undergraduate basic preparation for further study in these fields.

Upper division requirements for all Plan B majors: Psychology 104A, 105A, 160A or 160B, and additional courses to complete the major selected from one of the groups listed below. For each of the three patterns of special preparations under Plan B, the following courses are recommended:

*Pre-clinical:* Psychology 105B, 106, 131, 145, 150, 151, 152, 160A. The following courses are recommended in other departments: Anthropology 1A-1B; Biology 10A-10B, or Physiology 1A and 1C; Philosophy 1A-1B or 3A-3B, 20, and 129; Sociology 105 and 135; Speech Arts 176 or 179A-179B; and Zoology 165. A natural science minor is recommended.

In selecting courses and choosing electives, the student is urged to consult his adviser and the Bulletin on the requirements for special secondary credentials for school psychometrist and for correction of speech defects.

*Industrial and Personnel:* Psychology 121, 122, 131, 132, 145, 152, 160B. The following courses are recommended in other departments: Commerce 130A, and 153; Economics 1A-1B, 100A, 150, 151, 185, and 170; Philosophy 20; Political Science 144, and 145; Sociology 50, 51; and 6 units selected from Sociology 105, 135, 180, 190; and Speech Arts 2A; a minor in commerce, economics, political science, or sociology is recommended.

*Theoretical-Experimental:* Psychology 104B, 131, 140, 145, 150, 160A, 160B, and 177. The following courses are recommended in other departments: Chemistry 2A-2B; Foreign Language; Mathematics 1, 3A, and 3B; Philosophy 1A, and 20; Physics 2A-2B, and 3A-3B; Physiology 1A and 1C; Zoology 1A-1B, 100, and 165. A mathematics or natural science minor is recommended.

### The Master of Arts Degree

The Master of Arts Degree is offered in the Department of Psychology as a part of the fulfillment of requirements for the School Psychologist credential only. Refer to the outline of requirements for this degree and credential in the section on Professional Curricula in Education.

### Lower Division Courses

NOTE—Courses in psychology may not be used to meet any part of the 12-unit social science requirement, nor may they be used as part of a social science major or minor.

**1. General** (3) I, II

An introduction to some of the facts, principles, and concepts which are basic to understanding human behavior.

**5. Principles of Psychology: Basic Organization of Behavior** (3) I, II

The basic sensory, neural and motor mechanisms and their functions in human behavior. Prerequisite: Psychology 1 and sophomore standing.

**6. Principles of Psychology: Learning and Integrated Behavior** (3) I, II

Attending, perceiving, and learning, including social learning, personality development, and conditions of efficient work. Prerequisite: Psychology 1 and sophomore standing.

**11. Applied Psychology** (3) I, II

A survey of the application of the basic principles of psychology to business, education, industry, government, law, medicine and related fields. Prerequisite: Psychology 1.

**12. Mental Hygiene** (3) I, II

An examination and interpretation of the factors which go into the making of the person as he adapts himself to the social world about him. The development of the normal personality. Prerequisite: Psychology 1.

## Upper Division Courses

**104A. Statistical Methods in Psychology** (3) I, II

An introduction to the use of quantitative methods in psychology, with emphasis upon measures of central tendency and variability, graphic methods and percentiles, linear correlation, and the applications of the normal probability curve. Prerequisite: Psychology 1. Not open to students with credit for Economics 140 or Sociology 103.

**104B. Advanced Statistics** (3) II

A further study of quantitative methods in psychology with particular emphasis on methods of correlation, chi-square, and contingency, and an instruction to the analysis of variance. Prerequisites: Mathematics C and Psychology 104A, or permission of instructor.

**105A. Introduction to Psychological Testing** (3) I, II

The basic principles of testing. The selection and critical evaluation of group tests of intelligence, personality, aptitude, interest and achievement. Prerequisite: One of the following courses: Psychology 5, 11; Education 102A, 102D. Not open for credit to students with credit for Education 105A.

**105B. Individual Mental Testing** (3) II

The principles of individual testing. Instruction and practice in the administration of the Stanford-Binet and similar tests. Prerequisite: Psychology 105A and permission of instructor.

**106. Developmental Psychology** (3) I, II

A study of the psychological development of the normal individual from conception through childhood, adolescence, maturity, and old age. Stress is laid upon the interdependence of the various periods of the individual's life. Prerequisite: Psychology 1.

**107. Psychology of Later Maturity** (3) II

The psychological, physiological, and sociological factors influencing behavior in the later years of life. Prerequisite: Psychology 1.

**121. Personnel and Industrial Psychology** (3) I, II

Psychological principles applied to problems of selection and assignment of industrial personnel, employee training, and fatigue. Prerequisite: Psychology 104A, or Economics 140, or Sociology 103.

**122. Public Opinion Measurement** (3) II

The history, methods, and problems of public opinion and attitude measurement. Emphasis will be placed upon the polling of consumers and voters. Students will be given field experience.

**130. Educational Psychology** (2) I, II

To develop understanding of the applications of psychological research for effective classroom teaching. Observation and field work required. Prerequisite: Psychology 1. Not open to students with credit for Education 130.

**131. Foundations of Personality** (2) I

The human organism in its interaction with the environment and the resultant changes in the development of the personality. Prerequisite: One full year of psychology or equivalent.

**132. Personality Adjustment** (2) II

The appliction of the fundamental principles of personality to problems of adaptation. Mental hygiene as a local, state, and national problem. Prerequisite: Psychology 131 or permission of instructor.

**140. Physiological Psychology** (3) I, II

The neurophysiological basis of behavior, with particular attention to the psychophysiology of sensory and motor processes, emotion, bodily needs, and learning. Prerequisite: Psychology 5 and 6, or 10 units in biological sciences.

**145. Social Psychology** (3) I, II

The major problems and findings concerning processes of social interaction, group behavior and group membership, and the socialization of the individual. Prerequisite: Psychology 1. Not open to students with credit for Sociology 145.

**150. Abnormal Psychology** (3) I, II

The psychology of behavior disorders, with emphasis on the amentias, neuroses, and psychoses. Prerequisite: One full year of psychology.

**151. Introduction to Clinical Appraisal** (3) I

A study of diagnostic devises in psychology, tests of clinical significance, ratings, interviewing for securing information. Projective and case study analyses; problems of insight, rapport, empathy, and prediction of individual behavior. Prerequisites: One of the following: Psychology 105A, 106, 131, 140, or 150.

**152. Introduction to Methods of Counseling** (3) II

An introduction to problems and methods of counseling and adjustment. The utilization of psychological principles and techniques in dealing with various types of guidance situations. Prerequisite: Enrollment limited to senior and graduate students in psychology or pre-social work.

**160A. Experimental Psychology** (3) I, II

Demonstrations of the principles and conditions of learning, perceiving, problem solving, and thinking. Methodology and design of experiments. Two laboratory sessions and one seminar period per week. Prerequisite: Psychology 5, 6, and 104A.

**160B. Experimental Psychology** (3) I, II

Demonstration of laws governing various sensory experience and motor activities. Experiments in space perception, errors of judgment, and conditions of work and fatigue. Two laboratory sessions and one seminar period per week. Prerequisites: Psychology 5 and 6.

**166. Honors Course** (to be arranged) I, II

A special study arrangement for students admitted to the Honors Group. Enrollment through the Department Chairman, subject to the approval by the Committee on Honors. (See Honors Group under General Regulations.)

**170. Comparative Psychology** (3) I

A study of the behavior of animals with a view to gaining a better understanding of human behavior. An analysis of the leading experimental work on senory discrimination, learning, and intelligence of each animal group, from amoeba to man. Prerequisites: Psychology 5 and 6.

**177. History of Psychology** (3) II

A survey of the historical background of modern psychology. Limited to psychology majors with senior standing.

**199. Individual Studies in Psychology** (1-3) I, II
Limited to students in the senior year. Permission to enroll must be obtained from a member of the staff. Credit limited to 3 units.

### Graduate Courses

**201. Seminar** (2)
A review, integration, and supplementation of the student's knowledge of psychology.

**205. Advanced Mental Testing** (3)
The theory of mental testing and a comprehensive survey of the various verbal and nonverbal individual mental tests.

**211. Advanced Clinical Psychology** (3)
A seminar and practicum in directive and nondirective counseling. The theory of and experience in the use of techniques available to the clinical psychologist.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3)
An individual study course designed primarily for candidates for the master's degree.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

## RECREATION

### IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

Major work is not offered in recreation. Students desiring a concentration in this field should refer to the Recreation Curriculum in the section of the bulletin entitled: Preprofessional and Vocational Curricula.

### Minor

A *minor in arts and sciences* is offered in recreation. Lower division requirements: Four semesters of physical education activity courses and in addition a minimum of 6 lower division units to include Physical Education 51, 53, and electives chosen from Art 6B or fields of dance, drama, or music. Upper division requirements: A minimum of 9 units, including Physical Education 165, 170A-170B, and 184A. Consultation with the Chairman of the Division of Health, Physical Education, and Recreation is advised.

A *teaching minor* in recreation is offered for the junior high school and special secondary credentials. Students with a major in physical education may use this minor as second minor only. For specific information, refer to the outlines for these credentials.

## ROMANCE LANGUAGES

### IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in romance languages. Lower division requirements: French 1, 2, 3, 4, 5, 6, and Spanish 1, 2, 3, 4, 5, 6; History 4A-4B or History 8A-8B (for those who emphasize Spanish in the upper division). Upper division requirements: A minimum of 24 upper division units, of which no less than 9 shall be in one language, including French or Spanish 199.

A *teaching major* in romance languages is offered for the junior high and general secondary credentials. For specific information, refer to the outline of requirements for this credential.

### Minor

A *minor in arts and sciences* is not offered in romance languages, but minors may be taken in French or Spanish.

*A teaching minor* in foreign languages, including romance languages, is offered for the general junior high school, special secondary, and general elementary and kindergarten-primary credentials. Teaching minors are offered in French and Spanish for the general secondary credential. For specific information, refer to the sections in the bulletin under Majors and Minors for these credentials.

## SOCIAL SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* in social science is offered. Lower division requirements: 6 units in each of three of the following fields, the selection to be made on advice of the division adviser: (1) Economics, (2) geography, (3) history, (4) political science, and (5) sociology-anthropology. Upper division requirements: Complete a minimum of 30 units selected with the approval of the division adviser, as follows: Upper division courses to the extent of 6 to 15 units in each of three fields, provided that one of these fields be different from the fields selected for lower division work, and a 199 course.

A *teaching major* is offered in social science for the junior high school, and general secondary credentials. For specific information, refer to the outlines for these credentials.

### Minor

A *minor in arts and sciences* is not offered in social science.

A *teaching minor* in social science is offered for the junior high school, special secondary, and general elementary and kindergarten-primary credentials. For specific information, refer to the outlines for these credentials.

## SOCIOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in sociology. Lower division requirements: Sociology 50 and 51. Upper division requirements: A minimum of 24 upper division units in sociology, including Sociology 103, 110, 135, 152, 153, and 173 or 174.

A *teaching major* is not offered in sociology; however, courses in sociology may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in sociology. The minor must include at least 15 units of work in sociology, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in sociology for the general secondary credential; however, courses in sociology may be used as part of the *social science minor* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**50. Contemporary Social Problems** (3) I, II

Survey of modern social problems recognizing the sociological factors involved. Emphasis on the scientific method of approach. An evaluation of various causes and solutions of problems. A prerequisite for upper division courses in Sociology. Sophomore standing required. Not open to students who have credit for Social Science 40.

**51. Principles of Sociology** (3) I, II

The development and use of the concepts applied to sociological analysis; the effects of isolation and social contacts, interaction, processes, forces, controls, collective behavior and social progress. A prerequisite for upper division courses in Sociology. Sophomore standing required. Prerequisite: Sociology 50.

### Upper Division Courses

**103. Elementary Social Statistics** (3) I, II

Analysis and presentation of elementary material in the fields of sociology and social work. Tabular and graphic presentation, analysis of frequency distributions, trends, simple correlation, sampling and reliability techniques. Prerequisites: Mathematics A-B and Sociology 50 and 51. Mathematics C or 7A recommended. A prerequisite for most upper division sociology courses. Not open to students who have credit for Economics 140 or Psychology 104A or 104B.

**110. Race Relations** (3) I

A study of the Negro, Oriental, and other minority groups in the United States. A study of mental capacities, education, cultural achievement, family life, delinquency and other social factors of each group. Race prejudice, racial consciousness, theories of racial superiority and inferiority will be considered. Prerequisite: Sociology 50, 51.

**120. Industrial Sociology** (3) II

Analysis of group relationships within economic organizations. Problems of leadership, morale and conflict. Some attention to the sociology of occupations and professions. Prerequisites: Sociology 50, 51.

**135. Marriage and the Family** (3) I, II

Preparation for marriage. Prediction scales for evaluating success or failure in marriage. Parent-child relationships; factors in successful and unsuccessful marriages; higher education and the birth rate; married women in industry and professions; desertion and divorce. Not open to students who have credit for Sociology 45, or Home Economics 135. Prerequisite: Sophomore standing.

**145. Social Psychology** (3) I, II

Personality as it develops in relation to social environment. Suggestion, imitation, leadership, the crowd, public opinion, social control, prejudice, propaganda, sex differences, race differences. Prerequisites: Psychology 1, 11, Sociology 50, 51. Not open to students who have credit for Psychology 145.

**152. History of Social Thought** (3-3) Year, I

The origin and development of social theory in Europe and America; consideration of the fields and specialization and research in contemporary American sociology. Prerequisite: Sociology 50, 51.

**153. Modern Social Theory** (3-3) Year, II

A study of theories basic to modern sociological research, including the viewpoints of European and American thinkers. Prerequisites: Sociology 50, 51, and 152.

**170. Social Pathology** (3) I

Survey of many alleged abnormal phenomena in society as seen in society today in various forms of individual, family, community and world disorganization, such as crime, prostitution, extreme alcoholism, migratory workers, divorce, revolution and war.

**173. Criminology and Penology** (3) I

The extent and characteristics of crime; consideration of physical, mental, economic, and sociological causes of crime; study of methods of penal discipline, prison labor, parole, and probation; programs of prevention. Prerequisite: Sociology 50, 51.

**174. Juvenile Delinquency** (3) II

The nature and extent of delinquency; the causative factors involved; methods of control and prevention, with special attention to the protective and remedial measures offered by the school, home, Juvenile Court, correctional institutions and camps, probation and parole, and recreational agencies. Prerequisite: Sociology 50, 51, or permission of the instructor.

**180. Population Problems** (3) I

Problems of population increase, migration, shifts in composition of population relative to age, sex, and racial distribution. Population practices and theories. Biological and geographical aspects of population problems. International population movements. Prerequisite: Sociology 50, 51 and 103.

**185. Community Welfare Organization** (3) II

An analysis of the structure and process of community organization for social welfare as well as the functional relationships between public and private welfare agencies. Field work will be required to study some of the social agencies of San Diego. Prerequisite: Sociology 50, 51 and Sociology 103, or permission of instructor.

**187. Urban Sociology** (3) I, II

A study of the structure and function of the modern city; types of neighborhoods; forms of recreation; social forces in a metropolitan area; types of urban personalities and groups; rural-urban conflicts of culture. Practical field studies required. Prerequisite: Sociology 50, 51 and 103.

**190. Fields of Social Work** (3) I, II

A survey of the nature of social work and the various kinds of social work which are found in the modern urban life. The student is familiarized with the various social agencies in the community, their problems and methods of work, by readings and field trips. Volunteer social work in some social agency recommended. Prerequisites: Sociology 50, 51, and 103.

**199. Special Studies** (1-3) I, II

Limited to students in the senior year. Permission to enroll must be obtained from a member of the staff. Credit limited to three units.

### Graduate Courses

**200A-200B. Seminar** (2-2)

**230. Principles of Social Case Work** (3) I

A study of the principles and practices of social case work; problems of case recording and analysis. Directed field work and case studies. Prerequisites: Sociology 190 or Psychology 152 or Education 233.

**231. Field Work in Social Case Work** (3) II

Supervised practice in local social work agencies. Prerequisite: Sociology 190 and 230.

**290. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3)

An individual study course primarily for candidates for the master's degree.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

## SPANISH

### IN THE DIVISION OF LANGUAGE AND LITERATURE

### Major

A *major in arts and sciences* is offered in Spanish. Lower division requirements: Spanish 1, 2, 3, 4, 5, 6; French 1, 2, or German 1, 2, or Latin 1, 2; History 4A-4B or 8A-8B. Upper division requirements: A minimum of 24 upper division units, at least 21 units of which must be in Spanish, including Spanish 199. The remaining three units may be selected from Geography 116, 118, 119, 120; History 161, 162; Political Science 165; or Comparative Literature 101A, 140A-140B, 152A-152B, 155, 158, 159, in consultation with the Chairman of the Department. An average of C grade or better is required in upper division major courses.

A *major in arts and sciences* is offered in Romance Languages. For specific information, refer to Romance Languages in the section on Announcement of Courses.

A *teaching major* is offered in Spanish or Romance Languages for the junior high school and general secondary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in Spanish. The minor must include at least 15 units of work in Spanish, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in Spanish for the general secondary, the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credential. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1. Elementary** (3) I, II

Pronunciation, oral practice, readings on Spanish culture and civilization, minimum essentials of grammar.

**2. Elementary** (3) I, II

Continuation of Spanish 1. Prerequisite: Spanish 1 or one year of high school Spanish.

**2, 3, 4, 5.** Will take the place of Spanish C, D, in the Fall semester of 1951.

**10. Conversation** (2) I

Practice in the spoken language; practical vocabulary; conversation on assigned topics; simple dialogues and plays. Prerequisite: Spanish A or two years of high school Spanish.

**11. Conversation** (2) II

Continuation of Spanish 10. Prerequisite: Spanish 10, Spanish B or three years of high school Spanish.

**15. Spanish Civilization** (2) I

The major currents and characteristics of Hispanic life and culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

**16. Spanish Civilization** (2) II

Continuation of Spanish 15. No prerequisite.

**B. Elementary** (5) I (Offered for last time in Fall of 1950)

Intensive study of Spanish grammar and syntax, with daily written work; class drill in conversational idiom and pronunciation; reading with oral discussion and resumes; dictation; introduction to contemporary prose writers. Students who have had two years of Spanish in high school should register for Spanish B for which only four units will be allowed. For specific information, consult the chairman of the department.

**C-D. Intermediate Spanish** (3-3) Year, I (Offered for last time in Spring of 1951)

Reading and composition: Study of standard prose as basis for class work; collateral reading in prose and drama, with written reports in Spanish; dictation. Class work conducted mainly in Spanish. Individual conferences. Prerequisite for C: Spanish B or three years of high school Spanish. Prerequisite for D: Spanish C or four years of high school Spanish.

**50. Spanish Commercial Correspondence** (3) I

(Offered in Fall of 1950 and every two years thereafter)

A one-semester intermediate course in Spanish composition, directed along the line of commercial correspondence. A practical course, with translation of business letters, and supplementary reading in Spanish on commercial subjects. Prerequisite: Three years of high school Spanish, or completion of Spanish B. This course may substitute for Spanish C in the C-D sequence.

**70. Spanish for Elementary-School Teachers** (3) II
Elementary Spanish to meet the needs of elementary-school teachers. Emphas on the oral aspects of the language with reading centering around Mexico. Open onl to students enrolled in the general elementary school curriculum. Prerequisite: Tw years of high school Spanish or one year of college Spanish or permission of instructo

### Upper Division Courses

**101A-101B. Conversation and Composition** (3-3) Year, I
Translation into Spanish of moderately difficult English prose passages. Fre composition in Spanish. Outside reading of modern Spanish plays, with writte reports in Spanish. Oral practice in colloquial Spanish with extensive use of phon graph recordings. Prerequisite: Spanish D, or its equivalent, with grade of C.

**102A-102B. Introduction to Spanish Classics** (3-3) Year, I (Offered in 1952-53
Reading from several types of classical literature. Lazarillo de Tormes an other novels of Roguery; selections from Don Quixote, and the Cien Mejores Poesia Castellanas; one drama each from the works of Lope de Vega, Calderon, Alarco and Moreto; collateral reading and reports. Prerequisite: A grade of C in Spanish or permission from the instructor.

**104A-104B. Spanish-American Literature** (3-3) Year, I
Reading from representative Spanish-American authors during the colonia revolutionary and modern periods. Lectures, class reading, collateral reading an reports. Prerequisite: A grade of C in Spanish D or permission from the instructo Students who do not read Spanish may take this course for credit in comparativ literature, doing the required reading in English translation.

**105A-105B. Modern Spanish Drama** (3-3) Year, I
The development of the drama of Spain from the beginning of the nineteent century to the present time. Prerequisite: A grade of C in Spanish D or permissio from the instructor.

**110A-110B. Novel and Short Story in Spain** (3-3) Year, I
The development of the novel and short story in Spain from 1830 to th present time. Prerequisite: A grade of C in Spanish D or permission from th instructor.

**150. Spanish Phonetics** (3) II
A theoretical and practical study of Spanish phonetics. A study of vowels, consonants, isolated words, and phonic groups. The principles of versification, and exercises in intonation. Especially recommended for prospective teachers of Spanish. Prerequisites: Grade of C in Spanish D, or permission of the instructor.

**199. Comprehensive Reading and Survey Course** (3) II
Designed to fill up the gaps in the reading done in courses. Class meeting onc a week for guidance, reports, and quizzes. Required of all seniors majoring in Spanish

### Graduate Courses

**Spanish 201. Old Spanish** (2) I
A study of the language and literature of Spain from the 12th to the 15th centuries.

**Spanish 204. Seminar in Spanish-American Literature** (2) II
Intensive investigation of some phase of Spanish-American literature. A single country, an author, or some special problem will be studied and reported upon.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3)
An individual study course designed primarily for candidates for the Master's Degree.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the Master's Degree.

# SPEECH ARTS

## IN THE DIVISION OF LANGUAGE AND LITERATURE

### Major

A *major in arts and sciences* is offered in speech. Lower division requirements: A minimum of 15 units of lower division courses in speech arts, specializing in the field of dramatic art, radio, public speaking or a guided combination of the three. Upper division requirements: A minimum of 24 upper division units including Speech Arts 150; 6 units selected from 155, 140A-140B, 179A-179B, 192A-192B (the first semesters of any of these courses may be combined); 6 units selected from 181, 182, 183 or 184, 159A-159B, 161 and 191, or combinations of the first semesters of any of these courses; 6 units selected from 152, 154A, 154B, 108, 118A, 176, 192A, 192B.

A *teaching major* is offered in speech for the general secondary and the special secondary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in speech. The minor must include at least 15 units of work in speech arts, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in speech for the general secondary, the general junior high school, and the special secondary credentials. It may be offered only as a second teaching minor for the general elementary and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**A. Speech for Communication** (2) I, II

Primarily for those who have not passed the speech test. Training in communication, obtaining and organizing material, and drill in enunciation, pronunciation, vocabulary and oral grammar. Individual laboratory practice for specific speech problems.

**1. Voice and Diction** (3) II

Exercises and drills to improve the quality, flexibility and effectiveness of the speaking voice leading to good usage in standard American speech. Preparatory to further courses in public speaking and dramatic art.

**2A. Fundamentals of Public Speaking** (3) I, II

Training in fundamental processes of oral expression; method of obtaining and organizing material; outlining principles of attention and delivery; practice in construction and delivery of type forms of speech.

**2B. Extemporaneous Speaking (or Forum Speaking)** (3) I, II

Practice in extemporaneous speaking on subjects of current interest, both national and local, with stress laid on the organization and delivery of content material. Forum discussion will provide speakers with the opportunity of assembling facts quickly to meet such questions as any audience situation might demand.

**11A. Interpretation** (3) I, II

Application of the principles involved in "making words come alive": Response to thought and mood, sensory association, emphasis, climax. Practice selections in poetry and prose.

**11B. Interpretation** (3) I, II

Oral reading of various types of material suitable for popular audiences: Stories, humorous sketches, light and sentimental verse. Prerequisite: 2A or 11A or 55A.

**20. Remedial Speech** (1) I, II

Corrective laboratory training prescribed on the basis of vocalization tests made on recording machine. Required of education majors who fail to meet speech requirements tests. Private assistance given to stutterers and lispers.

**54. Stage Make-Up** (2) I

Practice in the application of stage make-up including straight and character. Two laboratory periods per week.

**55A. Elementary Acting** (3) I, II

Speech and pantomime applied to the problems of characterization in group scenes. This course is concerned with the discovery and development of talent and the appreciation of the actors' problems for directors and teachers.

**55B. Intermediate Acting** (3) I, II

Continuation of 55A emphasizing more emotional material from longer scenes. Some one-act plays will be produced from this class. Prerequisite: 55A or previous training.

**56A-56B. Dramatic Production** (3-3) Year, I

A general survey of play production planned to present the whole organization of the college and school theater, with emphasis on backstage practice, stagecraft, and elementary lighting. Crews for the departmental productions are organized in this class. Prerequisite: 55A or permission of the instructor is prerequisite for 56B.

**57. Elementary Stage Costume** (3) II

A study of pattern drafting, draping, color harmony and the use of fabrics for stage costuming. Students will receive practical training in the construction of stage costumes. Two lecture-demonstration and recitation hours and one laboratory per week.

**60A-60B. Argumentation and Debate** (3-3) Year, I, II

Obtaining and organizing of evidence and the construction and use of the brief; study and discussion of current issues; the presentation of formal and informal debates. Attention to intramural and intercollegiate debating.

**61A-61B-61C-61D. Intercollegiate Debate** (1-1-1-1) I, II

**63A-63B-63C-63D. Verse Choir** (1-1-1-1) I, II

Participation in verse speaking chorus to develop quality, range of tone, and ability in dramatic visualization of poetry.

**81. Survey of Radio** (3) I, II

A course presenting the background, theory, and fundamentals of radio broadcasting. The subject material includes history of broadcasting; types of radio programs; broadcast operation.

**82. Radio Announcing** (3) I, II

The fundamentals of radio announcing. Class time will be divided between lecture and laboratory practice of announcing styles. Voice training for radio will be stressed. Prerequisite: Speech Arts 81.

**83. Radio Acting and Directing** (3) II

For students interested in the production of dramatic radio programs. Lecture and laboratory for radio techniques in characterization. The use of sound effects and music cues and bridges will be considered. Emphasis will be on production analysis. Actors for Radio Guild productions will be taken from this class. Prerequisite: Speech Arts 81.

## Upper Division Courses

**108. Advanced Interpretation** (3) I, II

Analysis of techniques of literary composition as guides to oral interpretation. Achievements of the creative artist as they affect the interpretative artist. Prerequisite: 11A or 11B or permission of instructor.

**118A-118B. Playwriting** (3-3) Year, I

The first semester deals with the one-act play and its technique. Plays are analyzed and creative writing is encouraged. New plays are read and discussed in class during their period of development. Some of the plays will be produced. The second semester continues with analyses of long plays and students continue creative writing. Prerequisite: 118A or permission of the instructor is prerequisite for 118B.

**120. Readings in Dramatic Art** (3) II

This course will deal with dramatic materials in which the student will study complete plays for interpretation and characterization without memorization and acting techniques.

**140A-140B. Stage Design** (3-3) Year, I, II

The application of the principles of design, color and perspective to the design of settings for the production of period and modern plays. Students will learn to make sketches and models and paint the scenery for the departmental productions. Prerequisite: 56A-56B or permission of the instructor.

**145. Stage Lighting** (3) II

For directors, designers and technicians in school and community theaters concerning the principles and practice of light, color, lighting instruments, and control equipment, including the design and planning of lighting of plays. Students will serve as light crews for departmental production.

**150. Phonetics** (3) I, II

Auditory and kinesthetic analysis of the sounds of the English language. Valuable as a corrective course in pronunciation and articulation. Required of speech majors and those seeking the Speech Correction Credential.

**152. History and Design of Costume** (stage) (3) II

A study of costume from Egypt to the present. Emphasis on the use of historical costumes on the stage. Costume designs for one stage production. Drawing and painting experience desirable but not necessary.

**154A-154B. History of the Theater** (3-3) Year, I, II

A study of the theater from primitive times to the present. Special attention will be given to the theater as a mirror of the social and cultural background of the various countries and periods in which it is studied. Carries aesthetics credit. (Speech Arts 154B may be taken without 154A.)

**155. Advanced Acting** (3) I

Problems in characterization: Acting styles of the Elizabethan and Eighteenth Century periods. Prerequisite: 55A-55B or the equivalent.

**156. Advanced Dramatic Production** (3) Summer

Problems and projects in scenery and lighting in connection with the workshop and major productions of the department.

**159. Stage Direction** (3) I

Planned for prospective directors of plays in schools, colleges and community theaters. Through lectures, discussions, and exercise projects the student will become acquainted with the principles, procedure and methods of stage direction. Each student will be required to direct several short plays during the course.

**160. Directed Laboratory** (1) I, II

This will consist of experience in directing a one-act play before a departmental or public audience. It may be taken with or it may be preceded by 159. Prerequisite or corequisite: 159. May be repeated once for credit.

**161A-161B-161C-161D.** Advanced Intercollegiate Debate (1-1-1-1) I, II

**162. Advanced Argumentation** (3) I

Presents a further and more detailed study in the preparation of briefs and the organizing of evidence; opportunity for participation in intramural debates, intercollegiate debate, and community speaking activity. Prerequisite: 2A or 2B.

**163A-163B-163C-163D. Advanced Verse Choir** (1-1-1-1) I, II

Participation in verse speaking chorus to develop quality, range of tone, and ability in dramatic visualization of poetry.

**166. Honors Course**

See The Honors Group under General Regulations.

**176. Problems of Speech Correction and Articulation** (3) II

Analysis and discussion of the major articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Not open to students with credit for Education 176.

**177. The Teaching of Lip Reading** (2)

History, theory and methods of lip reading. Aids for the classroom teacher; program and materials of instruction for the specialized teacher. Opportunities for practice teaching are offered. Not open to students with credit for Education 177.

**179A-179B. Nervous Speech Disorders** (3-3) Year, I

Clinical survey of newest methods of speech correction with special emphasis given to stammering. Required course for Special Corrective Credential. Not open to students with credit in Education 179A-179B. (Speech Arts 179A is a prerequisite for 179B.)

**181. Radio Sales and Advertising** (3) I, II

A study of advertising trends in radio advertising; time buying, audience survey, and program types in relation to products to be advertised via radio broadcasting. Includes publicity and promotion of radio programming organization of a radio station; relationship between the business and entertainment factors of radio broadcasting. Open to students with consent of instructor.

**182. Advanced Radio Production** (3) II (Offered in 1951-52 and alternate years)

Advanced radio production techniques. Students are responsible for the execution of Radio Guild productions. Projects in program types include the use of sound and music. Material includes production analyses and script editing. Prerequisite: Speech Arts 83.

**183. Radio News Writing and Broadcasting** (3) II

Correlates news editing and writing with announcing styles. Radio news procedure and organization of a radio news staff; analysis of reportorial and commentary styles. Includes production techniques of "on-the-spot" and multiple point pickup broadcasts. Registration with permission of instructor.

**184. Radio Writing** (3) II

Includes original half-hour scripts, play or novel adaptations for radio, and the documentary program. Study of pacing and timing, the use of sound and music for bridges and cues, and radio format. Plays written by students are read and discussed during their development; the better plays to be produced by the Radio Guild for broadcast. Open to students with consent of instructor.

**191. Organized Discussion** (3) II

Consideration of the symposium, the panel, the open forum, the business session, and varieties of conference speaking. Emphasis upon organization and presentation. Attention to parliamentary procedure for informal groups. Prerequisite: Speech Arts 60 or equivalent.

**192A-192B. Advanced Public Speaking** (3-3) Year, I, II

Careful attention given to the preparation and delivery of longer speeches, using as models classics in the field of oratory. Prerequisite: 2A or 2B.

**199. Special Problems in Speech and Dramatic Art** (1-3) I, II

## Graduate Courses

**200. Seminar in History of Oratory** (2) II

An advanced course for those already familiar with the techniques and theories of public speaking and debate. A history of public address from the time of Greece up to the present, organized around the theories of representative orators and their relationships to the social environment.

**221. Articulatory Problems of Speech** (2) I

Analysis and discussion of articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Prerequisite: Speech Arts 150.

**245. Seminar in Technical Practice** (2)
Advanced technical projects in planning school theaters and their mechnical equipment, lighting control and lighting instruments and the design of lighting layouts for elaborate plays will be assigned, executed and discussed.

**259. Seminar in Stage Direction** (2)
An advanced course for those who are ready to direct full-length plays and to consider the problems of handling various styles and types of drama in the great periods of dramatic literature for modern production. For graduates with experience in directing plays.

**260. Seminar in Oral Interpretation** (2)
Aesthetic discipline applied to oral reading of masterpieces of poetry and prose. Analysis of thought and emotional content and aesthetic form, including unity and harmony, variety and contrast, balance and proportion, rhythm.

# ZOOLOGY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in zoology. Lower division requirements: Zoology 1A-1B; Chemistry 1A-1B or 2A-2B. Recommended: German or French; Botany 1. Upper division requirements: A minimum of 24 upper division units, at least 18 units of which must be in zoology and 6 units of which may be in related courses in botany, chemistry, physics, physiology, or bacteriology selected with approval of the departmental representative.

A *teaching major* is not offered in zoology; however, courses in zoology may be used as part of the *life science major* for the general secondary credential or as part of the *general science major* for the general junior high school credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in zoology. The minor must include at least 15 units of work in zoology, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in zoology; however, it may be used as part of the *teaching minor in life science* for the general secondary credential, or as part of the *teaching minor in general science* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A-1B. General Zoology** (4-4) Year, I, II
An introduction to animal biology. Designed for those who expect to do advanced work. Two lectures and 6 hours of laboratory work each week. Students who have credit for Biology 10B do not receive credit for Zoology 1A. Prerequisite for Zoology 1B: Biology 10B or Zoology 1A.

**8. Human Anatomy** (3) I
A study of human structure through the use of models, prepared dissections and microscope slides. Prerequisite: High school biology, Biology 10A, 1, or Zoology 1A. Two hours of lecture and three hours of laboratory per week. Required of prenursing students. Credit reduced to 2 units if student has credit for Zoology 20.

**20. Human Anatomy and Physiology** (3) II
An elementary course in human anatomy and physiology. Prerequisite: High school biology, or Biology 1 or 10A or Zoology 1A. Lectures three hours per week. Credit reduced to 2 units if student has credit for Zoology 8 or Physiology 1A.

## Upper Division Courses

**100. Embryology** (4) I, II

The development of vertebrates as illustrated by the frog, chick, and pig. Six hours of laboratory and two hours of lecture and quiz per week. Prerequisite: Zoology 1B or Biology 10B.

**101. General Physiology** (4) II

Fundamentals of plant and animal functions. Two lectures and two laboratory periods per week. Prerequisites: Biology 10A-10B or Zoology 1A-1B, Chemistry 1A-1B or Chemistry 2A-2B.

**104. Microtechnique** (3) I, II

Introduction to methods of preparation of tissues for microscopic study. Six hours of laboratory and one hour of lecture per week. Prerequisite: One year college chemistry and Zoology 1A-1B, Botany 2A-2B or Biology 10A-10B.

**106. Comparative Anatomy of the Vertebrates** (4) I

Dissection, study and comparison of organ systems of typical vertebrates. Two hours per week of lecture and six hours of laboratory. Prerequisite: Zoology 1B or Biology 10B.

**108. Histology** (4) I

A study of the microscopic structures and differentiation of tissues and organs of the vertebrates, especially mammals. One lecture and six hours of laboratory per week. Prerequisites: Zoology 1A-1B, or Biology 10A-10B; recommended Zoology 100.

**109. Hematology** (3) I, II

Microscopic and chemical examination of blood. One lecture and two laboratory periods per week. Prerequisite: Chemistry 102.

**110. Limnology** (4) II

A biological survey of available fresh waters, followed by a selected problem on the relationship of an organism or group of organisms to the environment. Prerequisites: Zoology 1A-1B and elementary chemistry.

**112. Marine Invertebrates** (4) I

Identification and study of behavior and life histories of invertebrates of the San Diego region. Frequent collecting trips to the beaches required. Prerequisite: Zoology 1A or Biology 10B. Two hours of lecture and six hours of laboratory or field work per week.

**113. Ornithology** (4) II

The study and identification of birds, especially those of the Pacific Coast and the San Diego region. One hour of lecture and six hours per week of laboratory, or field excursions, and a field project. Prerequisite: Zoology 1B or Biology 10B.

**113F. Field Ornithology** (1) I

A field study of local birds with special emphasis upon the fall migration.

**115. Cold-blooded Vertebrates** (3) II

The classification, natural history and distribution of fishes, amphibians, and reptiles. Practice in the techniques of collection and the use of keys for identification. Frequent field trips. One lecture and two laboratory periods per week. Prerequisites: Zoology 1B or Biology 10B.

**118. Mammalogy** (3) II

Lectures on classification, adaptations, and ecological relationships of mammals. Laboratory and frequent field trips to familiarize students with local mammals, taxonomic procedures and field techniques. One lecture and six hours of laboratory per week. Prerequisites: Zoology 1A or Biology 10B.

**119. Field Zoology** (4) Summer

Designed to give a working knowledge of the animals of Southern California; field trips, lectures and laboratory emphasizing ecology, behavior, observational methods, collecting techniques and taxonomy. Prerequisite: A course in college biological science or permission of instructor.

**121. General Entomology** (3) I

The classification, life history, structure, and physiology of insects. Prerequisite: Zoology 1A or Biology 10B. Two hours of lecture and three hours of laboratory per week.

**122. Systematic Entomology** (1-2) II

Classification of insects with especial emphasis on a group of insects of the student's choice. To be taken with or to follow 121. May be repeated for credit but with a total of not more than 3 units. Three to six hours of laboratory work each week.

**125. Economic Entomology** (4) II

Course designed for students of agriculture and horticulture. Emphasis is placed on determination and control of insects affecting plants. Quarantine measures are also studied. Two lectures and two laboratory periods per week. Prerequisite: Zoology 1A or Biology 10B.

**126. Medical Entomology** (3) I

The role of insects and other arthropods in transmission and causation of human diseases. Three hours of laboratory and two hours of lecture per week. Prerequisite: Zoology 1A or Biology 10B.

**128. Parasitology** (4) I

Study of animal parasites with special reference to those of man. Laboratory including identification of important parasites of man, and collection and preservation of local forms. Two hours of lecture and six hours of laboratory per week. Prerequisite: Biology 10A-10B or Zoology 1A-1B.

**150. Readings in Biology** (2) II

Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles, ecology, economic zoology, zoogeography, breeding habits, animal behavior. Not open to students who have credit for Botany 150.

**153. Economic Biology** (2) I

Study of uses of plants and animals to man and their destructive effects. Consideration also given to general methods of control and conservation. Prerequisite: Zoology 1A, Biology 1, or Biology 10B. Not open to students who have credit for Botany 153.

**155. Genetics** (2) II

Principles of plant and animal genetics. Primarily for science majors. Two lectures per week. Not open to students with credit for Botany 155. Prerequisites: Biology 10A-10B, Zoology 1A-1B or Botany 2A-2B.

**156. Genetics Laboratory** (2) II

Experiments and demonstrations illustrating the mechanism of heredity in plants and animals. Six hours of laboratory per week. Prerequisite: Zoology 155 or Botany 155, or concurrent registration in either. Not open to students with credit for Botany 156.

**160. Evolution** (2) II

The development of theories of evolution. Two lectures per week.

**165. Human Heredity** (2) I

Presentation of selected principles of heredity as related primarily to human inheritance. Designed primarily for nonscience majors. Two lectures per week. Not open to students with credit for Zoology 155 or Botany 155.

**199. Special Study** (1-2) I, II

Admission only by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open to students who have completed at least 15 units of zoology with a grade of A or B.

## Graduate Courses

**200. Seminar** (3) I

Especial emphasis will be placed on current concepts in the various fields of biology including problems of migration, distribution, speciation, evolution. Required of all graduate students.

**202. Hydrobiology** (2) II

A course in aquatic ecology with special emphasis on fresh water but with reference to marine biology.

**213. Advanced Studies in Ornithology** (2) I

Lectures and seminar on advanced problems of morphology, distribution, behavior and classification of birds.

**290. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (2-5)

An individual study course designed primarily for candidates for the master's degree.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

# PROVISIONAL CURRICULUM

This curriculum is for the purpose of assisting provisional students in attaining regular status in a curriculum which leads to the A.B. degree. Students in the provisional program are given close supervision in selection of courses and are placed in classes specially designed to aid in adjustment to the college program.

Reclassification to regular status may be obtained upon the completion of at least 24 units of work of "C" grade with an over-all grade point average of 1.0, or upon recommendation of a reclassification committee. Reclassification must ordinarily take place within the first year of college work. Students who do not so reclassify will be placed on probation. (See Probation and Disqualification.)

The courses in the provisional curriculum are open only to students in provisional status. Provisional students in their first college year must select three courses each semester from the list of subjects in the provisional curriculum. All other courses selected to complete the student's program may be chosen from the regular schedule of courses or from additional courses in the provisional curriculum with the approval of the adviser.

## A SUGGESTED PROGRAM FOR PROVISIONAL STUDENTS

| First Year | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem.* |
| * English 41, English Composition, and 42, Freshman Literature | 3 | 3 |
| Physical Science 40, Man and His Physical World, or equivalent (see lower division requirements.) | - | 3 |
| Biology 40, Man and His Biological World, or equivalent (see lower division requirements.) | 3 | - |
| Social Science 40, Contemporary Problems | 3 | - |
| Sociology 45, Marriage and the Family | - | 3 |
| Health Education 21, Principles of Healthful Living | - | 2 |
| Psychology 40, Psychology and Life | 3 | - |
| Physical Education (activity courses) | ½ | ½ |
| Elective | 3 | 4 |
| | 15½ | 15½ |

## COURSES OF INSTRUCTION

### BIOLOGY

**40. Man and His Biological World** (3) I, II

General concepts of biology; living, reproduction, inheritance, evolution. Biology in action; scientific methods, scientific atitudes, contributions of biologists. Man as a biological animal; his biological needs, his place in the biological world. One demonstration and three lecture periods per week. Equivalent of Biology 1.

### ENGLISH

**40. English Fundamentals**

Elements of composition. Drill in grammar, usage, vocabulary building, reading skills, theme writing. Course credit is equivalent to passing English A qualifying examination and may be counted toward graduation as an elective, but does not satisfy lower division English requirements. Equivalent of English A.

---

* Students who do not pass the English A qualifying examination must register in English 40, Pre-College English, which is a prerequisite for English 41. Credit in English 40 may be counted toward graduation as an elective but not to satisfy lower division English requirements.

**41. English Composition** (3) I, II

Composition stressing exposition. Reading from essays and articles. Prerequi sites: Passing mark in English A qualifying examination or credit for English 40 Equivalent of English 1.

**42. Freshman Literature** (3) I, II

Literature, mainly contemporary, is read for its ideas, especially in relation t human problems and their solution. Practice in writing is continued. Required of al Provisional students. Prerequisite: English 41. Equivalent of English 2.

## PHYSICAL SCIENCE

**40. Man and His Physical World** (3) I, II

A general education course concerning the nature of the scientific method an selected topics in physical science. Materials will be chosen from physics, chemistry astronomy, and geology to provide an understanding of the relations of physical scienc to modern life. Equivalent of Physical Science 1A.

## PSYCHOLOGY

**40. Psychology and Life** (3) I, II

An elementary survey of normal adult psychology, descriptive and organiza tional; the subjective and objective aspects of behavior. Furnishes basis for all othe courses in psychology and is prerequisite therefor. Equivalent of Psychology 1.

## SOCIAL SCIENCE

**40. Contemporary Problems** (3) I, II

A survey of political, social and economic forces with background material fo understanding human problems. Equivalent of Sociology 50.

**45. American Democracy** (3) II

The democratic concept of self-government, its background and growth, with a emphasis on the American use of democratic principles. Includes a study of democrac in a relative and comparative approach to our modern world and other forms of goverr ment. Satisfies the U. S. Constitution requirement for graduation.

## SOCIOLOGY

**45. Marriage and Family** (3) I, II

Emphasizes preparation for successful marital adjustment by presenting mat rials that will help students learn to solve their own courtship, marriage, and famil problems.

# DIRECTORY

## 1949-50

---

* Date of appointment.

BENTON, CARL WEBBER--------------------Instructor in Physical Education
B.S., University of California at Los Angeles. 1948.*

BIRCH, AILEEN J. (Mrs. C. E.)--------------------Instructor in Education
A.B., San Diego State College. 1949.*

BLOCK, EDWARD A.--------------------Associate Professor of English
Ph.D., University of California. 1946.*

BROADBENT, HARRY H.--------------------Assistant Professor of Physical Education
A.B., University of Oklahoma; one and one-half years of graduate study at the University of Pennsylvania. 1949.*

BROOKS, BAYLOR--------------------Assistant Professor of Geology
B.A., Stanford University. Two years graduate study at University of Arizona and Stanford University. 1931.*

BROWN, ELIZABETH McPIKE (Mrs. L. P.)--------------------Professor of French
Ph.D., University of Chicago. 1926.*

BROWN, EUGENE P.--------------------Assistant Professor of Commerce
M.A., University of Oklahoma. One year graduate study at University of Chicago, University of Southern California and University of Mexico. 1947.*

BROWN, LESLIE PARKER--------------------Professor of Spanish and French
Ph.D., University of Southern California. 1922.*

BRUNER, WILLIAM S.--------------------Assistant Professor of English
M.A., Claremont Colleges. 1948.*

BRYDEGAARD, MARGARET A. (Mrs. H)--------------------Associate Professor of Education
M.A., and graduate study, Claremont Colleges. 1936.*

BURNETT, GAIL ALLEN--------------------Assistant Professor of English
Ph.D., University of Southern California. 1947.*

CAMERON, ROY ERNEST--------------------Professor of Economics
Ph.D., University of California. 1929.*

CAMPBELL, LOIS BERYL--------------------Assistant Professor of Education
M.A., Teachers College, Columbia University. 1947.*

CARLSON, HILDING B.--------------------Associate Professor of Psychology
Ph.D., University of Chicago. 1948.*

CARLSON, THORSTEN ROBERT--------------------Principal of Campus Laboratory School;
Ph.D., University of Minnesota. 1948.* Associate Professor of Education

CASSEL, RUSSELL N.--------------------Assistant Professor of Education
D.Ed., University of Southern California. 1949.*

CAVE, MARY F.--------------------Assistant Professor of Physical Education
B.S., University of North Dakota; one-half year's study at Bennington College. 1946.*

CHADWICK, LEONARD E.--------------------Assistant Professor of Economics
B.S., and two and one-half years of graduate study at the University of California. 1949.*

CHOPLIN, ROSA MARIA (Mrs. Ralph)--------------------Acting Instructor in Spanish
A.B., University of California at Los Angeles; one year graduate study at University of Southern California. 1948.*

CHURCHILL, CHARLES W.--------------------Assistant Professor of Sociology
Ph.D., New York University. 1949.*

COLLINS, MYRON D.--------------------Lecturer in Music
Diplomas, University Extension Conservatory, Chicago; extensive private instruction. 1948.*

COMIN, NORITA (Mrs.)--------------------Acting Assistant Professor of Home Economics
B.S., University of Minnesota. 1949.*

CORBETT, KATHERINE E.--------------------Associate Professor of Education
M.A., Teachers College, Columbia University. 1921.*

---

* Date of appointment.

CORRIGAN, ROBERT FORD — Assistant Professor of Speech Arts
M.A., University of Iowa. 1947.*

CROUCH, JAMES ENSIGN — Professor of Biology
Ph.D., University of Southern California. 1932.*

CUNKLE, ELIZABETH CLARK (Mrs. LaChance) — Junior Librarian
B.S., Columbia University. 1948.*

CUNNINGHAM, CORNELIUS CARMAN — Associate Professor of Speech Arts
Ph.D., University of Iowa. 1947.*

DEBRECHT, EUGENE F. — Director of Extension Service
M.A., Stanford University. 1949.* Assistant Professor of Commerce

DEHNEL, PAUL A. — Acting Instructor in Biology
M.A., University of California. 1948.*

DEPUTY, ERBY CHESTER — Professor of Education
Ph.D., Columbia University. 1931.*

DICKHAUT, FLORENCE LILLIAN SMITH (Mrs. Charles A.)
M.A., University of Chicago. 1917.* Professor of English

DIRKS, JOHN H. — Instructor in Art
B.A., San Diego State College; one-half year of graduate study at the University of Southern California. 1947.*

DURR, IRMA SUE (Mrs. Robert L.) — Junior Librarian
B.S., George Peabody College. 1949.*

EAGLE, JOHN E. — Associate Professor of Mathematics
Ed.D., Stanford University. 1946.*

EARNEST, SUE W. (Mrs. L. E.) — Assistant Professor of Speech Arts
Ph.D., University of Southern California. 1947.*

EELLS, KENNETH W. — Associate Professor of Psychology
A.B., Ph.D., University of Chicago. 1949.*

EMERSON, ARTHUR T. — Acting Assistant Professor of Mathematics
B.S., U. S. Naval Academy; one year graduate study at Naval War College. 1947-1948, 1949.*

ENGLANDER, HERMAN S. — Acting Instructor in Mathematics
B.S., California Institute of Technology. 1947.*

EVENSON, PATTEE E. — Associate Professor of Music
M.M., University of Michigan; specialized training at Universities of Minnesota, Rochester, and Southern California; private instruction in Paris, London and the United States. 1949.*

FELTON, JOHN R. — Assistant Professor of Economics
M.A., and one and one-half years of graduate study at the University of California. 1948.*

FERRIS, HORACE G. — Instructor in Physics
Ph.D., University of California. 1949.*

FOLSOM, HANNAH W. — Instructor in English
M. A., Wellesley College; one and one-half years of graduate study at University of California. 1947.*

FOLSOM, MARK P. — Acting Assistant Professor of Journalism
A.B., and one year graduate study at University of California at Los Angeles and the University of Arizona. 1949.*

FRIEDRICH, KURT — Assistant Professor of Education
Ed.D., Columbia Teachers College. 1949.*

GELDREICH, EDWARD W. — Assistant Professor of Psychology
M.A., 1935, University of Cincinnati; three years graduate study at the University of Chicago. 1947.*

GENERALES, MINOS D. — Associate Professor of Political Science
Degree in Law and Political Science, including six years of graduate study at the University of Athens, University of Paris Law School and Institute of International Studies. 1949.*

---

* Date of appointment.

GERMANN, LULA ---------- Senior Librarian
B.S., State Teachers College, Hays, Kansas. 1926.*

GIBSON, ERNEST DANA ---------- Associate Professor of Commerce
Ed.D., New York University. 1947.*

GJERDE, CLAYTON M. ---------- Assistant Professor of Education
M.A., and two years of graduate study at the University of Minnesota. 1948.*

GLEASON, JOHN MORTIMER ---------- Assistant Professor of Mathematics
M.A., University of California. One and a half years graduate study at University of Southern California, University of California at Los Angeles and Claremont Colleges. 1930.*

GRESS, IRVIN S. ---------- Assistant Professor of Psychology
M.Ed., University of Pittsburgh. Two years graduate study at Columbia University, Pennsylvania State College and University of Pittsburgh. 1946.*

GROSS, GEORGE C. ---------- Acting Instructor in English
A.B., San Diego State College; one year graduate study at San Diego State College and University of Southern California. 1949.*

GULICK, SIDNEY L., JR. ---------- Professor of English
Ph.D., Yale University. 1945.*

HALLEY, ROBERT ---------- Acting Instructor in Mathematics
M.A., University of California at Los Angeles. 1949.*

HAMMACK, EDITH CHASTAIN ---------- Associate Professor of Education
B.A., San Jose State College. 1911.*

HAMMACK, ISABELLA STEWART ---------- Associate Professor of Education
M.A., University of California. One-half year graduate study at University of California. 1936.*

HARCLEROAD, FRED F., JR. ---------- Director of Secondary Education and Audio-Visual Education; Associate Professor of Education
Ph.D., Stanford University. 1946.*

HARRINGTON, AWONA B. ---------- Junior Librarian
M.S., University of Southern California. 1949.*

HARRINGTON, NEIL J. ---------- Acting Instructor in Chemistry
B.S., Monmouth College; one year of graduate study at DePaul University and Northwestern University. 1948.*

HARVEY, ALBERT R. ---------- Assistant Professor of Mathematics
Ph.D., Harvard University. 1949.*

HARVEY, DOROTHY R. (Mrs. F. A.) ---------- Assistant Professor in Botany
M.A., University of Southern California. One year graduate study at University of Southern California and University of Chicago. 1924.*

HARWOOD, ROBERT DANIEL ---------- Professor of Zoology
Ph.D., Cornell University. 1928.*

HASKELL, HARRIET ---------- Assistant Professor of English
Ph.D., University of Wisconsin. 1940.*

HAVER, CLARE L. (Mrs. R.) ---------- Acting Instructor in Education
A.B., Western Washington College of Education. 1949.*

HAYNES, GERALDINE K. (Mrs. Lloyd) ---------- Senior Librarian
B.S., University of Illinois. 1931.*

HISCOX, ETHEL M. ---------- Assistant Professor of Music
M.A., New York University. Voice study with Lila Robeson and Herbert Witherspoon of New York Metropolitan Opera Co. 1947.*

HOUSEMAN, RICHARD A. ---------- Associate Professor of Education
Ed.D., Teachers College, Columbia University. 1948.*

HOUSER, LOWELL D. ---------- Associate Professor of Art
Diploma, Chicago Art Institute. Five years' special study in Mexico, Yucatan, Haiti, and New York City. 1938.*

HUNTER, JAMES J., JR. ---------- Professor of Education
Ph.D., Syracuse University. 1946.*

---

* Date of appointment.

ISENSEE, ROBERT W. .......... Assistant Professor of Chemistry
Ph.D., Oregon State College. 1948.*

JACKSON, EVERETT GEE .......... Professor of Art
Three years special study in Mexico. M.A., 1939, University of Southern California. 1930.*

JACOBSEN, HELEN M. .......... Senior Librarian
B.S., University of California. 1946.*

JOHNSON, FRANK LOUIS .......... Associate Professor of English
Ph.D., University of Wisconsin. 1939.*

JOHNSON, MYRTLE (Retired 1946) .......... Professor of Biology

JONES, KENNETH K., JR. .......... Instructor in Speech Arts
M.A., Stanford University. 1948.*

JOSEPH, LIONEL .......... Assistant Professor of Chemistry
Ph.D., Washington University. 1947.*

KALBFELL, DAVID C. .......... Assistant Professor of Physics
Ph.D., University of California. 1948.*

KAMM, MADGE E. .......... Assistant Professor of Education
M.A., Teachers College, Columbia University. 1947.*

KAPLAN, OSCAR J. .......... Associate Professor of Psychology
Ph.D., University of California. 1946.*

KASCH, FREDERICK W. .......... Assistant Professor of Physical Education
M.S., University of Illinois; one-half year of graduate study at New York University. 1948.*

KEENEY, JOSEPH SUMNER .......... Professor of English
Ph.D., University of California. 1933.*

KENNEDY, CHESTER B. .......... Associate Professor of English
Ph.D., University of California. 1937.*

KIDWELL, WILLIAM M. .. Director of Placement; Assistant Professor of Psychology
Ed.D., Stanford University. 1949.*

KITZINGER, ANGELA M. .......... Assistant Professor of Health Education
M.A., Teachers College, Columbia University. Year of additional work at Central School of Hygiene and Physical Education and at Folk High School, Ollerup, Denmark. 1945.*

KLAPP, ORRIN E. .......... Assistant Professor of Sociology
Ph.D., University of Chicago. 1948.*

LAMDEN, CHARLES W. .......... Associate Professor of Commerce
Ph.D., University of California. Certified Public Accountant. 1946.*

LAURITSEN, WILLIAM H. .......... Professor of Health Education
Ph.D., Ohio State University. 1947.*

LEBARRON, EVANGELINE O. .......... Assistant Professor of Commerce
B.A., University of Iowa. One and one-half years of graduate work at Claremont Colleges, University of Southern California, University of Minnesota and University of Hawaii. 1946-48, 1949.*

LEIB, JULIUS .......... Associate Professor of Music
Three years special study at Leipzig Conservatory. 1938.*

LEIFFER, DONALD B. .......... Professor of Political Science
Ph.D., Harvard University. 1948.*

LEMME, MAURICE M. .......... Associate Professor of Mathematics
Ph.D., Purdue University. 1948.*

LEONARD, CHARLES B. .......... Professor of History
Ph.D., University of California. 1921.*

LESLEY, LEWIS B. .......... Professor of History
Ph.D., University of California. 1924.*

---

* Date of appointment.

LINLEY, JAMES .......... Assistant Professor of Education
Ph.D., University of Southern California. 1945.*

LIVINGSTON, GEORGE R. (Retired 1949) .......... Professor of Mathematics
M.A., University of California. One year graduate study since 1922 at University of California, University of California at Los Angeles and University of Southern California. 1921.*

LOCKMAN, EVELYN .......... Assistant Professor of Physical Education
M.A., George Peabody College; one year of graduate study at the University of Wisconsin and New York University. 1948.*

LUCE, LAWRENCE W. .......... Acting Instructor in Industrial Arts
M.S., Stout Institute. 1949.*

LUCIO, WILLIAM HOWARD .......... Director of Elementary Education; Professor of Education
Ph.D., University of California. 1939.*

MADDEN, RICHARD .......... Dean of Education; Professor of Education
Ph.D., Columbia University. 1939.*

MARCHAND, ERNEST L. .......... Professor of English
Ph.D., University of Wisconsin. 1946.*

McBLAIR, WILLIAM .......... Acting Instructor in Biology
B.A., San Diego State College; one year of graduate work at the University of California. 1948.*

McCLINTIC, JOSEPH O. .......... Professor of Economics
Ph.D., University of Wisconsin. 1946.*

McCOLLOM, IVAN N. .......... Director of Summer Sessions; Professor of Psychology
Ed.D., Colorado State College of Education. 1946.*

McGAUGHEY, JANET M. (Mrs. J. R.) .......... Assistant Professor of Music
B.M., M.M., University of Michigan. 1947.*

McLONEY, WIRT L. .......... Instructor in Physical Science
M.A., Colorado State College of Education. 1949.*

MENDENHALL, MARY .......... Dean of Women; Professor of Philosophy
Ph.D., Yale University. 1939.*

MERRILL, JOHN E. .......... Assistant Professor of History
A.M., Harvard University. Two years graduate study at Stanford University. 1946.*

MERZBACHER, CLAUDE FELL .......... Instructor in Chemistry
M.A., Claremont Graduate School. Licensed Professional Chemical Engineer. 1947.*

MESSIER, LEONARD N. .......... Assistant Professor of French
Ph.D., University of California. 1946.*

MILLER, DOROTHY A. .......... Acting Instructor in Chemistry
M.S., State University of Iowa. 1947.*

MILNE, DAVID S. .......... Associate Professor of Sociology
Ph.D., University of Chicago. 1946.*

MOE, CHESNEY R. .......... Professor of Physics
Ph.D., University of Southern California. 1931.*

MOLITOR, VINNIE CLARK (Retired 1938) .......... Associate Professor of Geography

MOORE, EDWENA B. (Mrs. E. J.) .......... Instructor in Education
B.A., San Diego State College; one year graduate study at Claremont Colleges. 1947.*

MORGAN, CHARLES .......... Instructor in Engineering
M.S., University of California. 1949.*

MYERS, MABEL A. .......... Associate Professor of Biology
Ph.D., Cornell University. 1946.*

NASATIR, ABRAHAM PHINEAS .......... Professor of History
Ph.D., University of California. 1928.*

---

* Date of appointment.

NICHOLS, AMBROSE R., JR. — Associate Professor of Chemistry
Ph.D., University of Wisconsin. 1939.*

NIEBAUER, RUBY R. — Assistant Professor of Education
M.S., University of Wisconsin. 1949.*

NORLAND, CALVERT E. — Instructor in Biology
M.S., University of California. One and one-half years graduate study at University of California; one and one-half years graduate study at Claremont Colleges. 1947.*

OLSON, ANDREW C., JR. — Assistant Professor of Biology
M.S., University of Idaho. One year graduate study at University of California. 1946.*

OSBORN, CLARENCE G. — Professor of History and Political Science
Ph.D., Stanford University. 1928,1929, 1937.*

PEASE, GLENN R. — Acting Assistant Professor of Psychology
Ph.D., State University of Iowa. 1947.*

PEIFFER, HERBERT C., JR. — Dean of Students; Professor of Psychology and Guidance
Ph.D., Stanford University. 1937.*

PEREZ, ROSE MARIE — Junior Librarian
M.A., University of Chicago. 1948.*

PERRY, FAY V. (Mrs. J. M.) — Director of Guidance for Provisional Students; Professor of Sociology
Ed.D., University of Southern California. 1936.*

PETERSON, CHARLES E. — Dean of Men; Professor of Physical Education
M.A., Claremont Colleges. 1921.*

PFAFF, PAUL LEWIS — Associate Professor of Speech Arts
M.A., University of Southern California. Two years study at University of Southern California. 1931.*

PHILLIPS, GEORGE L. — Assistant Professor of English
Ph.D., Boston University. 1947.*

PHILLIPS, WALTER THOMAS — Professor of Spanish
Ph.D., University of Southern California. 1927.*

POST, LAUREN CHESTER — Professor of Geography
Ph.D., University of California. 1937.*

POVENMIRE, E. KINGSLEY — Associate Professor of Speech Arts
M.F.A., Yale University. 1946.*

PRESTON, DUDLEY A. — Assistant Professor of Biology
Ph.D., University of Minnesota. 1948.*

RAGEN, KATHERINE M. — Assistant Professor of History
Ph.D., University of Wisconsin. 1947.*

RENSHAW, MORTON J. — Coordinator, Personnel Services Center; Assistant Professor of Psychology
Ph.D., Stanford University. 1948.*

RICHARDSON, M. BRUCE — Lecturer in Engineering
A.B., Aeronautical Engineer, Stanford University. Registered Mechanical Engineer. 1948.*

RICHARDSON, ROBERT W. — Professor of Geography
Ph.D., University of California. 1939-1942, 1948.*

ROBERTS, ELLIS E. — Instructor in Physical Science
Ph.D., Stanford University. 1949.*

ROBINSON, DUDLEY HUGH — Professor of Chemistry
Ph.D., University of Southern California. Registered Chemical Engineer. 1928.*

ROBINSON, EVELYN L. — Assistant Professor of Physical Education
M.S., University of Southern California. 1946.*

ROGERS, SPENCER LEE — Professor of Anthropology
Ph.D., University of Southern California. 1930.*

---

* Date of appointment.

ROHFLEISCH, KRAMER J. .......... Associate Professor of History
Ph.D., University of California. 1947.*

ROWE, ROBERT D. .......... Professor of Chemistry
Ph.D., Stanford University. 1946.*

RUJA, HARRY .......... Assistant Professor of Philosophy and Psychology
Ph.D., Princeton University; one year post doctoral study at University of California at Los Angeles. 1947.*

RUOCCO, ILSE H. (Mrs. L.) .......... Associate Professor of Art
M.A., Columbia University. 1934.*

RYAN, FREDERICK L. .......... Professor of Economics
Ph.D., University of California. 1946.*

SCHEVILL, KARL E. .......... Instructor in Spanish
Ph.D., University of California. 1949.*

SCHEY, OLE .......... Acting Assistant Professor of Mathematics
M.A., and two years of graduate study at the University of Minnesota and the University of California at Los Angeles. 1947.*

SCHRUPP, MANFRED H. .......... Assistant Professor of Education
M.Ed., and one and one-half years of graduate study at the University of Minnesota. 1948.*

SCHUNERT, JIM R. .......... Assistant Professor of Education
M.A., and one year of graduate study at the University of Minnesota. 1948.*

SCHUTTE, WILLIAM H. .......... Assistant Professor of Physical Education
M.S., University of Southern California. 1947.*

SCHWARTZ, EVA H. (Mrs. H.) .......... Acting Instructor in Chemistry
M.S., and one and one-half years graduate study at University of California. 1946.*

SCHWOB, MARION LYON (Mrs. W. E.) .......... Associate Professor of Physical Education
M.S., University of Southern California. 1934.*

SCOTT, FRANK L. .......... Assistant Professor of Physical Education
M.A., University of Michigan. 1947.*

SELLMAN, HUNTON D. .......... Professor of Speech Arts
M.S., University of Arizona. Three and one-half years graduate study at University of California, University of North Carolina and Yale University. 1946.*

SHANNON, FLORENCE S. (Mrs. E. L.) .......... Assistant Professor of Physical Education
M.S., University of Southern California. 1933.*

SHELAR, EUGENE .......... Assistant Professor of Biology
Ph.D., Cornell University. 1949.*

SHIELDS, ALLAN E. .......... Assistant Professor of Philosophy
M.A., and one year additional graduate study at University of Southern California. 1949.*

SHIELDS, KARENA P. .......... Acting Assistant Professor of English
A.B. and one year of graduate study at the University of Southern California. 1948.*

SHOUSE, CLAUDE F. .......... Assistant Professor of English
M.A., University of Kentucky; one and one-half years graduate study at University of Pittsburgh and University of Southern California. 1946.*

SHUTTS, WILLIAM H. .......... Assistant Professor of Engineering
M.S., University of Colorado. 1949.*

SILVERNAIL, CHESTER J. .......... Instructor in Astronomy
M.A., Claremont Graduate School. 1949.*

SJOSTRAND, THOR H. .......... Instructor in Engineering
M.S., Stanford University. 1947-48, 1949.*

SKILLING, W. T. (Retired 1936) .......... Professor of Astronomy

SMART, KEITH L. .......... Instructor in Biology
M.A., University of California. 1949.*

---

* Date of appointment.

SMITH, CHARLES ROBERTS..........Assistant Professor of Physical Education
M.S., University of Southern California. 1933.*

SMITH, CLIFFORD EDWARD..........Professor of Astronomy
Ph.D., University of California. 1937.*

SMITH, DEANE FRANKLIN..........Associate Professor of Music
M.Mus., Northwestern University. 1939.*

SMITH, LEILA DEBORAH (Retired 1948)..........Professor of Music
M.A., Columbia University. One-half year study at Stanford University and Northwestern University. 1922.*

SMITH, LOUIS E., JR...........Associate Professor of Physics
Ph.D., University of Washington. 1946.*

SORENSON, GEORGE N...........Associate Professor of Art
M.A., University of Southern California. 1946.*

SPANGLER, JOHN A...........Assistant Professor of Chemistry
Ph.D., West Virginia University. 1946.*

SPORTSMAN, CHARLES C...........Assistant Professor of Physical Education
M.S., University of Southern California. 1947.*

SPRINGSTON, CHRISTINE..........Associate Professor of Music
M.A., University of Washington. Diplomée d'execution, Conservatorie Americain, Fontainebleau, France. 1930.*

STEINMETZ, HARRY CHARLES..........Associate Professor of Psychology
Ph.D., Purdue University. 1930.*

STONE, HAMILTON L...........Assistant Professor of Engineering
B.S., U. S. Naval Academy. Two and one-half years of graduate study. Registered Mechanical Engineer. 1947.*

STONE, JOHN PAUL..........Head Librarian ; Professor of Library Science
Ph.D., University of Chicago. 1930.*

STORM, ALVENA (Mrs. Eugene)..........Associate Professor of Geography
A.M., University of California. 1926.*

STOUGH, MORROW F...........Assistant Professor of Education
Ph.D., University of California. 1950.*

STOVALL, HARRIET B. (Mrs. S. L.)..........Senior Librarian
Graduate, Berkshire Athenaeum, Massachusetts. 1925.*

STRAUB, LURA LYNN..........Assistant Professor of Commerce
M.C.S., Indiana University. 1948.*

STRAUSS, WILLIAM L...........Acting Assistant Professor of History
Ph.D., Harvard University. 1949.*

SUTTON, JOSEPHINE M...........Junior Librarian
A.B., University of Oklahoma. 1947.*

SWIGGETT, JEAN D...........Associate Professor of Art
M.F.A., University of Southern California. 1946.*

TALBOY, RUTH A...........Assistant Professor of Home Arts
M.A., Stanford University. 1947.*

TANNER, JESSIE R. (Retired 1936)..........Associate Professor of Physical Education and Director of Physical Education for Women
B.S. and Bachelor's Teaching Diploma. Teachers College, Columbia University. Graduate study at University of California and University of Southern California. 1904.*

TAYLOR, KENNETH M...........Assistant Professor of Biology
Ph.D., University of California at Los Angeles. 1949.*

TAYLOR, MERRELL A...........Assistant Professor of Biology
M.A., University of Michigan. 1946.*

TERHUNE, JOHN A...........Lecturer in Physics
M.S., Harvard University. 1946.*

---

* Date of appointment.

TERRY, WILLIAM L. .......... Lecturer in Physical Education
M.S., Indiana University; two years of additional study at University of Kentucky and University of Illinois. 1946.*

THEOBALD, JOHN R. .......... Professor of English
Ph.D., University of Iowa. 1946.*

TIDWELL, JAMES N. .......... Associate Professor of English
Ph.D., Ohio State University. 1947.*

TOLLEFSEN, DOROTHY J. .......... Assistant Professor of Physical Education
M.A., University of California. 1946.*

TORBERT, FRANCES B. (Mrs. H.) .......... Associate Professor of Commerce
M.A., University of Southern California. One year graduate work at Stanford University. 1937.*

TRAIL, MABEL COY .......... Associate Professor of English
Ph.D., University of Southern California. 1935.*

TUCKER, GORDON H. .......... Professor of Biology
Ph.D., University of North Carolina. 1945.*

VAN CLEAVE, MAURICE .......... Lecturer in Commerce
B.S., U. S. Naval Academy; one year graduate study at U. S. Naval War College. Public Accountant. 1948.*

VOEKS, VIRGINIA W. .......... Assistant Professor of Psychology
Ph.D., Yale University. 1949.*

WALBA, HAROLD .......... Instructor in Chemistry
Ph.D., University of California. 1949.*

WALKER, DONALD E. .......... Instructor in Sociology
M.Th., University of Southern California; one and one-half years graduate study at Stanford University. 1949.*

WALKER, HILDE KRAMER (Mrs.) .......... Assistant Professor of German
M.A., Northwestern University. 1931.*

WALLING, CURTIS R. .......... Associate Professor of Engineering
E.E., Stanford University; one and one-half years of graduate study at Stanford University and the University of Southern California. Registered Electrical Engineer. 1931.*

WATENPAUGH, FRANK M. .......... Associate Professor of Commerce
M.A., University of Southern California. Two years graduate study at University of Southern California and University of Oregon. Public Accountant. 1935.*

WATSON, DONALD R. .......... Dean of Arts and Sciences
Ed.D., University of Southern California. 1939.* Professor of Physical Science

WEBB, CHARLES R., JR. .......... Assistant Professor of History
Ph.D., Harvard University. 1949.*

WEST, EDNA A. .......... Assistant Professor of Commerce
M.A., Claremont Colleges. 1948.*

WHITE, ALFRED E. .......... Registrar; Director of Educational Research;
Ed.D., Stanford University. 1946.* Associate Professor of Guidance

WILKERSON, DYXIE C. (Mrs. D.) .......... Instructor in English
M.A., Oklahoma Agricultural and Mechanical College; one year of graduate study at the University of Southern California. 1946-48, 1949.*

WOLF, ERNEST M. .......... Instructor in Foreign Languages
Ph.D., University of Bonn. 1947.*

WRIGHT, WILLIAM H. .......... Professor of Commerce
Ph.D., University of Southern California. Public Accountant. 1921.*

ZIEGENFUSS, GEORGE .......... Assistant Professor of Physical Education
M.A., and one year of graduate study at Teachers College, Columbia. 1948.*

---

* Date of appointment.

## ASSISTANT INSTRUCTORS

| | |
|---|---|
| BURKHARDT, FREDERIC S.<br>A.B., Dartmouth College. | Assistant in Education |
| BYRNE, CHARLES T.<br>A.B., San Diego State College. | Assistant in Journalism |
| CRAWFORD, RONALD M.<br>A.B., San Diego State College. | Assistant in Biology |
| GRASTY, GEORGE M.<br>A.B., University of Texas. | Assistant in Biology |
| HARVEY, HARRY T.<br>A.B., San Diego State College. | Assistant in Biology |
| HAYDEN, BERNARR F.<br>A.B., San Diego State College. | Assistant in Education |

| KING, ROBERT E.<br>A.B., San Diego State College. | Assistant in Psychology |
| McCLINTON, JOSEPH R.<br>A.B., San Diego State College. | Assistant in Biology |
| NEAL, RICHARD W.<br>A.B., San Diego State College. | Assistant in Biology |
| RUTLEDGE, CLYDE K.<br>A.B., San Diego State College. | Assistant in Physics |
| UPDEGRAFF, WILLIAM D., JR.<br>A.B., San Diego State College. | Assistant in Biology |
| VULLIET, WILLIAM G.<br>B.S., San Diego State College. | Assistant in Physics |

## LECTURERS

| | |
|---|---|
| BLAKE, DEAN<br>Meteorologist, U. S. Weather Bureau. 1927.* | Lecturer in Meteorology |
| BURGERT, ROBERT H.<br>San Diego City Schools. 1948.* | Lecturer in Education |
| CONSIDINE, CHARLES R.<br>Industrial Engineer ; Public Accountant. 1946.* | Lecturer in Commerce |
| DE JULIEN, LORENZ F.<br>Self employed. 1949.* | Lecturer in Commerce |
| ENGLER, CARL H.<br>M.D., University of Southern California. 1949.* | Lecturer in Health |
| GELCHER, JOSEPH<br>Insurance underwriter. 1946.* | Lecturer in Commerce |
| GOODWIN, JOHN H.<br>Insurance broker. 1947.* | Lecturer in Commerce |
| GRECO, ANTHONY<br>Self employed. 1950.* | Lecturer in Physical Education |
| HARBERT, SELMA C.<br>M.A., Stanford University. 1950.* | Lecturer in Speech Arts |
| HUFF, GEORGE D., M.D.<br>Practicing physician. 1939.* | Lecturer in Health and Hygiene |
| HUNTINGTON, LUCILE H. (Mrs.)<br>Self employed. 1949.* | Lecturer in Commerce |

---

* Date of appointment.

KARPINSKI, CHARLES E. ---------- Lecturer in Commerce
Attorney at Law. 1949.*

KOEPPE, CLARENCE E., DR. ---------- Lecturer in Geography
Ph.D., Clark University. 1948.*

KRUSE, PAUL J. ---------- Lecturer in Education
Ph.D., Columbia University.

LINDSLEY, BYRON F. ---------- Lecturer in Commerce
Attorney at law. 1947.*

McLEES, BERTRAM ---------- Lecturer in Commerce
Deputy District Attorney. 1946.*

PANOSH, ANNA M. (Mrs. L. C.) ---------- Lecturer in Spanish
A.B., University of Denver. One year graduate study at University of Mexico, Centro de Estudios Historicos and University of California. 1946.*

SAND, MARGARET C. ---------- Lecturer in Psychology
Ph.D., Columbia University. 1950.*

SARKISIAN, SARKIS S., M.D. ---------- Lecturer in Biology
Practicing physician. 1949.*

SLOBIN, HERMON L. ---------- Lecturer in Mathematics
Ph.D., Clark University. 1949.*

SNODGRASS, HERMAN G. ---------- Lecturer in Political Science
Civil Service Training Officer, U. S. Naval Air Station. 1948.*

STANIFORTH, ROBERT O. ---------- Lecturer in Commerce
Swing & Scharnikow, Attorneys. 1948.*

STEINBERG, WILLIAM ---------- Lecturer in Education
San Diego City Schools. 1949.*

SYLVESTER, HELEN K. ---------- Lecturer in Education
Principal, Euclid School. A.B., San Diego State College.

TROGE, RALPH F. ---------- Lecturer in Education
Principal, Woodrow Wilson Junior High School. Ed.D., University of Oregon.

VAN CLEAVE, MAURICE ---------- Lecturer in Commerce
B.S., U. S. Naval Academy. 1948.*

WILEY, JOAN G. (Mrs. J. N.) ---------- Lecturer in Psychology and Sociology
M.S.S., University of Buffalo. 1947.*

## MEDICAL STAFF

Carl H. Engler, M.D. ---------- Medical Examiner
O. S. Harbough, M.D. ---------- Medical Examiner
James R. Phalen, M.D. ---------- Medical Examiner
Frances E. White, M.D. ---------- Medical Examiner
Marilyn M. Fenwick, P.H.N. ---------- Nurse

## ADMINISTRATIVE OFFICE STAFF

Louise Anne Board ---------- Secretary, Instruction
Beatrice Bragstad, A.B. ---------- Secretary, Dean of Men
Constance Branham ---------- Secretary, Physical Education Division
Anne T. Brown ---------- Admissions Secretary
Natalie R. Camerlynck ---------- Junior Typist-Clerk, Education Office
Detty June Conyers, A.B. ---------- Assistant Secretary, Office of the President
Evadne Deardorf ---------- Assistant Registrar
Gertrude K. Dickinson ---------- Bookkeeper, Grade II, Business Office
Carey D. Folger ---------- Senior Account Clerk, Business Office
Berkeley Freeman ---------- Assistant Secretary, Personnel Services
Dolores Grote ---------- Secretary, Social Sciences Division
Genevieve M. Hamblen ---------- Secretary, Personnel Services
Mary Elizabeth Harrison ---------- Book Repair Clerk, Library

---

* Date of appointment.

| | |
|---|---|
| Frances F. Hemenway | Intermediate Stenographer-Clerk, Library |
| Georgia Hochstetler | Secretary, Campus Laboratory School |
| Phyllis Jean Hord | Junior Typist-Clerk, Library |
| Persis T. Hurlbut | Secretary, Audio-Visual Services |
| Irene Janeck, A.B. | Secretary, Physical Science Division |
| Mary L. Kaser, A.B. | Secretary, Secondary Education Office |
| Constance King, B.S. | Secretary, Dean of Women |
| Fay Landweer, A.B. | Secretary, Summer Sessions Office |
| Mildred H. LeCompte | Secretary to the Librarian |
| Ruth E. Little, A.B. | Mimeograph Office |
| Dorothy Livengood | Secretary, Life Sciences Division |
| Jacqueline Mackie | Intermediate Stenographer-Clerk, Business Office |
| Joan Marie Mariner | Junior Typist-Clerk, Library |
| Jean F. McGhee, B.S. | Secretary, Evaluations for Teaching Credentials |
| Mirian E. Moore, A.B. | Secretary, Dean of Arts and Sciences |
| Hester Newman | Assistant Secretary, Placement Office |
| Donald G. Parker | Accounting Office, Grade II, Business Office |
| Marion L. Parker, M.A. | Statistician |
| Helen M. Perry | Registrar's Office |
| Edith E. Peterson | Junior Typist-Clerk, Library |
| Katherine Pyle, A.B. | Secretary, Veterans Office |
| Marjorie Rand | Intermediate Stenographer-Clerk, Business Office |
| Charlene M. Robbins, A.B. | Registrar's Office |
| Doris K. Roger, A.B. | Intermediate Stenographer-Clerk, Business Office |

# CALENDAR 1951-1952

## SUMMER SESSIONS, 1951

Term A (6 weeks) June 18–July 27
Term B (9 weeks) June 18–August 17
Term C (3 weeks) July 30–August 17

## FALL SEMESTER, 1951-1952

| | |
|---|---|
| July 14 | Qualifying examinations for all entering students. (8.15 a.m. to 12.30 p.m.) |
| August 1 | Applications for admission must be filed on or before this date. |
| August 20 | Qualifying examinations for all entering students. (8.15 a.m. to 12.30 p.m.) |
| September 4-7 | Orientation program. Attendance required of all new students. |
| September 5 | Fundamentals test and General Culture test for Teacher Education. (Fundamentals test, 8.30 a.m. to 12 m.) (General Culture test, 1 p.m. to 4.30 p.m.) |
| September 10 | Admission Day holiday. |
| September 11-12 | Registration and payment of fees. |
| September 13 | Instruction begins. Late registration fee becomes effective. |
| September 18 | Applications for admission to Teacher Education. Little Theater, 11 a.m. |
| September 24 | Last date for late registration. |
| September 24-25 | File registration books. |
| November 2 | Last date for withdrawal from classes. |
| November 12 | Armistice Day holiday. |
| November 22-24 | Thanksgiving recess. |
| December 7 | Last date for filing applications for mid-year graduation. |
| December 15 | Last day before Christmas recess begins. |
| January 2 | Classwork resumes. |
| January 17-24 | Semester examinations. |
| January 24 | First semester ends. |

## SPRING SEMESTER, 1951-1952

| | |
|---|---|
| anuary 2 | Applications for admission must be filed on or before this date. |
| anuary 12 | Qualifying examinations for all entering students. |
| anuary 28 | Fundamentals test and General Culture test for Teacher Education. (Fundamentals test, 8.30 a.m. to 12 m.) (General Culture test, 1 p.m. to 4.30 p.m.) |
| anuary 29-30 | Orientation program. Attendance required of all new students. |
| anuary 31-February 1 | Registration and payment of fees. |
| February 4 | Instruction begins. Late registration fee becomes effective. |
| February 5 | Applications for admission to Teacher Education. Little Theater, 11 a.m. |

| | |
|---|---|
| February 11 | Last date for late registration. |
| February 12 | Lincoln's Birthday holiday. |
| February 13-14 | File registration books. |
| February 22 | Washington's Birthday holiday. |
| March 28 | Last date for withdrawal from classes. |
| April 7-12 | Spring recess. |
| May 28-June 5 | Semester examinations. |
| May 30 | Memorial Day holiday. |
| June 5 | Second semester ends. |
| June 6 | Commencement. |

## SUMMER SESSION, 1952

Dates to be announced.

# FEES AND EXPENSES

## PROBABLE EXPENSES FOR ONE SEMESTER

An estimate of the expense of attendance for one semester is given below. No estimate is made as to the cost of clothing, or other personal items, since these figures vary with the demands of the individual.

### A Partial Estimate of Expenses
One Semester

| | *Minimum* | *Maximum* |
|---|---|---|
| Fees | $24.00 | $31.50 |
| Books | 18.00 | 30.00 |
| Board and room | 275.00 | ---- |
| Transportation, lunches, incidentals | 20.00 | 60.00 |
| Miscellaneous | 5.00 | |

Before enrolling in college, the student should possess sufficient resources to meet the minimum expenses for one semester. A limited amount of clerical work in offices and in the library may be offered from time to time but ordinarily it is not sufficiently remunerative to reduce expenses materially.

### Enrollment Fees Payable at Time of Registration

| | |
|---|---|
| Regular students (carrying more than 6 units): | |
| Auditors pay same fees as students carrying courses for credit. | |
| Tuition | $6.50 |
| Materials and service | 7.50 |
| Total | $14.00 |
| Limited students (carrying 6 units or less): | |
| Auditors pay same fees as students carrying courses for credit. | |
| Tuition (one, two, or three units) | $5.25 |
| Materials and service | 2.25 |
| Total | $7.50 |
| Tuition (four, five, or six units) | $6.50 |
| Materials and service | 7.50 |
| Total | $14.00 |
| Student activity fee (not a state fee): | |
| Regular students | $10.00 |
| Limited students | 2.00 |
| Associated Students Group Accident Insurance | |
| Men | 3.50 |
| Women | 2.50 |

### Miscellaneous Fees
(Fees payable when service is rendered)

| | |
|---|---|
| Change of program | $1.00 |
| Failure to meet administratively required appointment or time limit | 2.00 |
| Evaluation of records for nonmatriculated students | 2.00 |
| Late registration | 2.00 |
| Transcript of record (first copy free) | 1.00 |
| R. O. T. C. deposit (unexpended portion is refundable) | 10.00 |

### Graduation Fees

| | |
|---|---|
| State teaching credentials (each credential) | $4.00 |
| Diploma | 1.00 |

The credential fee is collected through the college by cashier's check or post office money order made payable to the State Department of Education.

### Summer Session Fees

| | | |
|---|---|---|
| Tuition, each session | (Per unit) | $7.50 |
| Activity fee (not a state fee) | | 2.00 |

# THE COLLEGE

## FUNCTIONS OF THE STATE COLLEGES

The state colleges have three major functions, namely: (1) To help the individual student to develop a well-rounded and adjusted personality; (2) to promote in all students civic intelligence and competence; and (3) to create supplies of trained men and women to serve as teachers and officials in the elementary and secondary schools, to fill places of leadership in business and industry, and to transfer to graduate institutions to equip themselves to extend the frontiers of knowledge and to occupy the positions of leadership in various professions. In terms of publicly supported higher education, the state colleges and the university together make provision for the realization of all the essential objectives of higher education in our State.

To achieve their unique purposes the state colleges have developed and are improving offerings as follows:

1. Teacher education curricula for those students who plan to teach, supervise, or administer in the elementary school, the junior high school, and in secondary schools.
2. Preprofessional curricula.
3. Four-year curricula in such fields as business, industry, governmental services, homemaking, and social service.
4. General education for students who take work which leads toward the bachelor's degree or to the higher professions through graduate work.
5. Guidance services to assist the individual student to plan his educational program and to make his college and life adjustments.
6. Extension courses in appropriate fields.

The democratic controls exercised over the state colleges make them readily and effectively responsive to individual and community needs and encourage them continuously to make significant improvements in both curriculum and personal services. The state colleges are thus laboratories in which the facts and theories developed in research, in community living, and in daily association with students are reflected in an instructional program designed to provide educational services inherent in the principle of equality of opportunity.

## LOCATION AND ENVIRONMENT

Renowned as a winter resort with a mild but invigorating climate, San Diego has become equally famous for its cool summers. High cultural standards in art, music, literature, and science create a stimulating environment for a college. Many of these advantages are to be found in the heritage resulting from the expositions of 1915-16 and 1935-36, including the buildings themselves, which portray the best types of Spanish colonial art and architecture. Housed in these buildings are the Fine Arts Gallery, exhibits in anthropology, natural history, and American archaeology, which are in many respects unsurpassed. The outdoor organ, the Ford Bowl, and the horticultural gardens make Balboa Park, in which all these facilities are located, world renowned. The Scripps Institution of Oceanography, operated by the University of California at La Jolla, gives opportunity for important cooperation in the biological sciences.

## BUILDINGS AND EQUIPMENT

On February 1, 1931, the college was moved to the new campus, located one mile north of the city's principal east-west boulevard, El Cajon Boulevard. The buildings are of Spanish-Moorish architecture which is well suited to the landscape and climate of this region. They include the Academic Building (which houses lecture halls, classrooms and administrative offices); the Science Building; the Fine Arts Building; the Library; the Little Theater; the Music Building; the Campus Elementary School; Scripps Cottage (a social clubhouse for women students); the Cafe and Book Store; and the Physical Education Building (a structure with adequate facilities for both men and women). The gymnasium contains a very fine basketball floor with stands that will accommodate 1,500 spectators. A fine concrete stadium, constructed in a natural site, has a seating capacity that is adequate for present needs. The open air theater, seating 4,200 persons, serves as a meeting place for large groups.

## FACILITIES FOR THE EDUCATION OF TEACHERS

The college maintains a modern elementary school on the campus where it has developed an extensive program for the education of elementary school teachers. The classroom-laboratory plan which calls for the use of work-rooms, the library, and shops affords unusual opportunities for the induction of students into teaching. By arrangement with the San Diego city and county schools, directed teaching is provided in the elementary and secondary schools.

## THE FACULTY

The faculty of 254 members has received advanced training in some 124 colleges and universities of the United States or foreign countries. The professional education of the faculty places the college at the 97 percentile position among teacher education institutions in the Nation. For listings and further details, see the Directory.

## THE LIBRARY

The library facilities of this college are noteworthy for an institution of its size. The library consists of well over 120,000 books and receives more than 900 different periodicals selected to meet the requirements of a modern educational institution. Professionally trained librarians are available to render assistance to students and faculty in their reading and reference work.

The Campus Elementary School Library, representing a collection of 15,000 volumes, possesses equipment and building facilities that are unique.

## ACCREDITATION

San Diego State College is a member of the Northwest Association of Secondary and Higher Schools, the American Association of Colleges for Teacher Education, and the Western College Association.

## LIVING ACCOMMODATIONS

Living arrangements for students whose homes are not in San Diego or within commuting distance are made through the offices of the Dean of Women or the Dean of Men. Women students are urged to live in the residence hall adjoining the campus. Careful consideration is given to study conditions, healthful living, and adequate social opportunities. Room and board may be secured for approximately $275 per semester, payable in four installments. Opportunities to reduce this figure by working a few hours each week are occasionally available. Reservations should be made in advance through the Manager of Quetzal Hall, 5192 College Avenue, San Diego 15, California. Single women students under the age of 21 who find other accommodations more desirable must file with the Dean of Women a statement from the parent or guardian.

## VETERANS' EDUCATION AND HOUSING

The college has been approved by various accrediting agencies to offer courses for veterans leading to the baccalaureate in some 23 major fields and to the master's degree and various teaching credentials. In connection with the Personnel Services Center, a veterans' office is maintained on the campus to facilitate registration, aid in the establishment of benefits, afford special counseling services, and serve as an information center.

Through the City of San Diego, 400 family units formerly under the jurisdiction of the Federal Public Housing Authority have been made available to the college for the housing of its married veterans. These units are located some eight miles from the campus proper at Aztec Terrace, midway between Old Town and Loma Portal. Applications for housing at Aztec Terrace are made through the office of the Dean of Men.

## STUDENT LIFE

A rich field of extracurricular activities is available to the student throughout his college life. The student is urged to select these activities carefully in order that he may profit by such extra-class experiences without lowering his standards of scholarship. The *Student Handbook*, available at the time of registration, gives information concerning activities which include organizations in every department of the college, and opportunities for individual and group experience in the social, athletic, fraternal, religious and governmental life of the campus.

## STUDENT HEALTH SERVICE

The Health Department is maintained for the protection and care of student health. A complete physical examination is required of each student upon admission to college. Careful attention is given to cases undergoing remedial treatment or to cases in which a modification of study load or amount of participation in physical activities seem advisable.

A college physician and school nurse are available for consultation and emergency treatment. Students who have been absent over three days because of illness should receive clearance from the Health Office before returning to classes.

A group plan for accident insurance is in operation for students who desire to participate.

## PERSONNEL SERVICES CENTER

The college offers the services of a trained staff to students who wish help in the solution of problems which are personal, social, academic, or occupational in nature. It is a program designed to help students gain the greatest possible advantage of their college experience. Agencies and facilities cooperating in the effort to assist students include the student health service, reading and study laboratory, the speech improvement program, mathematics clinic, the placement and occupational guidance service, and a staff of personal counselors. Students who wish to take advantage of these facilities may do so through the Personnel Services Center.

## PLACEMENT OFFICE

The Placement Office provides a central source of information on placement opportunities and vocational trends. The staff assists undergraduates in finding part time employment. Full time employment for graduates or former students is facilitated through contacts with schools, businesses, and industries in this locality.

## SCHOLARSHIPS

A number of scholarships for both men and women has been made available through the efforts of the alumni, civic organizations, student organizations, business and professional groups and individuals, and other friends of the college. Superiority in ability and achievement, strength of character, and worthiness from the point of view of need are the standards upon which selection is based. Scholarship aid is limited for the most part to students who have completed at least one semester at the San Diego State College. Except for athletics grants-in-aid, which are initiated through the Director of Athletics, scholarship applications are made through the office of the Dean of Women.

Unless otherwise stipulated, all scholarship awards are determined and announced by the faculty Committee on Loans and Scholarships in October of the college year. Applications for scholarships for the fall semester must be filed with the office of the Dean of Women prior to October 15th. The scholarships available for 1951-52:

**ALPHA GAMMA DELTA.** This sorority presents a $50 award each year to the student in the sorority with the highest grade point average.

**ALTRUSA CLUB.** Two scholarships of $50 each are made available annually by the Altrusa Club of San Diego. Applications are considered from women students enrolled in San Diego State College who are worthy and in need.

**AMERICAN ASSOCIATION OF UNIVERSITY WOMEN.** One scholarship of $100 is given each year in June to a graduating senior who will begin work in an accredited college or university toward a higher degree or credential. The scholarship is made available by the San Diego Branch of the American Association of University Women. Interviews with representatives of that organization are required.

**AMERICAN SOCIETY OF CIVIL ENGINEERS, SAN DIEGO SECTION.** A scholarship of $75 is awarded annually through the San Diego Section of the American Society of Civil Engineers to the engineering student selected for the scholarship on a basis of character, ability, personal qualities, and financial need. Nominations are made by the Engineering Department of the College. At least sophomore status is required for nomination.

**ANONYMOUS (B).** A scholarship of $100 is given each year to be divided among students in financial need, at the discretion of the Committee on Loans and Scholarships. The committee gives consideration to scholastic attainment, financial need, and character.

**ANONYMOUS (E).** A $50 scholarship, awarded each semester through the Committee on Loans and Scholarships, is made available by a public spirited citizen who prefers to assist a student majoring in science.

**ASSOCIATED ARTS OF SAN DIEGO.** A $150 scholarship for a period of two years to a student outstanding in the Speech Arts Department.

**ASSOCIATION OF CHILD EDUCATION.** The Association of Child Education makes available each year a $50 scholarship to a student in the Kindergarten-Primary program. The award is customarily made to an upper division student showing promise in a particular field who is in need financially.

**BARNES CHASE COMPANY BASEBALL SCHOLARSHIP.** Donated by Mr. and Mrs. Norman R. Barnes. Twenty-five dollars a month for 10 months, from September through June. Applicant must be officially enrolled in the college as a regular student in good standing; must maintain a satisfactory scholastic record and be progressing toward an academic objective; must be a member of the freshman or varsity baseball team; and be of sound moral character. The selection of the recipient will be recommended by the baseball coach and approved by the athletic department with the final approval of the Committee on Loans and Scholarships.

**BARNES CHASE COMPANY BASKETBALL SCHOLARSHIP.** (Same as above except for basketball player.)

**BLUE KEY.** One scholarship of $50 is awarded annually to an entering freshman male student who has an outstanding record of achievement in high school activities, provided he fulfills all requirements each year. A like amount will be given each year for a period of four years.

**CABRILLO CIVIC CLUBS.** A scholarship of $250 a year will be awarded a student of Portuguese descent and may be made available in his senior year of high school. The recipient must have good scholastic standing and be in need of financial assistance. An autobiography must accompany the application.

**CAP AND GOWN.** One $50 scholarship is awarded annually to an upper division woman student who has attended San Diego State College for at least one semester and who has maintained at least a "B" average in scholarship for her entire college career. Applications may be secured from the Office of the Dean of Women or the San Diego State College chapter of Cap and Gown.

**CHAMBER OF COMMERCE MUSIC SCHOLARSHIPS.** Several scholarships of $30 per semester have been made available by the San Diego Chamber of Commerce to players of the following instruments in the college band: Solo cornet, solo clarinet, first French horn, first trombone, first baritone, first Sousaphone, and first drum. Applications are filed directly with the Music Department.

**CHIANELLI, FRANK.** A $50 scholarship is donated by Sons of Columbus in memory of the founder of this organization in California. The student must be of Italian descent, of good moral character, in need of financial assistance, and have a high scholastic rating.

**CHI OMEGA FRATERNITY** awards annually a $20.00 scholarship to a student outstanding in Sociology Department.

**DAUGHTERS OF THE AMERICAN REVOLUTION.** Two scholarships of $25 each are presented each spring, one to a young man and the other to a young woman outstanding in citizenship and Americanism. Applicants should have at least a "B" average in scholarship, should be able to demonstrate need for financial assistance, and should have junior standing in the college when selected. The selection is made by the faculty Committee on Loans and Scholarships and presentation of awards is made at a luncheon on Flag Day, which is given by the Daughters of the American Revolution.

**DEBATE SCHOLARSHIP.** $50 will be awarded a winner in the debate events at the June National Forensic League competition. This award will be given to a student who enrolls at San Diego State College with a major in speech. The award is made possible by the generosity of Admiral Elliott Senn who has donoted $1,500 to the San Diego State College Foundation to be used for Speech Department scholarships.

**DEBATE SCHOLARSHIP.** $50 will be given to a student enrolled at San Diego State College who is outstanding in debate. Selection will be made by the Speech Arts Department with final approval by the Committee on Loans and Scholarships.

**DELTA DELTA DELTA NATIONAL FRATERNITY ALLIANCE.** $100 a year will be given for five years in memory of Georgia Aiman Shattuck. This scholarship is to be awarded to a woman student, in the upper division, who has been admitted to the teacher education curriculum, with a "B" average in all college work, and who is in financial need. Applications should be secured from the Office of the Dean of Women.

**FACULTY DAMES.** Two scholarships of $50 each are given annually to deserving women students selected by the Loans and Scholarships Committee.

**FLEMING, HARVEY, GOLF.** Through a trust fund set aside for awards to exceptional golf players who enroll in college, scholarships of $250 are given. This is a competitive award.

**FOOTHILL BUSINESS AND PROFESSIONAL CLUB.** Two $50 scholarships will be awarded to young women students entering San Diego State College from Grossmont High School.

**FOOTLIGHTS THEATRE, INC.** Annual awards of $50 each are made to members of this Little Theatre group who do outstanding work in dramatic arts.

**FRESHMAN CLASS, 1950-1951.** Two scholarships of $50 each will be awarded in the fall of 1951, one to an entering freshman man and one to an entering freshman woman. The scholarships will be awarded to students who have demonstrated leadership in high school activities. Final selection will be made by the Committee on Loans and Scholarships.

**HALE, E. T., ATHLETIC SCHOLARSHIPS.** $25 a month or more is donated for use of the Athletic Department in scholarships to outstanding athletes.

**JONES, SYBIL ELIZA MEMORIAL.** A scholarship of $100 is awarded annually to a student in drama. Applicant must be officially enrolled in at least his fourth semester in speech and drama with participation in dramatic productions on the campus. He must have at least a "C" average in all college work. Applications are made to the Speech Arts Department for action and awards are made after approval of the faculty Committee on Loans and Scholarships.

**KAPPA BETA NU.** A $100 scholarship is offered annually to a junior or senior woman student in elementary teacher education. Applicant must be a resident of San Diego County who is in financial need. Final selection rests with a scholarship committee of Kappa Beta Nu.

**KAPPA DELTA PI.** Two $25 scholarships are awarded annually by Kappa Delta Pi of San Diego State College. Selection for awards is made by the group.

**KAY JEWELERS SCHOLARSHIP.** $30 a semester for eight semesters is awarded an entering freshman. This scholarship is to be given alternating years to men and women students. In the fall semester, 1951, the scholarship will be awarded to a young woman. Selection is made by the Committee on Loans and Scholarships from applications received from high school students.

**LA MESA EVENING WOMEN'S CLUB.** A $75 scholarship is awarded a senior in high school who is entering San Diego State College. Selection is made by the club.

**LINKLETTER, ART.** Each June four $50 awards will be made to students graduating from San Diego City and County high schools: (1) one to a girl and one to a boy graduating from high schools with enrollment of 1,000 or over; and (2) one to a boy and one to a girl from high schools with enrollment under 1,000. Applications must be sent to the Committee on Loans and Scholarships of the College. Selection is based on scholarship, citizenship, and need.

**MARCY, MAY FINNEY.** Fifty-dollar scholarships are awarded from this fund to women students in upper division. Applications are made to the Dean of Women and awards made upon recommendation of the faculty Committee on Loans and Scholarships to Mrs. Marcy and a committee of members of Cap and Gown on San Diego State College campus.

**NOMA SCHOLARSHIP.** Presented by the National Office Management Association. $100 a year is provided to a student planning to major in Office Management. The scholarship will be restricted to students desiring to major in Office Management beginning with their junior year. Applications may be secured from the Office of the Dean of Women or the Chairman of the Department of Business Education, Secretarial and Office Management, not later than May 15th each year. The student chosen will be notified by June 10th.

**NORTH PARK KIWANI-ANNES.** One scholarship of $50 a semester for a year is awarded annually by this group to a male student preparing for teaching. The recipient must have at least junior standing at the time and be approved by the Committee on Loans and Scholarships.

**OSTEOPATHY AUXILIARY** of San Diego County awards annually $100 to a student who has graduated from San Diego State College and has been accepted for enrollment in the College of Osteopathy in Los Angeles.

**PANHELLENIC OF SAN DIEGO STATE COLLEGE.** $50 is given annually to the sorority member who has made the highest grade point average in the fall semester.

**P. E. O. SCHOLARSHIPS.** Various chapters of this organization assist worthy students in amounts ranging from $15 a month to $50 a semester. Usually the selection for the awards is made by the chapter itself.

**PI LAMBDA THETA.** An annual scholarship of $50 will be given to a senior student in education. The selection will be made by the fraternity with approval of the Committee on Loans and Scholarships.

**SAN DIEGO BUSINESS AND PROFESSIONAL WOMEN'S CLUB.** A $50 scholarship is awarded annually to a worthy young woman attending San Diego State College and majoring in Business Administration and having at least a "C" average.

**SAN DIEGO CITY PANHELLENIC.** Two $50 scholarships are awarded annually to two upper division women students. Applications are made through the faculty Committee on Loans and Scholarships and selection is left to the discretion of the committee.

**SAN DIEGO CITY TEACHERS ASSOCIATION.** Two scholarship of $50 each are presented each year to prospective teachers with no restrictions as to college year. Applications are made on forms supplied by the San Diego City Teachers Association and are reviewed by the association's committee on scholarships. Personal interviews are required, and final selection is made by that committee.

**SAN DIEGO COUNTY TEACHERS ASSOCIATION.** From two to four $100 scholarships are made available annually by this group of teachers. Awards are made to students in the field of elementary education and final selection rests with the Committee on Loans and Scholarships.

**SAN DIEGO COUNTY FEDERATION OF WOMEN'S CLUBS.** A $50 award is made to a student majoring in Art. Student is chosen by the Art Department and must submit some art object he has made.

**SENN, PERCIE BELLE, SCHOLARSHIP IN SPEECH.** A scholarship of $50 a semester for four semesters is given by Admiral Elliott Senn and the San Diego County Committee of the National Society of the Colonial Dames of America in memory of Admiral Senn's mother. The scholarship is open to Seniors in San Diego city and county high schools on a competitive basis in a speech contest. Subject, time and place of the contest will be announced each spring by the Speech Department.

**SOUTHLAND CLUB SCHOLARSHIP.** $50 award made available by the Southland Club for Business and Professional Women to a junior or senior woman student who plans to enter business or a profession. The student must have at least a "B" average; she must have been graduated from a San Diego City or County high school and must be of good moral character and in financial need. Applications made at the Office of the Dean of Women and approved by the Committee on Loans and Scholarships.

**STEINMAN-HILLEL.** Mr. and Mrs. Lou Steinman, members of the San Diego Lasker Lodge of the B'nai B'rith, which sponsors the Hillel organization on the San Diego State College campus, have set aside $400 for scholarships, $50 to be awarded annually for the next 8 years to a student who has done the most to further the cause of interfaith cooperation among the students of the campus. The selection of the awardee shall be made by a committee of three judges.

**STOTT, MRS. DOROTHY CRANSTON.** Each June a scholarship of $100 will be awarded to a student who has attended the San Diego State College for at least two years and who is being graduated or has been graduated by the San Diego State College with a major in English who begins or continues work in the San Diego State College, or in any other accredited college or university, towards a higher degree or credential. The selection is made by the Department of English with approval by the Committee on Loans and Scholarships.

**STOTT, K. W.** Each June a scholarship of $100 will be awarded to a student who has attended the San Diego State College for at least two years and who is being graduated or has been graduated by the San Diego State College with a major in History who begins or continues work in the San Diego State College, or in any other accredited college or university, towards a higher degree or credential. The selection is made by the Department of History with approval by the Committee on Loans and Scholarships.

**TEACHER EDUCATION SCHOLARSHIP.** The California Congress of Parents and Teachers, Inc., each year gives $300 to be awarded to one or two students. Selections are made upon the following conditions: (1) The recipient must have high qualifications and be in financial need; (2) The scholarship will be granted to students training to teach in the public elementary schools of California; and (3) The award shall be limited to students in the junior and senior years and graduate level.

**UNESCO SCHOLARSHIP.** A $50 scholarship is awarded at the time of the annual High School UNESCO Conference. The recipient is selected from three high school students attending the conference who make the best showing.

**VISTA BUSINESS AND PROFESSIONAL WOMEN'S CLUB.** $100 scholarship made available to one or more International students to assist them with tuition fees.

**WALKER, RALF MARC.** A scholarship in the amount of $500 is made available by the Walker-Scott Corporation in memory of the late Mr. Ralf Marc Walker to a woman student majoring in merchandising or retail trade at the San Diego State College. The scholarship is presented to a girl in Walker's Hi-Debber Council each year. The total scholarship is deposited in the San Diego State College Foundation and is handed to the recipient at the rate of $50 a semester for each of the first three years and $100 a semester for the two senior semesters.

**WEINBERGER, HENRY, INTERFAITH SCHOLARSHIP.** A scholarship of $100 is awarded in April of each year to the student of any religious faith enrolled at the San Diego State College who is judged to have done the most to further interfaith ideals among the students of the college during the year of the award. This scholarship is made available by Mr. Henry Weinberger of the Lasher Lodge of B'nai B'rith, under auspices of the B'nai B'rith-Hillel Councilorship on San Diego State College Campus.

**WOMEN'S AUXILIARY OF SAN DIEGO DENTAL SOCIETY.** An annual award of $100 is made available by the Women's Auxiliary of San Diego Dental Society to an outstanding male student in pre-dentistry.

## LOANS

Short term loans are available to students who have attended the San Diego State College for at least one semester and who have demonstrated ability to do satisfactory college work. Applications for loans are made to the Committee on Loans and Scholarships through the Office of the Dean of Men or Dean of Women.

# ADMISSION AND REGISTRATION

## GENERAL ADMISSION REQUIREMENTS

High school graduates and other applicants possessing equivalent preparation may be admitted to this college upon evidence of fitness to profit by college instruction, such fitness to be shown by previous scholastic records, by evidence of good moral character and personal qualifications, and by satisfactory scores on tests which the college may require.

## ADMISSION OF HIGH SCHOOL GRADUATES

(1) A high school transcript must be presented showing satisfactory scholarship, and (2) applicants must demonstrate readiness for college instruction by making satisfactory scores on such tests as the college may designate.

**Regular status** will be granted if the student has earned A or B grades in not less than 16 semester courses during the tenth, eleventh, and twelfth grades.

**Provisional status** will be granted if the student has earned A or B grades in not less than 12 semester courses during the tenth, eleventh, and twelfth grades. Individuals who fall slightly below the above standard may be admitted to provisional status if qualifying examination scores indicate probable success in college. One year is allowed for transfer to regular status which may be attained upon completion of 24 or more units of college work with grade average of C or better. Full credit is allowed for all regular college work completed.

## ADMISSION BY EXAMINATION

Certificates of successful examination before the College Entrance Examination Board will be accepted when candidates cannot meet the above scholarship requirements.

## ADMISSION OF ADULTS TO SPECIAL STATUS

**Adult special status** may be granted, in exceptional cases, to persons over 21 years of age who do not fully meet the college entrance requirements provided that ability to do college work is satisfactorily demonstrated through qualifying examinations administered by the college. Such students may be transferred to regular status upon completion of 24 or more units of college work taken in residence with grade average of C or better. Full credit is allowed for all regular college work completed.

**Special students** are those students carrying courses in the Extended Day Program only or other students who may be granted permission to take limited work. Special students are not eligible as candidates for a degree until all entrance requirements have been met; however, courses satisfactorily completed carry full college credit.

**Special graduate students** are graduates who have not qualified for admission to graduate status. (See *Admission to Graduate Study.*)

## ADMISSION WITH ADVANCED STANDING

Credit earned in recognized institutions of collegiate grade will be evaluated and advanced standing allowed accordingly toward the graduation requirements of this institution. Applicants must show an average grade of C or better for all college work, for the last college attended, and for the last semester of attendance in order to qualify for regular status. A student who enters with advanced standing is one who has completed at least 12 units of passing work in another collegiate institution. However, no applicant may disregard his collegiate record and apply for admission only on the basis of his high school work. No credit earned after a student has accumulated 64 units of work in all types of collegiate institutions may be transferred from a junior college.

An applicant from an unaccredited college may be admitted by action of the Board of Admissions if his college record and qualifying examinations meet the admission requirements. Credits earned in unaccredited colleges or universities may be accepted provisionally, but will not be counted toward graduation requirements until the student has earned 24 semester units in residence with at least a C average.

Students seeking admission with advanced standing must furnish complete transcripts for all work attempted beyond the eighth grade. If an official evaluation is desired, a deposit of $2 must accompany the application and be received together with all transcripts at least 30 days before the date of registration. At least 45 semester units must be completed before a student may apply for an evaluation.

## ADMISSION TO GRADUATE STUDY

**Graduate status** may be granted to applicants who have regularly applied and have filed official transcripts as evidence of their possession of a bachelor's degree from an accredited institution. Refer to Master of Arts Degree and to Teaching Credentials.

**Graduate special status** is granted to those who are provisionally admitted to graduate study. It is given to a student (1) who has not completed all admission procedures required for graduate status and (2) to a student whose bachelor's degree was earned at an unaccredited college. A student from an unaccredited college will be eligible for graduate status when he has earned a grade point average of 1.5 on 12 or more units of approved upper division work at this college and has cleared all undergraduate deficiencies.

**Admission to candidacy** for the master's degree or for a teaching credential may be achieved by meeting the respective specific requirements.

**Admission to "200" numbered courses** requires graduate status and the meeting of specific prerequisites. A graduate student who may be permitted to enter a "200" numbered course pending full graduate status will be given only upper division credit if graduate status is not achieved by the end of the term in which the course is given.

## DEGREES OFFERED

The following degrees are offered by the college: bachelor of arts, bachelor of science, bachelor of education, and master of arts.

## EXTENDED DAY PROGRAM

In order to meet the needs of adults in the community for work on the college level, courses are offered in the late afternoon and evening under an extended day program. These include both undergraduate and graduate courses and carry full college credit. Classes offered under this program consist of those courses normally scheduled as part of the regular college offerings and are taught by faculty of the college, but moved to a late afternoon or evening hour to permit in-service teachers, public personnel, businessmen, and others to attend. These courses cover a wide range of academic and educational subjects including education, business administration, public administration, engineering, and the sciences. A special bulletin describing the current offerings is issued each semester and may be obtained upon request from the Office of the Dean of Educational Services.

## EXTENSION PROGRAM

In order to serve more adequately the needs of the community, the college cooperates with off-campus organizations and groups in arranging extension classes in response to expressed needs when the group is sufficiently large to finance the instruction. Offerings are made each semester in a number of departments including education, business administration, and the arts and sciences. Classes may be organized at various points within San Diego and Imperial Counties. A minimum of 15 to 20 students is usually required in order to establish a class. The usual class carries two units of credit and meets once a week, either in the late afternoon or evening. The minimum basic fee is $6 per unit. Interested persons desiring detailed information regarding organization of classes or current offerings should contact the Dean of Educational Services.

## AUDITORS

Properly qualified persons may apply for admission to attend classes as auditors. Such students pay the same fees as those who take equivalent work for credit.

## TESTS REQUIRED AT REGISTRATION TIME AND LATER

1. A physical examination is required of all students entering or reentering the college after an absence of one semester or more, except that students carrying six units or less are not required to take the physical examination. This examination is scheduled during the orientation period.
2. All entering students are required to take a college aptitude test, and tests for competence in mathematics and in speech. Remedial courses are established in mathematics and speech for students failing these tests. Exceptions may be made for graduate students and for those who register for six units or less and for those registered only in Extended Day classes.
3. All entering freshmen and college transfer students who present less than 12 semester units of college credit must take the regular battery of achievement and aptitude tests, including tests for competence in English, mathematics, and speech. Remedial courses are established for students failing these tests.
4. Students entering teacher education should see admission requirements outlined under Admission to Teacher Education.

## LATE REGISTRATION

Students who register after the scheduled registration days are subject to a late registration fee of $2. Students may be accepted for late registration with the approval of the Registrar within two weeks after scheduled registration days. Registration will be closed after that date. Students failing to complete all registration requirements within the period allowed, as announced in registration instructions, are subject to cancellation of registration.

## CHANGES IN REGISTRATION

A student is responsible for any change in his program after the registration book has been filed. Forms for changes in program must be secured at the Registrar's Office. A fee of $1 is charged.

# GENERAL REGULATIONS

## INFORMATION

Inquiries relative to the college should be directed to the Registrar's Office.

## NUMBERING OF COURSES

Courses numbered 1 through 99 are in the lower division; those numbered 100 through 199 are in the upper division; and those numbered 200 or over are in the graduate division. Courses numbered 300 or over are professional education courses on the graduate level.

## SCHOLARSHIP, GRADES, AND GRADE POINTS

The following grades are used in reporting the standing of students at the end of each semester: A, excellent; B, good; C, fair; D, passed; F, failed; I, incomplete; E, conditioned (may be made up to grade of D); Cr. credit (without grade); WP, withdrawal passing; and WF, withdrawal failing.

Grades of I or E must be made up by the end of the next semester; otherwise the grade of F will be recorded.

Grade points are assigned as follows: Grade A, 3 points per unit; B, 2 points per unit; C, 1 point per unit; D, no point per unit; F or WF, no point per unit. Grades of I, Cr, or WP are disregarded in computing grade points. The grade of E is treated as no point per unit until a final grade is recorded. The number of grade points a student has earned in a subject is determined by multiplying the number of points he has received by the number of units allowed. The grade point average is determined by dividing the grade points earned by the number of units attempted. A student must earn at least a C average in all work undertaken at the college to qualify for a degree or a transcript of record with recommendation to another collegiate institution. Any course may be repeated, but not for additional credit; however, only the second grade earned is considered in the student's average.

## CLASS, UNITS OF WORK, AND STUDY LIST LIMITS

Students who have completed 0 to 29 units of work are classified as freshmen; 30 to 59 units as sophomores; 60 to 89 units as juniors; and 90 or more as seniors.

A unit of credit represents 50 minutes of lecture or recitation combined with two hours of preparation per week through one semester, or three hours of laboratory or field work in the case of laboratory credit.

Students are not ordinarily permitted to enroll for more than 16½ units of credit toward graduation. A normal semester's program is 16 units.

Certain exceptions to this rule exist. If during the preceding semester the student has carried at least 12 units: (1) and a grade point average of at least 1.5 was earned, 17½ units may be carried for credit toward graduation; (2) and a grade point average of 2.0 was earned, 18½ units may be carried.

Exceptions to these regulations may be secured only through a petition to the Scholarship Committee.

No student may register for less than 12 units (the minimum full-time load) without the approval of the Dean of Instruction.

## PROBATION AND DISQUALIFICATION

### PROBATION

Any student whose scholarship record shows a cumulative deficit of seven or more grade points below a C average for all college work undertaken or for all work taken at this College will be placed on probation. Probation may be continued provided the student does not increase his grade point deficiency. The student will remain on probation until the grade point deficiency has been reduced below seven for all work undertaken and all work taken at this college.

A student in provisional status who does not reclassify to regular status upon the completion of 24 units of work will be placed on probation. Probation may be continued until the student is reclassified to regular status, provided the grade point deficiency is not increased.

A student with advanced standing from another college who has been admitted on probation by the Board of Admissions will remain on probation until all grade point deficiencies have been removed and an over-all grade point average of 1.0 has been attained.

### DISQUALIFICATION

Any student on probation whose scholarship falls belows a grade point average of 1.0 in any single semester is disqualified from further attendance at the college.

Any student who fails to pass one-half of the units attempted during any single semester is disqualified from further attendance at the college.

A disqualified student may be reinstated for reasons satisfactory to the Board of Admissions. Applications for reinstatement must be made on forms which may be obtained at the Office of the Registrar.

## WITHDRAWALS FROM CLASS

Forms for withdrawal from class may be obtained at the Registrar's Office. If a student withdraws from class during the first seven weeks of a semester, a grade of WP will be recorded upon his permanent record for each class which he has dropped. If he withdraws during the remainder of the semester, either a WP or WF will be recorded, depending on whether he is passing or failing the course at the time. WF is equivalent to a failing grade.

## TRANSCRIPTS OF RECORD

Students may secure upon request one transcript of record without fee. Thereafter, a fee of $1 is charged for each transcript secured upon request. Once a student has matriculated in this college, transcripts from other schools will not be returned, or copies of them made. No fees are charged for transcripts required for military purposes.

Transcripts in the possession of students are to be regarded as unofficial records.

## EVALUATIONS

An evaluation of credit for graduation should be requested by a student as soon as 45 units have been earned. Applications may be made at the Office of the Registrar. Students having met all admission requirements for the arts and sciences or teacher education curricula, who are carrying 6 units, or more, of college work in a regular semester, will not be charged the evaluation fee.

An evaluation remains in effect so long as a student completes 12 units of work at San Diego State College within each two-year period beginning wth the term immediately following the one in which the evaluation is made (includes summer session term). Any evaluation is subject to changes in requirements imposed on the College by the State Board of Education.

## ELIGIBILITY FOR DIRECTED TEACHING

No student shall be eligible for directed teaching (Education 116) leading to the kindergarten-primary, general elementary, general junior high, and special secondary credentials who has not completed 75 units, been admitted to Teacher Education, and whose entire record, as well as for the preceding semester, does not average at least a 1.2 for all credentials except the junior high and general secondary credentials which require a 1.5 grade average.

No student shall be eligible for directed teaching (Education 316) leading to the general secondary credential who has not been admitted to the teacher education program prescribed for admission to candidacy for this credential.

## THE HONORS PROGRAM

Any student who at the end of the sophomore year has either attained an over-all grade point average of 2.5 or who has attained a grade point average of 2.75 in his major and not less than 2.0 in fields outside his major, and who has received the approval of his department or departments, may elect the honors program. Such election will enable the student to pursue a special program as outlined below. Any student who feels that his qualifications approximate closely the scholarship standards stated above may request admission to the honors program, subject to the approval of his department or departments, and of the Committee on Honors.

Any student who wishes to apply for entrance into the honors program may do so by filling out cards to be obtained from the Registrar's Office. The application should be approved by the 10th calendar day following the first day of instruction. Units earned by students doing individual study under this plan will be recorded under the symbol 166 and will be subject to the formulated rules dealing with limitations of student load.

Students in the honors program, so far as the facilities of the department and the best interests of the students under its charge allow, shall be treated as benefits their individual needs and as their individual capabilities warrant. They shall be eligible to enroll in honors or special study courses, credit in such courses to be limited to six units per semester unless otherwise recommended by the major department or departments and approved by the Honors Committee. In addition, they shall not be held to regular attendance in the established courses of their departments if, in the opinion of the instructor, the objectives of such courses can be achieved through special assignments and examinations. With the consent of the major department or departments, requirements concerning minors and specific courses or sequences in the major may be modified. Each honor student shall be assigned to a member of his major department for advice and direction.

Students in the honors program who fail to take advantage of the opportunities there offered may at the end of any semester be required to withdraw from the honors program upon notification of the major department or departments. Students not in the honors program who show unusual capacity, may request to be transferred to the honors program contingent upon recommendation of the department and the Committee on Honors at the end of any semester.

## THE DEGREE WITH HONORS AND WITH DISTINCTION

Upon recommendation of the Committee on Honors, graduation with honors shall be granted to the upper 10 percent of the graduating class. Each department shall determine which students it will recommend for distinction in the major field at graduation, and report its recommendation to the Committee on Honors for transmission to the faculty.

## EXAMINATIONS

No final examination shall be given to individual students before the regular time. Any student who finds it impossible to take a final examination on the date scheduled must make arrangements with the instructor to have an incomplete grade reported and must take the deferred final examination not later than the end of the first semester of attendance following that in which the incomplete was given. No exception shall be made to this rule without the approval of the Dean of Instruction and the instructor concerned.

## CREDIT FOR EXTENSION COURSES

The maximum amount of extension credit which may be accepted toward the minimum requirements for the bachelor of arts or the bachelor of science degree is 24 semester units, not more than 12 of which may be transferred from another college or university. The term "extension credit" refers to both extension class work and work taken by correspondence. Extension credit does not count in satisfaction of the minimum residence requirement. **Extension courses are not accepted for graduate credit toward the master's degree.**

## CREDIT GRANTED FOR MILITARY SERVICE

The college will grant credit for military service schools in compliance with recommendations made by the American Council on Education.

# THE MASTER OF ARTS DEGREE

## NATURE OF THE DEGREE

The Master of Arts Degree is offered at San Diego State College in the field of teaching and for other educational services. Students receiving the degree must hold a valid regular day school service California credential other than an emergency or provisional credential; or be a foreign citizen preparing to teach in foreign countries; or be a licensed teacher from another state with one year of experience; or be an approved applicant prepared to teach in institutions not requiring teaching credentials. Students may elect to concentrate in a subject matter major or in education. The following areas of concentration are now available:

*Teaching Majors:* Chemistry, business education, English, foreign language, health and physical education, history, life science (botany and zoology), physics, psychology, and social science.

*Education:* Elementary, secondary, administration and supervision, and student personnel services.

*School Psychologist and School Psychometrist:* Psychology or educational psychology.

## REQUIREMENTS

Students who meet the following requirements are eligible for graduation with the master's degree:

A. 30 units of approved graduate work beyond the bachelor's degree. These 30 units must be completed within the seven years immediately preceding the date when all of the requirements for the degree are completed, excepting that at the option of the college the time may be extended for students who pass a comprehensive examination.

B. 24 units in residence. Courses taken prior to the summer session of 1946 at San Diego State College, or any other California State College, may **NOT** be used as graduate work.

C. Grade point average of 2.0 in all work taken after the bachelor's degree. (Grade of A, 3 grade points; B, 2 grade points; C, 1 grade point; D, 0 grade points).

D. Completion of the requirements for an approved California teaching credential, or the holding of one, such as the general elementary, general secondary, junior high, special secondary school, and school psychometrist credentials; or be a foreign citizen; or be a licensed teacher in another state, with one year of experience; or be preparing to teach in an institution which does not require a credential.

E. Satisfactory completion of the candidate's degree program as approved by the Graduate Committee.

## ADMISSION TO GRADUATE STUDY

A. Graduate Status may be granted to applicants who have regularly applied and have filed official transcripts as evidence of their possession of a bachelor's degree from an accredited institution.

B. Provisional admission to graduate study, Graduate Special Status, may be granted to one who holds a bachelor's degree from an unaccredited college. Such a student will be eligible for Graduate Status when he has earned a grade point average of 1.5 on 12 or more units of approved upper division work at this college and has cleared all undergraduate deficiencies. Special Status is given also to those students who have not completed the regular admission procedures.

## ADMISSION TO CANDIDACY

A candidate for the master's degree must qualify as follows:

A. Apply for admission to candidacy at the Graduate Office. Students should apply during the first graduate term in attendance. Admission cannot be completed, however, until the student has earned 12 units at San Diego State College, or six units if his undergraduate grade point average was 1.5 or better.

B. Earn and maintain a grade point average of 2.0 on all graduate work.

C. Satisfactorily complete the following: (1) scholastic aptitude test for graduates, (2) scholastic achievement test, (3) personal interviews and speech test, and (4) health and physical examination, if the applicant does not hold a California teaching credential.

D. Secure adviser's approval of: (1) a complete program of study for the degree, and (2) a master's project or thesis.

## GENERAL REGULATIONS

A. Extension and correspondence courses are not acceptable toward the degree.

B. Maximum study load: Summer session, one unit per week of attendance; fall or spring, 15 units per semester of full-time attendance. If employed full time, five units of courses numbered 100-199 or 3 units of courses numbered 200-298.

C. All candidates shall complete two units in Education 290 and one additional unit in a course in bibliography (290) in the major department.

D. Each applicant shall complete a project or thesis for which three units of credit are allowed.

E. The minimum requirement for concentration in a major shall be four units of courses numbered 200-298; six additional units in the major or an approved related field, selected from upper division or graduate courses; a project or thesis; and one unit in bibliography.

F. 12 units of work must be earned after admission to candidacy.

G. 10 units must be in courses numbered 200-299.

H. The examination on the thesis will consist of two conferences between the student and his Thesis Committee; one for planning, which is to be held immediately after the appointment of the committee, and one for evaluation at the time of completing the first draft of the thesis.

I. The project or thesis must be completed four weeks in advance of the date of the convocation at which the degree is to be conferred.

# GENERAL REQUIREMENTS FOR THE BACHELOR OF ARTS AND BACHELOR OF SCIENCE DEGREES

## TYPES OF CURRICULA

San Diego State College offers two types of curricula leading to the A.B. and B.S. degrees:

(1) The curricula leading to the California teaching credentials, and

(2) The curricula in arts and sciences.

## GRADUATION REQUIREMENTS

Any student who enters San Diego State College for the first time, beginning with Summer Session 1951, must complete requirements of 124 units for the A.B. degree or 128 units for the B.S. degree.

Any student who has completed 12 units of work at San Diego State College has the option of being graduated under the requirements in effect for 1950-1951 (120 units) or the requirements to be in effect for 1951-1952. If he chooses the first set of requirements, he must earn 12 units within each two year period, beginning with Summer Session 1951, to remain eligible for graduation under those requirements. Otherwise, a new evaluation for the new requirements will be required.

### GRADUATION REQUIREMENTS EFFECTIVE 1951-1952

(a) A minimum of 124 semester units for the A.B. degree or 128 semester units for the B.S. degree, representing a four-year college course, are required for graduation.

(b) The last 24 units of work leading to the bachelor's degree must be completed in residence at this college.

(c) At least a C average (1.0) in scholarship is required in all college work attempted, in all work taken at this college, and in all upper division work in the major field.

(d) At least 40 upper division units are required for the A.B. degree or at least 36 upper division units for the B.S. degree.

(e) The state requirements in United States history, Constitution, and American ideals must be completed for the A.B., B.S., or B.Ed. degree.

(f) All requirements in general education, the major and minor fields and any other requirements made by the college must be completed for graduation.

### ENGLISH, MATHEMATICS, AND SPEECH TESTS

Each student must demonstrate competence in the use of English, mathematics, and speech as determined by tests administered by the college. Students failing to pass these tests satisfactorily are required to enroll in special remedial courses designated by each department concerned. Passing the tests or completion of designated courses is a requirement for graduation.

### UNITED STATES HISTORY, CONSTITUTION, AND AMERICAN IDEALS

Each student of a state college to qualify for graduation shall demonstrate competence in United States history, Constitution, and American ideals by passing a comprehensive examination on these fields prepared and administered by the college, or by completing appropriate courses. Students transferring from other institutions of collegiate grade, who have already met this requirement, are not required to take further courses or examinations therein.

This graduation requirement may be fulfilled by any one of the following alternatives:

(1) By satisfactorily passing comprehensive examinations in both United States history, Constitution, and American ideals.

(2) By satisfactory completion of one of the following groups of courses:
- (a) History 17A and 17B
- (b) History 172A and 172B
- (c) Political Science 71A and 71B
- (d) Political Science 139A and 139B

(3) By satisfactorily passing a comprehensive examination in United States history, American institutions and ideals and completion of one of the following groups of courses:
- (a) Political Science 101
- (b) Political Science 137A and 137B

(4) By satisfactorily passing a comprehensive examination in the United States Constitution and completion of one of the following groups of courses:
- (a) History 8A and 8B
- (b) History 179A and 179B

(5) By completion of one of the following groups of courses covering United States history, American institutions and ideals and completion of one of the following groups of courses covering the United States Constitution:

| *Courses on U. S. History* | *Courses on U. S. Constitution* |
|---|---|
| (a) History 8A and 8B | (a) Political Science 101 |
| (b) History 179A and 179B | (b) Political Science 137A and 137B |

(6) By completion of the graduation requirement in United States history, Constitution, and American ideals in other institutions of collegiate grade.

## LOWER DIVISION AND UPPER DIVISION COURSES

A student is considered to have lower division standing until he has earned 60 semester units, at which time he attains upper division standing.

Courses numbered 1-99 are lower division courses; courses numbered 100-199 are upper division courses.

A student with lower division standing is not eligible to take upper division courses, with the following exceptions: A student in the last semester of his sophomore year who is approaching upper division standing carrying sufficient lower division units to complete the required minimum of 60 units may carry upper division units for the remainder of his study load. A student with sophomore standing may carry upper division courses for upper division credit provided that he has the written approval of the chairman of the department and the Dean of Instruction. This written approval must be filed in the Office of the Registrar on the form "Adjustment of Academic Record." Blank forms may be obtained by the student at the Office of the Registrar.

## APPLICATION FOR OFFICIAL EVALUATION

Immediately upon completion of 45 units of work, the student should apply to the Registrar's Office for an official evaluation in terms of his major field and requirements for graduation. An evaluation is a summary of work completed and requirements to be completed for the degree and/or teaching credential. Students who delay in requesting official evaluations may be subject to any additional requirements made by the college from time to time. Students receiving official evaluations who continue uninterrupted attendance at this college are held only to the requirements in effect at the time the evaluation is made, except in cases where the State Department of Education imposes new regulations.

## TRANSFER TO GRADUATE SCHOOLS

Attention of students who plan to transfer to the graduate school of the University of California is called to the fact that the university reserves the right to evaluate and possibly reduce the credit in certain work in which this college has given credit toward the baccalaureate degree. Examples of such work would be credit for nurse's training, credit transferred from certain foreign schools, and certain vocational courses in junior colleges.

## GENERAL EDUCATION REQUIREMENTS

Forty-five semester units in courses designated in the college bulletin and in the schedule of classes as general education must be completed in addition to courses required in the major field. These courses must be selected from the fields listed below with completion of the minimum number of units required and not exceeding the maximum number of units allowed in each field in order to satisfy the requirement of 45 units in general education. The pattern requirements in general education may be fulfilled by examinations with an accompanying reduction in the 45 units but without course credit.

For specific explanation of the requirements within each field of general education, refer to the explanation of requirements below.

| | *Minimum* | *Maximum* |
|---|---|---|
| (a) Social Sciences | 9 | 12 |
| (b) Natural Sciences | 9 | 12 |
| (c) Literature, Philosophy, and the Arts | 6 | 12 |
| (d) Communication: | | |
| Oral Communication | 2 | 2 |
| Written Communication | 3 | 6 |
| (e) Psychology | 3 | 6 |
| (f) Physical and Health Education: | | |
| Physical Education | 2 | 2 |
| Health Education | 2 | 2 |
| (g) Mathematics | 0 | 6 |
| (h) Foreign Languages | 0 | 6 |
| (i) Family Life Education | 0 | 6 |
| Total number of units required | 45 | |

### EXPLANATION OF REQUIREMENTS

(a) **Social Sciences:** A minimum of nine or maximum of 12 units must be selected from general education courses with at least three units in two or more of the following fields: anthropology, economics, geography (except Geography 1), history, political science, social science, sociology, and similar fields, including the required instruction in United States history, Constitution, and American ideals. **NOTE:** Courses in business, library science, philosophy, or psychology may not be used to satisfy the social science requirement.

(b) **Natural Sciences:** A minimum of nine or maximum of 12 units must be selected from general education courses in the natural sciences. At least one course of not less than three units must be selected in the life sciences from biology, botany, physiology, zoology, and similar fields; and at least one course of not less than three units in the physical sciences from astronomy, chemistry, Geography 1, geology, physics, physical science (except Physical Science 10), and similar fields. At least one course must include laboratory work for a minimum of one unit or the three-hour equivalent. **NOTE:** Courses in engineering, industrial arts, mathematics, or photography, may not be used to satisfy the natural science or laboratory requirement.

(c) **Literature, Philosophy, and the Arts:** A minimum of six or maximum of 12 units must be selected from general education courses in literature, philosophy, and the arts. At least one course of not less than three units must be selected in iterature or in philosophy from courses in English, comparative literature, philosophy, or similar fields. Courses in the arts must be selected from the fine arts, including aesthetics, art, and music, or from the practical arts. A maximum of three units may be counted in the practical arts toward general education.

(d) **Oral and Written Communication:** Two units must be completed in oral communication by passing Speech Arts 3. Students failing the Speech Test are required to register concurrently in Speech Arts 2, Oral Communication Laboratory, for one unit of credit which may not be counted toward general education requirements.

A minimum of three units, with a maximum of six units, must be selected from courses in written communication. All students must complete three units in English 1 or 41. Students failing the English Test are required to complete English A, or 40, or two units as a prerequisite for other courses in English. English A or 40 may not be counted toward general education requirements.

(e) **Psychology:** Three units must be completed in Psychology 1, or 40. An additional three units may be selected from other general education courses in psychology.

(f) **Physical Education and Health Education:** Two units must be completed in Health Education 21 and two units must be selected from general education courses in physical education.

The physical education requirement must be satisfied by completion of four semesters of activity courses for a minimum and maximum of two units. **NOTE:** Not more than one activity course may be counted within any semester and an activity course may not be repeated for credit, except courses designated as varsity sports.

(g) **Mathematics:** From zero to six units may be selected from general education courses in mathematics. Students failing the Mathematics Test must complete Mathematics X. This course may not be counted toward the general education requirements. **NOTE:** Any year-course in mathematics completed in high school may not be repeated in college for credit.

(h) **Foreign Languages:** From zero to six units may be selected from general education courses in foreign languages. **NOTE:** Year-courses in foreign languages completed in high school may not be repeated in college for credit, except that the last year-course in any foreign language sequence completed in high school may be repeated in college for a maximum of three units of repeated work to be applied toward graduation.

(i) **Family Life Education:** From zero to six units may be selected from general education courses in family life education. Courses in family life education may be found in the fields of business, health education, home economics, psychology, and sociology.

## COURSES IN GENERAL EDUCATION

Courses selected from the following groups may be counted toward the 45 units required in general education, unless the course is specifically required as part of the student's major field and within the limitations indicated in the section on General Education Requirements.

# BACHELOR OF ARTS DEGREE IN ARTS AND SCIENCES

## MAJOR AND MINOR REQUIREMENTS

One major field is required for the A.B. degree in addition to 45 units in general education courses. At least 40 units of the 124 required for graduation must be in courses carrying upper division credit.

The major in arts and sciences consists of a minimum of 24 upper division units with prerequisite and related lower division courses as prescribed by the department offering the major.

The minor in arts and sciences may be required by the department offering the major. In departments not requiring a minor, the minor is optional with the student. A minor consists of a minimum of 15 units, or maximum of 22, six units of which must be in courses carrying upper division credit.

### Majors

Majors in Arts and Sciences are offered in the following fields:

Art
Botany
Business
Chemistry
Economics
English
French
Geography
History
Journalism
Life Science
Mathematics
Music
Physical Education
Physics
Political Science
Psychology
Romance Languages
Social Science
Sociology
Spanish
Speech Arts
Zoology

### Minors

Minors in Arts and Sciences are offered in the following fields:

Air Science
Anthropology
Art
Astronomy
Bacteriology
Botany
Business
Chemistry
Comparative Literature
Economics
Education
Engineering
English
French
Geography
Geology
Health Education
History
Home Economics
Industrial Arts
Journalism
Life Science
Mathematics
Music
Philosophy
Physical Education
Physics
Political Science
Psychology
Recreation
Sociology
Spanish
Speech Arts
Zoology

### General Major in Vocational Curricula

The general major is planned for students who are preparing for vocations requir- g a background of general training. General majors are offered in the following curri- la: *Home arts, inter-American relations, prelegal, personnel management, public lministration, recreation, social work.*

Students not electing one of these curricula who need a general type of training r other vocational objectives must consult with the Dean of Instruction before per- ission may be granted to follow the pattern for the general major.

In addition to the general education requirements, a student taking the general ajor must complete 36 upper division units chosen from three fields with not more an 15 units nor fewer than nine units from any one field. A minimum of a year-course each field must be completed in the lower division as foundation for upper division ork in the general major. A minor is not required; however, four additional upper vision elective units must be completed to meet the minimum requirement for 40 upper vision units for graduation.

All students following the pattern for the general major must obtain forms from e Office of the Dean of Instruction, complete the forms, and have the general major proved by the Dean of Instruction. The forms will then be submitted by the student the chairman of each of the three departments comprising the general major for proval, revision, or rejection.

# BACHELOR OF SCIENCE DEGREE IN ARTS AND SCIENCES

## REQUIREMENTS FOR THE MAJOR

One major field is required for the B.S. degree in addition to 45 units in general education courses. A minimum of 128 units is required for graduation. A minor field is not required.

The major consists of a minimum of 36 upper division units with prerequisites and related courses in the lower division as prescribed by the department offering the major. These lower division courses are considered part of the major and may not be counted toward the 45 units in general education, except as may be specified in each major field.

### Majors

Majors are offered in the following fields:

Botany
Chemistry
Engineering
Laboratory Technique
Life Science
Physics
Zoology

# PROFESSIONAL CURRICULA IN TEACHER EDUCATION

## ADMISSION TO TEACHER EDUCATION

Students who expect to become teachers should apply for admission to teacher education during the first semester of the sophomore year. Students entering the college at the end of the sophomore year will apply at the beginning of the junior year. No courses in education may be taken until admission is granted; any exception to this rule must have the approval of the Chairman of the Education Division. The standards for admission to Teacher Education are different from those for admission to the college; therefore, *admission to the college does not guarantee that the student will be admitted to teacher education.* The following requirements must be met for admission to the eacher education curricula:

1. A satisfactory score on the college aptitude test taken at the college.
2. Evidence of competence in the use of the English language and of satisfactory ability in arithmetic, handwriting, reading, and spelling indicated by having passed the Fundamentals Test. (See college calendar for dates of test which should be taken in the second semester of the *freshman year.*)
3. Assurance of correct speech habits and voice control by having satisfactorily completed a course in corrective speech or by having passed a speech test given by the college.
4. Assurance of physical fitness.
5. If the student is to be a candidate for the general secondary credential or one of the special secondary credentials, he must furnish a recommendation from the chairman of that department stating that the student has ability and shows promise of teaching success in his field and that the department looks with favor upon his application.
6. The completion of the first two years or more of a given curriculum, or its equivalent, and of subsequent work with a grade point average of 1.2 or better for all credentials except the general junior high school or the general secondary, for which shall be required a grade point average of 1.5 or better in all work and 1.75 in the major field.
7. If the student is a candidate for any credential on the secondary school level (general junior high school, special secondary, or general secondary), or for the school psychometrist credential, he must have a satisfactory score on a General Culture Test.
8. If the student is a candidate for the general secondary credential, he must have a tentative program approved by the authorized departmental representative of his major field and the representative of Secondary Education.
9. All applicants need to be approved by an interviewing committee of the college faculty. In its evaluation the committee will consider the following factors established by the State Board of Education: intelligence, scolarship, professional aptitude, personality and character, speech and language usage, and many-sided interests.
10. Candidates for the school psychometrist credential must attain a satisfactory score on a comprehensive examination in psychology.

### Transfer Students

Students who have completed two or more semesters of work in another college, on transferring to San Diego State College, should make application for admission teacher education as soon as they enroll in the college. Transfer students admitted the college with either upper division or graduate standing must take the necessary sts for admission to teacher education given during the orientation period at the ginning of their first semester at the college. (See college calendar for dates.)

### Transfer Students With Emergency Credentials in Elementary Education

Certain adaptations in the education courses have been made to meet the need of experienced teachers who hold an emergency credential in elementary education. Se the Coordinator of Elementary Education for details.

### Advanced Standing in Teacher Education

A student transferring into San Diego State College with advanced standin must complete a minimum of six units of professional education work in residence a San Diego State College before recommendation for a credential, regardless of exten of education work already completed elsewhere. Whenever a transfer student has ha teaching experience, the college requires that a statement from the employer(s) b filed with the Registrar.

### Evaluation of Credits

After an interval of five years, courses in education are reevaluated and subjec to reduction in credit, in light of such new requirements as may have been put int effect and changes in educational procedures. Students formerly in attendance wil not be considered to be working in the curriculum until an evaluation and statemen of credit has been secured from the Registrar's office. All courses taken either at thi college or elsewhere must be approved by an official adviser in order to be credite toward meeting credential requirements or pattern requirements for a degree.

## TEACHING CREDENTIALS

San Diego State College is authorized by the State of California to recommend students for the teaching credentials listed below. To be recommended, students must complete, or have completed, the A.B. degree in one of the curricula offered for teachers.

| *The credential* | *Subjects and grades for which it is valid* |
|---|---|
| General Elementary | All grades through the eighth. |
| Kindergarten-Primary | Kindergarten through third. |
| General Junior High (must be taken with a minor in industrial arts or home economics, or with another credential) | All subjects in grades seven, eight and nine in all elementary or secondary schools. |
| General Secondary | All subjects in the public schools in grade 7 and above. |
| Health and Development | Authorizes to serve as supervisor of health in the capacity of a school physician, school nurse, school oculist, school optometrist, school otologist, school audiometrist, school dentist, school chiropdist, or school dental hygienist. |
| Special Secondary in Art | Art in all grades of the public schools. |
| Special Secondary in Business Education | Business education subjects in all grades of the public schools. |
| Special Secondary in Music | Music in all grades of the public schools. |
| Special Secondary in Physical Education | Physical education in all grades of the public schools. |
| Special Secondary in Speech Arts | Speech in all grades of the public schools. |
| Special Secondary in Correction of Speech Defects | Correction of speech defects in all grades of the public schools. |
| Special Secondary for teaching the Mentally Retarded Child | To teach mentally retarded children in elementary and secondary schools. |
| School Psychologist | To serve as school psychologist. |

| | |
|---|---|
| School Psychometrist | To serve as assistant to the school psychologist. |
| Administration in Elementary Education | Authorizes for certificate to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in elementary schools. |
| Supervision in Elementary Education | Authorizes for certificate to supervise instruction in elementary schools. |
| Administration in Secondary Education | Authorizes for certificate to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in secondary schools. |
| Supervision in Secondary Education | Authorizes for certificate to supervise instruction in secondary schools. |
| Special Subject Supervision | Supervision in the special subject in all grades. |

## COMBINATION OF CREDENTIALS

Students who seek more than one teaching credential must complete in full the curriculum for each, with only such exceptions as are indicated in the statement of requirements.

A combination of the elementry school credential and the junior high school credential may be secured by completing the requirements for the elementary school credential and the following additional requirements.

(a) A junior high school teaching major.
(b) Education 100B in the major field.
(c) Three units of directed teaching, or equivalent, in a junior high school.
(d) Education 115B.

A combined program leading to the junior high and general elementary credentials imultaneously is being worked out during 1951-52. Entering students interested in uch a program should request an adviser working in this revision.

A combination of the junior high school credential and a special secondary credential may be secured by completing the requirements for the special secondary credential and the following additional requirements:

(a) A junior high school teaching major, excluding the special secondary credential majors, and a teaching minor. This minor may be the special secondary field.
(b) Education 100B in the junior high school teaching major.
(c) Three units of student teaching in the junior high school teaching major.

# GENERAL ELEMENTARY AND KINDERGARTEN-PRIMARY CREDENTIALS WITH THE BACHELOR OF ARTS DEGREE

The general elementary and kindergarten-primary credentials are granted with e A.B. degree in teacher education. One major in Education, in addition to 45 units general education courses, and one teaching minor are required for either credential d the degree. Curricular outlines for these credentials may be obtained from the oordinator of Elementary Education.

Summary of unit requirements:

| | *Units* |
|---|---|
| General education | 45 |
| Major in education | 39–42 |
| Additional units, including minor and pattern requirements for the credential | 40–41 |
| Total number of units required for graduation | 124 |

### Major for the General Elementary Credential

The major consists of 39 upper division units to include the following courses: Education 102A-102B (6 units) ; Education 147 (10 units) ; Education 148 (12 units) ; Education 115A (2 units) ; Education 116 (7 units) ; and Health Education 151 (2 units).

Lower division background courses for the credential include: Social science to include regional geography (9 units) ; natural science to include physical geography (12 units) ; literature, philosophy, and the arts to include courses in music fundamentals, music methods, arts and crafts, and design (12-15 units) ; physical education to include games and activities for the elementary school (2½ units).

### Major for the Kindergarten-Primary Credential

The major consists of 42 upper division units to include the following courses: Education 102A-102B (6 units) ; Education 147 (10 units) ; Education 148 (12 units) ; Education 116 (6 units) ; Education 146 (4 units) ; Education 115A (2 units) ; and Health Education 151 (2 units).

Lower division background courses for the credential include: Social science (9 units) ; natural science (12 units) ; literature, philosophy, and the arts to include courses in music fundamentals, music methods, piano, arts and crafts, and design (13-15 units) ; physical education to include games and activities for the elementary school (2½ units).

### Minor

A teaching minor for the general elementary and kindergarten-primary credentials consists of a minimum of 15 units in one field, six units of which must be in courses carrying upper division credit. Minors are offered in the following fields.

English
Foreign Languages
General Science
Industrial Arts
Mathematics
Physical Education
Social Science
Speech Arts

The minor in English must include three units in American literature. The minor in foreign languages may be in one or more of the foreign language fields. The minor in general science must be made up of courses selected from the general secondary credential minor in life science and general science or physical science and general science. The minor in social science must include six upper division units in history or in geography and further work in either lower or upper division selected from anthropology, economics, geography, history, political science, or sociology.

A second minor, though not required, may be chosen from art, health education, home economics, industrial arts, music, physical education, or recreation.

Students taking the general elementary or kindergarten-primary credential in combination with a special secondary credential may use the special secondary major for the minor in the elementary or kindergarten-primary fields.

## GENERAL JUNIOR HIGH SCHOOL CREDENTIAL WITH THE BACHELOR OF ARTS DEGREE

The general junior high school credential is offered to students with minors in home economics or industrial arts or to students who wish to take this credential in combination with a general elementary, kindergarten-primary, or special secondary credential. The general junior high school credential is granted with the A.B. degree in teacher education.

One teaching major and one teaching minor, in addition to 45 units in general education courses, are required of all students taking this credential. Students not taking this credential in combination with another credential are required to complete 24 units in professional education courses and a minor in home economics or industrial arts. Students taking this credential in combination with another credential should refer to the section of the bulletin entitled: Combination of Credentials.

## Teaching Majors and Minors

Teaching majors and teaching minors are offered in the following fields:

| *Teaching Majors* | *Teaching Minors* |
|---|---|
| English | Home Economics |
| Foreign Languages | Industrial Arts |
| General Science | or |
| Mathematics | The special secondary field for the combination credentials |
| Social Science | |

Summary of unit requirements:

| | *Units* |
|---|---|
| General education | 45 |
| Teaching major | 24 |
| Teaching minor | 15 |
| Professional courses in education | 24 |
| Electives | 16 |
| Total number of units required for graduation | 124 |

## Teaching Major

A *teaching major* consists of a minimum of 24 units, at least 18 units of which ust be in courses carrying upper division credit. Courses in the major field may not e counted toward the 45 units required in general education courses.

A *teaching major in English* shall consist of six units in a lower division year-ourse, and 18 units in English courses carrying upper division credit, including three nits in American literature and three units in Shakespeare. Recommended as part f the major: English 192.

A *teaching major in foreign languages* may include one or more of the foreign nguages for a minimum of 24 units, 18 units of which must be in courses carrying pper division credit.

A *teaching major in general science* shall consist of a minimum of 24 units, at ast 18 units of which must be in courses carrying upper division credit. Six units re required in a life science and six in a physical science. At least 12 units in one field concentration are required, six units of which must be in courses carrying upper vision credit, to be selected from one of the following fields: bacteriology, botany, emistry, physics, or zoology.

A *teaching major in mathematics* shall consist of a minimum of 24 units, at least units of which must be in courses carrying upper division credit.

A *teaching major in social science* shall consist of a minimum of 24 units, at ast 18 units of which must be in courses carrying upper division credit. There shall a concentration of 12 units, at least six units of which must be in courses carrying per division credit, selected from one of the following fields: anthropology, eco-mics, geography, history, political science, or sociology. A year-course in American story must be included in the lower or upper division.

## Teaching Minors

A *teaching minor* consists of a minimum of 15 units, six units of which must in courses carrying upper division credit. Teaching minors are offered in home onomics or industrial arts.

A *teaching minor in home economics* consists of a minimum of 15 units to include ome Economics 5 or 62 and 10 or 11 in the lower division; and Home Economics 0 and 170 in the upper division. Three additional units should be chosen in con-ltation with the adviser in home economics.

A *teaching minor in industrial arts* consists of a minimum of 15 units, six units which must be in courses carrying upper division credit. Required: Industrial Arts or 21 and 121, and at least one lower division and one upper division course in o of the following areas: woodworking, metalworking, and electricity.

### Professional Courses in Education

Professional courses include 24 units in the following: Education 184A-184B-184C, 100B (methods in the major and minor fields), 116; plus Health Education 151.

## SPECIAL SECONDARY SCHOOL CREDENTIAL WITH THE BACHELOR OF ARTS DEGREE

The special secondary school credential is granted with the A.B. degree in teacher education in the following fields: art, business education, music, physica education, and speech arts. Majors in these fields are in addition to 45 units in genera education courses. Professional courses in education are also required. Certain of these credentials require, in addition, a teaching minor in an academic field. For a statement of requirements in the major and in professional education, refer to the credentials below.

Summary of unit requirements:

| | Units |
|---|---|
| General education | 45 |
| Major for the credential | 39–58 |
| Professional courses in education | 22–26 |
| Minor, if required, and electives | 0–18 |
| Total number of units required for graduation | 124 |

### TEACHING MINORS FOR THE SPECIAL SECONDARY CREDENTIAL

A teaching minor is required for the special secondary credential in physica education. A minor is optional for the other special secondary credentials. The minor consists of a minimum of 15 units, or maximum of 22, six units of which must be in courses carrying upper division credit. Courses in the minor may include genera education courses. Teaching minors are offered in the following fields:

English
Foreign languages
General science
Health education
Home economics
Industrial arts
Mathematics
Recreation
Social science

The following teaching minors include certain requirements:

*English:* The minor must include three units in American literature.

*Foreign languages:* The minor must be in one foreign language field.

*General science:* Courses in the minor are to be selected from the minors for the general secondary credential in life science and general science, or physical science and general science.

*Health education:* The minor must include Health Education 65, 90, 152, 145 or 153, 199, and Physical Education 151.

*Home economics:* The minor must include Home Economics 5 or 62 and 10 or 11 in the lower division; and Home Economics 150 and 170 in the upper division. Three additional units should be chosen in consultation with the adviser in home economics

*Industrial arts:* The minor must include Industrial Arts 2 or 21 and 121 and at least one lower division and one upper division course in two of the following areas: woodworking, metalworking, or electricity.

*Mathematics:* See general statement above.

*Recreation:* Lower division requirements: Two units of physical education activity courses, Physical Education 53, and two units chosen from Art 61B, or fields of dance, drama, or music. Upper division requirements: Recreation 165, 170A-170B and 184A or 184B. Recommended: Physical Education 151. Consultation with the chairman of the Recreation Department is advised.

*Social science:* The minor must include courses selected from anthropology economics, geography, history, political science, or sociology. Six units must be in a year-course sequence and six units are required in American history or three units in American history and three units in political science.

## SPECIAL SECONDARY CREDENTIAL IN ART

The major in art consists of 47 units to include the following: Lower division: Aesthetics 5 or 51 and 50 (4 units); Art A-B, 6A-6B, 14A, 61A-61B, and electives in art (20 units). Upper division: Aesthetics 150 (2 units); Art 106A, 112A, 116A, 119A, 194A, and 195 (14 units); electives in art (10 units); and Speech Arts 140A (3 units). Courses in the major may not be counted toward general education requirements.

Professional courses in education consist of 22 upper division units to include the following courses: Education 184A-184B-184C, 116, 100B-A, and Health Education 151.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors above.

## SPECIAL SECONDARY CREDENTIAL IN BUSINESS EDUCATION

The major in business education consists of 54-56 units to include the following: Lower division: Business 1A-1B, 8, 14A-14B, 18A-18B (21 units); plus the requirements in one of the following sub-fields: (1) Accounting: Nine units selected from Business 2, 21, 24, 25, 27; (2) Accounting-Secretarial: Business 5A-5B (if student has credit for Business 1A-1B or 5A-5B, other courses may be substituted in consultation with adviser); (3) Merchandising: Business 24, 25, 27; (4) Secretarial: Business 5A-5B. (If student has credit for Business 1A-1B or 5A-5B, other courses may be substituted in consultation with adviser).

Upper division: Business 103A, 105A-105B, 108, 190 (15 units); plus the requirements in one of the following sub-fields: (1) Accounting: Business 121, 160A, and 164A; (2) Accounting-Secretarial: Business 121; and 160A and 164A, or 113A-113B; (3) Merchandising: Business 121 and six units selected from Business 185, 186, 187A-187B, Art 107; (4) Secretarial: Business 113A-113B.

Professional courses in education consist of 24 upper division units to include the following courses: Education 184A-184B-184C, 116, 100B-T, one of the following: Education 100B-B, 100B-ME, or 100B-S; and Health Education 151.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors above.

## SPECIAL SECONDARY CREDENTIAL IN MUSIC

Students are referred to the opening statement and to the general basic requirements given in the section on Announcement of Courses under music. The student planning to receive this credential is held to the general basic music requirements. Students should consult with the chairman of the music department before registering and plan their course in view of individual variations in background and needs. Before admission to the directed teaching program may be granted, credential candidates must have completed Music 146A-146B and must have passed the minimum State credential requirements in voice and piano, with or without credit, which are as follows:

(a) Piano: Ability (1) to play a Bach two-part invention; (2) to play an artistic accompaniment; (3) to play at sight four-part hymns.

(b) Voice: Ability (1) to sing at least one song representative of each of the following periods of vocal literature: Classic, Romantic, Modern; (2) to sing at sight any part of a four-part hymn.

Students whose background in piano is inadequate for these requirements must register in their first semester for appropriate private or class instruction, with or without credit; students with insufficient background in voice must register for voice instruction no later than the third semester.

Specific requirements for the major: Lower division: Music 8A-8B, 10A-B-C-D may be omitted in part or in full upon evidence of satisfactory piano technique), 1A-51B, 58A-58B; four units selected from music courses numbered 70 to 87 (see ctivity requirements stated in general basic requirements for all music majors), 5A-15B, 20A-20B, 25A-25B, 30A-30B, and 35 (29-33 units). Upper division: Music 01A-101B, 108A-108B, 109A, 146A-B-C; four units chosen from Music 111, 112, 116, 117, 121, 122, 126, 127, 131, 132 or 150A-B-C-D; four units chosen from courses numbered 170 to 187 (see activity requirements stated in the general basic requirements for all music majors) (25 units). Nine units of music history courses may be counted toward general education requirements in Literature, Philosophy, and the Arts.

Professional courses in education consist of 22 upper division units to include the following courses: Education 184A-184B-184C, 116, 100B-Mu, and Health Education 151.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors for the special secondary credential listed above.

## SPECIAL SECONDARY CREDENTIAL IN PHYSICAL EDUCATION (MEN)

The major in physical education consists of 42 units to include the following: Lower division: Physical Education 53, 63, 64, 72, Health Education 65 (11 units); and Physiology 1A and Zoology 8 (6 units). Upper division: Physical Education 141, 142, 145, 146, 151, 155, 168, 170A or 170B, 177, 190, and two units of physical education electives (25 units).

Professional courses in education consist of 24 upper division units to include the following courses: Education 184A-184B-184C, 116, 100B-PE, 100B in the minor field, and Health Education 151.

A teaching minor is required. Refer to the teaching minors for the special secondary credential listed above.

## SPECIAL SECONDARY CREDENTIAL IN PHYSICAL EDUCATION (WOMEN)

The major in physical education consists of 38 units to include the following: Lower division: Physical Education 4, 5, 6, 12A-12B, 53, 72 (8 units); Physiology 1A or Zoology 20, and Zoology 8 (6 units). Pattern requirements for this credential also include the following courses: Physical Education 1A, 2A-2B, and 3A-3B. Upper division: Physical Education 155, 156A-156B, 160, 161, 164A-164B, 168, 170B, 185 and 190 (24 units).

Professional courses in education consist of 24 upper division units to include the following courses: Education 184A-184B-184C, 116, 100B-PE, 100B in the minor field, and Health Education 151.

A teaching minor is required. Refer to the teaching minors for the special secondary credential listed above.

## SPECIAL SECONDARY CREDENTIAL IN SPEECH ARTS

The major in speech arts consists of 45 units to include the following: Lower division: Speech Arts 4, 11A, 55A or 55B, 56A, 60A, 81 and three units in speech electives (21 units). Upper division: Speech Arts 150, 159, 176 or 179A; three units selected from 162, 191, or 192A; nine units selected from 108, 118, 140, 154A, 154B, 155, 182, or 183; and three units selected from upper division courses in English literature.

Professional courses in education consist of 22 upper division units to include the following courses: Education 184A-184B-184C, 116, 100B-SA, and Health Education 151.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors for the special secondary credential listed above.

## SPECIAL SECONDARY CREDENTIAL IN CORRECTION OF SPEECH DEFECTS

This credential is granted only to students who can verify two years of successful teaching experience or four semester hours of superior student teaching completed in an approved teacher education institution and who hold a valid California teacher's certificate, credential, or life diploma of elementary or secondary school grade. Such students must show credit in the following subjects:

| **Lower Division** | *Units* |
|---|---|
| Psychology 1, General | 3 |
| Speech Arts 4, Extemporaneous Speaking, or equivalent | 3 |
| Speech Arts 11A or 11B, Interpretation | 3 |
| Speech Arts electives | 6 |
| **Upper Division** | |
| Speech Arts 150, Phonetics | 3 |
| Speech Arts 221, Articulatory Problems of Speech or Education 176, Problems of Speech Correction and Articulation | 3 |
| Speech Arts 179A-179B or Education 179A-179B, Nervous Speech Disorders | 6 |
| Psychology 131, Foundations of Personality | 2 |
| One hundred supervised hours of teaching on elementary level in speech correction | 3 |

## SPECIAL SECONDARY CREDENTIAL FOR TEACHING THE MENTALLY RETARDED CHILD

An applicant for the special secondary credential for teaching the mentally retarded child must have completed the following minimum requirements:

1. Possession of a valid kindergarten-primary, general elementary, junior high school, or general secondary credential.

2. Completion of 18 semester hours of professional work selected from the following fields:

   a. Required group: Education 102B or 102C, 181, 182, Art 61A or 161A, and three units of directed teaching of the mentally retarded.

   b. Additional work to complete the required total of 18 semester hours selected from any of the following electives: Education 176, 144, Psychology 132, 150, or 151.

3. The 18-unit requirement will be reduced 4 units for each year of verified, successful experience in teaching special classes for mentally retarded children, the total not to exceed 12 units.

4. At least six semester units of the 18 required must have been completed within five years of the time application is made for the credential.

5. Twelve units of work must have been completed at this college.

## HEALTH AND DEVELOPMENT CREDENTIAL

This credential is offered for school nurses only.

Requirements for this credential include:

1. Possession of a valid license issued by the official California state board or agency in charge of his profession in California.

2. Two years of successful experience in the special service to be named in the credential, except for the school nurse.

3. For school nurse only: The completion of six semester hours of work, including courses in:

   A. Educational Psychology (Education 130)
   B. Administration of the School Health Program (Health Education 153)
   C. Social case work, or rural education or child hygiene.

Pattern to be approved by adviser appointed by the Chairman of Division of Education.

## SCHOOL PSYCHOLOGIST CREDENTIAL

Each applicant for recommendation for the school psychologist credential shall have completed the following minimum requirements:

1. Possession of a valid general elementary or general secondary credential.
2. One year of successful teaching experience.
3. Possession of a master's degree in psychology or educational psychology.
4. Each applicant must complete the following course requirements:

A. Child development, mental hygiene, and counseling and guidance, including interviewing:

| | *Units* |
|---|---|
| Education 102B, Child Growth and Development, or Psychology 106, Development Psychology | 3 |
| Psychology 132, Personality Adjustment | 2 |
| Psychology 152, Introduction to Methods of Counseling or Education 233, Guidance Counseling Techniques | 3 |

B. Psychology and education of exceptional children, social case practice including field work and clinical psychology:

| | |
|---|---|
| Education 181, Exceptional Children | 3 |
| Sociology 231, Field Work in Social Case Work | 3 |
| Psychology 151, Introduction to Clinical Appraisal or Psychology 211, Advanced Clinical Psychology | 3 |

C. Educational psychology and educational measurements including field work and elementary statistics:

| | |
|---|---|
| Psychology 130, Educational Psychology | 2 |
| Education 102A, Measurement and Evaluation in Elementary Education or Education 102D, Measurement and Evaluation in Secondary Education | 2 |
| Psychology 104A, Statistical Methods in Psychology | 3 |

D. Individual and group mental tests including field work:

| | |
|---|---|
| Psychology 105A, Introduction to Psychological Testing | 3 |
| Psychology 105B, Individual Mental Testing | 3 |
| Psychology 205, Advanced Mental Testing | 3 |

E. Remedial instruction including laboratory or classroom practice:

| | |
|---|---|
| Education 144, Diagnosis and Remedial Treatment of Difficulties in Reading | 3 |
| Education 176, Problems of Speech Correction and Articulation or Education, 179A, Nervous Speech Disorders | 3 |

These courses include laboratory practice.

## SCHOOL PSYCHOMETRIST CREDENTIAL

An applicant for the school psychometrist credential must have completed the following requirements:

1. Possession of a California general teaching credential (General Elementary, Junior High School, or General Secondary) or a four-year college course with a bachelor's degree.

2. Admission to teacher education by all undergraduate students or by graduate students who do not hold a California teaching credential. A special examining committee of members of both the Departments of Education and Psychology is established to interview applicants.

3. As a part of the undergraduate or graduate program the applicant must have completed 18 semester units of training distributed approximately as follows and approved by the credential adviser:

A. At least six units selected from the following areas with one course in each area: Education 102A or Education 102D or Education 184C; Education 102B or Education 102C; and Education 130 or Education 184B.

B. Six units as follows: Education 181 and Psychology 151.

C. Six units as follows: Psychology 105A and Psychology 105B.

# CURRICULA LEADING TO THE GENERAL SECONDARY SCHOOL CREDENTIAL

## INFORMATION CONCERNING THE GENERAL SECONDARY SCHOOL CREDENTIAL

A candidate for this credential must complete the requirements for the bachelor's degree from an accredited institution with a major and a minor commonly taught in the secondary schools of California. Admission to candidacy for this credential should be sought during the second semester of the sophomore year or immediately upon admission to San Diego State College with advanced or graduate status. For admission requirements, refer to the section entitled: Admission to Teacher Education.

Students desiring a major in art, business education, music, physical education or speech arts should complete the requirements for the special secondary credential in the respective area desired, then continue with the graduate program. For further details regarding these majors, refer to these credentials.

Students desiring one of the other areas as a major for which San Diego State College is authorized should complete a program leading to the A.B. degree at the end of four years and the General Secondary Credential upon completion of the graduate year requirements outlined on the following pages.

Any person desiring this credential should consult with the Coordinator of Secondary Education during his first semester of attendance at San Diego State College.

## RECOMMENDED PROGRAM FOR THE GENERAL SECONDARY SCHOOL CREDENTIAL

1. The following courses should be completed before receiving the bachelor's degree: Health Education 151 (may be taken any semester); Education 184A and 184B (should be taken consecutively). Those persons changing from another vocational objective to education during the senior year may take Education 184A and 184B concurrently by special permission of the Coordinator of Secondary Education, following admission to Teacher Education and a check of the student's qualifications.

| | *Units* |
|---|---|
| Health Education 151, Health Education for Teachers | 2 |
| Education 184A, The Secondary School | 4 |
| Education 184B, Development and Learning | 4 |

2. After completion of requirements in (1) above, the following courses may be taken either before or after receiving the bachelor's degree; however, they should be taken concurrently with the first directed teaching assignment unless the student has equivalent teaching experience.

| | *Units* |
|---|---|
| Education 184C, The Teaching Process | 4 |
| Education 100B (methods in major or minor field) | 2 |
| Education 116 or 316, Directed Teaching (or equivalent) | 3 |

3. The graduate work must consist of San Diego State College's standard year of work, 24 to 30 semester units of upper division or graduate work, including the following specific requirements:

(a) At least 12-15 semester units must be completed at San Diego State College.

(b) At least one course of graduate level work (200 number) in the major field. Most departments require two courses.

(c) At least six upper division or graduate semester units in fields outside of education.

(d) Enough units to complete at least a 21 semester unit minor, with a minimum of six semester units of upper division credit in the minor subject area.

For a statement of requirements in the teaching major and minor fields, refer to these majors and minors below.

4. Professional Education during the graduate year: Completion of the courses listed in (1) and (2) above and the following:

| | *Units* |
|---|---|
| Education 100B in the major or minor field if not taken under (2) above | 2 |
| Education 230, Guidance Problems in Secondary Education | 3 |
| Education 250, Curricular Problems in Secondary Education | 3 |
| Education 316, Directed Teaching in both major and minor fields, or equivalent teaching experience | 3–6 |

## MAJORS AND MINORS FOR THE GENERAL SECONDARY CREDENTIAL

The following pages outline tentative programs for the majors and minors for which San Diego State College is authorized to recommend for the General Secondary Credential. Every candidate for the general secondary credential must have a program approved in writing by the departmental representative in the major teaching field and in education as part of admission to the teacher education program.

*Teaching Majors*

Art
Business Education
English
French
Health Education
Life Science and General Science
Mathematics
Music

### Outline of Requirements

### Major in Art

The requirements for the A.B. degree and the special secondary credential in art should be completed simultaneously. (Students transferring from another institution with the A.B. degree and a major in art should consult with the departmental representative for special program planning.) Refer to the special secondary credential in art. After the above requirements have been met, and the candidate has been accepted by the art staff for graduate work in art, the candidate for the general secondary credential shall complete a graduate year including the following courses in his major:

| *Graduate Year* | *Units* |
|---|---|
| Art 200A-200B, Special Problems in Art | 4 |

### Minor in Art

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Art A-B, Drawing and Composition | 2–4 |
| Art 6A-6B, Design | 4 |
| Art elective (Art 14A, Lettering, recommended) | 3–5 |
| Aesthetics 50, Appreciation and History of Art | 2 |
| Aesthetics 5, Art Orientation, or Art 51, Survey of Mexican Art | 2 |
| *Upper Division* | |
| Aesthetics 150, Appreciation and History of Art | 2 |
| Art electives | 4 |

### Major in Business Education

The requirements for the A.B. degree and the special secondary credential in Business Education must be completed simultaneously. Refer to the special secondary credential in Business Education. After the above requirements have been met, the candidate for the general secondary credential shall complete a graduate year including the following courses in his major:

| *Graduate Year* | *Units* |
|---|---|
| Select four units from the following: | |
| Business 203, Office Management | 2 |
| Business 213, Problems in Business Education | 2 |
| Business 223, Problems of Distributive Business | 2 |
| Business 233, Administration and Supervision of Business Education | 2 |
| Business 260, Advanced Problem Analysis (Accounting) | 2 |

### Minor in Business Education

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Business 1A-1B, Typewriting | 6 |
| Business 14A-14B, Principles of Accounting | 6 |
| *Upper Division* | |
| Nine upper division units should be selected in consultation with adviser in business education | 9 |

### Minor in Economics

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Economics 1A-1B, Principles of Economics | 6 |
| A year course in another social science area | 6 |
| *Upper Division* | |
| Economics 100A, Intermediate Economic Thought | 3 |
| Economics electives | 6 |

### Major in English

| | |
|---|---|
| *Lower Division* | |
| One year-course from lower division English electives | 6 |
| Lower division English electives | 6 |
| *Upper Division* | |
| Upper Division English courses selected under the supervision of the departmental representative | 24 |
| *Graduate Year* | |
| One of the graduate seminars | 2 |
| English 192, The English Language (if not taken as an undergraduate) or 191, 195, or an additional seminar | 2–3 |

### Minor in English

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| English 1 or 41, Composition | 3 |
| English electives | 6 |
| *Upper Division* | |
| English electives (student should consult with departmental adviser) | 12 |

### Major in French

| | |
|---|---|
| *Lower Division* | |
| French 1, 2, 3, 4, 5, 6, or equivalents | 16 |
| Spanish 1, 2, or German 1, 2, or Latin 1, 2, or their equivalents | 6 |
| History 4A-4B (recommended) | |

*Upper Division*

| | Units |
|---|---|
| French 101A-101B, Conversation and Composition | 6 |
| French 199, Comprehensive Reading and Survey | 3 |
| Upper division courses in French with a maximum of six units which may be selected from related fields with the approval of the departmental representative | 15 |

*Graduate Year*

| | |
|---|---|
| French 214, Contemporary French Literature | 2 |
| French 220, Explication de Textes | 2 |

### Minor in French

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| French 1, 2, 3, 4, 5, 6, or equivalents | 16 |
| History 4A-4B (recommended) | |

*Upper Division*

| | |
|---|---|
| French 101A-101B, Conversation and Composition | 6 |

### Major in Health Education

This teaching major may be used as a major for the A.B. degree if the student has been admitted to candidacy for the general secondary credential and has completed at least eight units in professional education courses, including Education 184A-184B, by the date of degree candidacy. The major is designed around the general major, with health education as the field of concentration.

*Lower Division*

| | |
|---|---|
| Health Education 65, Community Health | 3 |
| Health Education 90, Physiology of Reproduction | 1 |
| Home Economics 61A, Nutrition | 2 |
| Physiology 1A, Human Physiology | 3 |
| Zoology 8, Human Anatomy | 3 |

*Upper Division*

36 upper division units to include the following:

| | |
|---|---|
| Health Education 145, Safety Education and Accident Prevention | 3 |
| Health Education 151, Health Education for Teachers | 2 |
| Health Education 152, Health Education Programs | 3 |
| Health Education 153, Administration of the School Health Program | 3 |
| Health Education 199, Special Study in Health Education | 3–6 |
| Physical Education 151, Instructor's Course in First Aid | 2 |
| Sociology 135, Marriage and the Family | 3 |
| Psychology 131, Foundations of Personality | 2 |
| Psychology 132, Personality Adjustment | 2 |
| Bacteriology 101, General Bacteriology | 4 |
| Six to nine upper division units selected from one of the teaching major or minor fields for the general secondary credential, selected with approval of the departmental adviser | 6–9 |

### Minor in Health Education

A minimum of 21 semester units required.

Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

*Lower Division*

| | |
|---|---|
| Health Education 21, Principles of Healthful Living | 2 |
| Health Education 65, Community Health | 3 |
| Health Education 90, Physiology of Reproduction | 1 |

*Upper Division*

| | |
|---|---|
| Health Education 145, Safety Education and Accident Prevention | 3 |
| Health Education 151, Health Education for Teachers | 2 |
| Health Education 152, Health Education Programs | 3 |
| Health Education 153, Administration of School Health Program | 3 |
| Health Education 199, Special Study in Health | 2–3 |
| Physical Education 151, Instructor's Course in First Aid | 2 |

### Minor in History

A minimum of 21 semester units required. A year course in United States History must be included.

| *Lower Division* | *Units* |
|---|---|
| History 4A-4B, Modern Europe, or 8A-8B, The Americas, or 9A-9B, Pacific Ocean Area, or 17A-17B, American Civilization | 6 |
| Electives chosen from anthropology, economics, geography (except Geography 1 or 3), political science, sociology | 6 |
| Additional social science electives | 0–3 |
| *Upper Division* | |
| History electives | 6–9 |

### Minor in Home Economics

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Home Economics 5, Foods | 3 |
| Home Economics 10, Clothing Fundamentals, or 11, Advanced Clothing | 3 |
| Electives in Home Economics | 3–6 |
| *Upper Division* | |
| Home Economics 105, Family Meals | 3 |
| Home Economics 150, Home Management | 3 |
| Home Economics 170, Child Care and Development | 3 |
| Electives in Home Economics | 3–6 |
| Electives for enrichment—see department chairman. | |

### Minor in Industrial Arts

A minimum of 21 semester units required.

| | | |
|---|---|---|
| *Lower Division* | | |
| Industrial Arts 2, Mechanical Drawing | | 3 |
| Select at least three courses from the following: | | 9 |
| Industrial Arts 31, Elements of Metalwork | 3 | |
| Industrial Arts 51, Elements of Woodwork | 3 | |
| Industrial Arts 61, Elements of Electricity | 3 | |
| Industrial Arts 71, Elements of Transportation Machinery | 3 | |
| *Upper Division* | | |
| Industrial Arts 121, Advanced Mechanical Drawing | | 3 |
| Select appropriate upper division electives | | 6 |

### Major in Life Science and General Science

| | |
|---|---|
| *Lower Division* | |
| Zoology 1A-1B, General | 8 |
| Botany 2A-2B, General, or 1, Introduction | 4–8 |
| Zoology 20, Human Anatomy and Physiology, or Physiology 1C, Human Physiology | 2–3 |
| Chemistry 2A-2B | 6 |
| Physics 2A-2B | 6 |
| Geology 2, General, Astronomy 1, Descriptive, and Physics 3A-3B, Physical Measurements, recommended. | |
| *Upper Division* | |
| Zoology 119, Field Zoology | 4 |
| Botany 114, Plant Taxonomy, or Botany 119, Field Botany | 3–4 |
| Bacteriology 101, General Bacteriology | 4 |
| Botany 155, Genetics, or Zoology 165, Human Heredity | 2 |
| Zoology 160, Evolution | 2 |
| Zoology 150, Readings in Biology | 2 |
| Two courses chosen from the following: | |
| Zoology 110, 112, 113, 115, 118, 121 | 7–8 |
| Twelve units in natural science courses may be counted as general education toward the natural science requirement. | |

| *Graduate Year* | *Units* |
|---|---|
| Zoology 200, Seminar | 3 |
| Zoology 202, Hydrobiology, or Zoology 213, Advanced Studies in Ornithology | 2 |

## Minor in Life Science and General Science

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Biology 3, Principles, and Biology 4, Plant and Animal Types | 6 |
| Physical Science 1 and 2, Introduction | 6 |
| Physiology 1C, Human Physiology | 2 |
| *Upper Division* | |
| Botany 114, Plant Taxonomy, Botany 119, Field Botany, or Zoology 119, Field Zoology | 3–4 |
| Botany 150, Readings in Biology | 2 |
| Zoology 160, Evolution | 2 |

## Major in Mathematics

| | |
|---|---|
| Mathematics 3A, Analytic Geometry | 3 |
| Mathematics 3B, First Course in Calculus | 3 |
| Mathematics 4A, Second Course in Calculus | 3 |
| Additional mathematics or work in related areas | 3 |

***Suggested courses in related areas:*** Astronomy 1, Descriptive Astronomy; Business 2, Mathematics of Finance; Engineering 1A, Plane Surveying; Engineering 21, Descriptive Geometry; Physics 4A, Mechanics of Solids and Fluids; Physics 2A, General.

| | |
|---|---|
| ***Upper Division*** | |
| At least one course in Algebra | 3 |
| At least one course in Geometry | 3 |
| Mathematics 140A, Mathematical Statistics | 3 |
| Mathematics 117, Intermediate Calculus (unless 4B, Third Course in Calculus taken in lower division) | 3 |
| Mathematics 104, History of Mathematics | 3 |
| Additional upper division units in mathematics or related areas | 9 |
| *Graduate Year* | |
| Four units selected from the following: | |
| Mathematics 201, Concepts of Geometry from an Advanced Point of View | 2 |
| Mathematics 202, Concepts of Algebra from an Advanced Point of View | 2 |
| Mathematics 204, Advanced Work in the History of Mathematics | 2 |
| Mathematics 224, Functions of a Complex Variable | 3 |

## Minor in Mathematics

A minimum of 21 semester units required.

| | |
|---|---|
| ***Lower Division*** | |
| Mathematics D, Trigonometry (or high school equivalent for which pattern credit may be allowed) | 3 |
| Mathematics 3A, Analytic Geometry | 3 |
| Mathematics 3B, First Course in Calculus | 3 |
| One course selected from courses in related areas (See above under teaching major in mathematics) | 3 |
| *Upper Division* | |
| Mathematics 104, History of Mathematics | 3 |
| Mathematics electives | 6 |

## Major in Music

The requirements for the A.B. degree and the special secondary credential in music should be completed simultaneously. Students transferring from another institution with the A.B. degree and a major in music should consult with the departmental representative for special program planning. Refer to the special secondary credential in music. After the above requirements have been met, the candidate for the general secondary credential shall complete a graduate year including 4 units selected from the following courses in his major:

*Graduate Year*

Four units selected from the following:

| | *Units* |
|---|---|
| Music 200A-200B, Special Problems in Music | 2–2 |
| Music 203, Musicology | 2 |
| Music 206, Composition | 2 |

### Minor in Music

A minimum of 21 semester units required. The student is required to demonstrate vocal or instrumental proficiency before admission to the minor program may be granted. As laboratory experience, the student with music as a minor is required to participate in one music activity each semester (in special cases this requirement may be waived by the Chairman of the Music Department). A maximum of four units of credit from music activities may be used toward the total graduation requirement.

*Lower Division*

| | |
|---|---|
| Music 8A-8B, Fundamentals, and Harmony | 6 |
| Music 10A-10B, Piano (may be omitted in part or in full upon demonstration of proficiency) | 2 |
| Music activities chosen from courses numbered 70 to 87 | 2 |
| Selected from the following: Music 15A, 20A, 25A, 30A | 3–5 |

*Upper Division*

| | |
|---|---|
| Music 101A, History of Music | 3 |
| Music 146A, Fundamentals of Conducting | 1 |
| Music 146B, Instrumental Conducting, or 146C, Choral Conducting | 1 |
| Music activities chosen from courses numbered 170 to 187 | 2 |
| Selected from the following: Music 111, 112, 116, 117, 121, 122, 126, 127, 131, 132, or 150 | 1 |

### Major in Physical Education for Men

The requirements for the A.B. degree and the special secondary credential in physical education must be completed simultaneously. Refer to special secondary credential in physical education. After the above requirements have been met, the candidate for the general secondary credential shall complete a graduate year including the following courses in his major:

Select two courses from the following:

| | |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |
| Physical Education 298, Special Study | 2 |

### Minor in Physical Education for Men

A minimum of 21 semester units required.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

*Lower Division*

| | |
|---|---|
| Physical Education 53, Physical Education in the Elementary Schools | 2 |
| Physical Education 72, Introduction | 2 |
| Electives | 2–4 |

*Upper Division*

| | |
|---|---|
| Professional activity courses (should be selected in consultation with departmental representative) | 4 |
| Physical Education 151, Instructor's Course in First Aid | 2 |
| Physical Education 190, Administration of Physical Education in Secondary Schools | 3 |
| Physical Education 170A or 170B Recreational Leadership | 2 |
| Electives | 2–4 |

## Major in Physical Education for Women

The requirements for the A.B. degree and the special secondary credential in physical education must be completed simultaneously. Refer to the special secondary credential in physical education. After the above requirements have been met, the candidate for the general secondary credential shall complete graduate year including the following courses in his major:

Select two courses from the following:

| | Units |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education, and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |
| Physical Education 298, Special Study | 2 |

## Minor in Physical Education for Women

A minimum of 21 semester units required.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

*Lower Division*

| | |
|---|---|
| Physical Education 1A, Fundamental Skills | ½ |
| Physical Education 2A, Folk Dancing | ½ |
| Physical Education 3A, Modern Dance | ½ |
| Physical Education 4, 5, 6, Team Sports | 1½ |
| Physical Education 53, Physical Education in Elementary Schools | 2½ |
| Physical Education electives | 3½–4½ |

*Upper Division*

| | |
|---|---|
| Physical Education 156A-156B, Sports Methods | 4 |
| Physical Education 161, Folk Dancing Materials and Advanced Techniques | 2 |
| Electives selected from Physical Education 190, 170B, 164A-164B | 5–6 |

## Major in Physical Science and General Science

To obtain a teaching major in physical science and general science for the general secondary credential a student obtaining the A.B. degree in chemistry, physics, or physical science should include in his program the following courses, which will also satisfy the natural science requirements for general education:

*Lower Division*

| | |
|---|---|
| Astronomy 1, Descriptive | 3 |
| Biology 3 and 4, General, and Plant and Animal Life | 6 |
| Geology 2 or 1A, General or Physical | 3–4 |

Recommended electives: Astronomy 9, Geography 3, Geology 3; general education courses in literature, philosophy, and the arts: Physical Science 10, Industrial Arts 5 and/or 6.

*Upper Division*

Recommended electives: Botany 119, Chemistry 101, Physics 107, Physics 158, Zoology 119; general education course in social science: Geography 145.

*Graduate Year*

Select four units from the following:

| | |
|---|---|
| Chemistry 200, Seminar | 2–4 |
| Physics 200, Seminar | 2–4 |

## Minor in Physical Science and General Science

This minor consists of 26 units in courses specified below.

| | |
|---|---|
| Astronomy 1, Descriptive Astronomy | 3 |
| Biology 3 and 4, Principles, and Plant and Animal Types | 6 |
| Chemistry 2A-2B, or 1A-1B, Fundamentals, or General | 6–10 |
| Geology 2 or 1A, General, or Physical | 3–4 |
| Physics 2A-2B and 3A-3B, or 4A-4B-4C, General, or Principles | 8–12 |

The following courses are recommended as electives: Astronomy 9, Geology 3, Chemistry 101, Geography 3, Geography 145, Physics 148, Botany 119, or Zoology 119, Physical Science 10, Industrial Arts 5 and 6.

### Major in Psychology

This major can be used for a general secondary credential only if the candidate completes *two* teaching minors.

| *Lower Division* | *Units* |
|---|---|
| Psychology 5 and 6, Principles | 6 |
| *Upper Division* | |
| Psychology 104A, Statistical Methods | 3 |
| Psychology 105B, Individual Mental Testing | 3 |
| Psychology 131, Foundations of Personality | 2 |
| Psychology 132, Personality Adjustment | 2 |
| Psychology 151, Introduction to Clinical Appraisal | 3 |
| Psychology 160A, Experimental Psychology | 3 |
| Electives to be selected with approval of the departmental representative | 8 |
| *Graduate Year* | |
| Psychology 201, Seminar in Psychology | 2 |
| Education 230, Guidance Problems in Secondary Education | 3 |

### Minor in Recreation

A minimum of 21 semester units required.

Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| *Lower Division* | |
|---|---|
| Physical Education activities | 2 |
| Physical Education 53, Physical Education in Elementary Schools | 2 |
| Electives selected from Art 61B, Crafts, or from the fields of dance, drama or music | 2–4 |
| *Upper Division* | |
| Physical Education 151, Instructor's Course in First Aid | 2 |
| Recreation 165, Administration of Community Recreation | 3 |
| Recreation 170A-170B, Recreational Leadership | 2–4 |
| Recreation 184A-184B, Field Work in Recreation | 3–6 |
| Recreation 199, Special Study in Recreation | 1–6 |

### Major in Romance Languages

| *Lower Division* | |
|---|---|
| Spanish 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| French 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| History 4A-4B, or 8A-8B (recommended) | |
| *Upper Division* | |
| Spanish 101A-101B, Conversation and Composition | 6 |
| French 101A-101B, Conversation and Composition | 6 |
| Spanish 199 or French 199, Comprehensive Reading and Survey Course | 3 |
| Courses in Spanish literature, French literature or Spanish-American literature, selected with the approval of the departmental representative | 9 |

NOTE: At least nine units of upper division courses must be taken in each language.

*Graduate Year*

Any two of the following courses:

| | |
|---|---|
| French 214, Contemporary French Literature | 2 |
| French 220, Explication de Textes | 2 |
| Spanish 201, Old Spanish | 2 |
| Spanish 204, Seminar in Spanish-American Literature | 2 |

### Major in Social Science

This teaching major may be used as a major for the A.B. degree if the lower and upper division requirements listed below are completed and the student has been admitted to candidacy for the general secondary credential and has completed at least eight units of professional courses in education by the date of degree candidacy. Twelve units of social science courses in the major may be counted toward general education requirements in social science.

The major must include six units in United States history and work from at least four of the social science fields listed below.

*Lower Division*

A student must complete a minimum of six units in each of at least three fields he may select from the departments named below:

Economics
Geography
History
Political Science
Sociology and/or Anthropology

*Upper Division*

A student must complete a minimum of 30 units with the approval of the departmental representative as follows:

| | *Units* |
|---|---|
| 1. A minimum of 12 units from any field named above | 12 |
| 2. A minimum of six units from each of two fields named above, excluding the field selected for the major upper division concentration | 12 |
| 3. Electives from social science fields | 6 |

*Graduate Year*

| | |
|---|---|
| Post-bachelor work selected with approval of the departmental representative | 4 |

**Major in Spanish**

*Lower Division*

| | |
|---|---|
| Spanish 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| French 1, 2, or German 1, 2, or Latin 1, 2, or their equivalents | 6 |
| History 4A-4B, or 8A-8B (recommended) | |

*Upper Division*

| | |
|---|---|
| Spanish 101A-101B, Conversation and Composition | 6 |
| Spanish 199, Comprehensive Reading and Survey | 3 |
| Upper division courses in Spanish with a maximum of six units which may be selected from related fields with the approval of the departmental representative | 9–15 |

*Graduate Year*

| | |
|---|---|
| Spanish 201, Old Spanish | 2 |
| Spanish 204, Seminar in Spanish-American Literature | 2 |

**Minor in Spanish**

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| Spanish 1, 2, 3, 4, 5, 6, or equivalents | 16 |
| History 4A-4B, or 8A-8B (recommended) | |

*Upper Division*

| | |
|---|---|
| Spanish 101A-101B, Conversation and Composition | 6 |

**Major in Speech Arts**

The requirements for the A.B. degree and the special secondary credential in Speech Arts must be completed simultaneously. Refer to the special secondary credential in Speech Arts. After the above requirements have been met, the candidate for the general secondary credential shall complete a graduate year including the following courses in his major:

*Graduate Year*

Select four units from the following courses:

| | |
|---|---|
| Speech Arts 260, Seminar in Oral Interpretation | 2 |
| Speech Arts 221, Seminar in Articulatory Problems in Speech | 2 |
| Speech Arts 245, Seminar in Technical Practice | 2 |
| Speech Arts 259, Seminar in Stage Direction | 2 |
| Speech Arts 200, Seminar in History or Oratory | 2 |

**Minor in Speech Arts**

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| Speech Arts 3, Speech for Communication | 2 |
| Speech Arts 4, Oral Communication | 3 |
| Speech Arts 11A-11B, Interpretation | 6 |
| Speech Arts 82, Radio Announcing | 3 |
| Electives in speech from 61 or 63 | 0–1 |

*Upper Division*

| | |
|---|---|
| Speech electives (should be selected in consultation with departmental representative) | 6–7 |

# CURRICULA LEADING TO CREDENTIALS IN ADMINISTRATION AND SUPERVISION

## CURRICULA LEADING TO CREDENTIALS IN ELEMENTARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the general requirements of the State of California for all degrees, the candidate shall meet the following requirements:

(a) Possess a valid general elementary credential.
(b) Present written evidence of two years of successful teaching experience in the elementary schools.
(c) Complete 30 semester units for the administration credential (24 units for the supervision credential) of upper division or graduate work in addition to the holding of the general elementary credential. These units shall include specific courses designated by the State Department of Education and the college.
(d) Maintain a grade point average of 1.75 in work taken subsequent to receipt of the general elementary credential.
(e) Complete a minimum of 15 units of work in residence at San Diego State College.
(f) Make formal application to the Coordinator of Elementary Education.
(g) Earn the recommendation of the Division of Education.

Students applying for the elementary administration or supervision credentials should register with the office of the Chairman of the Division of Education and confer with the Coordinator of Elementary Education concerning the courses which may be offered in satisfaction of the requirements. Outlines of pattern requirements for either the elementary supervision or administration credentials may be obtained by writing the Coordinator of Elementary Education.

## SPECIAL SUBJECT SUPERVISION CREDENTIAL

This credential is available for persons who wish to supervise in a special subject area. Those desiring this credential should see the Chairman of the Division of Education.

## CURRICULA LEADING TO CREDENTIALS IN SECONDARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the general requirements of the State of California for all degrees, the candidate shall meet the following requirements:

(a) Possess a valid general secondary credential.
(b) Present written evidence of two years of successful teaching experience.
(c) Complete 18 semester units for the administration credential (15 semester units for the supervision credential) of upper division or graduate work after holding a valid general secondary credential. These units must include a specific pattern of courses designated by the State Department of Education and the college.
(d) Maintain a grade point average of 1.75 on units under (c).
(e) Complete a minimum of 12 units of work in residence at San Diego State College after holding the general secondary credential.
(f) Make formal application to the Coordinator of Secondary Education.
(g) Earn the recommendation of the Division of Education.

Students applying for the secondary administration or supervision credentials should register with the office of the Chairman of the Division of Education and confer with the Coordinator of Secondary Education concerning the courses which may be offered in satisfaction of the requirements. Outlines of pattern requirements for either the secondary supervision or administration credentials may be obtained by writing the Director of Secondary Education.

# THE BACHELOR OF EDUCATION DEGREE AND THE GENERAL ELEMENTARY CREDENTIAL

## ELIGIBILITY FOR CANDIDACY

Teachers in California public schools with a minimum of 60 semester units of standard college work are eligible for candidacy for the Bachelor of Education degree. The purpose of this degree is to increase the professional competence of teachers in California public schools who do not hold a bachelor's degree. The educational program of each applicant shall be determined on the basis of his previous preparation and of the services he is to render. In the period of professional preparation the applicant shall be guided into those learning experiences designed to meet his cultural and professional needs.

## MINIMUM REQUIREMENTS

An applicant for the general elementary credential and the Bachelor of Education degree shall comply with the procedures for application and with the requirements for personal qualifications and general training and shall have completed a program including the following minimum requirements:

a. A four-year college course of 124 semester units, or the equivalent.

b. Eighteen semester units, or the equivalent, of professional work in education, constituting an organized program designed to prepare candidates in the following areas:

   (1) The evolution of educational thought and practice as to the function of the school in a democratic society, with emphasis on the elementary school.

   (2) The nature of individual growth and development; the psychological aspects of learning; child study, with emphasis on directed observation of children; mental hygiene and personality development; parent education; guidance practices.

   (3) The selection and arrangement of learning experiences, instructional materials, learning methods and appraisal techniques related to all statutory requirements for teaching, including reading, writing, spelling, language study, arithmetic, geography, history of the United States and of California, civics including the Constitution of the United States, music, art, physical education, healthful living, morals and manners, safety education, and fire prevention.

   (4) The use of audio-visual aids in instruction.

c. Directed teaching in the elementary school, eight semester units, or the equivalent, under the supervision of superior teachers in actual classroom situations of the elementary school level.

d. Sixty-one semester units or the equivalent in basic subject fields, distributed approximately as follows:

   (1) *Social Studies.* Twelve semester units, or the equivalent, with emphasis upon current economic, political, and social problems and world history and geography, sociology and anthropology. The legal requirement in United States Constitution and American history, institutions, and ideals shall be included in the social studies program.

   (2) *Science.* Twelve semester units, or the equivalent, in the fields of physical and biological science, with emphasis upon the study and use of the environment.

(3) *English*, including speech. Twelve semester units, or the equivalent, including oral and written expression, world literature, children's literature, dramatics, detection and correction of speech defects, and the use of books and libraries.

(4) *Mathematics.* Three semester units, or the equivalent, including subject matter and techniques essential in the teaching of mathematics in the elementary school.

(5) *Health and Hygiene.* Three semester units, or the equivalent, including personal hygiene, subject matter and techniques essential in health education to elementary school pupils.

(6) *Physical Education.* Three semester units, or the equivalent, including subject matter and techniques essential in the teaching of physical education to elementary school pupils.

(7) *Music.* Eight semester units, or the equivalent, including content and techniques appropriate for the elementary school.

(8) *Art.* Eight semester units, or the equivalent, in graphic art and industrial arts applicable to learning experiences appropriate for elementary school children.

e. The remaining units necessary to complete the requirements for the Bachelor of Education degree shall be distributed among those offerings of the institution that best serve the cultural and professional needs of the candidate, except that a course or the equivalent in fire prevention must be included.

## EVALUATION OF TEACHING EXPERIENCE AND SUBJECT MATTER FIELDS

a. A candidate with two or more years' teaching experience may be awarded a maximum of 8 semester units of credit, or the equivalent, in directed teaching provided he demonstrates satisfactory skill to a representative of the institution under whose direction he is completing his degree program, or provided other conditions set by the institution to insure classroom skill are met. This credit shall not be applied until the candidate has completed at least 112 semester units, or the equivalent, of his program.

b. Credit toward the B. Ed. degree may be secured by passing comprehensive examinations in the fields of study mentioned in paragraphs (b) and (d) above.

## INSTITUTION AND RESIDENCE REQUIREMENTS

a. A minimum of 30 semester units, or the equivalent, must be secured from the college conferring the degree.

b. A least 12 semester units, or the equivalent, must be earned in campus residence course work at the college conferring the degree and must be secured after completion of at least 90 semester units, or the equivalent.

c. A maximum of 30 units may be secured by examination.

# PREPROFESSIONAL AND VOCATIONAL CURRICULA

Preprofessional and vocational curricula, ranging in length from two to four years of collegiate work, are offered. Curricular outlines of preprofessional study, which are presented on the following pages, meet the typical requirements for admission to professional schools. Students expecting to complete their professional training at other institutions should modify the suggested outlines of study to meet the requirements of the professional schools of their choice. Curricular outlines for complete training leading to vocations are also presented on the following pages.

Curricular outlines are presented for the following:

Preagricultural
Business
Predental
Engineering
Home Arts
Inter-American Relations
Journalism
Laboratory Technique
Prelegal
Life Science Vocational
Premedical
Personnel Management
Prepharmacy
Public Administration
Recreation
Presocial Work

Students planning to enter professional or vocational occupations in forestry, nursing, optometry, or veterinary science may obtain assistance from advisers in these areas in planning lower division courses leading to further education in these fields.

## PREAGRICULTURAL CURRICULA

These curricula are provided for students who plan to enter the field of agriculture to enable them to obtain basic science and general education courses before transferring to an agricultural institution. These students should ascertain the lower division requirements of the college to which they expect to transfer and include such requirements in the plan suggested below.

Students in high school preparing to study agriculture should include the following subjects: Elementary algebra, plane geometry, intermediate algebra, trigonometry, chemistry, physics, mechanical drawing, and three years of one foreign language, if required by the college to which the student expects to transfer.

*Curriculum in Plant Science:* Freshman year, physical education activities, Health Education 21, Chemistry 1A-1B, Botany 2A-2B, Physics 2A-2B, English 1, and Speech Arts 3 (32 units) ; sophomore years, physical education activities, Economics 1A-1B, English 2A or other literature course, Chemistry 101 and 102, Geology 1A or 2A, Bacteriology 1, Zoology 1A and Psychology 1 (32 units).

*Curriculum in Animal Science:* Freshman year, physical education activities, Chemistry 1A-1B, Zoology 1A-1B, Physics 2A-2B, English 1, Speech Arts 3, Health Education 21 (32 units) ; sophomore year, physical education activities, Psychology 1, English 2A or other literature course, Economics 1A-1B, Bacteriology 1, Botany 1, Chemistry 101 and 102, Zoology 20 or 8, and 100 (34 units).

Students should consult with the adviser in the preagricultural curriculum for selection and arrangement of courses.

## BUSINESS CURRICULA

The Division of Business consists of three departments: Accounting and Business Management; Marketing; and Business Education, Secretarial and Office Management. Each department offers a major in business with fields of specialization within the department.

The Department of Accounting and Business Management offers specialization in accounting, banking and finance, business management, insurance, and credit management. The Marketing Department offers specialization in marketing and in personnel management. The Business Education, Secretarial and Office Management Department offers specialization in secretarial and office management and in teacher education leading to the special secondary and general secondary school credentials.

The first two years of the business curricula are introductory. During this period the student acquires a basis for further study and an understanding of the place that business fills in modern economic life. There are some differences in the lower division requirements in the various fields of specialization. A selection of the field of specialization should be made as early as possible by the student. A student may transfer from one field of specialization to another, but with possible loss in time because of the differences in requirements among the various fields. The student follows a program of studies that is designed to provide a vocational ability in at least one area.

Refer to the departments in the Division of Business for specific requirements in the business major with fields of specialization. Students should consult with the departmental adviser in selection and arrangement of courses.

## PREDENTAL CURRICULUM

Candidates for a degree in dentistry should ascertain the entrance requirements of the dental college to which they expect to transfer and should make whatever changes in the following typical requirements that may seem desirable in satisfying the requirements of the specific dental college.

The curriculum for dental hygiene is essentially the same as for predentistry.

High school students planning to enter dentistry should include in the high school program the following subjects: Elementary algebra, plane geometry, intermediate algebra, chemistry, physics, mechanical drawing, and three units in one foreign language if required by the college to which a student expects to transfer.

*Course of Study for Predental Curriculum:* Freshman year, physical education activities, Health Education 21, Psychology 1, Speech Arts 3, English 1, English 2A or other literature course, Chemistry 1A-1B, Physics 2A-2B and 3A-3B (32 units); sophomore year, physical education activities, Chemistry 5A, Zoology 1A-1B, Mathematics C and D, social science including courses in U. S. history and Constitution, and electives in general education (32 units).

The following courses for a third year in preparation for dentistry are suggested for students who fail to receive acceptance from a dental college after complet-ng the prescribed 60 units: Chemistry 101 and 102; Zoology 100 and 106; Art 119A, Psychology 11; additional courses in general education.

## ENGINEERING CURRICULA

The engineering program is designed to give a student a sound training in the undamentals of general engineering with a minimum of specialization, and at the same ime provide the broad training and experiences which constitute a liberal education. The program leads to the degree of Bachelor of Science in Engineering.

Students graduating in engineering will find employment in various functions of heir chosen field. For example, a student who has selected the mechanical engineering ption may find employment in the operation of a steam plant, or in the application and ales of construction equipment.

The program is intended to provide the essential training in those functions which re within the scope of a four year program. These, specifically, are the production, peration, maintenance, service, sales, and management functions of engineering. Curicula and individual courses are designed to emphasize these functions. Students who esire training for work in such fields as research, design, and development should plan o complete their education at a University.

### FIELDS OF SPECIALIZATION

In the freshman and sophomore years all students are expected to take the courses isted below. In the junior and senior years optional programs are available which provide limited specialization in aeronautical, chemical, civil, electrical, electronic and mechanical engineering, and in engineering economics. Normally, students are expected o elect one of these basic options. In certain cases equivalent programs may be worked out which will better suit the needs of an individual student.

## HIGH SCHOOL PREPARATION

The high school program should include the following subjects: Elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; solid geometry, ½ unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit.

## GENERAL REQUIREMENTS

Courses must be included to satisfy all requirements for the B.S. degree. See section of the bulletin entitled: Bachelor of Science Degree in Arts and Sciences. The curricula given below specify the requirements for the indicated options and include recommended electives to fulfill the requirements for general education. General education courses are prefixed with a *.

### Lower Division Requirements for All Engineering Students

| Freshman Year | *Units* 1st Sem. | 2d Sem. |
|---|---|---|
| * P.E. activities | ½ | ½ |
| Math. 3A-3B | 3 | 3 |
| Physics 4A | – | 4 |
| Chem. 1A-1B | 5 | 5 |
| * English 1 | 3 | – |

## HOME ARTS CURRICULUM

The Home Arts curriculum is designed to meet the needs of those student who wish to apply their knowledge to the various problems of home living. This curriculum is based on the *general major* in arts and sciences with a field of concentration i Home Economics combined with two other fields to be selected by the student in consultation with the home arts adviser and the Dean of Instruction. (Refer to the General Major in the section of the bulletin entitled: Bachelor of Arts Degree.) By appropriate selection of courses, the student may prepare for several related fields, suc as radio, community recreation, home service in industry, merchandising, and socia work.

*Summary of unit requirements:*

| | *Unit* |
|---|---|
| General education | 4 |
| Preparation for the general major | 2 |
| General major (upper division) | 3 |
| Electives | 1 |
| Total units required for graduation | 12 |

*Specific requirements for the major:* Lower division: Home Economics 1, 5, 10 55, 61A-61B; Sociology 50 and 51; six lower division units in a third field. Uppe division: 15 upper division units to be selected from Home Economics 100, 101, 105 135, 150, 160A-160B, 170, with the approval of the adviser in home arts; nine uppe division units to be selected from a second field; and 12 upper division units to b selected from a third field. A minimum of six lower division units is usually required i each field of the general major as preparation for upper division work.

Students should consult with the adviser in the home arts curriculum for selection and arrangement of courses.

## INTER-AMERICAN RELATIONS

This curriculum, designed around the general major, provides (1) a basis for a more effective understanding of the opportunities and problems of international relations in the western hemisphere; (2) facilities for a basic education and training for a business or professional career involving international relations; (3) undergraduate preparation for the comprehensive examinations required for appointment in the Foreign Service, Department of State.

High school students preparing to enter this area of Foreign Service should include in the high school program three years in one foreign language, preferably Spanish.

Students should consult with the adviser in Inter-American Relations regarding an appropriate program of studies.

## JOURNALISM CURRICULUM

The purpose of the journalism curriculum is to prepare students for positions on mass communications media and to offer to teacher candidates background for educational work in journalism. The four-year program contemplates that in addition to professional training, majors shall acquire a broad background in such related fields as English, sociology, psychology, political science, economics, and history. All majors are required to take survey courses in newspaper and radio techniques and photography. Introductory courses in mass communications research are offered. The program is so designed that during the final two years, majors may take specialized work in newspaper reporting and editing, magazine writing, advertising and radio production. Producing the campus newspaper serves as a laboratory for students. Arrangements are made for students to serve internships on daily and weekly newspapers, industrial magazines and radio stations.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 12–15 |
| Major (upper division) | 24 |
| Electives | 40–43 |
| Total units required for graduation | 124 |

*Specific requirements for the major:* Lower division: Journalism 51A-51B, Physical Science 10, Speech Arts 81, and Business 2A, or proficiency in typing. Upper division: 24 upper division units in journalism including Journalism 102 and 151. A minor is not required.

## LABORATORY TECHNIQUE CURRICULUM

The laboratory technique curriculum is offered with the B.S. degree. This curriculum, with modifications for the types of licensures, is provided to satisfy the academic requirements to qualify for the examinations given by the State of California Public Health Department for Public Health Bacteriologist, Clinical Laboratory Technician, and Medical Technologist. If the curriculum outlined by this College is followed, only six months of apprenticeship are required to complete the qualifications for the licensing examinations for Public Health Bacteriologist and Clinical Laboratory Technician. Five years of experience as a Clinical Laboratory Technician are necessary to qualify for the examination for licensure as a Medical Technologist.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major required for State licensure exclusive of General Education courses | 23–37 |
| Major (upper division) | 36–44 |
| Electives | 2–24 |
| Total number of units for graduation | 128 |

*Specific requirements for the major:* Lower division (including courses in General Education, but required for licensure): Chemistry 1A-1B, * Chemistry 5, Biology 3 and 4 or Zoology 1A-1B, Bacteriology 1 or 101, Physiology, 1A and 1C, * Physics 2A and 3A. Upper division: 36 upper division units, including Chemistry 101, * Chemistry 114, 115, 116, Bacteriology 102, 103 and one or more courses selected from Bacteriology 105, 106 or 107, * Zoology 109, Zoology 128, 104, 126, and 108, and additional electives to complete the major. Twelve units of science courses in the major field may be counted as general education in natural science.

Students should consult with the adviser in the Laboratory Technique Curriculum for selection and arrangement of courses.

---

* These courses are not required for the Public Health Bacteriologist license.

## PRELEGAL CURRICULUM

The entrance requirements of schools of law range from two years to three and four years of prelegal work. The lower division requirements of the arts and sciences curricula should be met in full whether the prelegal curriculum extends over a period of two, three, or four years.

The following curriculum is designed to meet the recommendations of standard American schools of law for a broad and liberal education. For the majority of pre-legal students a general major with concentration in economics, political science, and history, or a major-minor combination in these fields will constitute the most effective preparation for later professional study in law and for later activities in the field of business.

*Preparation for the major:* Lower division: Business 14A-14B, Economic 1A-1B, Political Science 71A-71B or 1A-1B, and a year-course in history. Recon mended: six units from Philosophy 1A-1B, 3A-3B, or 20.

### Upper Division

In the junior and senior years the student will plan his course with the couns of his adviser in terms of the field of law in which he plans to work, but keeping i mind the entrance examinations and other requirements for admission to schools c law. The course selected will be drawn from the preferred and recommended list below. Optional courses, that is courses not found in the preferred and recommende lists, may be taken to satisfy the general major pattern requirement, but only wit the consent of the student's prelegal adviser. These courses are not to be considere as general electives.

The student must complete a master plan approved by the prelegal adviser an filed with the Registrar.

*Preferred List*

Economics 133, 150, 151, 170.
History 151A-151B, 172A-172B, 175A-175B.
Philosophy 121, 129.
Political Science 139A-139B.
Psychology 145.
Sociology 173, 174.

*Recommended List*

Economics 102, 110, 111, 128, 131, 13 142, 171, 172, 185, 190, 195.
English 106, 120, 126A-126B, 129, 131 192.
History 111A-111B, 121A-121B, 143A 143B, 175A-175B, 179A-179B, 181A 181B.
Philosophy 101, 111A-111B, 130.
Political Science 105, 111A-111B, 120 121, 122, 140A, 140B, 142, 143, 150A 150B, 152, 153, 154, 158A-158B, 198
Sociology 152, 170, 174, 187.
Speech Arts 162, 191, 192.

## LIFE SCIENCE VOCATIONAL CURRICULA

Vocational curricula are offered for the fields of entomology, fish and game and wild life. Requirements for these curricula are the same as for the B.S. degree i zoology; the specialization for a particular occupation lies within the upper divisio electives of the B.S. degree program.

Students in high school planning to enter any of these life science curricula should include in the high school program the following subjects: Elementary algebra, plane geometry, intermediate algebra, trigonometry, chemistry, and physics. Thre years of French or German recommended.

*Courses in Entomology, Fish and Game, and Wild Life:* Courses in the field of specialization may be selected from the following:

Botany 105, Taxonomy of Plants
Chemistry 101, Organic Chemistry
Economics 140 or
 Psychology 104, Statistics
Political Science 140A-140B, Public Administration
Zoology 101, General Physiology
Zoology 104, Microtechnique
Zoology 113, Ornithology
Zoology 115, Cold Blooded Vertebrates
Zoology 118, Mammalogy
Zoology 121, General Entomology
Zoology 122, Systematic Entomology
Zoology 125, Economic Entomology
Zoology 126, Medical Entomology
Zoology 128, Parasitology
Zoology 153, Economic Biology

Students should consult with the adviser in the life science curricula for selection and arrangement of courses.

## PREMEDICAL CURRICULUM

The entrance requirements of medical colleges ordinarily range from three to four years of premedical work. The lower division requirements of the liberal arts curricula include the general requirements of standard medical colleges and should therefore be met in full whether the curriculum extends over a period of three or of four years. All plans for premedical work should include an arrangement of courses to meet the requirements of the medical college which the student expects to enter.

Students ordinarily elect to concentrate in chemistry and zoology with a major n one and a minor in the other. Requirements for these majors and minors are decribed under these departments.

High school students planning to enter medicine should include in the high school rogram the following subjects: Elementary algebra, plane geometry, intermediate lgebra, chemistry, physics, two or three years of French or German. Two years of atin also recommended.

Students should consult with the adviser in the premedical curriculum for election and arrangement of courses.

## PERSONNEL MANAGEMENT CURRICULA

A student desiring to prepare for personnel management may follow one of the hree plans outlined below. Emphasis is placed on different areas, depending upon the ocational objective. A student preparing for graduate work in personnel managenent should consult with the adviser in his selected field in choice and arrangement f courses. Courses in the major are in addition to 45 units in general education courses.

*Business Personnel Management:* The major is designed around the general najor with the three fields of study in business, economics, and psychology. Lower livision requirements: Business 14A and 20, Psychology 6, and Economics 1A-1B (15 nits). Upper division requirements: Business 121, 153, 154, 198A; Economics 150, 51, 185; Psychology 104A, 105A, 121, 131, 152 (36 units). Other courses in business nay be substituted for Business 14A and 198A on the basis of individual counseling. Four additional upper division units must be completed for graduation. It is recomnended that these units and additional electives be chosen from the following: Busiess 186; Psychology 104B, 122, 132; Sociology 110, 170, 185; Political Science 71A, 71B and 143.

*Industrial Personnel Management:* The major is in the field of psychology with a minor in business, economics, political science, or sociology. Lower division requirements: Psychology 1, 5, and 6; six units in biology, physiology, and/or zoology; three units in philosophy; and six units in anthropology and/or sociology (24 units). Upper division requirements: 24 upper division units to include Psychology 121, 122, 131, 132, 145, 152, 160B, and electives in psychology to be selected in consultation with the departmental adviser. Recommended courses in departments other than psychology: Business 103A, 153 and 154; Economics 1A-1B, 100A, 150, 151, 170, and 185; Philosophy 20; Political Science 144 and 145; Sociology 50, 51; and six units selected from Sociology 135, 170, 180, 190; and Speech Arts 4.

*Public Personnel Management:* The major is designed around the general major with the three fields of study in political science, economics, and psychology. Lower division requirements: Political Science 71A-71B, Economics 1A-1B, and Psychology 6 (15 units). Upper division requirements: Political Science 140A-140B or 147A-147B, 144, 145, 146, 198; Economics 150, 151, 185; Psychology 104A, 105A, 121, 131, 152 (36 units). Another political science course may be substituted for Political Science 198 on the basis of individual counseling. Four additional upper division units must be completed for graduation. It is recommended that these units and additional electives be chosen from the following: Business 121; Economics 131; Political Science 142, 143.

## PREPHARMACY CURRICULUM

Some colleges of pharmacy offer a four-year curriculum, others a six-year curriculum of pharmacy. Students should ascertain the extent and requirements of the curriculum of the college of pharmacy they expect to enter. Colleges of pharmacy which offer the four-year curriculum normally permit not more than one year of credit in time for work completed in an institution other than a college of pharmacy. Colleges of pharmacy which offer a six-year curriculum normally permit not more than two years of credit in time for work completed in an institution other than a college of pharmacy. California state law requires that an applicant for the State Board Examination in Pharmacy must be a graduate of a recognized college of pharmacy which requires a resident attendance of not less than four years.

The high school program should include the following subjects: Elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; foreign language, 2 units.

At San Diego State College the following prepharmacy curricula are offered:

*Course of study for the four-year curriculum:* Freshman year, physical education activities, English 1 and a literature course, Chemistry 1A-1B, Zoology 1A-1B Botany 1, Mathematics 3A or 1, and electives (32 units).

*Course of study for the six-year curriculum:* Freshman year same as for th four-year curriculum. Sophomore year, physical education activities, foreign languag if needed, social science including U. S. history and Constitution courses, Physic 2A-2B and 3A-3B, Psychology 1, Health Education 21, and electives (32 units).

Students should consult with the adviser in the prepharmacy curricula for selection and arrangement of courses.

## PUBLIC ADMINISTRATION CURRICULUM

The program of training in public administration can be developed through a adaptation of a general major or through a major in political science. In either case the student will follow a sequence of work dealing with the principles and problem of organization for the carrying out of the functions of government, and public management. This latter aspect deals primarily with the directing and coordinating o work operations, the staffing of public agencies, the processes of budgeting and financial control, and the dynamics of management, namely planning, research, communications, leadership and human relations in the administrative process.

The public administration curriculum may be adapted to several goals, one bein the taking of junior administrative examinations for entrance into the governmen service at the local, state or federal levels, and preparation for advancement up th governmental ladder. It is designed also to prepare students for graduate work i public administration.

Selected students may participate in an internship program in local governmen offices. Working under the close supervision of governmental officials and the advise in public administration, the intern deals with actual administrative procedures an problems in government.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 12 |
| Major (upper division) | 36 |
| Electives | 31 |
| Total units required for graduation | 124 |

*Specific requirements for the major:* Lower division: Political Science 71A-71B Economics 1A-1B. Upper division: 36 upper division units, including Political Science 140A-140B, 198, Economics 131, and 140.

Students planning to enter public administrative fields should consult with a adviser in public administration.

### Minor

A *minor in public administration* is offered in arts and sciences for student majoring in fields other than political science or public administration. This mino consists of Political Science 71A-71B, 140A-140B, and three units of upper divisio work selected from Political Science 198, Internship in Government Administration or other political science course.

## RECREATION CURRICULUM

The curriculum in recreation is arranged under the plan for the general majo to provide a program to train for recreation and camp leadership, work with yout groups, and related activities. Refer to the general major in the section of the bulleti entitled: A.B. Degree in Arts and Sciences.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 20–22 |
| General major (upper division) | 36 |
| Electives | 21–23 |
| Total number of units required for graduation | 124 |

*Specific requirements for the major:* Lower division: Physical Education 2A, 4, 5, 6 (women); Physical Education 63 (men); Physical Education 53, Sociology 50, 51; and 12 units selected from the fields of art, industrial arts, music, physical education, and speech arts, with a maximum of six units in any one field (20-22 units). Upper division: 36 units distributed as follows: 13 units selected from Recreation 165, 170A-170B, 184A-184B, 199; nine units selected from Sociology 110, 173, 174, 185, 187, 190; nine units selected from Psychology 106, 131, 132, 145, 150, 170; Education 174. Physical Education 151. Four additional upper division units in electives are required to complete the 40 upper division units for graduation.

Students should consult with the adviser in the Recreation Curriculum for selection and arrangement of courses.

## PRESOCIAL WORK CURRICULUM

The professional curriculum in social service prepares for admission to graduate work in recognized American schools of social work. This curriculum should be pursued by those who plan careers in federal, state and local welfare work; social work in public schools including preparation for a teaching credential; family and children's private case work agencies; social settlement work; county probation work; child welfare agencies; statistical and investigational work in private and public agencies; work in public institutions for the defective and delinquent; medical social service and psychiatric social work in hospitals and clinics; executive positions in social work; and social work in numerous other organizations.

The lower division requirements of the arts and sciences curricula include the general requirements of recognized professional schools of social work and should therefore ordinarily be met in full. The courses indicated below meet the requirements for the general major. For description of the general major, refer to the section in the bulletin on the bachelor of arts degree in arts and sciences.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 21 |
| Major (upper division) | 38 |
| Electives | 20 |
| Total number of units for graduation | 124 |

*Specific requirements for the major:* Lower division: Sociology 50 and 51, Economics 1A-1B, Political Science 71A-71B or 1A-1B, and Psychology 11 (21 units). Biology 1 or 3 and 4 should be taken as general education courses in natural science. Recommended: courses from anthropology, foreign language, and speech arts. Upper division: Sociology 103, 187, 190, and an upper division elective (12 units); Economics, nine units selected from 102, 131, 150, 170, 185, 195; Political Science, six units selected from 140A, 140B, 142, 143; Psychology 145, 150, 151 (nine units); Zoology 165 or 155 (two units). An additional two units in upper division electives must be taken to complete the 40 upper division units required for graduation. Twelve units of social science in the major field may be counted as general education in social science.

Students should consult with the adviser in the social work curriculum for selection and arrangement of courses.

# ANNOUNCEMENT OF COURSES

## COURSE NUMBERS

Courses numbered from 1 to 99 are lower division (freshman or sophomore courses; those numbered 100 to 199 are upper division (junior or senior) courses those numbered 200 to 299 are graduate courses (see section on Admission and Registration for information concerning eligibility to enroll in these courses) those numbered 300 to 399 are professional education courses to be taken at the graduate leve

## CREDIT FOR UPPER DIVISION AND GRADUATE COURSES

A student with lower division standing is not eligible to take upper divisio courses, with the following exceptions: A student in the last semester of his sophomor year who is approaching upper division standing must carry sufficient lower divisio units to complete the required minimum of 60 units may carry upper division unit for the remainder of his study load. A student with sophomore standing may carr upper division courses for upper division credit provided that he has the writte approval of the chairman of the department and the Dean of Instruction. This writte approval must be filed in the Office of the Registrar on the form "Adjustment o Academic Record." Blank forms may be obtained by the student at the Office of th Registrar.

Graduate credit for courses numbered 200 to 299 is limited to students wit graduate status. (See Admission to Graduate Study in section on Admission an Registration.)

## GENERAL EDUCATION COURSES

Course numbers preceded by a "G" in parentheses are general education course which may apply toward requirements in general education unless specifically required as a part of the major field. Refer to the list of general education courses i the section of the bulletin entitled: General Requirements for the Bachelor of Art and Bachelor of Science Degrees.

## UNITS

Figures in parentheses indicate the unit value of the course.

One "unit" represents 50 minutes of recitation or lecture, together with th required preparation, or three hours laboratory work each week for a semester o 18 weeks.

## SEMESTER IN WHICH COURSES ARE OFFERED

Roman numeral I indicates course is offered in Fall semester. Roman numeral I indicates course is offered in Spring semester.

Following the course title are designations of credit and the semester in whic course is offered. Examples:

(3) I___________________________________Three units. Offered first semeste

(3) I, II_______________Three units. Offered first semester and second semeste

(3-3) Year, I
Three units each semester. Year sequence beginning in the first semeste

(3-3) Year, I, II
Three units each semester. Year sequence beginning either semeste

Although the college fully expects to carry out the arrangements planned in th list of courses, it reserves the right to make changes. Classes in which the enrollmen does not come up to the minimum number set by the State Department of Educatio may not be offered or may be postponed.

### PREREQUISITES

Prerequisites for courses are stated. A student should not enroll in a course for hich he is not eligible.

Admission to all graduate courses requires graduate status and permission of the nstructor.

### PROVISIONAL COURSES

Courses number 40 to 45 are open only to students who are in the provisional rogram. Other students (those not having provisional status) are not eligible to ake these courses.

# ACCOUNTING AND BUSINESS MANAGEMENT

## IN THE DIVISION OF BUSINESS

### Major

A *major in arts and sciences* is offered in *business* for the A.B. degree. Students ajoring in this department may specialize in one of the following sub-fields: (A) Acounting, (B) Banking and Finance, (C) Business Management, (D) Insurance, nd (E) Credit Management. Courses in the major are in addition to 45 units in eneral education courses. The following courses are required in the lower division r all sub-fields: Business 2, 8, 14A-14B, 18A-18B; and Economics 1A-1B.

Upper division requirements: A minimum of 24 upper division units. The folwing courses must be included: Economics 111 or 170 or Business 123; Economics 40; Business 121; and 15 units selected from one of the following sub-fields:

A. *Accounting:* Business 118A-118B, 160A-160B, 161A-161B, 162, 163, 164A-164B, 165A-165B, 167, 169.

B. *Banking and Finance:* Business 133, 134, 137, 154; Economics 131, 135, 142.

C. *Business Management:* Business 118A-118B, 123, 125, 126, 127A, 133, 134, 137, 153, 154, 163, 184; Economics 128, 135, 142, 150, 170.

D. *Insurance:* Business 118A-118B, 125, 126, 127A-127B, 128A-128B, 128C-128D, 128E-128F, 133, 134; Economics 135.
Recommended Economics 170; Sociology 50, 51, 153.

E. *Credit Management:* Business 123, 125, 133, 134, 137, 153; Economics 131, 135, 142, 170.

A minor in some field other than business is required of all majors.

### Minor

A *minor in arts and sciences* is offered in *business* with specialization in one of e sub-fields listed under the major above. The minor consists of a minimum of 15 nits, or maximum of 22, six units of which must be in upper division courses selected rom one of the sub-fields listed under the major above. Business 14A-14B must be cluded in the minor.

A *teaching minor* is not offered in business but is offered in *business education* r the general secondary school credential. For statement of requirements, refer to the redential.

### Courses in Accounting and Business Management

All business courses in this department for the major or minor are listed in is section of the bulletin under Business.

# AESTHETICS

## IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is not offered in aesthetics; however, certain cour in this field are required as part of the majors in art and in music. For specific infor tion, refer to these departments.

A *teaching major* is not offered in aesthetics; however, certain courses in t field are required as part of the teaching major in art for the general secondary a the special secondary credentials in these fields. For specific information, refer to outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is not offered in aesthetics.

A *teaching minor* is not offered in aesthetics; however, certain courses in t field are required as part of the teaching minor in art for the general second credential. For specific information, refer to this credential.

### Lower Division Courses

**(G)2. Introduction to Music (3) I**

Practical approach to hearing music with understanding and pleasure, thro study of representative compositions of various styles and performance media, gr musicians and their art. Music correlated with other arts through lectures, recordi concerts. Closed to music majors or minors.

**(G)5. Art Orientation (2) II**

An illustrated lecture course dealing with aesthetic meaning and its relat to the structure of art products. Designed to increase both understanding and ap ciation of the visual world in general and of the fine arts in particular.

**(G)50. Appreciation and History of Art (2) I**

A survey of art development in the painting, sculpture, architecture, and ha crafts from dawn of art to the Renaissance. Illustrated.

**(G)51. Survey of Mexican Art (2) I**

A study of Mexican and Middle American Art from earliest time to present.

**(G)102. Great Music (3) II**

Instrumental and vocal music in the larger forms studied through direc listening. Artistic trends and their effect upon music composition and performance. prerequisite, but completion of Aesthetics 2 recommended. Closed to music maj Formerly Aesthetics 100.

**(G)138. Introduction to Aesthetic Appreciation (1) I**

Major forms of expression and aesthetic experience in art, music and literatu presented by an interdepartmental staff through lectures, demonstration, and pa discussions. Not open to students with credit for Comparative Literature 138.

**(G)150. Appreciation and History of Art (2) II**

The period from the Renaissance through the modern school treated in the sa manner as in Aesthetics 50.

**160. Techniques and Procedures of the Art Museum Worker (3) I**

Designed to acquaint the student with the nature and function of the art muse in the community and to give him experience in the methods by which it serves public. Prerequisite: Aesthetics 5 or 50 and 150.

**(G)162. History and Philosophy of the Dance (2) I**

Historical background and appreciation of dance, with special emphasis u the development of art in America. The justification for dance as an educational a creative art medium and its place in the curriculum. Not open to students with cre for Physical Education 162.

# AIR SCIENCE

## IN THE DIVISION OF AIR SCIENCE AND TACTICS

### Air Force Reserve Officers' Training Corps

The Department and Division of Air Science and Tactics appear for the first time t San Diego State College beginning with the Fall semester, 1951, offering the curiculum prescribed by the Air Force Reserve Officers' Training Corps. This curriculum onsists of a four-year course, including a two-year basic course and a two-year adanced course.

The objectives of the Air Force ROTC program are the development of qualities f leadership and character essential to civil and military responsibility and the training of officer reserve personnel. Completion of the four-year course and a bachelor's egree leads to commission in the Air Force Reserve. Students who have demonstrated utstanding qualities of scholarship and leadership may receive regular commissions n the Air Force. A maximum of one-third of the students graduating in the program may be eligible to receive the regular commission.

Flight training is not offered as part of this program ; however, Air Force ROTC raduates have a high priority for such training and, if accepted, serve as reserve officers n active duty during the training period.

*Eligibility:* A regularly enrolled male student is eligible for admission to the basic ourse if he is a citizen of the United States, not less than 14 years of age and has not eached his 23d birthday (veterans under 25), and is physically qualified for military raining. Up to one year of pattern credit may be allowed toward the basic course for igh school ROTC training. For admission to the advanced course, the student must ot have reached his 27th birthday and must have completed the basic course or its quivalent. At the discretion of the Professor of Air Science and Tactics, up to two ears of pattern credit in the basic course may be allowed for prior active service in he armed forces. Normally, a student entering the advanced course must have two ears of college work remaining. The applicant must pass required screening tests and e selected by the Professor of Air Science and Tactics and the President of the College.

Attendance at one summer camp is required of each student to qualify for the ommission. The summer camp is six weeks in length and is held at an active Air orce base. The student receives $75 per month during this training period. Uniforms, quipment, subsistence, and transportation are furnished by the Air Force.

Students in the basic and advanced courses are furnished uniforms, equipment, nd textbooks. Students in the advanced course are given, in addition, commutation of ubsistence allowance of approximately $27 per month. Upon acceptance of this allownce, the student executes a written agreement with the United States Government and ith the President of the College to complete the advanced course, completion of such ourse becoming a prerequisite to graduation.

### Basic and Advanced Courses

The basic course requires three hours of instruction and drill per week each emester. The advanced course requires five hours. In addition, each student in the dvanced course must attend one summer camp of six weeks. The advanced course is ffered in three separate specialties to prepare the student for one of three distinct areer fields in the Air Force. These options are General Technical, Administration nd Logistics, and Flight Operations. Student selection of specialty is based primarily n the academic pursuits of the individual and the approval of the Professor of Air cience and Tactics. Students enrolled in the AFROTC program pursue their regular ourses of study in fields of their choice. Major work is not offered in air science and actics, but a minor is offered.

### Minor

A *minor in arts and sciences* is offered in *air science and tactics.* The minor conists of at least 15 units of work, six units of which must be taken in the advanced ourses.

### Lower Division Courses

**A-1B. First-Year Basic Air Science** (2-2) Year, I

Two hours of classroom instruction and one hour of drill per week. World Political Geography to provide the AFROTC student with a general knowledge of geopolitics and a global viewpoint for use in directing his future studies of subsequent Air Force subjects.

**21A-21B. Second-Year Basic Air Science** (2-2) Year, I

Two hours of classroom instruction and one hour of drill per week. Maps an aerial photographs, aerial navigation, meteorology, aerodynamics and propulsion, ap plied air power, organization for the defense of the U. S. A., personal maintenanc and weapons familiarization.

### Upper Division Courses

**131A-131B. First-Year Advanced: General Technical** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. The primar technical fields and the related equipment used in the Air Force.

**132A-132B. First-Year Advanced: Administration and Logistics** (3-3) Year,

Four hours of classroom instruction and one hour of drill per week. Individua records, nonappropriated funds, transportation, and supply.

**133A-133B. First-Year Advanced: Flight Operations** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. An augmen tation of the academic phases of the training in the Flying Schools of the Air Trainin Command. (Student must be qualified for and express the desire to undertake flyin training upon receipt of commission. Training will be taken as a student officer in grad of 2nd Lieutenant upon completion of the academic and AFROTC programs.)

**141A-141B. Second-Year Advanced: General Technical** (3-3) Year, I (no offered 1951-52)

Four hours of classroom instruction and one hour of drill per week. A continua tion of Air Science 131A and 131B.

**142A-132B. Second-Year Advanced: Administration and Logistics** (3-3 Year, I (not offered 1951-52)

Four hours of classroom instruction and one hour of drill per week. Purpose an basic functions of the staff, administration of personnel at wing-base level, function of Comptroller and Food Service Supervisor.

**143A-143B. Second Year Advanced: Flight Operations** (3-3) Year, I (no offered 1951-52)

Four hours of classroom instruction and one hour of drill per week. Advance instruction in navigation and bombing and the theory of radar as applied to both.

# ANTHROPOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is not offered in anthropology; however, uppe division units in anthropology may be planned under the *general major* program. Stu dents wishing to use anthropology as a field of concentration in the *general majo* should include the following courses in the lower division: Anthropology 1A-1B, 2 o 3; Geography 1, 2 or Geology 1A-1B; Sociology 50, 51; recommended: Spanish o German. The following supplementary fields of study are recommended in the uppe division with a view to later specialization in anthropological work: For *archaeology* Art, geography, geology; for *physical anthropology:* Psychology, statistics, an zoology; for *museum work:* Art, education, and psychology. For further informa tion on the *general major*, refer to the section on the Bachelor of Arts Degree.

A *teaching major* is not offered in anthropology; however, it may be used a part of the *social science major* for the general junior high school credential or th general secondary credential. For specific information, refer to the outlines of th requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in anthropology. The minor must include a least 15 units of work in anthropology, nine units of which must be from courses carry ing upper division credit.

A *teaching minor* is not offered in anthropology for the general secondary cre dential; however, anthropology may be used as a part of the *social science minor* fo the special secondary, the general elementary, and the kindergarten-primary credentials For specific information, refer to the requirements for the teaching minor for thes credentials.

## Lower Division Courses

**(G)1A-1B. General Anthropology** (3-3) I

Origin and antiquity of man. Theories of human descent. Classification of races. Origin and early development of civilization.

**2. Physical Anthropology** (3) I

An introduction to the studies of primatology and anthropometry. The comparative anatomy of the monkeys and great apes, the emergence of the anthropoids, the reconstruction of early man from fossil evidence. The landmarks, measures and indices used in the metrical study of the living human body and skeletal material. Sexual differences and growth changes in the skull and skeleton. Medico-legal applications.

**3. Survey of Archaeology** (3) II

A review of the history of modern archeology and a discussion of its methods. The development of archaeological techniques in reconstructing the ancient cultures of the Mediterranean world. The problems of present day archaeology in the Near East, the Orient and the Americas. The principles and basic techniques used in the excavation of sites and the reporting of findings.

**(G)54. Social Anthropology** (3) II (Not offered in 1951-52)

An anthropological study of social institutions in primitive and civilized societies. The evolution of family organization, religion, property right, and government traced in elementary and advanced civilization.

## Upper Division Courses

**151A. The North American Indian** (3) I (Not offered in 1951-52)

Pre-Columbian cultures of the North American Indian. The origin and migration of New World peoples. Industries, arts, crafts, social organization, religion and other phases of American Indian civilization.

**151B. Indian Civilization of Middle America** (3) II (Not offered in 1951-52)

The development of civilization in Pre-Columbian Mexico and Central America: Aztec, Mayan, and related cultures.

**(G)152. World Ethnography** (3) I

The cultural patterns of representative aboriginal peoples. Industries, arts, social organization and supernaturalism considered with a view to environmental adjustment, historical development and functional interrelation. Ethnological theories reviewed and applied in interpreting illustrative aboriginal societies.

**153. Primitive Religion** (3) II

Beliefs and ritual of primitive man. Magic and religion. Forms of animism and polytheism. Primitive mentality and the supernatural.

**161. The California Indian** (3) Summer

A survey of native California Indian culture with stress on the Indian groups of Southern California. The industries, arts, social organization, folklore and religion will be considered as revealed through the study of living peoples and archaeological evidences.

**(G)165. Ethnology and Race Psychology** (3) I (Not offered in 1951-52)

The biological basis of race, somatic and serologic typology, racial mentality, tests and their ethnopsychological significance, abnormality in ethnic groups. Race and culture; ethnic aspects of demography.

**172. Indian Cultures of the Southwest** (3) Summer

Indian cultures of the past and present in the Southwestern states. Arts, crafts, architecture and religion as revealed through archaeology and ethnology.

**199. Special Study** (1-3) I, II

Maximum of six units may be allowed.

# ART

## IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is offered in *art* for the A.B. degree. Courses in th major are in addition to 45 units in general education courses. Every student who plan to major in art, whether in arts and sciences or in the teacher education program, shoul complete the following basic courses: Aesthetics 5 or 51 and 50, Art A-B, 6A-6B, an 14A. In arts and sciences the student majoring in art may choose either a group o courses in which the crafts are emphasized or a group of courses in which the graphi arts are emphasized. One of the following plans should be selected:

*Emphasis on crafts:* The student should add to the list of basic courses require of all art majors the following courses: Lower division: Art 6D, 7, 61B and two unit of art electives; upper division: Aesthetics 150, Art 106A or B or C, 106D, 111A 117A-117B, 119A-119B, and eight units of art electives. This program leads in th direction of industrial design, interior design, cabinet making, sculpture, weaving textile design, ceramics, etc.

*Emphasis on graphic arts:* The student should add to the list of basic course required of all art majors the following courses: Lower division: Art 15A, 16A, an four units of art electives; upper division: Aesthetics 150, Art 106A or 106B, 112A 112B, 115A-115B, 116A-116B, 117A, and six units of art electives. This program lead in the direction of illustration, portraiture, landscape painting, mural design, poste design, production illustration, advertising design, fashion design, etc.

A *teaching major in art* is offered for the general secondary and special secondar credentials. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *art*. The minor must include at leas 15 units of work in art, or maximum of 22, six units of which must be from course carrying upper division credit.

A *teaching minor* is offered in *art* for the general secondary credential. Art may b offered only as a second minor for the general elementary and kindergarten-primar credential. For statement of requirements, refer to these credentials.

### Art Appreciation, History and Orientation

For courses in appreciation, history of art, and art orientation, see aesthetics Many students, regardless of the field in which they may be majoring, recognize th need for an intelligent approach to the subject of art and art appreciation. However due to the erroneous popular feeling that art is a subject requiring "talent," these students may refrain from enrolling in art courses. For students who desire a better understanding of art, but who do not hope to acquire any of the art skills, the followin courses are recommended.

| | *Unit* |
|---|---|
| Aesthetics 5, Art Orientation | 2 |
| Aesthetics 50, History and Appreciation of Art | 2 |
| Aesthetics 51, Survey of Mexican Art | 2 |
| Aesthetics 52A-52B, Survey of Oriental Art | 6 |
| Art 8, Costume and Home-furnishing | 2 |

Other courses which require certain skills but which are not beyond the ability of the average college student are:

| | |
|---|---|
| Art 61B, Crafts | 2 |
| Art 6A, Design | 2 |
| Art A, Drawing and Composition | 2 |
| Art 94, Costume design | 2 |

### Lower Division Courses

**Art A. Drawing and Composition (2) I, II**

Problems involving perspective to develop ability to draw still life, furniture exteriors, interiors, and the like. (High school equivalent may excuse the student from this course.)

**t B. Drawing and Composition** (2) I, II
Drawing of mechanical and natural forms by the use of line and value. Emphasis proportion and structure. Some quick sketching, gesture and contour drawing. Pre-uisite: Art A.

**)6A. Design** (2) I, II
Fundamentals of design and composition and theory of color. Basic course used as prerequisite for all advanced work.

**. Design** (2) I, II
Original work in creative design and representation with special stress on modern idencies. Prerequisite: Art 6A.

**. Design** (2) I, II
Study of the principles of design through the making of furniture. Prerequi-e: 6A.

**Line, Color and Display** (2) I, II
The principles of line, color and arrangement applied to store and window display. udy and observation of windows, color and materials used in display. Building mod-s and practical problems in arranging colors, textures, and forms in windows to fit fferent kinds of merchandise. (Students taking this course for upper division credit, t 107, will be required to do additional work.)

**)8. Costume and House Furnishings** (2) I, II
An appreciative study of modern architecture and modern house furnishings, th emphasis on the spirit of gracious living and an appreciative study of the modern ess with emphasis on suitability to the figure, the personality and the occasion.

**A. Lettering** (2) I
Fundamental art principles applied to lettering. Practice for quick, accurate tering; original problems using letters as design. Prerequisite: Art 6A.

**B. Posters and Commercial Art** (2) II
The application of lettering to posters, newspaper and magazine advertising, d other forms of commercial art. The study of composition combined with letter-g and special study of modern tendencies in publicity. Prerequisites: Art 6A, 14A.

**A-15B. Life Drawing** (2-2) Year, I, II
Drawing from the nude model. Prerequisite: Art A-B.

**A-16B. Painting** (2-2) I, II
Semester I: Composition of still life in oil. Semester II: Landscape and more lvanced composition in oil. Prerequisite: Art A-B.

**A-17B. Sculpture** (2-2) I, II
Creative design in such materials as clay, wood, stone, concrete, etc. Prerequisites: rt 6A-6B.

**A. Crafts in the Elementary Schools** (2) I, II
A foundation course which develops unification of work of the elementary grades rough activities and experiences. These experiences grow out of environmental tivities. They include study and working of clay, lumber and tools, textiles, and rdboard construction. Prerequisite: Art 6A.

**B. Crafts** (2) I, II
Problems involving the application of design principles to various fields—pottery, xtiles, weaving, metal work, wood-carving, and book-binding. Prerequisite: Art. 6A.

**A-94B. Costume Design** (2-2) Year, I, II
Original designs of modern costumes suitable to the individual or to distinct pes; the drawing of fashion figures; the rendering of fabrics and textures. Prerequi-te: Art 6A.

**A-95B. Interior Decoration** (See Art 195A-195B)

### Upper Division Courses

**106A-106B. Printmaking (2-2) I, II**
Study of print crafts which includes the making of linoleum blocks, wood engravings, etchings and lithographs. Prerequisites: Art A. B. 6A.

**106C. Illustration (2) II**
Same as 160A-B except that printmaking is applied to problems of book illustration. Prerequisites: Art A, B, 6A.

**106D. Advanced Furniture Design (2) I, II**
(See Art 6D) Prerequisite: Art 6D.

**107. Line, Color and Display (2) I, II**
(See course description under Art 7)

**111A-111B. Industrial Design (2-2) Year, I, II**
Design of objects for manufacture with reference to their use, materials, and i accordance with factory practices and machine techniques. Practice in the technique of presentation, working drawings, renderings in perspective and scale models. Prerequisite: Art 6A-6B.

**112A. Design and Composition (2) I**
Imaginative organization of space by means of color, dark and light, perspective and textures of various materials. Prerequisites: Art A-B, 6A-6B.

**112B. Design and Composition (2) II**
Continuation of Art 112A. Prerequisite: Art 112A.

**115A-115B. Life Drawing and Painting (2-2) I, II**
Drawing and painting from nude and costume models. Prerequisite: Art A-B.

**115C-115D. Advanced Life Drawing and Painting (2-2) Year, I, II**
Study of human figure in terms of form patterns. Prerequisite: Art 115A-115B

**116A-116B. Advanced Painting (2-2) Year, I, II**
Painting in oil from still life, landscape, or models, stressing composition. Prerequisite: Art 16A or 16B.

**117A-117B. Sculpture (2-2) Year, I, II**
Creative design in such materials as clay, wood, stone, concrete, etc. Prequisites: Art 6A-6B and 17A or 17B.

**119A. Ceramics (2) I**
Building of pottery on the basic techniques of coil, slab, mold making, and sli casting. Ceramic sculpture, glazing and kiln operations: Art 6A.

**119B. Ceramics (2) II**
Study of glazes and elementary clay technology. Mold making, slip casting wit application to individual creative problems. Prerequisite: Art 119A.

**166. Honors Course (Credit to be arranged) I, II**
Refer to the Honors Program.

**194A-194B. Costume Design (2-2) Year, I, II**
For description, see Art 94A-94B. Prerequisite: Art 6A.

**195A-195B. Interior Design (2-2) I, II**
The consideration of the house as a unit; the arrangement of garden, house floor plan, and furniture as functional and decorative problems. Prerequisite: Art A and 6A, 195A is a prerequisite for 195B.

**Art. 199. Special Problems in Art (1-3) I, II**
Admission by permission of chairman of department.

### Graduate Courses

**200A-200B. Special Problems (2-2) I, II**
A graduate course in which students may carry out projects in various fields of art under the direction of faculty members who are specialists in the field chosen. Students registering for this course must apply for work within a certain field after discussions with the art faculty.

# ASTRONOMY

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is not offered in astronomy. Students desiring to prepare for advanced work in astronomy should include the following courses: Astronomy 1, 2, 3, 9, and 10; Mathematics 3A-3B, 4A-4B; Physics 4A-4B-4C; a reading knowledge of French and German.

A *teaching major* is not offered in astronomy; however, astronomy may be used as part of the general science major for the general junior high school credential. For specific information, refer to the outline of requirements for the general science teaching major for this credential.

### Minor

A *minor in arts and sciences* is offered in astronomy. The minor must include at least 15 units of work in astronomy, nine units of which must be from courses carrying upper division credits.

A *teaching minor* is not offered in astronomy; however, astronomy may be used as part of the *general science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

**(G)1. Descriptive Astronomy** (3) I, II

A cultural course planned to develop an appreciation of astronomy with emphasis on the solar system. Attention is given to the methods by which astronomical knowledge has been gained. A six-inch refractor and an eight-inch reflecting telescope are available for observation.

**(G)2. Modern Astronomy** (3) II

A study of the stellar system in the light of modern research, especially photographic and spectrographic. Prerequisite: Astronomy 1 or permission of the instructor.

**3. Surveyor's Course in Practical Astronomy** (3) II

The principles of spherical astronomy adapted to the needs of engineering students. Computation and observation. Two lectures and one three hour laboratory period each week. Prerequisite: Surveying 1A or permission of the instructor. Astronomy 1 and 9 desirable.

**(G)9. Practice in Observing** (1) I, II

A course designed to supplement Astronomy 1. The course will include constellation study, use of astronomical coordinates, and descriptive observations of celestial objects with the telescope. One evening laboratory period each week Recommended: Astronomy 1 or concurrent registration in Astronomy 1.

**10. Advanced Observational Astronomy** (1) II

A continuation of Astronomy 9. More advanced problems in observing will be taken up such as the determination of azimuth by observations of Polaris, transit observations, astronomical photography, etc. One three-hour evening laboratory period each week. Prerequisite: Astronomy 9.

**12. Elementary Navigation** (3) I

A study of compass corrections, time, line of position, use of celestial coordinates, etc. A few class hours devoted to the use of tables such as H.O. 214 for the solution of astronomical triangle. One laboratory period each week. Astronomy 1 desirable.

### Upper Division Courses

**(G)101. Principles of Astronomy** (3) I (Not offered 1951-52)

A course designed particularly to provide background for teachers. It consists of two lectures and one laboratory period each week. Students will be required to become familiar with the prominent constellations, brighter stars in the sky, and with the general characteristics of the solar and stellar system.

**103. Astronomical Optics** (2) II

This course aims to acquaint the students with the optics and methods of testi an astronomical telescope. The course consists of one lecture and one laborato period each week. The student is required to grind a four-inch astonomical mirr Prerequisite: Astronomy 1 or permission of instructor.

**(G) 105. Historic Development of Astronomy** (3) I (Not offered 1951-52)

A study of the more important problems and astronomical concepts in the lig of their historical development. Particular attention is given to the biography a contributions of the more important astronomers, such as, Galileo, Kepler, Newto Herschel, Bessel, etc.

**107. Method of Least Squares and Computing Practices** (3) I (Not offer 1951-52)

Fundamental principles with applications in the fields of astronomy, physi and engineering. Prerequisite: Math 4A or equivalent.

**110. Introduction to Study of Variable Stars** (3) II (Not offered 1951-52)

A study will be made of the various types of variable stars, their spectra, perio methods of observing, etc. In the laboratory the light curve of several typical variabl will be observed. Two lectures and one laboratory period each week. Prerequisit Astronomy 2. Astronomy 9 desirable.

**112. Elementary Astrophysics** (3) I (Not offered 1951-52)

A lecture course in the application of physics to astronomy: Much of mode astronomical research is in the field of astrophysics. An occasional laboratory peri will be substituted by appointment for the lecture period. Prerequisites: Astrono 2 or college physics.

**199. Special Problems** (1-3) I, II

Admission by consent of instructor. Credit and hours to be arranged in each ca Open to students who have completed three units in astronomy.

## BACTERIOLOGY

### IN THE DIVISION OF LIFE SCIENCES

Major work is not offered in bacteriology. Courses in this field are recommend for students who are preparing to teach science in junior or senior high school, or w are planning to follow a special curriculum in laboratory technique or research in th general field.

### Minor

A *minor in arts and sciences* is offered in *bacteriology*. The minor consists of minimum of 15 units, to include the following: Lower division requirements: Ba teriology 1 (or Bacteriology 101 may be substituted). Recommended: Zoology or Physiology 1A and 1C. Upper division requirements: Bacteriology 102, 103, a the remainder of the units chosen from the following courses: Bacteriology 105, 10 107, and 199. Recommended: Chemistry 102, 114, 115.

A *teaching minor* is not offered in bacteriology.

### Lower Division Courses

**1. General Bacteriology** (4) I, II

An introduction to bacteriology. Effects of physical and chemical agencies up bacteria; biochemical activities of bacteria; microscopic examination and cultivati of bacteria; the bacteria of air, water, soil, milk and dairy products, other food industrial applications. Introduction to disease-producing bacteria. Two hours of le ture and six hours of laboratory per week. Prerequisite: Chemistry 1A or 2A. (Che istry 1A-1B for minor in bacteriology.)

### Upper Division Courses

**101. General Bacteriology** (4) I, II

Lectures and laboratory work of Bacteriology 1 with additional work to prescribed by the instructor. Prerequisite: Chemistry 1A or 2A. (Chemistry 1A-1B f minor in bacteriology.)

**102. Advanced Bacteriology** (5) I

A survey of the agents of disease and methods of host resistance. Laboratory experience in diagnosis and immunologic techniques. Two lectures and three laboratories per week. Prerequisites: Bacteriology 1 or 101, and Chemistry 101. Recommended: Biochemistry, physiology.

**103. Serology** (4) II

A survey of the principles and techniques used in serological diagnosis of disease agents. The course is planned for students interested in research or laboratory technology. One lecture and three laboratories per week. Prerequisites: Bacteriology 1 or 101, Bacteriology 102, and Chemistry 101. Recommended: Biochemistry, physiology.

**105. Bacterial Metabolism** (2) I (Not offered in 1951-52)

A course to provide a basic knowledge of the principles by which micro-organisms derive energy to support the life processes. Prerequisites: Bacteriology 1 or 101, Chemistry 101. Recommended: Biochemistry, Bacteriology 102 and 103. This course is offered every third semester.

**106. Immunology.** (2) II (Offered in 1951-52)

A lecture course dealing with the factors underlying virulence in microorganisms, and the mechanisms of bacterial infection. Specific and nonspecific antimicrobial immunity; the antigen-antibody reaction; and consideration of the immunochemistry of protein and nonprotein cell substances. Prerequisites: Bacteriology 102, Chemistry 101. Recommended: Bacteriology 107, Chemistry 114. This course is offered every third semester.

**107. Virology** (2) I

A survey of viruses and Rickettsias as agents of disease. An introduction to virological techniques, and routes of infection with further consideration of concepts of epidemiology, diagnosis, pathology, and host-responses. Prerequisite: Bacteriology 102, 103, or equivalent.

**199. Special Study** (1-6) I, II

Work other than is outlined in the regular courses. Admission only by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open to students who have completed at least 15 units of work in the life sciences (including courses in bacteriology) with grades of A or B. No more than six units of Bacteriology 199 may apply toward graduation.

# BIOLOGY

## IN THE DIVISION OF LIFE SCIENCES

Major and minor work are not offered in biology (see botany and zoology); however, courses in biology may be used as part of the general science major for the general junior high school credential, or the general science minor for the general elementary, kindergarten-primary, and special secondary credentials, or the life science minor for the general secondary credential.

### Lower Division Courses

**A. Solution and Dosage** (2) I

Arithmetic review with computing of dosage, percentage of solutions, apothecaries weights. Two hours per week.

**(G)1. Survey of Biology** (3) I, II

A survey of life science with emphasis on the biology of man in relation to modern life. Three lectures per week. If laboratory credit is wanted by the student, Biology 3 should be taken instead of Biology 1; or Biology 1 may be followed by Biology 4. Not open to students with credit for Biology 3, 4, 10A, 10B, 40, Zoology 1A, 1B, Botany 2A, or 2B.

**(G)3. Principles of Biology** (3) I, II

A consideration of basic biological phenomena. Two hours of lecture and thre of laboratory each week. Not open to students with credit for Biology 1, 40, 10A-10B Botany 1 or 2A-2B, or Zoology 1A-1B.

**(G)4. Plant and Animal Types** (3) I, II

An introduction to the major groups of plants and animals with emphasis o local forms. Two hours of lecture and three of laboratory each week. Prerequisite Biology 10A-10B, Botany 1 or 2A-2B, or Zoology 1A-1B.

# BOTANY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in botany for the A.B. degree. Courses i the major are in addition to 45 units in general education courses. Lower divisio requirements: Botany 1 or 2A-2B, Chemistry 1A-1B or 2A-2B. Recommended: German, French or Spanish, Zoology 1A-1B, Bacteriology 1. Upper division requirements A minimum of 24 upper division units, at least 18 units of which must be in botany an six of which may be related courses in bacteriology, chemistry, geology, zoology, selecte with approval of departmental representative.

A *teaching major* is not offered in botany.

### Minor

A *minor in arts and sciences* is offered in botany. The minor must include at leas 15 units of work in botany, or maximum of 22, six units of which must be from course carrying upper division credit.

A *teaching minor* is not offered in botany; however, botany may be used as par of the *general science minor* for the special secondary, the general elementary, and th kindergarten-primary credentials or as part of the *life science minor* for the genera secondary credential. For specific information, refer to these credentials.

### Lower Division Courses

**1. Introduction to Botany** (4) I, II

Designed primarily for students who desire a general acquaintance with th fundamentals of botany. Not open to students who have credit for Botany 2A or 2B but may be used as a prerequisite to upper division courses. Three lectures, and on three-hour laboratory per week.

**2A-2B. General Botany** (4-4) I, II

Year course covering fundamentals of structure, general behavior, morphology and relationship of plants, including an introduction to classification and distribution of seed plants. Two lectures and six hours of laboratory work per week. Botany 2A i a prerequisite for 2B.

**4. California Plants** (2) II (Not offered in 1951-52)

Classification and ecology of representative orders of wild flowers, trees, and chaparral of San Diego region, including practice in the use of keys. One lecture and three hours laboratory per week. Occasional Saturday field trips.

### Upper Division Courses

**102. Mycology** (4) I

A study of the different groups of fungi. Special attention will be given to the parasitic and economic forms, their life history, structure, and classification. Prerequisite: Botany 2B or Botany 1.

**107. Plant Physiology** (4) II

The activities of plants, including food manufacture, absorption, conduction, transpiration, respiration, growth and movement. Two lectures and two laboratory periods per week. Prerequisites: Botany 1 or Botany 2A, and Chemistry 2A-2B or equivalent.

**112. Cultivated Trees and Shrubs** (3) I
Recognition of the common cultivated trees and shrubs of the San Diego region. Trips to local parks and private gardens. One lecture and six hours per week laboratory or field work. Prerequisites: Botany 1, 2A-2B, 4, or equivalent.

**114. Plant Taxonomy** (3) II
Identification, classification and distribution of representative orders of flowering plants. One hour lecture and six hours per week of laboratory and field work. Prerequisites: Botany 1, 2A-2B, or 4.

**119. Field Botany** (4) Summer
Study of the local native vegetation with emphasis on ecological units within floristic areas. Field trips to be supplemented with laboratory work in herbarium procedure.

**126. Plant Pathology** (3) II
A practical course dealing with the principles of disease in plants, control measures, and quarantine procedures. Emphasis is placed on the determination and control measures of those pathogenic organisms which affect crops, trees and shrubs and nursery stock. Two lectures and one laboratory period per week. Prerequisite: Botany 1 or 2A-2B and 102.

**(G)150. Readings in Biology** (2) II
Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles,, ecology, economic zoology, zoogeography, breeding habits and animal behavior. Not open to students with credit for Zoology 150.

**153. Economic Biology** (2) I
Study of the uses of plants and animals to man and the ways in which they injure him and his possessions. Consideration is also given to general methods of control and conservation. Prerequisites: Zoology 1A, Biology 1, Biology 4, Botany 1, or Botany 2A-2B. Not open to students who have credit for Zoology 153.

**155. Genetics** (3) II
Principles of plant and animal genetics, with experiments and demonstrations illustrating the mechanisms of heredity. Two hours of lecture and three hours of laboratory per week. Not open to students with credit for Zoology 155. Prerequisites: Biology 3 and 4, Zoology 1A-1B, or Botany 2A-2B.

**(G)160. Evolution** (2) II
The development of theories of evolution. Two lectures per week. Not open to students with credit for Zoology 160.

**162. Agricultural Botany** (2) I
A study of California crop plants, their general identification, cultural methods, and regional distribution. Field trips to be arranged. Prerequisite: Botany 1 or Botany 2A-2B.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**199. Special Problems** (1-3) I, II
Work other than is outlined in the above courses. Admission by permission of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open only to students who have completed at least 15 units of botany with a grade A or B. No more than six units of Botany 199 may apply toward graduation.

## Graduate Courses

**298. Special Study** (1-6)
An individual study course designed primarily for candidates for advanced degrees.

# BUSINESS COURSES

## IN THE DIVISION OF BUSINESS

The Division of Business consists of three departments: Accounting and Bus ness Management; Marketing; and Business Education, Secretarial and Office Mar agement. For complete descriptions of the major in business with the various fields c specialization, refer to these departments or to the business curricula in the sectio of the bulletin entitled: Preprofessional and Vocational Curricula.

All courses in business offered by the three departments in the Division c Business are listed below.

### Lower Division Courses

**A. Business Mathematics** (1) I, II

A practical course in the mathematics of business. A thorough study of interes compound interest, discount, insurance rates, etc.

**1A-1B, Typewriting** (3-3) Year, I

Development of a command of a keyboard, acquisition of speed and the artisti arrangement of typewritten material with special reference to commercial forms, tabu lation and billing. (1A is a prerequisite for 1B.)

**2. Mathematics of Finance** (3) I, II

Interest and annuities; amortization; sinking funds; valuation of bonds; depre ciation; mathematics of building and loan associations. Prerequisites: Two years c algebra in high school, or equivalents.

**2A. Personal-Use Typewriting** (3) I, II

A short course designed for those not wishing to enter the business office bu desiring a knowledge of or skills in the use of the typewriter. Five hours laborator practice.

**3A. Office Machines: Rotary Calculator** (1) I, II (1st six weeks of semester)

A six-weeks course designed to teach students the operation of the rotary calcu lator. Operations basic to statistics, accounting, and other areas needing this skill wi be stressed.

**3B. Office Machines: Key-Driven Calculator** (1) I, II (2d six weeks of semester

Same as 3A, except the key-driven calculator is substituted for the rotary calcu lator.

**3C. Office Machines: Printing Calculator** (1) I, II (3d six weeks of semester

Same as 3A, except the printing calculator is substituted for the rotary calculato

**4. Introductory Typewriting** (1) I, II

A short, introductory course building the fundamentals of typing in a six-week period. Students enroll for the first six weeks, the second six weeks, or the third si weeks in a semester. Not open to Business Education or Secretarial majors.

**5A-5B. Shorthand** (5-5) Year, I

An intensive course designed for the practical preparation of office secretaries A thorough study of the Gregg System. Development of the ability to read and writ shorthand rapidly and correctly, both literary and commercial. The shorthand spee necessary to pass a civil service examination is attained by the end of the year. (5A i a prerequisite for 5B.)

**6A-6B. Advanced Shorthand** (3-3) Year, I

Development of speed in writing and transcription. Advanced dictation on lette forms, legal forms, speeches, and literary and technical material. Prerequisite: Busi ness 5A-5B or equivalent. (6A is a prerequisite for 6B.)

**8. Business Communication** (3) I, II

A course designed to give training in writing as a means of solving moder business problems. Prerequisites: English 1 and Business 2A or its equivalent.

**4A-14B. Principles of Accounting** (3-3) I, II

The balance sheet; profit and loss statement; the opening, conducting, and closing f books for different kinds of businesses; organizations, reorganizations, dissolutions, nd consolidations, etc., keeping in view the best modern accounting practice. Five ours lecture and laboratory. (14A is a prerequisite for 14B.)

**8A-18B. Business Law** (3-3) I, II

The fundamental principles of business law. Cases showing the actual application of the principles to commercial and business transactions. The subjects covered: ontracts, sales, agency, negotiable instruments, insurance, and wills. Either semester nay be taken first.

**G)20. Consumer Problems** (3) II

Consumer incomes; bases of consumer choice-making; practical problems of uying food, clothing, shelter, transportation, insurance, etc.; family budgeting; market tructure and functions seen from the consumer's point of view. Not open to students vith credit for Business 120. A general education course in family life education.

**1. Organization and Management of Small Business** (3) I

Problems confronting the small business man with regard to finance, organization, nanagement. Reasons for failures and success in small business. Specific study of arious kinds of small businesses.

**4. Retailing** (3) I, II

Study of retail stores, emphasizing the problems of store managers and merhandising executives; store location, organization, personnel, sales promotion, buying nd handling of merchandise, inventory, turnover, and control methods. Problems of rofitable operation under changing conditions.

**5. Salesmanship** (3) I, II

Theoretical and psychological backgrounds of salesmanship, newer concepts of elling; the selling of ideas and services; steps in a sale: Attention, interest, desire, losing; the development of clienteles and of good will; the personal factor in salesnanship.

**6. Applied Salesmanship** (2) II

Practice in selling; supervised work in cooperating stores, or outside selling; elationships between theory and practice. Prerequisite: Business 25 and permission f instructor.

**7. Advertising Principles** (3) I, II

Advertising as a sales promotional tool in marketing activities; consumer, narket and product analysis; advertising media; preparation of advertisements; neasurement of advertising effectiveness; economic and legal aspects of advertising; ublic relations; advertising campaigns.

**5A-65B. Record Keeping.** (1-3 each semester) Year, II

Application of accounting practice and principles to accounting practice; the echnical arrangement of accounting forms, records and reports found in business. Prerequisite: Business 14A. Business 65A is a prerequisite for 65B.

## Upper Division Courses

**103A. Office Management** (3) I, II

A study of the functions of the office, duties of the office manager, organization f the office, communication functions, physical facilities involved, personnel relationhips of management and worker, and the controls necessary for efficient output.

**105A. Office Systems** (3) I, II

A course designed to develop fundamental skills in the figuring and bookkeeping machines used in offices, together with their interrelating functions as these affect office systems.

**105B. Office Systems** (3) I, II

The relationship of voice-writing, addressing, and duplicating machines to office procedures and routines is studied and skills developed in these areas of use.

**108. Records Management** (3) I, II

Intensive survey of the various means of preparing, keeping, storing, and disposing of office records to facilitate the efficient management of business. Various system of records management will be studied together with the equipment and supplie required.

**113A-113B. Secretarial Office Practice** (5-5) Year, I

Practice in the duties and routines of office work as required of the stenographe and secretary with special emphasis on the shorthand dictation and transcriptio problems arising in various types of offices. Prerequisite: Business 1A-1B, 5A-5B, o their equivalent.

**118A-118B. Advanced Commercial Law** (3-3) Year, I, II

An advanced study of the law of personal and real property, partnership, corporation and the laws regulating trade and trade practices and competition. Electiv for business majors.

**120. Consumer Income Management** (3) I

Functions and responsibilities of consumers; problems of choice-making; planning expenditures for housing, household operation, insurance and investments. Economics of installment buying, borrowing procedures, control of frauds, legislatio affecting consumers. Not open to students with credit for Business 20.

**121. Business Administration** (3) I, II

Problems of business administration as an interrelated whole. A discussion of th problems of the business administrator with particular reference to the character o the problems involved and to the control policies and devices of the manager. Prerequisite: Economics 1A-1B.

**123. Marketing Principles** (3) I, II

Study of marketing functions; activities of producers, wholesalers, retailers anc other middlemen; channels of distribution; integration of marketing activities; pric policies; government regulation. Prerequisite: Economics 1A-1B.

**124. Marketing Administration** (3) II

An advanced course dealing with practical aspects of marketing. Solutions o problems faced by producers, wholesalers, retailers and other middlemen in the marketing of their products. Prerequisite: Business 123.

**125. General Insurance** (3) I

Economic theory of risk; transfer of risk; distribution and prevention of loss; types of insurance carriers; problems of rate making; the insurance contract; coverages; special forms of life, fire, marine and casualty insurance; state supervision.

**126. Casualty Insurance** (3) II

The nature and reasons for existing practices in compensation and casualt insurance. The social and legal bases of insurance, fundamental principles of rat making, policy provisions, state regulation and state insurance. Prerequisite: Business 125.

**127A. Life Insurance—Principles and Practice** (3) I

Types of life insurance companies and associations, home office and agenc organization, types of contracts, surrender value, policy loans and extended insurance surplus and dividend policies, reserves, group, industrial and social insurance, anc state supervision.

**127B. Life Insurance Salesmanship** (3) II

Special problems of life insurance selling, with emphasis on the psychologica aspects of insurance selling, on specific techniques for finding prospects, for managing the sales interview. For students interested in life insurance selling, and those planning to obtain life underwriter's certification.

**128A-128B. Advanced Life Insurance** (3-3) Year, I

An advanced course in life insurance. The emphasis is on preparation for the C. L. U. Certificate. 128A is a prerequisite for 128B.

**28C-128D. Advanced Life Insurance** (3-3) I

Prepares the student for Part D of the Chartered Life Underwriters examination howing how life insurance strengthens banking credit, financial structure of corporaions, and partnerships; also, life insurance as an investment. Business 128C is a rerequisite for Business 128D.

**28E-128F. Advanced Life Insurance** (3-3) Year, I

Prepares for part of the Chartered Life Underwriters examination. Covers the our sections, "Life Insurance Fundamentals," "General Education," "Law, Trust nd Taxes," and "Finance"; teaches proficiency in the analysis of cases or problems. usiness 128E is a prerequisite for Business 128F.

**33. Corporation Finance** (3) I

The corporate form of organization, instruments of long-time finance, methods of aising capital, efficient financial management, the financing of reorganizations, and overnmental control. Prerequisite: Economics 1A-1B. Not open to students who have redit for Economics 133.

**34. Investments** (3) II

Investment principles and practices with emphasis upon problems of the small nvestor, such as tests of a good investment, sources of information, types of stocks and onds, mechanics of purchase and sale, investment trusts, real estate mortgages, and he like.

**37. Credits and Collections** (3) I

The credit man and his work, including the instruments with which he works, ources of credit information, the technique of his department, collection methods, egislation for the protection of debtor and creditor, and credit insurance.

**53. Personnel Management** (4) I, II

Problems in the management of personnel relations, including techniques of electing, training, supervising and rating employees. Methods used by management a job evaluation; wage and salary payment plans; employee services; health and afety; union relationships; stimulation of interest.

**54. Wage and Salary Administration** (3) II

Problems of job analysis; major techniques of job evaluation, including ranking, lassification, point system, factor comparison; problems of wage and salary adminisration, incentive pay methods; merit rating plans. Not open to students with credit or Political Science 146.

**60A-160B. Advanced Accounting** (3-3) Year, I

An intensive study of the corporation, its accounting and financial problems; a horough study of the balance sheet; depreciation; factory accounting, etc. Preequisite: Business 14A-14B. (160A is a prerequisite for 160B.)

**61A-161B. Cost Accounting** (3-3) Year, I

Principles and methods of cost accounting in the mercantile establishment and n the factory. A study of industrial accounting procedure, the forms used, and their pplication to practical problems. 161A is a prerequisite for 161B.

**62. Accounting Systems** (3) I

The accounting systems used in various types of business and financial concerns. ome practice in devising and installing systems. Prerequisite: Business 14A-14B.

**63. Financial Statements** (3) II

The construction, composition, analysis and interpretation of accounting reports ith particular emphasis on the form, content and phraseology of reports. Preequisite: Business 160A-160B.

**64A-164B. Income Tax Procedure** (3-3) Year, I

A study of the laws and a consideration of the problems arising from state and ederal income, inheritance and corporation tax. 164A is a prerequisite for 164B.

**65A-165B. Auditing** (3-3) Year, I

The fundamental principles of accepted procedures of auditing and related types f accounting engagements. 165A is a prerequisite for 165B.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**167. Governmental Accounting** (3) II
A comparative study of accounting systems used by municipalities, counties, an the State of California; detailed comparisons with commercial practice; procedures i handling budget accounts, appropriations, and encumbrances; subsidiary records; co records; internal checks; auditing.

**169. C. P. A. Review** (3) II
An intensive review of the accounting principles and procedures covered in th accounting theory and accounting practice sections of the uniform C. P. A. examin tion prepared by the American Institute of Accountants. Prerequisite: Busines 160A-160B, 161A-161B, 164A-164B, 165A-165B, 167.

**181. Radio Sales and Advertising** (3) I, II
A study of advertising trends in radio advertising; time buying, audience surve and program types in relation to products to be advertised via radio broadcastin Includes publicity and promotion of radio programming organization of a radio station relationship between the business and entertainment factors of radio broadcastin Prerequisite: Consent of the instructor. Not open for credit to students with cred in Speech Arts 181.

**184. Sales Management** (3) I
Consideration of problems confronting the modern sales executive; selectio training, compensation and control of the sales force; sales analysis; sales quotas sales costs and budgets; market and product research and analysis; coordination personal selling with other form of sales effort.

**185. Advertising Copy and Layout** (2) II
Introduction to principles and techniques of copy writing; types of copy preparation of layouts; mechanical methods employed by the artist, engraver an printer; legislation and regulations affecting advertising claims. Prerequisite: Bus ness 27, or permission of instructor. Not open to students with credit for Journa ism 185.

**186. Store Management** (2) II
Retail locations, buildings, layouts and fixtures; store supplies and maintenance receiving, marking, storing, wrapping and delivering merchandise; customer servic adjustments, credit and collections; expense control. Prerequisite: Business 24, permission of instructor.

**187A. Buying Techniques** (2) I
Buying for department and specialty stores; customer demand; function bureaus that aid in buying; stock plans; merchandise resources; foreign buying trading techniques; terms and discounts; credit and shipping terms; the regulati of trade practices. Prerequisite: Business 24, or permission of instructor.

**187B. Merchandising Techniques** (2) II
Methods of dollar and unit control in retail stores; pricing, turnover, invento methods and control; legislation; budgets; arithmetic of merchandising; profitabilit of specific methods of merchandising. Prerequisite: Business 24, or permission of i structor.

**188. Advertising Media** (2) I
A thorough coverage of advertising media. Market characteristics; rates a sources of information; evaluation of media; problems of coverage, duplication, cos and scheduling; advertising salesmanship. Prerequisite: Business 27, or permissio of instructor.

**89. Advertising Problems** (3) I
Principles of advertising applied to the solution of actual advertising problems ncountered by business firms. Estimating opportunities for effective use; promotional ampaigns; selection of media, retail advertising, national advertising, advertising gencies; advertising services of publishers. Prerequisite: Business 27, or permission f instructor.

**90. Objectives and Curricula in Business Education** (3) II
A study of the objectives of business education and a detailed analysis of the actors involved in the construction of a business curriculum.

**96. Work Experience** (2) I, II
Supervised work in cooperating stores or offices; relationship between theory nd practice in specific business conditions. Prerequisite: Permission of instructor.

**98A-198B. Investigation and Report** (1 to 3 each semester) I, II
A comprehensive and an original study of a problem connected with business nder the direction of one or more members of the business staff. Prerequisite: Senior tanding and permission of the instructor. 198A is a prerequisite for 198B.

**99. Special Study** (1-3) I, II
An individual study course. Maximum credit six units.

### Graduate Courses

**00. Readings in Current Literature in Business Education** (2) I
Specialized reading in one or more phases of business education, followed by a iscussion and written report of the value of each article read.

**03. Office Management** (2)
An intensive study of the problems of office management and their solution. The elation of records, reports, budgets and manuals to managerial control. Prerequisites: usiness 14A-14B, 103A.

**13. Problems in Business Education** (2) II
Designed to fit the needs of individual students and their problems through the vriting of research papers, of a term or individual study nature. The studies to be made vill cover the principles of good teaching, trends in Business Education, current iterature.

**21. Basic Business Education** (2)
An introduction to the content and methodology of teaching basic Business Eduation.

**23. Problems of Distributive Business** (2)
Critical analysis of distributive business problems in the light of changing ecoomic, social and governmental conditions. Prerequisite: Business 121, 123.

**33. Administration and Supervision of Business Education** (2) I
Designed to provide students who hold, or who expect to hold, administrative posiions in Business Education with the techniques necessary for successful executive work.

**260. Advanced Problem Analysis** (Accounting) (2)
The study of conditions causing various accounting problems with special emphais upon the theory and practices involved in their solution. Prerequisite: Business 160A-160B, 161, 165.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3)
An individual study course designed primarily for candidates for the master's degree.

**299. Thesis or Problem** (3)
Guidance in the preparation of a project or thesis for the master's degree.

# BUSINESS EDUCATION, SECRETARIAL AND OFFICE MANAGEMENT

## IN THE DIVISION OF BUSINESS

### Major

A *major in arts and sciences* is offered in *business* for the A.B. degree. Stude majoring in this department, with business as the major, may specialize in one of following subfields: (A) *Business Education*, (B) *Office Management*, or ( *Secretarial*. Courses in the major are in addition to 45 units in general educat courses. A minor in some field other than business is required of all majors in t department.

The student must complete requirements in one of the following fields of spec ization:

A. **Business Education:** Lower division requirements must include Busin 1A-1B, 8, 14A-14B, and 18A-18B, plus the requirements in one of the following s fields: (1) *Accounting:* Nine units selected from Business 2, 21, 24, 25, 27. ( *Accounting-Secretarial:* Business 5A-5B (If student has the equivalent of 1A-1B 5A-5B, must select nine units in consultation with adviser). (3) *Merchandising:* Bu ness 24, 25, 27. (4) *Secretarial:* Business 5A-5B (If student has the equivalent of 1B or 5A-5B, must select nine units in consultation with adviser).

Upper division requirements: Business 103A, 105A-105B, 108, and 190, plus requirements in one of the following subfields: (1) *Accounting:* Business 121, 16 164A. (2) *Accounting-Secretarial:* Business 121, 160A, 164A, or 113A-113B. ( *Merchandising:* Business 121, and seven units selected from Business 185, 186, 18 187B, Art 107. (4) *Secretarial:* Business 113A-113B.

B. **Office Management:** Lower division: Business 2, 8, 14A-14B, and 1 18B. Upper division: Business 103A, 105A-105B, 108, 121, 137, 153, 154, 160A, 16 and Economics 140.

C. **Secretarial:** Lower division: Business 1A-1B, 5A-5B, 8, 14A-14B, 18A-18B. Upper division: Business 103A, 105A-105B, 108, 113A-113B, 153, and 16

A *teaching major in business education* is offered for the special secondary general secondary school credentials. For statement of requirements, refer to th credentials.

### Minor

A *minor in arts and sciences* is offered in *business* with specialization in one the subfields listed under the major above. The minor consists of a minimum of units, or maximum of 22, six units of which must be in upper division courses selec from one of the subfields listed under the major above. Business 1A-1B or Econom 1A-1B and Business 14A-14B.

A *teaching minor in business education* is offered for the special secondary general secondary school credentials. For statement of requirements, refer to th credentials.

### Courses in Business Education, Secretarial and Office Management

All business courses in this department for the major or minor are listed in t section of the bulletin under Business.

# CHEMISTRY

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in chemistry for the A.B. and for the B degrees. Courses in the major are in addition to 45 units in general education cours These curricula are outlined below.

A *teaching major in physical science and general science* is offered for the gene secondary school credential and a *teaching major in general science* is offered for general junior high school credential. For statement of requirements, refer to th credentials.

### Minor

A *minor in arts and sciences* is offered in chemistry. The minor consists of a inimum of 15 units, or maximum of 22, six units of which must be in courses carry-g upper division credit. Chemistry 1A-1B, or its equivalent, must be included in the inor.

A *teaching minor in physical science and general science* is offered for the general condary, special secondary, general elementary, and kindergarten-primary credenals. For statement of requirements, refer to these credentials.

### Curricula for Chemistry Majors in Arts and Sciences

The curriculum outlined below for the B.S. degree is based upon the recomendations of the Committee for Professional Training of Chemists of the American hemical Society. It qualifies graduates for many types of positions as chemists and rovides the training required by most universities for admission to graduate work in iemistry. This department is on the approved list of the American Chemical Society. tudents may also arrange a program which leads to the A.B. degree and meet the commendations of the American Chemical Society and the requirements of most niversities for admission to graduate work in chemistry.

The final curriculum outlined below for the A.B. degree is designed for students ho do not intend to become professional chemists, but who desire the major in chemtry as part of a general education or in preparation for training in a related profeson. By proper choice of electives, graduates can meet the requirements for admission medical schools. The sequence of courses listed below represents the minimum chnical requirement for an A.B. degree with a major in chemistry. A minor is quired of chemistry majors taking this degree.

### Plan for B.S. Degree and Certificate of the American Chemical Society

| *irst year* | *Units* *1st Sem.* | *Units* *2d Sem.* |
|---|---|---|
| Chemistry 1A-1B | 5 | 5 |
| Physics 4A | – | 4 |
| Mathematics 3A-3B | 3 | 3 |
| * Health Education 21 | 2 | – |
| * Psychology 1 | – | 3 |
| * Biology 1 or 3 | 3 | – |
| * English 1 | 3 | – |
| * P. E. activity | ½ | ½ |
| | 16½ | 15½ |

| *Second year* | *Units* *1st Sem.* | *Units* *2d Sem.* |
|---|---|---|
| Chemistry 5A-5B | 4 | 4 |
| Physics 4B-4C | 4 | 4 |
| Mathematics 4A-4B | 3 | 3 |
| †* German 1, 2 | 3 | 3 |
| * Speech Arts 3 | 2 | – |
| * Social Science | – | 3 |
| * P. E. activity | ½ | ½ |
| | 16½ | 17½ |

| *hird year* | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Chemistry 101-102 | 4 | 3 |
| Chemistry 103 | – | 3 |
| Chemistry 110A-110B | 3 | 3 |
| † German S3-S4 | 3 | 3 |
| * Social Science | 3 | 3 |
| * Lit., Phil., and Arts | 3 | – |
| | 16 | 15 |

| *Fourth year* | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Chemistry 111 | – | 3 |
| ‡ Advanced Chemistry | 9 | 8 |
| * Lit., Phil., and Arts | 3 | – |
| Electives | 4 | 4 |
| | 16 | 15 |

---

* General education courses (nine units of chemistry and physics counted toward attern requirements in general education).

† The B.S. degree may be obtained without the Certificate of the American Chemial Society by substituting for the German courses, six units of general education ourses and six units of electives.

‡ Must include four units lecture and one unit laboratory in chemistry courses reuiring three full year-courses in chemistry as prerequisites. Remainder may include ourses in related subjects by approval of department.

## Plan for A.B. Degree and Certificate of the American Chemical Society

| First year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Chemistry 1A-1B | 5 | 5 |
| Physics 4A | – | 4 |
| Mathematics 3A-3B | 3 | 3 |
| * Health Education 21 | 2 | – |
| * Psychology 1 | – | 3 |
| * Biology 1 or 3 | 3 | – |
| * English 1 | 3 | – |
| * P. E. activity | ½ | ½ |
|  | 16½ | 15½ |

| Second year | Units 1st Sem. | 2 Se |
|---|---|---|
| Chemistry 5A-5B | 4 |  |
| Physics 4B-4C | 4 |  |
| Mathematics 4A-4B | 3 |  |
| †* German 1, 2 | 3 |  |
| * Speech Arts 3 | 2 |  |
| * Social Science | – |  |
| * P. E. activity | ½ |  |
|  | 16½ | 1 |

| Third year | 1st Sem. | 2d Sem. |
|---|---|---|
| Chemistry 101-102 | 4 | 3 |
| Chemistry 103 | – | 3 |
| Chemistry 110A-110B | 3 | 3 |
| † German S3-S4 | 3 | 3 |
| * Social Science | 3 | 3 |
| * Lit., Phil., and Arts | 3 | – |
|  | 16 | 15 |

| Fourth year | 1st Sem. | 2 Se |
|---|---|---|
| Chemistry 111 | – |  |
| ‡ Chemistry electives | 2 |  |
| Minor (U. D.) | 6 |  |
| * Lit., Phil., and Arts | 3 |  |
|  | 14 | 1 |

---

* General education courses (nine units of chemistry and physics counted towa pattern requirements in general education).

† The A.B. degree may be obtained without the Certificate of the American Che cal Society by substituting for the German courses, six units of general education cour and six units of electives.

‡ Must include four units lecture and one unit laboratory from courses requiri three full year-courses in chemistry as prerequisites.

## Plan for A.B. Degree for Related Professions

| First year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Chemistry 1A-1B | 5 | 5 |
| * Physics 2A-2B | 3 | 3 |
| * Physics 3A-3B | 1 | 1 |
| * Mathematics 7A-7B | 3 | 3 |
| * English 1 | 3 | – |
| * Psychology 1 | – | 3 |
| * P. E. activity | ½ | ½ |
|  | 15½ | 15½ |

| Second year | Units 1st Sem. | 2 Se |
|---|---|---|
| Chemistry 5A-5B | 4 |  |
| †* French or German | 3 |  |
| * Speech Arts 3 | 2 |  |
| * Health Education 21 | – |  |
| * Biology 1 or 3 | 3 |  |
| * Lit., Phil., and Arts | – |  |
| Elective | 3 |  |
| * P. E. activity | ½ |  |
|  | 15½ | 1 |

| Third year | 1st Sem. | 2d Sem. |
|---|---|---|
| Chemistry 101-102 | 4 | 3 |
| Chemistry 103 | – | 3 |
| Chemistry 110A-110B | 3 | 3 |
| * Social Science | 3 | 3 |
| * Lit., Phil., and Arts | 3 | – |
| * Elective | 3 | – |
| Minor | – | 3 |
|  | 16 | 15 |

| Fourth year | 1st Sem. | 2 Se |
|---|---|---|
| Chemistry 111 | – |  |
| Chemistry electives | 3 |  |
| * Social Science | 3 |  |
| Minor | 3 |  |
| Electives | 7 |  |
|  | 16 | 1 |

---

* General education courses.

† Six units of general education courses may be substituted for the French German.

## Lower Division Courses

**1A-1B. General Chemistry** (5-5) Year, I, II
General principles of chemistry with emphasis on inorganic materials. Three lectures and six hours of laboratory per week. Qualitative analysis is included in the second semester. Prerequisites: Elementary algebra and plane geometry. Recommended: High school chemistry, physics, and additional mathematics.

**(G)2A-2B. Fundamentals of Chemistry** (3-3) Year, I
A general course including inorganic, organic, and biological chemistry for students not intending to take further work in chemistry. Emphasis is placed on applications of chemistry to everyday life. Two lectures and one laboratory period per week. Not open to students with credit for Chemistry 1A-1B.

**5A. Elementary Quantitative Analysis** (4) I
Theoretical consideration of the principles of gravimetric and volumetric analysis. Practice in standardizing reagents and analyzing samples. Two lectures, and two laboratory periods per week. Prerequisite: Chemistry 1A-1B, and facility in the use of logarithms and slide rule.

**5B. Quantitative Analysis** (4) II
Further work in the theory and practice of volumetric and gravimetric analyses and the study of electro analytical methods. Two lectures and two laboratory periods per week. Prerequisite: Chemistry 5A.

## Upper Division Courses

**101. Introductory Organic Chemistry** (4) I
An introductory study of the chemistry of carbon compounds, both aliphatic and aromatic. The laboratory work illustrates properties and reactions of typical compounds and stresses development of technique. Three lectures and one laboratory period per week. Prerequisite: Chemistry 1A-1B.

**102. Organic Chemistry Laboratory** (3) II
Synthesis of typical aliphatic and aromatic compounds. Study of the theory and practice of laboratory operations. Approximately the last third of the course is devoted to the systematic qualitative analysis of organic compounds. Three laboratory periods per week. Prerequisite: Chemistry 101.

**103. Intermediate Organic Chemistry** (3) II
A continuation of Chemistry 101. Further study of types of aliphatic and aromatic compounds, their derivatives and interrelationship. Introduction to mechanisms of organic reactions. Three lectures per week. Prerequisite: Credit or registration in Chemistry 102.

**105. Advanced Quantitative Analysis** (4) II
Advanced work in the theory and practice of volumetric, gravimetric, and electroanalysis. Prerequisite: Chemistry 5A. Not open to students with credit for Chemistry 5B.

**110A-110B. Physical Chemistry** (3-3) Year, I
Theoretical principles of chemistry with emphasis on mathematical relations. Three lectures per week, problems and reports. Prerequisites: Physics 2A-2B, or equivalent; Math. 4B, or equivalent; Chemistry 5A-5B.

**111. Physical Chemistry Laboratory** (3) I, II
Physico-chemical apparatus and measurements, with emphasis on technical report writing. Discussion period and three laboratory periods per week. Prerequisite: Chemistry 110B, or concurrent registration with permission of the instructor.

**114. Biochemistry** (3) I
The chemistry of carbohydrates, fats, proteins, enzymes, vitamins and hormones. Nutrition, intermediary metabolism and chemotherapy are discussed. Three lectures per week. Prerequisite: Chemistry 103 or by permission of the instructor. Recommended: Elementary biology or zoology.

**115. Biochemistry Laboratory** (2) II
Laboratory work in the testing, synthesis, isolation and analysis of biochemi
materials. Chemical rather than biological considerations are emphasized. Two labo
tory periods per week. Prerequisites: Chemistry 5A and credit or registration
Chemistry 114. Recommended: Chemistry 155.

**116. Clinical Chemistry** (3) II
Lectures and laboratory work on the chemical composition of blood, urine, m
and body tissues. One lecture per week and two laboratory periods per week. *O*
*primarily* to students enrolled in the Laboratory Technician Curriculum. Prerequisi
Chemistry 115.

**118. Colloid Chemistry** (2) II (Offered 1951-52 and alternate years)
The theoretical principles of colloid chemistry and the preparation, propert
and practical applications of colloids. Two lectures per week. Prerequisite: Chemis
101, 110A and 110B.

**122. Glass Blowing** (1) II
Elementary training in the manipulation of glass. Prerequisite: Chemis
1A-1B. One laboratory period per week.

**127. Advanced Inorganic Chemistry** (3) II
(Offered 1952-53 and alternate yea
A lecture course dealing with such topics as the physical basis of the perio
system, complex inorganic compounds, and the nature of the chemical bond. Th
lectures per week. Prerequisite: Three years of chemistry.

**144A-144B. Principles of Chemical Engineering** (3-3) Year, I
(Offered 1952-53 and alternate yea
Industrial stoichiometry, flow of fluids, heat transfer, unit processes and ty
of industrial equipment. Three lectures per week, problems and reports. Prerequisi
Credit or registration in Chemistry 110A-110B.

**154. Organic Qualitative Analysis** (3) II
A systematic study of the identification of organic compounds and mixtur
One lecture and two laboratory periods per week. Prerequisite: Chemistry 5B or 1
102 and 103.

**155. Instrumental Methods of Analysis** (3) I
Theory and practice of modern methods of instrumental analysis, including
of pH meters, colorimeters, spectro-photometers, and other analytical devices. Disc
sions, reports, field trips, special individual projects. One lecture and two laborat
periods per week. Prerequisite: Three year-courses in chemistry.

**199. Special Problems** (1-3) I, II
Supervised individual work in specialized branches of chemistry. Admission o
by consent of instructor. Hours of credit to be arranged in each case. Open only
students who have shown ability to do A or B work in chemistry. Maximum cre
six units.

## Graduate Courses

**200. Seminar** (2-2) I, II
An intensive study of some phase of advanced chemistry.

A. Advanced Organic Chemistry
B. Chemical Kinetics
C. Chemical Thermodynamics
D. Molecular Structure
E. Electrochemistry
F. Advanced Biochemistry
G. Spectrographic Analysis
H. Photochemistry
I. History of Chemistry

**290. Bibliography** (1) I, II
Exercise in the use of basic reference books, journals, and specialized bi
ographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3) I, II
An individual study course designed primarily for candidates for the maste
degree.

**299. Thesis** (3) I, II
Guidance in the preparation of a project or thesis for the master's degree.

# COMPARATIVE LITERATURE

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is not offered in comparative literature; however, ourses in this field may be used as part of the English major in arts and sciences. For pecific information, refer to English.

A *teaching major* is not offered in comparative literature; however, courses in is field may be used as part of the teaching major in English for the general secondary nd general junior high school credentials with the approval of the departmental representative. For specific information, refer to the outlines of requirements for these redentials.

### Minor

A *minor in arts and sciences* is offered in comparative literature. The minor must clude at least 15 units of work in comparative literature, nine units of which must be om courses carrying upper division credit.

A *teaching minor* is not offered in comparative literature; however, courses in is field may be used as part of the teaching minor in English for the general secndary, the special secondary, the general elementary, and the kindergarten-primary redentials. For specific information, refer to the outlines of requirements for these redentials.

### Lower Division Courses

**G)52A-52B. Masterpieces of World Literature** (3-3) Year, I

A chronological survey from Homer to modern times. The first semester stresses e classical epic and tragedy. The second semester, beginning with the Renaissance, resses prose fiction, the drama, and the essay. Not open to students with credit for nglish 52A-52B.

### Upper Division Courses

**G)101A. Modern Continental Fiction** (3) II

A survey of leading French, Russian, Scandinavian, Italian, and German novelts and short story writers, from Tolstoy and his associates to the present day.

**G)115. The Bible as Literature** (3) I

A study of the narrative, poetry, and prophecy of the King James version of the ible. Readings, reports, lectures, and discussions.

**G)138. Introduction to Aesthetic Appreciation** (1) I

Major forms of expression and aesthetic experience in art, music and literature, resented by an interdepartmental staff through lectures, demonstration, and panel iscussions. Not open to students with credit for Aesthetics 138.

**G)140A-140B. Masterpieces of French Literature** (3-3) Year, I
(Offered in 1951-52)

A cultural course designed to be given in introduction to the great French works om the Song of Roland through Cyrano de Bergerac, with emphasis on the 16th, 17th, 8th and 19th century authors. The contributions to world thinking of Rabelais, Monigne, Moliere, Racine, Descartes, Pascal, Montesquieu, Voltaire, Rousseau, Hugo, alzac, Flaubert, Maupassant, Zola, will be studied through lectures and outside adings.

**G)142. The Golden Age of German Literature** (3) II

Masterpieces of German Literature from the 18th and early 19th centuries. nglish translations read. No knowledge of German required.

**G)152A-152B. Survey of Drama** (3) Year, I

Study of selected tragedies and comedies from Asiatic, European, English, and merican literature, with emphasis upon the human problems depicted therein and pon the timelessness of certain themes, such as those of Electra and Medea. Lectures, scussions, and reports on readings. Not open to students with credit for English 2A-152B.

**159. The Rise of Romanticism in European Literature** (3) II
Continental origins and growth of the romantic movement. Studies in the worl of Rousseau, Goethe, Schiller, Lessing, Chateaubriand, Mme. de Stael, and others.

**199. Special Problems** (1-3) I, II
Students who have demonstrated ability in literary studies may enroll for wo other than is outlined in the regular courses. Admission only by consent of the instru tor with whom the work is to be done. Maximum credit, six units.

# ECONOMICS
## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *economics* for the A.B. degree. Cours in the major are in addition to 45 units in general education courses. Lower divisi requirements: Economics 1A-1B; Business 14A-14B. Upper division requirement 24 units in economics to include Economics 100A or 100B and 140. Six of the 24 uni may be in related fields, selected with the approval of the departmental adviser. minor is required.

A *teaching major in social sciences* is offered for the general secondary and ge eral junior high school credentials. For a description of these majors, refer to t credentials. Assistance in selection of economics courses as part of the social scien majors may be obtained by consulting with an adviser in the Economics Departme

### Minor

A *minor in arts and sciences* is offered in *economics*. The minor consists of minimum of 15 units, nine units of which must be in courses carrying upper divisi credit.

A *teaching minor in economics* is offered for the general secondary school crede tial or as part of the *social science minor* for the special secondary, general elementar and kindergarten-primary credentials. For a statement of requirements, refer to the credentials.

### Lower Division Courses

**(G)1A-1B. Principles of Economics** (3-3) Year, I, II
The basic principles of economics: Business organization and production; mone credit and banking, depression problems; prices, competition, and monopoly; inco distribution; public finance; international trade; economic systems. Aims of cours Foundation for further study, business pursuits, and intelligent economic citizenshi Prerequisite: 1A prerequisite for 1B.

### Upper Division Courses

**100A. Intermediate Economic Theory** (3) I
Advanced economic theory with special reference to value and distribution, t income approach and full employment policy. Prerequisite: Economics 1A-1B.

**100B. Intermediate Economic Theory** (3) II
Advanced economic theory with special reference to the application of econo theory to national and local economic problems. Prerequisite: Economics 1A-1B.

**(G)102. Comparative Economic Systems** (3) II
The economic aspects of laissez-faire and regulated capitalism, cooperativ socialism, communism, nazism, fascism. Experience in Russia, Germany, Unit States, Great Britain. Criteria for evaluating economic systems. The individual a government in each system. Planning in a liberal capitalistic society.

**05. Economics of Consumption** (3) I (Not offered in 1951-52)

An analysis of the determination of consumer demands, the relationship of the onsumer to the price system, the effects of consumption and saving upon income and mployment, the effects of monopoly and advertising upon consumers' welfare.

**10. Economic History of Europe** (3) I

A general survey of economic development from the Middle Ages to the present. articular attention is given to the impact of the Industrial Revolution on national conomics, particularly on England's commerce and industry.

**G)111. Economic History of the United States** (3) II

A comprehensive survey of American economic development and of national gislation in the field of industry and commerce.

**27. Agricultural Economics** (3) II (Not offered in 1951-52)

Major problems of finance, markets, conservation, overproduction, economic institutions and governmental policy, in relation to agriculture. Emphasis on regional roblems.

**28. Urban Land Economics** (3) I

Real estate in its various aspects: Property rights, transfer of title, valuation, nance, selling, property management, taxation, insurance, city planning, etc., with pecial emphasis upon problems as they exist in San Diego.

**G)131. Public Finance** (3) II

Principles and practices of taxation and public expenditures. Economic effects f public spending, debts and taxation. Financing social security and other services. iscal policy and prosperity. Relation to inflation and deflation. Special emphasis on ocial problems involved.

**33. Corporation Finance** (3) I, II

The corporate form of organization; instruments of long-time finance; methods f raising capital, efficient financial management, financing of reorganizations, and overnment control. Not open to students who have had Business 133.

**35. Money and Banking** (3) I, II

The elements of monetary theory. History and principles of banking with special eference to the banking system of the United States. Prerequisite: Economics 1A-1B.

**40. Statistical Methods** (3) I, II

Statistical method in the social sciences. Tabular and graphical presentation. requency and time series analysis. Index numbers and correlation techniques. Prerequisite: Mathematics A-B, and C, or equivalent. Not open to students with credit or Sociology 103, Psychology 104A, 104B.

**42. Business Cycles** (3) I

Fundamental factors in business cycles are analyzed and cycle theories are xamined. Study of current business conditions begins early in the course and develops nto practical application of forecasting methods to both business and other data. rerequisite: Economics 1A-1B.

**50. Labor Problems** (3) I

A study of labor organizations and their policies, wages, strikes, unemployment, ocial insurance, child labor, labor legislation, plans for industrial peace, and other abor problems.

**51. Principles of Labor Legislation** (3) II

Federal, state and local laws and regulations concerning labor problems, industrial relations, and governmental policies with respect to labor; important court decisions; the make-up and functions of commissions and boards; labor union attitudes ith respect to legislation and the courts.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**(G)170. Government and Business** (3) I, II
General survey of governmental activities affecting business; the state as entrepreneur and manager; governmental assistance to business; governmental re lation of business in its historical, legal and economic aspects, including recent de opments in the United States and abroad; proposed policies.

**171. Transportation** (3) I
The development of railway transportation; railroad financing; rates and r making; governmental regulation; government operation of railroads during the w recent development of motor and air transportation. Prerequisite: Economics 1A-

**172. Public Utilities** (3) II (Not offered in 1951-52)
The growth of public utilities in the United States; economics of public uti rates; valuation; public regulation and its legal basis; public ownership. Prerequisi Economics 1A-1B.

**185. Social Insurance** (3) I (Not offered in 1951-52)
Old age pensions, health insurance, unemployment insurance, and So Security Act. Strength and weakness of existing systems.

**190. International Economics—Principles** (3) I
National welfare and foreign trade. Principle of comparative costs, compara advantages in various nations. Foreign exchange and the balance of payments, financ foreign trade. Regulations over trade and obstructing factors. Techniques of export and importing. Doctrines of international trade.

**195. International Economics—Problems** (3) II
Important aspects of international cooperation and conflict in the econo sphere, conditions essential to future cooperation. The quest for foreign markets, materials, investment opportunities and population outlets. Commercial policies, in national economic conferences and organizations. Colonial rivalries and post problems.

**198. Investigation and Report** (3) I, II
Designed to stimulate independent study and investigation; to furnish guida in the collection, organization, and presentation of factual material; to improve technique of term reports. For economics majors only.

**199. Special Study** (1-3) I, II
Designed exclusively for seniors with a major in economics. Maximum cre six units.

### Graduate Courses

**200A-200B. Seminar in the Development of Economic Thought** (2-2) Year I
A critical study of the development of economic thought and of contempor economic thought, in order to provide a clearer understanding of major econo problems of the day.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibl raphies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3)
An individual study course designed primarily for candidates for the mast degree.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

# EDUCATION

## IN THE DIVISION OF EDUCATION

### Major

A *major in arts and sciences* is not offered in education; however, education is a ajor for the general elementary and kindergarten-primary credentials. For specific formation, refer to the requirements for these credentials.

A *teaching major* is offered in education for the general elementary and kinder-rten-primary credentials.

### Minor

A *minor in arts and sciences* is offered in *education.* This minor consists of a inimum of 15 upper division units in education selected with approval of the chair-an of the Division of Education.

A *teaching minor* is not offered in education.

Students will be admitted to education courses only when they are admitted to acher education or have permission from the chairman of the Division of Education. xperienced teachers may take education courses for which they have the pre-quisites. Students who take a minor in education must have been regularly admitted teacher education. (See Admission to Teacher Education.)

### Lower Division Courses

**Review of Arithmetic** (0) I, II

**Review of Handwriting** (0) I, II

**Review of Reading** (0) I, II

**Review of Spelling** (0) I, II

Noncredit courses designed to increase competence in the skill subjects. For udents who do not qualify on the respective sections of the Fundamentals Test quired of all applicants to teacher education.

### Upper Division Courses

**0B. Methods and Materials of Instruction and Audio-Visual Aids**
Major (2) Minor (2) I, II

Professional courses in specific teaching fields taken just prior to or concurrently ith the first directed teaching assignment. Each course emphasizes the application best practice with reference to each subject area named.

Subject fields for sections in 100B are as follows:

**fered in the Fall Semester**

100B-A.—Methods in Art
100B-B.—Methods in Accounting
100B-E.—Methods in English
100B-HE.—Methods in Home Economics
100B-L.—Methods in Romance Language
100B-Ma.—Methods in Mathematics
100B-Me.—Methods in Merchandising
100B-Mu.—Methods in Music
100B-PE.—Methods in Phys. Ed. (Men)
100B-P.Sc.—Methods in Physical Science
100B-S.—Methods in Shorthand
100B-SA.—Methods in Speech Arts
100B-S.Sc.—Methods in Social Science
100B-SS.—Methods in Secretarial Subjects
100B-T.—Methods in Typing

**Offered in the Spring Semester**

100B-E.—Methods in English
100B-IA.—Methods in Industrial Arts
100B-L.Sc.—Methods in Life Science
100B-PE.—Methods in Phys. Ed. (Women)
100B-S.Sc.—Methods in Social Science

**102A. Measurement and Evaluation in Elementary Education (3) I, II**
The use of intelligence and achievement tests in the diagnosis and improvem
of learning; construction of objective examinations; problems of evaluation in edu
tion; the elements of statistical techniques.

**102B. Child Growth and Development (3) I, II**
Study of the mental, emotional, social, and physical development during chi
hood and early adolescence. Directed observation required. General education cou
in family life education.

**102C. Growth and Development of the Adolescent (3) I or II**
Study of adolescent physiological, psychological, social, and emotional devel
ment. Field work with adolescent groups in the community is required.

**102D. Measurement and Evaluation in Secondary Education (2) I or II**
Problems of evaluation in secondary education, construction of examinations,
elements of statistics, the selection and interpretation of standardized measures,
appraisal of audio-visual instructional materials. Field work required. Prerequisi
Education 130.

**105A. Introduction to Psychological Testing (3) I, II**
The basic principles of testing. The selection and critical evaluation of gr
tests of intelligence, personality, aptitude, interest and achievement. Prerequisi
One of the following courses: Psychology 5, 11; Education 102A, 102D. Not open
credit to students with credit for Psychology 105A.

**E112A. Methods in Teaching Americanization Classes (2) Extension only**
Methods used in teaching the various grade levels found in Americanizat
classes, including those preparing for their naturalization. Includes discussion of
skills and techniques in learning to speak, read, and write English; aids in organiz
and conducting classes; and in helping teachers to understand backgrounds of fore
born.

**115A. History and Philosophy of Education (2) I, II**
Historical backgrounds and underlying philosophies upon which the public sch
system has been established. Emphasis on the meaning of education, educational ai
and values, and democracy and education. Prerequisite: Senior standing or the equi
lent; minimum of 12 units of education.

**115B. Secondary Education (3) I or II**
An introduction to understanding the development of secondary education and
present status as a social institution. Topics developed include: Curriculum; teach
methods; audio-visual instructional materials; organization and administration; gu
ance; and objectives. Field work required.

**116. Directed Teaching (3-12) I, II**
Systematic observation, participation and teaching under supervision in
campus elementary school, the affiliated elementary, junior high and senior high scho
During each semester of student teaching a weekly conference period is required
indicated in the time schedule. Prerequisite: Admission to teacher education; edu
tion program approved by Coordinator of Elementary or Secondary Education.
grade below C is unacceptable for a credential.

**117A. Elementary Music Education (2) I, II**
Objectives of music teaching; study of the child voice; and organization of
material by grades. Procedure in presenting rote songs, ear training, elementary n
tion, music reading, and part singing. Prerequisite: Music 7A, or the equivalent.
open to students who have had Music 7B.

**117B. Methods in Instrumental Music (2) I, II**
The theory of organizing and conducting school bands and orchestras, and
selection of materials. Provides practical experience in conducting a children's orches
and teaching sectional groups. Systematic planning for pupils of various ages
abilities.

**119. Art in the Elementary School** (2) I, II
Discussion of the elements and principles of art and their place in the art expression and appreciation of the elementary school child. Laboratory experience in elementary school problems. Not open to students taking the elementary credential. Prerequisite: Art 6A.

**122. Social Studies in Elementary Education** (2) I, II
The purpose, scope, organization and development of instructional procedures in he social studies in the elementary school. Development of curriculum units and the nalysis of teaching materials.

**123. Science in Elementary Education** (3) I or II
Elementary science and its relation to instructional units in the social sciences, he construction and use of equipment, the effective use of audio-visual aids, the use of nvironmental resources, and the use of texts and supplementary material.

**125. Curriculum in Elementary Education** (3) Irregular
A survey of the following elementary subject areas: The language arts, mathematics, music, science, and the social sciences. Emphasis upon the selection of content, eaching methods, and materials as they relate to social needs, psychological principles, nd the nature of the learner.

**126. Literature in Elementary Education** (3) I, II (Irregular)
Criteria for the selection of children's literature, children's reading interests, the levelopment of units of instruction in the social studies, the use of the verse choir, lramatic readings and similar procedures, and the use of the library.

**129. Arithmetic in Elementary Education** (2) I or II
For teachers of arithmetic in the elementary and junior high school. Emphasis is laced upon the understanding of the systems of notation and language techniques. Opportunity will be given for the development of instructional materials and rocedures.

**130. Educational Psychology** (2) I, II
To develop understanding of the applications of psychological research for effective classroom teaching. Observation and field work required. Prerequisite: Psychology l. Not open to students with credit for Psychology 130.

**134. Behavior Problems in Early Childhood** (1) Summer
Lectures and related readings on the typical behavior problems of two to twelve year olds, for teachers and parents.

**136. Reading in Elementary Education** (3) I or II
Scientifically developed procedures for determining reading readiness, beginning reading, independence in work recognition, vocabulary development, word analysis, standards of attainment, types of reading programs, and the selection, preparation and use of reading materials.

**138. Workshop in Family Life Education** (3) Summer
Series of lectures, discussions, and laboratory sessions devoted to furthering understanding of the problems of family life education. The student will have an opportunity to develop units suitable for a program of family life education. Community agencies will participate in the workshop.

**143. Adult Education** (3) (Irregular)
A study of the aims and scope of adult education and its function as a part of the ublic school system. Individual and group work will be emphasized. Admission by ermission of the instructor.

**144. Diagnosis and Remedial Treatment of Difficulties in Reading** (3) I or II
The causes of reading difficulties and the procedures for diagnosis and remedial reatment. Practical work with children with reading problems. Primarily for principals, supervisors and teachers-in-service. Prerequisite: Education 102B or Education 102A, and Education 136, or one year of successful teaching experience.

**145A. Organization and Administration of Music Education** (2) I, II
Theory of the general principles of music administration; correlation of music with the various subjects in the public schools; music tests; creative work.

**146. Education Practicum** (Kindergarten-Primary) (4) I, II

A continuation of Education 148 and will accompany Education 116 in t kindergarten. A study of the theory of early childhood education providing experien with children of nursery school and kindergarten ages. Prerequisite: Educati 147, 148.

**146B. Interpretation of Early Childhood Behavior** (3) Summer

For kindergarten-primary teachers treating the analysis and interpretation early childhood behavior. Emphasis on understanding and interpreting the causati factors in typical behavior of children to parents, social workers, teachers, and othe concerned with the guidance of kindergarten-primary children.

**147. Education Practicum** (10) I, II

Required of all students who expect to receive a credential which will quali them to teach in the kindergarten or in the elementary school. Students should ta the course during the next semester after admission to teacher education, which usually the first semester of the junior year. Registration is strictly limited to tho who have been approved by the Committee on Admission to Teacher Education.

The content of the Education Practicums include both classroom participati (directed teaching) and the study of the principles of education. The course includ Reading (2); Social Sciences in the Elementary School (2); Language Arts (2 Arithmetic (2); Observation (1) Audio-Visual-Radio Instruction (1) is integrat with the course.

**148. Education Practicum** (12) I, II

This course is a continuation of Education 147 and is required of all studer who are candidates for the general elementary credential or the kindergarten-prima credential. An extended analysis is made of the psychology of education in vario fields and application is made through directed teaching in grades 4 to 6. The cou includes Elementary Science Education (1); Elementary Art Education (2); Eleme tary Music Education (2); Educational Psychology (learning process and theory audio-visual education) (2); Curriculum in Elementary Education (2); Direct Teaching (2); Audio-Visual-Radio Instruction (1). Prerequisite: Education 1

**149A. Laboratory in Elementary Education** (3) Summer

A general course in observation and theory, including a study of arithmet reading, language, music, science, social studies, art, spelling. Students in this cou will observe in the summer demonstration school and discuss with the staff teaching procedures.

**149C. Laboratory in Rural Education** (6) Summer

Obervation in a one-room multigraded summer demonstration school. Stude will observe demonstrations, discuss procedures with the staff, and prepare mater for their own schools.

**149D. Workshop in Elementary Education** (3 or 6) Summer

To meet the needs of individual or groups of teachers who desire to stu selected problems in elementary education. The observation of classroom teaching be provided for members in attendance. Interested persons should correspond with Coordinator of Elementary Education, San Diego State College.

**155. Guidance in Elementary Education** (3) Summer

A study of the basic principles of guidance and their function in the educatio process as applied in the elementary school.

**156. Guidance Conference** (1) Summer

A series of lecture and discussion sessions centering on current problems counseling and guidance. Designed to serve the needs of any person desiring to k informed of developments in this area. Admission upon permission of the direc of this conference.

**158. Supervision of Child Welfare and Attendance** (3) Summer

Content includes laws relating to children, guidance principles, social case wo agency relationships, conference techniques, home visitation methods, employm supervision, attendance work, child accounting, familiarity with testing techniq

**61. Legal Aspects of Education** (3) I or II

A study of the school law of California, important court decisions, rulings of the alifornia State Superintendent of Public Instruction and the Attorney General, istorical and current trends, and comparative data from throughout the United tates.

**71. Audio-Visual Conference** (1) Summer

A series of lectures, discussions and demonstrations, centering on problems in he use of audio-visual instructional materials. Designed for teachers, administrators, udio-visual representatives, and others interested in current developments in this rea. Course may be taken twice for credit.

**74. Audio-Visual-Radio Education** (3) I, II

A study of audio-visual-radio aids as they affect learning. Analysis and development of materials of instruction and their presentation; operation of equipment.

**74BE. Audio-Visual Business Education** (3) Summer

A review of the skills and knowledges necessary to use audio-visual aids, followed y intensive study and research in the literature available and by practice with the aterials and techniques that apply to business education.

**75. Creating Audio-Visual Materials for Classroom Use** (3) I or II

Practice in the creation and evaluation of instructional materials, such as 5 mm. film strips, 16 mm. films, scripts, recordings and other audio-visual materials. rerequisite: Education 174, or equivalent.

**76. Problems of Speech Correction and Articulation** (3) (Irregular)

Analysis and discussion of the major articulatory problems as encountered in ublic school work, particularly in California. Required of all students for the speech orrection credential. Not open to students with credit for Speech Arts 176.

**77. The Teaching of Lip Reading** (2)

History, theory and methods of lip reading. Aids for the classroom teacher; rogram and materials of instruction for the specialized teacher. Opportunities for ractice teaching are offered. Not open to students with credit for Speech Arts 177.

**78. Problems of the Hard of Hearing** (2)

The adjustment of the hard-of-hearing group with emphasis on the public hool child. State and county hearing programs; technique of audiometry; use of earing aids; educational, classroom, and social problems.

**79A-179B. Nervous Speech Disorders** (3-3) Year, I

Classification and study of speech defects and disorders. Training in corrective chnique for public schools; observation. Required for the Special Secondary Crential in Correction of Speech Defects. Not open to students with credit for Speech rts 179A-179B.

**81. Exceptional Children** (3) I

Characteristics and adjustment problems of mental, physical, and emotional viates; emphasis upon the mentally handicapped.

**82. Curriculum and Methods for Mentally Retarded Children** (3) II

Selection, organization and presentation of curricular materials for mentally tarded children.

**83. Practicum for Teaching Mentally Retarded Children** (3) Summer

Analysis and interpretation of educational procedures utilized with the retarded arner. A demonstration class will be available for observation. Education 182 must taken prior to, or concurrently with, Education 183.

**84A. The Secondary School** (4) I, II

To orient the student toward his function as a teacher in the public secondary hools, including basic principles, history and philosophy of education, and audiosual instruction, and to understand the school as a social institution. Field work quired.

**184B. Development and Learning** (4) I, II

To acquaint the student in secondary education with the nature of develo ment and the learning process, with consideration of mental hygiene, guidance a the place of audio-visual aids. Field work required.

**184C. The Teaching Process** (4) I, II

To develop teacher competency at the secondary level in relationships and pla ing with the pupil, the community, and the profession, including classroom manageme audio-visual education, lesson planning, evaluation, and co-curricular activities. Fie work required.

**188. Techniques of Pupil Appraisal** (3) I or II

A study of, and practice in, techniques of collecting, assembling, and interpreti data about individual pupils for guidance purposes. Field work required. Prerequisit Education 102D or 102A, or consent of instructor. Not open to students who have cre for Psychology 105A or 105B.

**189. Workshop in Secondary Education** (3 or 6) Summer

Designed to meet the needs of individual or groups of teachers who wish develop or continue the study of some problem with the consultation of the Colle Staff and the San Diego County Curriculum Staff.

**191. Driver Education** (2) Summer

A workshop type course designed to prepare teachers of the course in hi school. Enrollment by permission of the instructor.

**199. Educational Problems** (1-6) I, II, and Summer

For senior and graduate students in education who have shown ability to wo independently. Problem to be chosen after consultation with a staff member. Adm sion by permission of the staff. Credit and hours to be arranged.

## Graduate Courses

For general requirements for admission to graduate courses, see statement Admission to Graduate Status in section on Admission and Registration. In additi to these general requirements, 12 units of professional education are prerequisite enrollment in all graduate courses.

**207. Educational Sociology** (3) Summer

A study of the social, economic, political and moral setting in which prese day American education functions. Prerequisite: Education 115A, or equivale teaching experience.

**220. Advanced Educational Psychology** (3) I, II

Advanced study of the research and its application to learning and hum growth. Prerequisite: Educational Psych. 130, or equivalent, teaching experience.

**230. Guidance Problems in Secondary Education** (3) I, II

Individual and group study of the theory and practice of guidance with empha upon practical problems of the members of the class.

**232. Problems in Vocational Guidance** (3) I or II

To prepare teachers for vocational guidance in the secondary schools. Inclu occupational information, vocational aptitude measurement, and educational gu ance. Prerequisite: Education 230, or equivalent.

**233. Guidance Counseling Techniques** (3) I, II

Designed for school counselors. To stress the understandings and procedu necessary for effective interviewing. Prerequisite: Education 230, or equivalent.

**233B. Guidance Counseling Techniques** (3)

Continuation of the work of Education 233. Prerequisite: Education 230 a 233, or equivalents.

**237. Research in Guidance Problems** (1-3) I, II

Individual study by graduate students who have demonstrated exceptional abil and a need for such work. Admission by permission of the Coordinator of Second Education and instructor.

8. **Field Work in School Guidance** (3) I or II

Application of the principles and procedures in testing, counseling, and related rsonnel work in the public schools. Weekly seminar sessions with college and operating staff. Prerequisite: Permission of instructor and 12 units in guidance ad related areas.

9. **Workshop in Pupil Personnel Services** (3) Summer

Application of principles and procedures to specific situations for improvement pupil personnel services. Individual problems emphasized. Prerequisite: Teaching perience and permission of director of workshop.

1. **Problems in the Teaching of Arithmetic** (3) I or II, Summer

A study of research and practice in the methods of teaching and in the curriculum elementary and junior high school arithmetic. Prerequisite: Education 129 or uivalent.

2. **Problems in the Teaching of Reading** (3) I, II

Advanced study of trends in reading instructions. Topics include developmental quences in reading skills and abilities, reading in the content fields, individual fferences, and interests. Students will develop individual projects or problems. rerequisites: Education 136 and 144 or equivalents.

3. **Seminar in Social Studies in Elementary Education** (3) I or II, Summer

Advanced study of problems in teaching social studies in the elementary school th emphasis on the study of the scientific research in the field. Prerequisite: Permis-on of instructor.

4. **Seminar in Language Arts in Elementary Education** (3) I or II, Summer

Advanced study of problems in teaching language arts in the elementary school, cluding spelling, literature and written and oral communication. Emphasis will be the study of scientific research in the field. Prerequisite: Permission of instructor.

5. **Seminar in Elementary Education** (3) I or II

A study of the methodology of research with particular reference to the basic search in the psychology and teaching of the elementary school subjects. Pre-quisite: 12 units in elementary education and permission of the instructor.

0. **Curricular Problems in Secondary Education** (3) I, II

Present status and development of the secondary school curriculum. Emphasis on individual study and development of solutions of problems of the students. Pre-quisite: 12 units in secondary education and permission of the instructor.

2. **General Education in the Secondary School** (3) Summer

A course designed for teachers in service. A study of the function and implemen-ion of general education in the secondary school. Prerequisite: 12 units in secondary ucation and permission of the instructor.

4. **Advanced Problems in Secondary School Instruction** (3) I, Summer

An analysis of the scientific research and philosophical principles in secondary hool instruction. Prerequisite: Teaching experience and permission of instructor.

5. **Recent Trends in Secondary Curriculum** (3) I or II, Summer

Current practices and trends in secondary schools. Extensive individual work related problems of interest to members of the class. Prerequisite: 12 units in ondary education and permission of the instructor.

7. **Workshop in Intercultural Education** (4)

A cooperaive workshop sponsored by the college and the San Diego City Schools study trends in intercultural education in American schools, including units, cur-ular and instructional materials and techniques. Enrollment only by application to Chairman of the Division of Education.

3. **Research in Curricular Problems** (1-3) I, II

Individual study by graduate students who have demonstrated exceptional ability a need for such work. Admission by permission of the Coordinator of Secondary ucation and instructor.

**260. Federal, State, County and City School Organization and Administratio**
(3) I, Summ

A study of the federal, state, county and city school organization, administrat and supervision, including school law.

**262. The Organization and Administration of Elementary Schools**
(3) I or II, Summ

A study will be made of the problems of personnel, local finance, curricul plant, community relations, and legal aspects of elementary schools. Required a prerequisite to Education 266. Prerequisite: Teaching experience, valid Gen Elementary Credential, and consent of the instructor.

**263. The Organization and Administration of the Secondary School**
(3) I or II, Summ

Topics will cover all aspects of the duties of a secondary school administra including personnel, finance, curriculum, equipment and supplies, public relati transportation, and law. Prerequisite: Possession of a valid General Secondary dential and permission of the instructor.

**264. Elementary School Supervision** (3) I or II, Summer

Principles and practices of supervision and methods of evaluating instruct and the curriculum in elementary education. Prerequisite: General Elementary dential, teaching experience, Education 260, 262, or equivalents, and permission of instructor.

**265. Secondary School Supervision** (3) I or II, Summer

For those who will be responsible for the supervision and evaluation of the riculum and teaching methods in the secondary school. Prerequisite: Possession valid General Secondary Credential, teaching experience, and permission of instructor.

**266. Field Work in Elementary School Administration and Supervision** (2)

Study of the administration and supervision of an elementary school, for Elementary School Administration and Supervision Credentials. Field project requ of all students under the direction of a college staff. Prerequisite: Education 26 264, or equivalent.

**267. Field Work in Secondary School Administration and Supervision** (2)

Study of practices as they are found in secondary schools relative to adminis tion and supervision; to insure direct contact with existing programs and proced through faculty guided projects. Prerequisite: Education 263 or 265, or equivalent

**268. Seminar in School Administration** (3) Summer

An intensive study of selected problems in finance, business administration, other topics in the field of school administration. Provision will be made for indivi work on special topics of interest to students.

**270. School Finance, Business Administration, and Law** (3) II, Summer

A study of public school finance at state and local levels; an analysis of business administration of schools; a study of school law as it applies to school fina administration and other aspects of public education.

**271. Supervision of Student Teaching** (2) I, II

Study of selection, orientation, induction, counseling and evaluation of crede candidates and student teachers; and helping student teachers plan lessons, con classroom learning, analyze pupils' difficulties and achievement. Open to experie teachers interested in the teacher education program.

**274A. Utilizing Audio-Visual Materials in the Classroom** (3) I

A critical analysis of research evaluating the use of visual, auditory, and o sensory materials in education. Prerequisite: Education 174, or equivalent.

**275. Administering the Use of Audio-Visual Materials** (3) II, Summer

Organizing, supervising, and coordinating audio-visual centers as an inte part of educational systems. Prerequisite: Education 174, or by permission of instructor.

**78. Educational Leadership** (3) I, II, Summer

An analysis of the factors and practice in procedures of group and individual adership in four areas: (a) the community; (b) the teaching staff; (c) the student ersonnel; (d) the professional field of educational administration and supervision. rerequisite: Permission of the instructor.

**90. Procedures of Investigation and Report** (2-3) I, II, Summer

Emphasizes procedures in selecting and writing a project or thesis. Methods of nvestigation and reporting data. Extensive survey of an area of professional literature analyze techniques and style. Separate sections for elementary and secondary levels.

**98. Special Study** (1-3)

An individual study course designed primarily for candidates for the master's egree.

**99. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

**16. Directed Teaching** (3-3) I, II

Systematic observation, participation, and teaching under supervision in an ffiliated school. Thirty clock hours of student teaching will usually earn one unit of edit, but the credit finally allowed will depend upon the nature and quality of the aching done. Any work below a C grade is unacceptable for a credential.

No student can enroll in this course until he has completed at least 10 units of ork in education and has been admitted to candidacy for the teaching credential.

During the semesters in which the student takes his assignments in student aching, he must meet with the college supervisor one hour each week for conference nd discussion of problems encountered in his teaching.

Students who have had student teaching in preparation for the junior high school special secondary credential should confer with their departmental and educational lvisers concerning partial fulfillment of this requirement as the result of having mpleted the student teaching required for the credentials mentioned above.

# ENGINEERING

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in *engineering* for the B.S. degree. Courses the major are in addition to 45 units in general education courses. Lower division quirements for all engineering options: Chemistry 1A-1B; Physics 4A-4B-4C; athematics 3A-3B, 4A-4B; Engineering 21 and 23, or their equivalents. Refer to ngineering Curricula in section of the bulletin on Preprofessional and Vocational urricula for additional requirements for various options. Upper division requirements: minimum of 36 upper division units. Specific requirements for the various engineering options are listed in the Engineering Curricula in section of the bulletin on Preofessional and Vocational Curricula. A minor is not required of engineering majors.

A *teaching major* is not offered in engineering.

### Minor

A *minor in arts and sciences* is offered in engineering. The minor must include at ast 15 units in engineering, nine units of which must be from courses carrying upper vision credit. The courses selected must be a logical sequence approved by faculty viser.

A *teaching minor* is not offered in engineering.

### Lower Division Courses

**-1B. Plane Surveying** (3-3) Year, I

Two lectures and one three-hour field period per week. Semester I: Use, care and justment of surveying equipment. Introduction to standard procedures and techques. Prerequisites: Engineering 2, or equivalent, Math. D, and sophomore standing. mester II: Computations and map making; land, topographic, and city surveying. erequisite: Engr. 1A.

**2. Mechanical Drawing** (3) I, II

Freehand lettering, use and care of drafting equipment, simple orthograp projection, introduction to problems of dimensioning. Open to students lacking cre for a year course in senior high school mechanical drawing. Not open to students w credit for Industrial Arts 2.

**21. Descriptive Geometry** (3) I

Fundamental principles of descriptive geometry and their application to en neering problems. Solutions of point, line and plane problems; curved lines and s faces; intersections of surfaces. One lecture and two three-hour laboratory peri per week. Prerequisite: Engr. 2, or equivalent, and sophomore standing.

**22. Machine Drawing** (3) II

Standard drawing methods and procedures, complete sets of working drawing simple machine parts, gears and cams; includes tolerance dimensioning, section threads and fasteners. One lecture and two three-hour laboratory periods per we Prerequisites: Engr. 21, Math. 3A-3B.

**23. Materials of Engineering** (2) II

A concise presentation of the physical properties of the common materials u in structures and machines, with brief descriptions of their manufacture and fa cation. Two lectures per week. Prerequisite: Sophomore standing.

### Upper Division Courses

**100A-100B. Elements of Electrical Engineering** (3-3) Year, I

Theory and characteristics of electrical equipment with emphasis on indust applications. Lectures and problems. Semester I: Direct current circuit anal D. C. motors and generators. Introduction to alternating current circuits. Prerequisi Math. 4A, Physics 4B, or permission of the instructor. Semester II: Alternating rent circuit analysis. Transformers, alternators, induction and synchronous mot conversion apparatus, and transmission lines. Prerequisite: Engr. 100A.

**101A. Electrical Engineering Laboratory** (2) I

Laboratory determination of the characteristics of direct current machinery circuits, single phase alternating current circuits. One three-hour lab. and report week. Prerequisite: Engr. 100A, or taken concurrently.

**101B. Electrical Engineering Laboratory** (2) II

Laboratory determination of the characteristics of single phase and polyp circuits, machines, and related equipment. One three-hour laboratory period and re per week. Prerequisite: Engr. 100B, or taken concurrently.

**102A-102B. Analytical Mechanics** (3-3) Year, I

Lectures and problems. Emphasis on engineering applications. Semester I: P ciples of statics which deals with the conditions of equilibrium of bodies acted by forces. Prerequisites: Physics 4A-4B, Math. 4A. Semester II: Principles of dyna which deals with the fundamentals of rectilinear and curvilinear motion of part and rigid bodies, and the rotation of rigid bodies. Prerequisite: Engr. 102A.

**104. Communications** (3) II

Power amplifiers, oscillators, modulators and detectors. Radio transmi and receivers for amplitude modulation and frequency modulation. Television syst Antennas and radio wave propagation. Prerequisite: Physics 102 or permissio the instructor.

**105. Fluid Mechanics** (3) II

The statics and dynamics of incompressible and compressible fluids. Visc fluid friction. Dimensional analysis. Fluid measuring instruments. Flow of pressible and incompressible fluids in pipes. Flow of liquids in open channels. Pu Prerequisites: Mathematics 4A, Physics 4A, Engineering 102A, and Engineering

**106. Fluid Mechanics Laboratory** (2) II

Characteristics of fluid measuring instruments. Fluid flow through pumps One three-hour laboratory and report per week. Prerequisite: Engineering 1C concurrent registration.

**22. Machine Design** (4) I

Individual design of a useful machine encompassing fundamental considerations simple machine parts. Practical design methods utilizing professional literature are ressed. Three lectures and one three-hour laboratory period per week. Prerequisites: ngr. 23, 102A, 140.

**24. Radio Measurements** (2) II

A laboratory course on measurements of the parameters of resonant circuits at dio frequencies. Study of the properties of oscillators, modulators, detectors and ave guides. Prerequisite: Previous or concurrent enrollment in Engineering 104. udents with credit in Physics 124 may not receive credit for this course.

**27. Engineering Thermodynamics** (3) I

An introduction to the basic principles of thermodynamics; laws of perfect gases, ipors and mixtures; cycles. Applications to engineering problems such as the analysis heat, power, and refrigeration systems, and steady-flow processes. Lecture and oblems. Prerequisites: Mathmetics 4A and Physics 4B.

**28. Applied Engineering Thermodynamics** (3) I

The study of various types of heat power equipment; steam generation, turbines, ciprocating engines and auxiliaries; fuels and lubricating oils; gas and oil engines, s turbines, refrigeration and compressors. The practical application of basic theory proper, efficient operating practices is stressed. Lectures and problems. Prerequisite: ngineering 127.

**9. Heat Power Laboratory** (2) I

Testing of steam generators and heat balance of same; steam turbine; reciproting engine; internal combustion engines; flue gases, lubricating oils and boiler feed ater. Emphasis upon standardized testing procedures, approved by SAE and ASME, d standard operating procedures. One three-hour laboratory period and report per eek. Prerequisite: Engineering 127.

**0. Route and Construction Surveying** (3) I

Application of surveying to engineering problems. Methods of route surveys for ghways, railroads, utilities. Construction surveys for buildings and other structures. arthwork computations. Two lectures and one three-hour field period per week. Prequisite: Engr. 1B.

**0. Strength of Materials** (3) II

Elastic properties and strength of engineering materials. Analysis of types of ilures. Stress analysis and deformation of simple structural and machine members. hotoelasticity. Lecture and problems. Prerequisite: Engr. 102A.

**1. Materials of Engineering Laboratory** (2) II

Theory and operation of testing machines and auxiliary apparatus. Conduct of sts to determine significant characteristics of commonly used engineering materials. cluded are heat treatment of metals, metallographic tests, and photoelasticity. One ree-hour laboratory and report per week. Prerequisite: Engr. 140, or taken conrrently.

**2. Stress Analysis** (3) I

Determination of stresses in trusses, beams, and frames. Combined stresses; ace structures; general theorems relating to elastic systems; statically indeternate structures; deflections; analytical and graphical methods of solution. Lectures d problems. Prerequisites: Eng. 102A-102B, 140.

**5. Internal Combustion Engines** (3) II

Application of theory of thermodynamics to internal combustion engines. Essenl features of design, operating characteristics, and application of gasoline, diesel, and s engines, and the gas turbine. Lectures and problems. Prerequisites: Physics 4C, ath. 4A. Recommended: Engr. 128.

**0. Industrial Electronics** (3) II

Photoelectricity and its applications; rectification and inversion; theory and plications of thyratrons and ignitrons including welding; radio-frequency heating; ectrostatic precipitation; motor control and introduction to servomechanisms. Prequisite: Physics 102.

**156. Aerodynamics** (3) II

Mechanics and thermodynamics of air; wing characteristics; drag; wind tunn testing technique; propellers and power plants; aircraft performance; stability a control. Introduction to compressible aerodynamics. Lectures and problems. Prereq sites: Engr. 102A-102B.

**180. Principles of Engineering Economy** (3) II

Analysis of the costs of development and promotion, construction, operatic depreciation and depletion. Capital recovery, income, return and yield. Valuations a appraisals, cost analysis and financial analysis. Application to engineering problem Prerequisite: Senior standing.

**199. Senior Report** (2) I, II

Investigation of specific problems of advanced nature. Preparation of report. P requisite: Advanced senior standing.

NOTE.—In laboratory courses special emphasis is placed upon the preparation neat, concise, complete and intelligent reports.

# ENGLISH

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in *English*. Courses in the major are addition to 45 units in general education courses. An introduction to the analytical French approach to the detailed study literature. Demonstrations by instructor and students. This course aims to gi teachers of French a greater mastery of French language and literature. Prerequisit Nine units of upper division French and graduate status.

**290. Bibliography** (1) See Romance Languages

**298. Special Study** (1-3)

An individual study course designed primarily for candidates for the master degree.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

## GENERAL CULTURE

### IN THE DIVISION OF FOREIGN LANGUAGES

Major and minor work are not offered in general culture courses. These cours are carried as part of the offerings of the Foreign Languages Department. They a conducted in English and are open to all students. A knowledge of foreign language not required.

### Lower Division Courses

**(G)15. French Civilization** (2) I

The major currents and characteristics of French culture, as expressed throu the centuries in literature, art, philosophy, music and science. Conducted in Englis No prerequisite.

**(G)16. French Civilization** (2) II

Continuation of French 15. No prerequisite.

**(G)15. German Civilization** (2) I

The major currents and characteristics of German culture, as expressed throu the centuries in literature, art, philosophy, music and science. Conducted in Englis No prerequisite.

**)16. German Civilization (2) II**
Continuation of German 15. No prerequisite.

**)15. Spanish Civilization (2) I**
The major currents and characteristics of Hispanic life and culture, as expressed rough the centuries in literature, art, philosophy, music and science. Conducted in glish. No prerequisite.

**)16. Spanish Civilization (2) II**
Continuation of Spanish 15. No prerequisite.

### Upper Division Courses

**)115. French Civilization (2) I**
An advanced course in French culture of the past and present, with emphasis on e arts, philosophy, and literature. Lectures, class discussions, outside readings, writ- reports on individual topics. Conducted in English. Prerequisite: Sophomore anding.

**)116. French Civilization (2) II**
Continuation of French 115. Prerequisite: Sophomore standing.

**)115. German Civilization (2) I**
An advanced course in German culture of the past and present, with emphasis the arts, philosophy, and literature. Lectures, class discussions, outside readings, itten reports on individual topics. Conducted in English. Prerequisite: Sophomore nding.

**)116. German Civilization (2) II**
Continuation of German 115. Prerequisite: Sophomore standing.

**)115. Spanish Civilization (2) I**
An advanced course in Hispanic culture of the past and present, with emphasis the arts, pihlosophy, and literature. Lectures, class discussions, outside readings, itten reports on individual topics. Conducted in English. Prerequisite: Sophomore nding.

**)116. Spanish Civilization (2) II**
Continuation of Spanish 115. Prerequisite: Sophomore standing.

## GENERAL LANGUAGE

### IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in general language.

### Lower Division Courses

**Latin and Greek Word Derivation (3) I**
A general and elementary course in philology. A study of Latin and Greek roots most frequent occurrence in English, and of the English words derived from them. prerequisite. Not open to students with credit for English 20.

**Pronunciation of French, Italian and German (1-3) II**
A course designed especially for the use of singers, radio announcers, etc. No rerequisite. This course may be taken for one, two or three units of credit depending the individual student's need.

# GEOGRAPHY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *geography* for the A.B. degree. Course in the major are in addition to 45 units in general education courses. Lower divisio requirements: Geography 1, 2; Geology 1A-1B. Recommended: A reading knowledg of German and French. Upper division requirements: A minimum of 24 upper divisio units in geography, or 18 units in geography and six units selected from related field with approval of the chairman of the department. A minor is not required; however students are urged to complete one minor.

A *teaching major* is not offered in geography; however, courses in geograph may be used as part of the *social science major* for the general junior high schoo credential or the general secondary credential. For specific information, refer to thes credentials.

### Minor

A *minor in arts and sciences* is offered in *geography*. The minor consists of a minimum of 15 units of work in geography, or maximum of 22, six units of which must be i courses carrying upper division credit.

A *teaching minor* is not offered in geography for the general secondary credential however, it may be used as a part of the *social science minor* for the special secondary the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

**(G)1. Introduction to Geography: Physical Elements** (3) I, II

The nature of maps, weather and climates of the world; natural vegetation; lan forms and their associated soils, with reference to their climatic relationships; the sea and their coasts. One field trip. This course is classified as a natural science. (See general education requirements.)

**(G)2. Introduction to Geography: Natural and Cultural Regions** (3) I, II

The regional differentiation of the world by human activity; areal bases o economy and nationality. Prerequisite: Geography 1.

**3. Elementary Meteorology** (3) I, II

An elementary study of the earth's atmosphere and changes in it which produc our weather and influence human affairs. Special attention given to local conditions instruments, and records.

**(G)10. Economic Geography** (3) I, II

Beginning course in economic geography designed for commerce and economi majors. Prerequisite: Geography 1.

### Upper Division Courses

**112. Geography of California** (3) II

The physiographic regions of California and the cultural landscapes develope by the successive cultural groups. Prerequisite: Geography 1 or consent of instructor

**113. Climatology** (3) I (Not offered in 1951-52)

A survey of the principal classifications of climates of the world; regional characteristics of climate; relations to soils, vegetation, and human activities. Prerequisite: Geography 1 or consent of instructor.

**117. Geography of Northern and Eastern Europe** (3) I

A study of the cultural development of the countries of northern and eastern Europe in relation to physical background and historical evolution. Prerequisite Geography 1 or consent of instructor.

**18. Geography of the Mediterranean Area** (3) II

A study of the cultural development of the countries of Southern Europe, Western sia, and North Africa in relation to physical background and resources. Prerequisite: eography 1 or consent of instructor.

**19. Geography of South America** (3) II

A study of the physical regions and human geography of South America, includ- g a review of the history of colonization and the exploitation of resources. Pre- quisite: Geography 1 or consent of instructor.

**20. Geography of Middle America** (3) I

A study of the physical and human geography of Mexico, Central America, nd the islands of the Caribbean, including a review of the history of colonization nd the exploitation of resources. Prerequisite: Geography 1 or consent of instructor.

**21. Geography of North America** (3) II

The natural regions of North America, their formation and economic and istorical development. Prerequisite: Geography 1 or consent of instructor.

**24. Geography of Asia** (3) I

The cultural regions of Asia, their physical environment, and historical develop- ent. Prerequisite: Geography 1 or consent of instructor.

**25. Geography of the Pacific Basin** (3) II

A geo-political approach to the study of the islands in, and the lands marginal to, e Pacific Ocean. Prerequisite: Geography 1, or consent of the instructor.

**35. Geography of the San Diego Area** (3) II

Directed individual urban and rural field work in the San Diego area; the apping of a small area and making its geographic interpretations. Prerequisite: eography 1 and 2 or consent of instructor.

**G)145. Conservation of Natural Resources** (3) II

Nature and extent of mineral, soil, water, forest, and wild life resources and eir conservation; with particular emphasis on the United States, against a general ckground of world resources. Conservation philosophies and practices, and their ographic bases. Prerequisite: Geography 1 or consent of instructor.

**6. Honors Course** (Credit to be arranged) I, II

To be arranged after consultation with the chairman of the department. Refer to e Honors program.

**9. Special Study** (1-3) I, II

A special study course offered either semester for one to three units. May be taken r a maximum of six units by arrangement with the chairman of the department. Open ly to majors in geography.

### Graduate Courses

**0A-200B. Seminar** (2-2) Year, I

**0. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized bibliog- phies, preparatory to the writing of a master's project or thesis.

**8. Special Study** (1-3)

An individual study course designed primarily for candidates for the master's gree.

**9. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

# GEOLOGY

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is not offered in geology. Students preparing for later professional training in geology should plan on completing Chemistry 1A-1B; Physics 4A-4B-4C; Mathematics 3A-3B; Engineering 1A-1B, 21A; and Geology 1A-1B, 21 and 22.

A *teaching major* is not offered in geology; however, courses in this field may be used as part of the *general science major* for the general junior high school credential. For specific information, refer to this credential.

### Minor

A *minor in arts and sciences* is offered in geology. The minor must include at least 15 units of work in geology, six units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in geology; however, courses in this field may be used as part of the *general science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

**1A. Physical** (4) I

The composition, origin, and distribution of earth materials, and their modification through mechanical and chemical process of change. Three lectures and one three-hour laboratory period weekly with related field study during the semester. (Not open to students who have had Geology 2.)

**1B. Historical** (4) II

Theories of earth origin, and the evolutionary history of the earth as traced through rock and fossil records. Consideration of the Paleontologic Sequence. Three lectures and one three-hour laboratory period weekly, with arrangement for field study and conference during the semester. Prerequisite: Geology 1A or equivalent.

**(G)2. General Geology** (3) I, II

Earth materials and processes, the development of land forms, and a brief consideration of the history of the earth. Open to all students except those with previous credit in geology. No prerequisites.

**(G)3. General Geology Laboratory** (1) I, II

Recognition of common earth materials with experience in both field and map relationships. Designed to accompany Geology 2, but entirely separate and complete in itself. One three-hour laboratory period weekly. Open to all students except those with previous laboratory credit in geology. No prerequisites.

**(G)4. Physiography of United States** (3) II

Geologic history and present features of the main physiographic provinces of United States. Prerequisite: Geology 1A or 2.

**21. Elementary Mineralogy** (4) I

Practice in the determination of common minerals and rocks, their geologic environment, utilization and economic significance. Two lectures and two three-hour laboratory periods weekly. No prerequisite.

**22. Advanced Mineralogy** (4) II

The application of the polarizing microscope and other techniques to the identification of minerals and rocks. Two lectures and two three-hour laboratory periods weekly. Prerequisite: Geology 21.

### Upper Division Courses

**100. Structural Geology** (3) I

The evolution and description of the structural and topographical features of the earth. Faulting, folding, and orogenic forces with practical illustrations from the North American Continent and California geologic conditions. Lectures, discussions and occasional field trips. Prerequisite: Geology 1A-1B or equivalent.

**01. Museum Work** (1-2) I, II

Selection and preparation of materials for the college museum collections. mphasis upon creation of self instructive displays for use on the elementary and econdary as well as the collegiate level. Prerequisite: Geology 1A-1B, and consent of he instructor.

**02. Geology of California** (2) II

Directed reading and group discussion of California geologic literature. Designed o acquaint the student not only with the important structural and geomorphic units f the State but with the variety of important source materials of geologic literature s well. Use of bibliographies, state and federal surveys, research publications, etc. rerequisite: Geology 1A-1B, and consent of the instructor.

**08. Field Geology** (1-4) I, II

Field instruction in geologic methods. Reconnaissance of adjacent unmapped reas with preparation of a geologic map and accompanying report. Work accomplished primarily on week-ends with minimum classroom activity during the week or organizational details. Prerequisite: Geology 1A-1B, and consent of the instructor.

**66. Honors Course** (Credit to be arranged) I, II

Special work in any of several phases of geologic science for students of demontrated ability. Refer to the Honors Program.

**99. Special Study** (1-3) I, II

Individual work in field, library, laboratory, or museum under staff supervision. pen only to qualified students upon consultation. Maximum credit, six units.

## GERMAN

### IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in German; however, students desiring carry advanced work in German should consult with the Chairman of the Department of Foreign Languages.

### Lower Division Courses

**G)1. Elementary** (3) I, II

Pronunciation, oral practice, readings on German culture and civilization, inimum essentials of grammar.

**G)2. Elementary** (3) I, II

Continuation of German 1. Prerequisite: German 1 or one year of high school erman.

**G)3. Intermediate** (3) I, II

Reading in German of cultural material, short stories, novels or plays; oral ractice; outside reading with oral and written reports. Prerequisite: German 2 or wo years of high school German.

**G)4. Intermediate** (3) II

Continuation of German 3. Prerequisite: German 3 or three years of high school erman.

**Intermediate** (2) I, II

A practical application of the fundamental principles of grammar by means of al and written work based on German texts. Prerequisite: German 2 or two years high school German.

**Intermediate** (2) II

Continuation of German 5. Prerequisite: German 5 or three years of high school erman.

**). Conversation** (2) I

Practice in the spoken language; practical vocabulary; conversation on assigned pics; simple dialogues and plays. Prerequisite: German 2 or two years of high hool German.

**11. Conversation** (2) II
Continuation of German 10. Prerequisite: German 10, or German 3, or thr years of high school German.

**(G)15. German Civilization** (2) I
The major currents and characteristics of German culture, as expressed throug the centuries in literature, art, philosophy, music and science. Conducted in Englis No prerequisite.

**(G)16. German Civilization** (2) II
Continuation of German 15. No prerequisite.

**D. Intermediate Review and Reading** (3) I
(Offered for last time in fall of 1951

Reading and composition; study of standard prose as basis for class worl collateral reading with written reports; German conversation, with texts read as basis; dictation. Prerequisite: German C or four years of high school German.

**8A-8B. Scientific Reading** (3-3) I
First semester, readings in scientific reader on chemistry, physics, etc.; occ sional written reports on scientific subjects read outside of class; sight readin Second semester, readings in special scientific or technical works; weekly writte reports required; sight reading. Prerequisite for 8A: German 2 with a grade of C two years of high school German; for 8B: German 8A or German 3, with a grade C, or three years of high school German.

### Upper Division

**101A-101B. Advanced Conversation and Composition** (3-3) Year, I
(Not offered 1951-52

Translation into German of moderately difficult English prose. Free compos tion in German, written and oral. Outside reading of modern German plays and pros dealing with various aspects of German life and culture, with written reports and or discussions in German. Oral and written practice in conversational German. Prerequ site: German 4 and 6, or their equivalent, with a grade of C.

**(G)115. German Civilization** (2) I
An advanced course in German culture of the past and present, with emphas on the arts, philosophy, and literature. Lectures, class discussions, outside reading written reports on individual topics. Conducted in English. Prerequisite: Sophomo standing.

**(G)116. German Civilization** (2) II
Continuation of German 115. Prerequisite: Sophomore standing.

## HEALTH EDUCATION

### IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

### Major

Work in health education leading to the general secondary credential is offer in connection with the general major. For a statement of requirements, refer to t general secondary credential.

### Minor

A *minor in arts and sciences* is offered in *health education*. The minor consis of a minimum of 15 units, or maximum of 22, nine units of which must be in cours carrying upper division credit. Courses will be determined in consultation betwe student and departmental representative.

A *teaching minor in health education* is offered for the general secondary ar the special secondary credentials. For a statement of requirements, refer to t credential.

### Lower Division Courses

**)21. Principles of Healthful Living** (2) I, II

An approach to the personal health problems of college students. Scientific alth information is provided, and an attempt is made to promote wholesome attitudes d desirable practices relating to healthful living. Required of all freshmen.

**. Community Health** (3) I, II

Community health problems; the role of the citizen, of the public, and of comnity health agencies in promoting and protecting the health of the community.

**)90. Physiology of Reproduction** (1) I, II

A series of lectures and discussions dealing with normal and abnormal physiology d anatomy of reproduction; facts and frauds in sex hygiene, and related topics. t open to students with credit for Home Economics 90.

### Upper Division Courses

**5. Safety Education and Accident Prevention** (3) II

Highway safety, the fundamentals of safety programs and techniques in home, ool and industry. Partially satisfies the requirements for state credential in driver ucation.

**1. Health Education for Teachers** (2) I, II

The teacher's function in the different aspects of the school health program; vironment, services, and instruction. Special attention is given to materials and terial sources, and to community relationships and resources. Separate elementary d secondary sections.

**2. Health Education Programs** (3) I

The construction of the health education program including objectives, scope d sequence of instruction, teaching methods, source materials and evaluation prolures; practice in building instructional units.

**3. Administration of the School Health Program** (3) II

Administrative responsibilities and procedures in organizing and conducting the ool health program. Principles, policies, and practices involved in instruction, serv-, environment, and community relationships. Partially fulfills Health and Developnt Credential requirement for nurses.

**. Special Study in Health Education** (1-3) I, II

Extensive review of pertinent literature, individual research, and advanced study problems in the profession. Credit will range from one to three units according to the e and amount of work. Approval of the Department Chairman required. Maximum dit, 6 units.

### Graduate Courses

**. Evaluation Procedures in Health, Physical Education and Recreation** (2) I

A study of tests and measurements in the profession with practice in their use, struction and interpretation of results.

**. Problems in Health Education** (2) I, II

Current problems in Health Education, studied through a review of the literature, cussion of trends, observation of school situations, together with the analysis and luation of actual problems. Written reports required.

**. Special Study** (1-3) I, II

An individual study course designed primarily for candidates for the master's ree

# HISTORY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *history* for the A.B. degree. Course in the major are in addition to 45 units in general education courses. Lower divisio requirements History 4A-4B, or 8A-8B, or 9A-9B, and either Political Science 1A-1B or 71A-71B, or Economics 1A-1B. Two of the above history courses are recommende for students planning to major in history, and it is suggested that History 4A-4B b included as one of them. No freshman shall enroll in more than one lower divisio course in history during any one semester without the permission of the departmen Upper division requirements: A minimum of 24 upper division units in history, inclu ing History 199, and a minimum of a year of concentration in each of three of th following fields: (a) Ancient and Medieval; (b) Modern Europe; (c) United States (d) Latin America; (e) Pacific Area and the Far East. These courses must be selecte under the guidance of the chairman of the department. A reading knowledge of on foreign language is strongly recommended.

A *teaching major* is not offered in history; however, courses in history may b used as part of the *teaching major in social sciences* for the general secondary an general junior high school credentials. For statement of requirements, refer to thes credentials.

### Minor

A *minor in arts and sciences* is offered in *history*. The minor must include a least 15 units of work in history, or maximum of 22, six units of which must be i courses carrying upper division credit, including a year-course.

A *teaching minor in history* is offered for the general secondary credentia Courses in history may be used as part of the social teaching science minor for th special secondary, general elementary, and kindergarten-primary credentials. For stat ment of requirements, refer to these credentials.

### Explanation of Courses

NOTE: History 17A-17B does not count toward credit for a major in history.

Any history course, with the exception of History 270A-270B, may be take either semester, the A part not being a prerequisite to the B part.

### Lower Division Courses

**(G)4A-4B. History of Modern Europe** (3-3) Year, I, II

A survey of European society, institutions and politics from about 1500 to t present. Fall semester: 1500-1799. Spring semester: 1799 to the present.

**(G)8A-8B. History of the Americas** (3-3) Year, I

Survey of the history of the western hemisphere from its discovery to the prese time.

**9A-9B. History of the Pacific Ocean Area** (3-3) Year, I

A general survey of the history and civilization of the peoples of the Pacific, wi special emphasis upon exploration, trade, international rivalries, and social evoluti of the island areas.

**(G)17A-17B. History of American Civilization** (3-3) Year, I

Survey of the political and social development of the United States, with empha upon the rise of American civilization and ideals.

### Upper Division Courses

**111A-111B. Ancient History** (3-3) Year, I

(Offered in 1951-52 and alternate year

Fall semester: Greek history to the Roman conquest. Spring semester: Roma history to the fifth century A.D.

### G)121A-121B. Medieval History (3-3) Year, I

(Offered in 1952-53 and alternate years)

Survey of the main events of European social, cultural, religious, political and conomic history, between 500 and 1400 A.D.

### 31A-131B. Renaissance, Reformation and Counter-reformation (3-3) Year, I

(Offered in 1951-52 and alternate years)

A history of personalities and events connected with the social, political, cultural, conomic and religious change between 1300 and 1600.

### 41. Europe in the Seventeenth and Eighteenth Centuries (3) I

(Not offered in 1951-52)

European thought, politics and international relations from the Thirty Years' Var and Louis XIV to the Seven Years' War.

### 42. The French Revolution and Napoleonic Era (3) II

(Not offered in 1951-52)

Study of conditions in France prior to 1789, the Revolution, 1789-1799, the organ-ation of France and Europe under Napoleon, character of his empire, and the reor-anization of Europe at the Congress of Vienna.

### 43A-143B. Europe in the Nineteenth Century (3-3) Year, I

Reaction in Europe, the development of nationalism, the impact of industrialism, nd the background of World War I. Covers period 1815-1914.

### 44A-144B. The World Wars (3-3) Year, I

(Offered in 1952-53 and alternate years)

Developments from 1914 to the present. Semester I: World War I, the peace ttlements, and the background of World War II. Semester II: World War II and its termath.

### 1A-151B. History of England (3-3) Year, I

Political, constitutional, social and economic developments since 1066. Designed r prelegal students, majors in English, and as a background for American History.

### 6A-156B. History of British Expansion (3-3) Year, I

(Not offered in 1951-52)

Study of the growth and development of the British Empire from the first over-as empire to the present. History 156B not open to students with credit for Political cience 160.

### 1. Mexico and Caribbean Countries (3) I

Special attention to relations between the United States and these countries, and recent developments in Mexico.

### 2. South America Since Independence (3) II

Republics of South America. Development of nationality, struggles for political ability, exploitation, diplomatic and commercial relations with the United States, and her international problems of South America. Survey of present-day conditions.

### 1A-171B. Rise of the American Nation (3-3) Year, I

(Offered in 1952-53 and alternate years)

Semester I: English colonization in North America, development of colonial stitutions and political customs, and areas of international conflict during 18th cen-ry. Semester II: The Revolution and establishment of the government under the nstitution of 1787. Covers period to 1814.

### )172A-172B. Constitutional History of the United States (3-3) Year, I

Colonial governments, formation of the national Constitution, historical develop-nt of constitutional government, and significant phases of American constitutional w. Not open to students with credit for Political Science 139A and 139B.

### 3A-173B. The Expansion of the United States (3-3) Year, I

(Offered in 1951-52 and alternate years)

Lectures and readings on Jacksonian democracy, territorial expansion and the exican War, the slavery controversy, Civil War and Reconstruction, and attention to e growth and progress of the United States to the close of the nineteenth century.

**175A-175B. The United States in the Twentieth Century** (3-3) Year, I

The rise of the United States to the position of a world power; social and economic problems posed by the machine age; political action and adjustment, actual and proposed, intended as solutions for these problems.

**176A-176B. History of American Foreign Policy** (3-3) Year, I

Lectures and readings in the field of American foreign relations since 1776, with special emphasis, in the second semester, upon affairs since 1900. A general survey course. Not open to students with credit for Political Science 158A-158B.

**(G)179A-179B. Intellectual History of the American People** (3-3) Year, I

A study of the ebb and flow of ideas in the United States since the founding o the English colonies, with special attention devoted to social and political thought.

**181A-181B. History of the West** (3-3) Year, I

The American frontier: Expansion, exploration, settlement and building of th new states, with emphasis upon frontier problems of defense, communications, finance etc.; the development of cultural institutions. A critical examination of the causes effects and results of the frontier experiences of the American people.

**189. History of California** (3) I, II

The economic, social, intellectual, and political development of California fron the earliest times. Emphasis will be on the founding of California, internationa struggles for California; American conquest and Gold Rush Era; development o California as a state.

**191A-191B. History of the Far East** (3-3) Year, I

Particular emphasis during the first semester upon the history, both interna and international, of the Far East through the nineteenth century. The second semeste will be devoted to a consideration of developments in the twentieth century.

**192. History of Russia** (3) II

A general survey emphasizing the period since Peter the Great; the Russia Empire's relations with its national minorities; Tsarist experiments in political an social reform; revolutionary socialism; the development of the U. S. S. R.

**193. History of China** (3) I (Offered in 1952-53)

A survey of Chinese history and institutions from antiquity to the present.

**194. History of Japan** (3) I (Offered in 1951-52 and alternate years)

A general survey of the political, economic and social development from th foundation of the empire to contemporary times. Special attention will be given t religions, philosophy, literature, and the arts.

**199. Special Course for Advanced Students** (3) II

Required of all students with a history major in liberal arts and those workin toward a General Secondary credential with a history major. To be attended durin the senior year. Open to social science majors.

## Graduate Courses

**270A-270B. Seminar** (2-2) Year, I

Required of all candidates for the General Secondary credential with a histor major, and for the M.A. degree in history. Prerequisites: 16 to 18 units in upper div sion history, including 199, or permission of instructor. 270A is a prerequisite for 270 Open to candidates for the M.A. degree in social science, with consent of instructo

**290. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized bibliogr phies, preparatory to the writing of a master's project or thesis.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

# HOME ECONOMICS

## IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is not offered in home economics at this time; how-
er, all lower division requirements for a major can be met during a two-year period.
pper division courses are also offered and are being added to the program as rapidly
facilities permit.

Students may elect a general major with one of the fields of concentration in
me economics. For specific information, refer to the Home Arts Curriculum in the
tion of the bulletin entitled: Preprofessional and Vocational Curricula.

A *teaching major* is not offered in home economics; however, students planning
complete requirements for a special secondary credential in home economics should
e the following courses in addition to courses in home economics: Chemistry 2A-2B.
commended: Physics 2A-2B, Biology 1 or 3, Zoology 165, English 2A, History
A-17B or Political Science 71A-71B, Health Education 90, Art 6A, 8, and 61B,
isiness 20, and Sociology 135.

### Minor

A *minor in arts and sciences* is offered in *home economics.* The minor consists of
minimum of 15 units, or maximum of 22, nine units of which must be in courses
rrying upper division credit. Lower division requirements: Home Economics 5 or
and 10 or 11. Upper division requirements: Home Economics 105 or 100, 150 and
0. Electives may be chosen from Home Economics 1, 55, 61A, 101, 135, and 160A.

A *teaching minor in home economics* is offered for the general secondary, general
ior high, and special secondary school credentials. For statement of requirements,
er to these credentials. A student with a minor in home economics may teach home
nomics in junior high school with a general junior high school credential. Through
nseling with the adviser in home economics, a student may so extend the minor in
me economics that the special secondary credential in home economics may be
tained with a minimum amount of additional work in the field.

### Lower Division Courses

**)1. Home and Family Life** (3) I, II
A general education course in family life education. Consideration of necessary
paration for marriage with emphasis on a stable, happy democratic family life;
nily budgets and money management; finding a home to buy, build or rent; child
re, proper training and guidance; home safety. Open to men and women.

**)2. Foods** (3) I
A general education course in practical arts. Deals with the problems faced in
nning meals in which the foods are well cooked and appetizing and serving meals
ways suited to the family situation; safety in the kitchen. Nutrition, economic and
nagement problems are stressed. One lecture and two laboratory sections per week.

**)10. Clothing Fundamentals** (3) II
A general education course in practical arts. Selection of clothing with self-
alysis as a basis; wardrobe planning and buying procedures. Commercial patterns
l their adaptation; fitting and construction principles applied to cottons.

**Advanced Clothing** (3) I
Fitting and construction processes applied to wool, silk, and synthetics, empha-
ing fundamental principles of handling. Prerequisite: Home Economics 10 or
uivalent.

**Household Equipment** (2) II
Selection, methods of operation and care of household appliances. Equipment of
ious types used and tested for safety, efficiency and cost of operation. Efficient
chen arrangement and storage space in relation to the well-being of the family.

**A. Nutrition** (2) II
Practical problems of nutrition including food requirements, food selection, and
d habits. (For men and women.)

**61B. Nutrition Laboratory** (1) II

Nutrition principles applied to food preparation, meal preparation and specia diets. Open to prenursing students. One three-hour laboratory section per week.

**62. Food and Nutrition** (3) II

Selection, purchase, and service of meals with a consideration of nutritiona needs of family groups, food habits and social customs. Open to all students excep prenursing students.

**90. Physiology of Reproduction** (1) I, II

A series of lectures and discussions dealing with normal and abnormal physiology and anatomy of reproduction; facts and frauds in sex hygiene, and related topics Not open to students with credit for Health Education 90.

### Upper Division Courses

**100. Advanced Clothing Design (Tailoring)** (3) II

Principles of tailoring; planning and construction of coats and suits. Prerequisite: Home Economics 11.

**101. Clothing Selection** (3) I

Aims to develop taste in dress through a better understanding of the relation o art principles, psychology, fashion trends, personality and physical characteristics t individuals. History of costume is studied briefly as an aid in understanding recurrin cycles in fashion. A consideration of buymanship information necessary in wardrob selection to insure satisfaction and economy.

**105. Family Meals** (3) II

This course deals with the planning, preparing, and serving of attractive, well balanced meals for different income levels, and for various occasions. The student wil have responsibility for menu making, food purchasing, and meal management.

**120. Demonstration Methods** (1) Irregular

Class discussions and demonstrations with emphasis upon individual experienc in organizing demonstration materials and in acquiring demonstration techniques Observation and evaluation of professional demonstrations. Prerequisite: Nine unit in Home Economics courses.

**(G)135. Marriage and the Family** (3) I, II

Preparation for marriage. Prediction scales for evaluating success or failur in marriage. Parent-child relationships; factors in successful and unsuccessful marriages; higher education and the birth rate; married women in industry and professions; desertion and divorce. Not open to students who have credit for Sociolog 45 or 135. A general education course in social science or in family life education

**(G)150. Home Management** (3) I, II

A general education course in family life education. Integration of the learnin activity around a living situation with emphasis on cooperation and establishment o family goals. Management for more successful use of the resources of time, energy, an money to enrich personal and family life; use of credit, value of insurance and balancing budgets. Open to men and women.

**160A. Merchandise Analysis—Textiles** (2) I

Properties, uses, selection and care of textile fibers and fabrics. The aim is t develop judgment in the evaluation involved in the selection of textiles. (Open to me and women.)

**160B. Merchandise Analysis—Nontextiles** (2) II

Properties, uses, selection and care of metals, glass, rubber, fur, enamels and plastics. (Open to men and women.)

**161. General Textiles** (2) II

Factors involved in fundamental weaves, fabrics, color, and finishes with reference to selection of fabrics for home decoration and clothing. Relationships to durability and cost are emphasized. Open to all students except merchandising majors.

**(G)170. Child Care and Development** (3) I

A general education course in family life education. A study of the prenatal and preschool periods of child development; particular emphasis is given to the nutrition and physical development of the young child. Directed observation and participation in the nursery school.

# INDUSTRIAL ARTS
## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is not offered in industrial arts at this time; how-er, all the lower division requirements can be met during a two-year period. pper division courses are also offered as facilities will permit and other courses are anned and will be added as soon as possible. Courses are designed for two objec-ves: (1) leading toward professional education with a special secondary credential, nd (2) for general education. The General Shop courses are designed to contribute better family living and in them special emphasis is given to individual interests nd objectives. Some of the other courses, while designed for prospective teachers, ould also prove valuable to students desiring practical shop training on an elective sis.

A *teaching major* is not offered in industrial arts at this time; however, students anning to complete the special secondary credential in industrial arts should take e following courses in the lower division in addition to the general education quirements: Mathematics C, D, and E, unless completed in high school; Chemistry A, or a year of high school chemistry; Physics 2A-2B; Art 2; Speech Arts 4; Indus-ial Arts 2 or 21 and 51 or 52; Industrial Arts 31 or 32, 61 and 71.

### Minor

A *minor in arts and sciences* is offered in industrial arts. The minor must include least 15 units of work in industrial arts, nine units of which must be from courses rrying upper division credit.

A *teaching minor* in industrial arts is offered for the general junior high, special condary, and general secondary credentials. Industrial arts may also be used as a cond minor for the general elementary credential. For specific information, refer to e outline of requirements for these credentials.

### Lower Division Courses

**Mechanical Drawing** (3) I, II, Summer

Use and care of drafting equipment, freehand lettering, technique of the finished awing including inking, simple orthographic projection, introduction to dimen-oning problems, simple section and auxiliary views, fundamentals of pictorial drawing isometric, oblique, and cabinet projection. One lecture and two laboratory sections r week. Not open to students with credit for Engineering 2.

**G)5. Introductory General Shop** (3) I

A general education course in practical arts utilizing tools and material of indus-ial arts to gain understanding of the industrial age. Students will explore their ilities by solving practical problems. Activities include individual and group prob-ms, field trips, and audio-visual aids.

**G)6. Intermediate General Shop** (2) II

A general education course in practical arts. An approach similar to that of dustrial Arts 5 will be used. Students may select problems to meet their needs, terests, and objectives. Safety consciousness and good work habits will be empha-zed.

**. Industrial Drafting** (3) II

Introduction to industrial drafting procedures. Principles of orthographic pro-ction as applied to aeronautical and machine drawings, sheet metal, furniture and lated production drawings, and electrical and pipe layouts. One lecture and two boratory sections per week. Prerequisite: Industrial Arts 2 or one year of high school echanical drawing.

**31. Elements of Metalwork** (3) I

Demonstration and practice in the use of hand tools commonly used in bench an sheet metal including fundamentals of pipe fitting and welding. Discussion of th principles and techniques of metalworking for the prospective shop teacher. One lecture and two laboratory sections per week. (Required for the Special Secondary credential in Industrial Arts.)

**32. Elements of Machine Operation** (3) I, II

Demonstration and practice in the safe operation of machine shop equipmen including drill, milling machine, shaper, and precision grinder for the shop teache May be substituted for Industrial Arts 41 to meet requirements for the Special Secondary credential in Industrial Arts. One lecture and two laboratory sections per wee

**51. Elements of Woodwork** (3) II

Training in the use of hand tools commonly used in the woodshop. Discussion an demonstration of the principles and techniques of woodwork and woodworking machine for the teacher. One lecture and two laboratory sections per week. (Required for th Special Secondary credential in Industrial Arts.)

**52. Advanced Woodwork** (3) I

Demonstration and practice in the safe operation of woodworking machine including the lathe and in the fundamentals of furniture joinery. Training in settin up and maintaining machines. One lecture and two laboratory sections per week. Prerequisites: Industrial Arts 51 or one year of high school woodwork.

**61. Elements of Electricity** (3) II

Demonstration of the basic principles of electricity as related to the home and t industry; practice in the use of tools, meters and materials in the laboratory and a applied to home appliances and the design and construction of simple devices suitabl to the high school shop. One lecture and two laboratory sections per week. (Require for the Special Secondary credential in Industrial Arts.)

**62A-62B. Applied Electronics Laboratory** (3-3) Year, I

(May not be offered in 1951-52

Practice in the construction and testing of electronic devices, such as radi receivers, television receivers, photocell systems, vacuum tube voltmeters, special control, and testing devices. Two hours of discussion and six hours of laboratory per wee Prerequisite: Industrial Arts 61 or permission of instructor.

**71. Elements of Transportation Machinery** (3) I

Demonstration and study of the theory of internal combustion engines as applie to transportation. Practice in maintenance, tune up and minor repair of automobile Consideration of the problems of safe driving and the development of the necessar habits and attitudes. Two lectures and one laboratory section per week. (Required fo the Special Secondary credential in Industrial Arts.)

## Upper Division Courses

**121. Advanced Mechanical Drawing** (3) I, II, Summer

Lettering practice, orthographic and isometric projection of machines and part and of furniture. Theory and practice of dimensioning, working and production drawings, reproduction and principles of perspective. Intended for the prospective teache One lecture and two laboratory sections per week. Prerequisite: Industrial Arts 2

**131. Advanced Metalwork** (2) I, II

Additional demonstration and practice on metalworking machines includin press work, welding and forging, sheet metal forming, metal spinning and pipe layou and fitting. Two laboratory sections per week. Prerequisite: Industrial Arts 5 or 3

**133A-133B. Advanced Machine Shop Practice** (3-3) Year, I, II

A year course in the principles and practice of machine tool operation stressin tool making, instrument work and modelmaking. One lecture and two laboratory sections per week. Prerequisite: Industrial Arts 32 or permission of instructor.

**136. Forging and Welding** (2) (May not be offered in 1951-52)

Principles and techniques of forging and welding including oxy-acetylene an electrical as applied to repair work and the fabrication of ornamental metal worl Two laboratory sections per week. Prerequisite: Industrial Arts 5 or 31.

**1A-151B. Furniture and Cabinet Making** (2-2)

(May not be offered in 1951-52)

A year course in advanced woodwork problems. Design and construction of furni-
e and mill cabinet work. Two laboratory sections per week. Prerequisite: Industrial
ts 51 or 52.

**1. Finishing and Painting** (2) I

Theory, demonstration and practice of a wide variety of wood and metal finishing
cesses, including fillers, stains, varnishes, enamels and lacquers. Two laboratory
tions per week. Prerequisite: Industrial Arts 5 or 51 or 52.

**. Patternmaking and Woodturning** (3) II

Demonstration and practice of the principles of patternmaking and woodturning.
velopment of skill in woodturning operations. One lecture and two laboratory sec-
ns per week. Prerequisite: Industrial Arts 51 and 52 or equivalent.

**. Experimental Shop** (1 or 2) I, II

Individual shop work on complex projects on an experimental basis. Prerequisite:
mission of the instructor.

**. Industrial Arts Organization and Management** (2) II

(May not be offered in 1951-52)

Study of the organization of Industrial Arts in secondary schools, review of
ject requirements and methods of developing student participation in shop manage-
nt. Two lectures per week.

**. Recent Trends in Industrial Arts Education** (2) I

(May not be offered in 1951-52)

Survey of current trends and practices in the field of Industrial Arts in Secondary
ication. There will be opportunity for individual work on related problems of
erest to member of the class. Two lectures per week.

## JOURNALISM

### IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in *journalism* for the A.B. degree. Courses
he major are in addition to 45 units in general education courses. Lower division
uirements: Journalism 51A-51B, Physical Science 10, Speech Arts 81, Business
or equivalent performance in typing. Recommended: Business 27, Economics 1A-
General Language 20, English 61. Upper division requirements: 24 upper divi-
units in journalism to include Journalism 102 and 151. A minor is not required.

### Minor

A *minor in arts and sciences* is offered in journalism. The minor must include at
t 15 units of work in journalism, nine units of which must be from courses carrying
er division credit.

A *teaching minor* is not offered in journalism.

### Lower Division Courses

**. Elements of Journalism** (3) I

Theory of news writing; introduction to the newspaper as an institution in
ern society. Prerequisites: Sophomore standing and grade of B in freshman com-
tion, or consent of instructor; and Business 2A (may be taken concurrently) or
valent, with 30-word-per-minute performance.

**. News Gathering and Reporting** (3) II

Practice in writing news copy, both for class criticism and for publication in
*Aztec.* Prerequisite: Grade of C or better in Journalism 51A.

**Special Projects** (1-3) I, II

Special work in journalism by arrangement with instructor. Work on *The Aztec,*
book, other publications, with consent of instructor. (NOTE.—A maximum of six
s of Special Projects allowable toward the major or minor in journalism. As elec-
credit, such units not limited except at instructor's discretion.)

## Upper Division Courses

**101. Writing for the Business Press** (3) II

Practice in gathering material and writing articles for the business press. Production of eight articles and marketing of at least one article required. Prerequisite junior standing, plus consent of instructor.

**102. Law of the Press** (3) II

Understanding of the law as it affects the privileges and defines the duties anc responsibilities of the press. Problems of constitutional law, libel, privacy, and posta regulations pertinent to the press, with emphasis on the covering of public affairs.

**106. Creative Writing** (3) I

A writing workshop in which students are given opportunity to criticize eacl other's work. Emphasis on narrative and description, but freedom to pursue whateve writing forms may interest the student most. May be taken a second time with nev material. Not open to students with credit for English 106.

**122. Public Opinion Measurement** (3) II

The history, methods, and problems of public opinion and attitude measurement. Emphasis will be placed upon the polling of consumers and voters. Students wil be given field experience. Not open to students with credit for Psychology 122.

**132. Propaganda and Public Opinion** (3) II

A study of the forces which mold the American public mind, the practice o propaganda, a description and analysis of public relations, pressure groups and thei effect in American public life. Not open to students with credit for Political Scienc 122.

**151. Advanced Editing and Reporting Techniques** (3) I

Editing copy, writing headlines, making up pages, handling telegraph copy. Pra tice in specialized forms of journalistic writing. Prerequisite: Journalism 51A-51

**162. Magazine Fiction** (3) I

Coaching in constructing and writing short stories for commercial publication Admission with consent of instructor. Not open to students with credit for English 16

**166. Honors Course** (Credit to be arranged) I, II

Special study open to members of the Honors Program in journalism. Refer the Honors Program.

**183. Radio Continuity and News Writing** (3) II

Correlates news editing and writing with announcing styles. Radio news pr cedure and organization of a radio news staff; analysis of repertorial and commenta styles. Includes production techniques of "on-the-spot" and multiple point pick broadcasts. Registration with consent of the instructor. Not open to students wi credit for Speech Arts 183.

**185. Advertising Copy and Layout** (2) I

Introduction to principles and techniques of copy writing; types of copy; prep ration of layouts; mechanical methods employed by the artist, engraver and printe legislation and regulations affecting advertising claims. Prerequisite: Business 27, consent of instructor. Not open to students with credit for Business 185.

**191A-191B. City and County Newspaper Practice** (1 to 3-1 to 3) Year, I,

A special course in applied journalism during which students work on near daily and weekly newspapers by special arrangement with editors. Prerequisite: Jou nalism 51A and 51B with grade of B, *plus* permission of instructor.

**192. Special Projects** (1-3) I, II

Special work in journalism by arrangement with instructor. Work on *The Azt* yearbook and other publications, with consent of instructor. (See "Note" under Jou 92, above.)

**199. Special Study** (1-3) I, II

Students who have demonstrated ability in journalism studies may enroll f work other than that outlined in the regular courses. Admission only with consent the instructor with whom the work is to be done. Maximum credit, six units.

# LATIN

## IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in Latin.

### Lower Division Courses

**G)1. Elementary** (3) I, II
Study of the Latin language and Roman culture, with reading of selected prose ssages.

**G)2. Elementary** (3) I, II
Continuation of Latin 1. Prerequisite: Latin 1 or one year of high school Latin.

**G)3. Intermediate** (3) I
Reading of selected passages emphasizing the contribution of the ancient culture our own. Prerequisite: Latin 2 or two years of high school Latin.

**G)4. Intermediate** (3) II
Continuation of Latin 3. Prerequisite: Latin 3 or three years of high school atin.

# LIBRARY SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

*Major* and *minor* work are not offered in library science.

### Lower Division Courses

**G)10. Use of the Library** (2) I, II
The chief object is to give a working knowledge of some of the resources of the rary which every teacher and student should understand—the decimal classifican, the card catalog, periodical indexes, and the most important reference books, gether with some instruction in the preparation of bibliographies. The course will a requirement of those students added to the library's staff of student assistants, hough it will not prepare the student to become a librarian. A general education urse in practical arts.

# LIFE SCIENCE

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in *life science* for the A.B. degree. Courses the major are in addition to 45 units in general education courses. Lower division quirements: Zoology 1A-1B or Biology 3 and 4; Zoology 20 or Physiology 1A; tany 2A-2B or 1 or Bacteriology 1; Chemistry 1A-1B or 2A-2B; Physics 2A-2B. per division requirements: A minimum of 24 upper division units in zoology, cteriology and botany of which six units may be from a related field. The plan for s major must be with the approval of the Chairman of the Division of Life Sciences. minor is not required of students majoring in life science.

A *major in arts and sciences* is offered in *life science* for the B.S. degree. Courses the major are in addition to 45 units in general education courses. Lower division uirements: Bacteriology 1 or 101, Botany 2A-2B, Zoology 1A-1B, Chemistry -1B or 2A-2B, Physics 2A-2B. Upper division requirements: 36 upper division its in zoology, bacteriology and botany or 27 units in these fields with nine units a related field. The plan for this major must be with the approval of the Chairman the Division of Life Sciences. A minor is not required of students majoring in life ence.

Note: Twelve units in natural science courses in the major for the A.B. or S. degree may be counted toward pattern requirements in general education natural ence courses.

A *teaching major in life science and general science* is offered for the gener secondary school credential and a *teaching major in general science* is offered for t general junior high school credential. For statement of requirements, refer to the credentials.

### Minor

A *minor in arts and sciences* is offered in *life science.* Lower division requir ments: Biology 3 and 4 or equivalent; Physical Science 1 and 2; Physiology 1 Upper division requirements: Botany 114 and 150; Zoology 119 and 160.

A *teaching minor in life science and general science* is offered for the gener secondary, special secondary, general elementary, and kindergarten-primary credential For statement of requirements, refer to these credentials.

## MARKETING

### IN THE DIVISION OF BUSINESS

### Major

A *major in arts and sciences* is offered in *business* for the A.B. degree with speci ization in marketing. Courses in the major are in addition to 45 units in general educ tion courses. Lower division requirements: Business 8, 14A-14B, 18A-18B, 20, 24, 2 27, and Art 7. If the student does not elect a minor in economics, Economics 1A-1 should be taken as an elective or as part of his program in general education.

Upper division requirements: 24 upper division units to include Business 12 Economics 140, one of the following courses: Business 123, 153, Economics 111, 17 and 15 units chosen from Business 120, 123, 124, 137, 153, 154, 181, 184, 185, 18 187A, 187B, 188, 189, 196, 198A, 198B, Home Economics 160A-160B, Art 107. ( Business 20 and Art 7 are not taken in the lower division, Business 120 and Art 1 are required in the upper division.) A minor is not required, but the student encouraged to complete a minor in one field other than business.

A *teaching major* is not offered in the marketing field, but is offered in *busin education.* Marketing may be included as the areas of specialization.

### Minor

A *minor in arts and sciences* is offered in *business* with specialization in mark ing. The minor consists of a minimum of 15 units, or maximum of 22, six units which must be in courses carrying upper division credit. Students electing business a minor with specialization in marketing should consult with the adviser in marketi for selection of courses.

A *teaching minor* is not offered in business, but is offered in *business educati* for the general secondary school credential. For statement of requirements, refer the credential.

### Courses in Marketing

All business courses in this department for the major or minor are listed in t section of the bulletin under Business.

## MATHEMATICS

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in *mathematics* for the A.B. degree. Cour in the major are in addition to 45 units in general education courses. Lower divis requirements: Mathematics 1, or equivalent (unless exempted by examination); Ma ematics 3A-3B and 4A. Recommended: Business 2, Engineering 1A, 21; Phys 4A-4B or Physics 2A-2B, 3A-3B. A reading knowledge of French or German is de able. Upper division requirements: A minimum of 24 upper division units in mat matics to include Mathematics 117 (unless taken as Mathematics 4B in the lo division); 111, 119, 121, and either 105 or 106. Six units of the remaining nine u may be selected from upper division courses in related areas with the approval of department. A minor is not required, but is recommended.

A *teaching major* is offered in mathematics for the general junior high school lential and for the general secondary credential. For specific information, refer to outline of requirements for these credentials.

## Minor

A *minor in arts and sciences* is offered in *mathematics*. The minor consists of a nimum of 15 units, or a maximum of 22, six units of which must be in courses carry- upper division credit. The selection of courses must be approved by the department.

A *teaching minor* is offered in mathematics for the general secondary, the special ondary, the general elementary, and the kindergarten-primary credentials. For cific information, refer to the outlines of requirements for these credentials.

## Lower Division Courses

**Basic Mathematics** (3) I, II

Fundamentals of mathematics with applications to everyday problems. Required ll students failing the competency examination in mathematics. Not open for credit tudents passing this examination.

**Elementary Algebra** (3) I, II

Fundamentals of algebra. Not open for credit to students who have credit for one r of high school algebra.

**B. Plane Geometry** (3) I, II

Fundamentals of plane geometry. Not open for credit to students who have credit one year of high school geometry. May be counted toward general education in hematics.

**Intermediate Algebra** (3) I, II

An extensive review of elementary algebra followed by quadratic equations, ultaneous equations, ratio and proportion, variation, progressions, etc. Prerequi-: Elementary algebra and geometry or Mathematics A-B.

**Trigonometry** (3) I, II

Plane trigonometry with special attention to logarithms and those aspects needed nalytic geometry and the calculus. Prerequisite: Mathematics C or its equivalent.

**Solid Geometry** (2) II

Properties of lines and planes. Calculation of areas and volumes. Prerequisite: hematics C or its equivalent.

**G. Mathematics for General Education** (3) I, II

Basic concepts of arithmetic, algebra, and geometry with applications. Recom-ded for students whose scores on the competency examination, while exempting n from Mathematics X, indicate a need for further training in mathematics. A eral education course in mathematics.

**Slide Rule** (1) I, II

Theory and use of the slide rule. Practice in performing the fundamental opera-s of arithmetic. Some attention is given to more involved computations. Prerequi-t: Trigonometry or Mathematics A-B or equivalents.

**Algebra and Trigonometry** (3) I, II

Review of algebra and trigonometry. Further study of identities, graphs, solu- of algebraic and trigonometric equations, determinants, and mathematical proofs. requisite: Two years of high school algebra and trigonometry.

**Analytic Geometry** (3) I, II

Equations and loci, conic sections, coordinate transformations, Cartesian and r coordinates, and parametric representation. Prerequisite: Mathematics 1 or onometry and passing of qualifying examination. (Qualifying examination will be n during the first week of the semester.)

**First Course in Calculus** (3) I, II

Introduction to differential and integral calculus with applications. Prerequisite: hematics 3A.

**4A. Second Course in Calculus (3) I, II**

Differentiation, integration, infinite series, and applications. Prerequisit Mathematics 3B.

**4B. Third Course in Calculus (3) I, II**

Partial differentiation, successive integration and applications. Prerequisit Mathematics 4A. (Solid geometry is recommended.) Not open to students with cred for Math. 117.

**(G)7A. Mathematical Analysis (3) I**

Designed for students who do not intend to prepare for a professional career physical science or in engineering. Consideration is given to the processes and applic tions of algebra and trigonometry. Prerequisite: High school algebra and plane geo erty. Students with credit for Mathematics 1 will not receive credit for Mathemati 7A. This course may be counted toward general education in mathematics.

**(G)7B. Mathematical Analysis (3) II**

A continuation of Mathematics 7A including the concepts and applications analytic geometry and an introduction to the calculus. Prerequisite: Mathematics 7 Students with credit for Mathematics 3B will not receive credit for Mathematics 7 This course may be counted toward general education in mathematics.

## Upper Division Courses

**(G)104. History of Mathematics (3) II**

History of mathematics down to early modern times. This course may be count toward general education in mathematics.

**105. College Geometry (3) I**

A synthetic treatment of the points and lines associated with triangles and qua rilaterals, similarity, inversion, ruler and compass construction, etc. Highly reco mended for all teachers of high school geometry. Prerequisite: Mathematics 3B or 7

**106. Projective Geometry (3) I**

Concurrence of lines, collinearity of points and other properties of figures n altered by projections; construction and study of ellipses, hyperbolas, and parabolas means of projections. Prerequisites: Mathematics 3B or 7B and permission instructor.

**111. Theory of Algebraic Equations (3) I, II**

Determinants, complex numbers, and theory of algebraic equations. Prereq site: Mathematics 3B or 7B.

**112. Analytic Geometry of Space (3) II**

The coordinate systems in space; lines, planes, and quadric surfaces; applic tions. Prerequisite: Mathematics 4A.

**117. Intermediate Calculus (3) I, II**

Essentially the same as Mathematics 4B. Additional special work for advanc students may be assigned. Prerequisite: Mathematics 4A. Not open for credit to st dents with credit for Math. 4B.

**118A. Advanced Mathematics for Engineering Students (3) I**

Introduction to differential equations, vector analysis, Fourier series, hyperbol elliptic, and Bessel functions. Prerequisite: Mathematics 117 or its equivalent.

**118B. Advanced Mathematics for Engineering Students (3) I**

Introduction to partial differentiation, partial differential equations, line a surface integrals, complex variables, etc. Prerequisite: Mathematics 118A.

**119. Differential Equations (3) I, II**

Ordinary differential equations with applications to geometry, physics, and che istry. Prerequisite: Mathematics 117 or its equivalent.

**121. Advanced Calculus (3) II**

Review of the fundamental concepts of the calculus, partial differentiation, seri line and surface integrals, etc. Prerequisite: Mathematics 118A or Mathematics 1

**1I. Vector Analysis** (3) I

Vector algebra, differentiation of vectors, gradient, divergence, and curl. Applica- tns to geometry and physics. Prerequisite: Mathematics 117 or its equivalent.

**0A. Mathematical Statistics** (3) I

Graphical and arithmetical characterization of observed frequency distributions, ments, use of normal curve, curve fitting, correlation, etc. Prerequisite: Mathe- tics 3B.

**0B. Mathematical Statistics** (3) II

Theoretical discrete and continuous distributions, multiple and partial correla- n, large and small sample theory including student's T, Chi-square, and the F distri- tions with applications. Prerequisites: Mathematics 140A and 117 or their equiv- nts.

**0. Special Study** (1-3) I, II

Supervised individual study in selected mathematical topics. Maximum of six its allowed. Prerequisite: Consent of the instructor.

### Graduate Courses

**21. Concepts of Geometry From an Advanced Viewpoint** (2) I

An introduction to the fundamental concepts of geometry and the processes of thematical thinking in this area. Recommended for candidates for the general ondary credential. Prerequisite: One upper division course in geometry.

**22. Concepts of Algebra From an Advanced Viewpoint** (2) II

An introduction to the fundamental concepts of algebra and the processes of thematical thinking in this area. Recommended for candidates for the general ondary credential. Prerequisite: One upper division course in algebra.

**2I. Advanced Work in the History of Mathematics** (2) I

Intensive study of specific phases of the history of mathematics with attention t implications for teaching mathematics. Prerequisite: Mathematics 104.

**2I. Functions of a Complex Variable** (3) I

Operations on complex numbers, limits, convergence, continuity, differentiation, egration, Cauchy's Theorem, power series, elementary functions, etc. Prerequisite: thematics 118A or 119 and consent of the instructor.

## MUSIC

### IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is offered in *music* for the A.B. degree. Courses in e major are in addition to 45 units in general education courses. Several plans of udy are available with varying degrees of emphasis on performance, history and erature, creative activity, and teaching.

The music curricula are designed to fulfill the needs of all students: (1) Those o have professional ambitions in musical performance, or seek a foundation for grad- te study leading to college or university teaching, (2) those who are preparing for e of the several state teaching credentials with music as either a major or minor, ) those whose major professional interest is in another department and are seeking sical study as a minor, and (4) those who are interested in music as an elective study a for the enrichment of their cultural background.

General basic requirements for the degree with a major in music to be met by all sic students, are as follows: Demonstration of proficiency in vocal or instrumental *formance* at a level of difficulty comparable to the Bach two-part inventions or the ier Haydn sonatas for the piano before admission to the major may be granted; devel- nent, through class or individual instruction, of *performance ability* and appearance soloist in at least one student recital during each of the last four semesters; ele- ntary keyboard technique (the student's attention is directed to the prerequisites f certain courses, to the Music 10A-B-C-D requirement and to the credential require- nts listed earlier in the bulletin under Professional Curricula in Teacher Educa- n); as laboratory experience participation in one vocal *and* one instrumental activity *each* semester excepting the semesters in which the credential candidate is enrolled i cadet teaching (in special cases this requirement may be waived by the chairman the Music Department) ; during the semesters of cadet teaching the student is require to enroll in one music activity. A maximum of eight units of credit from music activitie may be used toward graduation. The maximum credit permitted toward graduatio from any combination of intermediate class, advanced class and individual instructio in solo performance is eight units. Attention is directed to the statement followin the course descriptions in which the conditions for receiving credit from private i struction are given.

Lower division basic requirements for all music majors: Music 8A-8B, 10A B-C-D (may be omitted in part or in full upon evidence of satisfactory piano tec nique), 51A-51B, 58A-58B, four music activities selected from music courses numbere 70 to 87 (see activity requirement above). Upper division basic requirements for a music majors: Music 101A-101B, 108A-108B, 109A, 146A-B-C, four music activiti selected from music courses numbered 170 to 187 (see activity requirement above

One of the following areas may be elected by the students for major emphasis

*Performance:* Add the following courses to the basic requirements: Lower d vision: Four units selected from Music 11, 16, 21, 26, 31, or 50. Upper division: Fo units selected from Music 111, 112, 116, 117, 121, 122, 127, 131, 132, or 150ABCD four units of electives chosen from Music 109B and/or 199 (special studies in mus history and literature or composition). The student emphasizing performance mu appear in a joint public recital during the junior year and must present an enti solo public recital during the senior year; such students must pass a prelimina audition of the compositions to be performed at the public recital before the mus faculty during the semester preceding the recital appearance.

*Music History and Literature:* Add the following courses to the list of requir ments: Upper Division: Four units selected from Music 111, 112, 116, 117, 121, 12 126, 127, 131, 132 or 150ABCD; six units selected from Music 109B and 199 (speci studies in history and literature or composition). During his senior year the stude emphasizing history and literature is required to organize, prepare program notes a present two recitals consisting of recorded or "live" performances each of which wi deal with representative works of a certain period or composer or with certain period composers, works or styles to be compared; such students must pass a prelimina audition of the material to be presented before the music faculty at least one mon in advance of each performance.

*Creative Activity:* Add the following courses to the list of requirements: Upp division: Four units selected from Music 111, 112, 116, 117, 121, 122, 126, 127, 13 132, or 150ABCD; six units selected from Music 109B and 199 (special studi in history and literature or composition). The student emphasizing creative activi is required to present a concert of his compositions during the senior year; such st dents must present the scores of works to be performed to the music faculty o month in advance of the performance.

Students are required to consult with the chairman of the department f selection of the field of emphasis.

A *teaching major in music* is offered for the special secondary credential a for the general secondary credential. For statement of requirements, refer to the credentials.

### Minor

A *minor in arts and sciences* is offered in *music.* General basic requirements f the minor are as follows: Demonstration of vocal or instrumental performing abili before admission to the minor program may be granted; as laboratory experien participation in one music activity each semester (in special cases this requireme may be waived by the chairman of the department) ; a maximum of four units r ceived from music activities may be used toward the total graduation requireme Lower division: 14 to 18 units: Music 8A-8B, 10A-B-C-D (may be omitted in pa or in full on evidence of satisfactory piano technique) ; six units selected from 51 51B or 58A-58B; two units from courses numbered 70 to 87 (see activity requir ments for the minor). Upper division: Six units selected from Music 101A-101B 108A-108B; two units of music activities from music courses numbered 170 to 1 (see activity requirements for the minor).

## ELECTIVES IN MUSIC

The Music Department offers certain courses which fulfill the needs of studen who do not have music as a major or minor subject but who are interested in mus as an elective study area for the enrichment of their cultural background. Cours rticularly suited to these needs are Aesthetics 2 and 102 and the music courses mbered 70 to 88 and from 170 to 188; such courses are designated as general eduion courses and may be taken as partial fulfillment of the Literature, Philosophy, d the Arts requirement in general education.

Some students will be musically prepared to elect courses in music which may may not be included in the general education group. Enrollment by qualified stuits who wish to elect these courses is encouraged.

### Lower Division Courses

**)7A. Musicianship—For General Elementary Teachers** (3) I, II
Elementary music theory and skills including notation, meter, rhythm, scales, ervals, triads, sight singing, ear training, dictation, elementary keyboard facility l other rudiments. State adopted elementary music texts used. A general elementary dential requirement. Closed to music majors or minors. Formerly Music 1A.

**. Music Materials for the Elementary School** (3) I, II
Study of all phases of elementary school music: Singing, listening, reading, ative music, instruments, repertoire of songs and records, music projects. Required all general elementary credential candidates. Prerequisite: Music 7A or consent instructor.

**. Music Fundamentals** (3) I
Preparation for study of music structure. Designed to equip the student to g, play at the keyboard, write and recognize aurally scales, intervals, triads and ic rhythms. (Note: Students lacking keyboard facility must enroll concurrently piano study.) For majors and minors.

**Elementary Harmony** (3) I, II
Diatonic usage studied through written exercises, keyboard harmony, analysis, tation and sight-singing. Prerequisites: Ability to play Bach chorales at the keyrd; Music 8A or equivalent.

**)10A-10B. Piano—Elementary Class Instruction** (1-1) I, II
Fundamental playing and reading techniques for the pianoforte. Emphasis upon ying by ear, and the development of interpretative ability. Music majors or minors required to start these courses on admission unless competence of 10D level is demtrated. Formerly Music 28ABCD.

**C-10D. Piano—Elementary Class Instruction** (1-1) I, II
Continuation of Music 10A-10B.

**BCD. Piano—Intermediate Class Instruction** (1-1-1-1) I, II
Materials and techniques of intermediate level are studied in detail. Satisfactory lition before the instructor is required for admission.

**. Voice—Elementary Class Instruction** (1) I, II
A class for beginners in the vocal field taking up the problems of breath control, e placement, articulation and enunciation. Frequent classroom performance of ple songs. Formerly Music 29AB.

**. Class Voice—Continuation First Semester Voice** (1) I, II
Study of more advanced songs with attention being given to interpretation, as l as continued work on tone, articulation and placement. Frequent performance ore class required. Prerequisite: Music 15A or equivalent. Formerly Music 29CD.

**BCD. Voice—Intermediate Class Instruction** (1-1-1-1) I, II
(Not offered 1951-52)
Materials and techniques of intermediate level are studied in detail. Satisfactory lition before the instructor is required for admission.

**B. Strings—Elementary Class Instruction** (1-1) I, II
Open to all students but primarily for those whose major instrument is not one he stringed instruments and who are preparing for a teaching credential in music. merly Music 2A.

**21ABCD. Strings—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfacto audition before the instructor is required for admission. Sections are offered in violi viola, cello, bass.

**25AB. Woodwinds—Elementary Class Instruction** (1-1) I, II

Open to all students but primarily for those whose major instrument is not o of the woodwind instruments and who are preparing for a teaching credential in musi Formerly Music 3A.

**26ABCD. Woodwinds—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfacto audition before the instructor is required for admission. Sections are offered in flut oboe, clarinet, and bassoon.

**30AB. Brass—Elementary Class Instruction** (1-1) I, II

Open to all students but primarily for those whose major instrument is not o of the brass instruments and who are preparing for a teaching credential in musi Formerly Music 6A.

**31ABCD. Brass—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfa tory audition before the instructor is required for admission. Sections are offered i horn, trumpet, trombone, tuba, and baritone.

**35. Percussion—Elementary Class Instruction** (1) I, II

Open to all students but primarily for those who are preparing for a teachi credential in music. Formerly Music 5AB.

**50ABCD. Intermediate Individual Study** (1-1-1-1) I, II

For the teaching credential performance requirement or for the requiremen of the major emphasis curricula leading to the A.B. degree with a major in musi See explanation below for conditions under which credit may be given for mus study under private instructors.

Piano
Organ
Voice
Flute
Oboe
Clarinet
Saxophone
Bassoon
French Horn
Trumpet
Trombone
Baritone Horn
Tuba
Percussion
Violin
Viola
Cello
Contrabass

**51A-51B. Survey of Music** (2-2) Year, 1

Elements and structure of music, instrumental and vocal timbre. Folk music various countries and music of representative composers. Lectures, study of scor and recordings. Outside concert attendance required. Designed for nonmusic majo and minors.

**53. Opera Technique** (2) I, II

Training in the interpretation and characterization of light and grand oper Specific work in coordination of operatic ensemble. Formerly Music 31.

**58A. Intermediate Harmony and Two-part Counterpoint** (3) II

Continuation of Music 8B including simple harmonic alteration. Strict speci counterpoint in two parts. Prerequisite: Music 8B.

**58B. Advanced Harmony and Three-part Counterpoint** (3)
(Not offered 1951-52)

Chromatic alteration with emphasis on analysis of 19th century chromatic usa and construction of examples in corresponding idioms. Strict species counterpoint i three parts. Prerequisite: Music 58A.

## ACTIVITY COURSES

The activity courses are designed to afford opportunity for observation of r hearsal techniques and laboratory experience in the study and performance of a wi range of representative literature of various periods.

**)70A-70B. Chamber Music** (1-1) I, II
Sections for string, woodwind, brass, piano, and mixed ensemble groups. Per-
ssion of the instructor required. Formerly Music 30AB.

**-70D. Chamber Music** (1-1) I, II
Continuation of Music 70A-70B.

**A. Beginning Instrumental Ensemble** (½) I, II (Not offered 1951-52)
Open to all instrumental students. Group performance of simple orchestral and
d scores. Prerequisite: Music 20A, 25A, 30A, or equivalents, one or more. For-
rly Music 24A.

**3. Intermediate Instrumental Ensemble** (½) I, II (Not offered 1951-52)
Group performance of orchestral and band scores of more advanced grade.
terials covered will prepare the student for minor parts in either the symphony
hestra or the symphony band. Prerequisites: Music 72A or equivalent. Formerly
sic 24B.

**)75ABCD. Symphony and Marching Band** (2-2-2-2) I, II
Permission of the instructor required. Formerly Music 26ABCD.

**)80ABCD. Symphony Orchestra** (1-1-1-1) I, II
Permission of the instructor required. Formerly Music 13ABCD.

**)85ABCD. Chorus** (1-1-1-1) I, II
Permission of the instructor required. Formerly Music 15ABCD.

**)86ABCD. Treble Clef** (1-1-1-1) I, II
Permission of the instructor required. Formerly Music 10ABCD.

**)87ABCD. Men's Glee Club** (1-1-1-1) I, II
Permission of the instructor required. Formerly Music 12ABCD.

**)88ABCD. Workshop Chorus** (½-½-½-½) I, II
Open to students who do not have music as a major or minor field and who are
erested in singing standard choral works. No entrance examination required. De-
ned for nonmusic majors and minors. Formerly Music 20ABCD.

### Upper Division Courses

(For description of courses in the field of music appreciation, see Aesthetics)

**A-101B. History of Music** (3-3) Year, 1
Detailed study of chronological development of musical art and forms from the
of Bach to the present. Analytical score study and assigned recordings. Familiarity
h musicological resources through individual assignments. Prerequisite: Music
-51B. Music majors and minors only.

**A-105B. Advanced Harmony and Composition** (3-3) Year, 1
Study of the possible types of modulation and chromatic harmonies: Continua-
n of harmonic analysis and original composition. Prerequisite: Music 4A-4B. 105A
prerequisite for 105B. To be discontinued after 1951-52.

**A. Counterpoint** (2) I
Study of the five species of counterpoint with much practice in writing in such
ms. Application of contrapuntal style to modern composition. Prerequisite: Music
To be discontinued after 1952-53.

**B. Counterpoint** (2) II
Species counterpoint in four parts. Analysis of contrapuntal usage in musical
position. Continuation of Music 106A. Prerequisite: Music 106A. To be discon-
ued after 1952-53.

**A. Twentieth Century Harmonic Practice and Four-part Counterpoint**
(3) (Not offered 1951-52)
Study of harmonic usages and trends since Debussy. Strict species counterpoint
four parts. Prerequisite: Music 58B.

**B. Strict Composition** (3) (Not offered 1951-52)
Problems of composition in the shorter forms. Prerequisite: Music 108A.

**109A-109B. Instrumentation and Arranging** (2-2) Year, 1

Arranging of music for full orchestra. Selected works of students to be pe formed by standard orchestras. Prerequisites: Music 58B or 4B; 109A for 109 Formerly Music 121A-121B.

**111ABCD. Piano—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studies in detail. Satisfa tory audition before the instructor is required for admission.

**112ABCD. Piano—Advanced Class Instruction** (1-1-1-1) I, II

Materials and techniques of the advanced level are studied in detail. Satisfa tory audition before the instructor required for admission.

**116ABCD. Voice—Intermediate Class Instruction**
(1-1-1-1) I, II (Not offered 1951-52)

Materials and techniques of intermediate level are studied in detail. Satisfacto audition before the instructor is required for admission.

**117ABCD. Voice—Advanced Voice Instruction** (1-1-1-1) I, II

Materials and techniques of advanced level are studied in detail. Satisfacto audition before the instructor is required for admission.

**121ABCD. Strings—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfa tory audition before the instructor is required for admission. Sections are offer in violin, viola, cello, and bass.

**122ABCD. Strings—Advanced Class Instruction** (1-1-1-1) I, II

Repertoire includes study of standard orchestral parts, solos, sonatas, suites an concerti. Satisfactory auditions before the instructor are required for admission. Se tions are offered in violin, viola, cello, and bass.

**126ABCD. Woodwinds—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfa tory audition before the instructor is required for admission. Sections are offered flute, oboe, clarinet, and bassoon.

**127ABCD. Woodwinds—Advanced Class Instruction** (1-1-1-1) I, II

Repertoire includes study of standard orchestral parts, solos, sonatas, suites an concerti. Satisfactory auditions before the instructor are required for admission. Se tions are offered in flute, oboe, clarinet, and bassoon.

**131ABCD. Brass—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfa tory audition before the instructor is required for admission. Sections are offered horn, trumpet, trombone, tuba, and baritone.

**132ABCD. Brass—Advanced Class Instruction** (1-1-1-1) I, II

Repertoire includes study of standard orchestral parts, solos, sonatas, suites an concerti. Satisfactory auditions before the instructor are required for admission. Se tions are offered in horn, trumpet, trombone, tuba, and baritone.

**141. Methods in Teaching Piano** (3) Summer

Teaching of beginning and intermediate piano. Survey of materials availab for child and adult classes. Special consideration of the problems of the adult beginne Supervised teaching of beginning students in individual lessons and class groups. Fo merly Music 128.

**142. Survey of Harmony and Musical Form** (2) (Irregular)

A review of diatonic and chromatic harmony, modulation and musical form. Th material covered will serve as refresher study for the Colleague Examination und the California Plan of the Music Teachers Association of California. Not open music majors or minors. Formerly Music 101.

**146A. Fundamentals of Conducting** (1) I

Elements of baton technique and development of basic skills common to chor and instrumental conducting.

**6B. Instrumental Conducting** (1) II

Study of orchestra and band scores of graduated levels of advancement. The ss will prepare and conduct instrumental works in public performances. Prereqsite: Mus. 146. (Formerly Ed. 145B.)

**6C. Choral Conducting** (1) I

Representative literature and techniques for choral organizations will be studied d performed. Practical experience in typical conducting situations will be emphaed in various grade levels. Prerequisite: Mus. 146A. (Formerly Music 120A.)

**0ABCD. Advanced Individual Study** (1-1-1-1) I, II

For the teaching credential performance requirement or for the requirements the major emphasis curricula leading to the A.B. degree with a major in music. e explanation below for conditions under which credit may be given for music study der private instructors.

Piano
Organ
Voice
Flute
Oboe
Clarinet
Saxophone
Bassoon
French horn
Trumpet
Trombone
Baritone horn
Tuba
Percussion
Violin
Viola
Cello
Contrabass

**3. Opera Technique** (2) I, II

Training in interpretation and characterization of light and grand opera. Speic work in coordination of opera ensemble. Formerly Music 131.

**6. Honors Course** I, II (Credit to be arranged)

To be arranged after consultation with the chairman of the department. Refer the Honors Program.

**9. Special Studies** (1-3) I, II

Special studies in music. Prerequisite: Consent of the chairman of the departnt. Maximum, six units.

## ACTIVITY COURSES

The activity courses are designed to afford opportunity for observation of rearsal techniques and laboratory experience in the study and performance of a wide nge of representative literature of various periods.

**)170A-170B. Chamber Music** (1-1) I, II

Sections for string, woodwind, brass and piano ensemble groups. Permission of e instructor required. Formerly Music 130ABCD.

**0C-170D. Chamber Music** (1-1) I, II

Continuation of Music 170A-170B.

**2. Beginning Instrumental Ensemble** (½) I, II (Not offered 1951-52)

Open to all instrumental students. Group performance of simple orchestral parts d band scores. Prerequisites: Music 20A, 25A, 30A, or equivalents, one or more. rmerly Music 124A.

**2B. Intermediate Instrumental Ensemble** (½) I, II (Not offered 1951-52)

Group performance of orchestral and band scores of more advanced grade. Matels covered will prepare the student for minor parts in either the symphony orchestra the symphony band. Prerequisites: Music 72A or equivalent. Formerly Music 124B.

**)175ABCD. Symphony and Marching Band** (2-2-2-2) I, II

Permission of the instructor required. Formerly Music 126ABCD.

**)180ABCD. Symphony Orchestra** (1-1-1-1) I, II

Permission of the instructor required. Formerly Music 113ABCD.

**)185ABCD. Chorus** (1-1-1-1) I, II

Permission of the instructor required. Formerly Music 115ABCD.

**)186ABCD. Treble Clef** (1-1-1-1) I, II

Permission of the instructor required.

**(G)187ABCD. Men's Glee Club** (1-1-1-1)
Permission of the instructor required. Formerly Music 112ABCD.

**(G)188ABCD. Workshop Chorus** (½-½-½-½) I, II
Open to students who do not have music as a major or minor field and who are interested in singing standard choral works. No entrance examination required. Closed to music majors and minors. Formerly Music 120ABCD.

### Graduate Courses

**200A-200B. Special Problems in Music** (2-2) Year, I
A graduate course in which students may carry out projects in various fields of music under the direction of faculty members who are specialists in the field chosen. Students registering for this course must apply for work within a certain field after conference with the music faculty.

**203. Musicology** (2) I
Survey of bibliography and methods of research in music history and literature Emphasis upon interrelationship of musical developments and trends in other arts Completion of an acceptable thesis in fields of investigation chosen by the student Prerequisites: Music 101A-101B and permission of the instructor. Advanced courses in Harmony, Composition, and Form and Analysis are desirable.

**206. Composition** (2) II
Music composition in the larger forms. Students will be required to submit complete work in one of the larger musical forms as thesis in the course. Prerequisites Music 105A-105B, 106A, 107A, 121A and permission of the instructor.

## CONDITIONS UNDER WHICH CREDIT MAY BE GIVEN FOR MUSIC STUDY UNDER PRIVATE INSTRUCTORS

Credit may be allowed for private instruction in music under the followin conditions:

1. The applicant for such credit must be a regularly enrolled student in the musi department of the college.
2. The instructor giving such private work must be approved by the musi department. All private work and the names of all such teachers must b registered in the office of the music department chairman at the beginnin of the semester.
3. In the case of first semester private study, a placement examination conducte by the music department faculty at the beginning of the semester will sho the status of the student at the beginning of his work.
4. Evidence that the standards of the music department have been met will b shown by an examination conducted by the music department faculty at th end of the semester.
5. Ten clock-hours of lessons, and 100 hours of practice per semester are require for one unit of credit.

# PHILOSOPHY

## IN THE DIVISION OF SOCIAL SCIENCES

*Major* work is not offered in philosophy.

### Minor

A *minor in arts and sciences* is offered in philosophy. The minor must include least 15 units of work in philosophy, nine units of which must be from courses carryin upper division credit.

A *teaching minor* is not offered in philosophy.

## Lower Division Courses

**(G)1A. Introduction to Philosophy** (3) I, II

The place of philosophy in intelligent living. The methods, values, and areas of philosophical inquiry. Through discussion procedures, each student is encouraged to think independently on issues in ethics and religion.

**(G)1B. Introduction to Philosophy** (3) I, II

The nature of philosophical inquiry as applied to problems of knowledge and reality. Through discussion procedures, the student has opportunity and is encouraged to formulate his own tentative conclusions.

**(G)3A-3B. History of Philosophy** (3-3) Year, I

The development of the major concepts of philosophers in the western tradition. Relations of philosophy to science, art, religion, and social and political conditions. 3A covers the ancient and medieval period, 3B the modern. 3A is not prerequisite for 3B.

**20. Logic** (3) I

The use of logic in science and practical life. Analysis of fallacies. Logic and language. Formation and validation of hypotheses. Interpretations of probability. The logic of experimentation.

## Upper Division Courses

**(G)101. Contemporary Philosophy** (3) II

The major philosophical issues, movements, and figures in American and European philosophy of the twentieth century. Prerequisite: 3 units selected from Philosophy 1A, 1B, 3A, or 3B.

**110. The Philosophy of John Dewey** (2) I

(Offered in 1951-52 and alternate years)

The background, development, and influence of John Dewey's thought. His philosophy of education as related to his logical, epistemological, metaphysical, psychological, ethical, and esthetic theories.

**111A-111B. Theory of the State** (3-3) Year, I

The nature of the state, its organization and activities, and its relation to the individual and to other states. Special attention is given to recent developments in the field of political thought. Not open to students with credit for Political Science 111A-111B.

**121. Deductive Logic** (3) II (Offered in 1952-53 and alternate years)

Definition, classification, and division. The forms of reasoning. Analysis of propositions. Immediate inference. The syllogism. Dilemmas. Modern symbolic logic.

**(G)129. Social Ethics** (3) I

Ethical issues of contemporary life. Individualism vs. collectivism; democracy vs. dictatorship; ethical problems arising in law, medicine, business, government, and interpersonal relationships.

**130. Theory of Ethics** (3) II

A study of significant and typical value theories and systems and of the concrete problems such theories seek to explain. The emphasis will be placed on moral values. The student will be encouraged to examine critically his own system of values.

**136. Philosophy of Art** (3) II

The nature of esthetic experience. The principal theories of art, both traditional and contemporary, are studied at length, both in relation to actual artistic production and to the role of art in society.

**137. Philosophy of Science** (3) I (Offered in 1952-53 and alternate years)

A critical examination of the basic concepts and methods underlying contemporary scientific thought. Contributions of the special sciences to a view of the universe as a whole. Prerequisite: 3 lower division units in philosophy.

# PHYSICAL EDUCATION

## IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

### Major

A *major in arts and sciences* is offered in *physical education* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. A minor in a field other than physical education is required.

*Major for Men:* Lower division requirements: Two units of physical education activity courses in general education; Physical Education 53, 63, 64, 74; Zoology 8. Upper division requirements: 26 upper division units to include seven units from physical education courses numbered 141 to 148, inclusive; Physical Education 155, 168, 170A-170B, 177; and eight units selected from courses in health, physical education, or recreation.

*Major for Women:* Lower division requirements: Four units of physical education activity courses to include Physical Education 1A, 2A-2B, 3A-3B, 4, 5, and 6 (two of these units may be counted as general education); Physical Education 53, 72, and Zoology 8. Upper division requirements: 26 upper division units to include Physical Education 155, 156A-156B, 160, 161, 168, 170A-170B, 177; and seven units selected from courses in health, physical education, or recreation.

A *teaching major* is offered in *physical education* for the general secondary and special secondary school credentials. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *physical education*. The minor consists of a minimum of 15 units of work in physical education, nine units of which must be in courses carrying upper division credit. The plan for this minor must be approved by the chairman of the department.

A *teaching minor* is offered in *physical education* for the general secondary, and the special secondary credentials. It may be offered only as a second teaching minor for the general elementary and the kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Required Activities

All lower division students must elect one or more activity course each semester Two units of activity credit must be offered for graduation, but no more than one activity course in any one semester may be counted toward this requirement. Students carrying fewer than 12 units during any semester may obtain permission from the Dean of Instruction to postpone taking physical education, but not be exempted therefrom. No permanent excuses from required activity courses will be granted The college physician, in conjunction with the chairman of the department, wil consider stringent cases on an individual basis and recommend.

A medical examination is given each student when entering college and recommendation is made as to type of activity most beneficial. Individually adapted physica education classes to care for special needs are offered. The content of the required courses is planned to give each student an opportunity to participate in many activities of carry-over value, developmental nature, and recreational interest. An opportunity is afforded for students to participate in competitive sports and intramural programs

## MEN'S DEPARTMENT

Freshmen are required to choose from courses numbered 1-10. Sophomores and upper division students may choose from all courses offered. An activity course may be taken for credit once only.

### Lower Division Courses

### ACTIVITY COURSES

All activity courses are general education courses.

**1A-1B-1C-1D. Individual Adaptation** (½) I, II
**2. Basketball** (½) I, II
**3. Boxing** (½) I, II
**4. Gymnastics** (½) I, II
**5. Soccer** (½) I
**6. Softball** (½) II
**7. Touch Football** (½) I
**8. Track and Field** (½) I, II
**9. Volleyball** (½) I, II
**10. Wrestling** (½) I, II
**13. Archery** (½) I, II
**14. Badminton** (½) I, II
**15. Fencing** (½) I, II
**16. Golf** (½) I, II
**17. Handball** (½) I, II
**18. Tennis** (½) I, II
**19. Bowling** (½) I, II
**20. Swimming** (½) I, II
**23. Sailing** (½) I, II
**24. Hiking** (½) I, II

### INTERCOLLEGIATE SPORTS

**30. Baseball** (½) II
**31. Basketball** (½) I
**32. Cross Country** (½) I
**33. Football** (½) I
**34. Golf** (½) II
**35. Gymnastics** (½) II
**36. Tennis** (½) II
**37. Track** (½) II
**38. Wrestling** (½) II

## WOMEN'S DEPARTMENT

Freshmen are required to choose from courses numbered 1-11. Sophomores may choose from all courses offered. An activity course may be taken for credit once only.

The individual activities, tennis, golf, archery, badminton, swimming, and dancing are offered through the year. Candidates for the special secondary credential in physical education must select one as a major activity and two others as minors. Skills in the activities must be maintained as prerequisite to the senior course, Physical Education 185.

### Lower Division

### ACTIVITY COURSES

All activity courses are general education courses.

**1A-1B. Fundamental Skills** (½) I, II
Practice in efficient fundamental body movements.

**2A-2B. Folk Dancing** (Men and Women) (½) I, II
2A is a prerequisite for 2B.

**3A-3B. Modern Dance** (Men and Women) (½) I, II
Practice in dance techniques and rhythms. 3A is a prerequisite for 3B.

### TEAM SPORTS

All courses in team sports are general education courses with the exception of Physical Education 22.

**4. Fieldball, Soccer, Speedball** (½) I, II

**5. Softball, Volleyball, Hockey** (½) I, II

**6. Basketball** (½) I, II

**11A-11B. Ballroom Dancing** (Men and Women) (½) I, II
11A is a prerequisite for 11B.

**12A-12B. Advanced Modern Dance** (Men and Women) (1-1) Year, I

Laboratory experiments in advanced choregraphy and percussion accompaniment. Prerequisites: 3A and 3B.

**13A-13B. Archery** (½) Year, I, II

**14A-14B. Badminton** (½) Year, I, II

**16A-16B. Golf** (½) I, II

**18A-18B-18C. Tennis** (Beginning, Intermediate, Advanced) (½-½-½) I, II

18A is a prerequisite for 18B; 18B is a prerequisite for 18C.

**19A-19B. Bowling** (½) I, II

**20A. Swimming** (For non-swimmers only) (½) I, II

**20B. Swimming** (Intermediate) (½) I, II

**21. Life Saving** (1) I, II

Learning of safety in and on the water and the ability to assist or rescue a person in danger of drowning. Course content qualifies for the American Red Cross Life Saving Certificate.

**22. Water Safety Instruction** (1) II

Methods and materials for teaching swimming. Course qualifies for American Red Cross Swimming Instructors Certificate. Prerequisite: P.E. 20B, or equivalent and American Red Cross Senior Life Saving Certificate.

**23. Sailing** (½) I, II

**24. Hiking** (½) I, II

## MEN AND WOMEN

## PROFESSIONAL THEORY COURSES

### Lower Division Courses

**53. Physical Education in the Elementary School** (2½) I, II

The State program in physical education for the elementary school forms the basis of the course. Candidates for the Elementary Credential are required to take the course section which includes two lectures and two laboratory periods per week Candidates for the Special Secondary Credential in physical education may take the course section which includes two lectures without laboratory periods.

**63. Professional Activities** (Men) (2) I

Presents an opportunity for majors to develop the skills and techniques of the dance. Organization and presentation of materials are emphasized. (Formerly Physica Education 43.)

**64. Professional Activities** (Men) (2) II

Emphasis is placed on acquiring the skills, teaching techniques, and developmen of knowledge and interest in tumbling, apparatus, stunts, free exercise and self-testing activities. (Formerly Physical Education 44.)

**72. Introduction to Physical Education** (2) I, II

History and principles of physical education and sports movements of the world Objectives of the modern school program are studied and an effort is made to give to the student a basic philosophy and background for professional education.

### Upper Division Courses

**141. Professional Activities: Gymnastics** (Men) (2) I

The skills and teaching techniques in gymnastics. The place of tumbling, apparatus, self-testing and calisthenics in the school program. Knowledge of the rule for competition in gymnastics.

**142. Professional Activities: Swimming** (Men) (1) II

The development of skills in swimming with emphasis on the teaching techniques Scope of course is from beginning swimming to life saving techniques.

**145. Professional Activities: Team Sports** (Men) (2) I
The skills, rules, teaching techniques, officiating, and organization of materials in such sports as soccer, touch football, softball, hockey, basketball, and others are emphasized.

**146. Professional Activities: Individual Sports** (Men) (2) II
The skills, rules, teaching techniques, officiating, and organization of materials in such sports as handball, tennis, badminton, archery, golf, and others are emphasized.

**147. Professional Activities: Coaching Baseball and Track** (Men) (1-2) II
Organization of practice sessions, drills for developing fundamental skills and special abilities. Problems of scheduling, handling teams and game strategy are taken up. Rules, sessions, and officiating techniques are given attention.

**148. Professional Activities: Coaching Football and Basketball** (Men) (1-2) I
Organization of practice sessions, drills for developing fundamental skills and special abilities. Problems of scheduling, handling teams, and game strategy are taken up. Rules, sessions, and officiating techniques are given attention.

**151. Instructor's Course in First Aid** (2) I, II
Instructor's course in first aid, as outlined by The American Red Cross. Standard first aid techniques, care of injured, certification and record keeping, and practical work in first aid.

**155. Applied Anatomy and Kinesiology** (3) I
Anatomical and kinesiological analysis of human structure and movement. Application of analysis relative to mechanical principles as influenced by efficiency factors of body functions. Prerequisite: Zoology 8.

**156A-156B. Sports Methods** (Women) (2-2) Year, I
Analysis of skills in basketball, hockey, soccer, speedball, volleyball, and softball; methods of presenting sports to large groups; study of rules and officiating. Prerequisites: Physical Education 4, 5, and 6.

**160. Teaching of Body Mechanics** (Women) (2) I
Efficient use of the body in daily living; evaluation and classification of exercises, methods, and practice in planning and presenting material.

**161. Folk Dancing Materials and Advanced Techniques** (Women) (2) I
Folk customs, festivals, and costumes. Selection of dance materials for various age groups. Practice in advanced techniques. Prerequisite: Physical Education 2A.

**162. History and Philosophy of the Dance** (2) I
Historical background and appreciation of dance, with special emphasis upon development of art in America. The justification for dance as an educational and creative art medium and its place in the curriculum. Not open to students with credit for Aesthetics 162. A general education course in Literature, Philosophy, and the Arts.

**164A-164B. Methods in Modern Dance** (2-2) Year, I
Methods in the teaching of modern dance techniques and choreography. Selection of materials and course planning for the secondary school. Prerequisite: Physical Education 12A-12B, or satisfactory examination in dance skills.

**168. Physiology of Exercise** (3) II
A nonlaboratory course emphasizing the relation of physiology to muscular exercise in physical activities. Prerequisites: Physiology 1A and Zoology 8 or equivalent.

**170A-170B. Recreational Leadership** (2-2) Year, I
Principles and practices in recreational leadership. Methods of instruction and special techniques in the activities of the recreation program. Attention to crafts, music, social programs, drama, special projects, dance, sports, campcraft, and outdoor education. Not open to students with credit for Recreation 170A-170B.

**177. Individual Program Adaptation** (3) II
The adaptation of programs for the typical individual, including physical exam nations, training and prescribed exercises, follow-up, instructional problems, ar evaluation.

**185. Techniques of Individual Sports** (Women) (1) I
Rules and teaching methods and testing individual playing techniques ar knowledge in tennis, archery, badminton, and swimming. Prerequisite: Senior standin

**190. Administration of Physical Education in the Secondary School** (3) I,
Problems and practices in the organization and administration of the seconda school activity program. Study, selection and adaptation of activities, examination, ar grouping of pupils, use and evaluation of tests. Selection and maintenance of equipme and facilities.

**199. Special Study in Physical Education** (1-3) I, II
An opportunity is presented for extensive review of pertinent literature, ind vidual research and advanced study of problems in the profession. Prerequisit Approval of the chairman of the division. Maximum credit, six units.

### Graduate Courses

**200. Evaluation Procedures in Health, Physical Education and Recreation** (2
A study of tests and measurements in the profession with practice in their us construction and interpretation of results.

**201. Developmental Physical Education** (2)
Intensive study of postural divergencies, lack of physical development, ar methods of correcting such conditions through exercise are studied. Practice in maki physical examinations, constructing individual exercise programs, teaching remedi exercises, as well as ethical procedures and limitations are considered. Prerequisit Applied Anatomy and Kinesiology.

**203. Problems in Physical Education** (2)
A survey of current problems facing the Physical Education profession is studi through a review of the literature, discussion of trends, observation of school situ tions together with the analysis and evaluation of actual problems. Written reports a required.

**204. Problems in Recreation** (2)
A survey of current problems facing the recreation profession is studied throug a review of the literature, discussion of trends, observation of school situations togeth with the analysis and evaluation of actual problems. Written reports are require Not open to students with credit for Recreation 204.

**298. Special Study** (1-3)
An individual study course designed primarily for candidates for the master degree.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

## PHYSICAL SCIENCE

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *physical science major in arts and sciences* may be used for the A.B. degree b students who have been admitted to the teacher education program if eight units i professional education courses are completed by the date of degree candidacy. Low division requirements: Chemistry 1A-1B, Physics 4A-4B-4C (or 2A-2B-3A-3B Mathematics 3A-3B, 4A (recommended 4B). Upper division requirements: 24 uni to include a minimum of seven units in each of chemistry and physics. Chemistry mu include Chemistry 101. Physics must include Physics 107 and 158 (or 148 if physi preparation is 2A-2B). Recommended: Physical Science 110. Other courses to b selected with approval of the departmental adviser.

A *teaching major in physical science and general science* is offered for the general secondary and general junior high school credentials. For a statement of requirements, refer to these credentials.

### Minor

A *teaching minor in physical science and general science* is offered for the general secondary, special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Lower Division Courses

**(G)1. Introduction to Physical Science** (3) I, II
A general course presenting the nature of man's physical universe with materials chosen from astronomy and physics. Not open to students who have had a college course in physics or astronomy, or Physical Science 40.

**(G)2. Introduction to Physical Science** (3) I, II
Emphasis will be upon materials chosen from geology and chemistry to show the origins of natural materials and their use. Not open to students who have had a college course in chemistry or geology.

**(G)10. Introduction to Photography** (3) I, II
A consideration of photographic optics and chemistry; nature of light and image formation; photographic emulsions, exposure and development. Composition and lighting. Two lectures and one three-hour laboratory per week. Will not satisfy laboratory requirements in physical science but may be counted toward general education under practical arts.

### Upper Division Courses

**110. Photography for Teachers** (3)
Designed for more mature students to learn photographic skills useful in teaching.

**130. Advanced Photography** (3) I
A consideration of advanced negative control, projection printing techniques, composition and editorial content, architectural and illustrative photography, and flood photoflash techniques. Two lectures and three hours of laboratory per week. Prerequisite: Physical Science 10.

**(G)150. Readings in the Physical Sciences** (2)
Reading from selected materials with informal class discussion of topics.

# PHYSICS

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in *physics* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Physics 4A-4B-4C, Chemistry 1A-1B, or their equivalents. Recommended: a reading knowledge of French or German. Upper division requirements: 24 upper division units in physics to include Physics 105A-105B, 107, 110, 158; three units chosen from Physics 102, 160, of 170; two units chosen from Physics 120, 122, or 124; and two units of Physics 199. A minor in mathematics is required, consisting of Mathematics 3A-3B, 4A-4B, or their equivalents, and Mathematics 118A-118B. Recommended: Three units chosen from Mathematics 104, 111, 119, 121, or 124. Nine units of chemistry, physics, and mathematics may be counted toward general education requirements.

A *major in arts and sciences* is offered in *physics* for the B.S. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Physics 4A-4B-4C, Chemistry 1A-1B, Mathematics 3A-3B, and 4A-4B, or their equivalents. Upper division requirements: A minimum of 36 upper division units including Physics 102, 105A-105B, 107, 110, 158; two units of upper division laboratory; two additional units of Physics 199; and Mathematics 118A-118B. The program, planned in consultation with the departmental adviser for this degree, must be designed to provide a four-year terminal program for the student. A minor is not required. Nine units of chemistry, physics, and mathematics may be counted tow general education requirements.

The following additional courses are required as a part of two options appro under this degree: *Applied Physics*: Physics 106, 112 and four units of Physics 1 Recommended: Physics 114, 160, 170 and Astronomy 107. *Electronics*: Physics 1 122, 124, 160 and either Physics 152 or Engineering 150. Recommended: Physics 1 170 and Astronomy 107.

A *teaching major in physical science and general science* is offered for the g eral secondary school credential and a *teaching major in general science* is offered the general junior high school credential. For statement of requirements, refer these credentials.

### Minor

A *minor in physics* is offered in arts and sciences. The minor must include least 15 units, or maximum of 22, six units of which must be in courses carrying up division credit.

A *teaching minor in physical science and general science* is offered for the g eral secondary, special secondary, general elementary, and kindergarten-prim credentials. For statement of requirements, refer to these credentials.

### Lower Division Courses

NOTE: A maximum of 12 units of lower division physics credit may be app toward the A.B. or B.S. degrees.

**(G)2A-2B. General Physics** (3-3) Year, I

This course is for liberal arts and certain pre-professional students who do desire intensive physics preparation. Lectures, demonstrations and discussions. Properties of Matter, Mechanics and Heat. 2B, Electricity, Magnetism, Sound Light. Prerequisite: Two years of high school mathematics.

**(G)3A-3B. Physical Measurements** (1-1) Year, I

A laboratory course to accompany Physics 2A-2B. 3A: Properties of Ma Mechanics and Heat. 3B: Electricity, Magnetism, Sound and Light. One three- laboratory per week. Prerequisite for 3A: Concurrent or previous registratio Physics 2A. Prerequisite for 3B: Concurrent or previous registration in Physics

**4A-4B-4C. Principles of Physics**

The following sequence of three courses is designed to give a thorough b ground in the fundamental principles of physics, with applications to practical p lems. Each course three lectures and one three-hour laboratory per week.

**4A. Mechanics** (4) I, II

The mechanics of solids and fluids. Prerequisites: Credit for Mathem 3A, or concurrent registration with permission of instructor. open to first semester freshmen.

**4B. Electricity** (4) I, II

Magnetism, electricity and elementary electronics. Prerequisite: Physic

**4C. Heat, Sound and Light** (4) I, II

Heat and elementary thermodynamics, sound and light. Prerequi Physics 4B.

**14. Acoustics of Music** (3) II

Fundamentals of acoustics and audition underlying musical phenomena prese in descriptive and nonmathematical terms. Prerequisite: A technical understan of music.

**22. General Radio** (2) I

Theory of vacuum tubes and their applications to communication, television, industry. This course may be taken for credit in addition to the maximum 12 uni lower division physics toward the A.B. or B.S. degree.

### Upper Division Courses

**102. Basic Electronics** (3) I

Principles of electron tubes and resistance loaded amplifiers. Negative feed and its application to regulated power supplies, cathode followers and direct co amplifiers. Prerequsite: Physics 4B.

**104. Communications (3) II**

Power amplifiers, oscillators, modulators and detectors. Radio transmitters and receivers for amplitude modulation and frequency modulation. Television systems. Antennas and radio wave propagation. Prerequisite: Physics 102 or permission of the instructor.

**105A-105B. Analytical Mechanics (3-3) Year, I**

Fundamental principles of Newtonian mechanics by elementary vector methods. 105A: Statics and kinematics of rigid bodies. 105B: Dynamical principles underlying linear and rotary motion of rigid bodies, with additional work in vibration and impact. Prerequisite: Physics 2A-2B or 4A and a working knowledge of calculus.

**106. Optics (3) II**

A study of reflection, refraction, dispersion, interference, diffraction, double refraction and polarization, with applications to optical instruments. Also wave propagation, radiation, spectra and the nature of light. Prerequisite: Physics 2B-3B or 4C.

**107. Electrical Measurements (2) I**

The theory and application of electrical measurements, including the measurements of current, voltage, power, resistance, capacitance and inductance. Stress on etermination of probable errors of measurements. An hour lecture and a three-hour laboratory per week. Prerequisite: Physics 2B-3B or 4B and a working knowledge of alculus.

**110. Alternating Current Circuits (3) I**

The operator j applied to circuits containing resistance, capacitance and inducance; series and parallel resonance; coupled circuits; transients; practical circuit lements, networks. Prerequisite: Physics 4B and Mathematics 4A.

**112. Heat and Thermodynamics (3) II**

A study of the thermal properties of matter with an introduction into the kinetic heory of gases and the laws of thermodynamics. Prerequisites: Eight units in physics nd a working knowledge of calculus.

**114. Acoustics (3) II**

A study of wave motion and its application to the production, transmission and eception of sound. Material in architectural acoustics, speech and hearing, and acoustial instruments is presented. Prerequisites: Physics 2B-3B or 4C.

**20. Advanced Laboratory (2) I, II**

Advanced experimental measurements in a branch of physics listed below. The ourse may be repeated for each subject. With the consent of the instructor and adviser, he course may be repeated in the same subject but with new material. Prerequisite: onsent of the instructor.

A. Acoustics
B. Atomic Physics
C. Electricity
D. Heat and Pyrometry
E. Mechanics
F. Optics

**22. Electronics Laboratory (2) I**

An experimental study of electron tubes and their associated circuits. Study of athode ray oscilloscope, vacuum tube voltmeter, characteristics of power supplies, mplifiers and filter systems. An hour lecture and a three-hour laboratory per week. rerequisite: Previous or concurrent registration in Physics 102, or permission of nstructor.

**24. Radio Measurements (2) II**

Laboratory measurements of the parameters of resonant circuits at radio freuencies. Study of the properties of oscillators, modulators, detectors and wave guides. n hour lecture and a three-hour laboratory per week. Prerequisite: Previous or conurrent registration in Physics 104.

**G)148. Introduction to Modern Physics (3) II**

A nonmathematical course covering recent developments in the field of physics, ncluding X-rays, radio-activity, cosmic rays, atomic and nuclear energy. Prerequisite: pper division standing. Not open to students who have credit for Physics 4A-4B-4C, r equivalent.

**152. Advanced Electronics** (2) I

Theory of vacuum tubes, ultra-high frequency systems and selected topics fro contemporary electronics. Prerequisite: Physics 104.

**158. Atomic Particles** (3) I

A study of experimental evidence for the existence and properties of the element atomic and nuclear particles. Introduction to the fields of atomic and nuclear physi Prerequisite: Physics 4A-4B-4C, or equivalent.

**160. Circuit Analysis** (3) II

A study of filter design, transmission lines, and network analysis. Prerequisit Physics 110.

**166. Honors Course** (Credit to be arranged) I, II

An individual study arrangement for students admitted to the Honors Progra Enrollment through the department chairman, subject to the approval by the Co mittee on Honors. Refer to the Honors Program.

**170. Electromagnetic Theory** (3) II

Electrostatics and magnetostatics treated by vector methods; chemical a thermal effects; motion of ions in electric and magnetic fields; magnetic field of current; electromagnetic induction and radiation. Prerequisites: Physics 110, and working knowledge of vector analysis and differential equations.

**199. Special Study** (1-2) I, II

Reading and laboratory work on a special problem in physics selected by t student. Each student will be assigned a member of the staff who will supervise l work. All candidates for the A.B. or B.S. Degree in physics are required to enr for 2 units of this course during the upper division work. Credit, hours and top to be arranged in each case.

### Graduate Courses

**200. Seminar** (2-2) I, II

An intensive study of some phase of advanced physics.

A. Mathematical Physics
B. Theoretical Mechanics
C. Kinetic Theory of Gases
D. Advanced Acoustics
E. Advanced Electronics and Electricity
F. Electromagnetic Radiation
G. Atomic Physics
H. History of Physics
I. Fluid Mechanics
J. Vibration

**290. Bibliography** (1)

Exercise in the use of basic reference books, journals, and specialized bibli raphies, preparatory to the writing of a Master's project or thesis.

**298. Special Study** (1-3)

An individual study course designed primarily for candidates for the maste degree.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis in physics for the maste degree.

## PHYSIOLOGY

### IN THE DIVISION OF LIFE SCIENCES

*Major* and *minor* work are not offered in physiology. Courses in this field may used as part of the major in zoology or life sciences, and are recommended as part the lower division requirements for the major in psychology, and for the physi education credential.

### Lower Division Courses

**1A. Human Physiology** (3) II

A lecture course considering the functions of the human body, and includin brief review of the microscopic and gross anatomy of the structures discussed. Prereq sites: Elementary chemistry and high school or college biology or zoology. Three ho of lecture per week. Credit reduced to 2 units, for students having credit for Zoology

**1C. Human Physiology** (2) II

A study of the human functions through laboratory experiments and demonstrations. Prerequisites: Physiology 1A completed or in progress. Six hours of laboratory per week.

### Upper Division Courses

**101. General Physiology** (4) II

Fundamentals of plant and animal functions. Two lectures and two laboratory periods per week. Prerequisites: Biology 3 and 4 or Zoology 1A-1B and Chemistry 1A-1B or Chemistry 2A-2B.

## POLITICAL SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *political science* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Political Science 1A-1B or 71A-71B. Upper division requirements: 24 units to include (a) Political Science 199 and (b) 21 upper division units in political science distributed among two of the following groups: *Group I: Theory and government*, courses numbered 100-139; *Group II: Administration*, courses numbered 140-149; *Group III: International affairs*, courses numbered 150-179. A minor is required and is to be chosen under the direction of the chairman of the department.

Students majoring in political science are advised to become as familiar as possible with related social science fields. Majors should have a reading knowledge of at least one foreign language. For students who expect to enter government service, two programs of study are offered: The Public Administration Curriculum and the Public Personnel Management Curriculum. For a description of these curricula, refer to the section of the bulletin entitled: Preprofessional and Vocational Curricula.

A *teaching major* is not offered in political science; however, courses in political science may be used as part of the *teaching major in social science* for the general secondary and general junior high school credentials. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences in political science* is offered. The minor consists of a minimum of 15 units, or maximum of 22, nine units of which must be in courses carrying upper division credit.

A *minor in arts and sciences in public administration* is also offered. The minor consists of Political Science 71A-71B in the lower division; Political Science 140A-140B and three units from 198 or other political science course in the upper division.

A *teaching minor in social science* is offered for the special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Lower Division Courses

**(G)1A. Introduction to Government** (3) I, II

Theories and principles of government, with special attention to the problems created by modern industrialism and population pressures.

**G)1B. Introduction to Government** (3) I, II

A comparative survey of selected foreign governments: Their constitutional priniples, political institutions, and governmental problems.

**G)71A-71B. Introduction to American Government and Politics**

(3-3) Year, I, II

Semester I: Governmental organization in the United States; the federal system; he organization, powers and functions of the legislative, executive and judicial branches f the government; the relations between federal, state and local units of government.

Semester II: Expansion of governmental functions and the development of means f democratic control; an examination of the increased use of government as an instrument of social control; the history, motivation, methods and control of political parties; ominations, elections and minority groups; pressure politics.

## Upper Division Courses

**(G)101. American Institutions** (3) I
The principles of the Constitution of the United States of America, and a surve of the political and social institutions which have developed under the Constitution.

**(G)105. American Political Thought** (3) II
A survey of the development of American ideas concerning political authorit from the period of colonial foundation to the present time.

**(G)111A-111B. Theory of the State** (3-3) Year, I
The nature of the state, its organization and activities, and its relation to th individual and to other states. Special attention is given to recent developments in th field of political thought. Not open to students with credit in Philosophy 111A-111B.

**120. Political Parties** (3) I
A critical analysis of the political party as a part of the process of governmen party organization and activities; nominating and campaign methods; theories an functions of the party system; party responsibility. Special emphasis will be plac upon the function of the two-party system in American government.

**121. Basic Factors in American Politics** (3) I
An analysis of American political, legal, economic, and social factors in the relation to our political system and the public interest.

**122. Propaganda and Public Opinion** (3) II
A study of the forces which mold the American public mind, the practice propaganda, a description and analysis of public relations, pressure groups and the effect in American public life. Not open to students with credit for Journalism 132.

**128. Government Report Writing** (2) I
Actual writing problems in government, including surveys, recommendatio studies, analyses, progress reports, annual reports, etc., are discussed and their so tions analyzed. Attention to methods of collecting and organizing data, and pract in effective presentation of facts and ideas. Special consideration is given to proble of class members.

**135. California Law of Municipal Corporations** (2) II
California law governing the nature, regulation and control of the counti charter cities, sixth class cities, school districts and special districts. The creati alteration, dissolution, legal actions by and against, powers and duties; rights a liabilities of local governments.

**136. Administrative Law** (2) I
The law of public office and public officers, powers of administrative authoriti scope and limits of administrative powers, remedies against administrative action.

**(G)137A-137B. Constitutional Government** (2-2) Year, I
Modern government and politics; its theoretical foundations, institutions a problems. Emphasis will be on American experience with useful comparisons w other countries. Either semester may be taken first.

**(G)139A-139B. American Constitutional Development** (3-3) Year, I
A study of the work of the Convention of 1787 and of significant phases American constitutional law. Not open to students with credit for History 172A-172

**140A-140B. Principles of Public Administration** (3-3) Year, I
Semester I: The administration of public services, staff and line functio theories of organization and practices, and procedures of different types of governmen agencies.

Semester II: Principles and problems in governmental budgeting, performa and capital outlay, budget procedures, organization and administration of person programs, controls over administrative behavior, responsible bureaucracy and p fessionalism in the public services. Not open to students with credit in Polit Science 147A-147B.

42. **State Government** (3) II

A study of the political structure and its operation used in the carrying on of the inctions exercised by the states; state-federal relations; state-local government rela- ons; particular emphasis on California government.

43. **Municipal and County Government** (3) I

A study of the organization and its operation used to carry into effect the func- ons assigned to local governmental units; particular emphasis upon local government California.

14. **Introduction to Public Personnel Administration** (2) I

An introduction to the field, giving general coverage of the problems involved in cruitment, placement, supervision, etc., of public employees. Prerequisite: Permis- on of instructor.

15. **Public Personnel Management** (2) II

An advanced course involving detailed examination of management of personnel public service. Prerequisite: Permission of instructor.

6. **Wage and Salary Administration** (3) I

Problems of job analysis; major techniques of job evaluation, including ranking, assification, point system, factor comparison; problems of wage and salary admin- tration, incentive pay methods; merit rating plans. Not open to students with credit r Commerce 154.

7A-147B. **Public Administration** (2-2) Year, I

Administrative organization. Relationship between federal, state, and local vernments. Budget, personnel, management, and control. Not open to students with edit for Political Science 140A-140B.

8. **The Government of Metropolitan Areas** (2) I

A study of the governmental problems of metropolitanism; overlapping of gov- nments, services, planning and financing. The use of intergovernmental contracts r public service, proper public service areas, and special authorities.

i)150A-150B. **International Relations** (3-3) Year, I

A historical and analytical consideration of the basic factors—historic, geo- aphic, economic, ideologic, and strategic—which underly and condition the modern nflict between the "sovereign state" and the "community of nations." Fall semester: igins and development through the nineteenth century. Spring semester: Twentieth ntury experimentation and conflict.

1SP. **The Contemporary World** (1) II

A series of lectures by members of the faculty on selected problems of the current ernational scene. Reports required of students enrolled for credit.

2. **International Organization** (3) I

A critical analysis of the organization by which the international community ks to provide for the exercise of legislative, administrative and judicial functions the international level: Diplomatic and consular corps; conferences; administra- n through commissions and unions; amicable procedures for settlement of dis- tes; The League of Nations-United Nations experiment.

3. **Principles of International Law** (3) I

The function of law in the international community. The historical development the ideas and rules of international law and their place in the modern diplomatic l legal structure.

4. **International Law and the Courts** (3) II

A case study of the application of the rules of international law in national l international courts.

. **Dynamics of Modern International Crises** (3) I

The determination and analysis of facts surrounding international crises since rld War II; the evaluation of these crises and their effects upon external policies he United States and the operations of the United Nations. Prerequisite: Consent the instructor.

**158A-158B. American Foreign Policy** (3-3) Year, I
Lectures and reading in the field of American foreign relations since 1776, with special emphasis, in the second semester, upon affairs since 1900. A general survey course. Not open to students with credit for History 176A-176B.

**160. Government of the British Dominions** (3) II
Development of the new British Empire and imperial relations of the self-governing dominions; government of Canada, Australia, New Zealand, and South Africa; conditioning historical, economic and racial factors. Not open to students with credit for History 156B.

**162. Government of England** (3) I
The structure and functioning of English parliamentary system with emphasis upon present day political principles and parties.

**165. Governments of Latin America** (3) II
The governments of leading and representative Latin American states. Emphasis on the background and evolution of current political institutions and philosophies.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**167. Government of the Soviet Union** (3) I
Theory and practice of government in the Soviet Union, with some attention to Russian foreign affairs.

**198. Internship in Public Administration** (3-6) I, II
Students will be assigned to various government agencies and will work under joint supervision of agency heads and the course instructor. Participation in staff and internship conferences. Admission by permission of the instructor.

**199. Special Studies in Political Science** (3) I, II
Directed study in research techniques in the field of political science. Limited to Political Science majors.

### Graduate Courses

**200A-200B. Seminar in Government** (2-2) Year, I, II

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-3)
An individual study course designed primarily for candidates for the master's degree.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

## PSYCHOLOGY

### IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *psychology* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Two plans are provided for the major: One for those students expecting to pursue the study of psychology beyond the A.B. degree; the other for those students who wish to extend their general education in the field of psychology.

The lower division requirements for all majors are: Psychology 5 and 6; six units in biology, physiology, and/or zoology; three units in philosophy; and six units in anthropology and/or sociology.

The upper division requirements for each major will be determined by the plan selected by the student, but a minimum of 24 upper division units in psychology is required for a major.

A *teaching major:* A major in psychology may be combined with two teaching minors for a general secondary credential. Refer to the outline of requirements for this credential.

### Minor

A *minor in arts and sciences* is offered in psychology. The minor must include at least 15 units of work in psychology, nine units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in psychology.

### Plan A Major

Plan A is for a nonprofessional major in psychology and is designed to provide the student with a greater understanding of his expanding group relations leading to happy and effective family and community living. The recommended pattern of courses for this program is not designed to facilitate graduate and professional study in psychology.

The upper division requirements for Plan A majors: Psychology 106, 131, 145, and electives to complete the major. It is expected that each student under Plan A will select, with the assistance of his adviser, a pattern of courses in line with his particular objectives in pursuing Plan A. For most students in Plan A, the following courses will be found particularly helpful: Psychology 105A, 107, 122, 132, 150, and 152.

To facilitate the purpose of Plan A the following courses in other departments are recommended as electives: Anthropology 1A-1B; Biology 1 or Zoology 1A-1B; Economics 1A-1B and 102; Health Education 90; Philosophy 1A-1B; Zoology 114 and 165; and courses in home economics.

### Plan B Major

The purpose of Plan B is to facilitate the specific preparation of those students who wish to pursue graduate and professional preparation in Clinical, Industrial and Personnel, and Theoretical-Experimental Psychology. To this end, three separate programs are suggested under Plan B to provide an undergraduate basic preparation for further study in these fields.

Upper division requirements for all Plan B majors: Psychology 104A, 105A, 160A or 160B, and additional courses to complete the major selected from one of the groups listed below. For each of the three patterns of special preparations under Plan B, the following courses are recommended:

*Preclinical:* Psychology 105B, 106, 131, 145, 150, 151, 152, 160A. The following courses are recommended in other departments: Anthropology 1A-1B; Biology 3 and 4, or Physiology 1A and 1C; Philosophy 1A-1B or 3A-3B, 20, and 129; Sociology 135 and 170; Speech Arts 176 or 179A-179B; and Zoology 165. A natural science minor is recommended.

In selecting courses and choosing electives, the student is urged to consult his adviser and the Bulletin on the requirements for special secondary credentials for school psychometrist and for correction of speech defects.

*Industrial and Personnel:* Psychology 121, 122, 131, 132, 145, 152, 160B. The following courses are recommended in other departments: Business 103A, and 153; Economics 1A-1B, 100A, 150, 151, 185, and 170; Philosophy 20; Political Science 144, and 145; Sociology 50, 51; and six units selected from Sociology 135, 170, 180, 190; and Speech Arts 4; a minor in business, economics, political science, or sociology is recommended.

*Theoretical-Experimental:* Psychology 104B, 131, 140, 145, 150, 160A, 160B, and 177. The following courses are recommended in other departments: Chemistry 2A-2B; Foreign Language; Mathematics 1, 3A, and 3B; Philosophy 1A, and 20; Physics 2A-2B, and 3A-3B; Physiology 1A and 1C; Zoology 1A-1B, 100, and 165. A mathematics or natural science minor is recommended.

### The Master of Arts Degree

The Master of Arts degree is offered in the department as part of the fulfillment of requirements for the School Psychologist credential. It is also possible to obtain a Master's degree if one obtains a School Psychometrist credential. Refer to these credentials and to the Master of Arts degree.

### Lower Division Courses

**(G)1. General** (3) I, II

An introduction to some of the facts, principles, and concepts which are basic to understanding human behavior.

**2. Psychology Laboratory** (1) I, II
Application of experimental methods to psychological problems. Includes design and execution of experiments. One lecture and three laboratory hours. Prerequisite: Psychology 1.

**5. Principles of Psychology: Basic Organization of Behavior** (3) I, II
The basic sensory, neural and motor mechanisms and their functions in human behavior. Prerequisite: Psychology 1 and sophomore standing.

**6. Principles of Psychology: Learning and Integrated Behavior** (3) I, II
Attending, perceiving, and learning, including social learning, personality development, and conditions of efficient work. Prerequisite: Psychology 1 and sophomore standing.

**11. Applied Psychology** (3) I, II
A survey of the application of the basic principles of psychology to business, education, industry, government, law, medicine and related fields. Prerequisite: Psychology 1.

**12. Mental Hygiene** (3) I, II
An examination and interpretation of the factors which go into the making of the person as he adapts himself to the social world about him. The development of the normal personality. Prerequisite: Psychology 1.

### Upper Division Courses

**104A. Statistical Methods in Psychology** (3) I, II
An introduction to the use of quantitative methods in psychology, with emphasis upon measures of central tendency and variability, graphic methods and percentiles, linear correlation, and the applications of the normal probability curve. Prerequisite: Psychology 1. Not open to students with credit for Economics 140 or Sociology 103.

**104B. Advanced Statistics** (3) II
A further study of quantitative methods in psychology with particular emphasi on methods of correlation, chi-square, and contingency, and an instruction to th analysis of variance. Prerequisites: Mathematics C and Psychology 104A, or permission of instructor.

**105A. Introduction to Psychological Testing** (3) I, II
The basic principles of testing. The selection and critical evaluation of group test of intelligence, personality, aptitude, interest and achievement. Prerequisite: One o the following courses: Psychology 5, 11; Education 102A, 102D. Not open for credit t students with credit for Education 105A.

**105B. Individual Mental Testing** (3) II
The principles of individual testing. Instruction and practice in the administratio of the Stanford-Binet and similar tests. Prerequisite: Psychology 105A and permissio of instructor.

**(G) 106. Developmental Psychology** (3) I, II
A study of the psychological development of the normal individual from concep tion through childhood, adolescence, maturity, and old age. Stress is laid upon th interdependence of the various periods of the individual's life. Prerequisite: Psychology 1.

**107. Psychology of Later Maturity** (3) II
The psychological, physiological, and sociological factors influencing behavior i the later years of life. Prerequisite: Psychology 1.

**121. Personnel and Industrial Psychology** (3) I, II
Psychological principles applied to problems of selection and assignment of indus trial personnel, employee training, and fatigue. Prerequisite: Psychology 104A, o Economics 140, or Sociology 103.

**122. Public Opinion Measurement** (3) II
The history, methods, and problems of public opinion and attitude measuremen Emphasis will be placed upon the polling of consumers and voters. Students will b given field experience. Not open to students with credit for Journalism 122.

**130. Educational Psychology** (2) I, II

To develop understanding of the applications of psychological research for effective classroom teaching. Observation and field work required. Prerequisite: Psychology 1. Not open to students with credit for Education 130.

**131. Foundations of Personality** (2) I

The human organism in its interaction with the environment and the resultant changes in the development of the personality. Prerequisite: One full year of psychology or equivalent.

**132. Personality Adjustment** (2) II

The appliction of the fundamental principles of personality to problems of adaptation. Mental hygiene as a local, state, and national problem. Prerequisite: Psychology 131 or permission of instructor.

**140. Physiological Psychology** (3) I, II

The neurophysiological basis of behavior, with particular attention to the psychophysiology of sensory and motor processes, emotion, bodily needs, and learning. Prerequisite: Psychology 5 and 6, or 10 units in biological sciences.

**(G)145. Social Psychology** (3) I, II

The major problems and findings concerning processes of social interaction, group behavior and group membership, and the socialization of the individual. Prerequisite: Psychology 1. Not open to students with credit for Sociology 145.

**150. Abnormal Psychology** (3) I, II

The psychology of behavior disorders, with emphasis on the amentias, neuroses, and psychoses. Prerequisite: One full year of psychology.

**151. Introduction to Clinical Appraisal** (3) I

A study of diagnostic devises in psychology, tests of clinical significance, ratings, interviewing for securing information. Projective and case study analyses; problems of insight, rapport, empathy, and prediction of individual behavior. Prerequisites: One of the following: Psychology 105A, 106, 131, 140, or 150.

This course will deal with dramatic materials in which the student will study omplete plays for interpretation and characterization without memorization and cting techniques.

**40A-140B. Stage Design** (3-3) Year, I, II

The application of the principles of design, color and perspective to the design f settings for the production of period and modern plays. Students will learn to make ketches and models and paint the scenery for the departmental productions. Prerequiite: 56A-56B or permission of the instructor.

**42A-142B. Summer Theater Workshop** (3 or 6) Summer

A theater laboratory for those who wish to devote their entire time to training nd a variety of experiences in the summer theater program including acting, design, tagecraft, lighting, directing, and stage management. Prerequisite: Permission of the nstructor.

**45. Stage Lighting** (3) II

For directors, designers and technicians in school and community theaters conerning the principles and practice of light, color, lighting instruments, and control quipment, including the design and planning of lighting of plays. Students will serve s light crews for departmental production.

**50. Phonetics** (3) I, II

Auditory and kinesthetic analysis of the sounds of the English language. Valuble as a corrective course in pronunciation and articulation. Required of speech majors nd those seeking the Speech Correction Credential.

**52. History and Design of Costume** (stage) (3) II

A study of costume from Egypt to the present. Emphasis on the use of historical ostumes on the stage. Costume designs for one stage production. Drawing and paintg experience desirable but not necessary.

**54A-154B. History of the Theater** (3-3) Year, I, II

A study of the theater from primitive times to the present. Special attention will given to the theater as a mirror of the social and cultural background of the various untries and periods in which it is studied. Carries aesthetics credit. (Speech Arts 54B may be taken without 154A.)

**55. Advanced Acting** (3) I

Problems in characterization: Acting styles of the Elizabethan and Eighteenth entury periods. Prerequisite: 55A-55B or the equivalent.

**56. Advanced Dramatic Production** (3) II

Problems and projects in scenery and lighting in connection with the workshop d major productions of the department.

**59. Stage Direction** (3) I

Planned for prospective directors of plays in schools, colleges and community eaters. Through lectures, discussions, and exercise projects the student will become quainted with the principles, procedure and methods of stage direction. Each student ill be required to direct several short plays during the course.

**0. Stage Direction Laboratory** (1) I, II

This will consist of experience in directing a one-act play before a departmental public audience. It may be taken with or it may be preceded by 159. Prerequisite corequisite: 159. May be repeated once for credit.

**1-A161B-161C-161D. Advanced Intercollegiate Debate** (1-1-1-1) I, II

Students are limited to four units, including lower and upper division courses.

**162. Advanced Argumentation** (3) I

Presents a further and more detailed study in the preparation of briefs and th organizing of evidence; opportunity for participation in intramural debates, intercollegiate debate, and community speaking activity. Prerequisite: 2A or 2B.

**163A-163B-163C-163D. Advanced Verse Choir** (1-1-1-1) I, II

Participation in verse speaking chorus to develop quality, range of tone, an ability in dramatic visualization of poetry. Students are limited to four units, including lower and upper division courses.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**176. Problems of Speech Correction and Articulation** (3) II

Analysis and discussion of the major articulatory problems as encountered i public school work, particularly in California. Required of all students for the speec correction credential. (Minimum of 25 laboratory hours required.) Not open to student with credit for Education 176.

**177. The Teaching of Lip Reading** (2)

History, theory and methods of lip reading. Aids for the classroom teacher program and materials of instruction for the specialized teacher. Opportunities fo practice teaching are offered. Not open to students with credit for Education 17

**179A-179B. Nervous Speech Disorders** (3-3) Year, I

Clinical survey of newest methods of speech correction with special emphas given to stuttering. (Minimum of 25 laboratory hours required per semester.) Require course for Special Corrective Credential. Not open to students with credit in Education 179A-179B. (Speech Arts 179A is a prerequisite for 179B.)

**180A-180B. Rehearsal and Performance** (1) I, II

One unit of technical practice followed by one unit of acting. One unit may b repeated, making a total of three units.

**181. Radio Sales and Advertising** (3) I, II

A study of advertising trends in radio advertising; time buying, audience su vey, and program types in relation to products to be advertised via radio broadcastin Includes publicity and promotion of radio programming organization of a rad station; relationship between the business and entertainment factors of radio broa casting. Open to students with consent of instructor. Not open to students with cred for Business 181.

**182. Advanced Radio Production** (3) II (Offered in 1951-52 and alternate year

Advanced radio production techniques. Students are responsible for the exec tion of Radio Guild productions. Projects in program types include the use of sou and music. Material includes production analyses and script editing. Prerequisit Speech Arts 83.

**183. Radio Continuity and News Writing** (3) II

Correlates news editing and writing with announcing styles. Radio news pr cedure and organization of a radio news staff; analysis of reportorial and commenta styles. Includes production techniques of "on-the-spot" and multiple point picku broadcasts. Registration with permission of instructor. Not open to students wi credit for Journalism 183.

**184. Radio Writing** (3) II

Includes original half-hour scripts, play or novel adaptations for radio, and t documentary program. Study of pacing and timing, the use of sound and music f bridges and cues, and radio format. Plays written by students are read and discuss during their development; the better plays to be produced by the Radio Guild f broadcast. Open to students with consent of instructor.

**191. Organized Discussion** (3) II

Consideration of the symposium, the panel, the open forum, the business sessio and varieties of conference speaking. Emphasis upon organization and presentatio Attention to parliamentary procedure for informal groups. Prerequisite: Speech A 60 or equivalent.

**192A-192B. Advanced Public Speaking** (3-3) Year, I, II
Careful attention given to the preparation and delivery of longer speeches, using as models classics in the field of oratory. Prerequisite: 4.

**199. Special Problems in Speech and Dramatic Art** (1-3) I, II
May be repeated once in different departmental area for a total of six units.

### Graduate Courses

**200. Seminar in History of Oratory** (2) II
An advanced course for those already familiar with the techniques and theories of public speaking and debate. A history of public address from the time of Greece up to the present, organized around the theories of representative orators and their relationships to the social environment.

**221. Articulatory Problems of Speech** (2) I
Analysis and discussion of articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Prerequisite: Speech Arts 150.

**245. Seminar in Technical Practice** (2)
Advanced technical projects in planning school theaters and their mechnical equipment, lighting control and lighting instruments and the design of lighting layouts for elaborate plays will be assigned, executed and discussed.

**259. Seminar in Stage Direction** (2)
An advanced course for those who are ready to direct full-length plays and to consider the problems of handling various styles and types of drama in the great periods of dramatic literature for modern production. For graduates with experience in directing plays.

**260. Seminar in Oral Interpretation** (2)
Aesthetic discipline applied to oral reading of masterpieces of poetry and prose. Analysis of thought and emotional content and aesthetic form, including unity and harmony, variety and contrast, balance and proportion, rhythm.

# ZOOLOGY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in *zoology* for the A.B. degree. Courses n the major are in addition to 45 units in general education courses. Lower division equirements: in the major, Zoology 1A-1B; in related fields, Botany 1 or 2A-2B, hemistry 1A-1B or 2A-2B, Physics 2A-2B, 3A-3B. Upper division requirements: 4 units in zoology to include Zoology 100, 101, 106, 155. A minor is not required. eading knowledge of a foreign language is recommended.

A *major in arts and sciences* is offered in *zoology* for the B.S. degree. Courses n the major are in addition to 45 units in general education courses. Lower division equirements: in the major, Zoology 1A-1B; in related fields, Botany 1 or 2A-2B, hemistry 1A-1B or 2A-2B, Physics 2A-2B, 3A-3B, Geology 2, 3, and Mathematics A-7B. Upper division requirements: 36 units in zoology or approved related fields o include Zoology 100, 101, 106, 155. A minor is not required. Reading knowledge of a oreign language is recommended.

A *teaching major* is not offered in zoology; however, courses in zoology may be sed as part of the *life science major* for the general secondary credential or as part of he *general science major* for the general junior high school credential. For specific nformation, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in zoology. The minor must include at least 5 units of work in zoology, six units of which must be from courses carrying upper ivision credit.

A *teaching minor* is not offered in zoology ; however, it may be used as part of the *teaching minor in life science* for the general secondary credential, or as part of the *teaching minor in general science* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A-1B. General Zoology** (4-4) Year, I, II

An introduction to animal biology. Designed for those who expect to do advanced work. Two lectures and 6 hours of laboratory work each week. Prerequisite for Zoology 1B ; Zoology 1A.

**8. Human Anatomy** (3) I

A study of human structure through the use of models, prepared dissections and microscope slides. Prerequisite : High school biology, Biology 3, 1, or Zoology 1A Two hours of lecture and three hours of laboratory per week. Required of prenursing students. Credit reduced to 2 units if student has credit for Zoology 20.

**20. Human Anatomy and Physiology** (3) II

An elementary course in human anatomy and physiology. Prerequisite : Hig school biology, or Biology 1 or 3 or Zoology 1A. Lectures three hours per week. Credi reduced to two units if student has credit for Zoology 8 or Physiology 1A.

### Upper Division Courses

**100. Embryology** (4) I, II

The development of vertebrates as illustrated by the frog, chick, and pig. Si hours of laboratory and two hours of lecture and quiz per week. Prerequisite : Zoolog 1B, or Biology 3 and consent of instructor.

**101. General Physiology** (4) II

Fundamentals of plant and animal functions. Two lectures and two laborator periods per week. Prerequisites : Biology 3 and consent of instructor, or Zoolog 1A-1B, Chemistry 1A-1B or Chemistry 2A-2B.

**104. Microtechnique** (3) I, II

Introduction to methods of preparation of tissues for microscopic study. Six hour of laboratory and one hour of lecture per week. Prerequisite : One year college chem istry and Zoology 1A-1B, Botany 2A-2B, or Biology 4 and consent of instructor.

**106. Comparative Anatomy of the Vertebrates** (4) I

Dissection, study and comparison of organ systems of typical vertebrates. Tw hours per week of lecture and six hours of laboratory. Prerequisite : Zoology 1B, o Biology 3 and consent of instructor.

**108. Histology** (4) I

A study of the microscopic structures and differentiation of tissues and organs the vertebrates, especially mammals. One lecture and six hours of laboratory per wee Prerequisites : Zoology 1A-1B ; recommended Zoology 100.

**109. Hematology** (3) I, II

Microscopic and chemical examination of blood. One lecture and two laborator periods per week. Prerequisite : Chemistry 102.

**110. Limnology** (4) II

A biological survey of available fresh waters, followed by a selected problem o the relationship of an organism or group of organisms to the environment. Prerequ sites : Zoology 1A-1B and elementary chemistry.

**112. Marine Invertebrates** (4) I

Identification and study of behavior and life histories of invertebrates of the Sa Diego region. Frequent collecting trips to the beaches required. Prerequisite : Zoolog 1A, or Biology 4 and consent of instructor. Two hours of lecture and six hours of labor tory or field work per week.

**113. Ornithology** (4) II

The study and identification of birds, especially those of the Pacific Coast and the San Diego region. One hour of lecture and six hours per week of laboratory, or field excursions, and a field project. Prerequisite: Zoology 1B, or Biology 4 and consent of instructor.

**113F. Field Ornithology** (1) I

A field study of local birds with special emphasis upon the fall migration.

**115. Cold-blooded Vertebrates** (3) II

The classification, natural history and distribution of fishes, amphibians, and reptiles. Practice in the techniques of collection and the use of keys for identification. Frequent field trips. One lecture and two laboratory periods per week. Prerequisites: Zoology 1B, or Biology 4 and consent of instructor.

**118. Mammalogy** (3) II

Lectures on classification, adaptations, and ecological relationships of mammals. Laboratory and frequent field trips to familiarize students with local mammals, taxonomic procedures and field techniques. One lecture and six hours of laboratory per week. Prerequisites: Zoology 1A, or Biology 4 and consent of instructor.

**119. Field Zoology** (4) I, Summer

Designed to give a working knowledge of the animals of Southern California; field trips, lectures and laboratory emphasizing ecology, behavior, observational methods, collecting techniques and taxonomy. Prerequisite: A course in college biological science or permission of instructor.

**121. General Entomology** (3) I

The classification, life history, structure, and physiology of insects. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor. Two hours of lecture and three hours of laboratory per week.

**122. Systematic Entomology** (1-2) II

Classification of insects with especial emphasis on a group of insects of the student's choice. To be taken with or to follow 121. May be repeated for credit but with a total of not more than 3 units. Three to six hours of laboratory work each week.

**125. Economic Entomology** (4) II

Course designed for students of agriculture and horticulture. Emphasis is placed on determination and control of insects affecting plants. Quarantine measures are also studied. Two lectures and two laboratory periods per week. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor.

**126. Medical Entomology** (3) I

The role of insects and other arthropods in transmission and causation of human diseases. Three hours of laboratory and two hours of lecture per week. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor.

**128. Parasitology** (4) I

Study of animal parasites with special reference to those of man. Laboratory including identification of important parasites of man, and collection and preservation of local forms. Two hours of lecture and six hours of laboratory per week. Prerequisite: Zoology 1A-1B, or Biology 4 and consent of instructor.

**(G) 150. Readings in Biology** (2) II

Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles, ecology, economic zoology, zoogeography, breeding habits, animal behavior. Not open to students who have credit for Botany 150. Prerequisite: Biology 3 or equivalent.

**153. Economic Biology** (2) I

Study of uses of plants and animals to man and their destructive effects. Consideration also given to general methods of control and conservation. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor. Not open to students who have credit for Botany 153.

**155. Genetics** (3) II
Principles of plant and animal genetics, with experiments and demonstrations illustrating the mechanisms of heredity. Two hours of lecture and three hours of laboratory per week. Not open to students with credit for Botany 155. Prerequisites: Zoology 1A-1B, or Botany 2A-2B, or Biology 3 and consent of instructor.

**(G) 160. Evolution** (2) II
The development of theories of evolution. Two lectures per week. Prerequisite: Biology 3 or equivalent. Not open to students with credit for Botany 160.

**(G) 165. Human Heredity** (2) I
Presentation of selected principles of heredity as related primarily to human inheritance. Designed primarily for nonscience majors. Two lectures per week. Not open to students with credit for Zoology 155 or Botany 155.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**199. Special Study** (1-3) I, II
Admission only by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open to students who have completed at least 15 units of zoology with a grade of A or B. May be taken for a maximum of six units.

## Graduate Courses

**200. Seminar** (3) I
Especial emphasis will be placed on current concepts in the various fields of biology including problems of migration, distribution, speciation, evolution. Required of all graduate students.

**202. Hydrobiology** (2) II
A course in aquatic ecology with special emphasis on fresh water but with reference to marine biology.

**213. Advanced Studies in Ornithology** (2) I
Lectures and seminar on advanced problems of morphology, distribution, behavior and classification of birds.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (2-5)
An individual study course designed primarily for candidates for the master's degree.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

# PROVISIONAL CURRICULUM

This curriculum is for the purpose of assisting provisional students in attaining regular status in a curriculum which leads to the A.B. degree. Students in the provisional program are given close supervision in selection of courses and are placed in classes specially designed to aid in adjustment to the college program.

Reclassification to regular status may be obtained upon the completion of at least 24 units of work of "C" grade with an over-all grade point average of 1.0, or upon recommendation of a reclassification committee. Reclassification must ordinarily take place within the first year of college work. Students who do not so reclassify will be placed on probation. (See Probation and Disqualification.)

The courses in the provisional curriculum are open only to students in provisional status. Provisional students in their first college year must select three courses each semester from the list of subjects in the provisional curriculum. All other courses selected to complete the student's program may be chosen from the regular schedule of courses or from additional courses in the provisional curriculum with the approval of the adviser.

## A SUGGESTED PROGRAM FOR PROVISIONAL STUDENTS

| First Year | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem.* |
| Physical education activities | ½ | ½ |
| English 41 and 42 | 3 | 3 |
| Psychology 40 and Sociology 45 | 3 | 3 |
| Social Science 40 and 45 | 3 | 3 |
| Physical Science 40 and Biology 40 | 3 | 3 |
| Speech Arts 3 and Health Education 21 | 2 | 2 |
| Electives | 2 | 2 |
| | 16½ | 16½ |

## COURSES OF INSTRUCTION

### BIOLOGY

**(G)41. Man and His Biological World** (3) I, II

General concepts of biology with emphasis on the biology of man in relation to modern life. Equivalent of Biology 1. Laboratory credit for general education may be obtained by following Biology 40 with Biology 4.

### ENGLISH

**40. English Fundamentals** (2) I, II

Elements of composition. Drill in grammar, usage, vocabulary building, reading skills, theme writing. Equivalent of English A. This course is required of students in the provisional program who fail the English examination. This course is a prerequisite for other English courses. May be counted toward graduation credit but may not be used for the general education requirement.

**(G)41. English Composition** (3) I, II

Composition stressing exposition. Reading from essays and articles. Prerequisites: Passing mark in English A qualifying examination or credit for English 40. Equivalent of English 1.

**(G)42. Freshman Literature** (3) I, II

Literature, mainly contemporary, is read for its ideas, especially in relation t human problems and their solution. Practice in writing is continued. Required of al Provisional students. Prerequisite: English 41. Equivalent of English 2.

## PHYSICAL SCIENCE

**(G)41. Man and His Physical World** (3) I, II

A general education course concerning the nature of the scientific method an selected topics in physical science. Materials will be chosen from physics, chemistry astronomy, and geology to provide an understanding of the relations of physical scienc to modern life. Equivalent of Physical Science 1.

## PSYCHOLOGY

**(G)41. Psychology and Life** (3) I, II

An elementary survey of normal adult psychology, descriptive and organizational; the subjective and objective aspects of behavior. Furnishes basis for all othe courses in psychology and is prerequisite therefor. Equivalent of Psychology 1.

## SOCIAL SCIENCE

**(G)40. Contemporary Problems** (3) I, II

A survey of political, social and economic forces with background material fo understanding human problems. Equivalent of Sociology 50.

**(G)45. American Democracy** (3) II

The democratic concept of self-government, its background and growth, with a emphasis on the American use of democratic principles. Includes a study of democrac in a relative and comparative approach to our modern world and other forms of government. Satisfies the U. S. Constitution requirement for graduation.

## SOCIOLOGY

**(G)45. Marriage and Family** (3) I, II

Emphasizes preparation for successful marital adjustment by presenting mat rials that will help students learn to solve their own courtship, marriage, and famil problems. A general education course in social science and also in family life educatio

# DIRECTORY

## 1950-1951

(Date after name indicates when appointed to faculty)

HEPNER, WALTER R. (1935) -------- President
A.B., M.A., Ed.D., University of Southern California.

ACKLEY, JOHN W. (1947) -------- Associate Professor of Speech Arts
A.B., University of Redlands; M.A., and two years of graduate study at the University of Southern California.

ADAMS, EILEEN (Mrs. Bert) (1949) -------- Junior Librarian
A.B., Willamette University; B.S., University of Denver.

ADAMS, JOHN R. (1928) -------- Professor of English
A.B., A.M., University of Michigan; Ph.D., University of Southern California.

ALCORN, MARVIN D. (1941) -------- Associate Professor of Education
A.B., Southwestern College; A.M., Teachers College, Columbia University; Ed.D., University of Southern California.

ALLEN, WILLIAM H. (1950) -------- Coordinator of Audio-Visual Services
Assistant Professor of Education
A.B., University of California at Los Angeles; M.A., Claremont Graduate School; Ed.D., University of California at Los Angeles.

AMSDEN, GEORGIA C. (1925) -------- Associate Professor of Secretarial Management
Diploma, Gregg College, Chicago; special secretarial training in various colleges.

ANDERSON, GRAYDON K. (1949) -------- Assistant Professor of Economics
A.B., Willamette University; two years of graduate study at University of Minnesota and University of Wisconsin.

ANDREWS, JULIA G. (Mrs. F. S.) (1947) -------- Assistant Professor of Art
A.B., Northwestern University; M.A., Columbia University; two and one-half years of graduate study at Teachers College, Columbia University.

APPLE, JOE A. (1947) -------- Professor of Education
A.B., Southeastern State College; M.A., University of Oklahoma; Ed.D., Teachers College, Columbia University.

ATKINSON, DAVID F. (1949) -------- Instructor in Accounting and Business Management
A.B., San Jose State College; M.A., Stanford University; graduate study at Redlands University. On military leave, January, 1951.

BACON, GUINIVERE KOTTER (Mrs. George) (1928)
Associate Professor of Education
B.S., Utah Agricultural College; M.A., Stanford University; one year of graduate study.

BAIRD, OSCAR (1921) -------- Professor of Physics
B.A., University of Wisconsin; M.A., University of California. Three years graduate study at University of Minnesota, University of California, University of Southern California and University of Oregon.

BAKER, CLIFFORD H., JR. (1937) -------- Assistant Professor of Spanish
A.B., San Diego State College; M.A., and four years of graduate study at the University of California.

BALLANTINE, FRANCIS A. (1949) -------- Assistant Professor of Education
A.B., Michigan State Normal College; A.M., Ph.D., University of Michigan.

BARNHART, KENNETH EDWIN (1939) -------- Professor of Sociology
A.B., Southwestern University; B.D., Southern Methodist University; Ph.D., University of Chicago.

BECKER, CALLIE D. (Mrs. E. J.) (1946) -------- Senior Librarian
A.B., Shorter College; B.S. in L.S., Emory University.

BENTON, CARL W. (1948) -------- Instructor in Physical Education
B.S., University of California at Los Angeles; M.S., University of Southern California. On Military Leave February, 1951.

BIRCH, AILEEN J. (Mrs. C. E.) (1949) -------- Instructor in Education
A.B., San Diego State College; graduate study at Claremont College.

BLOCK, EDWARD A. (1946)________________________Associate Professor of English
A.B., M.A., Ph. D., University of California.

BRITTAN, MARTIN R. (1950)______________________________Instructor in Zoology
A.B., San Jose State College; Ph. D., Stanford University.

BROADBENT, HARRY H. (1949)__________Assistant Professor of Physical Education
A.B., University of Oklahoma; M.S., University of Pennsylvania.

BROOKS, BAYLOR (1931)__________________________Assistant Professor of Geology
B.A., Stanford University. Two years graduate study at University of Arizona and Stanford University.

BROWN, ELIZABETH McPIKE (Mrs. L. P.) (1926)____________Professor of French
Ph.B., M.A., Ph.D., University of Chicago; one year graduate study at the Sorbonne, Paris, France; Certificat d'Etudes Françaises; Diplôme de l'Association Générale de Phonétique, Paris, France; Officier d'Académie.

BROWN, EUGENE P. (1947)____________________Associate Professor of Accounting
B.S., Southeastern Teachers College; B.A., M.A., University of Oklahoma. One year graduate study at University of Chicago, University of Southern California and University of Mexico.

BROWN, LESLIE PARKER (1922)________________Professor of Spanish and French
B.A., Yale College; M.A., Harvard University; Ph.D., University of Southern California.

BRUBECK, HOWARD R. (1950)______________________Associate Professor of Music
B.A., San Francisco State College; M.A., Mills College.

BRUNER, WILLIAM S. (1948)______________________Assistant Professor of English
B.S., University of Virginia; M.A., Claremont College.

BRYDEGAARD, MARGUERITE A. (Mrs. H.) (1936)_Associate Professor of Education
A.B., San Diego State College; M.A. and graduate study at Claremont College

BURNETT, GAIL A. (1947)__________________________Assistant Professor of English
A.B., Randolph-Macon Woman's College; M.A., University of California at Los Angeles; Ph.D., University of Southern California.

CAMERON, ROY ERNEST (1929)____________________________Professor of Economics
A.B., Ph.D., University of California.

CAMPBELL, LOIS B. (1947)______________________Assistant Professor of Education
A.B., University of California; M.A., Teachers College, Columbia University.

CARLSON, HILDING B. (1948)
Coordinator, Personnel Services; Professor of Psychology
Ph.B., M.S., Ph.D., University of Chicago.

CARLSON, THORSTEN R. (1948)
Principal of Campus Laboratory School; Associate Professor of Education
B.E., St. Cloud State Teachers College; M.A., Ph.D., University of Minnesota.

CASSEL, RUSSELL N. (1949)_____________________Assistant Professor of Education
B.S., Millersville State Teachers College; M.Ed., Pennsylvania State College Ed.D., University of Southern California. Resigned February, 1951.

CAVE, MARY F. (1946)_________________Assistant Professor of Physical Education
B.S., University of North Dakota. Graduate study at Bennington College and University of California at Los Angeles.

CHADWICK, LEONARD E. (1949)________________Assistant Professor of Economics
B.S. and two and one-half years graduate study at the University of California

CHRISTY, LEO J. (1950)______________________________Assistant Professor of Music
B.S., Indiana University; B.S., M.S., University of Illinois.

CHURCHILL, CHARLES W. (1949)________________Assistant Professor of Sociology
A.B., University of Newark; M.A., Ph.D., New York University.

COMIN, NORITA (1949)______________Acting Assistant Professor of Home Economics
B.S., University of Minnesota.

CORBETT, KATHERINE E. (1921)________________Associate Professor of Education
B.Pd., Michigan State Normal College; B.S., A.M., Teachers College, Columbia University.

CORRIGAN, ROBERT F. (1947)________________Assistant Professor of Speech Arts
A.B., University of Michigan; M.A., University of Iowa.

CROUCH, JAMES ENSIGN (1932)___________________________Professor of Zoology
B.S., M.S., Cornell University; Ph.D., University of Southern California.

CUNKLE, ELIZABETH C. (Mrs. L.) (1948)______________________Junior Librarian
A.B., University of California; B.S. in L.S., Columbia University. Graduate study University of California.

CUNNINGHAM, CORNELIUS C. (1947)--------------------Professor of Speech Arts
A.B., Beloit College; M.A., Northwestern University; Ph.D., University of Iowa.

CUTTER, DONALD C. (1950)----------------------------------Instructor in History
A.B., M.A., Ph.D., University of California.

DeBRECHT, EUGENE F. (1949)
Coordinator of Extension Services; Assistant Professor of Marketing
A.B., San Francisco State College; M.A., Stanford University. On military leave, April, 1951.

DEPUTY, ERBY CHESTER (1931)-------------------------Professor of Education
A.B., University of Denver; A.M., Ph.D., Columbia University.

DICKHAUT, FLORENCE LILLIAN SMITH (Mrs. C. A.)--------Professor of English
A.B., Northwestern University; M.A., University of Chicago.

DIRKS, JOHN H. (1947)---------------------------------Assistant Professor of Art
A.B., San Diego State College. Graduate study at University of Southern California.

EAGLE, JOHN E. (1946)-------------------------Associate Professor of Mathematics
B.S., Montana State College; M.A., Ed.D., Stanford University.

EARNEST, SUE W. (Mrs. L. E.) (1947)--------------Associate Professor of English
A.B., San Diego State College; M.A., Ph.D., University of Southern California.

EELLS, KENNETH W. (1949)-------------------Associate Professor of Psychology
A.B., George Washington University; M.A., Ph.D., University of Chicago.

EMERSON, ARTHUR T. (1949)----------Acting Assistant Professor of Mathematics
B.S., U. S. Naval Academy. One year graduate study at Naval War College.

EVENSON, PATTEE E. (1949)-------------------------Associate Professor of Music
B.S., University of Minnesota; M.M., University of Michigan; specialized training at Universities of Minnesota, Michigan, Southern California, and Eastman School of Music; private instruction in Paris, London and the United States.

FELTON, JOHN R. (1948)------------------------Assistant Professor of Economics
B.A., M.A., and one and one-half years of graduate study at the University of California.

FERRIS, HORACE G. (1949)--------------------------------Instructor in Physics
B.A., Pomona College; M.A., Ph.D., University of California. Resigned January 1951.

FLYE, RICHARD C. (1950)----------------------------Assistant Professor of Music
B.A., University of Virginia; M.A., and Professional Diploma, Columbia University.

FOLEY, ROLLA (1950)--------------------------------------Lecturer in Education
B.S., Eastern Illinois State College; M.M., University of Southern California.

FRIEDRICH, KURT (1949)-----------------------Assistant Professor of Education
A.B., Columbia College; M.A., Columbia University; Ed.D., Columbia Teachers College.

GELDREICH, EDWARD W. (1947)---------------Assistant Professor of Psychology
A.B., M.A., University of Cincinnati; three years graduate study at the University of Chicago.

GENERALES, MINOS D. (1949)-------------Assistant Professor of Political Science
Degree in Law and Political Science, including six years of graduate study at the University of Athens, University of Paris Law School, and Institute of International Studies.

GERMANN, LULA (1926)-----------------------------------------Senior Librarian
B.S., State Teachers College, Hays, Kansas.

GIBSON, ERNEST DANA (1947)----------Associate Professor of Business Education
Secretarial and Office Management
B.S., University of Minnesota; M.A., Colorado State College of Education; Ed.D., New York University.

GJERDE, CLAYTON M. (1948)--------------------Assistant Professor of Education
A.B., Augsburg College; M.A., Ph.D., University of Minnesota.

GLEASON, JOHN M. (1930)--------------------Associate Professor of Mathematics
A.B., University of California at Los Angeles; M.A., University of California. Two years graduate study at University of Southern California, University of California at Los Angeles and Claremont Colleges.

GRESS, IRVIN S. (1946)--------------------------Assistant Professor of Psychology
A.B., George Washington University; Ed.M., University of Pittsburgh. Two years graduate study at Columbia University, Pennsylvania State College and University of Pittsburgh.

GROSS, GEORGE C. (1949)------------Acting Instructor in English
A.B., San Diego State College; one year graduate study at San Diego State College and University of Southern California.

GULICK, SIDNEY L., JR. (1945)------------Professor of English
B.A., M.A., Oberlin College; Ph.D., Yale University.

HAMMACK, ISABELLA STEWART (1936)--------Associate Professor of Education
A.B., M.A., and one year graduate study at the University of California.

HARCLEROAD, FRED F., JR. (1946)------------Associate Professor of Education
A.B., M.A., Colorado State College of Education; Ph.D., Stanford University.

HARRINGTON, AWONA B. (1949)------------Junior Librarian
A.B. and one year graduate study at San Diego State College; M.S. in L.S., University of Southern California.

HARRINGTON, NEIL J. (1948)------------Instructor in Chemistry
B.S., Monmouth College; one year of graduate study at DePaul University and Northwestern University. On military leave, October, 1950.

HARRIS, VINCENT C. (1950)------------Assistant Professor of Mathematics
B.A., M.A., Ph.D., Northwestern University.

HARVEY, ALBERT R. (1949)------------Assistant Professor of Mathematics
B.S., Bates College; A.M., Ph.D., Harvard University.

HARVEY, DOROTHY R. (Mrs. F. A.) (1924)----------Assistant Professor of Botany
A.B., San Diego State College; M.A., University of Southern California. One year graduate study at University of Southern California and University of Chicago.

HARWOOD, ROBERT DANIEL (1928)------------Professor of Zoology
B.A., Pomona College; Ph.D., Cornell University.

HASKELL, HARRIET (1940, except 1943-45)---------Assistant Professor of English
A.B., Mills College; M.A., Bryn Mawr College; Ph.D., University of Wisconsin.

HAVER, CLARE L. (Mrs. R.) (1949)------------Instructor in Education
A.B., Western Washington College of Education.

HAYNES, GERALDINE K. (Mrs. L.) (1931)------------Senior Librarian
A.B., Indiana Central College; B.S. in L.S., University of Illinois.

HOUSEMAN, RICHARD A. (1948)------------Associate Professor of Education
B.S., Central Michigan College of Education; M.A., Ed.D., Teachers College Columbia University.

HOUSER, LOWELL (1938)------------Associate Professor of Ar
Diploma, Chicago Art Institute. Five years' special study in Mexico, Yucatan Haiti, and New York City.

HUGHES, DONALD H. (1950)------------Assistant Professor of Education
B.A., Hastings College; M.Ed. and one year of graduate work at the Universit of Colorado.

HUNTER, JAMES J., JR. (1946)------------Executive Dean; Professor of Education
A.B., Cornell University; M.S., Ph.D., Syracuse University.

IMBROCK, PAUL H. (1950)------------Assistant Professor of Educatio
B.S., Bowling Green State University; M.A., Ed.D., Teachers College, Columbi University.

ISENSEE, ROBERT W. (1948)------------Assistant Professor of Chemistr
A.B., Reed College; M.A., Ph.D., Oregon State College.

JACKSON, EVERETT GEE (1930)------------Professor of Ar
A.B., San Diego State College; M.A., University of Southern California. Thre years special study in Mexico.

JACOBSEN, HELEN M. (1946)------------Senior Libraria
A.B., San Diego State College; B.S. in L.S., University of California.

JOHNSON, FRANK LOUIS (1939)------------Associate Professor of Englis
A.B., M.A., University of Minnesota; Ph.D., University of Wisconsin.

JOHNSON, TESSA M. (1950)------------Assistant Professor of Physical Educatio
A.B., University of California; M.S., University of Southern California.

JONES, KENNETH K., JR. (1948)------------Assistant Professor of Speech Art
B.S., Northwestern University; M.A., Stanford University.

JOSEPH, LIONEL (1947)------------Associate Professor of Chemistr
B.S., St. Louis University; M.S., Ph.D., Washington University.

KALBFELL, DAVID C. (1948)------------Assistant Professor of Physic
A.B., University of California at Los Angeles; M.A., Ph.D., University of Cal fornia. Registered Electrical Engineer.

KAPLAN, OSCAR J. (1946) ........ Associate Professor of Psychology
B.A., M.A., University of California at Los Angeles; Ph.D., University of California.

KASCH, FREDERICK W. (1948) ........ Assistant Professor of Physical Education
B.S., M.S., University of Illinois; graduate study at New York University and University of Illinois.

KEENEY, JOSEPH SUMNER (1933) ........ Professor of English
A.B., Yale University; M.A., Ph.D., University of California.

KENNEDY, CHESTER B. (1937) ........ Associate Professor of English
A.B., Chico State College; M.A., Ph.D., Stanford University.

KIDWELL, WILLIAM M. (1949) ........ Placement Officer; Assistant Professor of Psychology
B.A., M.S., University of Oregon; Ed.D., Stanford University.

KITZINGER, ANGELA M. (1945) ........ Associate Professor of Health Education
A.B., Barnard College, Columbia; M.A., Teachers College, Columbia University. Additional work at Central School of Hygiene and Physical Education and at Folk High School, Ollerup, Denmark.

KLAPP, ORRIN E. (1948) ........ Assistant Professor of Sociology
M.A., Ph.D., University of Chicago.

KOESTER, GEORGE A. (1950) ........ Assistant Professor of Education
B.S., Midland College; M.A., University of Colorado. Two years of graduate study at University of Colorado and University of Minnesota.

LAMDEN, CHARLES W. (1946) ........ Dean of Educational Services and Summer Sessions; Professor of Accounting and Business Management
A.B., M.A., University of California at Los Angeles; Ph.D., University of California. Certified Public Accountant.

LAURITSEN, WILLIAM H. (1947) ........ Professor of Health Education
A.B., M.A., University of Nebraska; Ph.D., Ohio State University.

LEBARRON, EVANGELINE O. (Mrs. H. E.) (1946, except 1948-49)
Assistant Professor of Secretarial Management
B.A., B.S., University of Iowa; B.A., Sioux Falls College; one and one-half years graduate study at Claremont Colleges, University of Southern California, University of Minnesota and University of Hawaii.

LEIB, JULIUS (1938) ........ Associate Professor of Music
Three years special study at Leipzig Conservatory.

LEIFFER, DONALD B. (1948) ........ Professor of Political Science
A.B., University of California at Los Angeles; M.A., Ph.D., Harvard University.

LEMME, MAURICE M. (1948) ........ Associate Professor of Mathematics
A.B., Oakland College; M.A., Indiana University; Ph.D., Purdue University.

LEONARD, CHARLES B. (1921) ........ Professor of History
A.B., M.A., Ph.D., University of California.

LESLEY, LEWIS B. (1924) ........ Professor of History
A.B., Stanford University; M.A., Ph.D., University of California.

LINLEY, JAMES M. (1945) ........ Assistant Professor of Education
Ph.B., University of Chicago; M.S., Ph.D., University of Southern California.

LOCKMAN, EVELYN (1948) ........ Assistant Professor of Physical Education
B.A., Vanderbilt University; M.A., George Peabody College; graduate study at New York University, and University of Wisconsin; three years special study in dance.

LUCE, LAWRENCE W. (1949) ........ Assistant Professor of Industrial Arts
B.S., Illinois Wesleyan University; M.S., Stout Institute.

LUCIO, WILLIAM H. (1939) ........ Coordinator of Elementary Education
A.B., M.A., Ph.D., University of California. Professor of Education

MADDEN, RICHARD (1939) ........ Executive Dean; Professor of Education
A.B., Nebraska (Peru) State Teachers College; M.A., Ph.D., Columbia University.

MARCHAND, ERNEST L. (1946) ........ Professor of English
A.B., M.A., University of Washington; Ph.D., University of Wisconsin.

McBLAIR, WILLIAM (1948) ........ Assistant Professor of Zoology
A.B., San Diego State College; two years of graduate work at the University of California.

McCLINTIC, JOSEPH O. (1946) ........ Professor of Economics
A.B., Central College; A.M., University of Missouri; Ph.D., University of Wisconsin.

McCOLLOM, IVAN N. (1946)------Dean of Educational Services and Summer Sessions
Professor of Psychology
A.B., Central Washington College of Education; B.S., M.S., University of Oregon; Ed.D., Colorado State College of Education.

* McGAUGHEY, JANET M. (Mrs. J. R.) (1947)--------Assistant Professor of Music
B.M., M.M., University of Michigan.

McLONEY, WIRT L. (1949)---------------------------Instructor in Physical Science
A.B., Western State College; M.A., Colorado State College of Education.

MENDENHALL, MARY (1939)------------Dean of Women; Professor of Philosophy
B.A., University of Colorado; M.A., University of Southern California; Ph.D., Yale University.

MERRILL, JOHN E. (1946)--------------------------Assistant Professor of History
A.B., Stanford University; A.M., Harvard University. Two years graduate study at Stanford University.

MERZBACHER, CLAUDE FELL (1947)------Assistant Professor of Physical Science
B.S., University of Pennsylvania; M.A., Claremont Graduate School. Licensed Professional Chemical Engineer.

MESSIER, LEONARD N. (1946)----------------------Assistant Professor of French
A.B., San Diego State College; M.A., Ph.D., University of California.

MILLER, DOROTHY A. (1947)-----------------------------Instructor in Chemistry
B.S., A.B., Southeast Missouri State College; M.S., State University of Iowa.

MILNE, DAVID S. (1946)--------------------------Associate Professor of Sociology
A.B., University of California at Los Angeles; M.A., University of Southern California; Ph.D., University of Chicago.

MOE, CHESNEY R. (1931)------------------------------------Professor of Physics
A.B., M.A., Stanford University; Ph.D., University of Southern California. Registered Mechanical Engineer. On military leave, April, 1951.

MOORE, EDWENA B. (Mrs. E. J.) (1947)----------Assistant Professor of Education
A.B., San Diego State College; A.M., Claremont Colleges.

MORGAN, CHARLES (1949)-----------------------------Instructor in Engineering
M.E., Stevens Institute of Technology; M.S., University of California. Registered Professional Mechanical Engineer.

MOSEN, ARTHUR W. (1950)------------------------------Instructor in Chemistry
B.S., and one year graduate study at Oregon State College.

MUCHMORE, DON M. (1950)--------------------------Lecturer in Political Science
A.B., Occidental College; one year graduate study at the University of California at Los Angeles.

MYERS, MABEL A. (1946)----------------------Associate Professor of Bacteriology
A.B., M.A., Pomona College; Ph.D., Cornell University.

* NASATIR, ABRAHAM PHINEAS (1928)---------------------Professor of History
A.B., M.A., Ph.D., University of California.

NICHOLS, AMBROSE R., JR. (1939)------------------------Professor of Chemistry
B.S., University of California; Ph.D., University of Wisconsin.

NIEBAUER, RUBY R. (1949)----------------------Assistant Professor of Education
B.S., M.S., University of Wisconsin.

NORLAND, CALVERT E. (1947)---------------------Assistant Professor of Zoology
A.B., Pomona College; M.S., University of California. Graduate study at Claremont Colleges.

* OLSON, ANDREW C., JR. (1946)------------------Assistant Professor of Biology
A.B., San Diego State College; M.S., University of Idaho.

OSBORN, CLARENCE G. (1937)----------------------Professor of Political Science
A.B., A.M., Ph.D., Stanford University.

PEIFFER, HERBERT C., JR. (1937)------------------------------Dean of Students
Professor of Psychology and Guidance
A.B., University of California at Los Angeles; M.A., Ph.D., Stanford University

PEREZ, ROSE MARIE (1948)-------------------------------------Junior Librarian
A.B., San Diego State College; B.S. in L.S., University of Southern California
M.A., University of Chicago.

---

* On leave.

PERRY, FAY V. (Mrs. J. M.) (1936) -------- Coordinator of Guidance for Provisional Students; Professor of Sociology
A.B., San Diego State College; M.A., Ed.D., University of Southern California.

PETERSON, CHARLES E. (1921) ------ Dean of Men; Professor of Physical Education
A.B., San Diego State College; M.A., Claremont Colleges.

PFAFF, PAUL LEWIS (1931) ------------------ Associate Professor of Speech Arts
A.B., Stanford University; M.A. and two years graduate study at the University of Southern California.

PHELPS, LOIS HIGGS (Mrs. P.) (1950) -------------------------- Junior Librarian
A.B., San Jose State College.

PHILLIPS, GEORGE L. (1947) --------------------- Assistant Professor of English
A.B., Dartmouth College; M.A., Harvard University; Ph.D., Boston University.

PHILLIPS, KENNETH (1950) ---------------- Associate Professor of Industrial Arts
B.S., State College for Teachers (Buffalo); M.A., Ph.D., Ohio State University.

PHILLIPS, WALTER THOMAS (1927) ---------------------- Professor of Spanish
A.B., University of Washington; M.A., Stanford University; Ph.D., University of Southern California.

POST, LAUREN CHESTER (1937) ------------------------- Professor of Geography
A.B., M.A., Ph.D., University of California.

POVENMIRE, E. KINGSLEY (1946) ------------ Associate Professor of Speech Arts
B.S., Ohio State University; M.F.A., Yale University.

PRESTON, DUDLEY A. (1948) ---------------------- Assistant Professor of Botany
B.S., Washington State College; M.S., Ph.D., University of Minnesota.

PROUTY, HELEN L. (1950) ---------------------- Assistant Professor of Education
B.S., University of Nebraska; M.A., Ph.D., University of California.

RABE, WILLIAM F. (1950) ---------------------- Assistant Professor of Marketing
B.S., M.A., University of Nebraska; Ed.D., Stanford University.

RAGEN, KATHERINE M. (1947) -------------------- Associate Professor of History
A.B., Penn College; M.A., Bryn Mawr College; Ph.D., University of Wisconsin.

RHUE, SARA A. (1950) --------------------------- Assistant Professor of Education
A.B., Arizona State College; M.A., Ph.D., State University of Iowa.

RICHARDSON, M. BRUCE (1948) -------------- Associate Professor of Engineering
A.B., Aeronautical Engineer, Stanford University. Registered Mechanical Engineer.

RICHARDSON, ROBERT W. (1939, except 1942-48) --------- Professor of Geography
A.B., Ph.D., University of California.

RIDOUT, LIONEL U. (1946, except 1949-50) ------------------ Instructor in History
A.B., San Diego State College; M.A., and two years graduate study at the University of California.

RIGGS, LESTER G. (1950) --------------------- Assistant Professor of Mathematics
B.S., University of Illinois; M.S., Syracuse University; Ph.D., Northwestern University.

ROBERTS, ELLIS E. (1949) -------------------------------- Instructor in Geology
B.S., Michigan College of Mining and Technology; M.S., California Institute of Technology; Ph.D., Stanford University.

ROBINSON, DUDLEY HUGH (1928) ---------------------- Professor of Chemistry
B.S., Louisiana State University; M.S., State University of Iowa; Ph.D., University of Southern California. Registered Chemical Engineer.

* ROBINSON, EVELYN L. (1946) ---------- Assistant Professor of Physical Education
B.S., Mary Washington College of the University of Virginia; M.S., University of Southern California.

ROGERS, SPENCER LEE (1930) --------------------- Professor of Anthropology
A.B., San Diego State College; M.A., Claremont Colleges; Ph.D., University of Southern California.

ROHFLEISCH, KRAMER J. (1947) ------------------------- Professor of History
A.B., M.A., Ph.D., University of California.

ROWE, ROBERT D. (1946) -------------------------------- Professor of Chemistry
A.B., Ph.D., Stanford University.

RUJA, HARRY (1947) ------------ Assistant Professor of Philosophy and Psychology
A.B., University of California at Los Angeles; M.A., University of Chicago; Ph.D., Princeton University; one year postdoctoral study at the University of California at Los Angeles.

---

* On leave.

RUOCCO, ILSE H. (Mrs. L.)----------------------------Associate Professor of Art
B.E., University of California at Los Angeles; M.A., Columbia University.

RYAN, FREDERICK L. (1946)----------------------------Professor of Economics
B.S., Tufts College; Ph.D., University of California.

SAMPLES, HOWELL GORDON, JR. (1950)-----------------------Junior Librarian
A.B., University of Georgia; B.S. in L.S., George Peabody College for Teachers.

SCHALLES, FRANCES IRENE (1950)---------------------------Junior Librarian
A.B., San Diego State College. One year graduate study.

SCHEVILL, KARL E. (1949)--------------------------------Instructor in Spanish
A.B., Harvard University; M.A., Ph.D., University of California.

SCHRUPP, MANFRED H. (1948)-----------------Assistant Professor of Education
B.S., M.Ed., Ph.D., University of Minnesota.

SCHUNERT, JIM R. (1948)-------------------Coordinator of Secondary Education;
Associate Professor of Education
B.S., M.A., Ph.D., University of Minnesota.

* SCHUTTE, WILLIAM H. (1947)---------Assistant Professor of Physical Education
B.S., University of Idaho; M.S., University of Southern California.

SCHWOB, MARION L. (Mrs. W. E.) (1934)-Associate Professor of Physical Education
B.A., State University of Iowa; M.S., University of Southern California.

SCOTT, FRANK L. (1947)----------------Assistant Professor of Physical Education
A.B., Grinnell College; M.A., University of Michigan; one year additional study at the University of Michigan.

SELLMAN, HUNTON D. (1946)--------------------------Professor of Speech Arts
B.S., Purdue University; M.S., University of Arizona. Three and one-half years graduate study at University of California, University of North Carolina and Yale University.

SHANNON, FLORENCE S. (Mrs. E. L.) (1933)
Assistant Professor of Physical Education
A.B., University of California; M.A., University of Southern California.

SHEAFFER, HELEN M. (1950)----------------------------Instructor in Education
A.B., M.A., Colorado State College of Education.

SHELAR, EUGENE (1949)-------------------------Assistant Professor of Zoology
B.S., State Teachers College at Slippery Rock, Pennsylvania; M.S., Ph.D., Cornell University.

SHIELDS, ALLEN E. (1949)--------------------Assistant Professor of Philosophy
A.B., University of California; M.A., Ph.D., University of Southern California

SHIELDS, KARENA P. (1948)---------------------Assistant Professor of English
A.B., and one year of graduate study at the University of Southern California

SHIRLEY, DAVID E. (1950)------------------------------Instructor in Economics
A.B., Princeton University; M.A., University of Utah; two years graduate study at Stanford University.

SHOUSE, CLAUDE F. (1946)----------------------Assistant Professor of English
A.B., Georgetown College; M.A., University of Kentucky; one and one-half years graduate study at University of Pittsburgh and University of Southern California.

SHUTTS, WILLIAM H. (1949)-----------------Assistant Professor of Engineering
B.S., M.S., University of Colorado.

SILVERNAIL, CHESTER J. (1949)---------------Assistant Professor of Astronomy
A.B., San Diego State College; M.A., Claremont Graduate School.

SMART, KEITH L. (1949)------------------------------Instructor in Bacteriology
A.B., M.A., University of California.

SMITH, CHARLES ROBERTS (1933)-----Assistant Professor of Physical Education
A.B., San Diego State College; M.S., University of Southern California.

SMITH, CLIFFORD EDWARD (1937)---------------------Professor of Astronomy
A.B., Carleton College; M.A., Swarthmore College; Ph.D., University of California.

SMITH, DEANE FRANKLIN (1939)------------------Associate Professor of Music
B.M., M.M., Northwestern University.

SMITH, LOUIS E., JR. (1946)---------------------Associate Professor of Physics
A.B., San Diego State College; Ph.D., University of Washington.

---

* On leave Semester II

SORENSON, GEORGE N. (1946)---------Associate Professor of Art
A.B., San Diego State College; M.A., University of Southern California; graduate study at University of California and University of Minnesota.

SPANGLER, JOHN A. (1946)---------Associate Professor of Chemistry
A.B., Ph.D., West Virginia University.

SPORTSMAN, CHARLES C. (1947)---------Associate Professor of Physical Education
B.S., North Texas State College; M.S., and one year additional study at the University of Southern California.

SPRINGSTON, CHRISTINE (1930)---------Associate Professor of Music
B.A., B.M., University of Redlands; M.A., University of Washington. Diplomée d'execution, Conservatoire Americain, Fontainebleau, France.

STEINMETZ, HARRY V. (1930)---------Associate Professor of Psychology
A.B., University of California; M.A., University of Southern California; Ph.D., Purdue University.

STONE, HAMILTON L. (1947)---------Assistant Professor of Engineering
B.S., U. S. Naval Academy. Two and one-half years of graduate study. Registered Mechanical Engineer.

STONE, JOHN PAUL (1930)---------Head Librarian; Professor of Library Science
B.S., Northwest Missouri State Teachers College; B.S., M.S., University of Illinois; Ph.D., University of Chicago.

STORM, ALVENA (Mrs. Eugene) (1926)---------Associate Professor of Geography
A.B., M.A., University of California.

STOUGH, MORROW F. (1950)---------Assistant Professor of Education
A.B., Wittenberg College; M.A., University of Pennsylvania; Ph.D., University of California.

STOVALL, HARRIET B. (Mrs. S. L.) (1925)---------Senior Librarian
Graduate, Berkshire Athenaeum, Massachusetts.

STRAUB, LURA LYNN (1948)---------Assistant Professor of Secretarial Management
A.B., Jamestown College; M.C.S., Indiana University; graduate study at University of Wyoming and University of Denver.

SUTTON, JOSEPHINE M. (1947)---------Junior Librarian
A.B., University of Oklahoma.

SWIGGETT, JEAN D. (1946)---------Associate Professor of Art
A.B., San Diego State College; M.F.A., University of Southern California; graduate study at Claremont Colleges.

TALBOY, RUTH A. (1947)---------Assistant Professor of Home Economics
B.S., Iowa State College; M.A., Stanford University; one year of graduate study at Universities of Minnesota, Iowa, and California.

TAYLOR, JAMES W. (1950)---------Instructor in Geography
A.B., Northwestern State College; M.A., Louisiana State University.

TAYLOR, KENNETH M. (1949)---------Assistant Professor of Zoology
A.B., M.A., Ph.D., University of California.

TAYLOR, MERREL A. (1946)---------Assistant Professor of Zoology
A.B., Indiana University; B.S., M.S., University of Michigan.

TERHUNE, JOHN A. (1946)---------Lecturer in Physics
B.S., U. S. Naval Academy; M.S., Harvard University.

TERRY, WILLIAM L. (1946)---------Lecturer in Physical Education
A.B., Western Kentucky Teachers College; M.S., Indiana University; two years of additional study at University of Kentucky, University of Illinois, and Columbia University.

THEOBALD, JOHN R. (1946)---------Professor of English
B.A., St. Catherine's College, Oxford University; M.A., Mansfield College, Oxford University; Ph.D., University of Iowa.

TIDWELL, JAMES N. (1947)---------Professor of English
A.B., Simmons University; M.A., University of Oklahoma; Ph.D., Ohio State University.

TOLLEFSEN, DOROTHY J. (1946)---------Assistant Professor of Physical Education
A.B., M.A., University of California.

TORBERT, FRANCES B. (Mrs. H.) (1937)---------Associate Professor of Marketing
A.B., Stanford University; M.A., University of Southern California; one year graduate study at Stanford University.

TRAIL, MABEL COY (1935)----------------------------------Professor of English
A.B., Parsons College; M.A., State University of Iowa; Ph.D., University of Southern California.

TREAT, WOLCOTT C. (1950)--------------------Assistant Professor of Psychology
A.B., Harvard College; A.M., Harvard University; Ph.D., Stanford University

TUCKER, GORDON H. (1945)---------------------------------Professor of Zoology
B.S., M.S., University of South Carolina; Ph.D., University of North Carolina.

TURNER, MERLE B. (1950)---------------------Assistant Professor of Psychology
A.B., Willamette University; M.A., Stanford University; Ph.D., University of Colorado.

VAN CLEAVE, MAURICE (1948)---------------------------Lecturer in Accounting
B.S., U. S. Naval Academy; one year graduate study at U. S. Naval War College Public Accountant.

VAN ROEKEL, BYRON H. (1950)------------------Assistant Professor of Education
A.B., Central College; M.A., Ph.D., University of Iowa

VOEKS, VIRGINIA W. (1949)--------------------Assistant Professor of Psychology
B.S., M.S., University of Washington; Ph.D., Yale University.

WALBA, HAROLD (1949)----------------------------------Instructor in Chemistry
B.S., Massachusetts State College; Ph.D., University of California.

WALKER, DONALD E. (1949)--------------------------------Instructor in Sociology
A.B., M.Th., University of Southern California; two years graduate study at Stanford University.

WALKER, HILDE KRAMER (Mrs.) (1931)----------Assistant Professor of German
A.B., M.A., Northwestern University.

WALLING, CURTIS R. (1931)--------------------Associate Professor of Engineering
A.B., E.E., Stanford University; one and one-half years of graduate study a Stanford University and the University of Southern California. Registered Electrical Engineer.

WAND, BARBARA A. (1950)---------------------------------------Instructor in Ar
A.B., San Diego State College; graduate study at University of California at Los Angeles.

WATENPAUGH, FRANK M. (1935)---------------Associate Professor of Accounting
A.B., Pomona College; M.A., University of Southern California. Two years graduate study at University of Southern California and University of Oregon. Public Accountant.

WATSON, DONALD R. (1939)-----Dean of Instruction; Professor of Physical Science
A.B., B.S., A.M., Ed.D., University of Southern California.

WEBB, CHARLES R., JR. (1949)----------------------Assistant Professor of History
A.B., M.A., University of California; M.A., Ph.D., Harvard University.

WEST, EDNA A. (1948)---------------Assistant Professor of Secretarial Managemen
B.A., Santa Barbara State College; M.A., and graduate study at Claremon Colleges, Columbia University, and Oregon State College.

WHITE, ALFRED E. (1946)----------Admissions Officer; Coordinator of Educationa Research; Associate Professor of Guidance
A.B., M.A., University of California; Ed.D., Stanford University.

WILCOX, ROBERT F. (1950)----------------Assistant Professor of Political Science
A.B., M.A., Stanford University; M.A., Columbia University; Ph.D., Stanford University.

WIMER, ARTHUR C. (1950)----------------------------------Lecturer in Journalism
B.Lit., Columbia University; M.A., University of Iowa.

WOLF, ERNEST M. (1947)---------------Assistant Professor of German and Spanish
Study at the Universities of Berlin, Paris, Muenster, Cambridge and Bonn. Ph.D. University of Bonn.

WRIGHT, WILLIAM H. (1921)----Professor of Accounting and Business Managemen
B.S., M.A., University of California; Ph.D., University of Southern California Public Accountant.

ZIEGENFUSS, GEORGE (1948)------------Assistant Professor of Physical Education
B.A., University of Washington; M.A., Ed.D., Teachers College, Columbia University.

## ASSISTANT INSTRUCTORS

| | |
|---|---|
| BARHAM, ERIC G., JR.<br>A.B., San Diego State College. | Assistant in Zoology |
| BURKHARDT, FREDERIC S.<br>A.B., Dartmouth College. | Assistant in Education |
| BYRNE, CHARLES T.<br>A.B., San Diego State College. | Assistant in Journalism |
| CULVER, HAROLD W.<br>B.S., University of Alaska. | Assistant in Education |
| HARVEY, HARRY T.<br>A.B., San Diego State College. | Assistant in Zoology |
| HAYDEN, BERNARR F.<br>A.B., San Diego State College. | Assistant in Education |
| HENNE, EARL A.<br>A.B., Colorado College. | Assistant in Education |
| KING, ROBERT E.<br>A.B., San Diego State College. | Assistant in Psychology |
| OSTRAND, GUNNAR<br>A.B., San Diego State College. | Assistant in Education |
| SHREWSBURY, MARVIN M.<br>M.A., University of California. | Assistant in Zoology |
| TISDALE, WILLIAM K.<br>A.B., San Diego State College. | Assistant in Bacteriology |
| WILTON, JOHN W.<br>A.B., San Diego State College. | Assistant in Zoology |
| WYLLIE, JOHN G.<br>A.B., San Diego State College. | Assistant in Chemistry |

## LECTURERS

| | |
|---|---|
| BACK, GILBERT (1950)<br>Professional musician. | Lecturer in Music |
| BLAKE, DEAN (1927)<br>Meteorologist, U. S. Weather Bureau. | Lecturer in Meteorology |
| BURGERT, ROBERT H. (1948)<br>San Diego City Schools. | Lecturer in Education |
| DE JULIEN, LORENZ F. (1949)<br>Self employed. | Lecturer in Marketing |
| GELCHER, JOSEPH (1946)<br>Insurance underwriter. | Lecturer in Insurance |

| GRECO, ANTHONY (1950)<br>Self employed. | Lecturer in Physical Education |
| HARBERT, SELMA C. (1950)<br>M.A., Stanford University. | Lecturer in Speech Arts |
| HOSS, WENDELL (1950)<br>Professional musician. | Lecturer in Music |
| HOWARD, FRANCIS J. (1950)<br>Scripps Institution of Oceanography. | Lecturer in Physics |
| HUFF, GEORGE D., M.D. (1939)<br>Practicing physician. | Lecturer in Health and Hygiene |
| KARPINSKI, CHARLES E. (1949)<br>Attorney at Law. | Lecturer in Commercial Law |
| KRUSE, PAUL J. (1949)<br>Ph.D., Columbia University. | Lecturer in Education |
| LINDSLEY, BYRON F. (1947)<br>Attorney at Law. | Lecturer in Commercial Law |

LLOYD, STANLEY J., M.D. (1950)----------Lecturer in Bacteriology
Practicing physician.

McLEES, BERTRAM (1946)----------Lecturer in Commercial Law
Deputy District Attorney.

MULLENIX, CARLOS W. (1950)----------Lecturer in Musi
Professional musician.

SARKISIAN, SARKIS S., M.D. (1949)----------Lecturer in Bacteriolog
Practicing physician.

SLOBIN, HERMON L. (1949)----------Lecturer in Mathematic
Ph.D., Clark University. Deceased February, 1951.

STANIFORTH, ROBERT O. (1948)----------Lecturer in Commercial Law
Swing & Scharnikow, Attorneys.

STEINBERG, WILLIAM (1949)----------Lecturer in Educatio
San Diego City Schools.

SYLVESTER, HELEN K.----------Lecturer in Educatio
Principal, Euclid School. A.B., San Diego State College.

TROGE, RALPH F.----------Lecturer in Educatio
Principal, Woodrow Wilson Junior High School. Ed.D., University of Oregon.

WESSEL, MARK (1950)----------Lecturer in Musi
Professional musician.

WILSON, JAMES F. (1951)----------Lecturer in Educatio
San Diego City Schools.

## RETIRED FACULTY

(Date following name indicates date of retirement)

HARDY, EDWARD L. (1935)----------President Emeritu
AULT, JESSE W. (1948)----------Dean of Education; Professor of Educatio
BELL, GERTRUDE S. (1938)----------Professor of Psycholog
HAMMACK, EDITH CHASTAIN (1950)----------Associate Professor of Educatio
JOHNSON, MYRTLE (1946)----------Professor of Biolog
KELLEY, GENEVIEVE (1949)----------Senior Libraria
LIVINGSTON, GEORGE R. (1949)----------Professor of Mathematic
MOLITOR, VINNIE CLARK (1938)----------Associate Professor of Geograph
SKILLING, W. T. (1936)----------Professor of Astronom
SMITH, LEILA DEBORAH (1948)----------Professor of Musi
TANNER, JESSIE R. (1936)----------Associate Professor of Physical Educatio

## MEDICAL STAFF*

HAROLD G. CARTER, M.D.----------Physicia
CARL H. ENGLER, M.D. †----------Physicia
O. S. HARBAUGH, M.D.----------Physicia
ROBERT B. PAPPENFORT, M.D.----------Physicia
JAMES R. PHALEN, M.D.----------Physicia
ERNEST W. SHAW, M.D.----------Physicia
FRANCES M. WHITE, M.D.----------Physicia
MARILYNN M. FENWICK, P.H.N.----------Nur

---

* All physicians serving part-time.
† On leave.

## ADMINISTRATIVE OFFICE STAFF

KATHLEEN B. ANDERSON----------Secretary, Social Sciences Divisi
LETHA BALDWIN----------Intermediate Stenographer-Clerk, Librar
JANE C. BORDNER----------Secretary, Supervisor of Buildings and Groun
DEON BROKAW----------Secretary, Extension Servic
ANNE T. BROWN----------Evaluations Secreta
NATALIE R. CAMERLYNCK----------Junior Typist-Clerk, Registrar's Offi
EVADNE DEARDORF----------Assistant Registra
SUE W. DYCK----------Mimeograph Offi
GERTRUDE K. DICKINSON----------Bookkeeper, Grade 2, Business Offi
HOPE S. FIRESTONE, B.S.----------Secretary, Evaluations for Teaching Credentia
ANNIE FONG----------Secretary, Health, Physical Education and Recreation Divisi

BERKELEY FREEMAN----Assistant Secretary, Personnel Services
GENEVIEVE M. HAMBLEN----Secretary, Personnel Services
ELIZABETH M. HARRISON----Book Repair Clerk, Library

# CALENDAR 1952-1953

## SUMMER SESSIONS, 1952

Term I (6 weeks) June 23–August 1
Term II (3 weeks) August 4–August 22

## FALL SEMESTER, 1952-1953

| | |
|---|---|
| July 19 | Qualifying examinations for all entering students (8.15 a.m.) |
| August 1 | Applications for admission must be filed on or before this date. |
| August 25 | Qualifying examinations for all entering students (8.15 a.m.) |
| September 10 | Fundamentals test and General Culture test for Teacher Education. (Fundamentals test, 8.30 a.m. to 12 m.) (General Culture test, 1 p.m. to 4.30 p.m.) |
| September 10, 11, 12, 15 | Orientation program. Attendance required of all new students. |
| September 16-17 | Registration and payment of fees. |
| September 18 | Instruction begins. Late registration fee becomes effective. (For evening program, see Extended Day and Extension Class Bulletin). |
| September 30 | Applications for admission to Teacher Education, Little Theatre, 11 a.m. |
| October 2 | Last date for late registration. Last date to apply for refunds. |
| October 2-3 | File registration books. Late filing fee effective October 4. |
| October 3 | Last date for filing applications for mid-year graduation. |
| October 8 | Last date for late filing of registration books. |
| October 24 | End of first six-week period. Deficiency notices due. |
| November 7 | Last date for withdrawal from classes. |
| November 11 | Armistice Day—holiday. |
| November 27-29 | Thanksgiving recess. |
| December 5 | End of second six-week period. Deficiency notices due. |
| December 8 | File applications for June graduation. |
| December 12 | Last day before Christmas recess begins. |
| December 15-January 2 | Christmas vacation. |
| January 5 | Classes resume. |
| January 29-February 5 | Semester examinations. |
| February 5 | Fall semester ends. |

## SPRING SEMESTER, 1952-1953

| | |
|---|---|
| January 2 | Applications for admission must be filed on or before this date. |
| January 10 | Qualifying examinations for all entering students (8.15 a.m.) |
| February 9 | Fundamentals test and General Culture test for Teacher Education. (Fundamentals test, 8.30 a.m. to 12 m.) (General Culture test, 1 p.m. to 4.30 p.m.) |
| February 10-11 | Orientation program. Attendance required of all new students. |
| February 12 | Lincoln's birthday—holiday. |
| February 13, 16 | Registration and payment of fees. |
| February 17 | Instruction begins. Late registration fee becomes effective. (For evening program, see Extended Day and Extension Class Bulletin). |
| February 23 | Holiday for Washington's birthday. |
| February 24 | Applications for admission to Teacher Education, Little Theatre, 11 a.m. |
| March 3 | Last date for late registration. Last date to apply for refunds. |
| March 4-5 | File registration books. Late filing fee effective March 6. |
| March 6 | Last date for filing applications for June or summer graduation. |
| March 9 | Last date for late filing of registration books. |
| March 27 | End of first six-week period. Deficiency notices due. |

| | |
|---|---|
| March 27 | Last day before Spring recess begins. |
| March 30-April 3 | Spring recess. |
| April 6 | Classes resume. |
| April 17 | Last date for withdrawal from classes. |
| May 15 | End of second six-week period. Deficiency notices due. |
| May 30 | Memorial Day—holiday. |
| June 11-18 | Semester examinations. |
| June 18 | Spring semester ends. |
| June 19 | Commencement. |

## SUMMER SESSIONS, 1953

| | | |
|---|---|---|
| Term I | (6 weeks) | June 29–August 7 |
| Term II | (3 weeks) | August 10–August 28 |

# FEES AND EXPENSES

## PROBABLE EXPENSES FOR ONE SEMESTER

An estimate of the expense of attendance for one semester is given below. No estimate is made as to the cost of clothing, or other personal items, since these figures vary with the demands of the individual.

### A Partial Estimate of Expenses
One Semester

| | *Minimum* | *Maximum* |
|---|---|---|
| Fees | $24.00 | $31.50 |
| Books | 18.00 | 30.00 |
| Board and room | 275.00 | ---- |
| Transportation, lunches, incidentals | 20.00 | 60.00 |
| Miscellaneous | 5.00 | |

Before enrolling in college, the student should possess sufficient resources to meet the minimum expenses for one semester. A limited amount of clerical work in offices and in the library may be offered from time to time but ordinarily it is not sufficiently remunerative to reduce expenses materially.

### Enrollment Fees Payable at Time of Registration

Regular students (carrying more than 6 units):

Auditors pay same fees as students carrying courses for credit.

| | |
|---|---|
| Tuition | $6.50 |
| Materials and service | 7.50 |
| Total | $14.00 |

Limited students (carrying 6 units or less):

Auditors pay same fees as students carrying courses for credit.

| | |
|---|---|
| Tuition (one, two, or three units) | $5.25 |
| Materials and service | 2.25 |
| Total | $7.50 |
| Tuition (four, five, or six units) | $6.50 |
| Materials and service | 7.50 |
| Total | $14.00 |

Student activity fee (not a state fee):

| | |
|---|---|
| Regular students | $10.00 |
| Limited students | 2.00 |
| Associated Students Group Accident Insurance | |
| Men | 3.50 |
| Women | 2.50 |

### Miscellaneous Fees
(Fees payable when service is rendered)

| | |
|---|---|
| Change of program | $1.00 |
| Failure to meet administratively required appointment or time limit | 2.00 |
| Evaluation of records for nonmatriculated students | 2.00 |
| Late registration | 2.00 |
| Transcript of record (first copy free) | 1.00 |
| R. O. T. C. deposit (unexpended portion is refundable) | 10.00 |

### Graduation Fees

| | |
|---|---|
| State teaching credentials (each credential) | $4.00 |
| Diploma | 1.00 |

The credential fee is collected through the college by cashier's check or post office money order made payable to the State Department of Education.

### Summer Session Fees

| | |
|---|---|
| Tuition, each session (Per unit) | $7.50 |
| Activity fee (not a state fee) | 2.00 |

# THE COLLEGE

## FUNCTIONS OF THE STATE COLLEGES

The state colleges have three major functions, namely: (1) To help the individual student to develop a well-rounded and adjusted personality; (2) to promote in all students civic intelligence and competence; and (3) to create supplies of trained men and women to serve as teachers and officials in the elementary and secondary schools, to fill places of leadership in business and industry, and to transfer to graduate institutions to equip themselves to extend the frontiers of knowledge and to occupy the positions of leadership in various professions. In terms of publicly supported higher education, the state colleges and the university together make provision for the realization of all the essential objectives of higher education in our State.

To achieve their unique purposes the state colleges have developed and are improving offerings as follows:

1. Teacher education curricula for those students who plan to teach, supervise, or administer in the elementary school, the junior high school, and in secondary schools.
2. Preprofessional curricula.
3. Four-year curricula in such fields as business, industry, governmental services, homemaking, and social service.
4. General education for students who take work which leads toward the bachelor's degree or to the higher professions through graduate work.
5. Guidance services to assist the individual student to plan his educational program and to make his college and life adjustments.
6. Extension courses in appropriate fields.

The democratic controls exercised over the state colleges make them readily and effectively responsive to individual and community needs and encourage them continuously to make significant improvements in both curriculum and personal services. The state colleges are thus laboratories in which the facts and theories developed in research, in community living, and in daily association with students are reflected in an instructional program designed to provide educational services inherent in the principle of equality of opportunity.

## LOCATION AND ENVIRONMENT

Renowned as a winter resort with a mild but invigorating climate, San Diego has become equally famous for its cool summers. High cultural standards in art, music, literature, and science create a stimulating environment for a college. Many of these advantages are to be found in the heritage resulting from the expositions of 1915-16 and 1935-36, including the buildings themselves, which portray the best types of Spanish colonial art and architecture. Housed in these buildings are the Fine Arts Gallery, exhibits in anthropology, natural history, and American archaeology, which are in many respects unsurpassed. The outdoor organ, the Balboa Bowl, and the horticultural gardens make Balboa Park, in which all these facilities are located, world renowned. The Scripps Institution of Oceanography, operated by the University of California at La Jolla, gives opportunity for important cooperation in the biological sciences.

## BUILDINGS AND EQUIPMENT

On February 1, 1931, the college was moved to the new campus, located one mile north of the city's principal east-west boulevard, El Cajon Boulevard. The buildings are of Spanish-Moorish architecture which is well suited to the landscape and climate of this region. They include the Academic Building (which houses lecture halls, classrooms and administrative offices); the Science Building; the Fine Arts Building; the Library; the Little Theater; the Music Building; the Campus Elementary School; Scripps Cottage (a social clubhouse for women students); the Cafe and Book Store; and the Physical Education Building (a structure with adequate facilities for both men and women). The gymnasium contains a very fine basketball floor with stands that will accommodate 1,500 spectators. A fine concrete stadium, constructed in a natural site, has a seating capacity that is adequate for present needs. The open air theater, seating 4,200 persons, serves as a meeting place for large groups.

## FACILITIES FOR THE EDUCATION OF TEACHERS

The college maintains a modern elementary school on the campus where it has developed an extensive program for the education of elementary school teachers. The classroom-laboratory plan which calls for the use of work-rooms, the library, and shops affords unusual opportunities for the induction of students into teaching. By arrangement with the San Diego city and county schools, directed teaching is provided in the elementary and secondary schools.

## THE FACULTY

The faculty of 203 members has received advanced training in some 124 colleges and universities of the United States or foreign countries. The professional education of the faculty places the college at the 97 percentile position among teacher education institutions in the Nation. For listings and further details, see the Directory.

## THE LIBRARY

The library facilities of this college are noteworthy for an institution of its size. The library consists of over 150,000 volumes and receives more than 900 different periodicals selected to meet the requirements of a modern educational institution. Professionally trained librarians are available to render assistance to students and faculty in their reading and reference work.

The Campus Elementary School Library, representing a collection of 15,000 volumes, possesses equipment and building facilities that are unique.

## ACCREDITATION

San Diego State College is a member of the American Association of Colleges for Teacher Education and the Western College Association.

## LIVING ACCOMMODATIONS

Living arrangements for students whose homes are not in San Diego or within commuting distance are made through the offices of the Dean of Women or the Dean of Men. Women students are urged to live in the residence hall adjoining the campus. Careful consideration is given to study conditions, healthful living, and adequate social opportunities. Room and board may be secured for approximately $275 per semester, payable in four installments. Opportunities to reduce this figure by working a few hours each week are occasionally available. Reservations should be made in advance through the Manager of Quetzal Hall, 5192 College Avenue, San Diego 15, California. Single women students under the age of 21 who find other accommodations more desirable must file with the Dean of Women a statement from the parent or guardian.

## VETERANS' EDUCATION AND HOUSING

The college has been approved by various accrediting agencies to offer courses for veterans leading to the baccalaureate in some 25 major fields and to the master's degree and various teaching credentials. In connection with the Personnel Services Center, a veterans' office is maintained on the campus to facilitate registration, aid in the establishment of benefits, afford special counseling services, and serve as an information center.

Through the City of San Diego, 400 family units formerly under the jurisdiction of the Federal Public Housing Authority have been made available to the college for the housing of its married veterans. These units are located some eight miles from the campus proper at Aztec Terrace, midway between Old Town and Loma Portal. Applications for housing at Aztec Terrace are made through the office of the Dean of Men.

## STUDENT ACTIVITIES

A rich field of extracurricular activities is made possible through the Associated Students. The *Student Handbook*, available at the time of registration, gives information concerning the nature and scope of these opportunities. During the college year of 1951-1952, seven governmental organizations, six service organizations, 31 departmental and honorary organizations, 12 religious organizations, 16 national fraternities, and 11 national sororities were officially recognized on the campus. Full programs of intramural and intercollegiate athletics are likewise maintained. Students are urged to select extracurricular activities carefully in order to receive optimum benefit from group experiences and to maintain continuous records of good scholarship.

## STUDENT HEALTH SERVICE

As a part of the program of Student Personnel Services, the college provides health services for the protection and maintenance of student health. These health services, under the direction of a medical doctor assisted on a part-time basis by several medical specialists, are available to students for consultation, treatment of minor physical difficulties and emergencies, and counsel as to additional proper procedures. Two full-time nurses are on duty, one of whom, a public health nurse, has charge of the health service unit. During the weeks the college is in session students may obtain appointments with specialists who are on duty.

A complete physical examination is required of each student at the time of admission to the college. Careful attention is given to students undergoing private remedial treatment and to those for whom a modification of study load or amount of participation in physical activities seems advisable. A follow-up procedure is in effect for students who have been urged to consult their family physician for correction of defects found in the examination.

Physical examinations are likewise required of and provided for all teacher education students at time of admission to and graduation from the various credential programs. They are also required before students are authorized to participate in the organized program of intramural recreation or in intercollegiate athletics. A college physician is present at all major athletic contests, and on call in case of need for other regularly scheduled events.

A group plan of accident insurance is available through the Associated Students at the time of registration for students who desire such protection.

## PERSONNEL SERVICES CENTER

The college offers the services of a trained staff to students who wish help in the solution of problems which are personal, social, academic, or occupational in nature. It is a program designed to help students gain the greatest possible advantage of their college experience. Agencies and facilities cooperating in the effort to assist students include the student health service, reading and study laboratory, the speech improvement program, mathematics clinic, the placement and occupational guidance service, and a staff of personal counselors. Students who wish to take advantage of these facilities may do so through the Personnel Services Center.

## PLACEMENT OFFICE

The Placement Office provides a central source of information on placement opportunities and vocational trends. The staff assists undergraduates in finding part time employment. Full time employment for graduates or former students is facilitated through contacts with schools, businesses, and industries in this locality.

## SCHOLARSHIPS

A number of scholarships for both men and women has been made available through the efforts of the alumni, civic organizations, student organizations, business and professional groups and individuals, and other friends of the college. Superiority in ability and achievement, strength of character, and worthiness from the point of view of need are the standards upon which selection is based. Scholarship aid is limited for the most part to students who have completed at least one semester at the San Diego State College. Except for athletics grants-in-aid, which are initiated through the Director of Athletics, scholarship applications are made through the office of the Dean of Women.

Unless otherwise stipulated, all scholarship awards are determined and announced by the faculty Committee on Loans and Scholarships in October of the college year. Applications for scholarships for the fall semester must be filed with the office of the Dean of Women prior to October 15th. The scholarships available for 1952-53:

**ALPHA GAMMA DELTA.** This sorority presents a $50 award each year to the student in the sorority with the highest grade point average.

**ALTRUSA CLUB.** Two scholarships of $50 each are made available annually by the Altrusa Club of San Diego. Applications are considered from women students enrolled in San Diego State College who are worthy and in need.

**AMERICAN ASSOCIATION OF UNIVERSITY WOMEN.** One scholarship of $100 is given each year in June to a graduating senior who will begin work in an accredited college or university toward a higher degree or credential. The scholarship is made available by the San Diego Branch of the American Association of University Women. Interviews with representatives of that organization are required.

**AMERICAN ASSOCIATION OF UNIVERSITY WOMEN, INTERNATIONAL RELATIONS SECTION.** This section of the San Diego Association aids an international student attending San Diego State College with awards of from $50 to $100 a year. The student is chosen by the International Relations section with the approval of the Committee on Loans and Scholarships.

**AMERICAN ASSOCIATION OF UNIVERSITY WOMEN, EL CAJON VALLEY BRANCH.** An annual scholarship of $50 is presented to a young woman entering San Diego State College. Selection for the award is made by the club.

**ANONYMOUS (B).** A scholarship of $100 is given each year to be divided among students in financial need, at the discretion of the Committee on Loans and Scholarships. The committee gives consideration to scholastic attainment, financial need, and character.

**ANONYMOUS (E).** A $50 scholarship, awarded each semester through the Committee on Loans and Scholarships, is made available by a public spirited citizen who prefers to assist a student majoring in science.

**ASSOCIATED ARTS OF SAN DIEGO.** A $150 scholarship for a period of two years to a student outstanding in the Speech Arts Department.

**ASSOCIATION OF CHILD EDUCATION.** The Association of Child Education makes available each year a $50 scholarship to a student in the Kindergarten-Primary program. The award is customarily made to an upper division student showing promise in a particular field who is in need financially.

**BARNES CHASE COMPANY BASEBALL SCHOLARSHIP.** Donated by Mr. and Mrs. Norman R. Barnes. Twenty-five dollars a month for 10 months, from September through June. Applicant must be officially enrolled in the college as a regular student in good standing; must maintain a satisfactory scholastic record and be progressing toward an academic objective; must be a member of the freshman or varsity baseball team; and be of sound moral character. The selection of the recipient will be recommended by the baseball coach and approved by the athletic department with the final approval of the Committee on Loans and Scholarships.

**BARNES CHASE COMPANY BASKETBALL SCHOLARSHIP.** (Same as above except for basketball player.)

**BLUE KEY.** Two scholarships of $50 each shall be given annually; one each term. One shall be awarded an entering male freshman student, preferably from San Diego County. The other scholarship will be awarded to a male student in the lower division who has completed at least one semester (12 units) of work at San Diego State College. Selection will be made by the Committee on Loans and Scholarships.

**CABRILLO CIVIC CLUBS.** A scholarship of $250 a year will be awarded a student of Portuguese descent and may be made available in his senior year of high school. The recipient must have good scholastic standing and be in need of financial assistance. An autobiography must accompany the application.

**CAP AND GOWN.** One $50 scholarship is awarded annually to an upper division woman student who has attended San Diego State College for at least one semester and who has maintained at least a "B" average in scholarship for her entire college career. Applications may be secured from the Office of the Dean of Women or the San Diego State College chapter of Cap and Gown.

**CHIANELLI, FRANK.** A $50 scholarship is donated by Sons of Columbus in memory of the founder of this organization in California. The student must be of Italian descent, of good moral character, in need of financial assistance, and have a high scholastic rating.

**CHI OMEGA FRATERNITY** awards annually a $20.00 scholarship to a student outstanding in Sociology Department.

**DANCE CLUB OF SAN DIEGO STATE COLLEGE.** The Dance Club of San Diego State College has established a $50 scholarship to be awarded an outstanding dancer from the club to be used for tuition at a recognized summer school of the dance.

**DAUGHTERS OF THE AMERICAN REVOLUTION.** Two scholarships of $25 each are presented each spring, one to a young man and the other to a young woman outstanding in citizenship and Americanism. Applicants should have at least a "B" average in scholarship, should be able to demonstrate need for financial assistance, and should have junior standing in the college when selected. The selection is made by the faculty Committee on Loans and Scholarships and presentation of awards is made at a luncheon on Flag Day, which is given by the Daughters of the American Revolution.

**DEBATE SCHOLARSHIP.** $50 will be given to a student enrolled at San Diego State College who is outstanding in debate. Selection will be made by the Speech Arts Department with final approval by the Committee on Loans and Scholarships.

**DELTA DELTA DELTA NATIONAL FRATERNITY ALLIANCE.** $100 a year will be given for five years in memory of Georgia Aiman Shattuck. This scholarship is to be awarded to a woman student, in the upper division, who has been admitted to the teacher education curriculum, with a "B" average in all college work, and who is in financial need. Applications should be secured from the Office of the Dean of Women.

**ESCONDIDO BUSINESS AND PROFESSIONAL WOMENS CLUB.** Two $100 scholarships are given anually to two high school graduates who plan to attend San Diego State College. These students are selected by the club on basis of good citizenship, good grades and participation in activities.

**FACULTY DAMES.** Two scholarships of $50 each are given annually to deserving women students selected by the Loans and Scholarships Committee.

**FLEMING, HARVEY, GOLF.** Through a trust fund set aside for awards to exceptional golf players who enroll in college, scholarships of $250 are given. This is a competitive award.

**FOOTHILL BUSINESS AND PROFESSIONAL CLUB.** Two $50 scholarships will be awarded to young women students entering San Diego State College from Grossmont High School.

**FOOTLIGHTS THEATRE, INC.** Annual awards of $50 each are made to members of this Little Theatre group who do outstanding work in dramatic arts.

**FRESHMAN CLASS, 1951-1952.** Two scholarships of $50 each will be awarded in the fall of 1952, one to an entering freshman man and one to an entering freshman woman. The scholarships will be awarded to students who have demonstrated leadership in high school activities. Final selection will be made by the Committee on Loans and Scholarships.

**HALE, E. T., ATHLETIC SCHOLARSHIPS.** $25 a month or more is donated for use of the Athletic Department in scholarships to outstanding athletes.

**JONES, SYBIL ELIZA MEMORIAL.** A scholarship of $100 is awarded annually to a student in drama. Applicant must be officially enrolled in at least his fourth semester in speech and drama with participation in dramatic productions on the campus. He must have at least a "C" average in all college work. Applications are made to the Speech Arts Department for action and awards are made after approval of the faculty Committee on Loans and Scholarships.

**KAPPA ALPHA PSI FRATERNITY—SAN DIEGO ALUMNI.** An annual $50 scholarship ($25 per semester) is awarded a student graduating from high school for fees at San Diego State College. The fraternity makes the selection.

**KAPPA BETA NU.** A $100 scholarship is offered annually to a junior or senior woman student in elementary teacher education. Applicant must be a resident of San Diego County who is in financial need. Final selection rests with a scholarship committee of Kappa Beta Nu.

**KAPPA DELTA PI.** Two $25 scholarships are awarded annually by Kappa Delta Pi of San Diego State College. Selection for awards is made by the group.

**KAY JEWELERS SCHOLARSHIP.** $30 a semester for eight semesters is awarded an entering freshman. This scholarship is to be given alternating years to men and women students. In the fall semester, 1952, the scholarship will be awarded to a young man. Selection is made by the Committee on Loans and Scholarships from applications received from high school students.

**KNIGHTS TEMPLAR EDUCATIONAL FOUNDATION OF CALIFORNIA.** Ten scholarships of $50 each will be given annually to students enrolled at San Diego State College. Applications are received by the Committee on Loans and Scholarships of the College. Final awards are made on basis of ability, need, and personality, with preference shown upper division students.

**LA MESA EVENING WOMEN'S CLUB.** A $75 scholarship is awarded a senior in high school who is entering San Diego State College. Selection is made by the club.

**LINKLETTER, ART.** Each June four $50 awards will be made to students graduating from San Diego City and County high schools: (1) one to a girl and one to a boy graduating from high schools with enrollment of 1,000 or over; and (2) one to a boy and one to a girl from high schools with enrollment under 1,000. Applications must be sent to the Committee on Loans and Scholarships of the College. Selection is based on scholarship, citizenship, and need.

**MARCY, MAY FINNEY.** Fifty-dollar scholarships are awarded from this fund to women students in upper division. Applications are made to the Dean of Women and awards made upon recommendation of the faculty Committee on Loans and Scholarships to Mrs. Marcy and a committee of members of Cap and Gown on San Diego State College campus.

**NOMA SCHOLARSHIP.** Presented by the National Office Management Association. $100 a year is provided to a student planning to major in Office Management. The scholarship will be restricted to students desiring to major in Office Management beginning with their junior year. Applications may be secured from the Office of the Dean of Women or the Chairman of the Department of Business Education, Secretarial and Office Management, not later than May 15th each year. The student chosen will be notified by June 10th.

**NORTH PARK KIWANI-ANNES.** One scholarship of $50 a semester for a year is awarded annually by this group to a male student preparing for teaching. The recipient must have at least junior standing at the time and be approved by the Committee on Loans and Scholarships.

**OSTEOPATHY AUXILIARY** of San Diego County awards annually $100 to a student who has graduated from San Diego State College and has been accepted for enrollment in the College of Osteopathy in Los Angeles.

**PANHELLENIC OF SAN DIEGO STATE COLLEGE.** $50 is given annually to the sorority member who has made the highest grade point average in the fall semester.

**P. E. O. SCHOLARSHIPS.** Various chapters of this organization assist worthy students in amounts ranging from $15 a month to $50 a semester. Usually the selection for the awards is made by the chapter itself.

**PI LAMBDA THETA.** An annual scholarship of $50 will be given to a senior student in education. The selection will be made by the fraternity with approval of the Committee on Loans and Scholarships.

**SAN DIEGO BUSINESS AND PROFESSIONAL WOMEN'S CLUB.** A $50 scholarship is awarded annually to a worthy young woman attending San Diego State College having at least a "C" average.

**SAN DIEGO CITY PANHELLENIC.** Two $50 scholarships are awarded annually to two upper division women students. Applications are made through the faculty Committee on Loans and Scholarships and selection is left to the discretion of the committee.

**SAN DIEGO CITY TEACHERS ASSOCIATION.** Two scholarship of $50 each are presented each year to prospective teachers with no restrictions as to college year. Applications are made on forms supplied by the San Diego City Teachers Association and are reviewed by the association's committee on scholarships. Personal interviews are required, and final selection is made by that committee.

**SAN DIEGO COUNTY TEACHERS ASSOCIATION.** From two to four $100 scholarships are made available annually by this group of teachers. Awards are made to students in the field of elementary education and final selection rests with the Committee on Loans and Scholarships.

**SAN DIEGO SOCIAL WORKERS CLUB.** A scholarship of $50 each semester is made available for an upper division student intending to enter the field of social work, who has above average scholarship and shows evidence of financial need. Awards are made each semester by the Committee on Loans and Scholarships. Applications may be secured at the Office of the Dean of Women.

**SENN, PERCIE BELL, SCHOLARSHIP IN PUBLIC SPEAKING.** An annual scholarship is made possible by the generosity of Admiral Elliott Senn, who has donated $1,500 to the San Diego State College Foundation for the purpose of assisting students in public speaking. This will be awarded to an entering freshman or any qualified student in the field of debate. Awards are made by a committee appointed from the Speech Department, with the final approval of the faculty Loans and Scholarships Committee.

**SOUTHLAND CLUB SCHOLARSHIP.** $50 award made available by the Southland Club for Business and Professional Women to a junior or senior woman student who plans to enter business or a profession. The student must have at least a "B" average; she must have been graduated from a San Diego City or County high school and must be of good moral character and in financial need. Applications made at the Office of the Dean of Women and approved by the Committee on Loans and Scholarships.

**STEINMAN-HILLEL.** Mr. and Mrs. Lou Steinman, members of the San Diego Lasker Lodge of the B'nai B'rith, which sponsors the Hillel organization on the San Diego State College campus, have set aside $400 for scholarships, $50 to be awarded annually for the next 8 years to a student who has done the most to further the cause of interfaith cooperation among the students of the campus. The selection of the awardee shall be made by a committee of three judges.

**STOTT, DOROTHY CRANSTON.** Each June a scholarship of $100 will be awarded to a student who has attended the San Diego State College for at least two years and who is being graduated or has been graduated by the San Diego State College with a major in English who begins or continues work in the San Diego State College, or in any other accredited college or university, towards a higher degree or credential. The selection is made by the Department of English with approval by the Committee on Loans and Scholarships.

**STOTT, K. W.** Each June a scholarship of $100 will be awarded to a student who has attended the San Diego State College for at least two years and who is being graduated or has been graduated by the San Diego State College with a major in History who begins or continues work in the San Diego State College, or in any other accredited college or university, towards a higher degree or credential. The selection is made by the Department of History with approval by the Committee on Loans and Scholarships.

**TEACHER EDUCATION SCHOLARSHIP.** The California Congress of Parents and Teachers, Inc., each year gives $300 to be awarded to one or two students. Selections are made upon the following conditions: (1) The recipient must have high qualifications and be in financial need; (2) The scholarship will be granted to students training to teach in the public elementary schools of California; and (3) The award shall be limited to students in the junior and senior years and graduate level.

**TOWN AND COUNTRY CLUB, ESCONDIDO, CALIFORNIA.** A $200 scholarship is given an outstanding student graduating from Escondido High School who plans to attend San Diego State College. Qualifications for this award and final selection are made by the Town and Country Club.

**VISTA BUSINESS AND PROFESSIONAL WOMEN'S CLUB.** $100 scholarship made available to one or more International students to assist them with tuition fees.

**WALKER, RALF MARC.** A scholarship in the amount of $500 is made available by the Walker-Scott Corporation in memory of the late Mr. Ralf Marc Walker to a woman student majoring in merchandising or retail trade at the San Diego State College. The scholarship is presented to a girl in Walker's Hi-Debber Council each year. The total scholarship is deposited in the San Diego State College Foundation and is handed to the recipient at the rate of $50 a semester for each of the first three years and $100 a semester for the two senior semesters.

**WEINBERGER, HENRY, INTERFAITH SCHOLARSHIP.** A scholarship of $100 is awarded in April of each year to the student of any religious faith enrolled at the San Diego State College who is judged to have done the most to further interfaith ideals among the students of the college during the year of the award. This scholarship is made available by Mr. Henry Weinberger of the Lasher Lodge of B'nai B'rith, under auspices of the B'nai B'rith-Hillel Councilorship on San Diego State College Campus.

**WOMEN'S AUXILIARY OF SAN DIEGO DENTAL SOCIETY.** An annual award of $100 is made available by the Women's Auxiliary of San Diego Dental Society to an outstanding male student in pre-dentistry.

## LOANS

Short term loans are available to students who have attended the San Diego State College for at least one semester and who have demonstrated ability to do satisfactory college work. Applications for loans are made to the Committee on Loans and Scholarships through the Office of the Dean of Men or Dean of Women.

# ADMISSION AND REGISTRATION

## GENERAL ADMISSION REQUIREMENTS

High school graduates and other applicants possessing equivalent preparation may be admitted to this college upon evidence of fitness to profit by college instruction, such fitness to be shown by previous scholastic records, by evidence of good moral character and personal qualifications, and by satisfactory scores on tests which the college may require.

Application for admission should be made at the Admissions Office.

## ADMISSION OF HIGH SCHOOL GRADUATES

(1) A high school transcript must be presented showing satisfactory scholarship, and (2) applicants must demonstrate readiness for college instruction by making satisfactory scores on such tests as the college may designate.

**Regular status** will be granted if the student has earned A or B grades in not less than 16 semester courses during the tenth, eleventh, and twelfth grades.

**Provisional status** will be granted if the student has earned A or B grades in not less than 12 semester courses during the tenth, eleventh, and twelfth grades. Individuals who fall slightly below the above standard may be admitted to provisional status if qualifying examination scores indicate probable success in college. One year is allowed for transfer to regular status which may be attained upon completion of 24 or more units of college work with grade average of C or better. Full credit is allowed for all regular college work completed.

## ADMISSION BY EXAMINATION

Certificates of successful examination before the College Entrance Examination Board will be accepted when candidates cannot meet the above scholarship requirements.

## ADMISSION OF ADULTS TO SPECIAL STATUS

**Adult special status** may be granted, in exceptional cases, to persons over 21 years of age who do not fully meet the college entrance requirements provided that ability to do college work is satisfactorily demonstrated through qualifying examinations administered by the college. Such students may be transferred to regular status upon completion of 24 or more units of college work taken in residence with grade average of C or better. Full credit is allowed for all regular college work completed.

**Special students** are those students carrying courses in the Extended Day Program only or other students who may be granted permission to take limited work. Special students are not eligible as candidates for a degree until all entrance requirements have been met; however, courses satisfactorily completed carry full college credit.

**Special graduate students** are graduates who have not qualified for admission to graduate status. (See *Admission to Graduate Study.*)

## ADMISSION WITH ADVANCED STANDING

Credit earned in recognized institutions of collegiate grade will be evaluated and advanced standing allowed accordingly toward the graduation requirements of this institution. Applicants must show an average grade of C or better for all college work, for the last college attended, and for the last semester of attendance in order to qualify for regular status. A student who enters with advanced standing is one who has completed at least 12 units of passing work in another collegiate institution. However, no applicant may disregard his collegiate record and apply for admission only on the basis of his high school work. No credit earned after a student has accumulated 64 units of work in all types of collegiate institutions may be transferred from a junior college.

An applicant from an unaccredited college may be admitted by action of the Board of Admissions if his college record and qualifying examinations meet the admission requirements. Credits earned in unaccredited colleges or universities may be accepted provisionally, but will not be counted toward graduation requirements until the student has earned 24 semester units in residence with at least a C average.

Students seeking admission with advanced standing must furnish complete transcripts for all work attempted beyond the eighth grade. If an official evaluation is desired, a deposit of $2 must accompany the application and be received together with all transcripts at least 30 days before the date of registration. At least 45 semester units must be completed before a student may apply for an evaluation.

## ADMISSION TO GRADUATE STUDY

Admission to the college must first be secured. Apply at the Office of Admissions.

**Graduate status** may be granted to applicants who have regularly applied at the Office of Admissions and have filed official transcripts as evidence of their possession of a bachelor's degree from an accredited institution. Refer to master of arts degree and to Teaching Credentials.

**Graduate special status** is granted to those who are provisionally admitted to graduate study. It is given to a student (1) who has not completed all admission procedures required for graduate status and (2) to a student whose bachelor's degree was earned at an unaccredited college. A student from an unaccredited college will be eligible for graduate status when he has earned a grade point average of 1.5 on 12 or more units of approved upper division work at this college and has cleared all undergraduate deficiencies.

**Admission to candidacy** for the master's degree or for a teaching credential may be achieved by meeting the respective specific requirements. Refer to the section of the bulletin on the master of arts degree.

**Admission to courses numbered 200-299** requires graduate status and the meeting of specific prerequisites. A graduate student who may be permitted to enter a graduate course pending full graduate status will be given only upper division credit if graduate status is not achieved by the end of the term in which the course is given.

## DEGREES OFFERED

The following degrees are offered by the college: bachelor of arts, bachelor of science, bachelor of education, and master of arts.

## CERTIFICATES OFFERED

The following certificates are offered by the college: Certificate in Public Administration and Certificate in Social Work Administration. Requirements for these certificates may be completed in the extended day program. For further explanation of requirements, refer to the section of the bulletin on public administration.

## EXTENDED DAY PROGRAM

In order to meet the needs of adults in the community for work on the college level, courses are offered in the late afternoon and evening under an extended day program. These include both undergraduate and graduate courses and carry full college credit. Classes offered under this program consist of those courses normally scheduled as part of the regular college offerings and are taught by faculty of the college, but moved to a late afternoon or evening hour to permit in-service teachers, public personnel, businessmen, and others to attend. These courses cover a wide range of academic and educational subjects including education, business administration, public administration, engineering, and the sciences. A special bulletin describing the current offerings is issued each semester and may be obtained upon request from the Office of the Dean of Educational Services.

## EXTENSION PROGRAM

In order to serve more adequately the needs of the community, the college cooperates with off-campus organizations and groups in arranging extension classes in response to expressed needs when the group is sufficiently large to finance the instruction. Offerings are made each semester in a number of departments including education, business administration, and the arts and sciences. Classes may be organized at various points within San Diego and Imperial Counties. A minimum of 15 to 20 students is usually required in order to establish a class. The usual class carries two units of credit and meets once a week, either in the late afternoon or evening. The minimum basic fee is $6 per unit. Interested persons desiring detailed information regarding organization of classes or current offerings should contact the Dean of Educational Services.

## AUDITORS

Properly qualified persons may apply for admission to attend classes as auditors. Such students pay the same fees as those who take equivalent work for credit.

## TESTS REQUIRED AT REGISTRATION TIME AND LATER

1. A physical examination is required of all students entering or reentering the college after an absence of more than one semester, except that students carrying six units or less are not required to take the physical examination. This examination is scheduled during the orientation period.
2. All entering students are required to take a college aptitude test, and tests for competence in English, mathematics and in speech. Remedial courses are established in mathematics and speech for students failing these tests. Exceptions may be made for graduate students and for those who register for six units or less and for those registered only in Extended Day classes.
3. All entering freshmen and college transfer students who present less than 12 semester units of college credit must take the regular battery of achievement and aptitude tests, including tests for competence in English, mathematics, and speech. Remedial courses are established for students failing these tests.
4. Students entering teacher education should see admission requirements outlined under Admission to Teacher Education.

## LATE REGISTRATION

Students who register after the scheduled registration days are subject to a late registration fee of $2. Students may be accepted for late registration with the approval of the Registrar or Admissions Officer within two weeks beginning with the first day of class instruction. Registration will be closed after that date. Students failing to complete all registration requirements within the period allowed, as announced in registration instructions, are subject to cancellation of registration.

## CHANGES IN REGISTRATION

A student is responsible for any change in his program after the registration book has been filed. Forms for changes in program must be secured at the Registrar's Office. A fee of $1 is charged.

# GENERAL REGULATIONS

## INFORMATION

Inquiries relative to the college should be directed to the Registrar's Office.

## NUMBERING OF COURSES

Courses numbered 1 through 99 are in the lower division; those numbered 100 through 199 are in the upper division; and those numbered 200 or over are in the graduate division. Courses numbered 300 or over are professional education courses on the graduate level.

## SCHOLARSHIP, GRADES, AND GRADE POINTS

The following grades are used in reporting the standing of students at the end of each semester: A, excellent; B, good; C, fair; D, passed; F, failed; I, incomplete; E, conditioned (may be made up to grade of D); Cr. credit (without grade); WP, withdrawal passing; and WF, withdrawal failing.

Grades of I or E must be made up by the end of the next semester in which the student is registered; otherwise the grade of F will be recorded.

Grade points are assigned as follows: Grade A, 3 points per unit; B, 2 points per unit; C, 1 point per unit; D, no point per unit; F or WF, no point per unit. Grades of I, Cr, or WP are disregarded in computing grade points. The grade of E is treated as no point per unit until a final grade is recorded. The number of grade points a student has earned in a subject is determined by multiplying the number of points he has received by the number of units allowed. The grade point average is determined by dividing the grade points earned by the number of units attempted. A student must earn at least a C average in all work undertaken at the college to qualify for a degree or a transcript of record with recommendation to another collegiate institution. Any course may be repeated, but not for additional credit; however, only the second grade earned is considered in the student's average.

## CLASS, UNITS OF WORK, AND STUDY LIST LIMITS

Students who have completed 0 to 29 units of work are classified as freshmen; 30 to 59 units as sophomores; 60 to 89 units as juniors; and 90 or more as seniors.

A unit of credit represents 50 minutes of lecture or recitation combined with two hours of preparation per week through one semester, or three hours of laboratory or field work in the case of laboratory credit.

Students are not ordinarily permitted to enroll for more than 16½ units of credit toward graduation. A normal semester's program is 16 units.

Certain exceptions to this rule exist. If during the preceding semester the student has carried at least 12 units: (1) and a grade point average of at least 1.5 was earned, 17½ units may be carried for credit toward graduation; (2) and a grade point average of 2.0 was earned, 18½ units may be carried.

Exceptions to these regulations may be secured only through a petition to the Scholarship Committee.

No student may register for less than 12 units (the minimum full-time load) without the approval of the Dean of Instruction.

## PROBATION AND DISQUALIFICATION

### PROBATION

Any student whose scholarship record shows a cumulative deficit of seven or more grade points below a C average for all college work undertaken or for all work taken at this College will be placed on probation. Probation may be continued provided the student does not increase his grade point deficiency. The student will remain on probation until the grade point deficiency has been reduced below seven for all work undertaken and all work taken at this college.

A student in provisional status who does not reclassify to regular status upon the completion of 24 units of work will be placed on probation. Probation may be continued until the student is reclassified to regular status, provided the grade point deficiency is not increased.

A student with advanced standing from another college who has been admitted on probation by the Board of Admissions will remain on probation until all grade point deficiencies have been removed and an over-all grade point average of 1.0 has been attained.

### DISQUALIFICATION

Any student on probation whose scholarship falls belows a grade point average of 1.0 in any single semester is disqualified from further attendance at the college.

Any student who fails to pass one-half of the units attempted during any single semester is disqualified from further attendance at the college.

A disqualified student may be reinstated for reasons satisfactory to the Board of Admissions. Applications for reinstatement must be made on forms which may be obtained at the Office of the Registrar.

## WITHDRAWALS FROM CLASS

Forms for withdrawal from class may be obtained at the Registrar's Office. If a student withdraws from class during the first seven weeks of a semester, a grade of WP will be recorded upon his permanent record for each class which he has dropped. If he withdraws during the remainder of the semester, either a WP or WF will be recorded, depending on whether he is passing or failing the course at the time. WF is equivalent to a failing grade.

## TRANSCRIPTS OF RECORD

Students may secure upon request one transcript of record without fee. Thereafter, a fee of $1 is charged for each transcript secured upon request. Once a student has matriculated in this college, transcripts from other schools will not be returned, or copies of them made. No fees are charged for transcripts required for military purposes.

Transcripts in the possession of students are to be regarded as unofficial records.

## EVALUATIONS

An evaluation of credit for graduation should be requested by a student as soon as 45 units have been earned. Applications may be made at the Evaluations Office. Students having met all admission requirements for the arts and sciences or teacher education curricula, who are enrolled for seven units, or more, of college work in a regular semester, will not be charged the evaluation fee.

An evaluation remains in effect so long as a student completes 12 units of work at San Diego State College within each two-year period beginning wth the term immediately following the one in which the evaluation is made (includes summer session term). Any evaluation is subject to changes in requirements imposed on the College by the State Board of Education.

## ELIGIBILITY FOR DIRECTED TEACHING

No student shall be eligible for directed teaching (Education 116) leading to the kindergarten-primary, general elementary, general junior high, and special secondary credentials who has not completed 75 units, education course prerequisites, been admitted to Teacher Education, and whose entire record, as well as for the preceding semester, does not average at least a 1.2 for all credentials except the junior high and general secondary credentials which require a 1.5 grade average.

No student shall be eligible for directed teaching (Education 316) leading to the general secondary credential who has not been admitted to the teacher education program prescribed for admission to candidacy for this credential.

## THE HONORS PROGRAM

Any student who at the end of the sophomore year has either attained an over-all grade point average of 2.5 or who has attained a grade point average of 2.75 in his major and not less than 2.0 in fields outside his major, and who has received the approval of his department or departments, may elect the honors program. Such election will enable the student to pursue a special program as outlined below. Any student who feels that his qualifications approximate closely the scholarship standards stated above may request admission to the honors program, subject to the approval of his department or departments, and of the Committee on Honors.

Any student who wishes to apply for entrance into the honors program may do so by filling out cards to be obtained from the Registrar's Office. The application should be approved by the 10th calendar day following the first day of instruction. Units earned by students doing individual study under this plan will be recorded under the symbol 166 and will be subject to the formulated rules dealing with limitations of student load.

Students in the honors program, so far as the facilities of the department and the best interests of the students under its charge allow, shall be treated as benefits their individual needs and as their individual capabilities warrant. They shall be eligible to enroll in honors or special study courses, credit in such courses to be limited to six units per semester unless otherwise recommended by the major department or departments and approved by the Honors Committee. In addition, they shall not be held to regular attendance in the established courses of their departments if, in the opinion of the instructor, the objectives of such courses can be achieved through special assignments and examinations. With the consent of the major department or departments, requirements concerning minors and specific courses or sequences in the major may be modified. Each honor student shall be assigned to a member of his major department for advice and direction.

Students in the honors program who fail to take advantage of the opportunities there offered may at the end of any semester be required to withdraw from the honors program upon notification of the major department or departments. Students not in the honors program who show unusual capacity, may request to be transferred to the honors program contingent upon recommendation of the department and the Committee on Honors at the end of any semester.

## THE DEGREE WITH HONORS AND WITH DISTINCTION

Upon recommendation of the Committee on Honors, graduation with honors shall be granted to the upper 10 percent of the graduating class. Each department shall determine which students it will recommend for distinction in the major field at graduation, and report its recommendation to the Committee on Honors for transmission to the faculty.

## EXAMINATIONS

No final examination shall be given to individual students before the regular time. Any student who finds it impossible to take a final examination on the date scheduled must make arrangements with the instructor to have an incomplete grade reported and must take the deferred final examination not later than the end of the first semester of attendance following that in which the incomplete was given. No exception shall be made to this rule without the approval of the Dean of Instruction and the instructor concerned.

## CREDIT FOR EXTENSION COURSES

The maximum amount of extension credit which may be accepted toward the minimum requirements for the bachelor of arts or the bachelor of science degree is 24 semester units, not more than 12 of which may be transferred from another college or university. The term "extension credit" refers to both extension class work and work taken by correspondence. Extension credit does not count in satisfaction of the minimum residence requirement. **Extension courses are not accepted for graduate credit toward the master's degree.**

## CREDIT GRANTED FOR MILITARY SERVICE

The college is guided by the recommendations of the American Council on Education in granting undergraduate credit toward the bachelor's degree for military service.

# THE MASTER OF ARTS DEGREE

## NATURE OF THE DEGREE

The master of arts degree is offered at San Diego State College in the field of teaching and for other teaching and supervisory services. Students receiving the degree must hold a valid regular day school service California credential other than an emergency or provisional credential; or be a foreign citizen preparing to teach in foreign countries; or be a licensed teacher from another state with one year of experience; or be an approved applicant preparing to teach or supervise in institutions not requiring teaching credentials. Students may elect to concentrate in a subject-matter major or in education. The following areas of concentration are now available:

*Teaching Majors*: Art, chemistry, business education, English, foreign language, health and physical education, mathematics, music, history, life science (botany and zoology), physics, psychology, and social science.

*Education:* Elementary, secondary, administration and supervision, and student personnel services.

*School Psychologist and School Psychometrist:* Psychology or educational psychology.

*Personnel Supervision and Training:* For instructional and supervisory service in business, government, and industry.

## REQUIREMENTS

Students who meet the following requirements are eligible for graduation with the master's degree:

A. A minimum of 30 units of approved graduate work beyond the bachelor's degree. Thirty units must be completed within the seven year period immediately preceding the date when all of the requirements for the degree are completed. For justifiable reasons, the college may extend this period.

B. 24 units in residence. Courses taken prior to the summer session of 1946 at San Diego State College, or any other California State College, may **NOT** be used as graduate work.

C. Grade point average of 2.0 in all work taken after the bachelor's degree. Only grades of A, B, and C are acceptable toward the master's degree. (Marking system: Grade of A, 3 grade points; B, 2 grade points; C, 1 grade point; D, 0 grade points.)

D. Completion of the requirements for an approved California teaching credential, or the holding of one, such as the general elementary, general secondary, junior high, special secondary school, and school psychometrist credentials; or be a foreign citizen preparing to teach; or be a licensed teacher in another state, with one year of experience; or be preparing to teach or supervise in an institution which does not require a credential.

E. Satisfactory completion of the candidate's degree program as approved by the Graduate Council.

F. Satisfactory completion of a thesis or project, except in foreign language.

## ADMISSION TO GRADUATE STUDY

A. Graduate Status may be granted to applicants who have regularly applied and have filed official transcripts at the Office of Admissions as evidence of their possession of a bachelor's degree from an accredited institution. (Two transcripts must be filed by students who expect to become candidates for the master's degree.)

B. Provisional admission to graduate study (Graduate Special Status) may be granted to one who holds a bachelor's degree from an unaccredited college. Such a student will be eligible for Graduate Status when he has earned a grade point average of 1.5 on 12 or more units of approved upper division work at this college and has cleared all undergraduate deficiencies. Special status is given also to those students who have not completed the regular admission procedures.

C. Apply at the Office of Admissions for admission to the college. For further details, refer to the section of the bulletin on Admission and Registration.

## ADMISSION TO CANDIDACY

**A candidate for the master's degree must qualify as follows:**

A. **Apply for admission to candidacy at the Graduate Office. Students should apply** during the first graduate term in attendance.* Admission cannot be completed, **however, until the student has earned 12 units at San Diego State College, or six units if his undergraduate grade point average was 1.5 or better.**

B. **Earn and maintain a grade point average of 2.0 on all graduate work.**

C. Satisfactorily complete the following: (a) scholastic aptitude test for graduates, (b) scholastic achievement test, and (d) such departmental tests as may be required.

D. Receive approval of candidate's major department.

E. File with the Graduate Office a complete program of study, which has been approved by the adviser.

## GENERAL REGULATIONS

A. **Extension and correspondence courses are not acceptable toward the degree.**

B. **Maximum study load: Summer session, one unit per week of attendance; fall or spring, 15 units per semester of full-time attendance. If employed full time, five** units of courses numbered 100-199 or three units of courses numbered 200-298.

C. All candidates who are taking the degree with school service credentials must complete two units in Education 290 and one additional unit in a course in bibliography (290) in the major department. Candidates preparing to teach or supervise in institutions that do not require a credential will substitute an approved course in procedures of investigation and report.

D. Candidates in all majors, excepting foreign language, shall complete a project or thesis, for which three units of credit are allowed. Foreign language students must pass a comprehensive examination; they shall, however, complete eight units of "200" numbered courses as specified below.

E. The minimum requirement for a concentration in a major shall be: (1) eight units of courses numbered 200-299, which may include credit for a project or thesis and one unit in bibliography, and (2) six additional units in the major or an approved related field, selected from upper division or graduate courses. Candidates who are preparing to teach or supervise in institutions which do not require a teaching credential must take 12 units in education courses.

F. **12 units of work must be earned after admission to candidacy.**

G. **10 units must be in courses numbered 200-299.**

H. Two official conferences between the student and his thesis committee are required: one for planning, which is to be held immediately after the appointment of the committee, and one for evaluation at the time of completing the first draft of the thesis.

I. **The project or thesis must be completed four weeks in advance of the date of the convocation at which the degree is to be conferred.**

J. An application for graduation must be filed at the Graduate Office four weeks before date of graduation.

K. Candidates are advised to keep in touch with the Graduate Office concerning specific requirements for the typing of the project or thesis and final dates for submitting bound copies, dates of graduation, and other routine procedures concerning the degree.

---

* (Fall or Spring: Apply during first six weeks of semester. Summer Session: Apply during first two weeks of term.)

# GENERAL REQUIREMENTS FOR THE BACHELOR OF ARTS AND BACHELOR OF SCIENCE DEGREES

## TYPES OF CURRICULA

San Diego State College offers two types of curricula leading to the A.B. and B.S. degrees:

(1) The curricula leading to the California teaching credentials, and

(2) The curricula in arts and sciences.

## GRADUATION REQUIREMENTS

Any student who enters San Diego State College for the first time, beginning with Summer Session 1951, must complete requirements of 124 units for the A.B. degree or 128 units for the B.S. degree.

Any student who has completed 12 units of work at San Diego State College has the option of being graduated under the requirements in effect for 1950-1951 (120 units) or the requirements to be in effect for 1951-1952. If he chooses the first set of requirements, he must earn 12 units within each two year period, beginning with Summer Session 1951, to remain eligible for graduation under those requirements. Otherwise, a new evaluation for the new requirements will be required.

### GRADUATION REQUIREMENTS EFFECTIVE 1951-1952

(a) A minimum of 124 semester units for the A.B. degree or 128 semester units for the B.S. degree, representing a four-year college course, are required for graduation.

(b) The last 24 units of work leading to the bachelor's degree must be completed at this college, including registration in at least two semesters, or summer session equivalent on a week for week and unit for unit basis, for a total of 36 weeks of attendance.

(c) At least a C average (1.0) in scholarship is required in all college work attempted, in all work taken at this college, and in all upper division work in the major field.

(d) At least 40 upper division units are required for the A.B. degree or at least 36 upper division units for the B.S. degree.

(e) The state requirements in United States history, Constitution, and American ideals must be completed for the A.B., B.S., or B.Ed. degree.

(f) All requirements in general education, the major and minor fields and any other requirements made by the college must be completed for graduation.

### TESTS IN ENGLISH, MATHEMATICS, AND SPEECH

Each student must demonstrate competence in the use of English, mathematics, and speech as determined by tests administered by the college. Students failing to pass these tests satisfactorily are required to enroll in special remedial courses designated by each department concerned. Passing the tests or completion of designated courses is a requirement for graduation.

### AMERICAN HISTORY, INSTITUTIONS AND IDEALS, UNITED STATES CONSTITUTION, AND CALIFORNIA GOVERNMENT

Each student of a state college to qualify for graduation shall demonstrate competence in the Constitution of the United States, and in American history, including the study of American institutions and ideals, and of the principles of state and local government established under the Constitution of this State, by completing appropriate courses, or by passing a comprehensive examination on these fields prepared and administered by each college. Students transferring from other institutions of collegiate grade, who have already met this requirement in college, shall not be required to take further courses or examinations therein.

This graduation requirement may be fulfilled by any one of the following alternatives:

(1) By satisfactorily passing comprehensive examinations in both American history, institutions and ideals, and in the United States Constitution and principles of California government.

(2) By satisfactory completion of one of the following groups of courses:
  (a) History 17A and 17B
  (b) History 172A and 172B
  (c) Political Science 71A and 71B
  (d) Political Science 139A and 139B

(3) By satisfactorily passing a comprehensive examination in American history, institutions and ideals and completion of one of the following groups of courses:
  (a) Political Science 101
  (b) Political Science 137A and 137B
  (c) Social Science 45 (for students with provisional status)

(4) By satisfactorily passing a comprehensive examination in the United States Constitution and principles of California government and completion of one of the following groups of courses:
  (a) History 8A and 8B
  (b) History 179A and 179B

(5) By completion of one of the following groups of courses covering American history, institutions and ideals and completion of one of the following groups of courses covering the United States Constitution and principles of California government:

| *Courses on U. S. History* | *Courses on U. S. Constitution* |
|---|---|
| (a) History 8A and 8B | (a) Political Science 101 |
| (b) History 179A and 179B | (b) Political Science 137A and 137B |

(6) By completion of the graduation requirement in American history, institutions and ideals and the United States Constitution and principles of California government in other institutions of collegiate grade.

Students who have met the graduation requirements in American history, institutions and ideals and in the Constitution of the United States by completion of courses in institutions of collegiate grade outside the State of California, but who have not met the graduation requirement in principles of California State and local government, may satisfy this requirement by satisfactory completion of one of the following courses:
  (a) Political Science 142 (also numbered under Journalism)
  (b) Political Science 143 (also numbered under Journalism)
  (c) Political Science 101 (provided that this course is not a repetition of a course taken elsewhere)
  (d) History 189

## LOWER DIVISION AND UPPER DIVISION COURSES

A student is considered to have lower division standing until he has earned 60 semester units, at which time he attains upper division standing.

Courses numbered 1-99 are lower division courses; courses numbered 100-199 are upper division courses.

A student with lower division standing is not eligible to take upper division courses, with the following exceptions: A student in the last semester of his sophomore year who is approaching upper division standing carrying sufficient lower division units to complete the required minimum of 60 units may carry upper division units for the remainder of his study load. A student with sophomore standing may carry upper division courses for upper division credit provided that he has the written approval of the chairman of the department and the Dean of Instruction. This written approval must be filed in the Office of the Registrar on the form "Adjustment of Academic Record." Blank forms may be obtained by the student at the Office of the Registrar.

## APPLICATION FOR OFFICIAL EVALUATION

Immediately upon completion of 45 units of work, the student should apply to the Registrar's Office for an official evaluation in terms of his major field and requirements for graduation. An evaluation is a summary of work completed and requirements to be completed for the degree and/or teaching credential. Students who delay in requesting official evaluations may be subject to any additional requirements made by the college from time to time. Students receiving official evaluations who continue uninterrupted attendance at this college are held only to the requirements in effect at the time the evaluation is made, except in cases where the State Department of Education imposes new regulations.

## TRANSFER TO GRADUATE SCHOOLS

Attention of students who plan to transfer to the graduate school of the University of California is called to the fact that the university reserves the right to evaluate and possibly reduce the credit in certain work in which this college has given credit toward the baccalaureate degree. Examples of such work would be credit for nurse's training, credit transferred from certain foreign schools, and certain vocational courses in junior colleges.

# GENERAL EDUCATION REQUIREMENTS

Forty-five semester units in courses designated in the college bulletin and in the schedule of classes as general education must be completed in addition to courses required in the major field. These courses must be selected from the fields listed below with completion of the minimum number of units required and not exceeding the maximum number of units allowed in each field in order to satisfy the requirement of 45 units in general education. The pattern requirements in general education may be fulfilled by examinations with an accompanying reduction in the 45 units but without course credit.

For specific explanation of the requirements within each field of general education, refer to the explanation of requirements below.

| | *Minimum* | *Maximum* |
|---|---|---|
| (a) Social Sciences | 9 | 12 |
| (b) Natural Sciences | 9 | 12 |
| (c) Literature, Philosophy, and the Arts | 6 | 12 |
| (d) Communication: | | |
| Oral Communication | 2 | 2 |
| Written Communication | 3 | 6 |
| (e) Psychology | 3 | 6 |
| (f) Physical and Health Education: | | |
| Physical Education | 2 | 2 |
| Health Education | 2 | 2 |
| (g) Mathematics | 0 | 6 |
| (h) Foreign Languages | 0 | 6 |
| (i) Family Life Education | 0 | 6 |
| Total number of units required | 45 | |

## EXPLANATION OF REQUIREMENTS

(a) **Social Sciences:** A minimum of nine or maximum of 12 units must be selected from general education courses with at least three units in two or more of the following fields: anthropology, economics, geography (except Geography 1), history, political science, social science, sociology, and similar fields, including the required instruction in United States history, Constitution, and American ideals. **NOTE:** Courses in business, library science, philosophy, or psychology may not be used to satisfy the social science requirement.

(b) **Natural Sciences:** A minimum of nine or maximum of 12 units must be selected from general education courses in the natural sciences. At least one course of not less than three units must be selected in the life sciences from biology, botany, physiology, zoology, and similar fields; and at least one course of not less than three units in the physical sciences from astronomy, chemistry, Geography 1, geology, physics, physical science (except Physical Science 10), and similar fields. **At least one course must include laboratory work** for a minimum of one unit or the three-hour equivalent. **NOTE:** Courses in engineering, industrial arts, mathematics, or photography, may not be used to satisfy the natural science or laboratory requirement.

(c) **Literature, Philosophy, and the Arts:** A minimum of six or maximum of 12 units must be selected from general education courses in literature, philosophy, and the arts. At least one course of not less than three units must be selected in literature or in philosophy from courses in English, comparative literature, philosophy, or similar fields. Courses in the arts must be selected from the fine arts, including aesthetics, art, and music, or from the practical arts. A maximum of three units may be counted in the practical arts toward general education.

(d) **Oral and Written Communication:** Two units must be completed in oral communication by passing Speech Arts 3. Students failing the Speech Interview are required to register concurrently in Speech Arts 2, Oral Communication Laboratory, for one unit of credit which may not be counted toward general education requirements.

A minimum of three units, with a maximum of six units, must be selected from courses in written communication. All students must complete three units in English 1 or 41. Students failing the English Test are required to complete English A, or 40, for two units as a prerequisite for other courses in English. English A or 40 may not be counted toward general education requirements.

(e) **Psychology:** Three units must be completed in Psychology 1, or 40. An additional three units may be selected from other general education courses in psychology.

(f) **Physical Education and Health Education:** Two units must be completed in Health Education 21 and two units must be selected from general education courses in physical education.

The physical education requirement must be satisfied by completion of four semesters of activity courses for a minimum and maximum of two units. **NOTE:** Not more than one activity course may be counted within any semester and an activity course may not be repeated for credit, except courses designated as varsity sports.

(g) **Mathematics:** From zero to six units may be selected from general education courses in mathematics. Students failing the Mathematics Test must complete Mathematics X. This course may not be counted toward the general education requirements. **NOTE:** Any year-course in mathematics completed in high school may not be repeated in college for credit.

(h) **Foreign Languages:** From zero to six units may be selected from general education courses in foreign languages. **NOTE:** Year-courses in foreign languages completed in high school may not be repeated in college for credit, except that the last year-course in any foreign language sequence completed in high school may be repeated in college for a maximum of three units of repeated work to be applied toward graduation.

(i) **Family Life Education:** From zero to six units may be selected from general education courses in family life education. Courses in family life education may be found in the fields of business, health education, home economics, psychology, and sociology.

## COURSES IN GENERAL EDUCATION

Courses selected from the following groups may be counted toward the 45 units required in general education, unless the course is specifically required as part of the student's major field and within the limitations indicated in the section on General Education Requirements. These courses are described in the section of the bulletin on Announcement of Courses. An asterisk (*) preceding the course number designates the course as a general education course.

The courses listed below carry the number of units for the course in parentheses following the course title.

## SOCIAL SCIENCES

### Anthropology
1A-1B—General Anthropology (3-3)
54—Social Anthropology (3)
152—World Ethnography (3)
165—Ethnology and Race Psychology (3)

### Economics
1A-1B—Principles of Economics (3-3)
102—Comparative Economic Systems (3)
111—Economic History of U. S. (3)
131—Public Finance (3)
170—Government and Business (3)

### Geography
2—Introduction: Natural and Cultural Regions (3)
10—Economic Geography (3)
145—Conservation of Natural Resources (3)

### History
4A-4B—Modern Europe (3-3)
8A-8B—The Americas (3-3)
17A-17B—American Civilization (3-3)
121A-121B—Medieval History (3-3)
172A-172B—Constitutional History of U. S. (3-3)
179A-179B—Intellectual History of the American People (3-3)

### Political Science
1A-1B—Introduction to Government (3-3)
71A-71B—Introduction to American Government and Politics (3-3)
101—American Institutions (3)
105—American Political Thought (3)
111A-111B—Theory of the State (3-3)
137A-137B—Constitutional Government (3-3)
139A-139B—American Constitutional Development (3-3)
150A-150B—International Relations (3-3)

### Social Science
40—Contemporary Problems (3)
45—American Democracy (3)

### Sociology
45—Marriage and the Family (3)
50—Contemporary Social Problems (3)
51—Principles of Sociology (3)
110—Race Relations (3)
135—Marriage and the Family (3)
145—Social Psychology (3)

## NATURAL SCIENCES

### Astronomy
1—Descriptive Astronomy (3)
2—Modern Astronomy (3)
9—Practice in Observing (1)
101—Principles of Astronomy (3)
105—Historic Development of Astronomy (3)

### Biology
1—Survey of Biology (3)
3—Principles of Biology (3)
4—Plant and Animal Types (3)
41—Man and His Biological World (3)

### Botany
150—Readings in Biology (2)
160—Evolution (2)

### Chemistry
2A-2B—Fundamentals of Chemistry (3-3)

### Geography
1—Introduction: Physical Elements (3)

### Geology
2—General Geology (3)
3—General Geology Laboratory (1)
4—Physiography of U. S. (3)

### Physical Science
1—Introduction to Physical Science (3)
2—Introduction to Physical Science (3)
41—Man and His Physical World (3)
150—Readings in the Physical Sciences (2)

### Physics
2A-2B—General Physics (3-3)
3A-3B—Physical Measurements (1-1)
148—Introduction to Modern Physics (3)

### Zoology
150—Readings in Biology (2)
160—Evolution (2)
165—Human Heredity (2)

## LITERATURE, PHILOSOPHY, AND THE ARTS

### Aesthetics

2—Introduction to Music (3)
5—Art Orientation (2)
50—Appreciation and History of Art (2)
51—Survey of Mexican Art (2)
102—Great Music (3)
138—Introduction to Aesthetic Appreciation (1)
150—Appreciation and History of Art (2)
162—History and Philosophy of the Dance (2)

### Art

6A—Design (2)
8—Costume and House Furnishings (2)

### Comparative Literature

52A-52B—Masterpieces of World Literature (3-3)
101A—Modern Continental Fiction (3)
104A-104B—Spanish American Literature (3-3)
115—Bible as Literature (3)
138—Introduction to Aesthetic Appreciation (1)
140A-140B—Masterpieces of French Literature (3)
142—The Golden Age of German Literature (3)
152A-152B—Survey of Drama (3-3)

### English

2A-2B Freshman Literature (3-3)
42—Freshman Literature (3)
52A-52B—Masterpieces of World Literature (3-3)
101A—Modern Continental Fiction (3)
115—The Bible as Literature (3)
117A-117B—Shakespeare (3-3)
119A—English Romantic Poetry (3)
126B—Late 19th Century British Prose (3)
134—American Literature: 1910 to the Present (3)
149—The Study of Poetry (3)
152A-152B—Survey of Drama (3-3)

### Music

7A—Musicianship (3)
10A-B—Piano (1-1)
70A-B-C-D—Chamber Music (1-1-1-1)
75A-B-C-D—Symphony and Marching band (2-2-2-2)
80A-B-C-D—Symphony Orchestra (1-1-1-1)
85A-B-C-D—Chorus (1-1-1-1)
86A-B-C-D—Treble Clef (1-1-1-1)
87-A-B-C-D—Men's Glee Club (1-1-1-1)
88A-B-C-D—Workshop Chorus ($\frac{1}{2}$-$\frac{1}{2}$-$\frac{1}{2}$-$\frac{1}{2}$)
170A-B-C-D—Chamber Music (1-1-1-1)
175A-B-C-D—Symphony and Marching band (2-2-2-2)
180A-B-C-D—Symphony Orchestra (1-1-1-1)
185A-B-C-D—Chorus (1-1-1-1)
186A-B-C-D—Treble Clef (1-1-1-1)
187A-B-C-D—Men's Glee Club (1-1-1-1)
188A-B-C-D—Workshop Chorus ($\frac{1}{2}$-$\frac{1}{2}$-$\frac{1}{2}$-$\frac{1}{2}$)

### Philosophy

1A-1B—Introduction to Philosophy (3-3)
3A-3B—History of Philosophy (3-3)
101—Contemporary Philosophy (3)
129—Social Ethics (3)

### Practical Arts

Home Economics 5—Foods (3)
Home Economics 10—Clothing Fundamentals (3)
Industrial Arts 5—Introductory General Shop (3)
Industrial Arts 6—Intermediate General Shop (3)
Library Science 10—Use of the Library (2)
Physical Science 10—Introduction to Photography (3)

## COMMUNICATION

**Oral Communication**
Speech Arts 3—Oral communication (2)

**Written Communication**
English
1—Freshman Composition (3)
41—Freshman Composition (3)
61—Sophomore Composition (3)
106—Creative Writing (3)

## PSYCHOLOGY

**Psychology**
1—General
41—Psychology and Life (3)
106—Developmental Psychology (3)
145—Social Psychology (3)

## HEALTH EDUCATION—PHYSICAL EDUCATION

**Health Education**
21—Principles of Healthful Living (2)

**Physical Education (Women)**
1A-B—Fundamental Skills (½-½)
2A-2B—Folk Dancing (½-½)
3A-3B—Modern Dance (½-½)
4—Fieldball, Soccer, Speedball (½)
5—Softball, Volleyball, Hockey (½)
6—Basketball (½)
11A-B—Ballroom Dancing (½-½)
12A-B—Advanced Modern Dance (½-½)
13A-B—Archery (½)
14A-B—Badminton (½-½)
16A-B—Golf (½-½)
18A-B-C—Tennis (½-½-½)
19A-B—Bowling (½-½)
20A-B—Swimming (½-½)
21—Life Saving (1)
23—Sailing (½)
24—Hiking (½)

**Physical Education (Men)**
1A-B-C-D—Individual Adaptation (½-½-½-½)
2—Basketball (½)
2A-B—Folk Dancing (½-½)
3—Boxing (½)
4—Gymnastics (½)
5—Soccer (½)
6—Softball (½)
7—Touch Football (½)
8—Track and Field (½)
9—Volleyball (½)
10—Wrestling (½)
11A-B—Ballroom Dancing (½-½)
13—Archery (½)
14—Badminton (½)
15—Fencing (½)
16—Golf (½)
17—Handball (½)
18—Tennis (½)
19—Bowling (½)
20-A-B—Swimming (½-½)
23—Sailing (½)
24—Hiking (½)

## FOREIGN LANGUAGES

**French**
1—Elementary (3)
2—Elementary (3)
3—Intermediate (3)
4—Intermediate (3)
15—French Civilization (2)
16—French Civilization (2)
115—French Civilization (2)
116—French Civilization (2)

**German**
1—Elementary (3)
2—Elementary (3)
3—Intermediate (3)
4—Intermediate (3)
15—German Civilization (2)
16—German Civilization (2)
115—German Civilization (2)
116—German Civilization (2)

**Latin**
1—Elementary (3)
2—Elementary (3)
3—Intermediate (3)
4—Intermediate (3)

**Spanish**
1—Elementary (3)
2—Elementary (3)
3—Intermediate (3)
4—Intermediate (3)
15—Spanish Civilization (2)
16—Spanish Civilization (2)
115—Spanish Civilization (2)
116—Spanish Civilization (2)

## MATHEMATICS

**Mathematics**
- B—Plane Geometry (3)
- G—Mathematics for General Education (3)
- 7A-7B—Mathematical Analysis (3-3)
- 104—History of Mathematics (3)

## FAMILY LIFE EDUCATION

**Family Life Education**
- Business 20—Consumer Problems (3)
- Health Education 90—Physiology of Reproduction (1)
- Home Economics 1—General Home Arts (3)
- Home Economics 5—Foods (3)
- Home Economics 10—Clothing Fundamentals (3)
- Home Economics 135—Marriage and the Family (3)
- Home Economics 150—Home Management (3)
- Home Economics 170—Child Care and Development (3)
- Psychology 106—Developmental Psychology (3)
- Sociology 45—Marriage and the Family (3)
- Sociology 135—Marriage and the Family (3)

# BACHELOR OF ARTS DEGREE IN ARTS AND SCIENCES

## MAJOR REQUIREMENTS

One major field is required for the A.B. degree in addition to 45 units in general education courses. At least 40 units of the 124 required for graduation must be in courses carrying upper division credit.

The major in arts and sciences consists of a minimum of 24 upper division units with prerequisite and related lower division courses as prescribed by the department offering the major.

### Majors

Majors in Arts and Sciences are offered in the following fields:

- Art
- Bacteriology
- Botany
- Chemistry
- Economics
- English
- French
- Geography
- History
- Journalism
- Language Arts
- Life Science
- Mathematics
- Music
- Physical Education
- Physics
- Physical Science
- Political Science
- Psychology
- Romance Languages
- Social Science
- Sociology
- Spanish
- Speech Arts
- Zoology

### General Major in Vocational Curricula

The general major is planned for students who are preparing for vocations requiring a background of general training. General majors are offered in the following curricula: *Home arts, inter-American relations, prelegal, personnel management, public administration, recreation, social work.*

Students not electing one of these curricula who need a general type of training for other vocational objectives must consult with the Dean of Instruction before permission may be granted to follow the pattern for the general major.

In addition to the general education requirements, a student taking the general major must complete 36 upper division units chosen from three fields with not more than 15 units nor fewer than nine units from any one field. A minimum of a year-course in each field must be completed in the lower division as foundation for upper division work in the general major. A minor is not required; however, four additional upper division elective units must be completed to meet the minimum requirement for 40 upper division units for graduation.

All students following the pattern for the general major must obtain forms from the Office of the Dean of Instruction, complete the forms, and have the general major approved by the Dean of Instruction. The forms will then be submitted by the student to the chairman of each of the three departments comprising the general major for approval, revision, or rejection.

## MINOR REQUIREMENTS

The minor in arts and sciences may be required by the department offering the major. In departments not requiring a minor, the minor is optional with the student. A minor consists of a minimum of 15 units, or maximum of 22, six to nine units of which must be in courses carrying upper division credit as specified by the department.

### Minors

Minors in Arts and Sciences are offered in the following fields:

- Air Science
- Anthropology
- Art
- Astronomy
- Bacteriology
- Botany
- Business
- Chemistry
- Comparative Literature
- Economics
- Education
- Engineering
- English
- French
- Geography
- Geology
- Health Education
- History
- Home Economics
- Industrial Arts
- Journalism
- Life Science
- Mathematics
- Music
- Philosophy
- Physical Education
- Physical Science
- Physics
- Political Science
- Psychology
- Public Administration
- Recreation
- Sociology
- Spanish
- Speech Arts
- Zoology

# BACHELOR OF SCIENCE DEGREE IN ARTS AND SCIENCES

## REQUIREMENTS FOR THE MAJOR

One major field is required for the B.S. degree in addition to 45 units in general education courses. A minimum of 128 units is required for graduation. A minor field is not required.

The major consists of a minimum of 36 upper division units with prerequisites and related courses in the lower division as prescribed by the department offering the major. These lower division courses are considered part of the major and may not be counted toward the 45 units in general education, except as may be specified in each major field.

### Majors

Majors are offered in the following fields:

Bacteriology
Botany
Business
Chemistry
Engineering
Laboratory Technique
Life Science
Physics
Zoology

# PROFESSIONAL CURRICULA IN TEACHER EDUCATION

## ADMISSION TO TEACHER EDUCATION

Students who plan to earn teaching credentials or credentials for other school service should apply for admission to teacher education during the first semester of the sophomore year. Students entering the college at the end of the sophomore year will apply at the beginning of the junior year. No courses in education may be taken until admission is granted; any exception to this rule must have the approval of the Chairman of the Education Department. The standards for admission to Teacher Education are different from those for admission to the college; therefore, *admission to the college does not guarantee that the student will be admitted to teacher education.* The following requirements must be met for admission to the teacher education curricula:

1. A satisfactory score on the college aptitude test taken at the college.
2. Evidence of competence in the use of the English language and of satisfactory ability in arithmetic, handwriting, reading, and spelling indicated by having passed the Fundamentals Test. (See college calendar for dates of test which should be taken in the second semester of the *freshman year.*)
3. Assurance of correct speech habits and voice control by having passed a speech test given by the college, or by having satisfactorily completed a course in corrective speech.
4. Assurance of physical fitness by passing the college health examination given for teaching credential candidates.
5. If the student is to be a candidate for the general secondary credential or one of the special secondary credentials, he must furnish a recommendation from the chairman of that department stating that the student has ability and shows promise of teaching success in his field and that the department looks with favor upon his application.
6. The completion of the first two years or more of a given curriculum, or its equivalent, and of subsequent work with a grade point average of 1.2 or better for all credentials except the general junior high school or the general secondary, for which shall be required a grade point average of 1.5 or better in all work and 1.75 in the major field.
7. If the student is a candidate for any credential on the secondary school level (general junior high school, special secondary, or general secondary), or for the school psychometrist credential, he must have a satisfactory score on a General Culture Test.
8. If the student is a candidate for the general secondary credential, he must have a tentative program approved by the authorized departmental representative of his major field and the representative of Secondary Education.
9. All applicants need to be approved by an interviewing committee of the college faculty. In its evaluation the committee will consider the following factors established by the State Board of Education: intelligence, scolarship, professional aptitude, personality and character, speech and language usage, and many-sided interests.
10. Candidates for the school psychometrist credential must attain a satisfactory score on a comprehensive examination in psychology.

### Transfer Students

Students who have completed two or more semesters of work in another college, upon transferring to San Diego State College, should make application for admission to teacher education as soon as they enroll in the college. Transfer students admitted to the college with either upper division or graduate standing must take the necessary tests for admission to teacher education given during the orientation period at the beginning of their first semester at the college. (See college calendar for dates.)

### Transfer Students With Emergency Credentials in Elementary Education

Certain adaptations in the education courses have been made to meet the needs of experienced teachers who hold an emergency credential in elementary education. See the Coordinator of Elementary Education for details.

### Advanced Standing in Teacher Education

A student transferring into San Diego State College with advanced standing must complete a minimum of six units of professional education work in residence at San Diego State College before recommendation for a credential, regardless of extent of education work already completed elsewhere. Whenever a transfer student has had teaching experience, the college requires that a statement from the employer(s) be filed with the Registrar.

### Evaluation of Credits

After an interval of five years, courses in education are reevaluated and subject to reduction in credit, in light of such new requirements as may have been put into effect and changes in educational procedures. Students formerly in attendance will not be considered to be working in the curriculum until an evaluation and statement of credit has been secured from the Registrar's office. All courses taken either at this college or elsewhere must be approved by an official adviser in order to be credited toward meeting credential requirements or pattern requirements for a degree.

## TEACHING CREDENTIALS

San Diego State College is authorized by the State of California to recommend students for the teaching credentials listed below. To be recommended, students must complete, or have completed, the A.B. degree in one of the curricula offered for teachers.

| *The credential* | *Subjects and grades for which it is valid* |
|---|---|
| General Elementary | All grades through the eighth. |
| Kindergarten-Primary | Kindergarten through third. |
| General Junior High (must be taken with a minor in industrial arts or home economics, or with another credential). A special program is offered in combination with the General Elementary Credential | All subjects in grades seven, eight, and nine in all elementary or secondary schools. |
| General Secondary | All subjects in the public schools in grade 7 and above. |
| Health and Development | Authorizes to serve as supervisor of health in the capacity of school nurse. |
| Special Secondary in Art | Art in all grades of the public schools. |
| Special Secondary in Business Education | Business education subjects in all grades of the public schools. |
| Special Secondary in Music | Music in all grades of the public schools. |
| Special Secondary in Physical Education | Physical education in all grades of the public schools. |
| Special Secondary in Speech Arts | Speech in all grades of the public schools. |

| | |
|---|---|
| Special Secondary in Correction of Speech Defects | Correction of speech defects in all grades of the public schools. |
| Special Secondary for teaching the Mentally Retarded Child | To teach mentally retarded children in elementary and secondary schools. |
| School Psychologist | To serve as school psychologist. |
| School Psychometrist | To serve as assistant to the school psychologist. |
| Administration in Elementary Education | Authorizes for credential to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in elementary schools. |
| Supervision in Elementary Education | Authorizes for credential to supervise instruction in elementary schools. |
| Administration in Secondary Education | Authorizes for credential to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in secondary schools. |
| Supervision in Secondary Education | Authorizes for credential to supervise instruction in secondary schools. |
| Special Subject Supervision | Supervision in the special subject in all grades. |

## COMBINATION OF CREDENTIALS

Students who seek more than one teaching credential must complete in full the curriculum for each, with only such exceptions as are indicated in the statement of requirements.

A combination of the elementry school credential and the junior high school credential may be secured by completing the requirements for the elementary school credential and the following additional requirements.

(a) A junior high school teaching major.
(b) Education 100B in the major field or equivalent elementary education course.
(c) Three units of directed teaching, or equivalent, in a junior high school.
(d) Education 115B or 184A.

A combined program leading to the junior high and general elementary credentials is being worked out. Entering students interested in such a program should request an adviser for the general junior high credential.

A combination of the junior high school credential and a special secondary credential may be secured by completing the requirements for the special secondary credential and the following additional requirements:

(a) A junior high school teaching major, excluding the special secondary credential majors, and a teaching minor. This minor may be the special secondary field.
(b) Education 100B in the junior high school teaching major.
(c) Three units of student teaching in the junior high school teaching major.

The general elementary credential and the special secondary credential in the Correction of Speech Defects may be combined by (1) completing a speech minor, (2) directed teaching in speech correction, and (3) completing additional upper division requirements in speech, education, and psychology.

# GENERAL ELEMENTARY AND KINDERGARTEN-PRIMARY CREDENTIALS WITH THE BACHELOR OF ARTS DEGREE

The general elementary and kindergarten-primary credentials are granted with the A.B. degree in teacher education. One major in Education, in addition to 45 units in general education courses, and one teaching minor are required for either credential and the degree. Curricular outlines for these credentials may be obtained from the Coordinator of Elementary Education.

Summary of unit requirements:

| | *Units* |
|---|---|
| General education | 45 |
| Major in education | 39–42 |
| Additional units, including minor and pattern requirements for the credential | 40–41 |
| Total number of units required for graduation | 124 |

### Major for the General Elementary Credential

The major consists of 39 upper division units to include the following courses: Education 102A-102B (6 units); Education 147 (10 units); Education 148 (12 units); Education 115A (2 units); Education 116 (7 units); and Health Education 151 (2 units).

Lower division background courses for the credential include: Social science to include regional geography (9 units); natural science to include physical geography (12 units); literature, philosophy; and the arts to include courses in music fundamentals, music methods, arts and crafts, and design (12-15 units); physical education to include games and activities for the elementary school (2½ units).

### Major for the Kindergarten-Primary Credential

The major consists of 42 upper division units to include the following courses: Education 102A-102B (6 units); Education 147 (10 units); Education 148 (12 units); Education 116 (6 units); Education 146 (4 units); Education 115A (2 units); and Health Education 151 (2 units).

Lower division background courses for the credential include: Social science (9 units); natural science (12 units); literature, philosophy, and the arts to include courses in music fundamentals, music methods, piano, arts and crafts, and design (13-15 units); physical education to include games and activities for the elementary school (2½ units).

### Minor

A teaching minor for the general elementary and kindergarten-primary credentials consists of a minimum of 15 units in one field, six units of which must be in courses carrying upper division credit. Minors are offered in the following fields.

English
Foreign Languages
General Science
Industrial Arts
Mathematics
Physical Education
Social Science
Speech Arts

The minor in English must include three units in American literature. The minor in foreign languages may be in one or more of the foreign language fields. The minor in general science must be made up of courses selected from the general secondary credential minor in life science and general science or physical science and general science. The minor in social science must include six upper division units in history or six upper division units in geography and further work in either lower or upper division selected from anthropology, economics, geography, history, political science, or sociology.

A second minor, though not required, may be chosen from art, health education, home economics, music, or recreation.

Students taking the general elementary or kindergarten-primary credential in combination with a special secondary credential may use the special secondary major for the minor in the elementary or kindergarten-primary fields.

# GENERAL JUNIOR HIGH SCHOOL CREDENTIAL WITH THE BACHELOR OF ARTS DEGREE

The general junior high school credential is offered to students with minors in home economics or industrial arts or to students who wish to take this credential in combination with a general elementary, kindergarten-primary, or special secondary credential. The general junior high school credential is granted with the A.B. degree in teacher education.

One teaching major and one teaching minor, in addition to 45 units in general education courses, are required of all students taking this credential. Students not taking this credential in combination with another credential are required to complete 24 units in professional education courses and a minor in home economics or industrial arts. Students taking this credential in combination with another credential should refer to the section of the bulletin entitled: Combination of Credentials.

## Teaching Majors and Minors

Teaching majors and teaching minors are offered in the following fields:

| *Teaching Majors* | *Teaching Minors* |
|---|---|
| English | Home Economics |
| Foreign Languages | Industrial Arts |
| General Science | or |
| Mathematics | The special secondary field for the combination credentials |
| Social Science | |

Summary of unit requirements:

| | *Units* |
|---|---|
| General education | 45 |
| Teaching major (minimum requirements) | 24 |
| Teaching minor | 15 |
| Professional courses in education | 24 |
| Electives | 16 |
| Total number of units required for graduation | 124 |

## Teaching Major

A *teaching major* consists of 24 to 33 units as specified below. Courses in the major are in addition to the 45 units required in general education courses, unless otherwise indicated.

A *teaching major in English* shall consist of six units in a lower division year-course, and 18 units in English courses carrying upper division credit, including three units in American literature and three units in Shakespeare. Recommended as part of the major: English 192.

A *teaching major in foreign languages* may include one or more of the foreign languages for a minimum of 24 units, 18 units of which must be in courses carrying upper division credit.

A *teaching major in general science* shall consist of a minimum of 33 units, at least 12 units of which must be in courses carrying upper division credit. Nine units may be applied toward general education requirements. The lower division courses must cover all of the following areas of science: astronomy, botany, chemistry, geology, physics, and zoology. Lower division minimum requirements: Biology 3 and 4, and Physical Science 1 and 2, or equivalent courses. Upper division requirements: Botany 119 or Zoology 119, and Physical Science 150 or Physics 148, plus at least one more course in each of life and physical sciences for a minimum of 12 upper division units. These elective courses, Physical Science 10, Physics 22, Physiology 1C, Zoology 20, Botany 150, Physical Science 110, Zoology 160 and 165 and the alternate courses in upper division above are available to students who take only the minimum lower division courses. Electives may be used to complete the required minimum of 33 units. A student electing this major must have one year each of high school algebra and geometry, or equivalent.

A *teaching major in mathematics* shall consist of a minimum of 24 units, at least 18 units of which must be in courses carrying upper division credit.

A *teaching major in social science* shall consist of a minimum of 24 units, at least 18 units of which must be in courses carrying upper division credit. There shall be a concentration of 12 units, at least six units of which must be in courses carrying upper division credit, selected from one of the following fields: anthropology, economics, geography, history, political science, or sociology. A year-course in American history must be included in the lower or upper division.

### Teaching Minors

A *teaching minor* consists of a minimum of 15 units, six units of which must be in courses carrying upper division credit. Teaching minors are offered in home economics or industrial arts.

A *teaching minor in home economics* consists of a minimum of 15 units to include Home Economics 5 or 62 and 10 or 11 in the lower division; and Home Economics 150 and 170 in the upper division. Three additional units should be chosen in consultation with the adviser in home economics.

A *teaching minor in industrial arts* consists of a minimum of 15 units, six units of which must be in courses carrying upper division credit. Required: Industrial Arts 2 or 21 and 121, and at least one lower division and one upper division course in two of the following areas: woodworking, metalworking, and electricity.

### Professional Courses in Education

Professional courses include 24 units in the following: Education 184A-184B-184C, 100B (methods in the major and minor fields), 116; plus Health Education 151.

## SPECIAL SECONDARY SCHOOL CREDENTIAL WITH THE BACHELOR OF ARTS DEGREE

The special secondary school credential is granted with the A.B. degree in teacher education in the following fields: art, business education, music, physical education, and speech arts. Majors in these fields are in addition to 45 units in general education courses. Professional courses in education are also required. Certain of these credentials require, in addition, a teaching minor in an academic field. For a statement of requirements in the major and in professional education, refer to the credentials below.

Summary of unit requirements:

| | *Units* |
|---|---|
| General education | 45 |
| Major for the credential | 39–58 |
| Professional courses in education | 22–26 |
| Minor, if required, and electives | 0–18 |
| Total number of units required for graduation | 124 |

## TEACHING MINORS FOR THE SPECIAL SECONDARY CREDENTIAL

A teaching minor is required for the special secondary credential in men's physical education. A minor is optional for the other special secondary credentials. The minor consists of a minimum of 15 units, or maximum of 22, six units of which must be in courses carrying upper division credit. Courses in the minor may include general education courses. Teaching minors are offered in the following fields:

English
Foreign languages
General science
Health education
Home economics
Industrial arts
Mathematics
Recreation
Social science

The following teaching minors include certain requirements:

*English.* Nine upper division units in English are required, including three units in American literature. Students who plan later to secure a general secondary credential with a minor in English must follow the program outlined under the general secondary credential.

*Foreign languages:* The minor must be in one foreign language field.

*General science:* Courses in the minor are to be selected from the minors for the general secondary credential in life science and general science, or physical science and general science.

*Health education:* The minor must include Health Education 65, 90, 152, 145 or 153, 199, and Physical Education 151.

*Home economics:* The minor must include Home Economics 5 or 62 and 10 or 11 in the lower division; and Home Economics 150 and 170 in the upper division. Three additional units should be chosen in consultation with the adviser in home economics.

*Industrial arts:* The minor must include Industrial Arts 2 or 21 and 121 and at least one lower division and one upper division course in two of the following areas: woodworking, metalworking, or electricity.

*Mathematics:* See general statement above.

*Recreation:* Lower division requirements: Two units of physical education activity courses, Physical Education 53, and two units chosen from Art 61B, or fields of dance, drama, or music. Upper division requirements: Recreation 165, 170A-170B, and 184A or 184B. Recommended: Physical Education 151. Consultation with the chairman of the Recreation Department is advised.

*Social science:* The minor must include courses selected from anthropology, economics, geography, history, political science, or sociology. Six units must be in a year-course sequence and six units are required in American history or three units in American history and three units in political science.

## SPECIAL SECONDARY CREDENTIAL IN ART

The teaching major in art for the special secondary credential consists of 42-44 units to include the following courses: Lower division: in general education: Aesthetics 5 or 51 and 50 (4 units); in the major: Art A (or high school equivalent), Art B, 6A-6B, 14A, 61A-61B, and six to eight units of art electives (18-20 units). Upper division: Aesthetics 150, Art 106A, 112A, 116A, 119A, 194A, 195, Speech Arts 140A, and five units of art electives (22 units).

Professional courses in education consist of 22 upper division units to include the following courses: Education 184A-184B-184C, 116, 119, and 100B-A. Health Education 151 (2 units) is also required.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors above.

## SPECIAL SECONDARY CREDENTIAL IN BUSINESS EDUCATION

The major in business education consists of 54-56 units to include the following: Lower division: Business 1A-1B, 8, 14A-14B, 18A-18B (21 units); plus the requirements in one of the following sub-fields: (1) Accounting: Nine units selected from Business 2, 21, 24, 25, 27; (2) Accounting-Secretarial: Business 5A-5B (if student has credit for Business 1A-1B or 5A-5B, other courses may be substituted in consultation with adviser); (3) Merchandising: Business 24, 25, 27; (4) Secretarial: Business 5A-5B. (If student has credit for Business 1A-1B or 5A-5B, other courses may be substituted in consultation with adviser).

Upper division: Business 103A, 105A-105B, 108, 190 (15 units); plus the requirements in one of the following sub-fields: (1) Accounting: Business 121, 160A, and 164A; (2) Accounting-Secretarial: Business 121; and 160A and 164A, or 113A-113B; (3) Merchandising: Business 121 and six units selected from Business 185, 186, 187A-187B, Art 107; (4) Secretarial: Business 113A-113B.

Professional courses in education consist of 22 upper division units to include the following courses: Education 184A-184B-184C, 116, 100B-T, and one of the following: Education 100B-B, 100B-ME, or 100B-S. Health Education 151 (2 units) is also required.

In addition to the requirements stated above, the student must present satisfactory evidence of one-half year, or 1,000 hours of approved experience in the field named in the credential.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors above.

## SPECIAL SECONDARY CREDENTIAL IN MUSIC

Students are referred to the opening statement and to the general basic requirements given in the section on announcement of courses under music. The student planning to receive this credential is held to the general basic music requirements. Students should consult with the chairman of the music department before registering and plan their course in view of individual variations in background and needs. Before admission to the directed teaching program may be granted, credential candidates must have completed Music 146A-146B and must have passed the minimum State credential requirements in voice and piano, with or without credit, which are as follows:

(a) Piano: Ability (1) to play a Bach two-part invention; (2) to play an artistic accompaniment; (3) to play at sight four-part hymns.
(b) Voice: Ability (1) to sing at least one song representative of each of the following periods of vocal literature: Classic, Romantic, Modern; (2) to sing at sight any part of a four-part hymn.

Students whose background in piano is inadequate for these requirements must register in their first semester for appropriate private or class instruction, with or without credit. Students with insufficient background in voice must register for voice instruction no later than the third semester.

Specific requirements for the major: Lower division: Music 8A-8B, 10A-B-C-D (may be omitted in part or in full upon evidence of satisfactory piano technique), 51A-51B, 58A-58B; four units selected from music courses numbered 70 to 87 (see activity requirements stated in general basic requirements for all music majors), 15A-15B, 20A-20B, 25A-25B, 30A-30B, and 35 (29-33 units). Upper division: Music 101A-101B, 108A-108B, 109A, 146A-B-C; four units chosen from Music 111, 112, 116, 117, 121, 122, 126, 127, 131, 132, or 150A-B-C; four units chosen from courses numbered 170 to 187 (see activity requirements stated in the general basic requirements for all music majors) (25 units). Eight units in music activity courses may be applied toward general education requirements in Literature, Philosophy, and the Arts.

Professional courses in education consist of 24 upper division units to include the following courses: Education 184A-184B-184C, 116, 117A, 145A, and 100B-Mu. Health Education 151 (2 units) is also required.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors for the special secondary credential listed above.

## SPECIAL SECONDARY CREDENTIAL IN PHYSICAL EDUCATION (MEN)

The major in physical education consists of 42 units to include the following: Lower division: Physical Education 53, 63, 64, 72, Health Education 65 (11 units); and Physiology 1A and Zoology 8 (6 units). Upper division: Physical Education 141, 142, 145, 146, 151, 155, 168, 170A or 170B, 177, 190, and two units of physical education electives (25 units).

Professional courses in education consist of 22 upper division units to include the following courses: Education 184A-184B-184C, 116, 100B-PE, and 100B in the minor field. Health Education 151 (2 units) is also required.

A teaching minor is required. Refer to the teaching minors for the special secondary credential listed above.

## SPECIAL SECONDARY CREDENTIAL IN PHYSICAL EDUCATION (WOMEN)

The major in physical education consists of 38 units to include the following: Lower division: Physical Education 4, 5, 6, 12A-12B, 53, 72 (8 units); Physiology 1A or Zoology 20, and Zoology 8 (6 units). Pattern requirements for this credential also include the following courses: Physical Education 1A, 2A-2B, and 3A-3B. Upper division: Physical Education 155, 156A-156B, 160, 161, 164A-164B, 168, 170B, 185 and 190 (24 units).

Professional courses in education consist of 20 upper division units to include the following courses: Education 184A-184B-184C, 116, and 100B-PE. Health Education 151 (2 units) is also required.

A teaching minor is not required.

## SPECIAL SECONDARY CREDENTIAL IN SPEECH ARTS

The major in speech arts consists of 45 units to include the following: Lower division: Speech Arts 4, 11A, 55A or 55B, 56A, 60A, 81 and three units in speech electives (21 units). Upper division: Speech Arts 150, 159, 176 or 179A; three units selected from 162, 191, or 192A; nine units selected from 108, 118, 140, 154A, 154B, 155, 182, or 183; and three units selected from upper division courses in English literature.

Professional courses in education consist of 20 upper division units to include the following courses: Education 184A-184B-184C, 116, and 100B-SA. Health Education 151 (2 units) is also required.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors for the special secondary credential listed above.

## SPECIAL SECONDARY CREDENTIAL IN CORRECTION OF SPEECH DEFECTS

This credential is granted only to students who can verify two years of successful teaching experience or four semester hours of superior student teaching completed in an approved teacher education institution and who hold a valid California teacher's certificate, credential, or life diploma of elementary or secondary school grade. Such students must show credit in the following subjects:

| **Lower Division** | *Units* |
|---|---|
| Psychology 1, General | 3 |
| Speech Arts 4, Extemporaneous Speaking, or equivalent | 3 |
| Speech Arts 11A or 11B, Interpretation | 3 |
| Speech Arts electives | 6 |
| **Upper Division** | |
| Speech Arts 150, Phonetics | 3 |
| Speech Arts 221, Articulatory Problems of Speech or Education 176, Problems of Speech Correction and Articulation | 3 |
| Speech Arts 179A-179B or Education 179A-179B, Nervous Speech Disorders | 6 |
| Psychology 131, Foundations of Personality | 2 |
| One hundred supervised hours of teaching on elementary level in speech correction | 3 |

## SPECIAL SECONDARY CREDENTIAL FOR TEACHING THE MENTALLY RETARDED CHILD

An applicant for the special secondary credential for teaching the mentally retarded child must have completed the following minimum requirements:

1. Possession of a valid kindergarten-primary, general elementary, junior high school, or general secondary credential.
2. Completion of 18 semester hours of professional work selected from the following fields:
    a. Required group: Education 102B, 102C or 184B; 181; 182; Art 61A or 161A; and three units of directed teaching of the mentally retarded.
    b. Additional work to complete the required total of 18 semester hours selected from any of the following electives: Education 176, 144, Psychology 132, 150, or 151.
3. The 18-unit requirement will be reduced 4 units for each year of verified, successful experience in teaching special classes for mentally retarded children, the total not to exceed 12 units.
4. At least six semester units of the 18 required must have been completed within five years of the time application is made for the credential.
5. Twelve units of work must have been completed at this college.

## HEALTH AND DEVELOPMENT CREDENTIAL

This credential is offered for school nurses only. Requirements for this credential include:

1. Possession of a valid license issued by the official California State board or agency in charge of this profession in California.
2. Possession of the Public Health Nurse certificate.
3. The completion of six semester units of work including courses in:
    a. Educational Psychology (Education 130)
    b. Administration of the School Health Program (Health Education 153)
    c. Social case work, or rural education, or child hygiene (Health Education 151)

Pattern of work to be approved by adviser appointed by the Chairman of the Department of Education.

## SCHOOL PSYCHOLOGIST CREDENTIAL

Each applicant for recommendation for the school psychologist credential shall have completed the following minimum requirements:

1. Possession of a valid general elementary or general secondary credential.
2. One year of successful teaching experience.
3. Possession of a master's degree in psychology or educational psychology.
4. Each applicant must complete the following course requirements:

| | *Units* |
|---|---|
| A. Child development, mental hygiene, and counseling and guidance, including interviewing: | |
| Education 102B, Child Growth and Development, or Psychology 106, Development Psychology | 3 |
| Psychology 132, Personality Adjustment | 2 |
| Psychology 152, Introduction to Methods of Counseling or Education 233, Guidance Counseling Techniques | 3 |
| B. Psychology and education of exceptional children, social case practice including field work and clinical psychology: | |
| Education 181, Exceptional Children | 3 |
| Sociology 230, Principles of Social Case Work | 3 |
| Psychology 151, Introduction to Clinical Appraisal or Psychology 211, Advanced Clinical Psychology | 3 |
| C. Educational psychology and educational measurements including field work and elementary statistics: | |
| Psychology 130, Educational Psychology | 2 |
| Education 102A, Measurement and Evaluation in Elementary Education, Education 102D, Measurement and Evaluation in Secondary Education, or Education 184C, The Teaching Process | 2-4 |
| Psychology 104A, Statistical Methods in Psychology | 3 |
| D. Individual and group mental tests including field work: | |
| Psychology 105A, Introduction to Psychological Testing | 3 |
| Psychology 105B, Individual Mental Testing | 3 |
| Psychology 205, Advanced Mental Testing | 3 |
| E. Remedial instruction including laboratory or classroom practice: | |
| Education 144, Diagnosis and Remedial Treatment of Difficulties in Reading | 3 |
| Education 176, Problems of Speech Correction and Articulation or Education, 179A, Nervous Speech Disorders | 3 |

These courses include laboratory practice.

### SCHOOL PSYCHOMETRIST CREDENTIAL

An applicant for the school psychometrist credential must have completed the following requirements:

1. Possession of a California general teaching credential (General Elementary, Junior High School, or General Secondary) or a four-year college course with a bachelor's degree.

2. Admission to teacher education by all undergraduate students or by graduate students who do not hold a California teaching credential. A special examining committee of members of both the Departments of Education and Psychology is established to interview applicants.

3. As a part of the undergraduate or graduate program the applicant must have completed 18 semester units of training distributed approximately as follows and approved by the credential adviser:

   A. At least six units selected from the following areas with one course in each area: (1) Education 102A or 102D or 184C; (2) Education 102B or 102C; (3) Education 130. Education 184B will meet requirements in both area 2 and 3.

   B. Six units as follows: Education 181 and Psychology 151.

   C. Six units as follows: Psychology 105A and Psychology 105B.

## CURRICULA LEADING TO THE GENERAL SECONDARY SCHOOL CREDENTIAL

### INFORMATION CONCERNING THE GENERAL SECONDARY SCHOOL CREDENTIAL

A candidate for this credential must complete the requirements for the bachelor's degree from an accredited institution with a major and a minor commonly taught in the secondary schools of California. Admission to candidacy for this credential should be sought during the second semester of the sophomore year or immediately upon admission to San Diego State College with advanced or graduate status. For admission requirements, refer to the section entitled: Admission to Teacher Education.

Students desiring a major for which San Diego State College is authorized should complete a program leading to the A.B. or B.S. degree at the end of four years and the General Secondary Credential upon completion of the graduate year requirements outlined on the following pages.

Students desiring a major in art, business education, music, physical education or speech arts may complete the requirements for the special secondary credential simultaneously with the bachelor's degree; then continue with the graduate program. For further details regarding these majors, refer to these credentials.

Any person desiring the General Secondary Credential should consult with the Coordinator of Secondary Education during his first semester of attendance at San Diego State College.

### RECOMMENDED PROGRAM FOR THE GENERAL SECONDARY SCHOOL CREDENTIAL

1. The following courses should be completed before receiving the bachelor's degree: Health Education 151 (may be taken any semester); Education 184A and 184B (should be taken consecutively). Those persons changing from another vocational objective to education during the senior year may take Education 184A and 184B concurrently by special permission of the Coordinator of Secondary Education, following admission to Teacher Education and a check of the student's qualifications.

| | *Units* |
|---|---|
| Health Education 151, Health Education for Teachers | 2 |
| Education 184A, The Secondary School | 4 |
| Education 184B, Development and Learning | 4 |

2. After completion of requirements in (1) above, the following courses may be taken either before or after receiving the bachelor's degree; however, they should be taken concurrently with the first directed teaching assignment unless the student has equivalent teaching experience.

| | *Units* |
|---|---|
| Education 184C, The Teaching Process | 4 |
| Education 116 or 316, Directed Teaching (or equivalent) | 3 |
| Education 100B (methods in field of directed teaching assignment) | 2–4 |

3. The graduate work must consist of San Diego State College's standard year of work, 24 to 30 semester units of upper division or graduate work, including the following specific requirements:

(a) At least 12-15 semester units must be completed at San Diego State College.

(b) At least one course of graduate level work (200 number) in the major field. Most departments require two courses.

(c) At least six upper division or graduate semester units in fields outside of education.

(d) Enough units to complete at least a 21 semester unit minor, with a minimum of six semester units of upper division credit in the minor subject area.

For a statement of requirements in the teaching major and minor fields, refer to these majors and minors below.

4. Professional Education during the graduate year: Completion of the courses listed in (1) and (2) above and the following:

| | *Units* |
|---|---|
| Education 100B (in the field of the second directed teaching assignment) if not taken under (2) above | 2 |
| Education 230, Guidance Problems in Secondary Education | 3 |
| Education 250, Curricular Problems in Secondary Education | 3 |
| Education 316, Directed Teaching in both major and minor fields, or equivalent teaching experience | 3–6 |

## MAJORS AND MINORS FOR THE GENERAL SECONDARY CREDENTIAL

The following pages outline tentative programs for the majors and minors for which San Diego State College is authorized to recommend for the General Secondary Credential. Every candidate for the general secondary credential must have a program approved in writing by the departmental representative in the major teaching field and in education as part of admission to the teacher education program.

Persons with broad fields majors (Language Arts, Life Science and General Science, Physical Science and General Science, Romance Languages, or Social Science) cannot take a minor within the area of their major.

*Teaching Majors*

Art
Business Education
English
French
Health Education
Language Arts
Life Science and General Science
Mathematics
Music
Physical Education (Men)
Physical Education (Women)
Physical Science and General Science
Psychology
Romance Languages
Social Science
Spanish
Speech Arts

*Teaching Minors*

Art
Business Education
Economics
English
French
Health Education
History
Home Economics
Industrial Arts
Life Science and General Science
Mathematics
Music
Physical Education (Men)
Physical Education (Women)
Physical Science and General Science
Recreation
Spanish
Speech Arts

## Outline of Requirements

### Major in Art

The requirements for the A.B. degree and the special secondary credential in art should be completed simultaneously. (Students transferring from another institution with the A.B. degree and a major in art should consult with the departmental representative for special program planning.) Refer to the special secondary credential in art. After the above requirements have been met, and the candidate has been accepted by the art staff for graduate work in art, the candidate for the general secondary credential shall complete a graduate year including the following courses in his major:

| *Graduate Year* | *Units* |
|---|---|
| Art 200A-200B, Special Problems in Art | 4 |

### Minor in Art

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Art A-B, Drawing and Composition | 2–4 |
| Art 6A-6B, Design | 4 |
| Art elective (Art 14A, Lettering, recommended) | 3–5 |
| Aesthetics 50, Appreciation and History of Art | 2 |
| Aesthetics 5, Art Orientation, or Art 51, Survey of Mexican Art | 2 |
| *Upper Division* | |
| Aesthetics 150, Appreciation and History of Art | 2 |
| Art electives | 4 |

### Major in Business Education

The requirements for the A.B. degree and the special secondary credential in Business Education should be completed simultaneously. Refer to the special secondary credential in Business Education. After the above requirements have been met, the candidate for the general secondary credential shall complete a graduate year including the following courses in his major:

*Graduate Year*

Select four units from the following:

| | |
|---|---|
| Business 200, Readings in Current Literature in Business Education | 2 |
| Business 203, Office Management | 2 |
| Business 213, Problems in Business Education | 2 |
| Business 221, Basic Business Education | 2 |
| Business 223, Problems of Distributive Business | 2 |
| Business 233, Administration and Supervision of Business Education | 2 |
| Business 260, Advanced Problem Analysis (Accounting) | 2 |

### Minor in Business Education

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Business 1A-1B, Typewriting | 6 |
| Business 14A-14B, Principles of Accounting | 6 |
| *Upper Division* | |
| Nine upper division units should be selected in consultation with adviser in business education | 9 |

### Minor in Economics (Not available to Social Science majors)

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Economics 1A-1B, Principles of Economics | 6 |
| A year course in another social science area | 6 |
| *Upper Division* | |
| Economics 100A, Intermediate Economic Thought | 3 |
| Economics electives | 6 |

**Major in English**

*Lower Division*

| | Units |
|---|---|
| One year-course from lower division English electives | 6 |
| Lower division English electives | 6 |

*Upper Division*

| | |
|---|---|
| Upper Division English courses selected under the supervision of the departmental representative | 24 |

*Graduate Year*

| | |
|---|---|
| One of the graduate seminars | 2 |
| English 192, The English Language (if not taken as an undergraduate) or 191, 195, or an additional seminar | 2–3 |

**Minor in English** (Not available to Language Arts majors)

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| English 1 or 41, Freshman Composition | 3 |
| A year course chosen from: English 50A-50B, 52A-52B, 56A-56B, or 60A-60B | 6 |

*Upper Division*

Select one course from each of the following areas:

| | |
|---|---|
| Nineteenth Century English Literature: select from English 119A, 119B, 126A, 126B, or 143B | 3 |
| Shakespeare: select from English 117A or 117B | 3 |
| American Literature: select from English 131, 132, 133, or 134 | 3 |
| Language: English 192 | 3 |

**Major in French**

*Lower Division*

| | |
|---|---|
| French 1, 2, 3, 4, 5, 6, or equivalents | 16 |
| Spanish 1, 2, or German 1, 2, or Latin 1, 2, or their equivalents | 6 |
| History 4A-4B (recommended) | |

Six units from courses 1, 2, 3, 4 in Spanish, German, or Latin may be applied toward general education requirements.

*Upper Division*

| | |
|---|---|
| French 101A-101B, Conversation and Composition | 6 |
| French 198, Comprehensive Reading and Survey | 3 |
| Upper division courses in French with a maximum of six units which may be selected from related fields with the approval of the departmental representative | 15 |

*Graduate Year*

| | |
|---|---|
| French 214, Contemporary French Literature | 2 |
| French 220, Explication de Textes | 2 |

**Minor in French** (Not available to Romance Languages majors)

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| French 1, 2, 3, 4, 5, 6, or equivalents | 16 |
| History 4A-4B (recommended) | |

*Upper Division*

| | |
|---|---|
| French 101A-101B, Conversation and Composition | 6 |

**Major in Health Education**

This teaching major may be used as a major for the A.B. degree if the student has been admitted to candidacy for the general secondary credential and has completed at least eight units in professional education courses, including Education 184A-184B, by the date of degree candidacy. The major is designed around the general major, with health education as the field of concentration.

*Lower Division*

| | |
|---|---|
| Health Education 65, Community Health | 3 |
| Health Education 90, Physiology of Reproduction | 1 |
| Home Economics 61A, Nutrition | 2 |
| Physiology 1A, Human Physiology | 3 |
| Zoology 8, Human Anatomy | 3 |

*Upper Division*

36 upper division units to include the following:

| | *Units* |
|---|---|
| Health Education 145, Safety Education and Accident Prevention | 3 |
| Health Education 151, Health Education for Teachers | 2 |
| Health Education 152, Health Education Programs | 3 |
| Health Education 153, Administration of the School Health Program | 3 |
| Health Education 199, Special Study in Health Education | 3–6 |
| Physical Education 151, Instructor's Course in First Aid | 2 |
| Sociology 135, Marriage and the Family | 3 |
| Psychology 131, Foundations of Personality | 2 |
| Psychology 132, Personality Adjustment | 2 |
| Bacteriology 101, General Bacteriology | 4 |
| Six to nine upper division units selected from one of the teaching major or minor fields for the general secondary credential, selected with approval of the departmental adviser | 6–9 |

### Minor in Health Education

A minimum of 21 semester units required.

Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

*Lower Division*

| | |
|---|---|
| Health Education 21, Principles of Healthful Living | 2 |
| Health Education 65, Community Health | 3 |
| Health Education 90, Physiology of Reproduction | 1 |

*Upper Division*

| | |
|---|---|
| Health Education 145, Safety Education and Accident Prevention | 3 |
| Health Education 151, Health Education for Teachers | 2 |
| Health Education 152, Health Education Programs | 3 |
| Health Education 153, Administration of School Health Program | 3 |
| Health Education 199, Special Study in Health | 2–3 |
| Physical Education 151, Instructor's Course in First Aid | 2 |

### Minor in History (Not available to Social Science majors)

A minimum of 21 semester units required. A year course in United States History must be included.

*Lower Division*

| | |
|---|---|
| History 4A-4B, Modern Europe, or 8A-8B, The Americas, or 9A-9B, Pacific Ocean Area, or 17A-17B, American Civilization | 6 |
| Electives chosen from anthropology, economics, geography (except Geography 1 or 3), political science, sociology | 6 |
| Additional social science electives | 0–3 |

*Upper Division*

| | |
|---|---|
| History electives | 6–9 |

### Minor in Home Economics

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| Home Economics 5, Foods | 3 |
| Home Economics 10, Clothing Fundamentals, or 11, Advanced Clothing | 3 |
| Electives in Home Economics | 3–6 |

*Upper Division*

| | |
|---|---|
| Home Economics 105, Family Meals | 3 |
| Home Economics 150, Home Management | 3 |
| Home Economics 170, Child Care and Development | 3 |
| Electives in Home Economics | 3–6 |

Electives for enrichment—see department chairman.

### Minor in Industrial Arts

A minimum of 21 semester units required.

| | | *Units* |
|---|---|---|
| *Lower Division* | | |
| Industrial Arts 2, Mechanical Drawing | | 3 |
| Select at least three courses from the following: | | 9 |
| Industrial Arts 31, Elements of Metalwork | 3 | |
| Industrial Arts 32, Elements of Machine Operation | 3 | |
| Industrial Arts 51, Elements of Woodwork | 3 | |
| Industrial Arts 61, Elements of Electricity | 3 | |
| Industrial Arts 71, Elements of Transportation Machinery | 3 | |
| *Upper Division* | | |
| Industrial Arts 121, Advanced Mechanical Drawing | | 3 |
| Select appropriate upper division electives | | 6 |

### Major in Language Arts

This major requires 46 units to be taken in the fields of composition, dramatics, journalism, language, literature, radio or motion pictures, and speech arts. Education courses to be taken with this major include the standard program for all general secondary credentials plus Education 154, Reading in the Secondary School, and Education 100B in both English and speech arts. A methods course in a teaching minor is also required for the credential. Students using this major for the A.B. degree must complete a minimum of eight units in education courses by date of degree candidacy.

| | |
|---|---|
| *Lower Division* | |
| English 50A-50B, or 52A-52B, or 60A-60B<br>(or two upper division courses may be substituted, selection to be made from English 116A-116B, or 118A-118B, or 119A-119B, or 120A-120B, or 126A-126B, or 143A-143B) | 6 |
| Journalism 51A | 3 |
| Speech Arts 60A, or 60B, or 55A, or 55B | 3 |
| Speech Arts 81 | 3 |
| *Upper Division* | |
| English 192 | 3 |
| English 106 or 191 | 3 |
| English 131, or 132, or 133, or 134 | 3 |
| English 117A, or 117B, or 152A, or 152B | 3 |
| Journalism 152 | 3 |
| Speech Arts 108, 159, and 176 | 9 |
| Speech Arts 191, or 192A, or 192B | 3 |
| If lower division English sequence is taken in American Literature, the upper division course work in literature should be taken in other areas. | |
| *Graduate Year* | |
| One 200 numbered course in speech arts | 2 |
| One 200 numbered course in English | 2 |

### Major in Life Science and General Science

| | |
|---|---|
| *Lower Division* | |
| Zoology 1A-1B, General | 8 |
| Botany 2A-2B, General, or 1, Introduction | 4–8 |
| Zoology 20, Human Anatomy and Physiology, or Physiology 1C, Human Physiology | 2–3 |
| Chemistry 2A-2B | 6 |
| Physics 2A-2B | 6 |

Geology 2, General, Astronomy 1, Descriptive, and Physics 3A-3B, Physical Measurements, recommended.

12 units in natural science courses may be applied toward general education requirements.

| *Upper Division* | *Units* |
|---|---|
| Zoology 119, Field Zoology | 4 |
| Botany 114, Plant Taxonomy, or Botany 119, Field Botany | 3–4 |
| Bacteriology 101, General Bacteriology | 4 |
| Botany 155, Genetics, or Zoology 165, Human Heredity | 2 |
| Zoology 160, Evolution | 2 |
| Zoology 150, Readings in Biology | 2 |
| Two courses chosen from the following: | |
| Zoology 110, 112, 113, 115, 118, 121 | 7–8 |
| *Graduate Year* | |
| Zoology 200, Seminar | 3 |
| Zoology 202, Hydrobiology, or Zoology 213, Advanced Studies in Ornithology | 2 |

## Minor in Life Science and General Science

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Biology 3, Principles, and Biology 4, Plant and Animal Types | 6 |
| Physical Science 1 and 2, Introduction | 6 |
| Physiology 1C, Human Physiology | 2 |
| *Upper Division* | |
| Botany 114, Plant Taxonomy, Botany 119, Field Botany, or Zoology 119, Field Zoology | 3–4 |
| Botany 150, Readings in Biology | 2 |
| Zoology 160, Evolution | 2 |

## Major in Mathematics

| | |
|---|---|
| Mathematics 3A, Analytic Geometry | 3 |
| Mathematics 3B, First Course in Calculus | 3 |
| Mathematics 4A, Second Course in Calculus | 3 |
| Additional mathematics or work in related areas | 3 |

*Suggested courses in related areas:* Astronomy 1, Descriptive Astronomy; Business 2, Mathematics of Finance; Engineering 1A, Plane Surveying; Engineering 21, Descriptive Geometry; Physics 4A, Mechanics of Solids and Fluids; Physics 2A, General.

| | |
|---|---|
| *Upper Division* | |
| At least one course in Algebra | 3 |
| At least one course in Geometry | 3 |
| Mathematics 140A, Mathematical Statistics | 3 |
| Mathematics 117, Intermediate Calculus (unless 4B, Third Course in Calculus taken in lower division) | 3 |
| Mathematics 104, History of Mathematics | 3 |
| Additional upper division units in mathematics or related areas | 9 |
| *Graduate Year* | |
| Four units selected from the following: | |
| Mathematics 201, Concepts of Geometry from an Advanced Point of View | 2 |
| Mathematics 202, Concepts of Algebra from an Advanced Point of View | 2 |
| Mathematics 204, Advanced Work in the History of Mathematics | 2 |
| Mathematics 224, Functions of a Complex Variable | 3 |

## Minor in Mathematics

A minimum of 21 semester units required.

*Lower Division*

| | Units |
|---|---|
| Mathematics D, Trigonometry (or high school equivalent for which pattern credit may be allowed) | 3 |
| Mathematics 3A, Analytic Geometry | 3 |
| Mathematics 3B, First Course in Calculus | 3 |
| One course selected from courses in related areas (See above under teaching major in mathematics) | 3 |

*Upper Division*

| | Units |
|---|---|
| Mathematics 104, History of Mathematics | 3 |
| Mathematics electives | 6 |

## Major in Music

The requirements for the A.B. degree and the special secondary credential in music should be completed simultaneously. Students transferring from another institution with the A.B. degree and a major in music should consult with the departmental representative for special program planning. Refer to the special secondary credential in music. After the above requirements have been met, the candidate for the general secondary credential shall complete a graduate year including 4 units selected from the following courses in his major:

*Graduate Year*

Four units selected from the following:

| | Units |
|---|---|
| Music 200A-200B, Special Problems in Music | 2–2 |
| Music 203, Musicology | 2 |
| Music 206, Composition | 2 |

## Minor in Music

A minimum of 21 semester units required. The student is required to demonstrate vocal or instrumental proficiency before admission to the minor program may be granted. As laboratory experience, the student with music as a minor is required to participate in one music activity each semester (in special cases this requirement may be waived by the Chairman of the Music Department). A maximum of four units of credit from music activities may be used toward the total graduation requirement.

*Lower Division*

| | Units |
|---|---|
| Music 8A-8B, Fundamentals, and Harmony | 6 |
| Music 10A-10B, Piano (may be omitted in part or in full upon demonstration of proficiency) | 2 |
| Music activities chosen from courses numbered 70 to 87 | 2 |
| Selected from the following: Music 15A, 20A, 25A, 30A | 3–5 |

*Upper Division*

| | Units |
|---|---|
| Music 101A, History of Music | 3 |
| Music 146A, Fundamentals of Conducting | 1 |
| Music 146B, Instrumental Conducting, or 146C, Choral Conducting | 1 |
| Music activities chosen from courses numbered 170 to 187 | 2 |
| Selected from the following: Music 111, 112, 116, 117, 121, 122, 126, 127, 131, 132, or 150 | 1 |

## Major in Physical Education for Men

The requirements for the A.B. degree and the special secondary credential in physical education should be completed simultaneously. After the major field requirements for the special secondary credential in physical education have been met, the candidate for the general secondary credential shall complete a graduate year, including two of the following courses in his major:

| | Units |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |
| Physical Education 298, Special Study | 2 |

### Minor in Physical Education for Men

A minimum of 21 semester units required.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | Units |
|---|---|
| *Lower Division* | |
| Physical Education 53, Physical Education in the Elementary Schools | 2 |
| Physical Education 72, Introduction | 2 |
| Electives | 2–4 |
| *Upper Division* | |
| Professional activity courses (should be selected in consultation with departmental representative) | 4 |
| Physical Education 151, Instructor's Course in First Aid | 2 |
| Physical Education 190, Administration of Physical Education in Secondary Schools | 3 |
| Physical Education 170A or 170B Recreational Leadership | 2 |
| Electives | 2–4 |

### Major in Physical Education for Women

The requirements for the A.B. degree and the special secondary credential in physical education should be completed simultaneously. After the major field requirements for the special secondary credential in physical education have been met, the candidate for the general secondary credential shall complete a graduate year including two of the following courses in the major:

| | |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education, and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |
| Physical Education 298, Special Study | 2 |

### Minor in Physical Education for Women

A minimum of 21 semester units required.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | |
|---|---|
| *Lower Division* | |
| Physical Education 1A, Fundamental Skills | ½ |
| Physical Education 2A, Folk Dancing | ½ |
| Physical Education 3A, Modern Dance | ½ |
| Physical Education 4, 5, 6, Team Sports | 1½ |
| Physical Education 53, Physical Education in the Elementary School | 2½ |
| Physical Education electives | 3½–4½ |
| *Upper Division* | |
| Physical Education 156A-156B, Sports Methods | 4 |
| Physical Education 161, Folk Dancing Materials and Advanced Techniques | 2 |
| Electives selected from Physical Education 190, 170B, 164A-164B | 5–6 |

### Major in Physical Science and General Science

To obtain a teaching major in physical science and general science for the general secondary credential a student obtaining the A.B. or B.S. degree in chemistry or physics, or the A.B. degree in physical science, must include in his program the following courses, which will also satisfy the natural science requirements for general education.

| | |
|---|---|
| *Lower Division* | |
| Astronomy 1, Descriptive | 3 |
| Biology 3 and 4, General, and Plant and Animal Life | 6 |
| Geology 2 or 1A, General or Physical | 3–4 |

Recommended electives: Astronomy 9, Geography 3, Geology 3; general education courses in literature, philosophy, and the arts: Physical Science 10, Industrial Arts 5 and/or 6.

*Upper Division* *Units*

Same as for the major in chemistry, physics, or physical science.

Recommended electives, if not included as part of the major: Botany 119, Chemistry 101A, Physics 107, 158, Zoology 119, and Geography 145 (a general education course in social science).

*Graduate Year*

Select four units from the following:

| | Units |
|---|---|
| Chemistry 200, Seminar | 2–4 |
| Physics 200, Seminar | 2–4 |

### Minor in Physical Science and General Science

This minor consists of 26 units in courses specified below.

| | Units |
|---|---|
| Astronomy 1, Descriptive Astronomy | 3 |
| Biology 3 and 4, Principles, and Plant and Animal Types | 6 |
| Chemistry 2A-2B, or 1A-1B, Fundamentals, or General | 6–10 |
| Geology 2 or 1A, General, or Physical | 3–4 |
| Physics 2A-2B and 3A-3B, or 4A-4B-4C, General, or Principles | 8–12 |

The following courses are recommended as electives: Astronomy 9, Geology 3, Chemistry 101A, Geography 3, Geography 145, Physical Science 150, Physics 148, Botany 119, or Zoology 119, Physical Science 10, Industrial Arts 5 and 6.

### Major in Psychology

This major can be used for a general secondary credential only if the candidate completes *two* teaching minors.

*Lower Division*

| | Units |
|---|---|
| Psychology 5 and 6, Principles | 6 |

*Upper Division*

| | Units |
|---|---|
| Psychology 104A, Statistical Methods | 3 |
| Psychology 105B, Individual Mental Testing | 3 |
| Psychology 131, Foundations of Personality | 2 |
| Psychology 132, Personality Adjustment | 2 |
| Psychology 151, Introduction to Clinical Appraisal | 3 |
| Psychology 160A, Experimental Psychology | 3 |
| Electives to be selected with approval of the departmental representative | 8 |

*Graduate Year*

| | Units |
|---|---|
| Psychology 201, Seminar in Psychology | 2 |
| Education 230, Guidance Problems in Secondary Education | 3 |

### Minor in Recreation

A minimum of 21 semester units required.

Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

*Lower Division*

| | Units |
|---|---|
| Physical Education activities | 2 |
| Physical Education 53, Physical Education in Elementary Schools | 2 |
| Electives selected from Art 61B, Crafts, or from the fields of dance, drama or music | 2–4 |

*Upper Division*

| | Units |
|---|---|
| Physical Education 151, Instructor's Course in First Aid | 2 |
| Recreation 165, Administration of Community Recreation | 3 |
| Recreation 170A-170B, Recreational Leadership | 2–4 |
| Recreation 184A-184B, Field Work in Recreation | 3–6 |
| Recreation 199, Special Study in Recreation | 1–6 |

### Major in Romance Languages

*Lower Division*

| | Units |
|---|---|
| Spanish 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| French 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| History 4A-4B, or 8A-8B (recommended) | |

Six units from courses 1, 2, 3, 4 in French or Spanish may be applied toward general education requirements.

| *Upper Division* | *Units* |
|---|---|
| Spanish 101A-101B, Conversation and Composition | 6 |
| French 101A-101B, Conversation and Composition | 6 |
| Spanish 198 or French 198, Comprehensive Reading and Survey Course | 3 |
| Courses in Spanish literature, French literature or Spanish-American literature, selected with the approval of the departmental representative | 9 |

NOTE: At least nine units of upper division courses must be taken in each language.

*Graduate Year*

Any two of the following courses:

| | |
|---|---|
| French 214, Contemporary French Literature | 2 |
| French 220, Explication de Textes | 2 |
| Spanish 201, Old Spanish | 2 |
| Spanish 204, Seminar in Spanish-American Literature | 2 |

### Major in Social Science

This teaching major may be used as a major for the A.B. degree if the lower and upper division requirements listed below are completed and the student has been admitted to candidacy for the general secondary credential and has completed at least eight units of professional courses in education by the date of degree candidacy. Twelve units of social science courses in the major may be applied toward general education requirements in social science.

The major must include six units in United States history and work from at least four of the social science fields listed below.

*Lower Division*

A student must complete a minimum of six units in each of at least three fields he may select from the departments named below:

- Economics
- Geography
- History
- Political Science
- Sociology and/or Anthropology

*Upper Division*

A student must complete a minimum of 30 units with the approval of the departmental representative as follows:

| | |
|---|---|
| 1. A minimum of 12 units from any field named above | 12 |
| 2. A minimum of six units from each of two fields named above, excluding the field selected for the major upper division concentration | 12 |
| 3. Electives from social science fields | 6 |

*Graduate Year*

| | |
|---|---|
| Post-bachelor work selected with approval of the departmental representative | 4 |

### Major in Spanish

*Lower Division*

| | |
|---|---|
| Spanish 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| French 1, 2, or German 1, 2, or Latin 1, 2, or their equivalents | 6 |
| History 4A-4B, or 8A-8B (recommended) | |

Six units from courses 1, 2, 3, 4 in French, German, or Latin may be applied toward general education requirements.

*Upper Division*

| | |
|---|---|
| Spanish 101A-101B, Conversation and Composition | 6 |
| Spanish 198, Comprehensive Reading and Survey | 3 |
| Upper division courses in Spanish with a maximum of six units which may be selected from related fields with the approval of the departmental representative | 15 |

*Graduate Year*

| | |
|---|---|
| Spanish 201, Old Spanish | 2 |
| Spanish 204, Seminar in Spanish-American Literature | 2 |

**Minor in Spanish** (Not available to Romance Languages majors)

A minimum of 21 semester units required.

| | Units |
|---|---|
| *Lower Division* | |
| Spanish 1, 2, 3, 4, 5, 6, or equivalents | 16 |
| History 4A-4B, or 8A-8B (recommended) | |
| *Upper Division* | |
| Spanish 101A-101B, Conversation and Composition | 6 |

**Major in Speech Arts**

The requirements for the A.B. degree and the special secondary credential in Speech Arts should be completed simultaneously. Refer to the special secondary credential in Speech Arts. After the above requirements have been met, the candidate for the general secondary credential shall complete a graduate year including the following courses in his major:

*Graduate Year*

Select four units from the following courses:

| | |
|---|---|
| Speech Arts 260, Seminar in Oral Interpretation | 2 |
| Speech Arts 221, Seminar in Articulatory Problems in Speech | 2 |
| Speech Arts 245, Seminar in Technical Practice | 2 |
| Speech Arts 259, Seminar in Stage Direction | 2 |
| Speech Arts 200, Seminar in History or Oratory | 2 |

**Minor in Speech Arts**

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Speech Arts 3, Speech for Communication | 2 |
| Speech Arts 4, Extemporaneous Speaking | 3 |
| Speech Arts 11A-11B, Interpretation | 6 |
| Speech Arts 82, Radio Announcing | 3 |
| Electives in speech from 61 or 63 | 0–1 |
| *Upper Division* | |
| Speech electives (should be selected in consultation with departmental representative) | 6–7 |

# CURRICULA LEADING TO CREDENTIALS IN ADMINISTRATION AND SUPERVISION

## CURRICULA LEADING TO CREDENTIALS IN ELEMENTARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the general requirements of the State of California for all degrees, the candidate shall meet the following requirements:

(a) Possess a valid general elementary credential.
(b) Present written evidence of two years of successful teaching experience in the elementary schools.
(c) Complete 30 semester units for the administration credential (24 units for the supervision credential) of upper division or graduate work in addition to the holding of the general elementary credential. These units shall include specific courses designated by the State Department of Education and the college.
(d) Maintain a grade point average of 1.75 in work taken subsequent to receipt of the general elementary credential.
(e) Complete a minimum of 15 units of work in residence at San Diego State College.
(f) Make formal application to the Coordinator of Elementary Education.
(g) Earn the recommendation of the Division of Education.

Students applying for the elementary administration or supervision credentials should register with the office of the Chairman of the Department of Education and confer with the Chairman of the Administration Committee concerning the courses which may be offered in satisfaction of the requirements. Outlines of pattern requirements for either the elementary supervision or administration credentials may be obtained by writing the Coordinator of Elementary Education.

## SPECIAL SUBJECT SUPERVISION CREDENTIAL

This credential is available for persons who wish to supervise in a special subject area. Those desiring this credential should see the Chairman of the Division of Education.

## CURRICULA LEADING TO CREDENTIALS IN SECONDARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the general requirements of the State of California for all degrees, the candidate shall meet the following requirements:

(a) Possess a valid general secondary credential.
(b) Present written evidence of two years of successful teaching experience.
(c) Complete 18 semester units for the administration credential (15 semester units for the supervision credential) of upper division or graduate work after holding a valid general secondary credential. These units must include a specific pattern of courses designated by the State Department of Education and the college.
(d) Maintain a grade point average of 1.75 on units under (c).
(e) Complete a minimum of 12 units of work in residence at San Diego State College after holding the general secondary credential.
(f) Make formal application to the Coordinator of Secondary Education.
(g) Earn the recommendation of the Department of Education.

Students applying for the secondary administration or supervision credentials should register with the office of the Chairman of the Department of Education and confer with the Chairman of the Administration Committee concerning the courses which may be offered in satisfaction of the requirements. Outlines of pattern requirements for either the secondary supervision or administration credentials may be obtained by writing the Coordinator of Secondary Education.

# THE BACHELOR OF EDUCATION DEGREE AND THE GENERAL ELEMENTARY CREDENTIAL

## ELIGIBILITY FOR CANDIDACY

Teachers in California public schools with a minimum of 60 semester units of standard college work are eligible for candidacy for the Bachelor of Education degree. The purpose of this degree is to increase the professional competence of teachers in California public schools who do not hold a bachelor's degree. The educational program of each applicant shall be determined on the basis of his previous preparation and of the services he is to render. In the period of professional preparation the applicant shall be guided into those learning experiences designed to meet his cultural and professional needs.

## MINIMUM REQUIREMENTS

An applicant for the general elementary credential and the Bachelor of Education degree shall comply with the procedures for application and with the requirements for personal qualifications and general training and shall have completed a program including the following minimum requirements:

a. A four-year college course of 124 semester units, or the equivalent.

b. Eighteen semester units, or the equivalent, of professional work in education, constituting an organized program designed to prepare candidates in the following areas:

   (1) The evolution of educational thought and practice as to the function of the school in a democratic society, with emphasis on the elementary school.

   (2) The nature of individual growth and development; the psychological aspects of learning; child study, with emphasis on directed observation of children; mental hygiene and personality development; parent education; guidance practices.

   (3) The selection and arrangement of learning experiences, instructional materials, learning methods and appraisal techniques related to all statutory requirements for teaching, including reading, writing, spelling, language study, arithmetic, geography, history of the United States and of California, civics including the Constitution of the United States, music, art, physical education, healthful living, morals and manners, safety education, and fire prevention.

   (4) The use of audio-visual aids in instruction.

c. Directed teaching in the elementary school, eight semester units, or the equivalent, under the supervision of superior teachers in actual classroom situations of the elementary school level.

d. Sixty-one semester units or the equivalent in basic subject fields, distributed approximately as follows:

   (1) *Social Studies.* Twelve semester units, or the equivalent, with emphasis upon current economic, political, and social problems and world history and geography, sociology and anthropology. The legal requirement in United States Constitution and American history, institutions, and ideals shall be included in the social studies program.

   (2) *Science.* Twelve semester units, or the equivalent, in the fields of physical and biological science, with emphasis upon the study and use of the environment.

(3) *English,* including speech. Twelve semester units, or the equivalent, including oral and written expression, world literature, children's literature, dramatics, detection and correction of speech defects, and the use of books and libraries.

(4) *Mathematics.* Three semester units, or the equivalent, including subject matter and techniques essential in the teaching of mathematics in the elementary school.

(5) *Health and Hygiene.* Three semester units, or the equivalent, including personal hygiene, subject matter and techniques essential in health education to elementary school pupils.

(6) *Physical Education.* Three semester units, or the equivalent, including subject matter and techniques essential in the teaching of physical education to elementary school pupils.

(7) *Music.* Eight semester units, or the equivalent, including content and techniques appropriate for the elementary school.

(8) *Art.* Eight semester units, or the equivalent, in graphic art and industrial arts applicable to learning experiences appropriate for elementary school children.

e. The remaining units necessary to complete the requirements for the Bachelor of Education degree shall be distributed among those offerings of the institution that best serve the cultural and professional needs of the candidate, except that a course or the equivalent in fire prevention must be included.

## EVALUATION OF TEACHING EXPERIENCE AND SUBJECT MATTER FIELDS

a. A candidate with two or more years' teaching experience may be awarded a maximum of 8 semester units of credit, or the equivalent, in directed teaching provided he demonstrates satisfactory skill to a representative of the institution under whose direction he is completing his degree program, or provided other conditions set by the institution to insure classroom skill are met. This credit shall not be applied until the candidate has completed at least 116 semester units, or the equivalent, of his program.

b. Credit toward the B. Ed. degree may be secured by passing comprehensive examinations in the fields of study mentioned in paragraphs (b) and (d) above.

## INSTITUTION AND RESIDENCE REQUIREMENTS

a. A minimum of 30 semester units, or the equivalent, must be secured from the college conferring the degree.

b. A least 12 semester units, or the equivalent, must be earned in campus residence course work at the college conferring the degree and must be secured after completion of at least 90 semester units, or the equivalent.

c. A maximum of 30 units may be secured by examination.

# PREPROFESSIONAL AND VOCATIONAL CURRICULA

Preprofessional and vocational curricula, which usually require four years of collegiate work, are offered. Curricular outlines of preprofessional study, which are presented on the following pages, meet the typical requirements for admission to professional schools. Students expecting to complete their professional training at other institutions should modify the suggested outlines of study to meet the requirements of the professional schools of their choice. Curricular outlines for complete training leading to vocations are also presented on the following pages.

Curricular outlines are presented for the following:

Preagricultural
Business
Predental
Engineering
Home Arts
Inter-American Relations
Journalism
Laboratory Technique
Prelegal
Life Science Vocational
Premedical
Personnel Management
Prepharmacy
Public Administration
Recreation
Presocial Work

Students planning to enter professional or vocational occupations in forestry, nursing, optometry, or veterinary science may obtain assistance from advisers in these areas in planning lower division courses leading to further education in these fields.

## PREAGRICULTURAL CURRICULA

These curricula are provided for students who plan to enter the field of agriculture to enable them to obtain basic science and general education courses before transferring to an agricultural institution. These students should ascertain the lower division requirements of the college to which they expect to transfer and include such requirements in the plan suggested below.

Students in high school preparing to study agriculture should include the following subjects: Elementary algebra, plane geometry, intermediate algebra, trigonometry, chemistry, physics, mechanical drawing, and three years of one foreign language, if required by the college to which the student expects to transfer.

*Curriculum in Plant Science:* Freshman year, physical education activities, Health Education 21, Chemistry 1A-1B, Botany 2A-2B, Physics 2A-2B, English 1, and Speech Arts 3 (32 units); sophomore years, physical education activities, Economics 1A-1B, English 2A or other literature course, Chemistry 101A-101B, Geology 1A or 2A, Bacteriology 1, Zoology 1A and Psychology 1 (32 units).

*Curriculum in Animal Science:* Freshman year, physical education activities, Chemistry 1A-1B, Zoology 1A-1B, Physics 2A-2B, English 1, Speech Arts 3, Health Education 21 (32 units); sophomore year, physical education activities, Psychology 1, English 2A or other literature course, Economics 1A-1B, Bacteriology 1, Botany 1, Chemistry 101A-101B, Zoology 20 or 8, and 100 (36 units).

Students should consult with the adviser in the preagricultural curriculum for selection and arrangement of courses.

## BUSINESS CURRICULA

The Division of Business consists of three departments: Accounting and Business Management; Marketing; and Business Education, Secretarial and Office Management. Each department offers a major in business with fields of specialization within the department, leading to the bachelor of science degree.

The Department of Accounting and Business Management offers specialization in accounting, banking and finance, business management, insurance, and credit management. The Marketing Department offers specialization in marketing and in personnel management. The Business Education, Secretarial and Office Management Department offers specialization in secretarial and office management and in teacher education leading to the special secondary and general secondary school credentials.

The first two years of the business curricula are introductory. During this period the student acquires a basis for further study and an understanding of the place that business fills in modern economic life. There are some differences in the lower division requirements in the various fields of specialization. A selection of the field of specialization should be made as early as possible by the student. A student may transfer from one field of specialization to another, but with possible loss in time because of the differences in requirements among the various fields. The student follows a program of studies that is designed to provide a vocational ability in at least one area.

Refer to the departments in the Division of Business for specific requirements in the business major with fields of specialization. Students should consult with the departmental adviser in selection and arrangement of courses.

## PREDENTAL CURRICULUM

Candidates for a degree in dentistry should ascertain the entrance requirements of the dental college to which they expect to transfer and should make whatever changes in the following typical requirements that may seem desirable in satisfying the requirements of the specific dental college.

The curriculum for dental hygiene is essentially the same as for predentistry.

High school students planning to enter dentistry should include in the high school program the following subjects: Elementary algebra, plane geometry, intermediate algebra, chemistry, physics, mechanical drawing, and three units in one foreign language if required by the college to which a student expects to transfer.

*Course of Study for Predental Curriculum:* Freshman year, physical education activities, Health Education 21, Psychology 1, Speech Arts 3, English 1, English 2A or other literature course, Chemistry 1A-1B, Physics 2A-2B and 3A-3B (32 units); sophomore year, physical education activities, Chemistry 5A, Zoology 1A-1B, Mathematics C and D, social science including courses in U. S. history and Constitution, and electives in general education (32 units).

The following courses for a third year in preparation for dentistry are suggested for students who fail to receive acceptance from a dental college after completing the prescribed 60 units: Chemistry 101A-101B; Zoology 100 and 106; Art 119A, Psychology 11; additional courses in general education.

## ENGINEERING CURRICULA

The engineering program is designed to give a student a sound training in the fundamentals of general engineering with a minimum of specialization, and at the same time provide the broad training and experiences which constitute a liberal education. The program leads to the degree of Bachelor of Science in Engineering.

Students graduating in engineering will find employment in various functions of their chosen field. For example, a student who has selected the mechanical engineering option may find employment in the operation of a steam plant, or in the application and sales of construction equipment.

The program is intended to provide the essential training in those functions which are within the scope of a four year program. These, specifically, are the production, operation, maintenance, service, sales, and management functions of engineering. Curricula and individual courses are designed to emphasize these functions. Students who desire training for work in such fields as research, design, and development should plan to complete their education at a University.

### FIELDS OF SPECIALIZATION

The freshman and sophomore years of the engineering curricula concentrate upon the development of an adequate scientific and mathematical background together with introductory engineering courses. With minor variations the first two years of study are the same for all engineering students.

The junior and senior years concentrate upon the application of this background to the study of engineering theory and practice. In the junior and senior years, optional programs are available which provide limited specialization in aeronautical, chemical, civil, electrical, electronics, and mechanical engineering, and in engineering economics. Normally, students are expected to elect one of these basic options. In certain cases equivalent programs may be worked out which will better suit the needs of an individual student.

## HIGH SCHOOL PREPARATION

The high school program should include the following subjects: Elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; solid geometry, ½ unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit.

## GENERAL REQUIREMENTS

For general requirements for the B.S. degree, refer to the section of the bulletin entitled: Bachelor of Science Degree in Arts and Sciences and to the section entitled: General Requirements for the Bachelor of Arts and Bachelor of Science Degrees.

## SPECIFIC REQUIREMENTS

For specific outline of courses in the engineering curricula including recommended electives to fulfill the requirements for general education, refer to Engineering in the section entitled: Announcement of Courses.

# HOME ARTS CURRICULUM

The Home Arts curriculum is designed to meet the needs of those students who wish to apply their knowledge to the various problems of home living. This curriculum is based on the *general major* in arts and sciences with a field of concentration in Home Economics combined with two other fields to be selected by the student in consultation with the home arts adviser and the Dean of Instruction. (Refer to the General Major in the section of the bulletin entitled: Bachelor of Arts Degree.) By appropriate selection of courses, the student may prepare for several related fields, such as radio, community recreation, home service in industry, merchandising, and social work.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the general major | 26 |
| General major (upper division) | 36 |
| Electives | 17 |
| Total units required for graduation | 124 |

*Specific requirements for the major:* Lower division: Home Economics 1, 5, 10, 55, 61A-61B; Sociology 50 and 51; six lower division units in a third field. Upper division: 15 upper division units to be selected from Home Economics 100, 101, 105, 135, 150, 160A-160B, 170, with the approval of the adviser in home arts; nine upper division units to be selected from a second field; and 12 upper division units to be selected from a third field. A minimum of six lower division units is usually required in each field of the general major as preparation for upper division work.

Students should consult with the adviser in the home arts curriculum for selection and arrangement of courses.

# INTER-AMERICAN RELATIONS

This curriculum, designed around the general major, provides (1) a basis for a more effective understanding of the opportunities and problems of international relations in the western hemisphere; (2) facilities for a basic education and training for a business or professional career involving international relations; (3) undergraduate preparation for the comprehensive examinations required for appointment in the Foreign Service, Department of State.

High school students preparing to enter this area of Foreign Service should include in the high school program three years in one foreign language, preferably Spanish.

Students should consult with the adviser in Inter-American Relations regarding an appropriate program of studies.

## JOURNALISM CURRICULUM

The purpose of the journalism curriculum is to prepare students for positions on mass communications media and to offer to teacher candidates background for educational work in journalism. The four-year program contemplates that in addition to professional training, majors shall acquire a broad background in such related fields as English, sociology, psychology, political science, economics, and history. All majors are required to take survey courses in newspaper and radio techniques and photography. Introductory courses in mass communications research are offered. The program is so designed that during the final two years, majors may take specialized work in newspaper reporting and editing, magazine writing, advertising and radio production. Producing the campus newspaper serves as a laboratory for students. Arrangements are made for students to serve internships on daily and weekly newspapers, industrial magazines and radio stations.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 12–15 |
| Major (upper division) | 24 |
| Electives | 40–43 |
| Total units required for graduation | 124 |

*Specific requirements for the major:* Lower division: Journalism 51A-51B, Physical Science 10, Speech Arts 81, and Business 2A, or proficiency in typing. Upper division: 24 upper division units in journalism including Journalism 102 and 151. A minor is not required.

## LABORATORY TECHNIQUE CURRICULUM

The laboratory technique curriculum is offered with the B.S. degree. This curriculum, with modifications for the types of licensures, is provided to satisfy the academic requirements to qualify for the examinations given by the State of California Public Health Department for Public Health Bacteriologist, Clinical Laboratory Technician, and Medical Technologist. If the curriculum outlined by this College is followed, only six months of apprenticeship are required to complete the qualifications for the licensing examinations for Public Health Bacteriologist and Clinical Laboratory Technician. Five years of experience as a Clinical Laboratory Technician are necessary to qualify for the examination for licensure as a Medical Technologist.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major required for State licensure exclusive of General Education courses | 23–37 |
| Major (upper division) | 36–44 |
| Electives | 2–24 |
| Total number of units for graduation | 128 |

*Specific requirements for the major:* Lower division (including courses in General Education, but required for licensure): Chemistry 1A-1B, * Chemistry 5, Biology 3 and 4 or Zoology 1A-1B, Bacteriology 1 or 101, Physiology, 1A and 1C, * Physics 2A and 3A. Upper division: 36 upper division units, including Chemistry 101A, *Chemistry 114, 115, 116, Bacteriology 102, 103 and one or more courses selected from Bacteriology 105, 106 or 107, * Zoology 109, Zoology 128, 104, 126, and 108, and additional electives to complete the major. Twelve units of science courses in the major field may be counted as general education in natural science.

Students should consult with the adviser in the Laboratory Technique Curriculum for selection and arrangement of courses.

---

* These courses are not required for the Public Health Bacteriologist license.

## PRELEGAL CURRICULUM

The entrance requirements of schools of law range from two years to three and four years of prelegal work. The lower division requirements of the arts and sciences curricula should be met in full whether the prelegal curriculum extends over a period of two, three, or four years.

The following curriculum is designed to meet the recommendations of standard American schools of law for a broad and liberal education. For the majority of pre-legal students a general major with concentration in economics, political science, and history, or a major-minor combination in these fields will constitute the most effective preparation for later professional study in law and for later activities in the field of business.

*Preparation for the major:* Lower division: Business 14A-14B, Economics 1A-1B, Political Science 71A-71B or 1A-1B, and a year-course in history. Recommended: six units from Philosophy 1A-1B, 3A-3B, or 20.

### Upper Division

In the junior and senior years the student will plan his course with the counsel of his adviser in terms of the field of law in which he plans to work, but keeping in mind the entrance examinations and other requirements for admission to schools of law. The course selected will be drawn from the preferred and recommended lists below. Optional courses, that is courses not found in the preferred and recommended lists, may be taken to satisfy the general major pattern requirement, but only with the consent of the student's prelegal adviser. These courses are not to be considered as general electives.

The student must complete a master plan approved by the prelegal adviser and filed with the Registrar.

*Preferred List*

Economics 133, 150, 151, 170.
History 151A-151B, 172A-172B, 175A-175B.
Philosophy 121, 129.
Political Science 139A-139B.
Psychology 145.
Sociology 173, 174.

*Recommended List*

Economics 102, 110, 111, 128, 131, 135, 142, 171, 172, 185, 190, 195.
English 106, 120, 126A-126B, 129, 131, 192.
History 111A-111B, 121A-121B, 143A-143B, 175A-175B, 179A-179B, 181A-181B.
Philosophy 101, 111A-111B, 130.
Political Science 105, 111A-111B, 120, 121, 122, 140A, 140B, 142, 143, 150A-150B, 152, 153, 154, 158A-158B, 198.
Sociology 152, 170, 174, 187.
Speech Arts 162, 191, 192.

## LIFE SCIENCE VOCATIONAL CURRICULA

Vocational curricula are offered for the fields of entomology, fish and game, and wild life. Requirements for these curricula are the same as for the B.S. degree in zoology; the specialization for a particular occupation lies within the upper division electives of the B.S. degree program.

Students in high school planning to enter any of these life science curricula should include in the high school program the following subjects: Elementary algebra, plane geometry, intermediate algebra, trigonometry, chemistry, and physics. Three years of French or German recommended.

*Courses in Entomology, Fish and Game, and Wild Life:* Courses in the field of specialization may be selected from the following:

Botany 105, Taxonomy of Plants
Chemistry 101A, Organic Chemistry
Economics 140 or
  Psychology 104, Statistics
Political Science 140A-140B, Public Administration
Zoology 101, General Physiology
Zoology 104, Microtechnique
Zoology 110, Limnology
Zoology 113, Ornithology
Zoology 115, Cold Blooded Vertebrates
Zoology 118, Mammalogy
Zoology 121, General Entomology
Zoology 122, Systematic Entomology
Zoology 125, Economic Entomology
Zoology 126, Medical Entomology
Zoology 128, Parasitology
Zoology 153, Economic Biology

Students should consult with the adviser in the life science curricula for selection and arrangement of courses.

## PREMEDICAL CURRICULUM

The entrance requirements of medical colleges ordinarily range from three to four years of premedical work. The lower division requirements of the liberal arts curricula include the general requirements of standard medical colleges and should therefore be met in full whether the curriculum extends over a period of three or of four years. All plans for premedical work should include an arrangement of courses to meet the requirements of the medical college which the student expects to enter.

Students ordinarily elect to concentrate in chemistry and zoology with a major in one and a minor in the other. Requirements for these majors and minors are described under these departments.

High school students planning to enter medicine should include in the high school program the following subjects: Elementary algebra, plane geometry, intermediate algebra, chemistry, physics, two or three years of French or German. Two years of Latin also recommended.

Students should consult with the adviser in the premedical curriculum for selection and arrangement of courses.

## PERSONNEL MANAGEMENT CURRICULA

A student desiring to prepare for personnel management may follow one of the three plans outlined below. Emphasis is placed on different areas, depending upon the vocational objective. A student preparing for graduate work in personnel management should consult with the adviser in his selected field in choice and arrangement of courses. Courses in the major are in addition to 45 units in general education courses.

*Personnel Management:* This curriculum is a general major with the three fields of study in business, economics, and psychology. Lower division requirements: Business 14A and 20, Psychology 6, and Economics 1A-1B (15 units). Upper division requirements: Business 121, 153, 154, 198A; Economics 150, 151, 185; Psychology 104A, 105A, 121, 131, 152 (36 units). Other courses in business may be substituted for Business 14A and 198A on the basis of individual counseling. Four additional upper division units must be completed for graduation. It is recommended that these units and additional electives be chosen from the following: Business 186; Psychology 104B, 122, 132; Sociology 110, 170, 185; Political Science 71A, 71B and 143.

*Public Personnel Management:* This curriculum is a general major with the three fields of study in political science, economics, and psychology. Lower division requirements: Political Science 71A-71B, Economics 1A-1B, and Psychology 6 (15 units). Upper division requirements: Political Science 140A-140B or 147A-147B, 144, 145, 146, 198; Economics 150, 151, 185; Psychology 104A, 105A, 121, 131, 152 (36 units). Another political science course may be substituted for Political Science 198 on the basis of individual counseling. Four additional upper division units must be completed for graduation. It is recommended that these units and additional electives be chosen from the following: Business 121; Economics 131; Political Science 142, 143.

*Pre-Industrial and Personnel Psychology:* This curriculum is offered under the major in psychology. For details, refer to Psychology in the section of the bulletin: Announcement of Courses.

## PREPHARMACY CURRICULUM

Some colleges of pharmacy offer a four-year curriculum, others a six-year curriculum of pharmacy. Students should ascertain the extent and requirements of the curriculum of the college of pharmacy they expect to enter. Colleges of pharmacy which offer the four-year curriculum normally permit not more than one year of credit in time for work completed in an institution other than a college of pharmacy. Colleges of pharmacy which offer a six-year curriculum normally permit not more than two years of credit in time for work completed in an institution other than a college of pharmacy. California state law requires that an applicant for the State Board Examination in Pharmacy must be a graduate of a recognized college of pharmacy which requires a resident attendance of not less than four years.

**The high school program should include the following subjects: Elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; foreign language, 2 units.**

At San Diego State College the following prepharmacy curricula are offered:

*Course of study for the four-year curriculum:* Freshman year, physical education activities, English 1 and a literature course, Chemistry 1A-1B, Zoology 1A-1B, Botany 1, Mathematics 3A or 1, and electives (32 units).

*Course of study for the six-year curriculum:* Freshman year same as for the four-year curriculum. Sophomore year, physical education activities, foreign language if needed, social science including U. S. history and Constitution courses, Physics 2A-2B and 3A-3B, Psychology 1, Health Education 21, and electives (32 units).

Students should consult with the adviser in the prepharmacy curricula for selection and arrangement of courses.

## PUBLIC ADMINISTRATION CURRICULUM

The program of training in public administration can be developed through an adaptation of a general major or through a major in political science. In either case, the student will follow a sequence of work dealing with the principles and problems of organization for the carrying out of the functions of government, and public management. This latter aspect deals primarily with the directing and coordinating of work operations, the staffing of public agencies, the processes of budgeting and financial control, and the dynamics of management, namely planning, research, communications, leadership and human relations in the administrative process.

The public administration curriculum may be adapted to several goals, one being the taking of junior administrative examinations for entrance into the government service at the local, state or federal levels, and preparation for advancement up the governmental ladder. It is designed also to prepare students for graduate work in public administration.

Selected students may participate in an internship program in local government offices. Working under the close supervision of governmental officials and the adviser in public administration, the intern deals with actual administrative procedures and problems in government.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 12 |
| Major (upper division) | 36 |
| Electives | 31 |
| Total units required for graduation | 124 |

*Specific requirements for the major:* Lower division: Political Science 71A-71B, Economics 1A-1B. Upper division: 36 upper division units, including Political Science 140A-140B, 198, Economics 131, and 140.

Students planning to enter public administrative fields should consult with an adviser in public administration.

### Minor

A *minor in public administration* is offered in arts and sciences for students majoring in fields other than political science or public administration. This minor consists of Political Science 71A-71B, 140A-140B, and three units of upper division work selected from Political Science 198, Internship in Government Administration, or other political science course.

### Certificate Programs in Public Administration and in Social Work Administration

*Certificate in Public Administration:* Admission to candidacy for the Certificate in Public Administration is open to all public service employees without reference to previous academic experience. Candidacy will be established by approval of the Coordinator of Public Administration. To receive the Certificate in Public Administration, the candidate must complete an approved pattern of eight courses, with a grade point average of 1.5.

*Certificate in Social Work Administration:* Admission to candidacy for the Certificate in Social Work Administration will be established by approval of the Coordinator of Public Administration. To receive the Certificate in Social Work Administration, the candidate must complete an approved pattern of 30 units in courses at San Diego

State College with a grade point average of 2.0. Prerequisites for admission to candidacy are 20 units in approved social science courses.

Candidates for the certificate programs may obtain further information on requirements by writing to the Coordinator of Public Administration, San Diego State College.

## RECREATION CURRICULUM

The curriculum in recreation is arranged under the plan for the general major to provide a program to train for recreation and camp leadership, work with youth groups, and related activities. Refer to the general major in the section of the bulletin entitled: A.B. Degree in Arts and Sciences.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 20–22 |
| General major (upper division) | 36 |
| Electives | 21–23 |
| Total number of units required for graduation | 124 |

*Specific requirements for the major:* Lower division: Sociology 50 and 51; Physical Education 53. In addition, men are required to complete Physical Education 63. Women must include Physical Education 2A, 4, 5, and 6. Required in related fields: 12 units selected from the fields of art, industrial arts, music, physical education, and speech arts, with a maximum of six units in any one field. Courses in related fields which are designated as general education courses may be applied toward general education requirements. Upper division: 36 units distributed as follows: 13 units selected from Recreation 165, 170A-170B, 184A-184B, 199; nine units selected from Sociology 110, 173, 174, 185, 187, 190; nine units selected from Psychology 106, 131, 132, 145, 150, 170; Education 174; Physical Education 151. Four additional upper division units in electives are required to complete the 40 upper division units for graduation.

Students should consult with the adviser in the Recreation Curriculum for selection and arrangement of courses.

## PRESOCIAL WORK CURRICULUM

The professional curriculum in social service prepares for admission to graduate work in recognized American schools of social work. This curriculum should be pursued by those who plan careers in federal, state and local welfare work; social work in public schools including preparation for a teaching credential; family and children's private case work agencies; social settlement work; county probation work; child welfare agencies; statistical and investigational work in private and public agencies; work in public institutions for the defective and delinquent; medical social service and psychiatric social work in hospitals and clinics; executive positions in social work; and social work in numerous other organizations.

The lower division requirements of the arts and sciences curricula include the general requirements of recognized professional schools of social work and should therefore ordinarily be met in full. The courses indicated below meet the requirements for the general major. For description of the general major, refer to the section in the bulletin on the bachelor of arts degree in arts and sciences.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 21 |
| Major (upper division) | 38 |
| Electives | 20 |
| Total number of units for graduation | 124 |

*Specific requirements for the major:* Lower division: Sociology 50 and 51, Economics 1A-1B, Political Science 71A-71B or 1A-1B, and Psychology 11 (21 units). Biology 1 or 3 and 4 should be taken as general education courses in natural science. Recommended: courses from anthropology, foreign language, and speech arts. Upper division requirements: Sociology 103, 187, 190, and an upper division elective (12 units); Economics, nine units selected from 102, 131, 150, 170, 185, 195; Political Science, six units selected from 140A, 140B, 142, 143; Psychology 145, 150, 151 (nine units); Zoology 165 or 155 (two units). An additional two units in upper division electives must be taken to complete the 40 upper division units required for graduation. Twelve units of social science in the major field may be counted as general education in social science.

Students should consult with the adviser in the social work curriculum for selection and arrangement of courses.

### Certificate in Social Work Administration

A certificate in Social Work Administration is available to persons professionally engaged in the field of social work. This program is described under the Public Administration Curriculum.

# ANNOUNCEMENT OF COURSES

## COURSE NUMBERS

Courses numbered from 1 to 99 are lower division (freshman or sophomore) courses; those numbered 100 to 199 are upper division (junior or senior) courses; those numbered 200 to 299 are graduate courses (see section on Admission and Registration for information concerning eligibility to enroll in these courses) those numbered 300 to 399 are professional education courses to be taken at the graduate level.

## CREDIT FOR UPPER DIVISION AND GRADUATE COURSES

A student with lower division standing is not eligible to take upper division courses, with the following exceptions: A student in the last semester of his sophomore year who is approaching upper division standing must carry sufficient lower division units to complete the required minimum of 60 units may carry upper division units for the remainder of his study load. A student with sophomore standing may carry upper division courses for upper division credit provided that he has the written approval of the chairman of the department and the Dean of Instruction. This written approval must be filed in the Office of the Registrar on the form "Adjustment of Academic Record." Blank forms may be obtained by the student at the Office of the Registrar.

Graduate credit for courses numbered 200 to 299 is limited to students with graduate status. (See Admission to Graduate Study in section on Admission and Registration.)

## GENERAL EDUCATION COURSES

Course numbers preceded by an asterisk (*) are general education courses which may be applied toward the 45 unit requirement in general education, unless specifically required as part of the major. Refer to the list of general education courses in the section of the bulletin entitled: General Requirements for the Bachelor of Arts and Bachelor of Science Degrees.

## UNITS

Figures in parentheses indicate the unit value of the course.

One "unit" represents 50 minutes of recitation or lecture, together with the required preparation, or three hours laboratory work each week for a semester of 18 weeks.

## SEMESTER IN WHICH COURSES ARE OFFERED

Roman numeral I indicates course is offered in Fall semester. Roman numeral II indicates course is offered in Spring semester.

Following the course title are designations of credit and the semester in which course is offered. Examples:

(3) I----------------------------------Three units. Offered first semester
(3) I, II---------------Three units. Offered first semester and second semester
(3-3) Year, I
Three units each semester. Year sequence beginning in the first semester
(3-3) Year, I, II
Three units each semester. Year sequence beginning either semester

Although the college fully expects to carry out the arrangements planned in the list of courses, it reserves the right to make changes. Classes in which the enrollment does not come up to the minimum number set by the State Department of Education may not be offered or may be postponed.

### PREREQUISITES

Prerequisites for courses are stated. A student should not enroll in a course for which he is not eligible.

Admission to all graduate courses requires graduate status and permission of the instructor.

### PROVISIONAL COURSES

Courses number 40 to 45 are open only to students who are in the provisional program. Other students (those not having provisional status) are not eligible to take these courses.

# ACCOUNTING AND BUSINESS MANAGEMENT

## IN THE DIVISION OF BUSINESS

### Major

A *major in arts and sciences* is offered in *business* for the B.S. degree. Students majoring in this department may specialize in one of the following sub-fields: (A) Accounting, (B) Banking and Finance, (C) Business Management, (D) Insurance, and (E) Credit Management. Courses in the major are in addition to 45 units in general education courses. A minor is not required of business majors.

Lower division requirements in the major: Business 2, 8, 14A-14B, 18A-18B; Economics 1A-1B. Upper division requirements: A minimum of 36 upper division units to include Economics 111 or 170 or Business 123; Economics 140; Business 121; and 27 units selected from one of the following subfields:

A. *Accounting:* Business 118A-118B, 133, 160A-160B, 161A-161B, 162, 163, 164A-164B, 165A-165B, 167, 169.
B. *Banking and Finance:* Business 105A, 118A-118B, 125, 133, 134, 137, 153, 154, 162, 163; Economics 102, 131, 135, 142, 190.
C. *Business Management:* Business 118A-118B, 123, 125, 126, 133, 134, 137, 153, 154, 163, 184; Economics 128, 135, 150.
D. *Credit Management:* Business 103A, 123, 133, 134, 137, 162, 163, 186; Economics 105, 131, 135, 170.
E. *Insurance:* Business 118A-118B, 125, 126, 127A-127B, 128A-128B or 128C-128D or 128E-128F, 133, 134; Economics 128, 135, 142.

### Minor

A *minor in arts and sciences* is offered in *business* with specialization in one of the subfields listed under the major above. The minor consists of 15 to 22 units in business courses, six units of which must be in upper division courses selected from one of the subfields listed under the major above. Business 14A-14B must be included in the minor.

A *teaching minor* is not offered in business but is offered in *business education* for the general secondary school credential. For statement of requirements, refer to the credential.

### Courses in Accounting and Business Management

All business courses in this department for the major or minor are listed in this section of the bulletin under Business.

# AESTHETICS

## IN THE DIVISION OF FINE ARTS

Major or minor work is not offered in aesthetics; however, certain courses in this field are required as part of the majors in art and in music. For specific information, refer to these departments.

### Lower Division Courses

***2. Introduction to Music** (3) I

Practical approach to hearing music with understanding and pleasure, through study of representative compositions of various styles and performance media, great musicians and their art. Music correlated with other arts through lectures, recordings, concerts. Closed to music majors or minors.

***5. Art Orientation** (2) II

An illustrated lecture course dealing with aesthetic meaning and its relation to the structure of art products. Designed to increase both understanding and appreciation of the visual world in general and of the fine arts in particular.

***50. Appreciation and History of Art** (2) I

A survey of art development in the painting, sculpture, architecture, and handicrafts from dawn of art to the Renaissance. Illustrated.

***51. Survey of Mexican Art** (2) I

A study of Mexican and Middle American Art from earliest time to present.

**52A-52B. Survey of Oriental Art** (3-3) Year, I

A study of the art of the great cultures of the Orient. (52A is a prerequisite for 52B.)

### Upper Division Courses

***102. Great Music** (3) II

Instrumental and vocal music in the larger forms studied through directed listening. Artistic trends and their effect upon music composition and performance. No prerequisite, but completion of Aesthetics 2 recommended. Not open for credit to music majors. Formerly Aesthetics 100.

***138. Introduction to Aesthetic Appreciation** (1) I

Major forms of expression and aesthetic experience in art, music and literature, presented by an interdepartmental staff through lectures, demonstration, and panel discussions. Not open to students with credit for Comparative Literature 138.

***150. Appreciation and History of Art** (2) II

The period from the Renaissance through the modern school treated in the same manner as in Aesthetics 50.

**160. Techniques and Procedures of the Art Museum Worker** (3) I

Designed to acquaint the student with the nature and function of the art museum in the community and to give him experience in the methods by which it serves the public. Prerequisite: Aesthetics 5 or 50 and 150.

***162. History and Philosophy of the Dance** (2) I

A study of the historical background of the dance, with special emphasis upon its development in America and its present status in education and the creative arts. Not open to students with credit for Physical Education 162.

## AIR SCIENCE

### IN THE DIVISION OF AIR SCIENCE AND TACTICS

### Air Force Reserve Officers' Training Corps

The Department and Division of Air Science and Tactics at San Diego State College offers the curriculum prescribed by the Air Force Reserve Officers' Training Corps. This curriculum consists of a four-year course, including a two-year basic course and a two-year advanced course.

The objectives of the Air Force ROTC program are the development of qualities of leadership and character essential to civil and military responsibility and the training of officer reserve personnel. Completion of the four-year course and a bachelor's degree leads to commission in the Air Force Reserve. Students who have demonstrated outstanding qualities of scholarship and leadership may receive regular commissions in the Air Force. A maximum of one-third of the students graduating in the program may be eligible to receive the regular commission.

Flight training is not offered as part of this program; however, Air Force ROTC graduates have a high priority for such training and, if accepted, serve as reserve officers on active duty during the training period.

*Eligibility:* A regularly enrolled male student is eligible for admission to the basic course if he is a citizen of the United States, not less than 14 years of age and has not reached his 23d birthday, and is physically qualified for military training. For admission to the advanced course, the student must not have reached his 25th birthday and must have completed the basic course or its equivalent. At the discretion of the Professor of Air Science and Tactics, up to two years of pattern credit in the basic course may be allowed for prior active service in the armed forces. Normally, a student entering the advanced course must have two years of college work remaining. The applicant must pass required screening tests and be selected by the Professor of Air Science and Tactics and the President of the College.

Attendance at one summer camp is required of each student to qualify for the commission. The summer camp is six weeks in length and is held at an active Air Force base. The student receives $75 per month during this training period. Uniforms, equipment, subsistence, and transportation are furnished by the Air Force.

Students in the basic and advanced courses are furnished uniforms, equipment, and textbooks for military science. Students in the advanced course are given, in addition, commutation of subsistence allowance of approximately $31 per month. Upon acceptance of this allowance, the student executes a written agreement with the United States Government and with the President of the College to complete the advanced course, completion of such course becoming a prerequisite to graduation.

## Basic and Advanced Courses

The basic course requires three hours of instruction and drill per week each semester. The advanced course requires five hours. In addition, each student in the advanced course must attend one summer camp of six weeks. The advanced course is offered in three separate specialties to prepare the student for one of three distinct career fields in the Air Force. These options are General Technical, Administration and Logistics, and Flight Operations. Student selection of specialty is based primarily on the academic pursuits of the individual and the approval of the Professor of Air Science and Tactics. Students enrolled in the AFROTC program pursue their regular courses of study in fields of their choice. Major work is not offered in air science and tactics, but a minor is offered.

## Minor

A *minor in arts and sciences* is offered in *air science and tactics*. The minor consists of 15 to 20 units in air science and tactics, six units of which must be in courses carrying upper division credit.

## Lower Division Courses

**1A-1B. First-Year Basic Air Science** (2-2) Year, I

Two hours of classroom instruction and one hour of drill per week. World Political Geography to provide the AFROTC student with a general knowledge of geopolitics and a global viewpoint for use in directing his future studies of subsequent Air Force subjects.

**21A-21B. Second-Year Basic Air Science** (2-2) Year, I

Two hours of classroom instruction and one hour of drill per week. Maps and aerial photographs, aerial navigation, meteorology, aerodynamics and propulsion, applied air power, organization for the defense of the U. S. A., personal maintenance, and weapons familiarization.

## Upper Division Courses

**131A-131B. First-Year Advanced: General Technical** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. The primary technical fields and the related equipment used in the Air Force.

**132A-132B. First-Year Advanced: Administration and Logistics** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. Individual records, nonappropriated funds, transportation, and supply.

**133A-133B. First-Year Advanced: Flight Operations** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. An augmentation of the academic phases of the training in the Flying Schools of the Air Training Command. (Student must be qualified for and express the desire to undertake flying training upon receipt of commission. Training will be taken as a student officer in grade of 2nd Lieutenant upon completion of the academic and AFROTC programs.)

**141A-141B. Second-Year Advanced: General Technical** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. A continuation of Air Science 131A and 131B.

**142A-132B. Second-Year Advanced: Administration and Logistics** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. Purpose and basic functions of the staff, administration of personnel at wing-base level, functions of Comptroller and Food Service Supervisor.

**143A-143B. Second Year Advanced: Flight Operations** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. Advanced instruction in navigation and bombing and the theory of radar as applied to both.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

# ANTHROPOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

Major work is not offered in anthropology; however, courses in anthropology may be included as part of a general major or social science major. Students wishing to use anthropology as a field of concentration in the *general major* should include the following courses in the lower division: Anthropology 1A-1B, 2 or 3; Geography 1, 2 or Geology 1A-1B; Sociology 50, 51; recommended: Spanish or German. The following supplementary fields of study are recommended in the upper division with a view to later specialization in anthropological work: For *archaeology:* art, geography, geology; for *physical anthropology:* psychology, statistics, and zoology; for *museum work:* art, education, and psychology. For further information on the *general major*, refer to the section on the Bachelor of Arts Degree.

Courses in anthropology may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of the requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in anthropology. The minor consists of 15 to 22 units in anthropology, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in anthropology for the general secondary credential; however, anthropology may be used as a part of the *social science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the requirements for the teaching minor for these credentials.

### Lower Division Courses

*** 1A-1B. General Anthropology** (3-3) I

Origin and antiquity of man. Theories of human descent. Classification of races. Origin and early development of civilization.

**2. Physical Anthropology** (3) I

An introduction to the studies of primatology and anthropometry. The comparative anatomy of the monkeys and great apes, the emergence of the anthropoids, the reconstruction of early man from fossil evidence. The landmarks, measures and indices used in the metrical study of the living human body and skeletal material. Sexual differences and growth changes in the skull and skeleton. Medico-legal applications.

**3. Survey of Archaeology** (3) II

A review of the history of modern archeology and a discussion of its methods. The development of archaeological techniques in reconstructing the ancient cultures of the Mediterranean world. The problems of present day archaeology in the Near East, the Orient and the Americas. The principles and basic techniques used in the excavation of sites and the reporting of findings.

*** 54. Social Anthropology** (3) II (Not offered in 1952-53)

An anthropological study of social institutions in primitive and civilized societies. The evolution of family organization, religion, property right, and government traced in elementary and advanced civilization.

### Upper Division Courses

**151A. The North American Indian** (3) I

Pre-Columbian cultures of the North American Indian. The origin and migration of New World peoples. Industries, arts, crafts, social organization, religion and other phases of American Indian civilization.

**151B. Indian Civilization of Middle America** (3) II

The development of civilization in Pre-Columbian Mexico and Central America: Aztec, Mayan, and related cultures.

*** 152. World Ethnography** (3) I (Not offered in 1952-53)

The cultural patterns of representative aboriginal peoples. Industries, arts, social organization and supernaturalism considered with a view to environmental adjustment, historical development and functional interrelation. Ethnological theories reviewed and applied in interpreting illustrative aboriginal societies.

**153. Primitive Religion** (3) II (Not offered in 1952-53)

Beliefs and ritual of primitive man. Magic and religion. Forms of animism and polytheism. Primitive mentality and the supernatural.

**161. The California Indian** (3) Summer

A survey of native California Indian culture with stress on the Indian groups of Southern California. The industries, arts, social organization, folklore and religion will be considered as revealed through the study of living peoples and archaeological evidences.

*** 165. Ethnology and Race Psychology** (3) I (Not offered in 1952-53)

The biological basis of race, somatic and serologic typology, racial mentality, tests and their ethnopsychological significance, abnormality in ethnic groups. Race and culture; ethnic aspects of demography.

**172. Indian Cultures of the Southwest** (3) Summer

Indian cultures of the past and present in the Southwestern states. Arts, crafts, architecture and religion as revealed through archaeology and ethnology.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## ART

### IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is offered in *art* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Every student who plans to major in art, whether in arts and sciences or in the teacher education program, must complete the following basic courses: Required in the major: Art A (or high school equivalent), Art B, 6A-6B, and 14A. Required in general education: Aesthetics 5 or 51 and 50.

In arts and sciences the student majoring in art may choose either a group of courses in which the crafts are emphasized or a group of courses in which the graphic arts are emphasized. One of the following plans should be selected:

*Emphasis on crafts:* The student should add to the list of basic courses required of all art majors the following courses in the major: lower division: Art 6D, 7, 61B and two units of art electives; upper division: Aesthetics 150, Art 106A or B or C, 106D, 111A, 117A-117B, 119A-119B, and eight units of art electives. This program leads in the direction of industrial design, interior design, cabinet making, sculpture, weaving, textile design, ceramics, etc.

*Emphasis on graphic arts:* The student should add to the list of basic courses required of all art majors the following courses in the major: lower division: Art 15A, 16A, and four units of art electives; upper division: Aesthetics 150, Art 106A or 106B, 112A-112B, 115A-115B, 116A-116B, 117A, and six units of art electives. This program leads in the direction of illustration, portraiture, landscape painting, mural design, poster design, production illustration, advertising design, fashion design, etc.

Art majors are not required to complete a minor.

A *teaching major in art* is offered for the general secondary and special secondary credentials. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *art*. The minor consists of 15 to 22 units in art, six units of which must be in courses carrying upper division credit.

A *teaching minor* is offered in *art* for the general secondary credential. Art may be offered only as a second minor for the general elementary and kindergarten-primary credential. For statement of requirements, refer to these credentials.

### Art Appreciation, History and Orientation

For courses in appreciation, history of art, and art orientation, see aesthetics. Many students, regardless of the field in which they may be majoring, recognize the need for an intelligent approach to the subject of art and art appreciation. However, due to the erroneous popular feeling that art is a subject requiring "talent," these students may refrain from enrolling in art courses. For students who desire a better understanding of art, but who do not hope to acquire any of the art skills, the following courses are recommended.

| | *Units* |
|---|---|
| Aesthetics 5, Art Orientation | 2 |
| Aesthetics 50, History and Appreciation of Art | 2 |
| Aesthetics 51, Survey of Mexican Art | 2 |
| Aesthetics 52A-52B, Survey of Oriental Art | 6 |
| Art 8, Costume and Home-furnishing | 2 |

Other courses which require certain skills but which are not beyond the ability of the average college student are:

| | |
|---|---|
| Art 61B, Crafts | 2 |
| Art 6A, Design | 2 |
| Art A, Drawing and Composition | 2 |
| Art 94, Costume design | 2 |

### Lower Division Courses

**Art A. Drawing and Composition** (2) I, II

Problems involving perspective to develop ability to draw still life, furniture, exteriors, interiors, and the like. (High school equivalent may excuse the student from this course.)

**Art B. Drawing and Composition** (2) I, II

Drawing of mechanical and natural forms by the use of line and value. Emphasis on proportion and structure. Some quick sketching, gesture and contour drawing. Prerequisite: Art A.

*** 6A. Furniture Design** (2) I, II

Fundamentals of design and composition and theory of color. Basic course used as a prerequisite for all advanced work.

**6B. Design** (2) I, II

Original work in creative design and representation with special stress on modern tendencies. Prerequisite: Art 6A.

**6D. Design** (2) I, II
Study of the principles of design through the making of furniture. Prerequisite: 6A.

**7. Line, Color and Display** (2) I, II
The principles of line, color and arrangement applied to store and window display. Study and observation of windows, color and materials used in display. Building models and practical problems in arranging colors, textures, and forms in windows to fit different kinds of merchandise. (Students taking this course for upper division credit, Art 107, will be required to do additional work.)

*8. **Costume and House Furnishings** (2) I, II
An appreciative study of modern architecture and modern house furnishings, with emphasis on the spirit of gracious living and an appreciative study of the modern dress with emphasis on suitability to the figure, the personality and the occasion.

**14A. Lettering** (2) I
Fundamental art principles applied to lettering. Practice for quick, accurate lettering; original problems using letters as design. Prerequisite: Art 6A.

**14B. Posters and Commercial Art** (2) II
The application of lettering to posters, newspaper and magazine advertising, and other forms of commercial art. The study of composition combined with lettering and special study of modern tendencies in publicity. Prerequisites: Art 6A, 14A.

**15A-15B. Life Drawing** (2-2) Year, I, II
Drawing from the nude model. Prerequisite: Art A-B.

**16A-16B. Painting** (2-2) I, II
Semester I: Composition of still life in oil. Semester II: Landscape and more advanced composition in oil. Prerequisite: Art A-B.

**17A-17B. Sculpture** (2-2) I, II
Creative design in such materials as clay, wood, stone, concrete, etc. Prerequisites: Art 6A-6B.

**61A. Crafts in the Elementary Schools** (2) I, II
A foundation course which develops unification of work of the elementary grades through activities and experiences. These experiences grow out of environmental activities. They include study and working of clay, lumber and tools, textiles, and cardboard construction. Prerequisite: Art 6A.

**61B. Crafts** (2) I, II
Problems involving the application of design principles to various fields—pottery, textiles, weaving, metal work, wood-carving, and book-binding. Prerequisite: Art. 6A.

**94A-94B. - Costume Design** (2-2) Year, I, II
Original designs of modern costumes suitable to the individual or to distinct types; the drawing of fashion figures; the rendering of fabrics and textures. Prerequisite: Art 6A.

**95A-95B. Interior Design** (See Art 195A-195B)

## Upper Division Courses

**106A-106B. Printmaking** (2-2) I, II
Study of print crafts which includes the making of linoleum blocks, wood engravings, etchings and lithographs. Prerequisites: Art A. B. 6A.

**106C. Illustration** (2) II
Same as 160A-B except that printmaking is applied to problems of book illustration. Prerequisites: Art A, B, 6A.

**106D. Advanced Furniture Design** (2) I, II
(See Art 6D) Prerequisite: Art 6D.

**107. Advanced Line, Color and Display** (2) I, II
(See course description under Art 7)

**111A-111B. Industrial Design** (2-2) Year, I, II
Design of objects for manufacture with reference to their use, materials, and in accordance with factory practices and machine techniques. Practice in the techniques of presentation, working drawings, renderings in perspective and scale models. Prerequisite: Art 6A-6B.

**112A. Design and Composition** (2) I
Imaginative organization of space by means of color, dark and light, perspective, and textures of various materials. Prerequisites: Art A-B, 6A-6B.

**112B. Design and Composition** (2) II
Continuation of Art 112A. Prerequisite: Art 112A.

**115A-115B. Life Drawing and Painting** (2-2) I, II
Drawing and painting from nude and costume models. Prerequisite: Art A-B.

**115C-115D. Advanced Life Drawing and Painting** (2-2) Year, I, II
Study of human figure in terms of form patterns. Prerequisite: Art 115A-115B.

**116A-116B. Advanced Painting** (2-2) Year, I, II
Painting in oil from still life, landscape, or models, stressing composition. Prerequisite: Art 16A or 16B.

**117A-117B. Advanced Sculpture** (2-2) Year, I, II
Creative design in such materials as clay, wood, stone, concrete, etc. Prequisites: Art 6A-6B and 17A or 17B.

**119A. Ceramics** (2) I
Building of pottery on the basic techniques of coil, slab, mold making, and slip casting. Ceramic sculpture, glazing and kiln operations: Art 6A.

**119B. Ceramics** (2) II
Study of glazes and elementary clay technology. Mold making, slip casting with application to individual creative problems. Prerequisite: Art 119A.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**194A-194B. Costume Design** (2-2) Year, I, II
For description, see Art 94A-94B. Prerequisite: Art 6A.

**195A-195B. Interior Design** (2-2) I, II
The consideration of the house as a unit; the arrangement of garden, house, floor plan, and furniture as functional and decorative problems. Prerequisite: Art A and 6A; 195A is a prerequisite for 195B.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**200A-200B. Special Problems** (2-2) I, II
A graduate course in which students may carry out projects in various fields of art under the direction of faculty members who are specialists in the field chosen. Students registering for this course must apply for work within a certain field after discussions with the art faculty.

**290. Bibliography** (1) I, II
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Pererquisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis or Project** (3) I, II
Guidance in the preparation of a project or thesis for the master's degree.

# ASTRONOMY

## IN THE DIVISION OF PHYSICAL SCIENCES

Major work is not offered in astronomy. Students desiring to prepare for advanced work in astronomy should include the following courses: Astronomy 1, 2, 3, 9, and 10; Mathematics 3A-3B, 4A-4B; Physics 4A-4B-4C; a reading knowledge of French and German.

Courses in astronomy may be used as part of the general science major for the general junior high school credential. For specific information, refer to the outline of requirements for the general science teaching major for this credential.

### Minor

A *minor in arts and sciences* is offered in astronomy. The minor consists of 15 to 22 units in astronomy, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in astronomy; however, astronomy may be used as part of the *general science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

***1. Descriptive Astronomy** (3) I, II

A cultural course planned to develop an appreciation of astronomy with emphasis on the solar system. Attention is given to the methods by which astronomical knowledge has been gained. A six-inch refractor and an eight-inch reflecting telescope are available for observation.

***2. Modern Astronomy** (3) II

A study of the stellar system in the light of modern research, especially photographic and spectrographic. Prerequisite: Astronomy 1 or permission of the instructor.

***9. Practice in Observing.** (1) I, II

A course designed to supplement Astronomy 1. The course will include constellation study, use of astronomical coordinates, and descriptive observations of celestial objects with the telescope. One three-hour evening laboratory period each week. Recommended: Astronomy 1 or concurrent registration in Astronomy 1.

**10. Advanced Observational Astronomy** (1) II

A continuation of Astronomy 9. More advanced problems in observing will be taken up such as the determination of latitude by observations of Polaris, transit observations, astronomical photography, etc. One three-hour evening laboratory period each week. Prerequisite: Astronomy 9.

**12. Elementary Navigation** (3) I

A study of compass corrections, time, line of position, use of celestial coordinates, etc. A few class hours devoted to the use of tables such as H.O. 214 for the solution of astronomical triangle. One laboratory period each week. Astronomy 1 desirable.

### Upper Division Courses

***101. Principles of Astronomy** (3) I (Not offered 1952-53)

A course designed particularly to provide background for teachers. It consists of two lectures and one laboratory period each week. Students will be required to become familiar with the prominent constellations, brighter stars in the sky, and with the general characteristics of the solar and stellar system.

**103. Astronomical Optics** (2) II

This course aims to acquaint the students with the optics and methods of testing of an astronomical telescope. The course consists of one lecture and one laboratory period each week. The student is required to grind a four-inch astronomical telescope mirror. Prerequisite: Astronomy 1 or permission of instructor.

***105. Historic Development of Astronomy** (3) I

A study of the more important problems and astronomical concepts in the light of their historical development. Particular attention is given to the biography and contributions of the more important astronomers, such as, Galileo, Kepler, Newton, Herschel, Bessel, etc.

**107. Method of Least Squares and Computing Practices** (3) I

Fundamental principles with applications in the fields of astronomy, physics, and engineering. Prerequisite: Math 4A or equivalent.

**110. Introduction to Study of Variable Stars** (3) II

A study will be made of the various types of variable stars, their spectra, periods, methods of observing, etc. In the laboratory the light curve of several typical variables will be observed. Two lectures and one laboratory period each week. Prerequisite: Astronomy 2. Astronomy 9 desirable.

**112. Elementary Astrophysics** (3) I (Not offered 1952-53)

A lecture course in the application of physics to astronomy: Much of modern astronomical research is in the field of astrophysics. An occasional laboratory period will be substituted by appointment for the lecture period. Prerequisites: Astronomy 2 or college physics.

**113. Surveyor's Course in Practical Astronomy** (3) II

The principles of spherical astronomy adapted to the needs of engineering students. Computation and observation. Two lectures and one three-hour laboratory period each week. Prerequisite: Engineering 1A or permission of the instructor. Astronomy 1 and 9 desirable.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisites: three units in astronomy and permission of instructor.

## BACTERIOLOGY
### IN THE DIVISION OF LIFE SCIENCES

A *major in arts and sciences* is offered in bacteriology for the A.B. degree. Courses in the major are in addition to 45 units in general education courses, except that nine units in natural science may be applied toward general education requirements. Lower division requirements: in the major, Bacteriology 1; in related fields, either Biology 3 and 4, or Zoology 1A-1B, or equivalent; Chemistry 1A-1B and Chemistry 5. Recommended: French or German, Math C and D or 7A-7B; Physics 2A-2B and 3A-3B; and Physiology 1A. Upper division requirements: 24 units in bacteriology and related fields to include Bacteriology 102, 103, Chemistry 101A, 114, and additional courses in bacteriology. Zoology 128 and 109 are recommended as courses to be included in the major. A minor is not required of students majoring in bacteriology.

A *major in arts and sciences* is offered in bacteriology for the B.S. degree. Courses in the major are in addition to 45 units in general education courses, except that nine units in natural science may be applied toward general education requirements. Lower division requirements: in the major, Bacteriology 1; in related fields, either Biology 3 and 4, or Zoology 1A-1B, or equivalent; Chemistry 1A-1B and Chemistry 5. Recommended: German or French, Math C and D or 7A-7B; Physics 2A-2B and 3A-3B; and Physiology 1A and 1C. Upper division requirements: 36 units in bacteriology and related fields to include Bacteriology 102, 103, four units of 105, 106, and 107; Zoology 128; and Chemistry 101A, 114, and 115. A minor is not required for the B.S. degree.

A *teaching major* is not offered in bacteriology; however, courses in bacteriology are included in the *major in life science and general science* for the general secondary credential and the *major in general science* for the junior high school credential. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *bacteriology*. The minor consists of 15 to 22 units in bacteriology to include Bacteriology 1 or 101, 102, 103, and the remainder of the units to be chosen from Bacteriology 105, 106, 107, and 199. Recommended courses to supplement the minor: Physiology 1A and 1C; Zoology 20; Chemistry 101A, 114, 115.

A *teaching minor* is not offered in bacteriology; however, bacteriology may be used as part of the *general science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials or as part of the *minor in life science and general science* for the general secondary credential. For specific information, refer to these credentials.

### Lower Division Courses

**1. General Bacteriology (4) I, II**

An introduction to bacteriology. Effects of physical and chemical agencies upon bacteria; biochemical activities of bacteria; microscopic examination and cultivation of bacteria; the bacteria of air, water, soil, milk and dairy products, other foods; industrial applications. Introduction to disease-producing bacteria. Two hours of lecture and six hours of laboratory per week. Prerequisite: Chemistry 1A or 2A. (Chemistry 1A-1B for minor in bacteriology.)

### Upper Division Courses

**101. General Bacteriology (4) I, II**

Lectures and laboratory work of Bacteriology 1 with additional work to be prescribed by the instructor. Prerequisite: Chemistry 1A or 2A. (Chemistry 1A-1B for minor in bacteriology.)

**102. Advanced Bacteriology (5) I**

A survey of the agents of disease and methods of host resistance. Laboratory experience in diagnosis and immunologic techniques. Two lectures and three laboratories per week. Prerequisites: Bacteriology 1 or 101, and Chemistry 101A. Recommended: Biochemistry, physiology.

**103. Serology (4) II**

A survey of the principles and techniques used in serological diagnosis of disease agents. The course is planned for students interested in research or laboratory technology. Two lectures and two laboratories per week. Prerequisites: Bacteriology 1 or 101, Bacteriology 102, and Chemistry 101. Recommended: Biochemistry, physiology.

**105. Bacterial Metabolism (2) I**

A course to provide a basic knowledge of the principles by which micro-organisms derive energy to support the life processes. Prerequisites: Bacteriology 1 or 101, Chemistry 101A. Recommended: Biochemistry, Bacteriology 102 and 103. This course is offered every third semester.

**106. Immunology. (2) II (Not offered in 1952-53)**

A lecture course dealing with the factors underlying virulence in microorganisms, and the mechanisms of bacterial infection. Specific and nonspecific antimicrobial immunity; the antigen-antibody reaction; and consideration of the immunochemistry of protein and nonprotein cell substances. Prerequisites: Bacteriology 102, Chemistry 101A. Recommended: Bacteriology 107, Chemistry 114. This course is offered every third semester.

**107. Virology (2) II**

A survey of viruses and Rickettsias as agents of disease. An introduction to virological techniques, and routes of infection with further consideration of concepts of epidemiology, diagnosis, pathology, and host-responses. Prerequisite: Bacteriology 102, 103, or equivalent.

**199. Special Study (1-6) I, II**

Individual study. Six units maximum credit. Prerequisites: 15 units of work in the life sciences (including courses in bacteriology) with grades of A or B; and permission of instructor.

### Graduate Courses

**290. Bibliography (1) I, II**

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study (1-6) I, II**

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis or Project (3) I, II**

Guidance in the preparation of a project or thesis for the master's degree.

# BIOLOGY

## IN THE DIVISION OF LIFE SCIENCES

Major or minor work is not offered in biology (see bacteriology, botany, and zoology); however, courses in biology may be used as part of the general science major for the general junior high school credential, or the general science minor for the general elementary, kindergarten-primary, and special secondary credentials, or the life science and general science minor for the general secondary credential.

### Lower Division Courses

**A. Solution and Dosage** (2) I

Arithmetic review with computing of dosage, percentage of solutions, apothecaries weights. Two hours per week.

***1. Survey of Biology** (3) I, II

A survey of life science with emphasis on the biology of man in relation to modern life. Three lectures per week. If laboratory credit is wanted by the student, Biology 3 should be taken instead of Biology 1; or Biology 1 may be followed by Biology 4. Not open to students with credit for Biology 3, 4, 10A, 10B, 40, Zoology 1A, 1B, Botany 2A, or 2B.

***3. Principles of Biology** (3) I, II

A consideration of basic biological phenomena. Two hours of lecture and three of laboratory each week. Not open to students with credit for Biology 1, 40, 10A, 10B; Botany 1, 2A, 2B; or Zoology 1A, 1B.

***4. Plant and Animal Types** (3) I, II

An introduction to the major groups of plants and animals with emphasis on local forms. Two hours of lecture and three of laboratory each week. Not open to students with credit for Biology 10B; Botany 1, 2A, 2B; or Zoology 1A, 1B. Prerequisite: Biology 1 or 3.

# BOTANY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in botany for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Botany 1 or 2A-2B, Chemistry 1A-1B or 2A-2B. Recommended: German, French or Spanish, Zoology 1A-1B, Bacteriology 1, and Geology 1A-1B or 2 and 3. Upper division requirements: A minimum of 24 upper division units, at least 18 units of which must be in botany and six of which may be related courses in bacteriology, chemistry, geology, zoology, selected with the approval of the departmental representative. Nine units in natural science may be applied toward general education requirements. Botany majors are not required to complete a minor.

A *major in arts and sciences* is offered in botany for the B. S. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: in the major, Botany 1 or 2A-2B; in related fields, Chemistry 1A-1B or 2A-2B. Recommended: German, French, or Spanish, Zoology 1A-1B, Bacteriology 1, and Geology 1A-1B or 2 and 3. Upper division requirements: 36 units in botany and approved related fields, to include Botany 102, 107, 114, 150, and 155. Chemistry 101A is strongly recommended. Nine units in natural science may be applied toward general education requirements. A minor is not required.

A *teaching major* is not offered in botany; however, courses in botany are included in the *major in life science and general science* for the general secondary credential and the *major in general science* for the junior high school credential. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in botany. The minor consists of 15 to 22 units in botany, six units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in botany; however, botany may be used as part of the *general science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials or as part of the *minor in life science and general science* for the general secondary credential. For specific information, refer to these credentials.

## Lower Division Courses

**1. Introduction to Botany** (4) I, II

Designed primarily for students who desire a general acquaintance with the fundamentals of botany. Not open to students who have credit for Botany 2A or 2B, but may be used as a prerequisite to upper division courses. Three lectures, and one three-hour laboratory per week.

**2A-2B. General Botany** (4-4) I, II

Year course covering fundamentals of structure, general behavior, morphology and relationship of plants, including an introduction to classification and distribution of seed plants. Two lectures and six hours of laboratory work per week. Botany 2A is a prerequisite for 2B.

**4. California Plants** (2) II (Not offered in 1952-53)

Classification and ecology of representative orders of wild flowers, trees, and chaparral of San Diego region, including practice in the use of keys. One lecture and three hours laboratory per week. Occasional Saturday field trips.

## Upper Division Courses

**102. Mycology** (4) I

A study of the different groups of fungi. Special attention will be given to the parasitic and economic forms, their life history, structure, and classification. Prerequisite: Botany 2B or Botany 1.

**107. Plant Physiology** (4) II

The activities of plants, including food manufacture, absorption, conduction, transpiration, respiration, growth and movement. Two lectures and two laboratory periods per week. Prerequisites: Botany 1 or Botany 2A, and Chemistry 2A-2B or equivalent.

**112. Cultivated Trees and Shrubs** (3) I

Recognition of the common cultivated trees and shrubs of the San Diego region. Trips to local parks and private gardens. One lecture and six hours per week laboratory or field work. Prerequisites: Botany 1, 2A-2B, 4, or equivalent.

**114. Plant Taxonomy** (3) II

Identification, classification and distribution of representative orders of flowering plants. One hour lecture and six hours per week of laboratory and field work. Prerequisites: Botany 1, or 2A-2B, or 4.

**119. Field Botany** (4) Summer

Study of the local native vegetation with emphasis on ecological units within floristic areas. Field trips to be supplemented with laboratory work in herbarium procedure.

**126. Plant Pathology** (3) II

A practical course dealing with the principles of disease in plants, control measures, and quarantine procedures. Emphasis is placed on the determination and control measures of those pathogenic organisms which affect crops, trees and shrubs and nursery stock. Two lectures and one laboratory period per week. Prerequisite: Botany 1 or 2A-2B and 102.

*** 150. Readings in Biology** (2) II

Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles,, ecology, economic zoology, zoogeography, breeding habits and animal behavior. Not open to students with credit for Zoology 150.

**153. Economic Biology** (2) I

Study of uses of plants and animals to man and their destructive effects. Consideration also given to general methods of control and conservation. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor. Not open to students who have credit for Zoology 153.

**155. Genetics** (3) II

Principles of plant and animal genetics, with experiments and demonstrations illustrating the mechanisms of heredity. Two hours of lecture and three hours of laboratory per week. Not open to students with credit for Zoology 155. Prerequisites: Biology 3 and 4, Zoology 1A-1B, or Botany 2A-2B.

**158. Conservation of Wildlife** (3) II

A survey of plant and animal resources with emphasis on their conservation and intelligent use. Prerequisite: a college course in biology or consent of the instructor. Not open to students with credit for Zoology 158.

*** 160. Evolution** (2) II

The development of theories of evolution. Two lectures per week. Prerequisite: Biology 1 or equivalent. Not open to students with credit for Zoology 160.

**162. Agricultural Botany** (2) I

A study of California crop plants, their general identification, cultural methods, and regional distribution. Field trips to be arranged. Prerequisite: Botany 1 or Botany 2A-2B.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisites: 15 units in botany with grades of A or B; and permission of instructor.

### Graduate Courses

**290. Bibliography** (1) I, II

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis or Project** (3) I, II

Guidance in the preparation of a project or thesis for the master's degree.

## BUSINESS COURSES

### IN THE DIVISION OF BUSINESS

The Division of Business consists of three departments: Accounting and Business Management; Marketing; and Business Education, Secretarial and Office Management. For complete descriptions of the major in business with the various fields of specialization, refer to these departments or to the business curricula in the section of the bulletin entitled: Preprofessional and Vocational Curricula.

All courses in business offered by the three departments in the Division of Business are listed below.

### Lower Division Courses

**A. Business Mathematics** (1) I, II

A practical course in the mathematics of business. A thorough study of interest, compound interest, discount, insurance rates, etc.

**1A-1B. Typewriting** (3-3) Year, I, II

Development of a command of a keyboard, acquisition of speed and the artistic arrangement of typewritten material with special reference to commercial forms, tabulation and billing. (1A is a prerequisite for 1B.)

**2. Mathematics of Finance** (3) I, II

Interest and annuities; amortization; sinking funds; valuation of bonds; depreciation; mathematics of building and loan associations. Prerequisites: Two years of algebra in high school, or equivalents.

**2A. Personal-Use Typewriting** (3) I, II

A short course designed for those not wishing to enter the business office but desiring a knowledge of or skills in the use of the typewriter. Five hours laboratory practice.

**3A. Office Machines: Rotary Calculator** (1) I, II

A six-weeks course designed to teach students the operation of the rotary calculator. Operations basic to statistics, accounting, and other areas needing this skill will be stressed.

**3B. Office Machines: Key-Driven Calculator** (1) I, II

Same as 3A, except the key-driven calculator is substituted for the rotary calculator.

**3C. Office Machines: Printing Calculator** (1) I, II

Same as 3A, except the printing calculator is substituted for the rotary calculator.

**4. Introductory Typewriting** (1) I, II

A short, introductory course building the fundamentals of typing in a six-weeks period. Students enroll for the first six weeks, the second six weeks, or the third six weeks in a semester. Not open to Business Education or Secretarial majors.

**5A-5B. Shorthand** (5-5) Year, I

An intensive course designed for the practical preparation of office secretaries. A thorough study of the Gregg System. Development of the ability to read and write shorthand rapidly and correctly, both literary and commercial. The shorthand speed necessary to pass a civil service examination is attained by the end of the year. (5A is a prerequisite for 5B.)

**6A-6B. Advanced Shorthand** (3-3) Year, I or II

Development of speed in writing and transcription. Advanced dictation on letter forms, legal forms, speeches, and literary and technical material. Prerequisite: Business 5A-5B or equivalent. (6A is a prerequisite for 6B.)

**8. Business Communication** (3) I, II

A course designed to give training in writing as a means of solving modern business problems. Prerequisites: English 1 and Business 2A or its equivalent.

**14A-14B. Principles of Accounting** (3-3) I, II

The balance sheet; profit and loss statement; the opening, conducting, and closing of books for different kinds of businesses; organizations, reorganizations, dissolutions, and consolidations, etc., keeping in view the best modern accounting practice. Five hours lecture and laboratory. (14A is a prerequisite for 14B.)

**18A-18B. Business Law** (3-3) I, II

The fundamental principles of business law. Cases showing the actual application of the principles to commercial and business transactions. The subjects covered: Contracts, sales, agency, negotiable instruments, insurance, and wills. Either semester may be taken first.

***20. Consumer Problems** (3) I, II

Consumer incomes; bases of consumer choice-making; practical problems of buying food, clothing, shelter, transportation, insurance, etc.; family budgeting; market structure and functions seen from the consumer's point of view. Not open to students with credit for Business 120. A general education course in family life education.

**21. Organization and Management of Small Business** (3) I

Problems confronting the small business man with regard to finance, organization, management. Reasons for failures and success in small business. Specific study of various kinds of small businesses.

**24. Retailing** (3) I, II

Study of retail stores, emphasizing the problems of store managers and merchandising executives; store location, organization, personnel, sales promotion, buying and handling of merchandise, inventory, turnover, and control methods. Problems of profitable operation under changing conditions.

**25. Salesmanship** (3) I, II

Theoretical and psychological backgrounds of salesmanship, newer concepts of selling; the selling of ideas and services; steps in a sale: Attention, interest, desire, closing; the development of clienteles and of good will; the personal factor in salesmanship.

**26. Applied Salesmanship** (2) II

Practice in selling; supervised work in cooperating stores, or outside selling; relationships between theory and practice. Prerequisite: Business 25 and permission of instructor.

**27. Advertising Principles** (3) I, II

Advertising as a sales promotional tool in marketing activities; consumer, market and product analysis; advertising media; preparation of advertisements; measurement of advertising effectiveness; economic and legal aspects of advertising; public relations; advertising campaigns.

**65A-65B. Record Keeping.** (1-3 each semester) Year, II

Application of accounting practice and principles to accounting practice; the technical arrangement of accounting forms, records and reports found in business. Prerequisite: Business 14A. Business 65A is a prerequisite for 65B.

### Upper Division Courses

**103A. Office Management** (3) I, II

A study of the functions of the office, duties of the office manager, organization of the office, communication functions, physical facilities involved, personnel relationships of management and worker, and the controls necessary for efficient output.

**105A. Office Systems** (3) I, II

A course designed to develop fundamental skills in the instructional figuring and bookkeeping machines used in offices, together with their interrelating functions as these affect office systems.

**105B. Office Systems** (3) I, II

The relationship of voice-writing, addressing, and duplicating machines to office procedures and routines is studied and skills developed in these areas of use.

**108. Records Management** (3) I, II

Intensive survey of the various means of preparing, keeping, storing, and disposing of office records to facilitate the efficient management of business. Various systems of records management will be studied together with the equipment and supplies required.

**113A-113B. Secretarial Office Practice** (5-5) Year, I

Practice in the duties and routines of office work as required of the stenographer and secretary with special emphasis on the shorthand dictation and transcription problems arising in various types of offices. Prerequisite: Business 1A-1B, 5A-5B, or their equivalent.

**118A-118B. Advanced Commercial Law** (3-3) Year, I, II

An advanced study of the law of personal and real property, partnership, corporation and the laws regulating trade and trade practices and competition. Elective for business majors.

**120. Consumer Income Management** (3) I, II

Functions and responsibilities of consumers; problems of choice-making; planning expenditures for housing, household operation, insurance and investments. Economics of installment buying, borrowing procedures, control of frauds, legislation affecting consumers. Not open to students with credit for Business 20.

**121. Business Management** (3) I, II

Problems of business management as an interrelated whole. A discussion of the problems of the business manager with particular reference to the character of the problems involved and to the control policies and devices of the manager. Prerequisite: Economics 1A-1B.

**123. Marketing Principles** (3) I, II

Study of marketing functions; activities of producers, wholesalers, retailers and other middlemen; channels of distribution; integration of marketing activities; price policies; government regulation. Prerequisite: Economics 1A-1B.

**124. Marketing Administration** (3) II

An advanced course dealing with practical aspects of marketing. Solutions of problems faced by producers, wholesalers, retailers and other middlemen in the marketing of their products. Prerequisite: Business 123.

**125. General Insurance** (3) I

Economic theory of risk; transfer of risk; distribution and prevention of loss; types of insurance carriers; problems of rate making; the insurance contract; coverages; special forms of life, fire, marine and casualty insurance; state supervision.

**126. Casualty Insurance** (3) II

The nature and reasons for existing practices in compensation and casualty insurance. The social and legal bases of insurance, fundamental principles of rate making, policy provisions, state regulation and state insurance. Prerequisite: Business 125.

**127A. Life Insurance—Principles and Practice** (3) I

Types of life insurance companies and associations, home office and agency organization, types of contracts, surrender value, policy loans and extended insurance, surplus and dividend policies, reserves, group, industrial and social insurance, and state supervision.

**127B. Life Insurance Salesmanship** (3) II

Special problems of life insurance selling, with emphasis on the psychological aspects of insurance selling, on specific techniques for finding prospects, for managing the sales interview. For students interested in life insurance selling, and those planning to obtain life underwriter's certification.

**128A-128B. Advanced Life Insurance** (3-3) Year, I

An advanced course in life insurance. The emphasis is on preparation for the C. L. U. Certificate. 128A is a prerequisite for 128B.

**128C-128D. Advanced Life Insurance** (3-3) I

Prepares the student for Part D of the Chartered Life Underwriters examination showing how life insurance strengthens banking credit, financial structure of corporations, and partnerships; also, life insurance as an investment. Business 128C is a prerequisite for Business 128D.

**128E-128F. Advanced Life Insurance** (3-3) Year, I

Prepares for part of the Chartered Life Underwriters examination. Covers the four sections, "Life Insurance Fundamentals," "General Education," "Law, Trust and Taxes," and "Finance"; teaches proficiency in the analysis of cases or problems. Business 128E is a prerequisite for Business 128F.

**133. Corporation Finance** (3) I, II

The corporate form of organization, instruments of long-time finance, methods of raising capital, efficient financial management, the financing of reorganizations, and governmental control. Prerequisite: Economics 1A-1B. Not open to students who have credit for Economics 133.

**134. Investments** (3) I

Investment principles and practices with emphasis upon problems of the small investor, such as tests of a good investment, sources of information, types of stocks and bonds, mechanics of purchase and sale, investment trusts, real estate mortgages, and the like.

**137. Credits and Collections** (3) I, II
The credit man and his work, including the instruments with which he works, sources of credit information, the technique of his department, collection methods, legislation for the protection of debtor and creditor, and credit insurance.

**153. Personnel Management** (4) I, II
Problems in the management of personnel relations, including techniques of selecting, training, supervising and rating employees. Methods used by management in job evaluation; wage and salary payment plans; employee services; health and safety; union relationships; stimulation of interest.

**154. Wage and Salary Administration** (3) II
Problems of job analysis; major techniques of job evaluation, including ranking, classification, point system, factor comparison; problems of wage and salary administration, incentive pay methods; merit rating plans. Not open to students with credit for Political Science 146.

**160A-160B. Advanced Accounting** (3-3) Year, I
An intensive study of the corporation, its accounting and financial problems; a thorough study of the balance sheet; depreciation; factory accounting, etc. Prerequisite: Business 14A-14B. (160A is a prerequisite for 160B.)

**161A-161B. Cost Accounting** (3-3) Year, I
Principles and methods of cost accounting in the mercantile establishment and in the factory. A study of industrial accounting procedure, the forms used, and their application to practical problems. 161A is a prerequisite for 161B.

**162. Accounting Systems** (3) II
The accounting systems used in various types of business and financial concerns. Some practice in devising and installing systems. Prerequisite: Business 14A-14B.

**163. Financial Statements** (3) II
The construction, composition, analysis and interpretation of accounting reports with particular emphasis on the form, content and phraseology of reports. Prerequisite: Business 160A-160B.

**164A-164B. Income Tax Procedure** (3-3) Year, I
A study of the laws and a consideration of the problems arising from state and federal income, inheritance and corporation tax. 164A is a prerequisite for 164B.

**165A-165B. Auditing** (3-3) Year, I
The fundamental principles of accepted procedures of auditing and related types of accounting engagements. 165A is a prerequisite for 165B. Prerequisite: Business 160A-160B.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**167. Governmental Accounting** (3) I
A comparative study of accounting systems used by municipalities, counties, and the State of California; detailed comparisons with commercial practice; procedures in handling budget accounts, appropriations, and encumbrances; subsidiary records; cost records; internal checks; auditing.

**169. C. P. A. Review** (3) II
An intensive review of the accounting principles and procedures covered in the accounting theory and accounting practice sections of the uniform C. P. A. examination prepared by the American Institute of Accountants. Prerequisite: Business 160A-160B, 161A-161B, 164A-164B, 165A-165B, 167.

**181. Radio Sales and Advertising** (3) I, II
A study of advertising trends in radio advertising; time buying, audience survey, and program types in relation to products to be advertised via radio broadcasting. Includes publicity and promotion of radio programming organization of a radio station; relationship between the business and entertainment factors of radio broadcasting. Prerequisite: Consent of the instructor. Not open for credit to students with credit in Speech Arts 181.

**184. Sales Management** (3) I

Consideration of problems confronting the modern sales executive; selection, training, compensation and control of the sales force; sales analysis; sales quotas; sales costs and budgets; market and product research and analysis; coordination of personal selling with other form of sales effort.

**185. Advertising Copy and Layout** (2) II

Introduction to principles and techniques of copy writing; types of copy; preparation of layouts; mechanical methods employed by the artist, engraver and printer; legislation and regulations affecting advertising claims. Prerequisite: Business 27, or permission of instructor. Not open to students with credit for Journalism 185.

**186. Store Management** (2) I

Retail locations, buildings, layouts and fixtures; store supplies and maintenance; receiving, marking, storing, wrapping and delivering merchandise; customer service, adjustments, credit and collections; expense control. Prerequisite: Business 24, or permission of instructor.

**187A. Buying Techniques** (2) I

Buying for department and specialty stores; customer demand; functional bureaus that aid in buying; stock plans; merchandise resources; foreign buying; trading techniques; terms and discounts; credit and shipping terms; the regulation of trade practices. Prerequisite: Business 24, or permission of instructor.

**187B. Merchandising Techniques** (2) II

Methods of dollar and unit control in retail stores; pricing, turnover, inventory methods and control; legislation; budgets; arithmetic of merchandising; profitability of specific methods of merchandising. Prerequisite: Business 24, or permission of instructor.

**188. Advertising Media** (2) I

A thorough coverage of advertising media. Market characteristics; rates and sources of information; evaluation of media; problems of coverage, duplication, costs and scheduling; advertising salesmanship. Prerequisite: Business 27, or permission of instructor.

**189. Advertising Problems** (3) I

Principles of advertising applied to the solution of actual advertising problems encountered by business firms. Estimating opportunities for effective use; promotional campaigns; selection of media, retail advertising, national advertising, advertising agencies; advertising services of publishers. Prerequisite: Business 27, or permission of instructor.

**190. Objectives and Curricula in Business Education** (3) II

A study of the objectives of business education and a detailed analysis of the factors involved in the construction of a business curriculum.

**196. Work Experience** (2) I, II

Supervised work in cooperating stores or offices; relationship between theory and practice in specific business conditions. Prerequisite: Permission of instructor.

**198A-198B. Investigation and Report** (1 to 3 each semester) I, II

A comprehensive and an original study of a problem connected with business under the direction of one or more members of the business staff. Prerequisite: Senior standing and permission of the instructor. 198A is a prerequisite for 198B.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## Graduate Courses

**200. Readings in Current Literature in Business Education** (2) I

Specialized reading in one or more phases of business education, followed by a discussion and written report of the value of each article read.

**203. Office Management (2)**
An intensive study of the problems of office management and their solution. The relation of records, reports, budgets and manuals to managerial control. Prerequisites: Business 14A-14B, 103A.

**213. Problems in Business Education (2) II**
Designed to fit the needs of individual students and their problems through the writing of research papers, of a term or individual study nature. The studies to be made will cover the principles of good teaching, trends in Business Education, current literature.

**221. Basic Business Education (2)**
An introduction to the content and methodology of teaching basic Business Education.

**223. Problems of Distributive Business (2)**
Critical analysis of distributive business problems in the light of changing economic, social and governmental conditions. Prerequisite: Business 121, 123.

**233. Administration and Supervision of Business Education (2) I**
Designed to provide students who hold, or who expect to hold, administrative positions in Business Education with the techniques necessary for successful executive work.

**260. Advanced Problem Analysis (Accounting) (2)**
The study of conditions causing various accounting problems with special emphasis upon the theory and practices involved in their solution. Prerequisite: Business 160A-160B, 161, 165.

**290. Bibliography (1)**
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study (1-6) I, II**
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis or Problem (3)**
Guidance in the preparation of a project or thesis for the master's degree.

## BUSINESS EDUCATION, SECRETARIAL AND OFFICE MANAGEMENT

### IN THE DIVISION OF BUSINESS

### Major

A *major in arts and sciences* is offered in *business* for the B.S. degree. Students majoring in this department, with business as the major, may specialize in one of the following subfields: (A) *General Business;* (B) *Secretarial;* or (C) *Office Management.* Courses in the major are in addition to 45 units in general education courses. A minor is not required for the B.S. degree.

The student majoring in business must complete the requirements in one of the following fields of specialization:

(A) **General Business:** Lower division: Business 1A-1B, 8, 14A-14B, 18A-18B, plus the requirements in one of the following subfields:

  (1) *Accounting:* Nine units selected from Business 2, 21, 24, 25, 27.
  (2) *Accounting-Secretarial:* Business 5A-5B, or nine units selected in consultation with the adviser if the student has the equivalent of 5A-5B.
  (3) *Merchandising:* Business 24, 25, 27.
  (4) *Secretarial:* Business 5A-5B, or nine units selected in consultation with the adviser if the student has the equivalent of 5A-5B.

Upper division requirements: 36 upper division units to include Business 103A, 105A-105B, 108, and 24 units selected from courses in one of the following subfields which corresponds to the lower division preparation:

(1) *Accounting:* Business 121, 160A, 164A, and 15 units selected with the approval of the adviser from the following recommended courses: Business 123, 125, 133, 134, 137, 153, 154, 160B, 161A, 161B, 185; Economics 135, 140, 150, 170.

(2) *Accounting-Secretarial:* Business 121, 160A, 164A, or 113A-113B; and 11-15 units selected with the approval of the adviser from the following recommended courses: Business 123, 125, 134, 153, 154, 160B, 161A, 161B, 164B; Economics 150, 170.

(3) *Merchandising:* Business 121 and seven units selected from Business 185, 186, 187A, 187B, and Art 107; and 14 units selected with the approval of the adviser from the following recommended courses: Business 120, 123, 124, 125, 134, 137, 153, 154, 184; Economics 150, and 170.

(4) *Secretarial:* Business 113A-113B, and 14 units selected from the following recommended courses: Business 120, 121, 123, 125, 134, 153, 154, 164A, 185; Economics 150, and 170.

(B) **Secretarial:** Lower division: Business 1A-1B, 5A-5B, 8, 14A-14B, 18A-18B. Upper division: 39 upper division units consisting of the following courses: Business 103A, 105A-105B, 108, 113A-113B, 125, 134, 153, 164A, 185, 196.

(C) **Office Management:** Lower division: Business 1A, 2A (or equivalent), 2, 8, 14A-14B, 18A-18B. Upper division: 42 upper division units consisting of the following courses: Business 103A, 105A-105B, 108, 121, 137, 153, 154, 160A, 161A, 196; Economics 140, 170; Psychology 121.

### Major for Teaching Credentials

A teaching major in business education is offered for the special secondary and the general secondary credentials. For a statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *business* with specialization in one of the subfields listed under the major above. The minor consists of 18 to 22 units to include Business 14A-14B and either Business 1A-1B or Economics 1A-1B; and six or more upper division units selected from courses in one of the subfields, A or B or C, listed under the major above.

A *teaching minor in business education* is offered for the general secondary credential. For a statement of requirements, refer to this credential.

### Courses in Business Education, Secretarial, and Office Management

The descriptions for all courses in business offered by the Department of Business Education, Secretarial and Office Management are listed in this section of the bulletin under Business Courses.

## CHEMISTRY

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in chemistry for the A.B. and for the B.S. degrees. Courses in the major are in addition to 45 units in general education courses. These curricula are outlined below.

A *teaching major in physical science and general science* is offered for the general secondary school credential and a *teaching major in general science* is offered for the general junior high school credential. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in chemistry. The minor consists of 15 to 22 units, six units of which must be in courses carrying upper division credit. Chemistry 1A-1B, or its equivalent, must be included in the minor.

A *teaching minor in physical science and general science* is offered for the general secondary, special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Curricula for Chemistry Majors in Arts and Sciences

The curriculum outlined below for the B.S. degree is based upon the recommendations of the Committee for Professional Training of Chemists of the American Chemical Society. It qualifies graduates for many types of positions as chemists and provides the training required by most universities for admission to graduate work in chemistry. This department is on the approved list of the American Chemical Society. Students may also arrange a program which leads to the A.B. degree and meet the recommendations of the American Chemical Society and the requirements of most universities for admission to graduate work in chemistry.

The final curriculum outlined below for the A.B. degree is designed for students who do not intend to become professional chemists, but who desire the major in chemistry as part of a general education or in preparation for training in a related profession. By proper choice of electives, graduates can meet the requirements for admission to medical schools. The sequence of courses listed below represents the minimum technical requirement for an A.B. degree with a major in chemistry. A minor is required of chemistry majors taking the A. B. degree. A minor is not required for the B. S. degree.

### Plan for B.S. Degree and Certificate of the American Chemical Society

| | Units | |
|---|---|---|
| *First year* | *1st Sem.* | *2d Sem.* |
| Chemistry 1A-1B | 5 | 5 |
| Physics 4A | – | 4 |
| Mathematics 3A-3B | 3 | 3 |
| * Health Education 21 | 2 | – |
| * Psychology 1 | – | 3 |
| * Biology 1 or 3 | 3 | – |
| * English 1 | 3 | – |
| * P. E. activity | ½ | ½ |
| | 16½ | 15½ |

| | Units | |
|---|---|---|
| *Second year* | *1st Sem.* | *2d Sem.* |
| Chemistry 5A-5B | 4 | 4 |
| Physics 4B-4C | 4 | 4 |
| Mathematics 4A-4B | 3 | 3 |
| †* German 1, 2 | 3 | 3 |
| * Speech Arts 3 | 2 | – |
| * Social Science | – | 3 |
| * P. E. activity | ½ | ½ |
| | 16½ | 17½ |

| *Third year* | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Chemistry 101A-101B | 4 | 4 |
| Chemistry 102A-102B | 1 | 1 |
| Chemistry 110A-110B | 3 | 3 |
| † German 8A-8B | 3 | 3 |
| * Social Science | 3 | 3 |
| * Lit., Phil., and Arts | 3 | – |
| | 17 | 14 |

| *Fourth year* | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Chemistry 111 | – | 3 |
| ‡ Advanced Chemistry | 9 | 8 |
| * Lit., Phil., and Arts | 3 | – |
| Electives | 4 | 4 |
| | 16 | 15 |

* General education courses (nine units of chemistry, physics, and mathematics may be applied toward general education requirements.)

† The B.S. degree may be obtained without the Certificate of the American Chemical Society by substituting for the German courses, six units of general education courses and six units of electives.

‡ Must include four units lecture and one unit laboratory in chemistry courses requiring three full year-courses in chemistry as prerequisites. Remainder may include courses in related subjects by approval of department.

## Plan for A.B. Degree and Certificate of the American Chemical Society

| | Units | |
|---|---|---|
| *First year* | *1st Sem.* | *2d Sem.* |
| Chemistry 1A-1B | 5 | 5 |
| Physics 4A | – | 4 |
| Mathematics 3A-3B | 3 | 3 |
| * Health Education 21 | 2 | – |
| * Psychology 1 | – | 3 |
| * Biology 1 or 3 | 3 | – |
| * English 1 | 3 | – |
| * P. E. activity | ½ | ½ |
| | 16½ | 15½ |

| | Units | |
|---|---|---|
| *Second year* | *1st Sem.* | *2d Sem.* |
| Chemistry 5A-5B | 4 | 4 |
| Physics 4B-4C | 4 | 4 |
| Mathematics 4A-4B | 3 | 3 |
| †* German 1, 2 | 3 | 3 |
| * Speech Arts 3 | 2 | – |
| * Social Science | – | 3 |
| * P. E. activity | ½ | ½ |
| | 16½ | 17½ |

| *Third year* | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Chemistry 101A-101B | 4 | 4 |
| Chemistry 102A-102B | 1 | 1 |
| Chemistry 110A-110B | 3 | 3 |
| † German 8A-8B | 3 | 3 |
| * Social Science | 3 | 3 |
| * Lit., Phil., and Arts | 3 | – |
| | 17 | 14 |

| *Fourth year* | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Chemistry 111 | – | 3 |
| ‡ Chemistry electives | 2 | 3 |
| Minor (U. D.) | 6 | 3 |
| * Lit., Phil., and Arts | 3 | 4 |
| Electives | 3 | – |
| | 14 | 13 |

* General education courses (nine units of chemistry, physics, and mathematics may be applied toward general education requirements.)

† The A.B. degree may be obtained without the Certificate of the American Chemical Society by substituting for the German courses, six units of general education courses and six units of electives.

‡ Must include four units lecture and one unit laboratory from courses requiring three full year-courses in chemistry as prerequisites.

## Plan for A.B. Degree for Related Professions

| | Units | |
|---|---|---|
| *First year* | *1st Sem.* | *2d Sem.* |
| Chemistry 1A-1B | 5 | 5 |
| * Physics 2A-2B | 3 | 3 |
| * Physics 3A-3B | 1 | 1 |
| * Mathematics 7A-7B | 3 | 3 |
| * English 1 | 3 | – |
| * Psychology 1 | – | 3 |
| * P. E. activity | ½ | ½ |
| | 15½ | 15½ |

| | Units | |
|---|---|---|
| *Second year* | *1st Sem.* | *2d Sem.* |
| Chemistry 5A-5B | 4 | 4 |
| †* French or German | 3 | 3 |
| * Speech Arts 3 | 2 | – |
| * Health Education 21 | – | 2 |
| * Biology 1 or 3 | 3 | – |
| * Lit., Phil., and Arts | – | 3 |
| Elective | 3 | 3 |
| * P. E. activity | ½ | ½ |
| | 15½ | 15½ |

| *Third year* | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Chemistry 101A-101B | 4 | 4 |
| Chemistry 102A-102B | 1 | 1 |
| Chemistry 110A-110B | 3 | 3 |
| * Social Science | 3 | 3 |
| * Lit., Phil., and Arts | 3 | – |
| * Elective | 3 | – |
| Minor | – | 3 |
| | 17 | 14 |

| *Fourth year* | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Chemistry 111 | – | 3 |
| Chemistry electives | 3 | 2 |
| * Social Science | 3 | – |
| Minor | 3 | 3 |
| Electives | 7 | 7 |
| | 16 | 15 |

* General education courses.

† Six units of general education courses may be substituted for the French or German.

### Lower Division Courses

**1A-1B. General Chemistry** (5-5) Year, I, II

General principles of chemistry with emphasis on inorganic materials. Three lectures and six hours of laboratory per week. Qualitative analysis is included in the second semester. Prerequisites: Elementary algebra and plane geometry. Recommended: High school chemistry, physics, and additional mathematics.

***2A-2B. Fundamentals of Chemistry** (3-3) Year, I

A general course including inorganic, organic, and biological chemistry for students not intending to take further work in chemistry. Emphasis is placed on applications of chemistry to everyday life. Two lectures and one laboratory period per week. Not open to students with credit for Chemistry 1A-1B.

**5A. Elementary Quantitative Analysis** (4) I

Theoretical consideration of the principles of gravimetric and volumetric analysis. Practice in standardizing reagents and analyzing samples. Two lectures, and two laboratory periods per week. Prerequisite: Chemistry 1A-1B, and facility in the use of logarithms and slide rule.

**5B. Quantitative Analysis** (4) II

Further work in the theory and practice of volumetric and gravimetric analyses and the study of electro analytical methods. Two lectures and two laboratory periods per week. Prerequisite: Chemistry 5A.

### Upper Division Courses

**101A-101B. Organic Chemistry** (4-4) Year, I

The first semester lecture stresses aliphatic compounds and includes an introduction to aromatic compounds. The second semester stresses the aromatics, continues with more complex aliphatics and introduces mechanisms of organic reactions. The laboratory work includes development of technique and the synthesis of typical aliphatic and aromatic compounds. Three lectures and three hours of laboratory per week. Prerequisite: Chemistry 1A-1B. (Chemistry 101A-101B and 102A-102B replace the former courses in Chemistry 101, 102, and 103.)

**102A-102B. Organic Chemistry Laboratory** (1-1) Year, I

Synthesis of typical aliphatic and aromatic compounds. Study of the theory and practice of laboratory operations. Three hours of laboratory per week. Must be taken concurrently with 101A-101B.

**105. Advanced Quantitative Analysis** (4) II

Advanced work in the theory and practice of volumetric, gravimetric, and electroanalysis. Prerequisite: Chemistry 5A. Not open to students with credit for Chemistry 5B.

**110A-110B. Physical Chemistry** (3-3) Year, I

Theoretical principles of chemistry with emphasis on mathematical relations. Three lectures per week, problems and reports. Prerequisites: Physics 2A-2B, or equivalent; Math. 4B, or equivalent; Chemistry 5A-5B.

**111. Physical Chemistry Laboratory** (3) II

Physico-chemical apparatus and measurements, with emphasis on technical report writing. Discussion period and three laboratory periods per week. Prerequisite: Chemistry 110B, or concurrent registration with permission of the instructor.

**114. Biochemistry** (3) I

The chemistry of carbohydrates, fats, proteins, enzymes, vitamins and hormones. Nutrition, intermediary metabolism and chemotherapy are discussed. Three lectures per week. Prerequisite: Chemistry 103 or by permission of the instructor. Recommended: Elementary biology or zoology.

**115. Biochemistry Laboratory** (2) II

Laboratory work in the testing, synthesis, isolation and analysis of biochemical materials. Chemical rather than biological considerations are emphasized. Two laboratory periods per week. Prerequisites: Chemistry 5A and credit or registration in Chemistry 114. Recommended: Chemistry 155.

**116. Clinical Chemistry** (3) II

Lectures and laboratory work on the chemical composition of blood, urine, milk and body tissues. One lecture per week and two laboratory periods per week. *Open primarily* to students enrolled in the Laboratory Technician Curriculum. Prerequisite: Chemistry 115.

**118. Colloid Chemistry** (2) II (Offered 1951-52 and alternate years)

The theoretical principles of colloid chemistry and the preparation, properties and practical applications of colloids. Two lectures per week. Prerequisite: Chemistry 101, 110A and 110B.

**122. Glass Blowing** (1) II

Elementary training in the manipulation of glass. Prerequisite: Chemistry 1A-1B. One laboratory period per week.

**127. Advanced Inorganic Chemistry** (3) II
(Offered 1952-53 and alternate years)

A lecture course dealing with such topics as the physical basis of the periodic system, complex inorganic compounds, and the nature of the chemical bond. Three lectures per week. Prerequisite: Three years of chemistry.

**144A-144B. Principles of Chemical Engineering** (3-3) Year, I
(Offered 1952-53 and alternate years)

Industrial stoichiometry, flow of fluids, heat transfer, unit processes and types of industrial equipment. Three lectures per week, problems and reports. Prerequisite: Credit or registration in Chemistry 110A-110B.

**154. Organic Qualitative Analysis** (3) II

A systematic study of the identification of organic compounds and mixtures. One lecture and two laboratory periods per week. Prerequisite: Chemistry 5B or 105, 102 and 103.

**155. Instrumental Methods of Analysis** (3) I

Theory and practice of modern methods of instrumental analysis, including use of pH meters, colorimeters, spectro-photometers, and other analytical devices. Discussions, reports, field trips, special individual projects. One lecture and two laboratory periods per week. Prerequisite: Three year-courses in chemistry.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisites: open only to students who have shown ability to do A or B work in chemistry; permission of instructor.

### Graduate Courses

**200. Seminar** (2-2) I, II

An intensive study of some phase of advanced chemistry.

A. Advanced Organic Chemistry
B. Chemical Kinetics
C. Chemical Thermodynamics
D. Molecular Structure
E. Electrochemistry
F. Advanced Biochemistry
G. Spectrographic Analysis
H. Photochemistry
I. History of Chemistry

**290. Bibliography** (1) I, II

Exercise in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3) I, II

Guidance in the preparation of a project or thesis for the master's degree.

# COMPARATIVE LITERATURE

## IN THE DIVISION OF LANGUAGES AND LITERATURE

Major work is not offered in comparative literature; however, courses in this field may be used as part of the English major in arts and sciences. For specific information, refer to English.

Courses in comparative literature may be used as part of the teaching major in English for the general secondary and general junior high school credentials with the approval of the departmental representative. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in comparative literature. The minor consists of 15 to 22 units in comparative literature, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in comparative literature; however, courses in this field may be used as part of the teaching minor in English for the general secondary, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

*** 52A-52B. Masterpieces of World Literature** (3-3) Year, I

A chronological survey from Homer to modern times. The first semester stresses the classical epic and tragedy. The second semester, beginning with the Renaissance, stresses prose fiction, the drama, and the essay. Not open to students with credit for English 52A-52B.

### Upper Division Courses

*** 101A. Modern Continental Fiction** (3) II

A survey of leading French, Russian, Scandinavian, Italian, and German novelists and short story writers, from Tolstoy and his associates to the present day. Not open to students with credit for English 101A.

*** 104A-104B. Spanish-American Literature** (3-3) I

For a description of this course, see Spanish 104A-104B, which may be taken for credit in Comparative Literature by doing the required reading in English translation.

*** 115. The Bible as Literature** (3) I

A study of the narrative, poetry, and prophecy of the King James version of the Bible. Readings, reports, lectures, and discussions. Not open to students with credit for English 115.

*** 138. Introduction to Aesthetic Appreciation** (1) I

Major forms of expression and aesthetic experience in art, music and literature, presented by an interdepartmental staff through lectures, demonstration, and panel discussions. Not open to students with credit for Aesthetics 138.

*** 140A-140B. Masterpieces of French Literature** (3-3) Year, I
(Not offered in 1952-53)

A cultural course designed to be given in introduction to the great French works from the Song of Roland through Cyrano de Bergerac, with emphasis on the 16th, 17th, 18th and 19th century authors. The contributions to world thinking of Rabelais, Montaigne, Moliere, Racine, Descartes, Pascal, Montesquieu, Voltaire, Rousseau, Hugo, Balzac, Flaubert, Maupassant, Zola, will be studied through lectures and outside readings.

*** 142. The Golden Age of German Literature** (3) II

Masterpieces of German Literature from the 18th and early 19th centuries. English translations read. No knowledge of German required.

*** 152A-152B. Survey of Drama** (3) Year, I
Study of selected tragedies and comedies from Asiatic, European, English, and American literature, with emphasis upon the human problems depicted therein and upon the timelessness of certain themes, such as those of Electra and Medea. Lectures, discussions, and reports on readings. Not open to students with credit for English 152A-152B.

**159. The Rise of Romanticism in European Literature** (3) II
Continental origins and growth of the romantic movement. Studies in the works of Rousseau, Goethe, Schiller, Lessing, Chateaubriand, Mme. de Stael, and others.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

# ECONOMICS

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *economics* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Economics 1A-1B; Business 14A-14B. Upper division requirements: 24 units in economics to include Economics 100A, 100B and 140. Six of the 24 units may be in related fields, selected with the approval of the departmental adviser. A minor is required.

A *teaching major in social sciences* is offered for the general secondary and general junior high school credentials. For a description of these majors, refer to the credentials.

### Minor

A *minor in arts and sciences* is offered in *economics.* The minor consists of 15 to 22 units in economics, nine units of which must be in courses carrying upper division credit.

A *teaching minor in economics* is offered for the general secondary school credential or as part of the *social science minor* for the special secondary, general elementary, and kindergarten-primary credentials. For a statement of requirements, refer to these credentials.

### Lower Division Courses

*** 1A-1B. Principles of Economics** (3-3) Year, I, II
The basic principles of economics: Business organization and production; money, credit and banking, depression problems; prices, competition, and monopoly; income distribution; public finance; international trade; economic systems. Aims of course: Foundation for further study, business pursuits, and intelligent economic citizenship. Prerequisite: 1A prerequisite for 1B.

### Upper Division Courses

**100A. Intermediate Economic Theory** (3) I
Advanced economic theory with special reference to value and distribution, the income approach and full employment policy. Prerequisite: Economics 1A-1B.

**100B. Intermediate Economic Theory** (3) II
Advanced economic theory with special reference to the application of economic theory to national and local economic problems. Prerequisite: Economics 1A-1B.

*** 102. Comparative Economic Systems** (3) II
The economic aspects of laissez-faire and regulated capitalism, cooperatives, socialism, communism, nazism, fascism. Experience in Russia, Germany, United States, Great Britain. Criteria for evaluating economic systems. The individual and government in each system. Planning in a liberal capitalistic society.

**105. Economics of Consumption** (3) I (Not offered in 1952-53)
An analysis of the determination of consumer demands, the relationship of the consumer to the price system, the effects of consumption and saving upon income and employment, the effects of monopoly and advertising upon consumers' welfare.

**110. Economic History of Europe** (3) I
A general survey of economic development from the Middle Ages to the present. Particular attention is given to the impact of the Industrial Revolution on national economics, especially on England's commerce and industry.

*** 111. Economic History of the United States** (3) II
A comprehensive survey of American economic development and of national legislation in the field of industry and commerce.

**127. Agricultural Economics** (3) II (Not offered in 1952-53)
Major problems of finance, markets, conservation, overproduction, economic institutions and governmental policy, in relation to agriculture. Emphasis on regional problems.

**128. Urban Land Economics** (3) I
Real estate in its various aspects: Property rights, transfer of title, valuation, finance, selling, property management, taxation, insurance, city planning, etc., with special emphasis upon problems as they exist in San Diego.

*** 131. Public Finance** (3) II
Principles and practices of taxation and public expenditures. Economic effects of public spending, debts and taxation. Financing social security and other services. Fiscal policy and prosperity. Relation to inflation and deflation. Special emphasis on social problems involved.

**133. Corporation Finance** (3) I, II
The corporate form of organization; instruments of long-time finance; methods of raising capital, efficient financial management, financing of reorganizations, and government control. Not open to students who have had Business 133.

**135. Money and Banking** (3) II
The elements of monetary theory. History and principles of banking with special reference to the banking system of the United States.

**140. Statistical Methods** (3) I, II
Statistical method in the social sciences. Tabular and graphical presentation. Frequency and time series analysis. Index numbers and correlation techniques. Prerequisite: Mathematics A-B, and C, or equivalent. Not open to students with credit for Sociology 103, Psychology 104A, 104B.

**142. Business Cycles** (3) I
Fundamental factors in business cycles are analyzed and cycle theories are examined. Study of current business conditions begins early in the course and develops into practical application of forecasting methods to both business and other data. Prerequisite: Economics 1A-1B.

**150. Labor Problems** (3) I
A study of labor organizations and their policies, wages, strikes, unemployment, social insurance, child labor, labor legislation, plans for industrial peace, and other labor problems.

**151. Principles of Labor Legislation** (3) II
Federal, state and local laws and regulations concerning labor problems, industrial relations, and governmental policies with respect to labor; important court decisions; social security.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

***170. Government and Business** (3) I, II

General survey of governmental activities affecting business; the state as an entrepreneur and manager; governmental assistance to business; governmental regulation of business in its historical, legal and economic aspects, including recent developments in the United States and abroad; proposed policies.

**171. Transportation** (3) I (Not offered in 1952-53)

The development of railway transportation; railroad financing; rates and rate making; governmental regulation; government operation of railroads during the war; recent development of motor and air transportation. Prerequisite: Economics 1A-1B.

**172. Public Utilities** (3) II (Not offered in 1952-53)

The growth of public utilities in the United States; economics of public utility rates; valuation; public regulation and its legal basis; public ownership. Prerequisite: Economics 1A-1B.

**185. Social Insurance** (3) I (Not offered in 1952-53)

Old age pensions, health insurance, unemployment insurance, and Social Security Act. Strength and weakness of existing systems.

**190. International Economics—Principles** (3) I

National welfare and foreign trade. Principle of comparative costs, comparative advantages in various nations. Foreign exchange and the balance of payments, financing foreign trade. Regulations over trade and obstructing factors. Techniques of exporting and importing. Doctrines of international trade.

**195. International Economics—Problems** (3) II

Important aspects of international cooperation and conflict in the economic sphere, conditions essential to future cooperation. The quest for foreign markets, raw materials, investment opportunities and population outlets. Commercial policies, international economic conferences and organizations. Colonial rivalries and postwar problems.

**198. Investigation and Report** (3) I, II

Designed to stimulate independent study and investigation; to furnish guidance in the collection, organization, and presentation of factual material; to improve the technique of term reports. For economics majors only.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## Graduate Courses

**200A-200B. Seminar in the Development of Economic Thought** (2-2) Year I, II

A critical study of the development of economic thought and of contemporary economic thought, in order to provide a clearer understanding of major economic problems of the day.

**290. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

# EDUCATION

## IN THE DIVISION OF EDUCATION

### Major

A *teaching major in education* is offered for the general elementary and kindergarten-primary credentials. For a statement of requirements, refer to these credentials. A major in education is not offered in arts and sciences.

### Minor

A *minor in arts and sciences* is offered in *education*. This minor consists of 15 to 22 upper division units in education selected with approval of the chairman of the Department of Education.

A *teaching minor* is not offered in education.

Students will be admitted to education courses only when they are admitted to teacher education or have permission from the chairman of the Department of Education. Experienced teachers may take education courses for which they have the prerequisites. Students who take a minor in education must have been regularly admitted to teacher education. (See Admission to Teacher Education.)

### Lower Division Courses

**A. Review of Arithmetic** (0) I, II

**H. Review of Handwriting** (0) I, II

**R. Review of Reading** (0) I, II

**S. Review of Spelling** (0) I, II

Noncredit courses designed to increase competence in the skill subjects. For students who do not qualify on the respective sections of the Fundamentals Test required of all applicants to teacher education.

### Upper Division Courses

**100B. Methods and Materials of Instruction and Audio-Visual Aids**
Major (2) Minor (2)

Professional courses in specific teaching fields taken just prior to or concurrently with the first directed teaching assignment. Each course emphasizes the application of best practice with reference to each subject area named.

Subject fields for sections in 100B are as follows:

**Offered in the Fall Semester**

100B-A.—Methods in Art
100B-B.—Methods in Accounting
100B-E.—Methods in English
100B-HE.—Methods in Home Economics
100B-L.—Methods in Romance Language
100B-Ma.—Methods in Mathematics
100B-Me.—Methods in Merchandising
100B-Mu.—Methods in Music
100B-PE.—Methods in Phys. Ed. (Men)
100B-P.Sc.—Methods in Physical Science
100B-S.—Methods in Shorthand
100B-SA.—Methods in Speech Arts
100B-S.Sc.—Methods in Social Science
100B-SS.—Methods in Secretarial Subjects
100B-T.—Methods in Typing

**Offered in the Spring Semester**

100B-E.—Methods in English
100B-IA.—Methods in Industrial Arts
100B-L.Sc.—Methods in Life Science
100B-PE.—Methods in Phys. Ed. (Women)
100B-S.Sc.—Methods in Social Science

**102A. Measurement and Evaluation in Elementary Education** (3) I, II, Summer

The use of intelligence and achievement tests in the diagnosis and improvement of learning; construction of objective examinations; problems of evaluation in education; the elements of statistical techniques. Should follow 102B for elementary candidates.

**102B. Child Growth and Development** (3) I, II, Summer

Study of the mental, emotional, social, and physical development during childhood and early adolescence. Directed observation required. General education course in family life education. Should precede 102A for elementary candidates.

**102C. Growth and Development of the Adolescent** (3) I, II or Summer

Study of adolescent physiological, psychological, social, and emotional development, including principles of mental hygiene and guidance. Field work with adolescent groups in the community is required.

**102D. Measurement and Evaluation in Secondary Education** (2) I, II or Summer

Problems of evaluation in secondary education, construction of examinations, the elements of statistics, the selection and interpretation of standardized measures, and appraisal of audio-visual instructional materials. Field work required. Prerequisite: Education 130.

**105A. Introduction to Psychological Testing** (3) I, II

The basic principles of testing. The selection and critical evaluation of group tests of intelligence, personality, aptitude, interest and achievement. Prerequisite: One of the following courses: Psychology 5, 11; Education 102A, 102D. Not open for credit to students with credit for Psychology 105A.

**E112A. Methods in Teaching Americanization Classes** (2) Extension only

Methods used in teaching the various grade levels found in Americanization classes, including those preparing for their naturalization. Includes discussion of new skills and techniques in learning to speak, read, and write English; aids in organizing and conducting classes; and in helping teachers to understand backgrounds of foreign born.

**115A. History and Philosophy of Education** (2) I, II, Summer

Historical backgrounds and underlying philosophies upon which the public school system has been established. Emphasis on the meaning of education, educational aims and values, and democracy and education. Prerequisite: Senior standing or the equivalent; minimum of 12 units of education.

**115B. Secondary Education** (3) I, II or Summer

An introduction to understanding the development of secondary education and its present status as a social institution. Topics developed include: Curriculum; teaching methods; audio-visual instructional materials; organization and administration; guidance; and objectives. Field work required.

**116. Directed Teaching** (2-12) I, II

Systematic observation, participation and teaching under supervision in the campus elementary school, the affiliated elementary, junior high and senior high schools. During each semester of student teaching a weekly conference period is required as indicated in the time schedule. Prerequisite: Admission to teacher education; education program approved by Coordinator of Elementary or Secondary Education. Any grade below C is unacceptable for a credential.

**117A. Elementary Music Education** (2) I, II

Objectives of music teaching; study of the child voice; and organization of song material by grades. Procedure in presenting rote songs, ear training, elementary notation, music reading, and part singing. Prerequisite: Music 7A, or the equivalent. Not open to students who have had Music 7B.

**117B. Methods in Instrumental Music** (2) I or II

The theory of organizing and conducting school bands and orchestras, and the selection of materials. Provides practical experience in conducting a children's orchestra and teaching sectional groups. Systematic planning for pupils of various ages and abilities.

**119. Art in the Elementary School** (2) I, II

Discussion of the elements and principles of art and their place in the art expression and appreciation of the elementary school child. Laboratory experience in elementary school problems. Not open to students taking the elementary credential. Prerequisite: Art 6A.

**122. Social Studies in Elementary Education** (2) I, II, Summer

The purpose, scope, organization and development of instructional procedures in the social studies in the elementary school. Development of curriculum units and the analysis of teaching materials.

**123. Science in Elementary Education** (3) Irregular

The construction and use of science equipment, the effective use of audio-visual aids, the use of environmental resources, and the use of texts and supplementary materials. Relations to social science in the elementary curriculum are also developed.

**125. Curriculum in Elementary Education** (3) Irregular

Emphasis upon the selection and development of content, teaching methods, and materials as they relate to social needs; evaluation procedures; psychological principles, and the nature of the learner.

**126. Literature in Elementary Education** (3) Irregular

Criteria for the selection of children's literature, children's reading interests, the development of units of instruction in the social studies, the use of the verse choir, dramatic readings and similar procedures, and the use of the library.

**129. Arithmetic in Elementary Education** (2) I, II, Summer

For teachers of arithmetic in the elementary and junior high school. Emphasis is placed upon the understanding of the systems of notation and language techniques. Opportunity will be given for the development of instructional materials and procedures.

**130. Educational Psychology** (2) I, II, Summer

To develop understanding of the applications of psychological research for effective classroom teaching. Observation and field work required. Prerequisite: Psychology 1. Not open to students with credit for Psychology 130.

**134. Behavior Problems in Early Childhood** (1) Summer

Lectures and related readings on the typical behavior problems of two to twelve year olds, for teachers and parents.

**136. Reading in Elementary Education** (3) I, II, Summer

Scientifically developed procedures for determining reading readiness, beginning reading, independence in word recognition, vocabularly development, word analysis, standards of attainment, types of reading programs, and the selection, preparation and use of reading materials.

**138. Workshop in Family Life Education** (3) Summer

Series of lectures, discussions, and laboratory sessions devoted to furthering understanding of the problems of family life education. The student will have an opportunity to develop units suitable for a program of family life education. Community agencies will participate in the workshop.

**143. Adult Education** (3) (Irregular)

A study of the aims and scope of adult education and its function as a part of the public school system. Individual and group work will be emphasized. Admission by permission of the instructor.

**144. Diagnosis and Remedial Treatment of Difficulties in Reading** (3) Summer

The causes of reading difficulties and the procedures for diagnosis and remedial treatment. Practical work with children with reading problems. Primarily for principals, supervisors and teachers-in-service. Prerequisite: Education 102B or Education 102A, and Education 136, or one year of successful teaching experience.

**145A. Organization and Administration of Music Education** (2) II

Administration of an instrumental music program: purchase, care, depreciation of instruments and equipment; developing interest; ethics; schedule-making; operation and maintenance of music library; personnel and equipment records; the achievement point system; the marching band show; rehearsal procedure.

**146. Education Practicum** (Kindergarten-Primary) (4) I, II, Summer

A continuation of Education 148 and will accompany Education 116 in the kindergarten. A study of the theory of early childhood education providing experience with children of nursery school and kindergarten ages. Prerequisite: Education 147, 148.

**146B. Interpretation of Early Childhood Behavior** (3) Summer

For kindergarten-primary teachers treating the analysis and interpretation of early childhood behavior. Emphasis on understanding and interpreting the causative factors in typical behavior of children to parents, social workers, teachers, and others concerned with the guidance of kindergarten-primary children.

**147. Education Practicum** (10) I, II

Required of all students who expect to receive a credential which will qualify them to teach in the kindergarten or in the elementary school. Students should take the course during the next semester after admission to teacher education, which is usually the first semester of the junior year. Registration is strictly limited to those who have been approved by the Committee on Admission to Teacher Education.

The content of the Education Practicums include both classroom participation (directed teaching) and the study of the principles of education. The course includes Reading (2); Social Sciences in the Elementary School (2); Language Arts (2); Arithmetic (2); Observation (1) Audio-Visual-Radio Instruction (1) is integrated with the course.

**148. Education Practicum** (10) I, II

This course is a continuation of Education 147 and is required of all students who are candidates for the general elementary credential or the kindergarten-primary credential. An extended analysis is made of the psychology of education in various fields and application is made through directed teaching in grades 4 to 6. The course includes Elementary Science Education (1); Elementary Art Education (2); Elementary Music Education (2); Educational Psychology (learning process and theory of audio-visual education) (2); Curriculum in Elementary Education (2); Education 116, Directed Teaching (2). Prerequisite: Education 147.

**149A. Laboratory in Elementary Education** (3) Summer

A general course in observation and theory, including a study of arithmetic, reading, language, music, science, social studies, art, spelling. Students in this course will observe in the summer demonstration school and discuss with the staff the teaching procedures.

**149C. Laboratory in Rural Education** (6) Irregular in Summers

Observation in a one-room multigraded summer demonstration school. Students will observe demonstrations, discuss procedures with the staff, and prepare material for their own schools.

**149D. Workshop in Elementary Education** (3 or 6) Summer

To meet the needs of individual or groups of teachers who desire to study selected problems in elementary education. The observation of classroom teaching will be provided for members in attendance. Interested persons should correspond with the Coordinator of Elementary Education, San Diego State College.

**154. Reading in Secondary Education** (3) II (Offered in 1952-53 and alternate years, alternating with Education 144)

The nature of the reading program, development of techniques and skills, vocabulary development, reading in the content fields, the differentiated attack, measurement, diagnosis and remediation.

**155. Guidance in Elementary Education** (3) Summer

A study of the basic principles of guidance and their function in the educational process as applied in the elementary school.

**156. Guidance Conference** (1) Summer

A series of lecture and discussion sessions centering on current problems in counseling and guidance. Designed to serve the needs of any person desiring to keep informed of developments in this area. Admission upon permission of the director of this conference.

**158. Supervision of Child Welfare and Attendance** (3) Summer

Content includes laws relating to children, guidance principles, social case work, agency relationships, conference techniques, home visitation methods, employment supervision, attendance work, child accounting, familiarity with testing techniques.

**161. Legal Aspects of Education** (3) Irregular

A study of the school law of California, important court decisions, rulings of the California State Superintendent of Public Instruction and the Attorney General, historical and current trends, and comparative data from throughout the United States.

**166. Honors Course** (Credit to be arranged) I, II Refer to the Honors Program.

**171. Audio-Visual Conference** (1) Summer

A series of lectures, discussions and demonstrations, centering on problems in the use of audio-visual instructional materials. Designed for teachers, administrators, audio-visual representatives, and others interested in current developments in this area. Course may be taken twice for credit.

**174. Audio-Visual-Radio Education** (3) I, II, Summer

A study of audio-visual-radio aids as they affect learning. Analysis and development of materials of instruction and their presentation; operation of equipment.

**174BE. Audio-Visual Business Education** (3) Summer

A review of the skills and knowledges necessary to use audio-visual aids, followed by intensive study and research in the literature available and by practice with the materials and techniques that apply to business education.

**175. Creating Audio-Visual Materials for Classroom Use** (3) I, II or Summer

Practice in the creation and evaluation of instructional materials, such as 35 mm. film strips, 16 mm. films, scripts, recordings and other audio-visual materials. Prerequisite: Education 174, or equivalent.

**176. Problems of Speech Correction and Articulation** (3) II

Analysis and discussion of the major articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Not open to students with credit for Speech Arts 176.

**177. The Teaching of Lip Reading** (2) Summer

History, theory and methods of lip reading. Aids for the classroom teacher; program and materials of instruction for the specialized teacher. Opportunities for practice teaching are offered. Not open to students with credit for Speech Arts 177.

**178. Problems of the Hard of Hearing** (2) Summer

The adjustment of the hard-of-hearing group with emphasis on the public school child. State and county hearing programs; technique of audiometry; use of hearing aids; educational, classroom, and social problems.

**179A-179B. Nervous Speech Disorders** (3-3) Year, I

Classification and study of speech defects and disorders. Training in corrective technique for public schools; observation. Required for the Special Secondary Credential in Correction of Speech Defects. Not open to students with credit for Speech Arts 179A-179B.

**181. Exceptional Children** (3) I or II

Characteristics and adjustment problems of mental, physical, and emotional deviates; emphasis upon the mentally handicapped.

**182. Curriculum and Methods for Mentally Retarded Children** (3) II or Summer

Selection, organization and presentation of curricular materials for mentally retarded children.

**183. Practicum for Teaching Mentally Retarded Children** (3) Summer

Analysis and interpretation of educational procedures utilized with the retarded learner. A demonstration class will be available for observation. Education 182 must be taken prior to, or concurrently with, Education 183.

**184A. The Secondary School** (4) I, II

To orient the student toward his function as a teacher in the public secondary schools, including basic principles, history and philosophy of education, elementary and audio-visual instruction, and to understand the school as a social institution. Field work required.

**184B. Development and Learning** (4) I, II

To acquaint the student in secondary education with the nature of development and the learning process, with consideration of mental hygiene, guidance and the place of audio-visual aids. Field work required.

**184C. The Teaching Process** (4) I, II

To develop teacher competency at the secondary level in relationships and planing with the pupil, the community, and the profession, including classroom management, audio-visual education, lesson planning, evaluation, and co-curricular activities. Field work required.

**187A-187B-187C. Child Study Laboratory** (2-2-2) I, II

Development of background and procedures for child study and their application to field situations. Field work required. For teachers in service. 187A is prerequisite for 187B, and 187B is prerequisite for 187C.

**188. Techniques of Pupil Appraisal** (3) I, II or Summer

A study of, and practice in, techniques of collecting, assembling, and interpreting data about individual pupils for guidance purposes. Field work required. Prerequisite: Education 102D or 102A, or consent of instructor. Not open to students who have credit for Psychology 105A or 105B.

**189. Workshop in Secondary Education** (3 or 6) Summer

Designed to meet the needs of individual or groups of teachers who wish to develop or continue the study of some problem with the consultation of the College Staff and the San Diego County Curriculum Staff.

**191. Driver Education** (2) Summer

A workshop type course designed to prepare teachers of the course in high school. Enrollment by permission of the instructor.

**199. Special Study** (1-6) I, II, and Summer

Individual study. Six units maximum credit. Prerequisites: open only to senior and graduate students in education who have shown ability to work independently; permission of instructor.

## Graduate Courses

For general requirements for admission to graduate courses, see statement on Admission to Graduate Status in section on Admission and Registration. In addition to these general requirements, 12 units of professional education are prerequisite for enrollment in all graduate courses.

**207. Educational Sociology** (3) Summer

A study of the social, economic, political and moral setting in which present day American education functions. Prerequisite: Education 115A, or equivalent, teaching experience.

**220. Advanced Educational Psychology** (3) I, II, Summer

Advanced study of the research and its application to learning and human growth. Prerequisite: Educational Psych. 130, or equivalent, teaching experience.

**230. Guidance Problems in Secondary Education** (3) I, II, Summer

Individual and group study of the theory and practice of guidance with emphasis upon practical problems of the members of the class.

**232. Problems in Vocational Guidance** (3) I, II or Summer

To prepare teachers for vocational guidance in the secondary schools. Includes occupational information, vocational aptitude measurement, and educational guidance. Prerequisite: Education 230, or equivalent.

**233A. Guidance Counseling Techniques** (3) I, II

Designed for school counselors. To stress the understandings and procedures necessary for effective interviewing. Prerequisite: Education 230, or equivalent. Not open to students with credit for Psychology 233A.

**233B. Guidance Counseling Techniques** (3)

Continuation of the work of Education 233A. Prerequisite: Education 230 and 233A, or equivalents.

**237. Research in Guidance Problems** (1-3) I, II

Individual study by graduate students who have demonstrated exceptional ability and a need for such work. Admission by permission of the Coordinator of Secondary Education and instructor.

**238. Field Work in School Guidance** (3) I or II

Application of the principles and procedures in testing, counseling, and related personnel work in the public schools. Weekly seminar sessions with college and cooperating staff. Prerequisite: Permission of instructor and 12 units in guidance and related areas.

**239. Workshop in Pupil Personnel Services** (3) Summer

Application of principles and procedures to specific situations for improvement of pupil personnel services. Individual problems emphasized. Prerequisite: Teaching experience and permission of director of workshop.

**241. Problems in the Teaching of Arithmetic** (3) Summer

A study of research and practice in the methods of teaching and in the curriculum of elementary and junior high school arithmetic. Prerequisite: Education 129 or equivalent.

**242. Problems in the Teaching of Reading** (3) Summer

Advanced study of trends in reading instructions. Topics include developmental sequences in reading skills and abilities, reading in the content fields, individual differences, and interests. Students will develop individual projects or problems. Prerequisites: Education 136 and 144 or equivalents.

**243. Seminar in Social Studies in Elementary Education** (3) I

Advanced study of problems in teaching social studies in the elementary school with emphasis on the study of the scientific research in the field. Prerequisite: Permission of instructor.

**244. Seminar in Language Arts in Elementary Education** (3) Summer

Advanced study of problems in teaching language arts in the elementary school, including spelling, literature and written and oral communication. Emphasis will be on the study of scientific research in the field. Prerequisite: Permission of instructor.

**245. Seminar in Elementary Education** (3) II

A study of the methodology of research with particular reference to the basic research in the psychology and teaching of the elementary school subjects. Prerequisite: 12 units in elementary education and permission of the instructor.

**250. Curricular Problems in Secondary Education** (3) I, II

Present status and development of the secondary school curriculum. Emphasis upon curriculum construction with individual study and development of solutions of problems of the students. Prerequisite: 12 units in secondary education and permission of the instructor.

**252. General Education in the Secondary School** (3) Summer

A course designed for teachers in service. A study of the function and implementation of general education in the secondary school. Prerequisite: 12 units in secondary education and permission of the instructor.

**254. Advanced Problems in Secondary School Instruction** (3) I, Summer

An analysis of the scientific research and philosophical principles in secondary school instruction. Prerequisite: Teaching experience and permission of instructor.

**256. Recent Trends in Secondary Curriculum** (3) I, II or Summer

Current practices and trends in secondary schools. Extensive individual work on related problems of interest to members of the class. Prerequisite: 12 units in secondary education and permission of the instructor.

**257. Workshop in Intercultural Education** (4)

A cooperative workshop sponsored by the college and the San Diego City Schools to study trends in intercultural education in American schools, including units, curricular and instructional materials and techniques. Enrollment only by application to the Chairman of the Division of Education.

**258. Research in Curricular Problems** (1-3) I, II

Individual study by graduate students who have demonstrated exceptional ability and a need for such work. Admission by permission of the Coordinator of Secondary Education and instructor.

**260. Federal, State, County and City School Organization and Administration** (3) I, Summer

A study of the federal, state, county and city school organization, administration and supervision, including school law.

**262. The Organization and Administration of Elementary Schools** (3) I or Summer

A study will be made of the problems of personnel, local finance, curriculum, plant, community relations, and legal aspects of elementary schools. Required as a prerequisite to Education 266. Prerequisite: Teaching experience, valid General Elementary Credential, and consent of the instructor.

**263. The Organization and Administration of the Secondary School** (3) I or II, Summer

Topics will cover all aspects of the duties of a secondary school administrator, including personnel, finance, curriculum, equipment and supplies, public relations, transportation, and law. Prerequisite: Possession of a valid General Secondary Credential and permission of the instructor.

**264. Elementary School Supervision** (3) I or Summer

Principles and practices of supervision and methods of evaluating instruction and the curriculum in elementary education. Prerequisite: General Elementary Credential, teaching experience, Education 260, 262, or equivalents, and permission of the instructor.

**265. Secondary School Supervision** (3) I or II, Summer

For those who will be responsible for the supervision and evaluation of the curriculum and teaching methods in the secondary school. Prerequisite: Possession of a valid General Secondary Credential, teaching experience, and permission of the instructor.

**266. Field Work in Elementary School Administration and Supervision** (2) II

Study of the administration and supervision of an elementary school, for the Elementary School Administration and Supervision Credentials. Field project required of all students under the direction of a college staff. Prerequisite: Education 262 or 264, or equivalent.

**267. Field Work in Secondary School Administration and Supervision** (2) II

Study of practices as they are found in secondary schools relative to administration and supervision; to insure direct contact with existing programs and procedures through faculty guided projects. Prerequisite: Education 263 or 265, or equivalent.

**268. Seminar in School Administration** (3) Summer

An intensive study of selected problems in finance, business administration, and other topics in the field of school administration. Provision will be made for individual work on special topics of interest to students.

**270. School Finance, Business Administration, and Law** (3) II, Summer

A study of public school finance at state and local levels; an analysis of the business administration of schools; a study of school law as it applies to school finance, administration and other aspects of public education.

**271. Supervision of Student Teaching** (2) I, II

Study of selection, orientation, induction, counseling and evaluation of credential candidates and student teachers; and helping student teachers plan lessons, conduct classroom learning, analyze pupils' difficulties and achievement. Open to experienced teachers interested in the teacher education program.

**274A. Utilizing Audio-Visual Materials in the Classroom** (3) I

A critical analysis of research evaluating the use of visual, auditory, and other sensory materials in education. Prerequisite: Education 174, or equivalent.

**275. Administering the Use of Audio-Visual Materials** (3) II, Summer

Organizing, supervising, and coordinating audio-visual centers as an integral part of educational systems. Prerequisite: Education 174, or by permission of the instructor.

**278. Educational Leadership** (3) I, II, Summer

An analysis of the factors and practice in procedures of group and individual leadership in four areas: (a) the community; (b) the teaching staff; (c) the student personnel; (d) the professional field of educational administration and supervision. Prerequisite: Permission of the instructor.

**290. Procedures of Investigation and Report** (2-3) I, II, Summer

Emphasizes procedures in selecting and writing a project or thesis. Methods of investigation and reporting data. Extensive survey of an area of professional literature to analyze techniques and style. Separate sections for elementary and secondary levels.

**298. Special Study** (1-6) I, II, Summer

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3) I, II, Summer

Guidance in the preparation of a project or thesis for the master's degree.

**316. Directed Teaching** (3-3) I, II

Systematic observation, participation, and teaching under supervision in an affiliated school. Thirty clock hours of student teaching will usually earn one unit of credit, but the credit finally allowed will depend upon the nature and quality of the teaching done. Any work below a C grade is unacceptable for a credential.

No student can enroll in this course until he has completed Education 184A and 184B, enrolled in Education 100B, and has been admitted to candidacy for the teaching credential.

During the semesters in which the student takes his assignments in student teaching, he must meet with the college supervisor one hour each week for conference and discussion of problems encountered in his teaching.

Students who have had student teaching in preparation for the junior high school or special secondary credential should confer with their departmental and educational advisers concerning partial fulfillment of this requirement as the result of having completed the student teaching required for the credentials mentioned above.

# ENGINEERING

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in *engineering* for the B.S. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements for all engineering options: Chemistry 1A-1B; Physics 4A-4B-4C; Mathematics 3A-3B, 4A-4B; Engineering 21 and 23, or their equivalents. Nine units in chemistry, physics, and mathematics may be applied toward general education requirements. Refer to Engineering Curricula below for additional requirements for various options. Upper division requirement: a minimum of 36 upper division units. Specific requirements for the various engineering options are listed in the Engineering Curricula below. A minor is not required of engineering majors.

A *teaching major* is not offered in engineering.

### Minor

A *minor in arts and sciences* is offered in engineering. The minor consists of 15 to 22 units in engineering, nine units of which must be in courses carrying upper division credit. The courses should follow a logical sequence approved by the departmental representative.

A *teaching minor* is not offered in engineering.

### ENGINEERING CURRICULA

The curricula given below specify the requirements for the indicated options and include recommended electives to fulfill the requirements for general education. General education courses are prefixed with an asterisk (*).

### Lower Division Requirements for all Engineering Students

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| * P.E. activities | ½ | ½ |
| Math. 3A-3B | 3 | 3 |
| Physics 4A | – | 4 |
| Chem. 1A-1B | 5 | 5 |
| * English 1 | 3 | – |
| * Speech Arts 3 | 2 | – |
| * Biology 1 | – | 3 |
| * Psychology 1 | 3 | – |
| | 16½ | 15½ |

| | *Units* | |
|---|---|---|
| **Sophomore Year** | *1st Sem.* | *2d Sem.* |
| * P.E. activities | ½ | ½ |
| Math. 4A-4B | 3 | 3 |
| Physics 4B-4C | 4 | 4 |
| * Econ. 1A-1B | 3 | 3 |
| Engr. 21 and 23 | 3 | 2 |
| Restricted electives | 3 | 3–4 |
| Aero., Electrical, and Mech.: Engr. 1A, 22 | | |
| Chem.: Chem. 101A, 5A | | |
| Civil: Engr. 1A-1B | | |
| Econ.: Bus. 14A-14B | | |
| Electron.: * Lit. or Phil. and elective | | |
| | 16½ | 15½-16½ |

---

* General education courses. (Nine additional units in chemistry, physics, and mathematics may be applied toward general education requirements.)

## Upper Division Requirements for all Engineering Students

| Junior Year | Units | |
|---|---|---|
| | 1st Sem. | 2d Sem. |
| Engr. 100A-100B | 3 | 3 |
| Engr. 102A-102B | 3 | 3 |
| Engr. 127, 140 | 3 | 3 |
| * Health Educ. 21 | 2 | – |
| * Ind. Arts 5 | 3 | – |
| ‡ * Soc. Sci. elective | – | 3 |
| | 14 | 9–12 |

| Senior Year | Units | |
|---|---|---|
| | 1st Sem. | 2d Sem. |
| † * Literature or Philosophy | – | 3 |
| * Econ. 170 | 3 | – |
| Engr. 105 | – | 3 |
| Engr. 198 | – | 2 |
| Engr. 180 | – | 3 |
| | 3 | 8–11 |

* General education courses. (Nine additional units in chemistry, physics, and mathematics may be applied toward general education requirements.)

‡ Chemical engineers take social science elective in first semester of senior year. All students should remove U. S. history-Constitution and California State and Local Government requirements by examination or by taking appropriate social science courses.

† * Electronics engineers take literature or philosophy first semester of sophomore year.

Additional requirements for various fields of specialization:

### Aeronautical Engineering

| Junior Year | Units | |
|---|---|---|
| | 1st Sem. | 2d Sem. |
| Engr. 101A | 2 | – |
| Engr. 141 | – | 2 |
| Engr. 101B | – | 2 |
| | 16 | 16 |

| Senior Year | Units | |
|---|---|---|
| | 1st Sem. | 2d Sem. |
| Math. 118A | 3 | – |
| Engr. 122 | 4 | – |
| Engr. 129, 106 | 2 | 2 |
| Engr. 142, 156 | 3 | 3 |
| | 15 | 16 |

### Chemical Engineering

| Junior Year | Units | |
|---|---|---|
| | 1st Sem. | 2d Sem. |
| Engr. 141 | – | 2 |
| Chem. 110A-110B | 3 | 3 |
| Chem. 101B | – | 4 |
| | 17 | 18 |

| Senior Year | Units | |
|---|---|---|
| | 1st Sem. | 2d Sem. |
| Math. 118A | 3 | – |
| Engr. 129, 106 | 2 | 2 |
| Chem. 144A-144B | 3 | 3 |
| * Soc. Sci. electives | 3 | – |
| | 14 | 16 |

### Civil Engineering

| Junior Year | Units | |
|---|---|---|
| | 1st Sem. | 2d Sem. |
| Engr. 130 | 3 | – |
| Engr. 141 | – | 2 |
| Elective | – | 2 |
| | 17 | 16 |

| Senior Year | Units | |
|---|---|---|
| | 1st Sem. | 2d Sem. |
| Math. 118A | 3 | – |
| Engr. 142, 106 | 3 | 2 |
| Astronomy 113 | 3 | – |
| Engr. 135 | – | 3 |
| Elective | 4 | – |
| | 16 | 16 |

### Electrical Engineering

| Junior Year | Units | |
|---|---|---|
| | 1st Sem. | 2d Sem. |
| Engr. 101A-101B | 2 | 2 |
| Engr. 141 | – | 2 |
| | 16 | 16 |

| Senior Year | Units | |
|---|---|---|
| | 1st Sem. | 2d Sem. |
| Math. 118A | 3 | – |
| Engr. 129 | 2 | – |
| Physics 102 | 3 | – |
| Physics 107 | 2 | – |
| Elective | 3 | 4 |
| | 16 | 15 |

### Electronics Engineering

| | Units | |
|---|---|---|
| Junior Year | 1st Sem. | 2d Sem. |
| Engr. 104 | – | 3 |
| Physics 102 | 3 | – |
| | 17 | 15 |

| | Units | |
|---|---|---|
| Senior Year | 1st Sem. | 2d Sem. |
| Math. 118A | 3 | – |
| Engr. 101A-101B | 2 | 2 |
| Engr. 124 | – | 2 |
| Engr. 150 | – | 3 |
| Physics 107 | 2 | – |
| Physics 122 | 2 | – |
| Physics 152 | 2 | – |
| Elective | 3 | – |
| | 17 | 15 |

### Engineering Economics

| | Units | |
|---|---|---|
| Junior Year | 1st Sem. | 2d Sem. |
| Elective (to include at least one of the following laboratory courses: Engr. 101A, 101B, 106, 129, 141 | 2 | 4 |
| | 16 | 16 |

| | Units | |
|---|---|---|
| Senior Year | 1st Sem. | 2d Sem. |
| Econ. 150, 140 | 3 | 3 |
| Econ. 133 | 3 | – |
| Business 18A | 3 | – |
| Business 121 | 3 | – |
| Elective | – | 3 |
| | 15 | 17 |

### Mechanical Engineering

| | Units | |
|---|---|---|
| Junior Year | 1st Sem. | 2d Sem. |
| Engr. 101A-101B | 2 | 2 |
| Engr. 141 | – | 2 |
| | 16 | 16 |

| | Units | |
|---|---|---|
| Senior Year | 1st Sem. | 2d Sem. |
| Math. 118A | 3 | – |
| Engr. 122, 106 | 4 | 2 |
| Engr. 128, 145 | 3 | 3 |
| Engr. 129 | 2 | – |
| | 15 | 16 |

### Lower Division Courses

**1A-1B. Plane Surveying (3-3) Year, I**

Two lectures and one three-hour field period per week. Semester I: Use, care and adjustment of surveying equipment. Introduction to standard procedures and techniques. Prerequisites: Engineering 2, or equivalent, Math. D, and sophomore standing. Semester II: Computations and map making; land, topographic, and city surveying. Prerequisite: Engr. 1A.

**2. Mechanical Drawing (3) I, II**

Freehand lettering, use and care of drafting equipment, simple orthographic projection, introduction to problems of dimensioning. Open to students lacking credit for a year course in senior high school mechanical drawing. Not open to students with credit for Industrial Arts 2.

**21. Descriptive Geometry (3) I**

Fundamental principles of descriptive geometry and their application to engineering problems. Solutions of point, line and plane problems; curved lines and surfaces; intersections of surfaces. One lecture and two three-hour laboratory periods per week. Prerequisite: Engr. 2, or equivalent, and sophomore standing.

**22. Machine Drawing (3) II**

Standard drawing methods and procedures, complete sets of working drawings of simple machine parts, gears and cams; includes tolerance dimensioning, sectioning, threads and fasteners. One lecture and two three-hour laboratory periods per week. Prerequisites: Engr. 21, Math. 3A-3B.

**23. Materials of Engineering (2) II**
A concise presentation of the physical properties of the common materials used in structures and machines, with brief descriptions of their manufacture and fabrication. Two lectures per week. Prerequisite: Sophomore standing.

### Upper Division Courses

**100A-100B. Elements of Electrical Engineering (3-3) Year, I**
Theory and characteristics of electrical equipment with emphasis on industrial applications. Lectures and problems. Semester I: Direct current circuit analysis. D. C. motors and generators. Introduction to alternating current circuits. Prerequisites: Math. 4A, Physics 4B, or permission of the instructor. Semester II: Alternating current circuit analysis. Transformers, alternators, induction and synchronous motors, conversion apparatus, and transmission lines. Prerequisite: Engr. 100A.

**101A. Electrical Engineering Laboratory (2) I**
Laboratory determination of the characteristics of direct current machinery and circuits, single phase alternating current circuits. One three-hour lab. and report per week. Prerequisite: Engr. 100A, or taken concurrently.

**101B. Electrical Engineering Laboratory (2) II**
Laboratory determination of the characteristics of single phase and polyphase circuits, machines, and related equipment. One three-hour laboratory period and report per week. Prerequisite: Engr. 100B, or taken concurrently.

**102A-102B. Analytical Mechanics (3-3) Year, I**
Lectures and problems. Emphasis on engineering applications. Semester I: Principles of statics which deals with the conditions of equilibrium of bodies acted upon by forces. Prerequisites: Physics 4A-4B, Math. 4A. Semester II: Principles of dynamics which deals with the fundamentals of rectilinear and curvilinear motion of particles and rigid bodies, and the rotation of rigid bodies. Prerequisite: Engr. 102A.

**104. Communications (3) II**
Power amplifiers, oscillators, modulators and detectors. Radio transmitters and receivers for amplitude modulation and frequency modulation. Television systems. Antennas and radio wave propagation. Prerequisite: Physics 102 or permission of the instructor.

**105. Fluid Mechanics (3) II**
The statics and dynamics of incompressible and compressible fluids. Viscosity, fluid friction. Dimensional analysis. Fluid measuring instruments. Flow of compressible and incompressible fluids in pipes. Flow of liquids in open channels. Pumps. Prerequisites: Mathematics 4A, Physics 4A, Engineering 102A, and Engineering 127.

**106. Fluid Mechanics Laboratory (2) II**
Characteristics of fluid measuring instruments. Fluid flow through pumps, etc. One three-hour laboratory and report per week. Prerequisite: Engineering 105 or concurrent registration.

**122. Machine Design (4) I**
Individual design of a useful machine encompassing fundamental considerations of simple machine parts. Practical design methods utilizing professional literature are stressed. Three lectures and one three-hour laboratory period per week. Prerequisites: Engr. 23, 102A, 140.

**124. Radio Measurements (2) II**
A laboratory course on measurements of the parameters of resonant circuits at radio frequencies. Study of the properties of oscillators, modulators, detectors and wave guides. Prerequisite: Previous or concurrent enrollment in Engineering 104. Students with credit in Physics 124 may not receive credit for this course.

**127. Engineering Thermodynamics (3) I**
An introduction to the basic principles of thermodynamics; laws of perfect gases, vapors and mixtures; cycles. Applications to engineering problems such as the analysis of heat, power, and refrigeration systems, and steady-flow processes. Lecture and problems. Prerequisites: Mathmetics 4A and Physics 4B.

**128. Applied Engineering Thermodynamics** (3) I

The study of various types of heat power equipment; steam generation, turbines, reciprocating engines and auxiliaries; fuels and lubricating oils; gas and oil engines. gas turbines, refrigeration and compressors. The practical application of basic theory to proper, efficient operating practices is stressed. Lectures and problems. Prerequisite: Engineering 127.

**129. Heat Power Laboratory** (2) I

Testing of steam generators and heat balance of same; steam turbine; reciprocating engine; internal combustion engines; flue gases, lubricating oils and boiler feed water. Emphasis upon standardized testing procedures, approved by SAE and ASME, and standard operating procedures. One three-hour laboratory period and report per week. Prerequisite: Engineering 127.

**130. Route and Construction Surveying** (3) I

Application of surveying to engineering problems. Methods of route surveys for highways, railroads, utilities. Construction surveys for buildings and other structures. Earthwork computations. Two lectures and one three-hour field period per week. Prerequisite: Engr. 1B.

**135. Concrete Structures** (3) II

Concrete structures including both plain and reinforced concrete. Practical application of the mathematical theories of mechanics and strength of materials, including analysis and design of such structures as dams, walls, floor slabs, columns, beams, and frames. Prerequisite: Engineering 140 or concurrent registration.

**140. Strength of Materials** (3) II

Elastic properties and strength of engineering materials. Analysis of types of failures. Stress analysis and deformation of simple structural and machine members. Photoelasticity. Lecture and problems. Prerequisite: Engr. 102A.

**141. Materials of Engineering Laboratory** (2) II

Theory and operation of testing machines and auxiliary apparatus. Conduct of tests to determine significant characteristics of commonly used engineering materials. Included are heat treatment of metals, metallographic tests, and photoelasticity. One three-hour laboratory and report per week. Prerequisite: Engr. 140, or taken concurrently.

**142. Stress Analysis** (3) I

Determination of stresses in trusses, beams, and frames. Combined stresses; space structures; general theorems relating to elastic systems; statically indeterminate structures; deflections; analytical and graphical methods of solution. Lectures and problems. Prerequisites: Eng. 102A-102B, 140.

**145. Internal Combustion Engines** (3) II

Application of theory of thermodynamics to internal combustion engines. Essential features of design, operating characteristics, and application of gasoline, diesel, and gas engines, and the gas turbine. Lectures and problems. Prerequisites: Physics 4C, Math. 4A. Recommended: Engr. 128.

**150. Industrial Electronics** (3) II

Photoelectricity and its applications; rectification and inversion; theory and applications of thyratrons and ignitrons including welding; radio-frequency heating; electrostatic precipitation; motor control and introduction to servomechanisms. Prerequisite: Physics 102.

**156. Aerodynamics** (3) II

Mechanics and thermodynamics of air; wing characteristics; drag; wind tunnel testing technique; propellers and power plants; aircraft performance; stability and control. Introduction to compressible aerodynamics. Lectures and problems. Prerequisites: Engr. 102A-102B.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**180. Principles of Engineering Economy** (3) II
Analysis of the costs of development and promotion, construction, operation, depreciation and depletion. Capital recovery, income, return and yield. Valuations and appraisals, cost analysis and financial analysis. Application to engineering problems. Prerequisite: Senior standing.

**198. Senior Report** (2) I, II
Investigation of specific problems of advanced nature. Preparation of report. Prerequisite: Advanced senior standing.

NOTE.—In laboratory courses special emphasis is placed upon the preparation of neat, concise, complete and intelligent reports.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

# ENGLISH

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in *English*. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: At least 12 units of work, in addition to English 1 or 41; at least six must be in a year course. Upper division requirements: A minimum of 24 upper division units in English and comparative literature, selected with the approval of a departmental representative; two years of lower division work in a foreign language or the equivalent reading knowledge of a language is strongly recommended. A minor is not required of students majoring in English.

Prospective majors of sophomore standing may, with the consent of the course instructor and subject to general college regulations (see section on Lower Division and Upper Division Courses), substitute six units of upper division electives for six units of lower division work, such upper division units to be selected from the following: English 101A, 116A, 116B, 118A, 118B, 119A, 119B, 126A, 126B, 143A, 143B.

Students of junior or senior standing may substitute for any deficiencies in lower division requirements in English (except English 1 or 41) an equivalent number of units of upper division courses selected from the following: English 101A, 116A, 116B, 118A, 118B, 119A, 119B, 120A, 120B, 126A, 126B, 143A, 143B, 151, 159.

A *teaching major in English* is offered for the general secondary or junior high school credential. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *English*. The minor consists of 15 to 22 units in English, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is offered in English for the general secondary, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information refer to the outlines of requirements for these credentials.

### Comparative Literature

For courses in world literature, see Comparative Literature; these courses give credit toward the English major or minor or toward the minor in Comparative Literature.

### Credit in Course Sequences

All elective year courses in the department may be begun in either semester, and either semester may be taken singly for credit.

### Lower Division Courses

**A. English Fundamentals** (3) I, II
The elements of composition, including drill in grammar and usage; exercises in vocabulary building and in fundamental reading skills; theme writing. Credit in this course is equivalent to passing the English A examination and may be counted toward graduation as an elective but not to satisfy lower division English requirements in any curriculum.

**R. Reading Laboratory** (0) I, II

A semi-tutorial service offered by the English Department to those wishing to improve reading ability, or secure individual help with study problems. Open to all students at any level of college work. Consult department chairman.

**W. Writing Laboratory** (0) I, II

A semi-tutorial service offered by the English Department to those wishing assistance in writing projects, either remedial or advanced. Open to students at any level of college work. Consult department chairman.

***1. Freshman Composition** (3) I, II

Study and practice in the expression of ideas and factual materials; principles of organization and of effective style, with emphasis on exposition. Prerequisite: Satisfactory English A examination or credit in English A.

***2A. Freshman Literature: Imaginative** (3) I, II

Training in reading with insight and vividness.

***2B. Freshman Literature: Modern Thinking** (3) I, II

Designed to develop college reading skills through practice in the analysis of materials at various levels of difficulty.

**10. Recreational Reading** (1) I, II

Development of personal tastes for leisure-time reading through lectures and written reports. May be taken a second time with new materials.

**20. Latin and Greek Word Derivation** (3) I

A general and elementary course in philology. Study of Latin and Greek roots of most frequent occurrence in English, and of the English words derived from them. No prerequisite. Not open to students with credit for General Language 20.

**50A-50B. Masterpieces of American Literature** (3-3) Year, I

Semester I: Major American writers from the beginning to 1860. Semester II: American literature from 1860 to the present.

***52A-52B. Masterpieces of World Literature** (3-3) Year, I

A chronological survey from Homer to modern times. The first semester stresses the classical epic and tragedy. The second semester, beginning with the Renaissance, stresses prose fiction, the drama, and the essay. Not open to students with credit for Comparative Literature 52A-52B.

**56A-56B. Survey of English Literature** (3-3) Year, I

The study of some important works of English literature from the Anglo-Saxon period through the Victorian age, with emphasis upon the literary history of each period.

**60A-60B. Literature and Personality** (3-3) Year, I

The close study of a limited number of the great creators of literature. The goal of the course is to derive, from markedly different specific works, orderly and generalized methods for the interpretation of great literature.

***61. Sophomore Composition** (3) I

An elective course designed to give further training to the student who wishes practice in writing beyond the freshman level. Prerequisite: English 1 or equivalent.

**62. The Short Story** (3) II

A practical course in writing, including a study of short story techniques and purposes, and the writing of complete short stories. Prerequisite: English 1 or equivalent.

**63. Foundations of the Language** (3) II

An introduction to the study of the changes of form and meaning in English words with special emphasis on semantics.

### Upper Division Courses

*** 101A. Modern Continental Fiction** (3) II

A survey of leading French, Russian, Scandinavian, Italian, and German novelists and short story writers, from Tolstoy and his associates to the present day. Not open to students with credit for Comparative Literature 101A.

*** 106. Creative Writing** (3) I

A writing workshop in which students are given opportunity to criticize each other's work. Emphasis on narrative and description, but freedom to pursue whatever writing forms may interest the student most. May be taken a second time with new material. Not open to students with credit for Journalism 106.

**110. Recreational Reading** (1) I, II

An advanced course in the group reading of modern drama, poetry and fiction.

**113. American English** (3) I

The development of American English; regional and cultural differences in pronunciation, grammar, and vocabulary.

*** 115. The Bible as Literature** (3) I

A study of the narrative, poetry, and prophecy of the King James version of the Bible. Readings, reports, lectures, and discussions. Not open to students with credit for Comparative Literature 115.

**116A-116B. The Age of Elizabeth** (3-3) Year, I

Semester I: Poetry and prose, exclusive of drama. Semester II: The drama to 1642, excluding Shakespeare.

*** 117A-117B. Shakespeare** (3-3) Year, I

The first semester gives special emphasis to the histories and comedies; the second, to tragedy and the dramatic romances.

**118A-118B. Eighteenth Century English Literature** (3-3) Year, I

The first semester emphasizes the social satire of Swift, Pope, Addison, Steele, Dryden, Gay, Prior; and also the first stirrings of the romantic revolt in a number of important poems and prose works. The second semester is devoted to Johnson and Boswell and their circle and to a significant romantic literature antedating the romantic outburst.

*** 119A. English Romantic Poetry** (3) I

The culmination of the romantic movement in the poetry of Wordsworth, Coleridge, Byron, Shelley, and Keats, in relation to the thought of the revolutionary period.

**119B. The Victorian Poetry** (3) II

Tennyson and Browning with their contemporaries and successors, relating English poetry to nineteenth century life and thought.

**120A. The Seventeenth Century: Milton** (3) II (Alternate years)

The poetry and major prose works of Milton, with stress on the development of his art and mind; the political and religious background and the events in which Milton participated.

**120B. The Seventeenth Century: Milton's Contemporaries** (3) II (Alternate years)

The seventeenth century poets and prose writers, excluding Milton; the Metaphysical and Cavalier poets; the beginnings of the essay and biography.

**126A. Romantic and Victorian Prose** (3) I

Romantic and mid-Victorian prose writers, including Coleridge, Hazlitt, Lamb, DeQuincey, Carlyle, Landor, Macaulay, and Mill, related to the literary, political, and social movements of the period.

*** 126B. Late Nineteenth Century British Prose** (3) II

The essays of Arnold, Thomas Huxley, Newman, Pater, Ruskin, and Stevenson. Study of scientific, aesthetic, and ethical backgrounds.

**129. Contemporary British Literature** (3) II

Selected prose and poetry of England and Ireland from 1914 to the present, including Shaw, Yeats, Synge, Joyce, Maugham, Huxley, D. H. Lawrence, Eliot, the Oxford poets, and the principal authors belonging to the two wars.

**131. American Literature: 1820-1860** (3) I

The study of the important romantic writers, with emphasis on the New England group.

**132. The Frontier and American Literature** (3) I, II

The influence of the frontier upon American literature studied through various regions and movements. Examinations of source materials, biographies, and representative writers.

**133. American Literature: 1860-1910** (3) II

The rise of realism in American literature. Influences, foreign and native, which promoted the movement. Definition of realism. The literary creed of the realists. The romantic attack and the realist defense.

* **134. American Literature: 1910 to the Present** (3) I, II

Ideas and forms in representative poetry and prose.

**143A-143B. The English Novel** (3-3) Year, I

The history of the English novel from its beginnings to the present century. Emphasis in the first semester will be on the eighteenth century and in the second semester on the nineteenth century.

* **149. The Study of Poetry** (3) II

A course proceeding from simpler to more complex poetic productions, and designed to bridge the widening chasm between the poet and the ordinary man. Emphasis on current directions in poetry, and on poetry as an oral and auditory art.

**151. Chaucer** (3) I

A study of Chaucer's works, with emphasis on "The Canterbury Tales" and "Troilus and Criseyde."

* **152A-152B. Survey of Drama** (3-3) Year, I

Study of selected tragedies and comedies from Asiatic, European, English, and American literature, with emphasis upon the human problems depicted therein and upon the timelessness of certain themes, such as those of Electra and Medea. Lectures, discussions, and reports on readings. Not open to students with credit for Comparative Literature 152A-152B.

**162. Magazine Fiction** (3) I

Coaching in constructing and writing short stories for commercial publications. Admission by consent of the instructor. Not open to students with credit for Journalism 162.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**191. Advanced Composition** (3) I

A course designed for prospective teachers of secondary school English. This is not a methods course, but a content course in grammar, composition, and journalism. Required of all teaching majors in English; open to other students as an elective.

**192. The English Language** (3) II

The study of the history of the English language, of its words and structure, of the changes in inflections, pronunciation, vocabulary, and meaning, and of its use as an instrument of communication and human living. Open only to seniors and graduate students.

**195. Literary Criticism** (3) I

A historical survey of the principles and practices of literary criticism from Greek times to the nineteenth century. Readings in the works of Aristotle, Horace, Longinus, Sidney, Boileau, Dryden, Lessing, Sainte-Beuve, Coleridge, and Arnold. Open only to senior and graduate students.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**203A-B-C-D. The Critical Study of a Major Author** (2-2-2-2) I, II
A seminar in (A) Shakespeare, (B) Arnold, (C) Mark Twain, or (D) Dickens.

**213A-B-C-D. The Study of a Cultural Period Through Its Literature** (2-2-2-2) I, II
A seminar in (A) the Renaissance, 1500-1660, (B) the Enlightenment, 1660-1780, (C) The Romantic Revolution, 1780-1830, or (D) Industrialism and Democracy, 1830-1914.

**223A-B-C-D. The Study of a Literary Problem** (2-2-2-2) I, II
A seminar in (A) Regionalism in American Literature, (B) the Utopian Theme in Literature, (C) the Idea of the "Gentleman," or (D) European Influences in American Literature.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

## FRENCH

### IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in *French* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: In the major, French 1, 2, 3, 4, 5, 6; in other foreign languages, German 1, 2, or Spanish 1, 2, or Latin 1, 2. Six units in elementary German, Spanish, or Latin may also be applied toward general education requirements. Recommended: History 4A-4B. Upper division requirements: A minimum of 24 upper division units, at least 21 units of which must be in French, including French 198. The remaining three units may be selected from French 115, 116; Geography 118; History 121A-121B, 131A-131B, 141, 142, 143A-143B, 144A-144B; or Comparative Literature 101A, 140A-140B, 152A-152B, 159, in consultation with the chairman of the department.

A person majoring in French must have a minor to be decided upon in consultation with his major adviser.

A *major in arts and sciences* is offered in *Romance Languages*. For specific information on this major, refer to the section on Romance Languages.

A *teaching major* is offered in *French* or in *Romance Languages* for the junior high school and general secondary credentials. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *French*. The minor consists of 15 to 22 units in French, six units of which must be in courses carrying upper division credit.

A *teaching minor* is offered in French for the general secondary, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

***1. Elementary** (3) I, II
Pronunciation, oral practice, readings on French culture and civilization, minimum essentials of grammar.

***2. Elementary** (3) I, II
Continuation of French 1. Prerequisite: French 1 or one year of high school French.

***3. Intermediate** (3) I, II
Reading in French of cultural material, short stories, novels or plays; oral practice; outside reading with oral and written reports. Prerequisite: French 2 or two years of high school French.

***4. Intermediate** (3) II
Continuation of French 3. Prerequisite: French 3 or three years of high school French.

**5. Intermediate** (2) I, II
A practical application of the fundamental principles of grammar by means of oral and written work based on French texts. Prerequisite: French 2 or two years of high school French.

**6. Intermediate** (2) II
Continuation of French 5. Prerequisite: French 5 or three years of high school French.

**10. Conversation** (2) I
Practice in the spoken language; practical vocabulary, conversation on assigned topics; simple dialogues and plays. Prerequisite: French 2 or two years of high school French.

**11. Conversation** (2) II
Continuation of French 10. Prerequisite: French 10 or French 3, or three years of high school French.

***15. French Civilization** (2) I
The major currents and characteristics of French culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

***16. French Civilization** (2) II
Continuation of French 15. No prerequisite.

**8A-8B. Scientific Reading** (3-3) I
Reading taken from the fields of chemistry, physics, medicine, zoology, biology, etc. Outside readings of books and periodicals, with written reports. Prerequisite: French 2 with a grade of C or two years of high school French.

### Upper Division Courses

**101A-101B. Conversation and Composition** (3-3) Year, I
Translation into French from moderately difficult English prose. Outside reading of modern French prose, with written reports in French monthly. Readings and oral discussions in French of various facets of French life and culture. Prerequisite: French 4 and 6, or their equivalent, with a grade of C.

**105A-105B. Modern French Drama** (3-3) Year, I (Offered in 1953-54)
Plays of Victor Hugo, de Vigny, de Musset, Scribe, Augier, Dumas fils, Pailleron, Brieux, Hervieu, Maeterlinck, Rostand, and others read and discussed as to subject matter and technique. Outside reading and reports. Prerequisite: French 4 and 6, or their equivalent, with a grade of C.

**107A-107B. Eighteenth Century Literature** (3-3) Year, I

The works of Montesquieu, Voltaire, Rousseau, the Encyclopédistes, as well as the theatre and novel of the period. Outside reading and reports. Prerequisite: French 4 and 6, or their equivalent, with a grade of C.

**110-110B. Modern French Novel** (3-3) Year, I (Offered in 1955-56)

The French novel from Victor Hugo to the present day, including such authors as: Hugo, Dumas, Stendahl, Balzac, Flaubert, Loti, Anatole France, Bourget, Bordeaux, Bazin, Barrès, Romain Rolland, A. Gide, Marcel Proust, and others. Class reading, outside reading, and reports. Prerequisite: French 4 and 6, or their equivalent, with a grade of C.

**111A-111B. Seventeenth Century Dramatic Literature** (3-3) Year, I (Offered in 1954-55)

Reading in class of plays of Molière, Corneille, and Racine. Outside readings and lectures on the background of the seventeenth century in France. Prerequisite: French 4 and 6, or their equivalent, with a grade of C.

*** 115. French Civilization** (2) I

An advanced course in French of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

*** 116. French Civilization** (2) II

Continuation of French 115. Prerequisite: sophomore standing.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**198. Comprehensive Reading and Survey Course** (3) II

Designed to fill up the gaps in the reading done in courses. Class meeting once a week for guidance, reports, and quizzes. Required of all seniors majoring in French.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**214. Contemporary French Literature** (2) I

An intensive study of the current movements and techniques in the novel, poetry, and theatre in France from 1900 to the present day. Class discussion, outside readings, written reports. Prerequisite: Nine units of upper division French and graduate status.

**220. Explication de Textes** (2) II

An introduction to the analytical French approach to the detailed study of literature. Demonstrations by instructor and students. This course aims to give teachers of French a greater mastery of French language and literature. Prerequisite: Nine units of upper division French and graduate status.

**290. Bibliography** (1) See Romance Languages

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)

Master's degree candidates in French are expected to substitute a comprehensive examination for the thesis. In unusual cases a student may write a thesis with the permission of the department.

# GENERAL CULTURE

## IN THE DIVISION OF FOREIGN LANGUAGES

Major or minor work is not offered in general culture courses. These courses are carried as part of the offerings of the Foreign Languages Department. They are conducted in English and are open to all students. A knowledge of foreign language is not required.

### Lower Division Courses

*** 15. French Civilization** (2) I

The major currents and characteristics of French culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

*** 16. French Civilization** (2) II

Continuation of French 15. No prerequisite.

*** 15. German Civilization** (2) I

The major currents and characteristics of German culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English No prerequisite.

*** 16. German Civilization** (2) II

Continuation of German 15. No prerequisite.

*** 15. Spanish Civilization** (2) I

The major currents and characteristics of Hispanic life and culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

*** 16. Spanish Civilization** (2) II

Continuation of Spanish 15 with emphasis on Spanish America. No prerequisite.

### Upper Division Courses

*** 115. French Civilization** (2) I

An advanced course in French culture of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

*** 116. French Civilization** (2) II

Continuation of French 115. Prerequisite: sophomore standing.

*** 115. German Civilization** (2) I

An advanced course in German culture of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

*** 116. German Civilization** (2) II

Continuation of German 115. Prerequisite: sophomore standing.

*** 115. Spanish Civilization** (2) I

An advanced course in Hispanic culture of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

*** 116. Spanish Civilization** (2) II

Continuation of Spanish 115 with emphasis on Spanish America. Prerequisite: sophomore standing.

## GENERAL LANGUAGE

### IN THE DIVISION OF LANGUAGES AND LITERATURE

Major or minor work is not offered in general language.

### Lower Division Courses

**20. Latin and Greek Word Derivation** (3) I
A general and elementary course in philology. A study of Latin and Greek roots of most frequent occurrence in English, and of the English words derived from them. No prerequisite. Not open to students with credit for English 20.

**30. Pronunciation of French, Italian and German** (1-3) II
A course designed especially to meet the needs of singers, radio announcers, etc. No prerequisite. This course may be taken for one, two or three units of credit depending on the individual student's need.

## GEOGRAPHY

### IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *geography* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Geography 1, 2; Geology 1A-1B. Recommended: A reading knowledge of German and French. Upper division requirements: A minimum of 24 upper division units in geography, or 18 units in geography and six units selected from related fields with approval of the chairman of the department. A minor is not required; however, students are urged to complete one minor.

A *teaching major* is not offered in geography; however, courses in geography may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *geography*. The minor consists of 15 to 22 units in geography, six units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in geography for the general secondary credential; however, it may be used as a part of the *social science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

*** 1. Introduction to Geography: Physical Elements** (3) I, II
The nature of maps, weather and climates of the world; natural vegetation; land forms and their associated soils, with reference to their climatic relationships; the seas and their coasts. One field trip. This course is classified as a natural science. (See general education requirements.)

*** 2. Introduction to Geography: Cultural Regions** (3) I, II
The regional differentiation of the world by human activity; areal bases of economy and nationality. Prerequisite: Geography 1.

**3. Elementary Meteorology** (3) I, II
An elementary study of the earth's atmosphere and changes in it which produce our weather and influence human affairs. Special attention given to local conditions, instruments, and records.

*** 10. Economic Geography** (3) I, II
Beginning course in economic geography designed for commerce and economic majors. Prerequisite: Geography 1.

### Upper Division Courses

**112. Geography of California** (3) II
The physiographic regions of California and the cultural landscapes developed by the successive cultural groups. Prerequisite: Geography 1 or consent of instructor.

**113. Climatology** (3) II
A survey of the principal classifications of climates of the world; regional characteristics of climate; relations to soils, vegetation, and human activities. Prerequisite: Geography 1 or consent of instructor.

**117. Geography of Northern and Eastern Europe** (3) I
A study of the cultural development of the countries of northern and eastern Europe in relation to physical background and historical evolution. Prerequisite: Geography 1 or consent of instructor.

**118. Geography of the Mediterranean Area** (3) II
A study of the cultural development of the countries of Southern Europe, Western Asia, and North Africa in relation to physical background and resources. Prerequisite: Geography 1 or consent of instructor.

**119. Geography of South America** (3) II
A study of the physical regions and human geography of South America, including a review of the history of colonization and the exploitation of resources. Prerequisite: Geography 1 or consent of instructor.

**120. Geography of Middle America** (3) I
A study of the physical and human geography of Mexico, Central America, and the islands of the Caribbean, including a review of the history of colonization and the exploitation of resources. Prerequisite: Geography 1 or consent of instructor.

**121. Geography of North America** (3) II
The natural regions of North America, their formation and economic and historical development. Prerequisite: Geography 1 or consent of instructor.

**124. Geography of Asia** (3) I
The cultural regions of Asia, their physical environment, and historical development. Prerequisite: Geography 1 or consent of instructor.

**125. Geography of the Pacific Basin** (3) II
A geo-political approach to the study of the islands in, and the lands marginal to, the Pacific Ocean. Prerequisite: Geography 1, or consent of the instructor.

**135. Geography of the San Diego Area** (3) II
Directed individual urban and rural field work in the San Diego area; the mapping of a small area and making its geographic interpretations. Prerequisite: Geography 1 and 2 or consent of instructor.

*** 145. Conservation of Natural Resources** (3) II
Nature and extent of mineral, soil, water, forest, and wild life resources and their conservation; with particular emphasis on the United States, against a general background of world resources. Conservation philosophies and practices, and their geographic bases. Prerequisite: Geography 1 or consent of instructor.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors program.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**200A-200B. Seminar** (2-2) Year, I

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

# GEOLOGY

## IN THE DIVISION OF PHYSICAL SCIENCES

Major work is not offered in geology. Students preparing for later professional training in geology should plan on completing Chemistry 1A-1B; Physics 4A-4B-4C; Mathematics 3A-3B; Engineering 1A-1B, 21A; and Geology 1A-1B, 21 and 22.

A *teaching major* is not offered in geology; however, courses in this field may be used as part of the *general science major* for the general junior high school credential. For specific information, refer to this credential.

### Minor

A *minor in arts and sciences* is offered in geology. The minor consists of 15 to 22 units in geology, six units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in geology; however, courses in this field may be used as part of the *general science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

**1A. Physical** (4) I
The composition, origin, and distribution of earth materials, and their modification through mechanical and chemical process of change. Three lectures and one three-hour laboratory period weekly with related field study during the semester. (Not open to students who have had Geology 2.)

**1B. Historical** (4) II
Theories of earth origin, and the evolutionary history of the earth as traced through rock and fossil records. Consideration of the Paleontologic Sequence. Three lectures and one three-hour laboratory period weekly, with arrangement for field study and conference during the semester. Prerequisite: Geology 1A or equivalent.

***2. General Geology** (3) I, II
Earth materials and processes, the development of land forms, and a brief consideration of the history of the earth. Open to all students except those with previous credit in geology. No prerequisites.

***3. General Geology Laboratory** (1) I, II
Recognition of common earth materials with experience in both field and map relationships. Designed to accompany Geology 2, but entirely separate and complete in itself. One three-hour laboratory period weekly. Open to all students except those with previous laboratory credit in geology. No prerequisites.

***4. Physiography of United States** (3) II
Geologic history and present features of the main physiographic provinces of United States. Prerequisite: Geology 1A or 2.

**21. Elementary Mineralogy** (4) I
Practice in the determination of common minerals and rocks, their geologic environment, utilization and economic significance. Two lectures and two three-hour laboratory periods weekly. No prerequisite.

**22. Advanced Mineralogy** (4) II

The application of the polarizing microscope and other techniques to the identification of minerals and rocks. Two lectures and two three-hour laboratory periods weekly. Prerequisite: Geology 21.

### Upper Division Courses

**100. Structural Geology** (3) I

The evolution and description of the structural and topographical features of the earth. Faulting, folding, and orogenic forces with practical illustrations from the North American Continent and California geologic conditions. Lectures, discussions, and occasional field trips. Prerequisite: Geology 1A-1B or equivalent.

**101. Museum Work** (1-2) I, II

Selection and preparation of materials for the college museum collections. Emphasis upon creation of self instructive displays for use on the elementary and secondary as well as the collegiate level. Prerequisite: Geology 1A-1B, and consent of the instructor. May be repeated for maximum not to exceed six units where quality of work and student capacity justify.

**102. Geology of California** (3) II

Directed reading and group discussion of California geologic literature. Designed to acquaint the student not only with the important structural and geomorphic units of the State but with the variety of important source materials of geologic literature as well. Use of bibliographies, state and federal surveys, research publications, etc. Prerequisite: Geology 1A-1B, and consent of the instructor.

**108. Field Geology** (1-4) I, II

Field instruction in geologic methods. Reconnaissance of adjacent unmapped areas with preparation of a geologic map and accompanying report. Work accomplished primarily on week-ends with minimum classroom activity during the week for organizational details. Prerequisite: Geology 1A-1B, and consent of the instructor.

**166. Honors Course** (Credit to be arranged) I, II

Special work in any of several phases of geologic science for students of demonstrated ability. Refer to the Honors Program.

**199. Special Study** (1-6) I, II

Individual study in field, library, laboratory, or museum work. Six units maximum credit. Prerequisite: permission of instructor.

## GERMAN

### IN THE DIVISION OF LANGUAGES AND LITERATURE

Major or minor work is not offered in German; however, students desiring to carry advanced work in German should consult with the Chairman of the Department of Foreign Languages.

### Lower Division Courses

***1. Elementary** (3) I, II

Pronunciation, oral practice, readings on German culture and civilization, minimum essentials of grammar.

***2. Elementary** (3) I, II

Continuation of German 1. Prerequisite: German 1 or one year of high school German.

***3. Intermediate** (3) I, II

Reading in German of cultural material, short stories, novels or plays; oral practice; outside reading with oral and written reports. Prerequisite: German 2 or two years of high school German.

***4. Intermediate** (3) II

Continuation of German 3. Prerequisite: German 3 or three years of high school German.

**5. Intermediate** (2) I, II

A practical application of the fundamental principles of grammar by means of oral and written work based on German texts. Prerequisite: German 2 or two years of high school German.

**6. Intermediate** (2) II

Continuation of German 5. Prerequisite: German 5 or three years of high school German.

**10. Conversation** (2) I

Practice in the spoken language; practical vocabulary; conversation on assigned topics; simple dialogues and plays. Prerequisite: German 2 or two years of high school German.

**11. Conversation** (2) II

Continuation of German 10. Prerequisite: German 10, or German 3, or three years of high school German.

*** 15. German Civilization** (2) I

The major currents and characteristics of German culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

*** 16. German Civilization** (2) II

Continuation of German 15. No prerequisite.

**8A-8B. Scientific Reading** (3-3) I

First semester, readings in scientific reader on chemistry, physics, etc.; occasional written reports on scientific subjects read outside of class; sight reading. Second semester, readings in special scientific or technical works; weekly written reports required; sight reading. Prerequisite for 8A: German 2 with a grade of C or two years of high school German; for 8B: German 8A or German 3, with a grade of C, or three years of high school German.

### Upper Division

**101A-101B. Advanced Conversation and Composition** (3-3) Year, I
(Not offered 1952-53)

Translation into German of moderately difficult English prose. Free composition in German, written and oral. Outside reading of modern German plays and prose, dealing with various aspects of German life and culture, with written reports and oral discussions in German. Oral and written practice in conversational German. Prerequisite: German 4 and 6, or their equivalent, with a grade of C.

*** 115. German Civilization** (2) I

An advanced course in German culture of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

*** 116. German Civilization** (2) II

Continuation of German 115. Prerequisite: sophomore standing.

## HEALTH EDUCATION

### IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

### Major

An *arts and sciences major* is not offered in health education.

A *teaching major in health education* is offered for the general secondary credential. This major is designed around the plan for a general major and may be used for the A.B. degree by students who have been admitted to candidacy for the general secondary credential and have completed a minimum of eight units in professional education courses, including Education 184A-184B, by the date of degree candidacy. For a statement of requirements refer to the general secondary credential.

## Minor

A *minor in arts and sciences* is offered in *health education.* The minor consists of 15 to 22 units in health education, nine units of which must be in courses carrying upper division credit. Courses will be determined in consultation between student and departmental representative.

A *teaching minor in health education* is offered for the general secondary and the special secondary credentials. For a statement of requirements, refer to the credential.

## Lower Division Courses

***21. Principles of Healthful Living** (2) I, II

An approach to the personal health problems of college students. Scientific health information is provided, and an attempt is made to promote wholesome attitudes and desirable practices relating to healthful living. Includes instruction as required by statutes on safety, fire prevention, and harmful effects of alcohol and tobacco. Required of all freshmen.

**65. Community Health** (3) I, II

Community health problems; the role of the citizen, of the public, and of community health agencies in promoting and protecting the health of the community.

***90. Physiology of Reproduction** (1) I, II

A series of lectures and discussions dealing with normal and abnormal physiology and anatomy of reproduction; facts and frauds in sex hygiene, and related topics. Not open to students with credit for Home Economics 90.

## Upper Division Courses

**145. Safety Education and Accident Prevention** (3) II

Highway safety, the fundamentals of safety programs and techniques in home, school and industry. Partially satisfies the requirements for state credential in driver education.

**151. Health Education for Teachers** (2) I, II

The teacher's function in the different aspects of the school health program; environment, services, and instruction. Special attention is given to materials and material sources, and to community relationships and resources. Separate sections for elementary and secondary teachers are offered.

**152. Health Education Programs** (3) I

The construction of the health education program including objectives, scope and sequence of instruction, teaching methods, source materials and evaluation procedures; practice in building instructional units.

**153. Administration of the School Health Program** (3) II

Administrative responsibilities and procedures in organizing and conducting the school health program. Principles, policies, and practices involved in instruction, service, environment, and community relationships. Partially fulfills Health and Development Credential requirement for nurses.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## Graduate Courses

**200. Evaluation Procedures in Health, Physical Education and Recreation** (2) I

A study of tests and measurements in the profession with practice in their use, construction and interpretation of results.

**202. Problems in Health Education** (2) (Alternate Years)

Current problems in Health Education, studied through a review of the literature, discussion of trends, observation of school situations, together with the analysis and evaluation of actual problems. Written reports required.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3) I, II
Guidance in the preparation of a project or thesis for the master's degree.

# HISTORY
## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *history* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division: Required in the major: History 4A-4B, or 8A-8B, or 9A-9B. Required in general education: Political Science 1A-1B, or 71A-71B, or Economics 1A-1B. Two of the above history courses are recommended for students planning to major in history, and it is suggested that History 4A-4B be included as one of them. No freshman shall enroll in more than one lower division course in history during any one semester without the permission of the department. Upper division requirements: A minimum of 24 upper division units in history, including History 199, and a minimum of a year of concentration in each of three of the following fields: (a) Ancient and Medieval; (b) Modern Europe; (c) United States; (d) Latin America; (e) Pacific Area and the Far East. These courses must be selected under the guidance of the chairman of the department. A reading knowledge of one foreign language is strongly recommended. History majors are not required to complete a minor.

A *teaching major* is not offered in history; however, courses in history may be used as part of the *teaching major in social sciences* for the general secondary and general junior high school credentials. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *history.* The minor consists of 15 to 22 units in history, nine of which must be in courses carrying upper division credit, including a year course.

A *teaching minor in history* is offered for the general secondary credential. Courses in history may be used as part of the social teaching science minor for the special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Explanation of Courses

NOTE: History 17A-17B does not count toward credit for a major in history.

Any history course, with the exception of History 270A-270B, may be taken either semester, the A part not being a prerequisite to the B part.

### Lower Division Courses

*** 4A-4B. History of Modern Europe** (3-3) Year, I, II
A survey of European society, institutions and politics from about 1500 to the present. Fall semester: 1500-1799. Spring semester: 1799 to the present.

*** 8A-8B. History of the Americas** (3-3) Year, I
Survey of the history of the western hemisphere from its discovery to the present time. This year course meets the graduation requirement in American history, institutions and ideals.

**9A-9B. History of the Pacific Ocean Area** (3-3) Year, I
A general survey of the history and civilization of the peoples of the Pacific, with special emphasis upon exploration, trade, international rivalries, and social evolution of the island areas.

*** 17A-17B. History of American Civilization** (3-3) Year, I

Survey of the political and social development of the United States, with emphasis upon the rise of American civilization and ideals. This year course meets the graduation requirement in American history, institutions and ideals, the United States Constitution, and California State and Local Government.

## Upper Division Courses

**111A-111B. Ancient History** (3-3) Year, I
(Offered in 1953-54 and alternate years)

Fall semester: Greek history to the Roman conquest. Spring semester: Roman history to the fifth century A.D.

*** 121A-121B. Medieval History** (3-3) Year, I
(Offered in 1952-53 and alternate years)

Survey of the main events of European social, cultural, religious, political and economic history, between 500 and 1400 A.D.

**131A-131B. Renaissance, Reformation and Counter-reformation** (3-3) Year, I
(Offered in 1953-54 and alternate years)

A history of personalities and events connected with the social, political, cultural, economic and religious change between 1300 and 1600.

**141. Europe in the Seventeenth and Eighteenth Centuries** (3) I

European thought, politics and international relations from the Thirty Years' War and Louis XIV to 1763.

**142. The French Revolution and Napoleonic Era** (3) II

Study of conditions in France prior to 1789, the Revolution, 1789-1799, the organization of France and Europe under Napoleon, character of his empire, and the reorganization of Europe at the Congress of Vienna.

**143A-143B. Europe in the Nineteenth Century** (3-3) Year, I

Reaction in Europe, the development of nationalism, the impact of industrialism, and the background of World War I. Covers period 1815-1914.

**144A-144B. The World Wars** (3-3) Year, I
(Offered in 1952-53 and alternate years)

Developments from 1914 to the present. Semester I: World War I, the peace settlements, and the background of World War II. Semester II: World War II and its aftermath.

**151A-151B. History of England** (3-3) Year, I

Political, constitutional, social and economic developments since 1066. Designed for prelegal students, majors in English, and as a background for American History.

**156A-156B. History of British Expansion** (3-3) Year, I

Study of the growth and development of the British Empire from the first overseas empire to the present. History 156B not open to students with credit for Political Science 160.

**161. Mexico and Caribbean Countries** (3) I

Special attention to relations between the United States and these countries, and to recent developments in Mexico.

**162. South America Since Independence** (3) II

Republics of South America. Development of nationality, struggles for political stability, exploitation, diplomatic and commercial relations with the United States, and other international problems of South America. Survey of present-day conditions.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**171A-171B. Rise of the American Nation** (3-3) Year, I
(Offered in 1952-53 and alternate years)

Semester I: English colonization in North America, development of colonial institutions and political customs, and areas of international conflict during 18th century. Semester II: The Revolution and establishment of the government under the Constitution of 1787. Covers period to 1814.

*** 172A-172B. American Constitutional Development** (3-3) Year, I

A study of the work of the Convention of 1787 and of significant phases of American constitutional law. Not open to students with credit for Political Science 139A-139B. This year course meets the graduation requirement in American history, institutions and ideals, United States Constitution, and California State and Local Government.

**173A-173B. The Expansion of the United States** (3-3) Year, I
(Offered in 1953-54 and alternate years)

Lectures and readings on Jacksonian democracy, territorial expansion and the Mexican War, the slavery controversy, Civil War and Reconstruction, and attention to the growth and progress of the United States to the close of the nineteenth century.

**175. The United States in the Twentieth Century** (3) II

The rise of the United States to the position of a world power; social and economic problems posed by the machine age; political action and adjustment, actual and proposed, intended as solutions for these problems.

**176A-176B. American Foreign Policy** (3-3) Year, I

Lectures and readings in the field of American foreign relations since 1776, with special emphasis, in the second semester, upon affairs since 1900. A general survey course. Not open to students with credit for Political Science 158A-158B.

*** 179A-179B. Intellectual History of the American People** (3-3) Year, I

A study of the ebb and flow of ideas in the United States since the founding of the English colonies, with special attention devoted to social and political thought. This year course meets the graduation requirement in American history, institutions and ideals.

**181A-181B. History of the West** (3-3) Year, I

The American frontier: Expansion, exploration, settlement and building of the new states, with emphasis upon frontier problems of defense, communications, finance, etc.; the development of cultural institutions. A critical examination of the causes, effects and results of the frontier experiences of the American people.

**189. History of California** (3) I, II

The economic, social, intellectual, and political development of California from the earliest times. Emphasis will be on the founding of California, international struggles for California; American conquest and Gold Rush Era; development of California as a state. This course meets the graduation requirement in California State and Local Government.

**191A-191B. History of the Far East** (3-3) Year, I

Particular emphasis during the first semester upon the history, both internal and international, of the Far East through the nineteenth century. The second semester will be devoted to a consideration of developments in the twentieth century.

**192. History of Russia** (3) II

A general survey emphasizing the period since Peter the Great; the Russian Empire's relations with its national minorities; Tsarist experiments in political and social reform; revolutionary socialism; the development of the U. S. S. R.

**193. History of China** (3) I

A survey of Chinese history and institutions from antiquity to the present.

**194. History of Japan** (3) I (Offered in 1953-54 and alternate years)

A general survey of the political, economic and social development from the foundation of the empire to contemporary times. Special attention will be given to religions, philosophy, literature, and the arts.

**198. Special Course for Advanced Students** (2) II

Required of all students with a history major. To be attended during the senior year. Open to social science majors.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**270A-270B. Seminar** (2-2) Year, I

Required of all candidates for the general secondary credential with a social science major, and for the M.A. degree in history or social science. Prerequisite: permission of instructor. 270A is a prerequisite for 270B.

**290. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

## HOME ECONOMICS

### IN THE DIVISION OF FINE ARTS

Major work is not offered in home economics. Students may elect a general major with one of the fields of concentration in home economics. For specific information, refer to the Home Arts Curriculum in the section of the bulletin entitled: Preprofessional and Vocational Curricula.

A *teaching major* is not offered in home economics; however, students planning to complete requirements for a special secondary credential in home economics should take the following courses in addition to courses in home economics: Chemistry 2A-2B. Recommended: Physics 2A-2B, Biology 1 or 3, Zoology 165, English 2A, History 17A-17B or Political Science 71A-71B, Health Education 90, Art 6A, 8, and 61B, Business 20, and Sociology 135.

### Minor

A *minor in arts and sciences* is offered in *home economics.* The minor consists of 15 to 22 units in home economics, nine units of which must be in courses carrying upper division credit. Lower division requirements: Home Economics 2 or 62 and 10 or 11. Upper division requirements: Home Economics 105 or 100, 150 and 170. Electives may be chosen from Home Economics 1, 55, 61A, 101, 135, and 160A.

A *teaching minor in home economics* is offered for the general secondary, general junior high, and special secondary school credentials. For statement of requirements, refer to these credentials. A student with a minor in home economics may teach home economics in junior high school with a general junior high school credential. Through counseling with the adviser in home economics, a student may so extend the minor in home economics that the special secondary credential in home economics may be obtained with a minimum amount of additional work in the field.

### Lower Division Courses

*** 1. General Home Arts** (3) I, II

A general education course in family life education. Consideration of necessary preparation for marriage with emphasis on a stable, happy democratic family life; family budgets and money management; finding a home to buy, build or rent; child care, proper training and guidance; home safety. Open to men and women.

***5. Foods** (3) I

A general education course in practical arts. Deals with the problems faced in planning meals in which the foods are well cooked and appetizing and serving meals in ways suited to the family situation; safety in the kitchen. Nutrition, economic and management problems are stressed. One lecture and two laboratory sections per week.

***10. Clothing Fundamentals** (3) II

A general education course in practical arts. Selection of clothing with self-analysis as a basis; wardrobe planning and buying procedures. Commercial patterns and their adaptation; fitting and construction principles applied to cottons.

**11. Advanced Clothing** (3) I

Fitting and construction processes applied to wool, silk, and synthetics, emphasizing fundamental principles of handling. Prerequisite: Home Economics 10 or equivalent.

**55. Household Equipment** (2) II

Selection, methods of operation and care of household appliances. Equipment of various types used and tested for safety, efficiency and cost of operation. Efficient kitchen arrangement and storage space in relation to the well-being of the family.

**61A. Nutrition** (2) II

Practical problems of nutrition including food requirements, food selection, and food habits. (For men and women.)

**61B. Nutrition Laboratory** (1) II

Nutrition principles applied to food preparation, meal preparation and special diets. Open to prenursing students. One three-hour laboratory section per week.

**62. Food and Nutrition** (3) II

Selection, purchase, and service of meals with a consideration of nutritional needs of family groups, food habits and social customs. Open to all students except prenursing students.

**90. Physiology of Reproduction** (1) I, II

A series of lectures and discussions dealing with normal and abnormal physiology and anatomy of reproduction; facts and frauds in sex hygiene, and related topics. Not open to students with credit for Health Education 90.

### Upper Division Courses

**100. Advanced Clothing Design (Tailoring)** (3) II

Principles of tailoring; planning and construction of coats and suits. Prerequisite: Home Economics 11.

**101. Clothing Selection** (3) I

Aims to develop taste in dress through a better understanding of the relation of art principles, psychology, fashion trends, personality and physical characteristics to individuals. History of costume is studied briefly as an aid in understanding recurring cycles in fashion. A consideration of buymanship information necessary in wardrobe selection to insure satisfaction and economy.

**105. Family Meals** (3) II

This course deals with the planning, preparing, and serving of attractive, well-balanced meals for different income levels, and for various occasions. The student will have responsibility for menu making, food purchasing, and meal management.

**120. Demonstration Methods** (1) Irregular

Class discussions and demonstrations with emphasis upon individual experience in organizing demonstration materials and in acquiring demonstration techniques. Observation and evaluation of professional demonstrations. Prerequisite: Nine units in Home Economics courses.

***135. Marriage and the Family** (3) I, II

Preparation for marriage. Prediction scales for evaluating success or failure in marriage. Parent-child relationships; factors in successful and unsuccessful marriages; higher education and the birth rate; married women in industry and professions; desertion and divorce. Not open to students who have credit for Sociology 45 or 135. A general education course in social science or in family life education.

***150. Home Management** (3) I, II

A general education course in family life education. Integration of the learning activity around a living situation with emphasis on cooperation and establishment of family goals. Management for more successful use of the resources of time, energy, and money to enrich personal and family life; use of credit, value of insurance and balancing budgets. Open to men and women.

**160A. Merchandise Analysis—Textiles** (2) I

Properties, uses, selection and care of textile fibers and fabrics. The aim is to develop judgment in the evaluation involved in the selection of textiles. (Open to men and women.)

**160B. Merchandise Analysis—Nontextiles** (2) II

Properties, uses, selection and care of metals, glass, rubber, fur, enamels and plastics. (Open to men and women.)

**161. General Textiles** (2) II

Factors involved in fundamental weaves, fabrics, color, and finishes with reference to selection of fabrics for home decoration and clothing. Relationships to durability and cost are emphasized. Open to all students except merchandising majors.

***170. Child Care and Development** (3) I

A general education course in family life education. A study of the prenatal and preschool periods of child development; particular emphasis is given to the nutrition and physical development of the young child. Directed observation and participation in the nursery school.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

# INDUSTRIAL ARTS

## IN THE DIVISION OF PHYSICAL SCIENCES

Courses in industrial arts lead to the following objectives: (1) a minor in arts and sciences; (2) a teaching minor for several of the teaching credentials; and (3) general education and individual interests. Many of the courses will prove valuable to students desiring practical shop experience on an elective basis.

Although major work is not offered in industrial arts at this time, a number of upper division courses are now available and additional upper division courses are planned for the near future.

Students planning to continue work in industrial arts which may lead to the special secondary teaching credential can complete the lower division requirements at this college. These students should consult with the departmental representative regarding an appropriate selection of courses. The following lower division courses are recommended: Industrial Arts 2 or 21, 31 or 32, 51 or 52, 61 and 71; Art B; Chemistry 2A; Mathematics C, D, and E (or high school equivalent); Physics 2A-2B.

### Minor

A *minor in arts and sciences* is offered in industrial arts. The minor consists of 15 to 22 units in industrial arts, nine units of which must be in courses carrying upper division credit.

A *teaching minor* in industrial arts is offered for the general junior high, special secondary, and general secondary credentials. Industrial arts may also be used as a second minor for the general elementary credential. For specific information, refer to the outline of requirements for these credentials.

### Lower Division Courses

**2. Mechanical Drawing** (3) I, II, Summer

Use and care of drafting equipment, freehand lettering, technique of the finished drawing including inking, simple orthographic projection, introduction to dimensioning problems, simple section and auxiliary views, fundamentals of pictorial drawing in isometric, oblique, and cabinet projection. One lecture and two laboratory sections per week. Not open to students with credit for Engineering 2.

***5. Introductory General Shop** (3) I

A general education course in practical arts utilizing tools and material of industrial arts to gain understanding of the industrial age. Students will explore their abilities by solving practical problems. Activities include individual and group problems, field trips, and audio-visual aids.

***6. Intermediate General Shop** (2) II

A general education course in practical arts. An approach similar to that of Industrial Arts 5 will be used. Students may select problems to meet their needs, interests, and objectives. Safety consciousness and good work habits will be emphasized.

**21. Industrial Drafting** (3) II

Introduction to industrial drafting procedures. Principles of orthographic projection as applied to aeronautical and machine drawings, sheet metal, furniture and related production drawings, and electrical and pipe layouts. One lecture and two laboratory sections per week. Prerequisite: Industrial Arts 2 or one year of high school mechanical drawing.

**31. Elements of Metalwork** (3) I

Demonstration and practice in the use of hand tools commonly used in bench and sheet metal including fundamentals of pipe fitting and welding. Discussion of the principles and techniques of metalworking for the prospective shop teacher. One lecture and two laboratory sections per week. (Required for the Special Secondary credential in Industrial Arts.)

**32. Elements of Machine Operation** (3) I, II

Demonstration and practice in the safe operation of machine shop equipment including drill, milling machine, shaper, and precision grinder for the shop teacher. May be substituted for Industrial Arts 31 to meet requirements for the Special Secondary credential in Industrial Arts. One lecture and two laboratory sections per week.

**51. Elements of Woodwork** (3) II

Training in the use of hand tools commonly used in the woodshop. Discussion and demonstration of the principles and techniques of woodwork and woodworking machines for the teacher. One lecture and two laboratory sections per week. (Required for the Special Secondary credential in Industrial Arts.)

**52. Advanced Woodwork** (3) I

Demonstration and practice in the safe operation of woodworking machines including the lathe and in the fundamentals of furniture joinery. Training in setting up and maintaining machines. One lecture and two laboratory sections per week. Prerequisites: Industrial Arts 51 or one year of high school woodwork.

**61. Elements of Electricity** (3) I, II

Demonstration of the basic principles of electricity as related to the home and to industry; practice in the use of tools, meters and materials in the laboratory and as applied to home appliances and the design and construction of simple devices suitable to the high school shop. One lecture and two laboratory sections per week. (Required for the Special Secondary credential in Industrial Arts.)

**62A-62B. Applied Electronics Laboratory** (3-3) Year, I

Practice in the construction and testing of electronic devices, such as radio receivers, television receivers, photocell systems, vacuum tube voltmeters, special control, and testing devices. Two hours of discussion and six hours of laboratory per week. Prerequisite: Industrial Arts 61 or permission of instructor.

**71. Elements of Transportation Machinery** (3) I

Demonstration and study of the theory of internal combustion engines as applied to transportation. Practice in maintenance, tune up and minor repair of automobiles. Consideration of the problems of safe driving and the development of the necessary habits and attitudes. Two lectures and one laboratory section per week. (Required for the Special Secondary credential in Industrial Arts.)

## Upper Division Courses

**121. Advanced Mechanical Drawing** (3) I, II

Lettering practice, orthographic and isometric projection of machines and parts and of furniture. Theory and practice of dimensioning, working and production drawings, reproduction and principles of perspective. Intended for the prospective teacher. One lecture and two laboratory sections per week. Prerequisite: Industrial Arts 21.

**131. Advanced Metalwork** (2) I, II

Additional demonstration and practice on metalworking machines including press work, welding and forging, sheet metal forming, metal spinning and pipe layout and fitting. Two laboratory sections per week. Prerequisite: Industrial Arts 5 or 31.

**133A-133B. Advanced Machine Shop Practice** (3-3) Year, I, II

A year course in the principles and practice of machine tool operation stressing tool making, instrument work and modelmaking. One lecture and two laboratory sections per week. Prerequisite: Industrial Arts 32 or permission of instructor.

**136. Forging and Welding** (2) (May not be offered in 1951-52)

Principles and techniques of forging and welding including oxy-acetylene and electrical as applied to repair work and the fabrication of ornamental metal work. Two laboratory sections per week. Prerequisite: Industrial Arts 5 or 31.

**151A-151B. Furniture and Cabinet Making** (2-2)

(May not be offered in 1952-53)

A year course in advanced woodwork problems. Design and construction of furniture and mill cabinet work. Two laboratory sections per week. Prerequisite: Industrial Arts 51 or 52.

**152. Finishing and Painting** (2) I

Theory, demonstration and practice of a wide variety of wood and metal finishing processes, including fillers, stains, varnishes, enamels and lacquers. Two laboratory sections per week. Prerequisite: Industrial Arts 5 or 51 or 52.

**153. Patternmaking and Woodturning** (3) II

Demonstration and practice of the principles of patternmaking and woodturning. Development of skill in woodturning operations. One lecture and two laboratory sections per week. Prerequisite: Industrial Arts 51 and 52 or equivalent.

**190. Experimental Shop** (1 or 2) I, II

Individual shop work on complex projects on an experimental basis. Prerequisite: Permission of the instructor. May be repeated with permission of the instructor.

**193. Industrial Arts Organization and Management** (2) II

(Not offered in 1952-53)

Study of the organization of Industrial Arts in secondary schools, review of project requirements and methods of developing student participation in shop management. Two lectures per week.

**194. Recent Trends in Industrial Arts Education** (2) I

(Not offered in 1952-53)

Survey of current trends and practices in the field of Industrial Arts in Secondary Education. There will be opportunity for individual work on related problems of interest to member of the class. Two lectures per week.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

# JOURNALISM

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in *journalism* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division: Required in the major: Journalism 51A-51B, Business 2A (or equivalent performance in typing), and Speech Arts 81. Required in general education: Physical Science 10. Recommended: Business 27, Economics 1A-1B, English 20 or General Language 20, English 61. Upper division requirements: 24 upper division units in journalism to include Journalism 102 and 151. A minor is not required.

### Minor

A *minor in arts and sciences* is offered in journalism. The minor consists of 15 to 22 units in journalism, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in journalism.

### Lower Division Courses

**51A. Elements of Journalism** (3) I

Theory of news writing; introduction to the newspaper as an institution in modern society. Prerequisites: Sophomore standing and grade of B in freshman composition, or consent of instructor; and Business 2A (may be taken concurrently) or equivalent, with 30-word-per-minute performance.

**51B. News Gathering and Reporting** (3) II

Practice in writing news copy, both for class criticism and for publication in *The Aztec.* Prerequisite: Grade of C or better in Journalism 51A.

**92. Special Projects** (1-3) I, II

Special work in journalism by arrangement with instructor. Work on *The Aztec,* yearbook, other publications, with consent of instructor. Total credit that may be earned in Special Project work limited to eight units.

### Upper Division Courses

**101. Interpretative Writing** (3) II

Practice in gathering material and writing articles for specialized areas, with emphasis on the business press. Production of eight articles and marketing of at least one article required. Prerequisite: junior standing and permission of instructor.

**102. Law of the Press** (3) II

Understanding of the law as it affects the privileges and defines the duties and responsibilities of the press. Problems of constitutional law, libel, privacy, and postal regulations pertinent to the press, with emphasis on the covering of public affairs.

**106. Creative Writing** (3) I

A writing workshop in which students are given opportunity to criticize each other's work. Emphasis on narrative and description, but freedom to pursue whatever writing forms may interest the student most. May be taken a second time with new material. Not open to students with credit for English 106.

**122. Public Opinion Measurement** (3) II

The history, methods, and problems of public opinion and attitude measurement. Emphasis will be placed upon the polling of consumers and voters. Students will be given field experience. Not open to students with credit for Psychology 122.

**132. Propaganda and Public Opinion** (3) II

A study of the forces which mold the American public mind, the practice of propaganda, a description and analysis of public relations, pressure groups and their effect in American public life. Not open to students with credit for Political Science 122.

**142. State Government** (3) II
A study of the political structure and its operation used in the carrying on of the functions exercised by the states; state-federal relations; state-local government relations; particular emphasis on California government. This course meets the graduation requirement in California state and local government. Not open to students with credit for Political Science 142.

**143. Municipal and County Government** (3) I
A study of the organization and its operation used to carry into effect the functions assigned to local governmental units; particular emphasis upon local government in California. This course meets the graduation requirement in California state and local government. Not open to students with credit for Political Science 143.

**151. Advanced Editing and Reporting Techniques** (3) I
Editing copy, writing headlines, making up pages, handling telegraph copy. Practice in specialized forms of journalistic writing. Prerequisite: Journalism 51A-51B.

**152. High School Journalism** (3) II
Methods of conducting high school journalism classes. Editorial, business and mechanical aspects of school publication work, with emphasis on copy editing, headline writing and layout. Not open to journalism majors. Prerequisite: grade of C or better in Journalism 51A and approval of instructor.

**162. Magazine Fiction** (3) I
Coaching in constructing and writing short stories for commercial publications. Admission with consent of instructor. Not open to students with credit for English 162.

**166. Honors Course** (Credit to be arranged) I, II
Special study open to members of the Honors Program in journalism. Refer to the Honors Program.

**183. Radio Continuity and News Writing** (3) II
Correlates news editing and writing with announcing styles. Radio news procedure and organization of a radio news staff; analysis of repertorial and commentary styles. Includes production techniques of "on-the-spot" and multiple point pickup broadcasts. Registration with consent of the instructor. Not open to students with credit for Speech Arts 183.

**185. Advertising Copy and Layout** (2) I
Introduction to principles and techniques of copy writing; types of copy; preparation of layouts; mechanical methods employed by the artist, engraver and printer; legislation and regulations affecting advertising claims. Prerequisite: Business 27, or consent of instructor. Not open to students with credit for Business 185.

**191A-191B. Applied Journalism** (1-3) (1-3) I, II
A special course in which students work in the San Diego area on magazines, city and county newspapers, and on public relations, publicity, and advertising staffs of local, civic and business groups. Prerequisites: Journalism 51A-51B and permission of instructor.

**192. Special Projects** (1-3) I, II
Special work in journalism by arrangement with instructor. Work on *The Aztec*, yearbook and other publications, with consent of instructor. Total credit that may be earned in Special Project work limited to eight units.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

# LANGUAGE ARTS

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *language arts major in arts and sciences* is offered for the A.B. degree to students who have been admitted to the general secondary credential program in teacher education and provided that a minimum of eight units in professional education courses be completed by date of degree candidacy. Requirements for the major are in addition to 45 units in general education courses. A minor selected from an appropriate teaching minor for the general secondary credential is required of students taking this major. A minimum of 15 units in this minor, six units of which must be in upper division courses, must be completed for the A.B. degree. The additional units required for the credential may be completed either in undergraduate or postgraduate work.

Lower division requirements for the major: Six units selected from English 50A-50B, or 52A-52B, or 60A-60B (or two upper division courses may be substituted, selection to be made from English 116A-116B, or 118A-118B, or 119A-119B, or 120A-120B, or 126A-126B, or 143A-143B); Journalism 51A; Speech Arts 60A, or 60B, or 55A, or 55B; Speech Arts 81. Upper division requirements: 27 units to include the following courses: English 192; English 106 or 191; English 131, or 132, or 133, or 134; English 117A, or 117B, or 152A, or 152B; Journalism 152; Speech Arts 108, 159, and 176; Speech Arts 191, or 192A, or 192B. If lower division English sequence is taken in American Literature, the upper division course work in literature should be taken in other areas.

A *teaching major in language arts* is offered for the general secondary school credential. For a statement of requirements, refer to this credential.

*Minor* work is not offered in language arts.

# LATIN

## IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* or *minor* work is not offered in Latin.

### Lower Division Courses

*** 1. Elementary** (3) I, II

Study of the Latin language and Roman culture, with reading of selected prose passages.

*** 2. Elementary** (3) I, II

Continuation of Latin 1. Prerequisite: Latin 1 or one year of high school Latin.

*** 3. Intermediate** (3) I

Reading of selected passages emphasizing the contribution of the ancient culture to our own. Prerequisite: Latin 2 or two years of high school Latin.

*** 4. Intermediate** (3) II

Continuation of Latin 3. Prerequisite: Latin 3 or three years of high school Latin.

# LIBRARY SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

*Major* or *minor* work is not offered in library science.

### Lower Division Courses

*** 10. Use of the Library** (2) I, II

The chief object is to give a working knowledge of some of the resources of the library which every teacher and student should understand—the decimal classification, the card catalog, periodical indexes, and the most important reference books, together with some instruction in the preparation of bibliographies. The course will be a requirement of those students added to the library's staff of student assistants, although it will not prepare the student to become a librarian. A general education course in practical arts.

# LIFE SCIENCE

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in *life science* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Zoology 1A-1B or Biology 3 and 4; Zoology 20 or Physiology 1A; Botany 2A-2B or 1 or Bacteriology 1; Chemistry 1A-1B or 2A-2B; Physics 2A-2B. Upper division requirements: A minimum of 24 upper division units in zoology, bacteriology and botany of which six units may be from a related field. The plan for this major must be with the approval of the Chairman of the Division of Life Sciences. A minor is not required of students majoring in life science.

A *major in arts and sciences* is offered in *life science* for the B.S. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Bacteriology 1 or 101, Botany 2A-2B, Zoology 1A-1B, Chemistry 1A-1B or 2A-2B, Physics 2A-2B. Upper division requirements: 36 upper division units in zoology, bacteriology and botany or 27 units in these fields with nine units in a related field. The plan for this major must be with the approval of the Chairman of the Division of Life Sciences. A minor is not required of students majoring in life science.

Note: Twelve units in natural science courses in the major for the A.B. or B.S. degree may be applied toward requirements in general education natural science courses.

A *teaching major in life science and general science* is offered for the general secondary school credential and a *teaching major in general science* is offered for the general junior high school credential. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *life science.* The minor consists of 15 to 22 units in life science to include Biology 3 and 4, or the equivalent, and a minimum of nine units in courses carrying upper division credit selected with approval of the chairman of the division.

A *teaching minor in life science and general science* is offered for the general secondary, special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

# MARKETING

## IN THE DIVISION OF BUSINESS

### Major

A *major in arts and sciences* is offered in *business* for the B.S. degree with specialization in marketing. Courses in the major are in addition to 45 units in general education courses. Lower division requirements in the major: Business 8, 14A-14B, 18A-18B, 20, 24, 25, 27; Economics 1A-1B; Art 7. (Business 120 and Art 107 may be taken in the upper division in place of Business 20 and Art 7.)

Upper division requirements: 36 upper division units to include Business 121, Economics 140, one of the following courses: Business 123, 153, Economics 111, 170; and 27 units chosen from Business 120, 123, 124, 137, 153, 154, 181, 184, 185, 186, 187A, 187B, 188, 189, 196, 198A, 198B, Home Economics 160A, 160B, Art 107. A minor is not required of students majoring in business.

A *teaching major* is not offered in the marketing field, but is offered in *business education.* Marketing may be included as the areas of specialization.

### Minor

A *minor in arts and sciences* is offered in *business* with specialization in marketing. The minor consists of 15 to 22 units in business, six units of which must be in courses carrying upper division credit. Students electing business as a minor with specialization in marketing should consult with the adviser in marketing for selection of courses.

A *teaching minor* is not offered in business, but is offered in *business education* for the general secondary school credential. For statement of requirements, refer to the credential.

### Courses in Marketing

All business courses in this department for the major or minor are listed in this section of the bulletin under Business.

## MATHEMATICS

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in *mathematics* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Mathematics 1, or equivalent (unless exempted by examination); Mathematics 3A-3B and 4A. Recommended: Business 2, Engineering 1A, 21; Physics 4A-4B or Physics 2A-2B, 3A-3B. A reading knowledge of French or German is desirable. Upper division requirements: A minimum of 24 upper division units in mathematics to include Mathematics 117 (unless taken as Mathematics 4B in the lower division); 111, 119, 121, and either 105 or 106. Six units of the remaining nine units may be selected from upper division courses in related areas with the approval of the department. A minor is not required, but is recommended.

A *teaching major* is offered in mathematics for the general junior high school credential and for the general secondary credential. For specific information, refer to the outline of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in *mathematics*. The minor consists of 15 to 22 units in mathematics, six units of which must be in courses carrying upper division credit. Courses should be selected in consultation with the departmental representative.

A *teaching minor* is offered in mathematics for the general secondary, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**X. Basic Mathematics** (3) I, II

Fundamentals of mathematics with applications to everyday problems. Required of all students failing the competency examination in mathematics. Not open for credit to students passing this examination. May not be used in the major or minor.

**A. Elementary Algebra** (3) I, II

Fundamentals of algebra. Not open for credit to students who have credit for one year of high school algebra.

* **B. Plane Geometry** (3) I, II

Fundamentals of plane geometry. Not open for credit to students who have credit for one year of high school geometry. May be counted toward general education in mathematics.

**C. Intermediate Algebra** (3) I, II

An extensive review of elementary algebra followed by quadratic equations, simultaneous equations, ratio and proportion, variation, progressions, etc. Prerequisite: Elementary algebra and geometry or Mathematics A-B.

**D. Trigonometry** (3) I, II

Plane trigonometry with special attention to logarithms and those aspects needed in analytic geometry and the calculus. Prerequisite: Mathematics C or its equivalent.

**E. Solid Geometry** (2) II

Properties of lines and planes. Calculation of areas and volumes. Prerequisite: Mathematics C or its equivalent.

*** G. Mathematics for General Education** (3) I, II
Basic concepts of arithmetic, algebra, and geometry with applications. Recommended for students whose scores on the competency examination, while exempting them from Mathematics X, indicate a need for further training in mathematics. A general education course in mathematics. May not be used in the major or minor.

**S. Slide Rule** (1) I, II
Theory and use of the slide rule. Practice in performing the fundamental operations of arithmetic. Some attention is given to more involved computations. Prerequisite: Trigonometry or Mathematics A-B or equivalents.

**1. Algebra and Trigonometry** (3) I, II
Review of algebra and trigonometry. Further study of identities, graphs, solution of algebraic and trigonometric equations, determinants, and mathematical proofs. Prerequisite: Two years of high school algebra and trigonometry.

**3A. Analytic Geometry** (3) I, II
Equations and loci, conic sections, coordinate transformations, Cartesian and polar coordinates, and parametric representation. Prerequisite: Mathematics 1; or trigonometry and passing of qualifying examination. (Qualifying examination will be given during the first week of the semester.)

**3B. First Course in Calculus** (3) I, II
Introduction to differential and integral calculus with applications. Prerequisite: Mathematics 3A, with a grade of C or better.

**4A. Second Course in Calculus** (3) I, II
Differentiation, integration, infinite series, and applications. Prerequisite: Mathematics 3B, with a grade of C or better.

**4B. Third Course in Calculus** (3) I, II
Partial differentiation, successive integration and applications. Prerequisite: Mathematics 4A, with a grade of C or better. (Solid geometry is recommended.) Not open to students with credit for Math. 117.

*** 7A. Mathematical Analysis** (3) I
Designed for students who do not intend to prepare for a professional career in physical science or in engineering. Consideration is given to the processes and applications of algebra and trigonometry. Prerequisite: High school algebra and plane geometry. Students with credit for Mathematics 1 will not receive credit for Mathematics 7A. This course may be counted toward general education in mathematics.

*** 7B. Mathematical Analysis** (3) II
A continuation of Mathematics 7A including the concepts and applications of analytic geometry and an introduction to the calculus. Prerequisite: Mathematics 7A. Students with credit for Mathematics 3B will not receive credit for Mathematics 7B. This course may be counted toward general education in mathematics.

## Upper Division Courses

*** 104. History of Mathematics** (3) II
History of mathematics down to early modern times. This course may be counted toward general education in mathematics.

**105. College Geometry** (3) I
A synthetic treatment of the points and lines associated with triangles and quadrilaterals, similarity, inversion, ruler and compass construction, etc. Highly recommended for all teachers of high school geometry. Prerequisite: Mathematics 3B or 7B.

**106. Projective Geometry** (3) I
Concurrence of lines, collinearity of points and other properties of figures not altered by projections; construction and study of ellipses, hyperbolas, and parabolas by means of projections. Prerequisites: Mathematics 3B or 7B and permission of instructor.

**111. Theory of Algebraic Equations** (3) I, II
Determinants, complex numbers, and theory of algebraic equations. Prerequisite: Mathematics 3B or 7B.

**112. Analytic Geometry of Space (3) II**
The coordinate systems in space; lines, planes, and quadric surfaces; applications. Prerequisite: Mathematics 4A.

**117. Intermediate Calculus (3) I, II**
Essentially the same as Mathematics 4B. Additional special work for advanced students may be assigned. Prerequisite: Mathematics 4A, with a grade of C or better. Not open for credit to students with credit for Math. 4B.

**118A. Advanced Mathematics for Engineering Students (3) I**
Introduction to differential equations, vector analysis, Fourier series, hyperbolic, elliptic, and Bessel functions. Prerequisite: Mathematics 117 or its equivalent.

**118B. Advanced Mathematics for Engineering Students (3) I**
Introduction to partial differentiation, partial differential equations, line and surface integrals, complex variables, etc. Prerequisite: Mathematics 118A.

**119. Differential Equations (3) I, II**
Ordinary differential equations with applications to geometry, physics, and chemistry. Prerequisite: Mathematics 117 or its equivalent.

**121. Advanced Calculus (3) II**
Review of the fundamental concepts of the calculus, partial differentiation, series, line and surface integrals, etc. Prerequisite: Mathematics 118A or Mathematics 119.

**124. Vector Analysis (3) I**
Vector algebra, differentiation of vectors, gradient, divergence, and curl. Applications to geometry and physics. Prerequisite: Mathematics 4B or 117.

**140A. Mathematical Statistics (3) I**
Graphical and arithmetical characterization of observed frequency distributions, moments, use of normal curve, curve fitting, correlation, etc. Prerequisite: Mathematics 4B or 117.

**140B. Mathematical Statistics (3) II**
Theoretical discrete and continuous distributions, multiple and partial correlation, large and small sample theory including student's T, Chi-square, and the F distributions with applications. Prerequisite: Mathematics 140A.

**166. Honors Course** (Credit to be arranged) I, II Refer to the Honors Program.

**199. Special Study (1-6) I, II**
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**201. Concepts of Geometry From an Advanced Viewpoint (2) I**
An introduction to the fundamental concepts of geometry and the processes of mathematical thinking in this area. Recommended for candidates for the general secondary credential. Prerequisite: One upper division course in geometry.

**202. Concepts of Algebra From an Advanced Viewpoint (2) II**
An introduction to the fundamental concepts of algebra and the processes of mathematical thinking in this area. Recommended for candidates for the general secondary credential. Prerequisite: One upper division course in algebra.

**204. Advanced Work in the History of Mathematics (2) I**
Intensive study of specific phases of the history of mathematics with attention to implications for teaching mathematics. Prerequisite: Mathematics 104.

**224. Functions of a Complex Variable (3) I**
Operations on complex numbers, limits, convergence, continuity, differentiation, integration, Cauchy's Theorem, power series, elementary functions, etc. Prerequisite: Mathematics 118A or 119 and consent of the instructor.

**290. Bibliography (1) I, II**
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

**299. Thesis or Project** (3) I, II
Guidance in the preparation of a project or thesis for the master's degree.

# MUSIC

## IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is offered in *music* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Students majoring in music are not required to complete a minor. Several plans of study are available with varying degrees of emphasis on performance, history and literature, creative activity, and teaching.

The music curricula are designed to fulfill the needs of all students: (1) Those who have professional ambitions in musical performance, or seek a foundation for graduate study leading to college or university teaching, (2) those who are preparing for one of the several state teaching credentials with music as either a major or minor, (3) those whose major professional interest is in another department and are seeking musical study as a minor, and (4) those who are interested in music as an elective study area for the enrichment of their cultural background.

## GENERAL BASIC REQUIREMENTS

General basic requirements for the degree with a major in music to be met by all music students, are as follows: (1) Demonstration of proficiency in vocal or instrumental *performance* at a level of difficulty comparable to the Bach two-part inventions or the easier Haydn sonatas for the piano before admission to the major may be granted; (2) development, through class or individual instruction of *performance ability;* (3) appearance as soloist in at least one student recital during each of the last four semesters; (4) elementary keyboard technique (the student's attention is directed to the prerequisites for certain courses, to the Music 10A-B-C-D requirement and to the credential requirements listed earlier in the bulletin under Professional Curricula in Teacher Education); and (5) as laboratory experience participation in one vocal and one instrumental activity *each* semester excepting the semesters in which the credential candidate is enrolled in cadet teaching (in special cases this requirement may be waived by the chairman of the Music Department). During the semesters of cadet teaching the student is required to enroll in one music activity. A maximum of eight units of credit from music activities may be used toward graduation. The maximum credit permitted toward graduation from any combination of intermediate class, advanced class and individual instruction in solo performance is eight units. Attention is directed to the statement following the course descriptions in which the conditions for receiving credit from private instruction are given.

## SPECIFIC REQUIREMENTS FOR THE MUSIC MAJOR

### (Not the teaching credential)

Music majors must complete the specific requirements listed below and in addition complete the requirements in one of the following fields of emphasis: (1) Performance, (2) Music History and Literature, (3) Creative Activity. Students desiring the Special Secondary Credential in Music should refer to this credential for specific requirements.

Specific requirements for all majors (except for the Special Secondary Credential): Lower division: Music 8A-8B, 10A-B-C-D (may be omitted in part or in full upon evidence of satisfactory piano technique), 51A-51B, 58A-58B, four music activities selected from music courses numbered 70 to 87 (see activity requirement above). Upper division: Music 101A-101B, 108A-108B, 109A, 146A-B-C, four music activities selected from music courses numbered 170 to 187 (see activity requirement above). Eight units in music activity courses may be applied toward general education requirements in Literature, Philosophy, and the Arts.

In addition to completion of the specific requirements listed above, each music major must complete the requirements in one of the following areas of major emphasis:

*Performance:* Add the following courses to the basic requirements: Lower division: Four units selected from Music 11, 16, 21, 26, 31, or 50. Upper division: Four units selected from Music 111, 112, 116, 117, 121, 122, 127, 131, 132, or 150ABCD; four units of electives chosen from Music 109B and/or 199 (special studies in music history and literature or composition). The student emphasizing performance must appear in a joint public recital during the junior year and must present an entire solo public recital during the senior year. The student must pass a preliminary audition of the compositions to be performed at the public recital before the music faculty during the semester preceding the recital appearance.

*Music History and Literature:* Add the following courses to the list of requirements: Upper Division: Four units selected from Music 111, 112, 116, 117, 121, 122, 126, 127, 131, 132 or 150ABCD; six units selected from Music 109B and 199 (special studies in history and literature or composition). During his senior year the student emphasizing history and literature is required to organize, prepare program notes and present two recitals consisting of recorded or "live" performances each of which will deal with representative works of a certain period or composer or with certain periods, composers, works or styles to be compared; such students must pass a preliminary audition of the material to be presented before the music faculty at least one month in advance of each performance.

*Creative Activity:* Add the following courses to the list of requirements: Upper division: Four units selected from Music 111, 112, 116, 117, 121, 122, 126, 127, 131, 132, or 150ABCD; six units selected from Music 109B and 199 (special studies in history and literature or composition). The student emphasizing creative activity is required to present a concert of his compositions during the senior year and present the scores of works to be performed to the music faculty one month in advance of the performance.

Students are required to consult with the chairman of the department for selection of the field of emphasis.

## THE SPECIAL SECONDARY CREDENTIAL IN MUSIC

A *teaching major in music* is offered for the special secondary credential and for the general secondary credential. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *music.* General basic requirements for the minor are as follows: (1) Demonstration of vocal or instrumental performing ability before admission to the minor program may be granted; (2) as laboratory experience participation in one music activity each semester (in special cases this requirement may be waived by the chairman of the department); (3) a maximum of four units received from music activities may be used toward the total graduation requirement. Lower division: 14 to 18 units: Music 8A-8B, 10A-B-C-D (may be omitted in part or in full on evidence of satisfactory piano technique); six units selected from 51A-51B or 58A-58B; two units from courses numbered 70 to 87 (see activity requirements for the minor). Upper division: Six units selected from Music 101A-101B or 108A-108B; two units of music activities from music courses numbered 170 to 187 (see activity requirements for the minor).

## ELECTIVES IN MUSIC

The Music Department offers certain courses which fulfill the needs of students who do not have music as a major or minor subject but who are interested in music as an elective study area for the enrichment of their cultural background. Courses particularly suited to these needs are Aesthetics 2 and 102 and the music courses numbered 70 to 88 and from 170 to 188; such courses are designated as general education courses and may be taken as partial fulfillment of the Literature, Philosophy, and the Arts requirement in general education.

Some students will be musically prepared to elect courses in music which may or may not be included in the general education group. Enrollment by qualified students who wish to elect these courses is encouraged.

## Lower Division Courses

***7A. Musicianship—For General Elementary Teachers** (3) I, II

Elementary music theory and skills including notation, meter, rhythm, scales, intervals, triads, sight singing, ear training, dictation, elementary keyboard facility and other rudiments. State adopted elementary music texts used. A general elementary credential requirement. Closed to music majors or minors. Formerly Music 1A.

**7B. Music Materials for the Elementary School** (3) I, II

Study of all phases of elementary school music: Singing, listening, reading, creative music, instruments, repertoire of songs and records, music projects. Required of all general elementary credential candidates. Prerequisite: Music 7A or consent of instructor.

**8A. Music Fundamentals** (3) I

Preparation for study of music structure. Designed to equip the student to sing, play at the keyboard, write and recognize aurally scales, intervals, triads and basic rhythms. (Note: Students lacking keyboard facility must enroll concurrently for piano study.) For majors and minors.

**8B. Elementary Harmony** (3) I, II

Diatonic usage studied through written exercises, keyboard harmony, analysis, dictation and sight-singing. Prerequisites: Ability to play Bach chorales at the keyboard; Music 8A or equivalent.

***10A-10B. Piano—Elementary Class Instruction** (1-1) I, II

Fundamental playing and reading techniques for the pianoforte. Emphasis upon playing by ear, and the development of interpretative ability. Music majors or minors are required to start these courses on admission unless competence of 10D level is demonstrated. Formerly Music 28ABCD.

**10C-10D. Piano—Elementary Class Instruction** (1-1) I, II

Continuation of Music 10A-10B.

**11ABCD. Piano—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission.

**15A. Voice—Elementary Class Instruction** (1) I, II

A class for beginners in the vocal field taking up the problems of breath control, tone placement, articulation and enunciation. Frequent classroom performance of simple songs. Formerly Music 29AB.

**15B. Class Voice—Continuation First Semester Voice** (1) I, II

Study of more advanced songs with attention being given to interpretation, as well as continued work on tone, articulation and placement. Frequent performance before class required. Prerequisite: Music 15A or equivalent. Formerly Music 29CD.

**16ABCD. Voice—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission.

**20AB. Strings—Elementary Class Instruction** (1-1) I, II

Open to all students but primarily for those whose major instrument is not one of the stringed instruments and who are preparing for a teaching credential in music. Formerly Music 2A.

**21ABCD. Strings—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission. Sections are offered in violin, viola, cello, bass.

**25AB. Woodwinds—Elementary Class Instruction** (1-1) I, II

Open to all students but primarily for those whose major instrument is not one of the woodwind instruments and who are preparing for a teaching credential in music. Formerly Music 3A.

**26ABCD. Woodwinds—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission. Sections are offered in flute, oboe, clarinet, and bassoon.

**30AB. Brass—Elementary Class Instruction** (1-1) I, II

Open to all students but primarily for those whose major instrument is not one of the brass instruments and who are preparing for a teaching credential in music. Formerly Music 6A.

**31ABCD. Brass—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission. Sections are offered in horn, trumpet, trombone, tuba, and baritone.

**35. Percussion—Elementary Class Instruction** (1) I, II

Open to all students but primarily for those who are preparing for a teaching credential in music. Formerly Music 5AB.

**50ABCD. Intermediate Individual Study** (1-1-1-1) I, II

For the teaching credential performance requirement or for the requirements of the major emphasis curricula leading to the A.B. degree with a major in music. See explanation below for conditions under which credit may be given for music study under private instructors.

Piano
Organ
Voice
Flute
Oboe
Clarinet
Saxophone
Bassoon
French Horn
Trumpet
Trombone
Baritone Horn
Tuba
Percussion
Violin
Viola
Cello
Contrabass

**51A-51B. Survey of Music** (2-2) Year, 1

Elements and structure of music, instrumental and vocal timbre. Folk music of various countries and music of representative composers. Lectures, study of scores and recordings. Outside concert attendance required. Designed for music majors and minors only.

**53. Opera Technique** (2) I, II

Training in the interpretation and characterization of light and grand opera. Specific work in coordination of operatic ensemble. Formerly Music 31.

**58A. Intermediate Harmony and Two-part Counterpoint** (3) II

Continuation of Music 8B including simple harmonic alteration. Strict species counterpoint in two parts. Prerequisite: Music 8B.

**58B. Advanced Harmony and Three-part Counterpoint** (3)

Chromatic alteration with emphasis on analysis of 19th century chromatic usage and construction of examples in corresponding idioms. Strict species counterpoint in three parts. Prerequisite: Music 58A.

## ACTIVITY COURSES

The activity courses are designed to afford opportunity for observation of rehearsal techniques and laboratory experience in the study and performance of a wide range of representative literature of various periods.

*** 70A-70B. Chamber Music** (1-1) I, II

Sections for string, woodwind, brass, piano, and mixed ensemble groups. Permission of the instructor required. Formerly Music 30AB.

**70C-70D. Chamber Music** (1-1) I, II

Continuation of Music 70A-70B.

**72A. Beginning Instrumental Ensemble** (½) I, II

Open to all instrumental students. Group performance of simple orchestral and band scores. Prerequisite: Music 20A, 25A, 30A, or equivalents, one or more. Formerly Music 24A.

**72B. Intermediate Instrumental Ensemble** (½) I, II
Group performance of orchestral and band scores of more advanced grade. Materials covered will prepare the student for minor parts in either the symphony orchestra or the symphony band. Prerequisites: Music 72A or equivalent. Formerly Music 24B.

***75ABCD. Symphony and Marching Band** (2-2-2-2) I, II
Permission of the instructor required. Formerly Music 26ABCD.

***80ABCD. Symphony Orchestra** (1-1-1-1) I, II
Permission of the instructor required. Formerly Music 13ABCD.

***85ABCD. Chorus** (1-1-1-1) I, II
Permission of the instructor required. Formerly Music 15ABCD.

***86ABCD. Treble Clef** (1-1-1-1) I, II
Permission of the instructor required. Formerly Music 10ABCD.

***87ABCD. Men's Glee Club** (1-1-1-1) I, II
Permission of the instructor required. Formerly Music 12ABCD.

***88ABCD. Workshop Chorus** (½-½-½-½) I, II
Open to students who do not have music as a major or minor field and who are interested in singing standard choral works. No entrance examination required. Designed for nonmusic majors and minors. Formerly Music 20ABCD.

## Upper Division Courses

(For description of courses in the field of music appreciation, see Aesthetics)

**101A-101B. History of Music** (3-3) Year, 1
Detailed study of chronological development of musical art and forms from the age of Bach to the present. Analytical score study and assigned recordings. Familiarity with musicological resources through individual assignments. Prerequisite: Music 51A-51B. Music majors and minors only.

**106A. Counterpoint** (2) I
Study of the five species of counterpoint with much practice in writing in such forms. Application of contrapuntal style to modern composition. Prerequisite: Music 4B. To be discontinued after 1952-53.

**106B. Counterpoint** (2) II
Species counterpoint in four parts. Analysis of contrapuntal usage in musical composition. Continuation of Music 106A. Prerequisite: Music 106A. To be discontinued after 1952-53.

**108A. Twentieth Century Harmonic Practice and Four-part Counterpoint** (3) I
Study of harmonic usages and trends since Debussy. Strict species counterpoint in four parts. Prerequisite: Music 58B.

**108B. Strict Composition** (3) II
Problems of composition in the shorter forms. Prerequisite: Music 108A.

**109A-109B. Instrumentation and Arranging** (2-2) Year, 1
Arranging of music for full orchestra. Selected works of students to be performed by standard orchestras. Prerequisites: Music 58B or 4B; 109A for 109B. Formerly Music 121A-121B.

**111ABCD. Piano—Intermediate Class Instruction** (1-1-1-1) I, II
Materials and techniques of intermediate level are studies in detail. Satisfactory audition before the instructor is required for admission.

**112ABCD. Piano—Advanced Class Instruction** (1-1-1-1) I, II
Materials and techniques of the advanced level are studied in detail. Satisfactory audition before the instructor required for admission.

**116ABCD. Voice—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission.

**117ABCD. Voice—Advanced Voice Instruction** (1-1-1-1) I, II

Materials and techniques of advanced level are studied in detail. Satisfactory audition before the instructor is required for admission.

**121ABCD. Strings—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission. Sections are offered in violin, viola, cello, and bass.

**122ABCD. Strings—Advanced Class Instruction** (1-1-1-1) I, II

Repertoire includes study of standard orchestral parts, solos, sonatas, suites and concerti. Satisfactory auditions before the instructor are required for admission. Sections are offered in violin, viola, cello, and bass.

**126ABCD. Woodwinds—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission. Sections are offered in flute, oboe, clarinet, and bassoon.

**127ABCD. Woodwinds—Advanced Class Instruction** (1-1-1-1) I, II

Repertoire includes study of standard orchestral parts, solos, sonatas, suites and concerti. Satisfactory auditions before the instructor are required for admission. Sections are offered in flute, oboe, clarinet, and bassoon.

**131ABCD. Brass—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission. Sections are offered in horn, trumpet, trombone, tuba, and baritone.

**132ABCD. Brass—Advanced Class Instruction** (1-1-1-1) I, II

Repertoire includes study of standard orchestral parts, solos, sonatas, suites and concerti. Satisfactory auditions before the instructor are required for admission. Sections are offered in horn, trumpet, trombone, tuba, and baritone.

**141. Methods in Teaching Piano** (3) Summer

Teaching of beginning and intermediate piano. Survey of materials available for child and adult classes. Special consideration of the problems of the adult beginner. Supervised teaching of beginning students in individual lessons and class groups. Formerly Music 128.

**142. Survey of Harmony and Musical Form** (2) (Irregular)

A review of diatonic and chromatic harmony, modulation and musical form. The material covered will serve as refresher study for the Colleague Examination under the California Plan of the Music Teachers Association of California. Not open to music majors or minors. Formerly Music 101.

**146A. Fundamentals of Conducting** (1) I

Elements of baton technique and development of basic skills common to choral and instrumental conducting.

**146B. Instrumental Conducting** (1) II

Study of orchestra and band scores of graduated levels of advancement. The class will prepare and conduct instrumental works in public performances. Prerequisite: Mus. 146. (Formerly Ed. 145B.)

**146C. Choral Conducting** (1) I

Representative literature and techniques for choral organizations will be studied and performed. Practical experience in typical conducting situations will be emphasized in various grade levels. Prerequisite: Mus. 146A. (Formerly Music 120A.)

**150ABCD. Advanced Individual Study** (1-1-1-1) I, II
For the teaching credential performance requirement or for the requirements of the major emphasis curricula leading to the A.B. degree with a major in music. See explanation below for conditions under which credit may be given for music study under private instructors.

Piano
Organ
Voice
Flute
Oboe
Clarinet
Saxophone
Bassoon
French horn
Trumpet
Trombone
Baritone horn
Tuba
Percussion
Violin
Viola
Cello
Contrabass

**153. Opera Technique** (2) I, II
Training in interpretation and characterization of light and grand opera. Specific work in coordination of opera ensemble. Formerly Music 131.

**166. Honors Course** I, II (Credit to be arranged)
To be arranged after consultation with the chairman of the department. Refer to the Honors Program.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of department chairman.

## ACTIVITY COURSES

The activity courses are designed to afford opportunity for observation of rehearsal techniques and laboratory experience in the study and performance of a wide range of representative literature of various periods.

*** 170A-170B. Chamber Music** (1-1) I, II
Sections for string, woodwind, brass and piano ensemble groups. Permission of the instructor required. Formerly Music 130ABCD.

**170C-170D. Chamber Music** (1-1) I, II
Continuation of Music 170A-170B.

**172. Beginning Instrumental Ensemble** (½) I, II
Open to all instrumental students. Group performance of simple orchestral parts and band scores. Prerequisites: Music 20A, 25A, 30A, or equivalents, one or more. Formerly Music 124A.

**172B. Intermediate Instrumental Ensemble** (½) I, II
Group performance of orchestral and band scores of more advanced grade. Materials covered will prepare the student for minor parts in either the symphony orchestra or the symphony band. Prerequisites: Music 72A or equivalent. Formerly Music 124B.

*** 175ABCD. Symphony and Marching Band** (2-2-2-2) I, II
Permission of the instructor required. Formerly Music 126ABCD.

*** 180ABCD. Symphony Orchestra** (1-1-1-1) I, II
Permission of the instructor required. Formerly Music 113ABCD.

*** 185ABCD. Chorus** (1-1-1-1) I, II
Permission of the instructor required. Formerly Music 115ABCD.

*** 186ABCD. Treble Clef** (1-1-1-1) I, II
Permission of the instructor required.

*** 187ABCD. Men's Glee Club** (1-1-1-1)
Permission of the instructor required. Formerly Music 112ABCD.

*** 188ABCD. Workshop Chorus** (½-½-½-½) I, II
Open to students who do not have music as a major or minor field and who are interested in singing standard choral works. No entrance examination required. Closed to music majors and minors. Formerly Music 120ABCD.

### Graduate Courses

**200A-200B. Special Problems in Music** (2-2) Year, I, II
A graduate course in which students may carry out projects in various fields of music under the direction of faculty members who are specialists in the field chosen. Students registering for this course must apply for work within a certain field after conference with the music faculty.

**203. Musicology** (2) I, II
Survey of bibliography and methods of research in music history and literature. Emphasis upon interrelationship of musical developments and trends in other arts. Completion of an acceptable thesis in fields of investigation chosen by the student. Prerequisites: Music 101A-101B and permission of the instructor. Advanced courses in Harmony, Composition, and Form and Analysis are desirable.

**206. Composition** (2) I, II
Music composition in the larger forms. Students will be required to submit a complete work in one of the larger musical forms as thesis in the course. Prerequisites: Music 105A-105B, 106A, 107A, 121A and permission of the instructor.

**290. Bibliography** (1) I, II
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis or Project** (3) I, II
Guidance in the preparation of a project or thesis for the master's degree.

### CONDITIONS UNDER WHICH CREDIT MAY BE GIVEN FOR MUSIC STUDY UNDER PRIVATE INSTRUCTORS

Credit may be allowed for private instruction in music under the following conditions:

1. The applicant for such credit must be a regularly enrolled student in the music department of the college.
2. The instructor giving such private work must be approved by the music department. All private work and the names of all such teachers must be registered in the office of the music department chairman at the beginning of the semester.
3. In the case of first semester private study, a placement examination conducted by the music department faculty at the beginning of the semester will show the status of the student at the beginning of his work.
4. Evidence that the standards of the music department have been met will be shown by an examination conducted by the music department faculty at the end of the semester.
5. Ten clock-hours of lessons, and 100 hours of practice per semester are required for one unit of credit.

## PHILOSOPHY

### IN THE DIVISION OF SOCIAL SCIENCES

*Major* work is not offered in philosophy.

### Minor

A *minor in arts and sciences* is offered in philosophy. The minor consists of 15 to 22 units in philosophy, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in philosophy.

### Lower Division Courses

***1A. Introduction to Philosophy** (3) I, II
The place of philosophy in intelligent living. The methods, values, and areas of philosophical inquiry. Through discussion procedures, each student is encouraged to think independently on issues in ethics and religion.

***1B. Introduction to Philosophy** (3) I, II
The nature of philosophical inquiry as applied to problems of knowledge and reality. Through discussion procedures, the student has opportunity and is encouraged to formulate his own tentative conclusions.

***3A-3B. History of Philosophy** (3-3) Year, I
The development of the major concepts of philosophers in the western tradition. Relations of philosophy to science, art, religion, and social and political conditions. 3A covers the ancient and medieval period, 3B the modern. 3A is not prerequisite for 3B.

**20. Logic** (3) I
The use of logic in science and practical life. Analysis of fallacies. Logic and language. Formation and validation of hypotheses. Interpretations of probability. The logic of experimentation.

### Upper Division Courses

***101. Contemporary Philosophy** (3) II
The major philosophical issues, movements, and figures in American and European philosophy of the twentieth century. Prerequisite: 3 units selected from Philosophy 1A, 1B, 3A, or 3B.

**111A-111B. Theory of the State** (3-3) Year, I
The nature of the state, its organization and activities, and its relation to the individual and to other states. Special attention is given to recent developments in the field of political thought. Not open to students with credit for Political Science 111A-111B.

**121. Deductive Logic** (3) II (Offered in 1952-53 and alternate years)
Definition, classification, and division. The forms of reasoning. Analysis of propositions. Immediate inference. The syllogism. Dilemmas. Modern symbolic logic.

***129. Social Ethics** (3) I
Ethical issues of contemporary life. Individualism vs. collectivism; democracy vs. dictatorship; ethical problems arising in law, medicine, business, government, and interpersonal relationships.

**130. Theory of Ethics** (3) II
A study of significant and typical value theories and systems and of the concrete problems such theories seek to explain. The emphasis will be placed on moral values. The student will be encouraged to examine critically his own system of values.

**136. Philosophy of Art** (3) II
The nature of esthetic experience. The principal theories of art, both traditional and contemporary, are studied at length, both in relation to actual artistic production and to the role of art in society.

**137. Philosophy of Science** (3) I (Offered in 1952-53 and alternate years)
A critical examination of the basic concepts and methods underlying contemporary scientific thought. Contributions of the special sciences to a view of the universe as a whole. Prerequisite: 3 lower division units in philosophy.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

# PHYSICAL EDUCATION

## IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

### Major

A *major in arts and sciences* is offered in *physical education* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. A minor in a field other than physical education is required.

*Major for Men:* Lower division requirements: Two units of physical education activity courses in general education; Physical Education 53, 63, 64, 72; Zoology 8. Upper division requirements: 26 upper division units to include seven units from physical education courses numbered 141 to 148, inclusive; Physical Education 155, 168, 170A or 170B, 177; and eight units selected from courses in health, physical education, or recreation.

*Major for Women:* Lower division requirements: Four units of physical education activity courses to include Physical Education 1A, 2A-2B, 3A-3B, 4, 5, and 6 (two of these units may be counted as general education); Physical Education 53, 72, and Zoology 8. Upper division requirements: 26 upper division units to include Physical Education 155, 156A-156B, 160, 161, 168, 170A or 170B; and nine units selected from courses in health, physical education, or recreation.

A *teaching major* is offered in *physical education* for the general secondary and special secondary school credentials. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *physical education*. The minor consists of 15 to 22 units in physical education, nine units of which must be in courses carrying upper division credit. The minor should be planned in consultation with the department chairman.

A *teaching minor* is offered in *physical education* for the general secondary, and the special secondary credentials. It may be offered only as a second teaching minor for the general elementary and the kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Required Activities

All lower division students must elect one or more activity course each semester. Two units of activity credit must be offered for graduation, but no more than one activity course in any one semester may be counted toward this requirement. Students carrying fewer than 12 units during any semester may obtain permission from the Dean of Instruction to postpone taking physical education, but may not be exempted therefrom. No permanent excuses from required activity courses will be granted. The college physician, in conjunction with the chairman of the department, will consider stringent cases on an individual basis and make recommendations.

A medical examination is given each student when entering college and recommendation is made as to type of activity most beneficial. Individually adapted physical education classes to care for special needs are offered. The content of the required courses is planned to give each student an opportunity to participate in many activities of carry-over value, developmental nature, and recreational interest. An opportunity is afforded for students to participate in competitive sports and intramural programs.

## MEN'S DEPARTMENT

Freshmen are required to choose from courses numbered 1-10. Sophomores and upper division students may choose from all courses offered. An activity course may be taken for credit once only.

### Lower Division Courses

### ACTIVITY COURSES

All activity courses are general education courses.

**1A-1B-1C-1D. Individual Adaptation** (½) I, II
**2. Basketball** (½) I, II
**3. Boxing** (½) I, II
**4. Gymnastics** (½) I, II
**5. Soccer** (½) I
**6. Softball** (½) II
**7. Touch Football** (½) I
**8. Track and Field** (½) I, II
**9. Volleyball** (½) I, II
**10. Wrestling** (½) I, II
**13. Archery** (½) I, II
**14. Badminton** (½) I, II
**15. Fencing** (½) I, II
**16. Golf** (½) I, II
**17. Handball** (½) I, II
**18. Tennis** (½) I, II
**19. Bowling** (½) I, II
**20A-20B. Swimming** (½) I, II
**23. Sailing** (½) I, II
**24. Hiking** (½) I, II

### INTERCOLLEGIATE SPORTS

**30. Baseball** (½) II
**31. Basketball** (½) I
**32. Cross Country** (½) I
**33. Football** (½) I
**34. Golf** (½) II
**35. Gymnastics** (½) II
**36. Tennis** (½) II
**37. Track** (½) II
**38. Wrestling** (½) II

## WOMEN'S DEPARTMENT

Freshmen may choose from courses numbered 1-11 or 20A-B. Sophomores may choose from all courses offered. An activity course may be taken for credit once only.

The individual activities, tennis, golf, archery, badminton, swimming, and dancing are offered through the year. Candidates for the special secondary credential in physical education must select one as a major activity and two others as minors. Skills in the activities must be maintained as prerequisite to the senior course, Physical Education 185.

### Lower Division

### ACTIVITY COURSES

All activity courses, with the exception of Physical Education 22, are general education courses.

**1A-1B. Fundamental Skills** (½) I, II
Practice in efficient fundamental body movements.

**2A-2B. Folk Dancing** (Men and Women) (½) I, II
2A is a prerequisite for 2B.

**3A-3B. Modern Dance** (Men and Women) (½) I, II
Basic dance movements, analysis of rhythmic elements in movement and their application to the dance. 3A is a prerequisite for 3B.

**4. Fieldball, Soccer, Speedball** (½) I, II

**5. Softball, Volleyball, Hockey** (½) I, II

**6. Basketball** (½) I, II

**11A-11B. Ballroom Dancing** (Men and Women) (½) I, II
11A is a prerequisite for 11B.

**12A-12B. Advanced Modern Dance** (Men and Women) (1-1) Year, I
Advanced techniques and choreography. Criticism of student sketches, studies, and completed dances. Prerequisite: 3A-3B.

**13A-13B. Archery** (½) Year, I, II

**14A-14B. Badminton** (½) Year, I, II

**16A-16B. Golf** (½) I, II

**18A-18B-18C. Tennis** (Beginning, Intermediate, Advanced) (½-½-½) I, II
18A is a prerequisite for 18B; 18B is a prerequisite for 18C.

**19A-19B. Bowling** (½) I, II

**20A. Swimming** (For non-swimmers only) (½) I, II

**20B. Swimming** (Intermediate) (½) I, II

**21. Life Saving** (1) I, II
Standard American Red Cross course in life saving and water safety, designed to qualify superior swimmers for Senior Life Saving Certificate.

**22. Water Safety Instruction** (1) II
Methods and materials for teaching swimming. Course designed to qualify expert swimmers for American Red Cross Swimming Instructors Certificate. Prerequisite: P.E. 20B, or equivalent, and American Red Cross Senior Life Saving Certificate.

**23. Sailing** (½) I, II

**24. Hiking** (½) I, II

## MEN AND WOMEN

## PROFESSIONAL THEORY COURSES

### Lower Division Courses

**53. Physical Education in the Elementary School** (2½) I, II
The State program in physical education for the elementary school forms the basis of the course. Candidates for the Elementary Credential are required to take the course section which includes two lectures and two laboratory periods per week. Candidates for the Special Secondary Credential in physical education may take the course section which includes two lectures without laboratory periods.

**63. Professional Activities (Men)** (2) I
The acquisition of skills and teaching techniques, and the development of knowledge and interest in the combative activities, primarily wrestling and boxing.

**64. Professional Activities (Men)** (2) II
Practice in the skills and techniques of the dance, and experience in the organization and presentation of dance materials.

**72. Introduction to Physical Education** (2) I, II
History and principles of physical education and sports. Study of the objectives of modern physical education with a view toward the development of a basic philosophy and background for professional education.

### Upper Division Courses

**141. Professional Activities: Gymnastics** (Men) (2) I
The skills and teaching techniques in gymnastics. The place of tumbling, apparatus, self-testing and calisthenics in the school program. Knowledge of the rules for competition in gymnastics.

**142. Professional Activities: Swimming** (Men) (1) II
The development of skills in swimming with emphasis on the teaching techniques. Scope of course is from beginning swimming to life saving techniques.

**145. Professional Activities: Team Sports** (Men) (2) I
The skills, rules, teaching techniques, officiating, and organization of materials in such sports as soccer, touch football, softball, hockey, basketball, and other sports.

**146. Professional Activities: Individual Sports** (Men) (2) II
The skills, rules, teaching techniques, officiating, and organization of materials in such sports as handball, tennis, badminton, archery, golf, and other sports.

**147. Professional Activities: Coaching Baseball and Track** (Men) (1-2) II

Organization of practice sessions and drills for developing fundamental skills and special abilities; study of rules and officiating techniques; consideration of scheduling problems, coaching techniques and game strategy.

**148. Professional Activities: Coaching Football and Basketball** (Men) (1-2) I

Organization of practice sessions and drills for developing fundamental skills and special abilities; study of rules and officiating techniques; consideration of scheduling problems, coaching techniques and game strategy.

**151. Instructor's Course in First Aid (2)** I, II

Instructor's course in first aid, as outlined by The American Red Cross. Standard first aid techniques, care of injured, certification and record keeping, and practical work in first aid.

**155. Applied Anatomy and Kinesiology (3)** I

Anatomical and kinesiological analysis of human structure and movement. Application of analysis relative to mechanical principles as influenced by efficiency factors of body functions. Prerequisite: Zoology 8.

**156A-156B. Sports Methods** (Women) **(2-2)** Year, I

Analysis of skills in basketball, hockey, soccer, speedball, volleyball, and softball; methods of presenting sports to large groups; study of rules and officiating. Prerequisites: Physical Education 4, 5, and 6.

**160. Teaching of Body Mechanics** (Women) **(3)** I

Efficient use of the body in daily living; evaluation and classification of exercises, study of methods, and practice in planning and presenting material.

**161. Folk Dancing Materials and Advanced Techniques** (Women) **(2)** I

Folk customs, festivals, and costumes. Selection of dance materials for various age groups. Practice in advanced techniques. Prerequisite: Physical Education 2A.

**162. History and Philosophy of the Dance (2)** I

A study of the historical background of the dance, with special emphasis upon its development, in America and its present status in education and the creative arts. Not open to students with credit for Aesthetics 162.

**164A-164B. Methods in Modern Dance (2-2)** Year, I

Methods in the teaching of modern dance. Selection of materials and course planning for the secondary school. Prerequisite: Physical Education 12A-12B or satisfactory examination in dance skills.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**168. Physiology of Exercise (3)** II

A non-laboratory course emphasizing the relation of physiology to muscular exercise in physical activities. Prerequisites: Physiology 1A and Zoology 8 or equivalent.

**170A-170B. Recreational Leadership (2-2)** Year, I

Principles and practices in recreational leadership. Methods of instruction and special techniques in the activities of the recreation program. Attention to crafts, music, social programs, drama, special projects, dance, sports, campcraft, and outdoor education. Not open to students with credit for Recreation 170A-170B.

**177. Individual Program Adaptation (3)** II

The adaptation of programs for the typical individual, including physical examinations, training and prescribed exercises, follow-up, instructional problems, and evaluation.

**185. Techniques of Individual Sports** (Women) **(1)** I

Review of individual playing techniques, knowledge, rules, and teaching methods in tennis, archery, badminton, and swimming. Designed for senior majors in physical education, who are expected to demonstrate a high degree of competency in the sports indicated.

**190. Administration of Physical Education in the Secondary School** (3) I, II
Problems and practices in the organization and administration of the secondary school activity program. Study, selection and adaptation of activities, examination, and grouping of pupils, use and evaluation of tests. Selection and maintenance of equipment and facilities.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of department chairman.

### Graduate Courses

**200. Evaluation Procedures in Health, Physical Education and Recreation** (2)
A study of tests and measurements in the profession, with practice in their construction and use, and interpretation of results.

**201. Developmental Physical Education** (2) (Alternate years)
Intensive study of postural divergencies, lack of physical development, and methods of correcting such conditions through exercise. Practice in making physical examinations, constructing individual exercise programs, and teaching remedial exercises. Consideration of ethical procedures and limitations. Prerequisite: Physical Education 155.

**203. Problems in Physical Education** (2) (Alternate years)
A survey of current problems facing the Pheysical Education profession, through a review of literature, discussion of trends, and observation of school situations. Analysis and evaluation of actual problems. Written reports required.

**204. Problems in Recreation** (2)
A survey of current problems facing the recreation profession, through a review of literature, discussion of trends, and observation of school situations. Analysis and evaluation of actual problems. Written reports required. Not open to students with credit for Recreation 204.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

## PHYSICAL SCIENCE

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *physical science major in arts and sciences* is offered for the A.B. degree to students who have been admitted to the teacher education program if eight units in professional education courses are completed by the date of degree candidacy. The major is in addition to 45 units in general education, except that nine units of chemistry, physics, and mathematics may be applied toward general education requirements. Lower division requirements: Chemistry 1A-1B, Physics 4A-4B-4C (or 2A-2B-3A-3B), Mathematics 3A-3B, 4A (recommended 4B). Upper division requirements: 24 units to include a minimum of seven units in each of chemistry and physics. Chemistry must include Chemistry 101A. Physics must include Physics 107 and 158 (or 148 if physics preparation is 2A-2B). Recommended: Physical Science 110 and 150. Other courses to be selected with approval of the departmental adviser. Physical Science majors are not required to complete a minor; however, candidates for the general secondary credential may wish to complete a teaching minor for the general secondary credential during the undergraduate program.

A *teaching major in physical science and general science* is offered for the general secondary and general junior high school credentials. For a statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *physical science* for the A.B. degree to students who have been admitted to the teacher education program if eight units in professional education courses have been completed by the date of degree candidacy. The minor consists of a minimum of 20 units to include the following courses: Astronomy 1; Biology 3, 4; Chemistry 2A-2B or 1A-1B; Geology 2 or 1A; Physics 2A-2B and 3A-3B or 4A-4B-4C.

A *teaching minor in physical science and general science* is offered for the general secondary, special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Lower Division Courses

*** 1. Introduction to Physical Science (3) I, II**
A general course presenting the nature of man's physical universe with materials chosen from astronomy and physics. Not open to students who have had a college course in physics or astronomy, or Physical Science 41. This course may be followed by Astronomy 9 for laboratory credit.

*** 2. Introduction to Physical Science (3) I, II**
Emphasis will be upon materials chosen from geology and chemistry to show the origins of natural materials and their use. Not open to students who have had a college course in chemistry or geology. This course may be followed by Geology 3 for laboratory credit.

*** 10. Introduction to Photography (3) I, II**
A consideration of photographic optics and chemistry; nature of light and image formation; photographic emulsions, exposure and development. Composition and lighting. Two lectures and one three-hour laboratory per week. Will not satisfy laboratory requirements in physical science but may be counted toward general education under practical arts.

### Upper Division Courses

**110. Photography for Teachers (3)**
Designed for more mature students to learn photographic skills useful in teaching.

**130. Advanced Photography (3) I**
A consideration of advanced negative control, projection printing techniques, composition and editorial content, architectural and illustrative photography, and flood photoflash techniques. Two lectures and three hours of laboratory per week. Prerequisite: Physical Science 10.

*** 150. Readings in the Physical Sciences (2)**
Reading from selected materials with informal class discussion of topics.

## PHYSICS

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in *physics* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Physics 4A-4B-4C, Chemistry 1A-1B, or their equivalents. Recommended: a reading knowledge of French or German. Upper division requirements: 24 upper division units in physics to include Physics 105A-105B, 107, 110, 158; three units chosen from Physics 102, 160, or 170; two units chosen from Physics 120, 122, or 124; and two units of Physics 199. A minor in mathematics is required, consisting of Mathematics 3A-3B, 4A-4B, or their equivalents, and Mathematics 118A-118B. Recommended: Three units chosen from Mathematics 104, 111, 119, 121, or 124. Nine units of chemistry, physics, and mathematics may be applied toward general education requirements.

A *major in arts and sciences* is offered in *physics* for the B.S. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Physics 4A-4B-4C, Chemistry 1A-1B, Mathematics 3A-3B, and 4A-4B, or their equivalents. Upper division requirements: A minimum of 36 upper division units including Physics 102, 105A-105B, 107, 110, 158; two units of upper division laboratory; two units of Physics 199; and Mathematics 118A-118B. The program, planned in consultation with the departmental adviser for this degree, must be designed to provide a four-year terminal program for the student. A minor is not required. Nine units of chemistry, physics, and mathematics may be applied toward general education requirements.

The following additional courses are required as a part of two options approved under this degree: *Applied Physics*: Physics 106, 112 and four units of Physics 120. Recommended: Physics 114, 160, 170 and Astronomy 107. *Electronics*: Physics 104, 122, 124, 160 and either Physics 152 or Engineering 150. Recommended: Physics 114, 170 and Astronomy 107.

A *teaching major in physical science and general science* is offered for the general secondary school credential and a *teaching major in general science* is offered for the general junior high school credential. For statement of requirements, refer to these credentials.

### Minor

A *minor in physics* is offered in arts and sciences. The minor consists of 15 to 22 units in physics, six units of which must be in courses carrying upper division credit.

A *teaching minor in physical science and general science* is offered for the general secondary, special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Lower Division Courses

NOTE: A maximum of 12 units of lower division physics credit may be applied toward the A.B. or B.S. degrees.

***2A-2B. General Physics** (3-3) Year, I

This course is for liberal arts and certain pre-professional students who do not desire intensive physics preparation. Lectures, demonstrations and discussions. 2A, Properties of Matter, Mechanics and Heat. 2B, Electricity, Magnetism, Sound and Light. Prerequisite: Two years of high school mathematics.

***3A-3B. Physical Measurements** (1-1) Year, I

A laboratory course to accompany Physics 2A-2B. 3A: Properties of Matter, Mechanics and Heat. 3B: Electricity, Magnetism, Sound and Light. One three-hour laboratory per week. Prerequisite for 3A: Concurrent or previous registration in Physics 2A. Prerequisite for 3B: Concurrent or previous registration in Physics 2B.

**4A-4B-4C. Principles of Physics**

The following sequence of three courses is designed to give a thorough background in the fundamental principles of physics, with applications to practical problems. Each course three lectures and one three-hour laboratory per week.

**4A. Mechanics** (4) I, II

The mechanics of solids and fluids. Prerequisites: Credit for Mathematics 3A, or concurrent registration with permission of instructor. Not open to first semester freshmen.

**4B. Electricity** (4) I, II

Magnetism, electricity and elementary electronics. Prerequisite: Physics 4A.

**4C. Heat, Sound and Light** (4) I, II

Heat and elementary thermodynamics, sound and light. Prerequisite: Physics 4B.

**14. Acoustics of Music** (3) II

Fundamentals of acoustics and audition underlying musical phenomena presented in descriptive and nonmathematical terms. Prerequisite: A technical understanding of music.

**22. General Radio** (2) I

Theory of vacuum tubes and their applications to communication, television, and industry. This course may be taken for credit in addition to the maximum 12 units of lower division physics toward the A.B. or B.S. degree.

## Upper Division Courses

**102. Basic Electronics (3) I**

Principles of electron tubes and resistance loaded amplifiers. Negative feedback, and its application to regulated power supplies, cathode followers and direct coupled amplifiers. Prerequsite: Physics 4B.

**104. Communications (3) II**

Power amplifiers, oscillators, modulators and detectors. Radio transmitters and receivers for amplitude modulation and frequency modulation. Television systems. Antennas and radio wave propagation. Prerequisite: Physics 102 or permission of the instructor.

**105A-105B. Analytical Mechanics (3-3) Year, I**

Fundamental principles of Newtonian mechanics by elementary vector methods. 105A: Statics and kinematics of rigid bodies. 105B: Dynamical principles underlying linear and rotary motion of rigid bodies, with additional work in vibration and impact. Prerequisite: Physics 2A-2B or 4A and a working knowledge of calculus.

**106. Optics (3) II**

A study of reflection, refraction, dispersion, interference, diffraction, double refraction and polarization, with applications to optical instruments. Also wave propagation, radiation, spectra and the nature of light. Prerequisite: Physics 2B-3B or 4C.

**107. Electrical Measurements (2) I**

The theory and application of electrical measurements, including the measurements of current, voltage, power, resistance, capacitance and inductance. Stress on determination of probable errors of measurements. An hour lecture and a three-hour laboratory per week. Prerequisite: Physics 2B-3B or 4B and a working knowledge of calculus.

**110. Alternating Current Circuits (3) I**

The operator j applied to circuits containing resistance, capacitance and inductance; series and parallel resonance; coupled circuits; transients; practical circuit elements, networks. Prerequisite: Physics 4B and Mathematics 4A.

**112. Heat and Thermodynamics (3) II**

A study of the thermal properties of matter with an introduction into the kinetic theory of gases and the laws of thermodynamics. Prerequisites: Eight units in physics and a working knowledge of calculus.

**114. Acoustics (3) II**

A study of wave motion and its application to the production, transmission and reception of sound. Material in architectural acoustics, speech and hearing, and acoustical instruments is presented. Prerequisites: Physics 2B-3B or 4C.

**120. Advanced Laboratory (2) I, II**

Advanced experimental measurements in a branch of physics listed below. The course may be repeated for each subject. With the consent of the instructor and adviser, the course may be repeated in the same subject but with new material. Prerequisite: Consent of the instructor.

A. Acoustics
B. Atomic Physics
C. Electricity
D. Heat and Pyrometry
E. Mechanics
F. Optics

**122. Electronics Laboratory (2) I**

An experimental study of electron tubes and their associated circuits. Study of cathode ray oscilloscope, vacuum tube voltmeter, characteristics of power supplies, amplifiers and filter systems. An hour lecture and a three-hour laboratory per week. Prerequisite: Previous or concurrent registration in Physics 102, or permission of instructor.

**124. Radio Measurements (2) II**

Laboratory measurements of the parameters of resonant circuits at radio frequencies. Study of the properties of oscillators, modulators, detectors and wave guides. An hour lecture and a three-hour laboratory per week. Prerequisite: Physics 122 and previous or concurrent registration in Physics 104.

* **148. Introduction to Modern Physics** (3) II

A nonmathematical course covering recent developments in the field of physics, including X-rays, radio-activity, cosmic rays, atomic and nuclear energy. Prerequisite: Upper division standing. Not open to students who have credit for Physics 4A-4B-4C, or equivalent.

**152. Advanced Electronics** (2) I

Theory of vacuum tubes, ultra-high frequency systems and selected topics from contemporary electronics. Prerequisite: Physics 104.

**158. Atomic Particles** (3) I

A study of experimental evidence for the existence and properties of the elemental atomic and nuclear particles. Introduction to the fields of atomic and nuclear physics. Prerequisite: Physics 4A-4B-4C, or equivalent.

**160. Circuit Analysis** (3) II

A study of filter design, transmission lines, and network analysis. Prerequisite: Physics 110.

**166. Honors Course** (Credit to be arranged) I, II

An individual study arrangement for students admitted to the Honors Program. Enrollment through the department chairman, subject to the approval by the Committee on Honors. Refer to the Honors Program.

**170. Electromagnetic Theory** (3) II

Electrostatics and magnetostatics treated by vector methods; chemical and thermal effects; motion of ions in electric and magnetic fields; magnetic field of a current; electromagnetic induction and radiation. Prerequisites: Physics 110, and a working knowledge of vector analysis and differential equations.

**199. Special Study** (1-2) I, II

Individual study or laboratory work on a special problem in physics selected by the student. Each student will be assigned a member of the staff who will supervise his work. Credit, hours and topics to be arranged in each case. Six units maximum credit.

### Graduate Courses

**200. Seminar** (2-2) I, II

An intensive study of some phase of advanced physics.

A. Mathematical Physics
B. Theoretical Mechanics
C. Kinetic Theory of Gases
D. Advanced Acoustics
E. Advanced Electronics
F. Electromagnetic Radiation
G. Atomic Physics
H. History of Physics
I. Fluid Mechanics
J. Vibration
K. Advanced Electricity

**290. Bibliography** (1)

Exercise in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis in physics for the master's degree.

## PHYSIOLOGY

### IN THE DIVISION OF LIFE SCIENCES

Major or minor work is not offered in physiology. Courses in this field may be used as part of the major in zoology or life sciences, and are recommended as part of the lower division requirements for the major in psychology, and for the physical education credential.

### Lower Division Courses

**1A. Human Physiology (3) II**

A lecture course considering the functions of the human body, and including a brief review of the microscopic and gross anatomy of the structures discussed. Prerequisites: Elementary chemistry and high school or college biology or zoology. Three hours of lecture per week. Credit reduced to 2 units, for students having credit for Zoology 20.

**1C. Human Physiology (2) II**

A study of the human functions through laboratory experiments and demonstrations. Six hours of laboratory per week. Prerequisites: Physiology 1A completed or in progress, or Biology 3 and 4, or Zoology 1A-1B.

### Upper Division Courses

**101. General Physiology (4) II**

Fundamentals of plant and animal functions. Two lectures and two laboratory periods per week. Prerequisites: Biology 3 and 4 or Zoology 1A-1B and Chemistry 1A-1B or Chemistry 2A-2B. Not open to students with credit for Zoology 101.

## POLITICAL SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *political science* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Political Science 1A-1B or 71A-71B. Upper division requirements: 24 units to include (a) three units in Political Science 199 and (b) 21 upper division units in political science distributed among two of the following groups: *Group I: Theory and government*, courses numbered 100-139; *Group II: Administration*, courses numbered 140-149; *Group III: International affairs*, courses numbered 150-179. A minor is required and is to be chosen under the direction of the chairman of the department.

Students majoring in political science are advised to become as familiar as possible with related social science fields. It is recommended that majors should have a reading knowledge of at least one foreign language. For students who expect to enter government service, two programs of study are offered: The Public Administration Curriculum and the Public Personnel Management Curriculum. For a description of these curricula, refer to the section of the bulletin entitled: Professional and Vocational Curricula.

A *teaching major* is not offered in political science; however, courses in political science may be used as part of the *teaching major in social science* for the general secondary and general junior high school credentials. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences in political science* is offered. The minor consists of 15 to 22 units in political science, nine units of which must be in courses carrying upper division credit.

A *minor in arts and sciences in public administration* is also offered. The minor consists of Political Science 71A-71B in the lower division; Political Science 140A-140B and three units from 198 or other political science course in the upper division.

A *teaching minor in social science* is offered for the special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Lower Division Courses

*** 1A. Introduction to Government (3) I, II**

Theories and principles of government, with special attention to the problems created by modern industrialism and population pressures.

*** 1B. Introduction to Government (3) I, II**

A comparative survey of selected foreign governments: Their constitutional principles, political institutions, and governmental problems.

*** 71A-71B. Introduction to American Government and Politics** (3-3) Year, I, II

Semester I: Governmental organization in the United States; the federal system; the organization, powers and functions of the legislative, executive and judicial branches of the government; the relations between federal, state and local units of government.

Semester II: Expansion of governmental functions and the development of means of democratic control; an examination of the increased use of government as an instrument of social control; the history, motivation, methods and control of political parties; nominations, elections and minority groups; pressure politics.

This year course meets the graduation requirement in American history, institutions and ideals, the United States Constitution, and California State and Local Government.

## Upper Division Courses

*** 101. American Institutions** (3) I

The principles of the Constitution of the United States of America, and a survey of the political and social institutions which have developed under the Constitution.

This course meets the graduation requirement in the United States Constitution and state and local government.

*** 105. American Political Thought** (3) II

A survey of the development of American ideas concerning political authority from the period of colonial foundation to the present time.

*** 111A-111B. Theory of the State** (3-3) Year, I

The nature of the state, its organization and activities, and its relation to the individual and to other states. Special attention is given to recent developments in the field of political thought. Not open to students with credit in Philosophy 111A-111B.

**120. Political Parties** (3) I

A critical analysis of the political party as a part of the process of government; party organization and activities; nominating and campaign methods; theories and functions of the party system; party responsibility. Special emphasis will be placed upon the function of the two-party system in American government.

**121. Basic Factors in American Politics** (3) I

An analysis of American political, legal, economic, and social factors in their relation to our political system and the public interest.

**122. Propaganda and Public Opinion** (3) II

A study of the forces which mold the American public mind, the practice of propaganda, a description and analysis of public relations, pressure groups and their effect in American public life. Not open to students with credit for Journalism 132.

**128. Government Report Writing** (2) I

Actual writing problems in government, including surveys, recommendations, studies, analyses, progress reports, annual reports, etc., are discussed and their solutions analyzed. Attention to methods of collecting and organizing data, and practice in effective presentation of facts and ideas. Special consideration is given to problems of class members.

**135. California Law of Municipal Corporations** (2) II

California law governing the nature, regulation and control of the counties, charter cities, sixth class cities, school districts and special districts. The creation, alteration, dissolution, legal actions by and against, powers and duties; rights and liabilities of local governments.

**136. Administrative Law** (2) I

The law of public office and public officers, powers of administrative authorities, scope and limits of administrative powers, remedies against administrative action.

*** 137A-137B. Constitutional Government** (2-2) Year, I
Modern government and politics; its theoretical foundations, institutions and problems. Emphasis will be on American experience with useful comparisons with other countries. Either semester may be taken first. This year course meets the graduation requirement in the United States Constitution and California State and Local Government.

*** 139A-139B. American Constitutional Development** (3-3) Year, I
A study of the work of the Convention of 1787 and of significant phases of American constitutional law. Not open to students with credit for History 172A-172B. This year course meets the graduation requirement in American history, institutions and ideals, United States Constitution, and California State and Local Government.

**140A-140B. Principles of Public Administration** (3-3) Year, I
Semester I: The administration of public services, staff and line functions, theories of organization and practices, and procedures of different types of governmental agencies.

Semester II: Principles and problems in governmental budgeting, performance and capital outlay, budget procedures, organization and administration of personnel programs, controls over administrative behavior, responsible bureaucracy and professionalism in the public services. Not open to students with credit in Political Science 147A-147B.

**142. State Government** (3) II
A study of the political structure and its operation used in the carrying on of the functions exercised by the states; state-federal relations; state-local government relations; particular emphasis on California government. This course meets the graduation requirement in California State and local government. Not open to students with credit for Journalism 142.

**143. Municipal and County Government** (3) I
A study of the organization and its operation used to carry into effect the functions assigned to local governmental units; particular emphasis upon local government in California. This course meets the graduation requirement in California State and local government. Not open to students with credit for Journalism 143.

**144. Introduction to Public Personnel Administration** (2) I
An introduction to the field, giving general coverage of the problems involved in recruitment, placement, supervision, etc., of public employees. Prerequisite: Permission of instructor.

**145. Public Personnel Management** (2) II
An advanced course involving detailed examination of management of personnel in public service. Prerequisite: Permission of instructor.

**146. Wage and Salary Administration** (3) I
Problems of job analysis; major techniques of job evaluation, including ranking, classification, point system, factor comparison; problems of wage and salary administration, incentive pay methods; merit rating plans. Not open to students with credit for Commerce 154.

**147A-147B. Public Administration** (2-2) Year, I
Administrative organization. Relationship between federal, state, and local governments. Budget, personnel, management, and control. Not open to students with credit for Political Science 140A-140B.

**148. The Government of Metropolitan Areas** (2) I
A study of the governmental problems of metropolitanism; overlapping of governments, services, planning and financing. The use of intergovernmental contracts for public service, proper public service areas, and special authorities.

*** 150A-150B. International Relations** (3-3) Year, I
A historical and analytical consideration of the basic factors—historic, geographic, economic, ideologic, and strategic—which underly and condition the modern conflict between the "sovereign state" and the "community of nations." Fall semester: Origins and development through the nineteenth century. Spring semester: Twentieth century experimentation and conflict.

**151SP. The Contemporary World** (1) II

A series of lectures by members of the faculty on selected problems of the current international scene. Reports required of students enrolled for credit.

**152. International Organization** (3) I

A critical analysis of the organization by which the international community seeks to provide for the exercise of legislative, administrative and judicial functions on the international level: Diplomatic and consular corps; conferences; administration through commissions and unions; amicable procedures for settlement of disputes; The League of Nations-United Nations experiment.

**153. Principles of International Law** (3) I

The function of law in the international community. The historical development of the ideas and rules of international law and their place in the modern diplomatic and legal structure.

**154. International Law and the Courts** (3) II

A case study of the application of the rules of international law in national and international courts.

**155. Dynamics of Modern International Crises** (3) I

The determination and analysis of facts surrounding international crises since World War II; the evaluation of these crises and their effects upon external policies of the United States and the operations of the United Nations. Prerequisite: Consent of the instructor.

**158A-158B. American Foreign Policy** (3-3) Year, I

Lectures and reading in the field of American foreign relations since 1776, with special emphasis, in the second semester, upon affairs since 1900. A general survey course. Not open to students with credit for History 176A-176B.

**160. Government of the British Dominions** (3) II

Development of the new British Empire and imperial relations of the self-governing dominions; government of Canada, Australia, New Zealand, and South Africa; conditioning historical, economic and racial factors. Not open to students with credit for History 156B.

**162. Government of England** (3) I

The structure and functioning of English parliamentary system with emphasis upon present day political principles and parties.

**165. Governments of Latin America** (3) II

The governments of leading and representative Latin American states. Emphasis on the background and evolution of current political institutions and philosophies.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**167. Government of the Soviet Union** (3) I

Theory and practice of government in the Soviet Union, with some attention to Russian foreign affairs.

**198. Internship in Public Administration** (3-6) I, II

Students will be assigned to various government agencies and will work under joint supervision of agency heads and the course instructor. Participation in staff and internship conferences. Admission by permission of the instructor.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## Graduate Courses

**200A-200B. Seminar in Government** (2-2) Year, I, II

**290. Bibliography (1)**
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study (1-6) I, II**
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis (3)**
Guidance in the preparation of a project or thesis for the master's degree.

## PSYCHOLOGY

### IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *psychology* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Two plans are provided for the major: One for those students expecting to pursue the study of psychology beyond the A.B. degree; the other for those students who wish to extend their general education in the field of psychology.

Lower division requirements for all majors: Psychology 5 and 6. Recommended selection of courses in related fields: Six units in biology, physiology, and/or zoology; three units in philosophy; and six units in anthropology and/or sociology.

The upper division requirements for each major will be determined by the plan selected by the student, but a minimum of 24 upper division units in psychology is required for a major.

Psychology majors are not required to complete a minor.

A *teaching major:* A major in psychology may be combined with two teaching minors for a general secondary credential. Refer to the outline of requirements for this credential.

### Minor

A *minor in arts and sciences* is offered in psychology. The minor consists of 15 to 22 units in psychology, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in psychology.

### Plan A Major

Plan A is for a nonprofessional major in psychology and is designed to provide the student with a greater understanding of his expanding group relations leading to happy and effective family and community living. The recommended pattern of courses for this program is not designed to facilitate graduate and professional study in psychology.

The upper division requirements for Plan A majors: Psychology 106, 131, 145, and electives to complete the major. It is expected that each student under Plan A will select, with the assistance of his adviser, a pattern of courses in line with his particular objectives in pursuing Plan A. For most students in Plan A, the following courses will be found particularly helpful: Psychology 105A, 107, 122, 132, 150, and 152.

To facilitate the purpose of Plan A the following courses in other departments are recommended as electives: Anthropology 1A-1B; Biology 1 or Zoology 1A-1B; Economics 1A-1B and 102; Health Education 90; Philosophy 1A-1B; Zoology 114 and 165; and courses in home economics.

### Plan B Major

The purpose of Plan B is to facilitate the specific preparation of those students who wish to pursue graduate and professional preparation in Clinical, Industrial and Personnel, and Theoretical-Experimental Psychology. To this end, three separate programs are suggested under Plan B to provide an undergraduate basic preparation for further study in these fields.

Upper division requirements for all Plan B majors: Psychology 104A, 105A, 160A or 160B, and additional courses to complete the major selected from one of the groups listed below. For each of the three patterns of special preparations under Plan B, the following courses are recommended:

*Preclinical:* Psychology 105B, 106, 131, 145, 150, 151, 152, 160A. The following courses are recommended in other departments: Anthropology 1A-1B; Biology 3 and 4, or Physiology 1A and 1C; Philosophy 1A-1B or 3A-3B, 20, and 129; Sociology 135 and 170; Speech Arts 176 or 179A-179B; and Zoology 165. A natural science minor is recommended.

In selecting courses and choosing electives, the student is urged to consult his adviser and the Bulletin on the requirements for special secondary credentials for school psychometrist and for correction of speech defects.

*Pre-Industrial and Personnel:* Psychology 121, 122, 124, 131, 132, 145, 152, 160B. The following courses are recommended in other departments: Business 153 and 154; Economics 1A-1B, 100A, 150, 151, 170 and 185; Philosophy 20; Political Science 144, and 145; Sociology 50, 51; and six units selected from Sociology 135, 170, 180, 190; and Speech Arts 4; a minor in business, economics, political science, or sociology is recommended.

*Theoretical-Experimental:* Psychology 104B, 131, 140, 145, 150, 160A, 160B, and 177. The following courses are recommended in other departments: Chemistry 2A-2B; Foreign Language; Mathematics 1, 3A, and 3B; Philosophy 1A, and 20; Physics 2A-2B, and 3A-3B; Physiology 1A and 1C; Zoology 1A-1B, 100, and 165. A mathematics or natural science minor is recommended.

## The Master of Arts Degree

The Master of Arts degree is offered in the department as part of the fulfillment of requirements for the School Psychologist credential. It is also possible to obtain a Master's degree if one obtains a School Psychometrist credential. Refer to these credentials and to the Master of Arts degree.

## Lower Division Courses

*** 1. General** (3) I, II

An introduction to some of the facts, principles, and concepts which are basic to understanding human behavior.

**2. Psychology Laboratory** (1) I, II

Application of experimental methods to psychological problems. Includes design and execution of experiments. One lecture and three laboratory hours. Prerequisite: Psychology 1.

**5. Principles of Psychology: Basic Organization of Behavior** (3) I, II

The basic sensory, neural and motor mechanisms and their functions in human behavior. Prerequisite: Psychology 1 and sophomore standing.

**6. Principles of Psychology: Learning and Integrated Behavior** (3) I, II

Attending, perceiving, and learning, including social learning, personality development, and conditions of efficient work. Prerequisite: Psychology 1 and sophomore standing.

**11. Applied Psychology** (3) I, II

A survey of the application of the basic principles of psychology to business, education, industry, government, law, medicine and related fields. Prerequisite: Psychology 1.

**12. Mental Hygiene** (3) I, II

An examination and interpretation of the factors which go into the making of the person as he adapts himself to the social world about him. The development of the normal personality. Prerequisite: Psychology 1.

## Upper Division Courses

**104A. Statistical Methods in Psychology** (3) I, II

An introduction to the use of quantitative methods in psychology, with emphasis upon measures of central tendency and variability, graphic methods and percentiles, linear correlation, and the applications of the normal probability curve. Prerequisite: Psychology 1. Not open to students with credit for Economics 140 or Sociology 103.

**104B. Advanced Statistics** (3) II
A further study of quantitative methods in psychology with particular emphasis on methods of correlation, chi-square, and contingency, and an introduction to the analysis of variance. Prerequisites: Mathematics C and Psychology 104A, or permission of instructor.

**105A. Psychological Testing (Group)** (3) I, II
The basic principles of testing. The selection and critical evaluation of group tests of intelligence, personality, aptitude, interest and achievement. Prerequisite: One of the following courses: Psychology 5, 11; Education 102A, 102D. Not open for credit to students with credit for Education 105A.

**105B. Psychological Testing (Individual)** (3) II
The principles of individual testing. Instruction and practice in the administration of the Stanford-Binet, Wechsler-Bellevue, similar tests. Prerequisite: Psychology 105A and permission of instructor.

*** 106. Developmental Psychology** (3) I, II
A study of the psychological development of the normal individual from conception through childhood, adolescence, maturity, and old age. Stress is laid upon the interdependence of the various periods of the individual's life. Prerequisite: Psychology 1.

**107. Psychology of Later Maturity** (3) II
The psychological, physiological, and sociological factors influencing behavior in the later years of life. Prerequisite: Psychology 1.

**121. Personnel and Industrial Psychology** (3) I, II
Psychological principles applied to problems of selection and assignment of industrial personnel, employee training, and fatigue. Prerequisite: Psychology 104A, or Economics 140, or Sociology 103.

**122. Public Opinion Measurement** (3) II
The history, methods, and problems of public opinion and attitude measurement. Emphasis will be placed upon the polling of consumers and voters. Students will be given field experience. Not open to students with credit for Journalism 122.

**124. Engineering Psychology** (2) II (Not offered in 1952-53)
Psychological problems of man-machine systems. Visual, auditory, and other sensory factors involved in the inter-relations between man and machines. Motion-study, work arrangement, fatigue, and environmental influences in relation to production. Prerequisite: Psychology 1 and upper division standing.

**130. Educational Psychology** (2) I, II
To develop understanding of the applications of psychological research for effective classroom teaching. Observation and field work required. Prerequisite: Psychology 1. Not open to students with credit for Education 130.

**131. Foundations of Personality** (2) I
The human organism in its interaction with the environment and the resultant changes in the development of the personality. Prerequisite: One full year of psychology or equivalent.

**132. Personality Adjustment** (2) II
The application of the fundamental principles of personality to problems of adaptation. Mental hygiene as a local, state, and national problem. Prerequisite: Psychology 131 or permission of instructor.

**140. Physiological Psychology** (3) I, II
The neurophysiological basis of behavior, with particular attention to the psychophysiology of sensory and motor processes, emotion, bodily needs, and learning. Prerequisite: Psychology 5 and 6, or 10 units in biological sciences.

*** 145. Social Psychology** (3) I, II
The major problems and findings concerning group behavior and group membership, the socialization of the individual, and processes of social interaction. Not open to students with credit for Sociology 145.

**150. Abnormal Psychology** (3) I, II

The psychology of behavior disorders, with emphasis on the amentias, neuroses, and psychoses. Prerequisite: One full year of psychology.

**151. Introduction to Clinical Appraisal** (3) I

A study of diagnostic devises in psychology, tests of clinical significance, ratings, interviewing for securing information. Projective and case study analyses; problems of insight, rapport, empathy, and prediction of individual behavior. Prerequisites: One of the following: Psychology 105A, 106, 131, 140, or 150.

**152. Introduction to Methods of Counseling** (3) II

An introduction to problems and methods of counseling and adjustment. The utilization of psychological principles and techniques in dealing with various types of guidance situations. Prerequisite: Enrollment limited to senior and graduate students in psychology or pre-social work.

**160A. Experimental Psychology** (3) I, II

Demonstrations of the principles and conditions of learning, perceiving, problem solving, and thinking. Methodology and design of experiments. Two laboratory sessions and one seminar period per week. Prerequisite: Psychology 5, 6, and 104A.

**160B. Experimental Psychology** (3) I, II

Demonstration of laws governing various sensory experience and motor activities. Experiments in space perception, errors of judgment, and conditions of work and fatigue. Two laboratory sessions and one seminar period per week. Prerequisites: Psychology 5 and 6.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**170. Comparative Psychology** (3) I

A study of the behavior of animals with a view to gaining a better understanding of human behavior. An analysis of the leading experimental work on senory discrimination, learning, and intelligence of each animal group, from amoeba to man. Prerequisites: Psychology 5 and 6.

**175. Theories of Learning** (3) II (Offered 1951-52 and alternate years)

A critical study of the facts, principles, and major theories of learning. Prerequisites: Psychology 1, 5, 6, 104A, and consent of the instructor.

**177. History of Psychology** (3) II

A survey of the historical background of modern psychology. Limited to psychology majors with senior standing.

**191. Practicum in Clinical Psychology** (1-6) I, II

A practicum in mental testing and clinical psychology in various state hospitals, mental hygiene clinics, and similar institutions. Prerequisite: Consent of the instructor.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisites: senior standing and permission of instructor.

## Graduate Courses

**201. Seminar** (2)

A review, integration, and supplementation of the student's knowledge of psychology.

**205. Advanced Mental Testing** (3)

The theory of mental testing and a comprehensive survey of the various verbal and nonverbal individual mental tests.

**211. Advanced Clinical Psychology** (3)

A seminar in psycho-diagnostics, counseling, and clinical research.

**233A. Guidance Counseling Techniques** (3) I, II

Designed for school counselors. To stress the understandings and procedures necessary for effective interviewing. Prerequisite: Education 230, or equivalent. Not open to students with credit for Education 233A.

**234. Projective Psychology** (3) I or II
Introduction to the theory and principles underlying use of projective techniques by clinical psychologists; a review of the structure and dynamics of personality as interpreted by projective devices.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

# RECREATION

## IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

### Major

A *curriculum in recreation* is offered in *arts and sciences* for the A.B. degree under the plan for a general major.

Students desiring a concentration in this field should refer to the Recreation Curriculum in the section of the bulletin entitled: Preprofessional and Vocational Curricula.

### Minor

A *minor in arts and sciences* is offered in *recreation*. The minor consists of 15 to 22 units to include the following courses: lower division: two units of physical education activity courses; Physical Education 53; and two units chosen from Art 61B, or fields of dance, drama, or music. Upper division requirements: Recreation 165, 170A-170B, and 184A or 184B. Recommended: Physical Education 151. Consultation with the chairman of the department is advised.

A *teaching minor in recreation* is offered for the general secondary and special secondary credentials. For statement of requirements, refer to this credential.

### Upper Division Courses

**165. Administration of Community Recreation** (3) II
The principles of organization and promotion of leisure time and recreation activities. Course content covers growth of the recreation movement, administration of areas and facilities, program of activities, features, services, organization and administration problems. A required course for recreation minors.

**170A-170B. Recreational Leadership** (2-2) Year, I
Principles and practices in recreational leadership. Methods of instruction and special techniques in the activities of the recreation program. Attention to crafts, music, social programs, drama, special projects, dance, sports, camp-craft and outdoor education. Courses may be taken separately. Not open to students with credit for Physical Education 170A-170B.

**184A-184B. Field Work in Recreation** (3-3) Year, I
Observation and participation in supervised group activities in the field. Practical experience in the various public and semi-public community recreation agencies.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**204. Problems in Recreation** (2) (Alternate years)
A survey of current problems facing the recreation profession, a review of literature, discussion of trends and observation of school situations together with the analysis and evaluation of actual problems. Written reports are required. Not open to students with credit for Physical Education 204.

# ROMANCE LANGUAGES

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in *Romance languages* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: French 1, 2, 3, 4, 5, 6, and Spanish 1, 2, 3, 4, 5, 6. Recommended: History 4A-4B or 8A-8B (for those who emphasize Spanish in the upper division). Six units from courses 1, 2, 3, 4 in French or Spanish may be applied toward general education requirements. Upper division requirements: A minimum of 24 upper division units in French and Spanish including French or Spanish 198. At least nine units of upper division courses must be taken in each language. A person majoring in Romance languages must have a minor to be decided upon in consultation with his major adviser.

A *teaching major in Romance languages* is offered for the junior high and general secondary credentials. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is not offered in Romance languages, but minors may be taken in French or Spanish.

### Graduate Courses

**290. Romance Language Bibliography (1)**

Exercises in the use of basic reference books, journals, and specialized bibliographies in the field of the Romance languages. Prerequisite: Nine units of upper division French or Spanish and graduate status.

# SOCIAL SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences in social sciences* is offered for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Six units in each of three of the following fields, the selection to be made on advise of the division adviser: (1) economics, (2) geography, (3) history, (4) political science, and (5) sociology-anthropology. Upper division requirements: A minimum of 30 units selected with the approval of the division adviser, as follows: Six to 15 units in each of three fields, provided that one of these fields be different from the fields selected for lower division work, and a 199 course. Twelve units in social science courses may be applied toward social science requirements in general education. Students majoring in social science are not required to complete a minor.

A *teaching major in social sciences* is offered for the general junior high school and general secondary school credentials. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is not offered in the social sciences.

A *teaching minor in social sciences* is offered for the special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

# SOCIOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences,* is offered in *sociology* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Sociology 50 and 51. Upper division requirements: A minimum of 24 upper division units in sociology, including Sociology 103, 110, 135, 152, 153, and 173 or 174. Students majoring in sociology are not required to complete a minor.

A *teaching major* is not offered in sociology; however, courses in sociology may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in sociology. The minor consists of 15 to 22 units in sociology, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in sociology for the general secondary credential; however, courses in sociology may be used as part of the *social science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

***50. Contemporary Social Problems** (3) I, II
Survey of modern social problems recognizing the sociological factors involved. Emphasis on the scientific method of approach. An evaluation of various causes and solutions of problems. A prerequisite for upper division courses in Sociology. Sophomore standing required. Not open to students who have credit for Social Science 40.

***51. Principles of Sociology** (3) I, II
The development and use of the concepts applied to sociological analysis; the effects of isolation and social contacts, interaction, processes, forces, controls, collective behavior and social progress. A prerequisite for upper division courses in Sociology. Sophomore standing required. Prerequisite: Sociology 50.

### Upper Division Courses

**103. Elementary Social Statistics** (3) I, II
Analysis and presentation of elementary material in the fields of sociology and social work. Tabular and graphic presentation, analysis of frequency distributions, trends, simple correlation, sampling and reliability techniques. Prerequisites: Mathematics A-B and Sociology 50 and 51. Mathematics C or 7A recommended. A prerequisite for most upper division sociology courses. Not open to students who have credit for Economics 140 or Psychology 104A or 104B.

***110. Race Relations** (3) I
A study of the Negro, Oriental, and other minority groups in the United States. A study of mental capacities, education, cultural achievement, family life, delinquency and other social factors of each group. Race prejudice, racial consciousness, theories of racial superiority and inferiority will be considered. Prerequisite: Sociology 50, 51.

**120. Industrial Sociology** (3) II
Analysis of group relationships within economic organizations. Problems of leadership, morale and conflict. Some attention to the sociology of occupations and professions. Prerequisites: Sociology 50, 51.

***135. Marriage and the Family** (3) I, II
Preparation for marriage. Prediction scales for evaluating success or failure in marriage. Parent-child relationships; factors in successful and unsuccessful marriages; higher education and the birth rate; married women in industry and professions; desertion and divorce. Not open to students who have credit for Sociology 45, or Home Economics 135.

*** 145. Social Psychology** (3) I, II

The major problems and findings concerning group behavior and group membership, the socialization of the individual, and processes of social interaction. Not open to students with credit for Psychology 145.

**152. History of Social Thought** (3) I

The origin and development of social theory in Europe and America; consideration of the fields and specialization and research in contemporary American sociology. Prerequisite: Sociology 50, 51.

**153. Modern Social Theory** (3) II

A study of theories basic to modern sociological research, including the viewpoints of European and American thinkers. Prerequisites: Sociology 50, 51, and 152.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**170. Social Disorganization** (3) I

Survey of many alleged abnormal phenomena in society as seen in society today in various forms of individual, family, community and world disorganization, such as crime, prostitution, extreme alcoholism, migratory workers, divorce, revolution and war.

**173. Criminology and Penology** (3) I

The extent and characteristics of crime; consideration of physical, mental, economic, and sociological causes of crime; study of methods of penal discipline, prison labor, parole, and probation; programs of prevention. Prerequisite: Sociology 50, 51.

**174. Juvenile Delinquency** (3) II

The nature and extent of delinquency; the causative factors involved; methods of control and prevention, with special attention to the protective and remedial measures offered by the school, home, Juvenile Court, correctional institutions and camps, probation and parole, and recreational agencies. Prerequisite: Sociology 50, 51, or permission of the instructor.

**180. Population Problems** (3) I

Problems of population increase, migration, shifts in composition of population relative to age, sex, and racial distribution. Population practices and theories. Biological and geographical aspects of population problems. International population movements. Prerequisite: Sociology 50, 51 and 103.

**185. Community Welfare Organization** (3) II

An analysis of the structure and process of community organization for social welfare as well as the functional relationships between public and private welfare agencies. Field work will be required to study some of the social agencies of San Diego. Prerequisite: Sociology 50, 51 and Sociology 103, or permission of instructor.

**187. Urban Sociology** (3) I, II

A study of the structure and function of the modern city; types of neighborhoods; forms of recreation; social forces in a metropolitan area; types of urban personalities and groups; rural-urban conflicts of culture. Practical field studies required. Prerequisite: Sociology 50, 51 and 103.

**190. Fields of Social Work** (3) I, II

A survey of the nature of social work and the various kinds of social work which are found in the modern urban life. The student is familiarized with the various social agencies in the community, their problems and methods of work, by readings and field trips. Volunteer social work in some social agency recommended. Prerequisites: Sociology 50, 51, and 103.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**200A-200B. Seminar** (2-2)

**230. Principles of Social Case Work** (3) I
A study of the principles and practices of social case work; problems of case recording and analysis. Directed field work and case studies. Prerequisites: Sociology 190 or Psychology 152 or Education 233.

**231. Field Work in Social Case Work** (3) II
Supervised practice in local social work agencies. Prerequisite: Sociology 190 and 230.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

## SPANISH

### IN THE DIVISION OF LANGUAGE AND LITERATURE

### Major

A *major in arts and sciences* is offered in *Spanish* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: In the major, Spanish 1, 2, 3, 4, 5, 6; in other foreign languages, French 1, 2, or German 1, 2, or Latin 1, 2. Six units in elementary French, German, or Latin may also be applied toward general education requirements. Recommended: History 4A-4B or 8A-8B. Upper division requirements: A minimum of 24 upper division units, at least 21 units of which must be in Spanish, including Spanish 198. The remaining three units may be selected from Anthropology 151B; Geography 118, 119, 120; History 161, 162; Political Science 165; Spanish 115 or 116; or Comparative Literature 101A, 140A-140B, 152A-152B, 159, in consultation with the Chairman of the Department. A person majoring in Spanish must have a minor to be decided upon in consultation with his major adviser.

A *major in arts and sciences* is offered in *Romance languages*. For specific information, refer to Romance languages in the section on Announcement of Courses.

A *teaching major* is offered in Spanish or Romance languages for the junior high school and general secondary credentials. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *Spanish*. The minor consists of 15 to 22 units in Spanish, six units of which must be in courses carrying upper division credit.

A *teaching minor* is offered in Spanish for the general secondary, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

*** 1. Elementary** (3) I, II
Pronunciation, oral practice, readings on Hispanic culture and civilization, minimum essentials of grammar.

*** 2. Elementary** (3) I, II
Continuation of Spanish 1. Prerequisite: Spanish 1 or one year of high school Spanish.

***3. Intermediate** (3) I, II

Reading in Spanish of cultural material, short stories, novels or plays; oral practice; outside reading with oral and written reports. Prerequisite: Spanish 2 or two years of high school Spanish.

***4. Intermediate** (3) II

Continuation of Spanish 3. Prerequisite: Spanish 3 or three years of high school Spanish.

**5. Intermediate** (2) I, II

A practical application of the fundamental principles of grammar by means of oral and written work based on Spanish texts. Prerequisite: Spanish 2 or two years of high school Spanish.

**6. Intermediate** (2) II

Continuation of Spanish 5. Prerequisite: Spanish 5 or three years of high school Spanish.

**10. Conversation** (2) I

Practice in the spoken language; practical vocabulary; conversation on assigned topics; simple dialogues and plays. Prerequisite: Spanish 2 or two years of high school Spanish.

**11. Conversation** (2) II

Continuation of Spanish 10. Prerequisite: Spanish 10, or Spanish 3, or three years of high school Spanish.

***15. Spanish Civilization** (2) I

The major currents and characteristics of Hispanic life and culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

***16. Spanish Civilization** (2) II

Continuation of Spanish 15 with emphasis on Spanish America. No prerequisite.

**50. Spanish Commercial Correspondence** (3) I

A one-semester intermediate course in Spanish composition, directed along the line of commercial correspondence. A practical course, with translation of business letters, and supplementary reading in Spanish on commercial subjects. Prerequisite: Three years of high school Spanish, or completion of Spanish 3 or 5.

## Upper Division Courses

**101A-101B. Conversation and Composition** (3-3) Year, I (Offered in 1953-54)

Translation into Spanish of moderately difficult English prose passages. Free composition in Spanish. Outside reading of modern Spanish plays, with written reports in Spanish. Oral practice in colloquial Spanish with extensive use of phonograph recordings. Prerequisite: Spanish 4 and 6, or their equivalent, with a grade of C.

**102A-102B. Introduction to Spanish Classics** (3-3) Year, I

Reading from several types of classical literature. Lazarillo de Tormes and other novels of Roguery; selections from Don Quixote, and the Cien Mejores Poesias Castellanas; one drama each from the works of Lope de Vega, Calderon, Alarcon, and Moreto; collateral reading and reports. Prerequisite: Spanish 4 and 6, or their equivalent, with a grade of C.

**104A-104B. Spanish-American Literature** (3-3) Year, I

Reading from representative Spanish-American authors during the colonial revolutionary and modern periods. Lectures, class reading, collateral reading and reports. Prerequisite: Spanish 4 and 6, or their equivalent, with a grade of C.

**105A-105B. Modern Spanish Drama** (3-3) Year, I (Offered in 1953-54)

The development of the drama of Spain from the beginning of the nineteenth century to the present time. Prerequisite: Spanish 4 and 6, or their equivalent, with a grade of C.

**110A-110B. Novel and Short Story in Spain** (3-3) Year, I (offered in 1954-55)
The development of the novel and short story in Spain from 1830 to the present time. Prerequisite: Spanish 4 and 6, or their equivalent, with a grade of C.

***115. Spanish Civilization** (2) I
An advanced course in Hispanic culture of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

***116. Spanish Civilization** (2) II
Continuation of Spanish 115 with emphasis on Spanish America. Prerequisite: sophomore standing.

**150. Spanish Phonetics** (3) II
A theoretical and practical study of Spanish phonetics. A study of vowels, consonants, isolated words, and phonic groups. The principles of versification, and exercises in intonation. Especially recommended for prospective teachers of Spanish. Prerequisites: Spanish 4 and 6, or their equivalent, with a grade of C.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**198. Comprehensive Reading and Survey Course** (3) II
Designed to fill up the gaps in the reading done in courses. Class meeting once a week for guidance, reports, and quizzes. Required of all seniors majoring in Spanish.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**201. Old Spanish** (2) I
A study of the language and literature of Spain from the 12th to the 15th centuries. Prerequisite: Nine units of upper division Spanish and graduate status.

**204. Seminar in Spanish-American Literature** (2) II
Intensive investigation of some phase of Spanish-American literature. A single country, an author, or some special problem will be studied and reported upon. Prerequisite: Nine units of upper division Spanish and graduate status.

**290. Bibliography** (1) See Romance Languages

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)
Master's degree candidates in Spanish are expected to substitute a comprehensive examination for the thesis. In unusual cases a student may write a thesis with the permission of the department.

## SPEECH ARTS

### IN THE DIVISION OF LANGUAGE AND LITERATURE

### Major

A *major in arts and sciences* is offered in *speech arts* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division: Required in general education: Speech Arts 3. Required in the major: a minimum of 13 units of lower division courses in speech arts, specializing in the fields of dramatic art, radio, public speaking, or a guided combination of the three. Upper division requirements: A minimum of 24 upper division units, including Speech Arts 150, with an emphasis of 12 units in one area of concentration (theater, radio, public speaking, or speech pathology). A minor is suggested, but not required.

A *teaching major in speech* is offered for the general secondary and special secondary credentials. For a statement of requirements, refer to these credentials.

## Minor

A *minor in arts and sciences* is offered in *speech arts.* The minor consists of 15 to 22 units in speech arts, nine units of which must be in courses carrying upper division credit.

A *teaching minor in speech arts* is offered for the general secondary, special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

## Lower Division Courses

**1. Voice and Diction** (3) II

Exercises and drills to improve the quality, flexibility and effectiveness of the speaking voice leading to good usage in standard American speech. Preparatory to further courses in public speaking and dramatic art.

**2. Oral Communication Laboratory** (1) I, II

Those who fail the speech test must take this course concurrently with Speech Arts 3. This course provides training in articulation, voice control, vocabulary. Individual laboratory assistance on specific speech problems.

***3. Oral Communication** (2) I, II

Training in fundamental processes of oral expression; method of obtaining and organizing material; outlining principles of attention and delivery; practice in construction and delivery of various forms of speeches.

**4. Extemporaneous Speaking** (3) I, II

Practice in extemporaneous speaking on subjects of current interest, both national and local, with stress laid on the organization and delivery of content material. Forum discussion will provide speakers with the opportunity of assembling facts quickly to meet such questions as any audience situation might demand.

**11A. Fundamentals of Interpretation** (3) I, II

Application of the principles involved in "making words come alive": Response to thought and mood, sensory association, emphasis, climax. Practice selections in poetry and prose.

**11B. Intermediate Interpretation** (3) I, II

Oral reading of various types of material suitable for popular audiences: Stories, humorous sketches, light and sentimental verse. Prerequisite: 11A or 55A.

**20. Remedial Speech** (1) I, II

Corrective laboratory training prescribed on the basis of vocalization tests made on recording machine. Required of education majors who fail to meet speech requirements tests. Private assistance given to stutterers and lispers.

**54. Stage Make-Up** (2) I

Practice in the application of stage make-up including straight and character. Two laboratory periods per week.

**55A. Elementary Acting** (3) I, II

Speech and pantomime applied to the problems of characterization in group scenes. This course is concerned with the discovery and development of talent and the appreciation of the actors' problems for directors and teachers. (32 laboratory hours required.)

**55B. Intermediate Acting** (3) I, II

Continuation of 55A emphasizing more emotional material from longer scenes. Some one-act plays will be produced from this class. (32 laboratory hours required.) Prerequisite: 55A or previous training.

**56A-56B. Dramatic Production** (3-3) Year, I

A general survey of play production planned to present the whole organization of the college and school theater, with emphasis on backstage practice, stagecraft, and elementary lighting. Crews for the departmental productions are organized in this class. Prerequisite: 55A or permission of the instructor is prerequisite for 56B.

**57. Elementary Stage Costume** (3) II

A study of pattern drafting, draping, color harmony and the use of fabrics for stage costuming. Students will receive practical training in the construction of stage costumes. Two lecture-demonstration and recitation hours and one laboratory per week.

**60A-60B. Argumentation and Debate** (3-3) Year, I, II

Obtaining and organizing of evidence and the construction and use of the brief; study and discussion of current issues; the presentation of formal and informal debates. Attention to intramural and intercollegiate debating.

**61A-61B-61C-61D. Intercollegiate Debate** (1-1-1-1) I, II

Students are limited to four units, including lower and upper division courses.

**63A-63B-63C-63D. Verse Choir** (1-1-1-1) I, II

Participation in verse speaking chorus to develop quality, range of tone, and ability in dramatic visualization of poetry. Students are limited to four units, including lower and upper division courses.

**81. Survey of Radio** (3) I, II

A course presenting the background, theory, and fundamentals of radio broadcasting. The subject material includes history of broadcasting; types of radio programs: broadcast operation.

**82. Radio Announcing** (3) I

The fundamentals of radio announcing. Class time will be divided between lecture and laboratory practice of announcing styles. Voice training for radio will be stressed. Prerequisite: Speech Arts 81.

**83. Radio Acting and Directing** (3) II

For students interested in the production of dramatic radio programs. Lecture and laboratory for radio techniques in characterization. The use of sound effects and music cues and bridges will be considered. Emphasis will be on production analysis. Actors for Radio Guild productions will be taken from this class. Prerequisite: Speech Arts 81.

## Upper Division Courses

**108. Advanced Interpretation** (3) I, II

Analysis of techniques of literary composition as guides to oral interpretation. Achievements of the creative artist as they affect the interpretative artist. Prerequisite: 11A or 11B or permission of instructor.

**118A. Play Analysis** (3) I

Deals with the one-act play and its technique. New plays are read and discussed in class during their period of development.

**118B. Playwriting** (3) II

Analyses of long plays. Students engage in creative writing.

**120. Readings in Dramatic Art** (3) II

This course will deal with dramatic materials in which the student will study complete plays for interpretation and characterization without memorization and acting techniques.

**140A-140B. Stage Design** (3-3) Year, I, II

The application of the principles of design, color and perspective to the design of settings for the production of period and modern plays. Students will learn to make sketches and models and paint the scenery for the departmental productions. Prerequisite: 56A-56B or permission of the instructor.

**142A-142B. Summer Theater Workshop** (3 or 6) Summer

A theater laboratory for those who wish to devote their entire time to training and a variety of experiences in the summer theater program including acting, design, stagecraft, lighting, directing, and stage management. Prerequisite: Permission of the instructor.

**145. Stage Lighting** (3) II
For directors, designers and technicians in school and community theaters concerning the principles and practice of light, color, lighting instruments, and control equipment, including the design and planning of lighting of plays. Students will serve as light crews for departmental production.

**150. Phonetics** (3) I, II
Auditory and kinesthetic analysis of the sounds of the English language. Valuable as a corrective course in pronunciation and articulation. Required of speech majors and those seeking the Speech Correction Credential.

**152. History and Design of Costume** (stage) (3) II
A study of costume from Egypt to the present. Emphasis on the use of historical costumes on the stage. Costume designs for one stage production. Drawing and painting experience desirable but not necessary.

**154A-154B. History of the Theater** (3-3) Year, I, II
A study of the theater from primitive times to the present. Special attention will be given to the theater as a mirror of the social and cultural background of the various countries and periods in which it is studied. Carries aesthetics credit. (Speech Arts 154B may be taken without 154A.)

**155. Advanced Acting** (3) I
Problems in characterization: Acting styles of the Elizabethan and Eighteenth Century periods. Prerequisite: 55A-55B or the equivalent.

**156. Advanced Dramatic Production** (3) II
Problems and projects in scenery and lighting in connection with the workshop and major productions of the department.

**159. Stage Direction** (3) I
Planned for prospective directors of plays in schools, colleges and community theaters. Through lectures, discussions, and exercise projects the student will become acquainted with the principles, procedure and methods of stage direction. Each student will be required to direct several short plays during the course.

**160. Stage Direction Laboratory** (1) I, II
This will consist of experience in directing a one-act play before a departmental or public audience. It may be taken with or it may be preceded by 159. Prerequisite or corequisite: 159. May be repeated once for credit.

**161A-161B-161C-161D. Advanced Intercollegiate Debate** (1-1-1-1) I, II
Students are limited to four units, including lower and upper division courses.

**162. Advanced Argumentation** (3) I
Presents a further and more detailed study in the preparation of briefs and the organizing of evidence; opportunity for participation in intramural debates, intercollegiate debate, and community speaking activity. Prerequisite: 2A or 2B.

**163A-163B-163C-163D. Advanced Verse Choir** (1-1-1-1) I, II
Participation in verse speaking chorus to develop quality, range of tone, and ability in dramatic visualization of poetry. Students are limited to four units, including lower and upper division courses.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**176. Problems of Speech Correction and Articulation** (3) II
Analysis and discussion of the major articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. (Minimum of 25 laboratory hours required.) Not open to students with credit for Education 176.

**177. The Teaching of Lip Reading** (2)
History, theory and methods of lip reading. Aids for the classroom teacher; program and materials of instruction for the specialized teacher. Opportunities for practice teaching are offered. Not open to students with credit for Education 177.

**179A-179B. Nervous Speech Disorders** (3-3) Year, I
Clinical survey of newest methods of speech correction with special emphasis given to stuttering. (Minimum of 25 laboratory hours required per semester.) Required course for Special Corrective Credential. Not open to students with credit in Education 179A-179B. (Speech Arts 179A is a prerequisite for 179B.)

**180A-180B. Rehearsal and Performance** (1) I, II
One unit of technical practice followed by one unit of acting. One unit may be repeated, making a total of three units.

**181. Radio Sales and Advertising** (3) I, II
A study of advertising trends in radio advertising; time buying, audience survey, and program types in relation to products to be advertised via radio broadcasting. Includes publicity and promotion of radio programming organization of a radio station; relationship between the business and entertainment factors of radio broadcasting. Open to students with consent of instructor. Not open to students with credit for Business 181.

**182. Advanced Radio Production** (3) II (Offered in 1951-52 and alternate years)
Advanced radio production techniques. Students are responsible for the execution of Radio Guild productions. Projects in program types include the use of sound and music. Material includes production analyses and script editing. Prerequisite: Speech Arts 83.

**183. Radio Continuity and News Writing** (3) II
Correlates news editing and writing with announcing styles. Radio news procedure and organization of a radio news staff; analysis of reportorial and commentary styles. Includes production techniques of "on-the-spot" and multiple point pickup broadcasts. Registration with permission of instructor. Not open to students with credit for Journalism 183.

**184. Radio Writing** (3) II
Includes original half-hour scripts, play or novel adaptations for radio, and the documentary program. Study of pacing and timing, the use of sound and music for bridges and cues, and radio format. Plays written by students are read and discussed during their development; the better plays to be produced by the Radio Guild for broadcast. Open to students with consent of instructor.

**191. Organized Discussion** (3) II
Consideration of the symposium, the panel, the open forum, the business session, and varieties of conference speaking. Emphasis upon organization and presentation. Attention to parliamentary procedure for informal groups. Prerequisite: Speech Arts 60 or equivalent.

**192A-192B. Advanced Public Speaking** (3-3) Year, I, II
Careful attention given to the preparation and delivery of longer speeches, using as models classics in the field of oratory. Prerequisite: 4.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## Graduate Courses

**200. Seminar in History of Oratory** (2) II
An advanced course for those already familiar with the techniques and theories of public speaking and debate. A history of public address from the time of Greece up to the present, organized around the theories of representative orators and their relationships to the social environment.

**221. Articulatory Problems of Speech** (2) I
Analysis and discussion of articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Prerequisite: Speech Arts 150.

**245. Seminar in Technical Practice** (2)

Advanced technical projects in planning school theaters and their mechnical equipment, lighting control and lighting instruments and the design of lighting layouts for elaborate plays will be assigned, executed and discussed.

**259. Seminar in Stage Direction** (2)

An advanced course for those who are ready to direct full-length plays and to consider the problems of handling various styles and types of drama in the great periods of dramatic literature for modern production. For graduates with experience in directing plays.

**260. Seminar in Oral Interpretation** (2)

Aesthetic discipline applied to oral reading of masterpieces of poetry and prose. Analysis of thought and emotional content and aesthetic form, including unity and harmony, variety and contrast, balance and proportion, rhythm.

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

# ZOOLOGY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in *zoology* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: in the major, Zoology 1A-1B; in related fields, Botany 1 or 2A-2B, Chemistry 1A-1B or 2A-2B, Physics 2A-2B, 3A-3B. Upper division requirements: 24 units in zoology to include Zoology 100, 101, 106, 155. A minor is not required. Reading knowledge of a foreign language is recommended.

A *major in arts and sciences* is offered in *zoology* for the B.S. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: in the major, Zoology 1A-1B; in related fields, Botany 1 or 2A-2B, Chemistry 1A-1B or 2A-2B, Physics 2A-2B, 3A-3B, Geology 2, 3, and Mathematics 7A-7B. Upper division requirements: 36 units in zoology or approved related fields to include Zoology 100, 101, 106, 155. A minor is not required. Reading knowledge of a foreign language is recommended.

Nine units in physical science and life science may be applied toward general education requirements in the natural sciences.

A *teaching major* is not offered in zoology; however, courses in zoology may be used as part of the *life science major* for the general secondary credential or as part of the *general science major* for the general junior high school credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in zoology. The minor constists of 15 to 22 units in zoology, six units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in zoology; however, it may be used as part of the *teaching minor in life science* for the general secondary credential, or as part of the *teaching minor in general science* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A-1B. General Zoology** (4-4) Year, I, II

An introduction to animal biology. Designed for those who expect to do advanced work. Two lectures and 6 hours of laboratory work each week. Prerequisite for Zoology 1B; Zoology 1A.

**8. Human Anatomy (3) I**

A study of human structure through the use of models, prepared dissections and microscope slides. Prerequisite: High school biology, Biology 3, 1, or Zoology 1A. Two hours of lecture and three hours of laboratory per week. Required of prenursing students. Credit reduced to 2 units if student has credit for Zoology 20.

**20. Human Anatomy and Physiology (3) II**

An elementary course in human anatomy and physiology. Prerequisite: High school biology, or Biology 1 or 3 or Zoology 1A. Lectures three hours per week. Credit reduced to two units if student has credit for Zoology 8 or Physiology 1A.

### Upper Division Courses

**100. Embryology (4) I, II**

The development of vertebrates as illustrated by the frog, chick, and pig. Six hours of laboratory and two hours of lecture and quiz per week. Prerequisite: Zoology 1B, or Biology 3 and consent of instructor.

**101. General Physiology (4) II**

Fundamentals of plant and animal functions. Two lectures and two laboratory periods per week. Prerequisites: Biology 3 and consent of instructor, or Zoology 1A-1B, Chemistry 1A-1B or Chemistry 2A-2B. Not open to students with credit for Physiology 101.

**104. Microtechnique (3) I, II**

Introduction to methods of preparation of tissues for microscopic study. Six hours of laboratory and one hour of lecture per week. Prerequisite: One year college chemistry and Zoology 1A-1B, Botany 2A-2B, or Biology 4 and consent of instructor.

**106. Comparative Anatomy of the Vertebrates (4) I**

Dissection, study and comparison of organ systems of typical vertebrates. Two hours per week of lecture and six hours of laboratory. Prerequisite: Zoology 1B, or Biology 3 and consent of instructor.

**108. Histology (4) I**

A study of the microscopic structures and differentiation of tissues and organs of the vertebrates, especially mammals. One lecture and six hours of laboratory per week. Prerequisites: Zoology 1A-1B; recommended Zoology 100.

**109. Hematology (3) I, II**

Microscopic and chemical examination of blood. One lecture and two laboratory periods per week.

**110. Limnology (4) II**

A biological survey of available fresh waters, followed by a selected problem on the relationship of an organism or group of organisms to the environment. Prerequisites: Zoology 1A-1B and elementary chemistry.

**112. Marine Invertebrates (4) I**

Identification and study of behavior and life histories of invertebrates of the San Diego region. Frequent collecting trips to the beaches required. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor. Two hours of lecture and six hours of laboratory or field work per week.

**113. Ornithology (4) II**

The study and identification of birds, especially those of the Pacific Coast and the San Diego region. One hour of lecture and six hours per week of laboratory, or field excursions, and a field project. Prerequisite: Zoology 1B, or Biology 4 and consent of instructor.

**113F. Field Ornithology (1) I**

A field study of local birds with special emphasis upon the fall migration.

**115. Cold-blooded Vertebrates (3) II**

The classification, natural history and distribution of fishes, amphibians, and reptiles. Practice in the techniques of collection and the use of keys for identification. Frequent field trips. One lecture and two laboratory periods per week. Prerequisites: Zoology 1B, or Biology 4 and consent of instructor.

**118. Mammalogy (3) II**
Lectures on classification, adaptations, and ecological relationships of mammals. Laboratory and frequent field trips to familiarize students with local mammals, taxonomic procedures and field techniques. One lecture and six hours of laboratory per week. Prerequisites: Zoology 1A, or Biology 4 and consent of instructor.

**119. Field Zoology (4) I, Summer**
Designed to give a working knowledge of the animals of Southern California; field trips, lectures and laboratory emphasizing ecology, behavior, observational methods, collecting techniques and taxonomy. Prerequisite: A course in college biological science or permission of instructor.

**121. General Entomology (3) I**
The classification, life history, structure, and physiology of insects. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor. Two hours of lecture and three hours of laboratory per week.

**122. Systematic Entomology (1-2) II**
Classification of insects with especial emphasis on a group of insects of the student's choice. To be taken with or to follow 121. May be repeated for credit but with a total of not more than 3 units. Three to six hours of laboratory work each week.

**125. Economic Entomology (4) II**
Course designed for students of agriculture and horticulture. Emphasis is placed on determination and control of insects affecting plants. Quarantine measures are also studied. Two lectures and two laboratory periods per week. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor.

**126. Medical Entomology (3) I**
The role of insects and other arthropods in transmission and causation of human diseases. Three hours of laboratory and two hours of lecture per week. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor.

**128. Parasitology (4) I**
Study of animal parasites with special reference to those of man. Laboratory including identification of important parasites of man, and collection and preservation of local forms. Two hours of lecture and six hours of laboratory per week. Prerequisite: Zoology 1A-1B, or Biology 4 and consent of instructor.

*** 150. Readings in Biology (2) II**
Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles, ecology, economic zoology, zoogeography, breeding habits, animal behavior. Not open to students who have credit for Botany 150. Prerequisite: Biology 3 or equivalent.

**153. Economic Biology (2) I**
Study of uses of plants and animals to man and their destructive effects. Consideration also given to general methods of control and conservation. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor. Not open to students who have credit for Botany 153.

**155. Genetics (3) II**
Principles of plant and animal genetics, with experiments and demonstrations illustrating the mechanisms of heredity. Two hours of lecture and three hours of laboratory per week. Not open to students with credit for Botany 155. Prerequisites: Zoology 1A-1B, or Botany 2A-2B, or Biology 3 and consent of instructor.

**158. Conservation of Wildlife (3) II**
A survey of plant and animal resources with emphasis on their conservation and intelligent use. Prerequisite: a college course in biology or consent of the instructor. Not open to students with credit for Botany 158.

*** 160. Evolution (2) II**
The development of theories of evolution. Two lectures per week. Prerequisite: Biology 1 or equivalent. Not open to students with credit for Botany 160.

***165. Human Heredity** (2) I
Presentation of selected principles of heredity as related primarily to human inheritance. Designed primarily for nonscience majors. Two lectures per week. Not open to students with credit for Zoology 155 or Botany 155.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisites: 15 units in zoology with a grade of A or B; permission of instructor.

### Graduate Courses

**200. Seminar** (3) I
Especial emphasis will be placed on current concepts in the various fields of biology including problems of migration, distribution, speciation, evolution. Required of all graduate students.

**202. Hydrobiology** (2) II
A course in aquatic ecology with special emphasis on fresh water but with reference to marine biology.

**213. Advanced Studies in Ornithology** (2) I
Lectures and seminar on advanced problems of morphology, distribution, behavior and classification of birds.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

# PROVISIONAL CURRICULUM

This curriculum is for the purpose of assisting provisional students in attaining regular status in a curriculum which leads to the A.B. degree. Students in the provisional program are given close supervision in selection of courses and are placed in classes specially designed to aid in adjustment to the college program.

Reclassification to regular status may be obtained upon the completion of at least 24 units of work of "C" grade with an over-all grade point average of 1.0, or upon recommendation of a reclassification committee. Reclassification must ordinarily take place within the first year of college work. Students who do not so reclassify will be placed on probation. (See Probation and Disqualification.)

The courses in the provisional curriculum are open only to students in provisional status. Provisional students in their first college year must select three courses each semester from the list of subjects in the provisional curriculum. All other courses selected to complete the student's program may be chosen from the regular schedule of courses or from additional courses in the provisional curriculum with the approval of the adviser.

## A SUGGESTED PROGRAM FOR PROVISIONAL STUDENTS

| First Year | *Units* *1st Sem.* | *Units* *2d Sem.* |
|---|---|---|
| Physical education activities | ½ | ½ |
| English 41 and 42 | 3 | 3 |
| Psychology 41 and Sociology 45 | 3 | 3 |
| Social Science 40 and 45 | 3 | 3 |
| Physical Science 41 and Biology 41 | 3 | 3 |
| Speech Arts 3 and Health Education 21 | 2 | 2 |
| Electives | 2 | 2 |
| | 16½ | 16½ |

## COURSES OF INSTRUCTION

### BIOLOGY

***41. Man and His Biological World** (3) I, II

General concepts of biology with emphasis on the biology of man in relation to modern life. Equivalent of Biology 1. Laboratory credit for general education may be obtained by following Biology 40 with Biology 4.

### ENGLISH

**40. English Fundamentals** (3) I, II

Elements of composition. Drill in grammar, usage, vocabulary building, reading skills, theme writing. Equivalent of English A. This course is required of students in the provisional program who fail the English examination. This course is a prerequisite for other English courses. May be counted toward graduation credit but may not be used for the general education requirement.

***41. Freshman Composition** (3) I, II

Composition stressing exposition. Reading from essays and articles. Prerequisites: Passing mark in English A qualifying examination or credit for English 40. Equivalent of English 1.

***42. Freshman Literature** (3) I, II

Literature, mainly contemporary, is read for its ideas, especially in relation to human problems and their solution. Practice in writing is continued. Required of all Provisional students. Prerequisite: English 41. Equivalent of English 2.

## PHYSICAL SCIENCE

***41. Man and His Physical World** (3) I, II

A general education course concerning the nature of the scientific method and selected topics in physical science. Materials will be chosen from physics, chemistry, astronomy, and geology to provide an understanding of the relations of physical science to modern life. Equivalent of Physical Science 1. This course may be followed by Astronomy 9 or Geology 3 for laboratory credit.

## PSYCHOLOGY

***41. Psychology and Life** (3) I, II

An elementary survey of normal adult psychology, descriptive and organizational; the subjective and objective aspects of behavior. Furnishes basis for all other courses in psychology and is prerequisite therefor. Equivalent of Psychology 1.

## SOCIAL SCIENCE

***40. Contemporary Problems** (3) I, II

A survey of political, social and economic forces with background material for understanding human problems. Equivalent of Sociology 50.

***45. American Democracy** (3) II

The democratic concept of self-government, its background and growth, with an emphasis on the American use of democratic principles. Includes a study of democracy in a relative and comparative approach to our modern world and other forms of government. This course meets the graduation requirement in the United States Constitution and in California State and local government.

## SOCIOLOGY

***45. Marriage and Family** (3) I, II

Emphasizes preparation for successful marital adjustment by presenting materials that will help students learn to solve their own courtship, marriage, and family problems. A general education course in social science and also in family life education.

# DIRECTORY

## 1951-1952

(Date after name indicates when appointed to faculty)

HEPNER, WALTER R. (1935)----------President
A.B., M.A., Ed.D., University of Southern California.

ACKLEY, JOHN W. (1947)----------Associate Professor of Speech Arts
A.B., University of Redlands; M.A., and two years of graduate study at the University of Southern California.

ADAMS, EILEEN (Mrs. Bert) (1949)----------Junior Librarian
A.B., Willamette University; B.S. in L.S., University of Denver.

ADAMS, JOHN R. (1928)----------Chairman, Division of Languages and Literature; Professor of English
A.B., A.M., University of Michigan; Ph.D., University of Southern California.

ALCORN, MARVIN D. (1941)----------Associate Professor of Education
A.B., Southwestern College; A.M., Teachers College, Columbia University; Ed.D., University of Southern California.

ALLEN, WILLIAM H. (1950)----------Coordinator of Audio-Visual Services
Assistant Professor of Education
A.B., University of California at Los Angeles; M.A., Claremont Graduate School; Ed.D., University of California at Los Angeles.

AMSDEN, GEORGIA C. (1925)----------Associate Professor of Secretarial Management
Diploma, Gregg College, Chicago; special secretarial training in various colleges.

ANDERSON, GRAYDON K. (1949)----------Assistant Professor of Economics
A.B., Willamette University; two years of graduate study at University of Minnesota and University of Wisconsin.

ANDREWS, JULIA G. (Mrs. F. S.) (1947)----------Assistant Professor of Art
A.B., Northwestern University; M.A., Columbia University; two and one-half years of graduate study at Teachers College, Columbia University.

APPLE, JOE A. (1947)----------Professor of Education
A.B., Southeastern State College; M.A., University of Oklahoma; Ed.D., Teachers College, Columbia University.

ATKINSON, DAVID F. (1949)----Instructor in Accounting and Business Management
A.B., San Jose State College; M.A., Stanford University; graduate study at Redlands University. On military leave, January, 1951.

BACON, GUINIVERE KOTTER (Mrs. George) (1928)
Associate Professor of Education
B.S., Utah Agricultural College; M.A., Stanford University; one year of graduate study.

BAKER, CLIFFORD H., JR. (1937)----------Assistant Professor of Spanish
A.B., San Diego State College; M.A., and four years of graduate study at the University of California.

BALLANTINE, FRANCIS A. (1949)----------Assistant Professor of Education
A.B., Michigan State Normal College; A.M., Ph.D., University of Michigan.

BARNHART, KENNETH EDWIN (1939)----------Professor of Sociology
A.B., Southwestern University; B.D., Southern Methodist University; Ph.D., University of Chicago.

BECK, FOY H. (1951)----------Assistant Professor of Education
B.A., Iowa State Teachers College; M.A., Colorado State College of Education; graduate study at Universities of Iowa and Southern California.

BECKER, CALLIE D. (Mrs. E. J.) (1946)----------Senior Librarian
A.B., Shorter College; A.B. in L.S., Emory University.

BENTON, CARL W. (1948)----------Instructor in Physical Education
B.S., University of California at Los Angeles; M.S., University of Southern California. On Military Leave February, 1951.

BIRCH, AILEEN J. (Mrs. C. E.) (1949)----------Instructor in Education
A.B., San Diego State College; graduate study at Claremont College.

BLOCK, EDWARD A. (1946)------------Associate Professor of English
A.B., M.A., Ph. D., University of California.

BRITTAN, MARTIN R. (1950)------------Instructor in Zoology
A.B., San Jose State College; Ph. D., Stanford University.

BROADBENT, HARRY H. (1949)------------Assistant Professor of Physical Education
A.B., University of Oklahoma; M.S., University of Pennsylvania.

BROOKS, BAYLOR (1931)------------Assistant Professor of Geology
B.A., Stanford University. Two years graduate study at University of Arizona and Stanford University.

BROWN, ELIZABETH McPIKE (Mrs. L. P.) (1926)------------Professor of French
Ph.B., M.A., Ph.D., University of Chicago; one year graduate study at the Sorbonne, Paris, France; Certificat d'Etudes Françaises; Diplôme de l'Association Générale de Phonétique, Paris, France; Officier d'Académie.

BROWN, EUGENE P. (1947)------------Associate Professor of Accounting
B.S., Southeastern Teachers College; B.A.,M.A., University of Oklahoma. Two years graduate study at University of Chicago, University of Southern California and University of Mexico.

BROWN, LESLIE PARKER (1922)------------Professor of Spanish and French
B.A., Yale College; M.A., Harvard University; Ph.D., University of Southern California.

BRUBECK, HOWARD R. (1950)------------Associate Professor of Music
B.A., San Francisco State College; M.A., Mills College.

BRUNER, WILLIAM S. (1948)------------Assistant Professor of English
B.S., University of Virginia; M.A., Claremont College.

BRYDEGAARD, MARGUERITE A. (Mrs. H.) (1936)-Associate Professor of Education
A.B., San Diego State College; M.A. and graduate study at Claremont College.

CADE, C. MARSHALL (1951)------------Lecturer in Engineering
B.S., Michigan Agricultural College; M.A., Michigan State College. Licensed Engineer in Civil Engineering.

* CAMERON, ROY ERNEST (1929)------------Professor of Economics
A.B., Ph.D., University of California.

CAMPBELL, LOIS B. (1947)------------Assistant Professor of Education
A.B., University of California; M.A., Teachers College, Columbia University.

CARLSON, HILDING B. (1948)
Coordinator, Personnel Services; Professor of Psychology
Ph.B., M.S., Ph.D., University of Chicago.

CARLSON, THORSTEN R. (1948)
Principal of Campus Laboratory School; Associate Professor of Education
B.E., St. Cloud State Teachers College; M.A., Ph.D., University of Minnesota.

CAVE, MARY F. (1946)------------Assistant Professor of Physical Education
B.S., University of North Dakota. Graduate study at Bennington College and University of California at Los Angeles.

CHADWICK, LEONARD E. (1949)------------Assistant Professor of Economics
B.S. and two and one-half years graduate study at the University of California.

COMIN, NORITA (1949)------------Acting Assistant Professor of Home Economics
B.S., University of Minnesota.

CORBETT, KATHERINE E. (1921)------------Associate Professor of Education
B.Pd., Michigan State Normal College; B.S., A.M., Teachers College, Columbia University.

CORRIGAN, ROBERT F. (1947)------------Assistant Professor of Speech Arts
A.B., University of Michigan; M.A., University of Iowa.

CROUCH, JAMES ENSIGN (1932)------------Professor of Zoology
B.S., M.S., Cornell University; Ph.D., University of Southern California.

CUNKLE, ELIZABETH C. (Mrs. L.) (1948)------------Junior Librarian
A.B., University of California; B.S. in L.S., Columbia University. Graduate study University of California.

CUNNINGHAM, CORNELIUS C. (1947)------------Professor of Speech Arts
A.B., Beloit College; M.A., Northwestern University; Ph.D., University of Iowa.

DEBRECHT, EUGENE F. (1949)
Coordinator of Extension Services; Assistant Professor of Marketing
A.B., San Francisco State College; M.A., Stanford University. On military leave, April, 1951.

---

* On leave Semester II.

DEPUTY, ERBY CHESTER (1931)------------------------Professor of Education
A.B., University of Denver; A.M., Ph.D., Columbia University.

DICKHAUT, FLORENCE LILLIAN SMITH (Mrs. C. A.) (1917)--Professor of English
A.B., Northwestern University; M.A., University of Chicago.

DIRKS, JOHN H. (1947)-------------------------------Assistant Professor of Art
A.B., San Diego State College. Graduate study at University of Southern California.

EAGLE, JOHN E. (1946)------------------------Associate Professor of Mathematics
B.S., Montana State College; M.A., Ed.D., Stanford University.

EARNEST, SUE W. (Mrs. L. E.) (1947)----------Associate Professor of Speech Arts
A.B., San Diego State College; M.A., Ph.D., University of Southern California.

EELLS, KENNETH W. (1949)------------------Associate Professor of Psychology
A.B., George Washington University; M.A., Ph.D., University of Chicago.

EVENSON, PATTEE E. (1949)-----------------------Associate Professor of Music
B.S., University of Minnesota; M.M., University of Michigan; specialized training at Universities of Minnesota, Michigan, Southern California, and Eastman School of Music; private instruction in Paris, London and the United States.

FLYE, RICHARD C. (1950)---------------------------Assistant Professor of Music
B.A., University of Virginia; M.A., and Professional Diploma, Columbia University.

FOX, DOROTHEA B. (1951)-------------------------------------Junior Librarian
B.A., San Diego State College; B.S. in L.S., M.A., University of Southern California; graduate study at University of New Mexico.

FRIEDRICH, KURT (1949)-----------------------Assistant Professor of Education
A.B., Columbia College; M.A., Columbia University; Ed.D., Columbia Teachers College.

GELDREICH, EDWARD W. (1947)---------------Assistant Professor of Psychology
A.B., M.A., University of Cincinnati; Ph.D., University of Chicago.

GENERALES, MINOS D. (1949)-------------Assistant Professor of Political Science
Degree in Law and Political Science, including six years of graduate study at the University of Athens, University of Paris Law School, and Institute of International Studies.

GERMANN, LULA (1926)--------------------------------------Senior Librarian
B.S., State Teachers College, Hays, Kansas.

GIBSON, ERNEST DANA (1947)----------Associate Professor of Business Education
Secretarial and Office Management
B.S., University of Minnesota; M.A., Colorado State College of Education; Ed.D., New York University.

GJERDE, CLAYTON M. (1948)-------------------Assistant Professor of Education
A.B., Augsburg College; M.A., Ph.D., University of Minnesota.

GLEASON, JOHN M. (1930)--------------------Associate Professor of Mathematics
A.B., University of California at Los Angeles; M.A., University of California. Two years graduate study at University of Southern California, University of California at Los Angeles and Claremont Colleges.

GRISIER, DONALD W. (1951)------------------Assistant Professor of Education
B.S., Bowling Green State University; M.A., and two years of graduate study at Teachers College, Columbia University.

GULICK, SIDNEY L., JR. (1945)---------------------------Professor of English
B.A., M.A., Oberlin College; Ph.D., Yale University.

HAMMACK, ISABELLA STEWART (1936)--------Associate Professor of Education
A.B., M.A., and one year graduate study at the University of California.

HARCLEROAD, FRED F., JR. (1946)------------Chairman, Division of Education;
Associate Professor of Education
A.B., M.A., Colorado State College of Education; Ph.D., Stanford University.

HARRINGTON, AWONA B. (1949)--------------------------------Junior Librarian
A.B. and one year graduate study at San Diego State College; M.S. in L.S., University of Southern California.

HARRINGTON, NEIL J. (1948)--------------------------Instructor in Chemistry
B.S., Monmouth College; one year of graduate study at DePaul University and Northwestern University. On military leave, October, 1950.

HARRIS, VINCENT C. (1950)-----------------Assistant Professor of Mathematics
B.A., M.A., Ph.D., Northwestern University.

HARVEY, A. R. (1949)------------------------Assistant Professor of Mathematics
B.S., Bates College; A.M., Ph.D., Harvard University.

HARVEY, DOROTHY R. (Mrs. F. A.) (1924)----------Assistant Professor of Botany
A.B., San Diego State College; M.A., University of Southern California. One year graduate study at University of Southern California and University of Chicago.

HARWOOD, ROBERT DANIEL (1928)----------Chairman, Division of Life Science; Professor of Zoology
B.A., Pomona College; Ph.D., Cornell University.

HASKELL, HARRIET (1940, except 1943-45)---------Assistant Professor of English
A.B., Mills College; M.A., Bryn Mawr College; Ph.D., University of Wisconsin.

HAVER, CLARE L. (Mrs. R.) (1949)----------------------Instructor in Education
A.B., Western Washington College of Education.

HAYNES, GERALDINE K. (Mrs. L.) (1931)---------------------Senior Librarian
A.B., Indiana Central College; B.S. in L.S., University of Illinois.

HOUSEMAN, RICHARD A. (1948)---------------Associate Professor of Education
B.S., Central Michigan College of Education; M.A., Ed.D., Teachers College, Columbia University.

HOUSER, LOWELL (1938)------------------------------Associate Professor of Art
Diploma, Chicago Art Institute. Five years' special study in Mexico, Yucatan, Haiti, and New York City.

HOWARD, FRANCIS J. (1950)------------------------------Instructor in Physics
A.B., University of California at Los Angeles; M.S., University of California (Scripps Institution of Oceanography).

HUGHES, DONALD H. (1950)--------------------Assistant Professor of Education
B.A., Hastings College; M.Ed.; Ph.D., University of Colorado.

HUNTER, JAMES J., JR. (1946)------------Executive Dean; Professor of Education
A.B., Cornell University; M.S., Ph.D., Syracuse University.

ISENSEE, ROBERT W. (1948)--------------------Assistant Professor of Chemistry
A.B., Reed College; M.A., Ph.D., Oregon State College.

JACKSON, EVERETT GEE (1930)-------------------------------Professor of Art
A.B., San Diego State College; M.A., University of Southern California. Three years special study in Mexico.

JACOBSEN, HELEN M. (1946)---------------------------------Senior Librarian
A.B., San Diego State College; B.S. in L.S., University of California.

JOHNSON, FRANK LOUIS (1939)-------------------Associate Professor of English
A.B., M.A., University of Minnesota; Ph.D., University of Wisconsin.

JONES, KENNETH K., JR. (1948)---------------Assistant Professor of Speech Arts
B.S., Northwestern University; M.A., Stanford University.

JOSEPH, LIONEL (1947)-------------------------Associate Professor of Chemistry
B.S., St. Louis University; M.S., Ph.D., Washington University.

JULIAN, JAMES L. (1951)----------Publications Manager; Lecturer in Journalism
B.S., B.A., University of Houston; M.A., University of Texas; graduate study at Universities of Iowa and Miami.

KALBFELL, DAVID C. (1948)----------------------Assistant Professor of Physics
A.B., University of California at Los Angeles; M.A., Ph.D., University of California. Registered Electrical Engineer

KAPLAN, OSCAR J. (1946)---------------------Associate Professor of Psychology
B.A., M.A., University of California at Los Angeles; Ph.D., University of California.

KASCH, FREDERICK W. (1948)----------Assistant Professor of Physical Education
B.S., M.S., University of Illinois; graduate study at New York University and University of Illinois.

KEENEY, JOSEPH SUMNER (1933)-------------------------Professor of English
A.B., Yale University; M.A., Ph.D., University of California.

KENNEDY, CHESTER B. (1937)-------------------Associate Professor of English
A.B., Chico State College; M.A., Ph.D., Stanford University.

KIDWELL, WILLIAM M. (1949)------------Placement Officer; Assistant Professor of Psychology
B.A., M.S., University of Oregon; Ed.D., Stanford University.

KITZINGER, ANGELA M. (1945)----------Associate Professor of Health Education
A.B., Barnard College, Columbia; M.A., Teachers College, Columbia University. Additional work at Central School of Hygiene and Physical Education and at Folk High School, Ollerup, Denmark.

KLAPP, ORRIN E. (1948)------------------------Assistant Professor of Sociology
M.A., Ph.D., University of Chicago.

KOESTER, GEORGE A. (1950)--------------------Assistant Professor of Education
B.S., Midland College; M.A., University of Colorado; Ph.D., University of Minnesota.

LAMDEN, CHARLES W. (1946)----------Dean of Educational Services and Summer Sessions; Professor of Accounting and Business Management
A.B., M.A., University of California at Los Angeles; Ph.D., University of California. Certified Public Accountant.

LAURITSEN, WILLIAM H. (1947)------------------Professor of Health Education
A.B., M.A., University of Nebraska; Ph.D., Ohio State University.

LEBARRON, EVANGELINE O. (Mrs. H. E.) (1946, except 1948-49)
Assistant Professor of Secretarial Management
B.A., B.S., University of Iowa; B.A., Sioux Falls College; one and one-half years graduate study at Claremont Colleges, Universities of Southern California, Minnesota and of Hawaii.

LEIB, JULIUS (1938)-----------------------------------Associate Professor of Music
Three years special study at Leipzig Conservatory.

LEIFFER, DONALD B. (1948)--------------Coordinator of Public Administration; Professor of Political Science
A.B., University of California at Los Angeles; M.A., Ph.D., Harvard University.

LEMME, MAURICE M. (1948)------------------Associate Professor of Mathematics
A.B., Oakland College; M.A., Indiana University; Ph.D., Purdue University.

LEONARD, CHARLES B. (1921)------------------------------Professor of History
A.B., M.A., Ph.D., University of California.

LESLEY, LEWIS B. (1924)-------------------------------------Professor of History
A.B., Stanford University; M.A., Ph.D., University of California.

LINLEY, JAMES M. (1945)-----------------------Assistant Professor of Education
Ph.B., University of Chicago; M.S., Ph.D., University of Southern California.

LOCKMAN, EVELYN (1948)------------Assistant Professor of Physical Education
B.A., Vanderbilt University; M.A., George Peabody College; graduate study at New York University, and University of Wisconsin; three years special study in dance.

LUCE, LAWRENCE W. (1949)----------------Assistant Professor of Industrial Arts
B.S., Illinois Wesleyan University; M.S., Iowa State College.

LUCIO, WILLIAM H. (1939)-----------------Coordinator of Elementary Education
A.B., M.A., Ph.D., University of California. Professor of Education

MADDEN, RICHARD (1939)---Chairman of Graduate Studies; Professor of Education
A.B., Nebraska (Peru) State Teachers College; M. A., Ph.D., Columbia University.

MARCHAND, ERNEST L. (1946)---------------------------Professor of English
A.B., M.A., University of Washington; Ph.D., University of Wisconsin.

McBLAIR, WILLIAM (1948)----------------------Assistant Professor of Zoology
A.B., San Diego State College; two years of graduate work at the University of California.

McCLINTIC, JOSEPH O. (1946)----------------------------Professor of Economics
A.B., Central College; A.M., University of Missouri; Ph.D., University of Wisconsin.

McCOLLOM, IVAN N. (1946)----------------------------Professor of Psychology
A.B., Central Washington College of Education; B.S., M.S., University of Oregon; Ed.D., Colorado State College of Education.

McLONEY, WIRT L. (1949)------------------------Instructor in Physical Science
A.B., Western State College; M.A., Colorado State College of Education.

MENDENHALL, MARY (1939)------------Dean of Women; Professor of Philosophy
B.A., University of Colorado; M.A., University of Southern California; Ph.D., Yale University.

MERRILL, JOHN E. (1946)-------------------------Assistant Professor of History
A.B., Stanford University; A.M., Harvard University. Two years graduate study at Stanford University.

MERZBACHER, CLAUDE FELL (1947)------Assistant Professor of Physical Science
B.S., University of Pennsylvania; M.A., Claremont Graduate School. Certificat d'Etudes Francaises. Licensed Professional Chemical Engineer.

MESSIER, LEONARD N. (1946)---------------------Assistant Professor of French
A.B., San Diego State College; M.A., Ph.D., University of California.

MILNE, DAVID S. (1946)---------Associate Professor of Sociology
A.B., University of California at Los Angeles; M.A., University of Southern California; Ph.D., University of Chicago.

MOE, CHESNEY R. (1931)---------Professor of Physics
A.B., M.A., Stanford University; Ph.D., University of Southern California. Registered Mechanical Engineer. On military leave, April, 1951.

MORGAN, CHARLES (1949)---------Instructor in Engineering
M.E., Stevens Institute of Technology; M.S., University of California. Registered Professional Mechanical Engineer.

MYERS, MABEL A. (1946)---------Associate Professor of Bacteriology
A.B., M.A., Pomona College; Ph.D., Cornell University.

NASATIR, ABRAHAM PHINEAS (1928)---------Professor of History
A.B., M.A., Ph.D., University of California.

* NICHOLS, AMBROSE R., JR (1939)---------Professor of Chemistry
B.S., University of California; Ph.D., University of Wisconsin.

NIEBAUER, RUBY R. (1949)---------Assistant Professor of Education
B.S., M.S., University of Wisconsin.

NORLAND, CALVERT E. (1947)---------Assistant Professor of Zoology
A.B., Pomona College; M.S., University of California. Graduate study at Claremont Colleges.

OLSON, ANDREW C., JR. (1946)---------Assistant Professor of Zoology
A.B., San Diego State College; M. S., University of Idaho; graduate study at Oregon State College.

OSBORN, CLARENCE G. (1928-29 and 1937)---Chairman, Division of Social Sciences; Professor of History and Political Science
A.B., A. M., Ph.D., Stanford University.

PEIFFER, HERBERT C., JR. (1937)---------Dean of Students
Professor of Psychology and Guidance
A.B., University of California at Los Angeles; M.A., Ph.D., Stanford University.

* PEREZ, ROSE MARIE (1948)---------Junior Librarian
A.B., San Diego State College; B.S. in L.S., University of Southern California; M.A., University of Chicago.

PERRY, FAY V. (Mrs. J. M.) (1936)---------Coordinator of Guidance for Provisional Students; Professor of Sociology
A.B., San Diego State College; M.A., Ed.D., University of Southern California.

PETERSON, CHARLES E. (1921)------Dean of Men; Professor of Physical Education
A.B., San Diego State College; M.A., Claremont Colleges.

PFAFF, PAUL LEWIS (1931)---------Associate Professor of Speech Arts
A.B., Stanford University; M.A. and two years graduate study at the University of Southern California.

PHELPS, LOIS HIGGS (Mrs. P.) (1950)---------Junior Librarian
A.B., San Jose State College.

PHILLIPS, GEORGE L. (1947)---------Assistant Professor of English
A.B., Dartmouth College; M.A., Harvard University; Ph.D., Boston University.

PHILLIPS, KENNETH (1950)---------Associate Professor of Industrial Arts
B.S., State College for Teachers (Buffalo); M.A., Ph.D., Ohio State University.

PHILLIPS, WALTER THOMAS (1927)---------Professor of Spanish
A.B., University of Washington; M.A., Stanford University; Ph.D., University of Southern California.

POST, LAUREN CHESTER (1937)---------Professor of Geography
A.B., M.A., Ph.D., University of California.

POVENMIRE, E. KINGSLEY (1946)---------Associate Professor of Speech Arts
B.S., Ohio State University; M.F.A., Yale University.

PRESTON, DUDLEY A. (1948)---------Assistant Professor of Botany
B.S., Washington State College; M.S., Ph.D., University of Minnesota.

PROUTY, HELEN L. (1950)---------Assistant Professor of Education
B.S., University of Nebraska; M.A., Ph.D., University of California.

RAGEN, KATHERINE M. (1947)---------Associate Professor of History
A.B., Penn College; M.A., Bryn Mawr College; Ph.D., University of Wisconsin.

---

* On leave.

RICHARDSON, M. BRUCE (1948)______________Associate Professor of Engineering
A.B., Aeronautical Engineer, Stanford University. Registered Mechanical Engineer.

RICHARDSON, ROBERT W. (1939, except 1942-48)_________Professor of Geography
A.B., Ph.D., University of California.

RIDOUT, LIONEL U. (1946, except 1949-50)__________________Instructor in History
A.B., San Diego State College; M.A., and two years graduate study at the University of California.

ROBERTS, ELLIS E. (1949)___________________________________Instructor in Geology
B.S., Michigan College of Mining and Technology; M.S., California Institute of Technology; Ph.D., Stanford University.

ROBINSON, DUDLEY HUGH (1928)________Chairman, Division of Physical Science;
Professor of Chemistry
B.S., Louisiana State University; M.S., State University of Iowa; Ph.D., University of Southern California. Registered Chemical Engineer.

* ROBINSON, EVELYN L. (1946)__________Assistant Professor of Physical Education
B.S., Mary Washington College of the University of Virginia; M.S., University of Southern California.

ROGERS, SPENCER LEE (1930)________________________Professor of Anthropology
A.B., San Diego State College; M.A., Claremont Colleges; Ph.D., University of Southern California.

ROHFLEISCH, KRAMER J. (1947)___________________________Professor of History
A.B., M.A., Ph.D., University of California.

ROST, NORMAN (1951)_________________________________________Lecturer in Music
B.M., University of Michigan.

ROWE, ROBERT D. (1946)________________________________Professor of Chemistry
A.B., Ph.D., Stanford University.

RUJA, HARRY (1947)____________Assistant Professor of Philosophy and Psychology
A.B., University of California at Los Angeles; M.A., University of Chicago; Ph.D., Princeton University; one year postdoctoral study at the University of California at Los Angeles.

RUOCCO, ILSE H. H. (Mrs. L.) (1934)_________________Associate Professor of Art
B.E., University of California at Los Angeles; M.A., Columbia University.

RYAN, FREDERICK L. (1946)___________________________Professor of Economics
B.S., Tufts College; Ph.D., University of California.

SAMPLES, HOWELL GORDON, JR. (1950)_______________________Junior Librarian
A.B., University of Georgia; B.S. in L.S., George Peabody College for Teachers.

SCANLAN, RALPH J. (1952)________________________________Lecturer in Economics
A.B., M.A., Ph.D., University of California. Deceased May 1, 1952.

SCHALLES, FRANCES IRENE (1950)__________________________Junior Librarian
A.B., San Diego State College. One year graduate study.

SCHRUPP, MANFRED H. (1948)_________________Assistant Professor of Education
B.S., M.Ed., Ph.D., University of Minnesota.

SCHUNERT, JIM R. (1948)___________________Coordinator of Secondary Education;
Associate Professor of Education
B.S., M.A., Ph.D., University of Minnesota.

SCHUTTE, WILLIAM H. (1947)___________Assistant Professor of Physical Education
B.S., University of Idaho; M.S., University of Southern California.

SCHWOB, MARION L. (Mrs. W. E.) (1934)_Associate Professor of Physical Education
B.A., State University of Iowa; M.S., University of Southern California.

SCOTT, FRANK L. (1947)_________________Assistant Professor of Physical Education
A.B., Grinnell College; M. A., University of Michigan; additional study at the University of Michigan.

SCOTT, HELEN M. (1950)___________________________________Instructor in Education
A.B., M.A., Colorado State College of Education.

SELLMAN, HUNTON D. (1946)_________________________Professor of Speech Arts
B.S., Purdue University; M.S., University of Arizona. Three and one-half years graduate study at University of California, University of North Carolina and Yale University.

SHANNON, FLORENCE S. (Mrs. E. L.) (1933)
Assistant Professor of Physical Education
A.B., University of California; M.S., University of Southern California.

---

* On leave.

SHELAR, EUGENE (1949)--------------------------Assistant Professor of Zoology
B.S., State Teachers College at Slippery Rock, Pennsylvania; M.S., Ph.D., Cornell University.

SHIELDS, ALLEN E. (1949)---------------------Assistant Professor of Philosophy
A.B., University of California; M.A., Ph.D., University of Southern California

SHOUSE, CLAUDE F. (1946)----------------------Assistant Professor of English
A.B., Georgetown College; M.A., University of Kentucky; one and one-half years graduate study at University of Pittsburgh and University of Southern California.

SILVERNAIL, CHESTER J. (1949)---------------Assistant Professor of Astronomy
A.B., San Diego State College; M.A., Claremont Graduate School.

SKOLIL, LESTER L. (1951)--------------------------Assistant Professor of Physics
A.B., Doane College; M.A., University of Nebraska; Ph.D., University of California.

* SMART, KEITH L. (1949)------------------------------Instructor in Bacteriology
A.B., M.A., University of California.

SMITH, CHARLES ROBERTS (1933)--------------------Coordinator of Athletics;
Assistant Professor of Physical Education
A.B., San Diego State College; M.S., University of Southern California.

SMITH, CLIFFORD EDWARD (1937)---------------------Professor of Astronomy
A.B., Carleton College; M.A., Swarthmore College; Ph.D., University of California.

SMITH, DEANE FRANKLIN (1939)------------------Associate Professor of Music
B.M., M.M., Northwestern University.

SMITH, LOUIS E., JR. (1946)----------------------Associate Professor of Physics
A.B., San Diego State College; Ph.D., University of Washington.

SORENSON, GEORGE N. (1946)------------------Chairman, Division of Fine Arts;
Associate Professor of Art
A.B., San Diego State College; M.A., University of Southern California; graduate study at University of California and University of Minnesota.

SPANGLER, JOHN A. (1946)-------------------Associate Professor of Chemistry
A.B., Ph.D., West Virginia University.

SPORTSMAN, CHARLES C. (1947)-------Associate Professor of Physical Education
B.S., North Texas State College; M.S., and one year additional study at the University of Southern California.

SPRINGSTON, CHRISTINE (1930)------------------Associate Professor of Music
B.A., B.M., University of Redlands; M.A., University of Washington. Diplomée d'execution, Conservatoire Americain, Fontainebleau, France.

STEINMETZ, HARRY C. (1930)-----------------Associate Professor of Psychology
A.B., University of California; M.A., University of Southern California; Ph.D., Purdue University.

STONE, HAMILTON L. (1947)-----------------Assistant Professor of Engineering
B.S., U. S. Naval Academy. Two and one-half years of graduate study. Registered Mechanical Engineer.

STONE, JOHN PAUL (1930)----------Head Librarian; Professor of Library Science
B.S., Northwest Missouri State Teachers College; B.S., M.S., University of Illinois; Ph.D., University of Chicago.

STORM, ALVENA (Mrs. Eugene) (1926)----------Associate Professor of Geography
A.B., M.A., University of California.

STOUGH, MORROW F. (1950)-------------------Assistant Professor of Education
A.B., Wittenberg College; M.A., University of Pennsylvania; Ph.D., University of California.

STOVALL, HARRIET B. (Mrs. S. L.) (1925)---------------------Senior Librarian
Graduate, Berkshire Athenaeum, Massachusetts.

STRAUB, LURA LYNN (1948)-------Assistant Professor of Secretarial Management
A.B., Jamestown College; M.C.S., Indiana University; graduate study at University of Wyoming and University of Denver.

SUTTON, JOSEPHINE M. (1947)-------------------------------Junior Librarian
A.B., University of Oklahoma.

SWIGGETT, JEAN D. (1946)---------------------------Associate Professor of Art
A.B., San Diego State College; M.F.A., University of Southern California; graduate study at Claremont Colleges.

---

* On leave.

TALBOY, RUTH A. (1947)----------------Assistant Professor of Home Economics
B.S., Iowa State College; M.A., Stanford University.

TAYLOR, JAMES W. (1950)------------------------------Instructor in Geography
A.B., Northwestern State College; M.A., Louisiana State University.

TAYLOR, KENNETH M. (1949)--------------------Assistant Professor of Zoology
A.B., M.A., Ph.D., University of California.

TAYLOR, MERREL A. (1946)---------------------Assistant Professor of Zoology
A.B., Indiana University; B.S., M.S., University of Michigan.

TERHUNE, JOHN A. (1946)----------------------------------Lecturer in Physics
B.S., U. S. Naval Academy; M.S., Harvard University.

TERRY, WILLIAM L. (1946)----------Chairman, Division of Health, Recreation, and Physical Education; Lecturer in Physical Education
A.B., Western Kentucky Teachers College; M.S., Indiana University; two years of additional study at University of Kentucky, University of Illinois, and Columbia University.

THEOBALD, JOHN R. (1946)-------------------------------Professor of English
B.A., St. Catherine's College, Oxford University; M.A., Mansfield College, Oxford University; Ph.D., University of Iowa.

TIDWELL, JAMES N. (1947)---------------------------------Professor of English
A.B., Simmons University; M.A., University of Oklahoma; Ph.D., Ohio State University.

TOLLEFSEN, DOROTHY J. (1946)-------Assistant Professor of Physical Education
A.B., M.A., University of California.

TORBERT, FRANCES B. (Mrs. H.) (1937)--------Associate Professor of Marketing
A.B., Stanford University; M.A., University of Southern California; one year graduate study at Stanford University.

TRAIL, MABEL COY (1935)---------------------------------Professor of English
A.B., Parsons College; M.A., State University of Iowa; Ph.D., University of Southern California.

TREAT, WOLCOTT C. (1950)-------------------Assistant Professor of Psychology
A.B., Harvard College; A.M., Harvard University; Ph.D., Stanford University.

TUCKER, GORDON H. (1945)-------------------------------Professor of Zoology
B.S., M.S., University of South Carolina; Ph.D., University of North Carolina.

TURNER, MERLE B. (1950)--------------------Assistant Professor of Psychology
A.B., Willamette University; M.A., Stanford University; Ph.D., University of Colorado.

VOEKS, VIRGINIA W. (1949)-------------------Assistant Professor of Psychology
B.S., M.S., University of Washington; Ph.D., Yale University.

WALBA, HAROLD (1949)--------------------------------Instructor in Chemistry
B.S., Massachusetts State College; Ph.D., University of California.

WALKER, DONALD E. (1949)-----------------------------Instructor in Sociology
A.B., M.Th., University of Southern California; two years graduate study at Stanford University.

WALLING, CURTIS R. (1931)-------------------Associate Professor of Engineering
A.B., E.E., Stanford University; one and one-half years of graduate study at Stanford University and the University of Southern California. Registered Electrical Engineer.

WATENPAUGH, FRANK M. (1935)--------------Associate Professor of Accounting
A.B., Pomona College; M.A., University of Southern California. Two years graduate study at University of Southern California and University of Oregon. Public Accountant.

WATSON, DONALD R. (1939)-----Dean of Instruction; Professor of Physical Science
A.B., B.S., A.M., Ed.D., University of Southern California.

WEBB, CHARLES R., JR. (1949)-------------------Assistant Professor of History
A.B., M.A., University of California; M.A., Ph.D., Harvard University.

WEST, EDNA A. (1948)--------------Assistant Professor of Secretarial Management
B.A., Santa Barbara State College; M.A., Claremont Colleges; graduate study at Claremont Colleges, Columbia University and Oregon State College.

WHITE, ALFRED E. (1946)---------Admissions Officer; Coordinator of Educational Research; Associate Professor of Guidance
A.B., M.A., University of California; Ed.D., Stanford University.

WILCOX, ROBERT F. (1950)---------------Assistant Professor of Political Science
A.B., M.A., Stanford University; M.A., Columbia University; Ph.D., Stanford University.

WIMER, ARTHUR C. (1950)------Lecturer in Journalism
B.Lit., Columbia University; M.A., University of Iowa.

WOLF, ERNEST M. (1947)------Assistant Professor of German and Spanish
Study at the Universities of Berlin, Paris, Muenster, Cambridge and Bonn. Ph.D., University of Bonn.

WRIGHT, WILLIAM H. (1921)------Chairman, Division of Business; Professor of Accounting and Business Management
B.S., M.A., University of California; Ph.D., University of Southern California. Public Accountant.

ZIEGENFUSS, GEORGE (1948)------Assistant Professor of Physical Education
B.A., University of Washington; M.A., Ed.D., Teachers College, Columbia University.

## ASSISTANT INSTRUCTORS

BURKHARDT, FREDERIC S.------Assistant in Education
A.B., Dartmouth College.

WILLIAMS, CURTIS E.------Assistant in Bacteriology
A.B., San Diego State College.

## LECTURERS

BACK, GILBERT (1950)------Lecturer in Music
Professional musician.

BARNARD, MARY J. (1952)------Lecturer in Education
San Diego City Schools.

BLAKE, DEAN (1927)------Lecturer in Meteorology
Meteorologist, U. S. Weather Bureau.

BROWN, T. MALCOLM (1952)------Lecturer in Education
San Diego City Schools.

BRUNS, STANFORD (1951)------Lecturer in Accounting
Public Accountant.

BURDICK, HUNTINGTON (1951)------Lecturer in Music
Professional musician.

DE JULIEN, LORENZ F. (1949)------Lecturer in Marketing
Self employed.

GELCHER, JOSEPH (1946)------Lecturer in Insurance
Insurance underwriter.

GOODWIN, JOHN H. (1947)------Lecturer in Insurance
Insurance broker.

HAWKINS, GEORGE L. (1952)------Lecturer in Marketing
Barnes Chase Co.

HUFF, GEORGE D., M.D. (1939)------Lecturer in Health and Hygiene
Practicing physician.

LINDSLEY, BYRON F. (1947)------Lecturer in Commercial Law
Attorney at Law.

LLOYD, STANLEY J., M.D. (1950)------Lecturer in Bacteriology
Practicing physician.

MULLENIX, CARLOS W. (1950)------Lecturer in Music
Professional musician.

ROOKER, JAMES R. (1952)------Lecturer in Bacteriology
B.S., Clark Memorial College.

STANIFORTH, ROBERT O. (1948)------Lecturer in Commercial Law
Swing & Scharnikow, Attorneys.

STORR, SHERMAN (1952)------Lecturer in Music
Professional musician.

SYLVESTER, HELEN K.------Lecturer in Education
Principal, Euclid School. A.B., San Diego State College.

TROGE, RALPH F.------Lecturer in Education
Principal, Woodrow Wilson Junior High School. Ed.D., University of Oregon.

WILSON, JAMES F. (1951)------Lecturer in Education
San Diego City Schools.

## DIVISION OF AIR SCIENCE AND TACTICS

MOSSE, CHARLES E., LT. COL. (1951)-----------Chairman, Division of Air Science and Tactics; Commanding Officer and Professor of Air Science and Tactics
KEHRER, KENNETH, MAJOR (1951)-----------Assistant Professor of Air Science and Tactics
STROMBERGER, HERMAN G., MAJOR (1951)----Assistant Professor of Air Science and Tactics
LEWIS, WILLIAM M., CAPTAIN (1951)----------Assistant Professor of Air Science and Tactics
PUGH, LLOYD R., JR., CAPTAIN (1951)---------Assistant Professor of Air Science and Tactics
DUPONT, FORREST R., 1ST LT. (1951)----------Assistant Professor of Air Science and Tactics
HERTEL, FRITZ S., 1ST LT. (1951)--------------Assistant Professor of Air Science and Tactics
BLACKSTOCK, WILLIAM, JR., M/SGT. (1951)----------Instructor (NCOIC Supply)
BOWMAN, WILLIAM L., S/SGT. (1952)-------------------------------Senior Clerk
HAWBAKER, JAMES O., M/SGT. (1951)-------------------------------Instructor
IVIE, FRANKLIN P., S/SGT. (1951)---------------Instructor (Asst. Supply NCO)
JOHNSTON, VIRGIL A., M/SGT. (1951)-------------Senior Clerk (Instr. in A & L)
SCHOEPFER, EDMUND A., M/SGT. (1951)---------------------------Sgt. Major

## RETIRED FACULTY

(Date following name indicates date of retirement)

HARDY, EDWARD L. (1935)----------------------------------President Emeritus
AULT, JESSE W. (1948)----------------Dean of Education; Professor of Education
BAIRD, OSCAR (1951)----------------------------------------Professor of Physics
BELL, GERTRUDE S. (1938)------------------------------Professor of Psychology
HAMMACK, EDITH CHASTAIN (1950)------------Associate Professor of Education
JOHNSON, MYRTLE (1946)----------------------------------Professor of Biology
KELLEY, GENEVIEVE (1949)----------------------------------Senior Librarian
LIVINGSTON, GEORGE R. (1949)----------------------Professor of Mathematics

# CALENDAR 1953-1954

## SUMMER SESSIONS, 1953

Term I (6 weeks) June 29-August 7
Term II (3 weeks) August 10-August 28

## FALL SEMESTER, 1953-1954

| | |
|---|---|
| July 18 | Qualifying examinations for entering students (8.15 a.m.-3 p.m.) |
| August 1 | Applications for admission must be filed on or before this date. |
| August 24 | Qualifying examinations for entering students (8.15 a.m.-3 p.m.) (Last opportunity to qualify for admission to Fall semester). |
| August 24 | All applications and transcripts must be on file by this date to avoid late registration. |
| September 11, 14, 15, 16 | Testing and advising program. All new students are required to attend. |
| September 11 | General Culture test, required of all transfer students with 45 units or more who are candidates for secondary school credentials. (1-4.30 p.m.) |
| September 16 | All applications and transcripts for students applying for late registration must be on file by this date. |
| September 17-18 | Registration and payment of fees. Reservation of classes. (For evening program, see Extended Day bulletin). |
| September 18 | Late registration fee effective at close of registration schedule. (See time as announced in the "Class Schedule and Instructions for Registration, Semester I, 1953-54). (For evening program, see Extended Day bulletin). |
| September 19 | Fundamentals test, required of all transfer students with 15 units or more who are candidates for Teacher Education (8.30 a.m.-12 m.) |
| September 21 | Classes begin. |
| September 25 | Last date for registration and payment of fees for students registering late. |
| September 28, 29, 30 | File registration books. Late filing fee effective after 4.30 p.m., September 30. |
| September 29 | Applications for admission to Teacher Education, Little Theatre, 11 a.m. |
| October 2 | Last date for late filing of registration books and completion of all registration requirements. |
| October 5 | Last date to apply for refunds. |
| October 9 | Last date for filing applications for mid-year graduation. |
| October 23 | End of first six-week period. Deficiency notices due. |
| November 6 | Last date for withdrawal from classes without penalty of class standing. |
| November 11 | Holiday—Armistice Day. |
| November 26-27 | Thanksgiving recess. |
| December 4 | End of second six-week period. Deficiency notices due. |
| December 7 | File applications for June or summer graduation. |
| December 18 | Last date for withdrawal from classes for the semester. |
| December 18 | Last day of classes before Christmas recess. |
| December 21-January 1 | Christmas recess. |
| January 4 | Classes resume. |
| January 21-28 | Semester examinations. |
| January 29 | Fall semester ends. |

## SPRING SEMESTER, 1953-1954

| | |
|---|---|
| January 4 | Applications for admission to the Spring semester must be filed on or before this date. |
| January 15 | All applications and transcripts must be on file by this date to avoid late registration. |
| January 16 | Qualifying examinations for entering students (8.15 a.m.-3 p.m.). (Last opportunity to qualify for admission to freshman standing for the Spring semester.) |
| February 1 | General Culture test, required of all transfer students with 45 units or more who are candidates for secondary school credentials. (1-4.30 p.m.) |
| February 1, 2, 3 | Testing and advising program. All new students are required to attend. |
| February 3 | All applications and transcripts for students applying for late registration must be on file by this date. |
| February 4-5 | Registration and payment of fees. Reservation of classes. (For evening program, see Extended Day bulletin.) |
| February 5 | Late registration fee effective at close of registration schedule. (See time as announced in the "Class Schedule and Instructions for Registration, Semester II, 1953-54.) (For evening program, see Extended Day bulletin.) |
| February 6 | Fundamentals test, required of all transfer students with 15 units or more who are candidates for Teacher Education (8.30 a.m.-12 m.) |
| February 8 | Classes begin. |
| February 12 | Last date for registration and payment of fees for students registering late. |
| February 15, 16, 17 | File registration books. Late filing fee effective after 4.30 p.m., February 17. |
| February 16 | Applications for admission to Teacher Education, Little Theatre, 11 a.m. |
| February 19 | Last date for late filing of registration books and completion of all registration requirements. |
| February 22 | Holiday—Washington's Birthday. |
| February 23 | Last date to apply for refunds. |
| March 5 | Last date for filing applications for June or summer graduation. |
| March 12 | End of first six-week period. Deficiency notices due. |
| March 26 | Last date for withdrawal from classes without penalty of class standing. |
| April 9 | Last day of classes before Spring recess. |
| April 10-18 | Spring recess. |
| April 19 | Classes resume. |
| April 30 | End of second six-week period. Deficiency notices due. |
| May 14 | Last date for withdrawal from classes for the semester. |
| May 31 | Holiday—Memorial Day. |
| June 3-10 | Semester examinations. |
| June 11 | Spring semester ends. |
| June 11 | Commencement. |

## SUMMER SESSIONS, 1954

| | | |
|---|---|---|
| Term I | (6 weeks) | June 28-August 6 |
| Term II | (3 weeks) | August 9-August 27 |

# FEES AND EXPENSES

## PROBABLE EXPENSES FOR ONE SEMESTER

An estimate of the expense of attendance for one semester is given below. No estimate is made as to the cost of clothing, or other personal items, since these figures vary with the demands of the individual.

### A Partial Estimate of Expenses

One Semester

| | *Minimum* | *Maximum* |
|---|---|---|
| Fees | $24.00 | $31.50 |
| Books | 18.00 | 30.00 |
| Board and room | 275.00 | ---- |
| Transportation, lunches, incidentals | 20.00 | 60.00 |
| Miscellaneous | 5.00 | |

Before enrolling in college, the student should possess sufficient resources to meet the minimum expenses for one semester. A limited amount of clerical work in offices and in the library may be offered from time to time but ordinarily it is not sufficiently remunerative to reduce expenses materially.

### Enrollment Fees Payable at Time of Registration

Regular students (carrying more than 6 units):

Auditors pay same fees as students carrying courses for credit.

| | |
|---|---|
| Tuition | $6.50 |
| Materials and service | 7.50 |
| Total | $14.00 |

Limited students (carrying 6 units or less):

Auditors pay same fees as students carrying courses for credit.

| | |
|---|---|
| Tuition (one, two, or three units) | $5.25 |
| Materials and service | 2.25 |
| Total | $7.50 |
| Tuition (four, five, or six units) | $6.50 |
| Materials and service | 7.50 |
| Total | $14.00 |

**CORRECTION**
**Materials and Service**
**Fee Increased $1.00**
**since listing**

Student activity fee (not a state fee):

| | |
|---|---|
| Regular students | $10.00 |
| Limited students | 2.00 |

### Miscellaneous Fees

(Fees payable when service is rendered)

| | |
|---|---|
| Change of program | $1.00 |
| Failure to meet administratively required appointment or time limit | 2.00 |
| Evaluation of records for nonmatriculated students | 2.00 |
| Late registration | 2.00 |
| Transcript of record (first copy free) | 1.00 |
| R. O. T. C. deposit (unexpended portion is refundable) | 10.00 |

### Graduation Fees

| | |
|---|---|
| State teaching credentials (each credential) | $4.00 |
| Diploma | 1.00 |

The credential fee is collected through the college by cashier's check or post office money order made payable to the State Department of Education.

### Summer Session Fees

| | | |
|---|---|---|
| Tuition, each session | (Per unit) | $7.50 |
| Activity fee (not a state fee) | | 2.00 |

# THE COLLEGE

## FUNCTIONS OF THE STATE COLLEGES

The state colleges have three major functions, namely: (1) To help the individual student to develop a well-rounded and adjusted personality; (2) to promote in all students civic intelligence and competence; and (3) to create supplies of trained men and women to serve as teachers and officials in the elementary and secondary schools, to fill places of leadership in business and industry, and to transfer to graduate institutions to equip themselves to extend the frontiers of knowledge and to occupy the positions of leadership in various professions. In terms of publicly supported higher education, the state colleges and the university together make provision for the realization of all the essential objectives of higher education in our State.

To achieve their unique purposes the state colleges have developed and are improving offerings as follows:

1. Teacher education curricula for those students who plan to teach, supervise, or administer in the elementary school, the junior high school, and in secondary schools.
2. Preprofessional curricula.
3. Four-year curricula in such fields as business, industry, governmental services, homemaking, and social service.
4. General education for students who take work which leads toward the bachelor's degree or to the higher professions through graduate work.
5. Guidance services to assist the individual student to plan his educational program and to make his college and life adjustments.
6. Extension courses in appropriate fields.

The democratic controls exercised over the state colleges make them readily and effectively responsive to individual and community needs and encourage them continuously to make significant improvements in both curriculum and personal services. The state colleges are thus laboratories in which the facts and theories developed in research, in community living, and in daily association with students are reflected in an instructional program designed to provide educational services inherent in the principle of equality of opportunity.

## LOCATION AND ENVIRONMENT

Renowned as a winter resort with a mild but invigorating climate, San Diego has become equally famous for its cool summers. High cultural standards in art, music, literature, and science create a stimulating environment for a college. Many of these advantages are to be found in the heritage resulting from the expositions of 1915-16 and 1935-36, including the buildings themselves, which portray the best types of Spanish colonial art and architecture. Housed in these buildings are the Fine Arts Gallery, exhibits in anthropology, natural history, and American archaeology, which are in many respects unsurpassed. The outdoor organ, the Balboa Bowl, and the horticultural gardens make Balboa Park, in which all these facilities are located, world renowned. The Scripps Institution of Oceanography, operated by the University of California at La Jolla, gives opportunity for important cooperation in the biological sciences.

## BUILDINGS AND EQUIPMENT

On February 1, 1931, the college was moved to the new campus, located one mile north of the city's principal east-west boulevard, El Cajon Boulevard. The buildings are of Spanish-Moorish architecture which is well suited to the landscape and climate of this region. They include the Business Administration Building; the Science Building; the Fine Arts Building; the Library; the Little Theatre; the Music Building; the Physical Science Building; Scripps Cottage (a social clubhouse for women students); the Cafe and Book Store; and the Physical Education Building (a structure with adequate facilities for both men and women). During 1953 the following buildings were opened for use: the Administration Building; the Physics and Astronomy Laboratory Building; the Campus Laboratory School; and an addition to the Music Building. The Open Air Theatre, seating 4,200 persons, serves as a meeting place for large groups. There also is an excellent concrete stadium, constructed in a natural site, for football, and a separate track and field sport area available.

## FACILITIES FOR THE EDUCATION OF TEACHERS

The college maintains a modern elementary school on the campus where it has developed an extensive program for the education of elementary school teachers. The classroom-laboratory plan which calls for the use of work-rooms, the library, and shops affords unusual opportunities for the induction of students into teaching. By arrangement with the San Diego city and county schools, directed teaching is provided in the elementary and secondary schools.

## THE FACULTY

The faculty of 203 members has received advanced training in some 124 colleges and universities of the United States or foreign countries. The professional education of the faculty places the college at the 97 percentile position among teacher education institutions in the Nation. For listings and further details, see the Directory.

## THE LIBRARY

The library facilities of this college are noteworthy for an institution of its size. The library consists of over 150,000 volumes and receives more than 900 different periodicals selected to meet the requirements of a modern educational institution. Professionally trained librarians are available to render assistance to students and faculty in their reading and reference work.

The Campus Elementary School Library, representing a collection of 15,000 volumes, possesses equipment and building facilities that are unique.

## ACCREDITATION

San Diego State College is a member of the American Association of Colleges for Teacher Education and the Western College Association.

## LIVING ACCOMMODATIONS

Students living away from home may obtain assistance in locating housing through the office of the Associate Dean of Students (Dean of Women). A limited number of women students may be accommodated in Quetzal Hall, a private dormitory at the edge of the campus. Room and board at Quetzal Hall may be secured for approximately $275 per semester, payable in advance. Opportunities to reduce this figure by working a few hours each week are occasionally available. Reservations should be made in advance through the Manager of Quetzal Hall, 5192 College Avenue, San Diego 15, California. Single women students under the age of 21 who find other accommodations more desirable must file with the Associate Dean of Students (Dean of Women) a statement from the parent or guardian.

## VETERANS' EDUCATION AND HOUSING

The college has been approved by various accrediting agencies to offer courses for veterans leading to the baccalaureate in some 49 major fields and to the master's degree and various teaching credentials. In connection with the Personnel Services Center, a veterans' office is maintained on the campus to facilitate registration, aid in the establishment of benefits, afford special counseling services, and serve as an information center.

Through the City of San Diego, 400 family units formerly under the jurisdiction of the Federal Public Housing Authority have been made available to the college for the housing of its married veterans. These units are located some eight miles from the campus proper at Aztec Terrace, near Old Town and Loma Portal. Applications for housing at Aztec Terrace are made through the office of the Associate Dean of Students (Dean of Women).

## STUDENT ACTIVITIES

A rich field of extracurricular activities is made possible through the Associated Students. The *Student Handbook*, available at the time of registration, gives information concerning the nature and scope of these opportunities. During the college year 1952-53, seven governmental organizations, six service organizations, 31 departmental and honorary organizations, 12 religious organizations, 16 national fraternities, and 11 national sororities were officially recognized on the campus. Full programs of intramural and intercollegiate athletics are likewise maintained. Students are urged to select extracurricular activities carefully in order to receive optimum benefit from group experiences and to maintain continuous records of good scholarship.

## STUDENT HEALTH SERVICE

As a part of the program of student personnel services, the college provides health services for the protection and maintenance of student health. These health services, under the direction of a medical doctor assisted on a part-time basis by several medical specialists, are available to students for consultation, treatment of minor physical difficulties and emergencies, and counsel as to additional proper procedures. Two full-time nurses are on duty. During the weeks the college is in session students may obtain appointments with specialists who are on duty.

A complete physical examination is required of each student at the time of admission to the college. Careful attention is given to students undergoing private remedial treatment and to those for whom a modification of study load or amount of participation in physical activities seems advisable. A follow-up procedure is in effect for students who have been urged to consult their family physician for correction of defects found in the examination.

Physical examinations are likewise required of and provided for all teacher education students at time of admission to and graduation from the various credential programs. They are also required before students are authorized to participate in the organized program of intramural recreation or in intercollegiate athletics. A college physician is present at all major athletic contests, and on call in case of need for other regularly scheduled events.

## PERSONNEL SERVICES CENTER

The college offers the services of a trained staff to students who wish help in the solution of problems which are personal, social, academic, or occupational in nature. It is a program designed to help students gain the greatest possible advantage of their college experience. Agencies and facilities cooperating in the effort to assist students include the student health service, reading, writing, and study laboratory, the speech improvement program, mathematics clinic, the placement and occupational guidance service, veteran's service, and a staff of personal counselors. Students who wish to take advantage of these facilities may do so through the Personnel Services Center.

## PLACEMENT OFFICE

The Placement Office provides a central source of information on placement opportunities and vocational trends. The staff assists undergraduates in finding part time employment. Full time employment for graduates or former students is facilitated through contacts with schools, businesses, and industries in this locality.

## SCHOLARSHIPS

A number of scholarships for both men and women have been made available through the efforts of the alumni, civic organizations, student organizations, business and professional groups and individuals, and other friends of the college. Superiority in ability and achievement, strength of character, and worthiness from the point of view of need are the standards upon which selection is based. Scholarship aid is limited for the most part to students who have completed at least one semester at San Diego State College. All scholarship applications are made through the office of the Associate Dean of Students (Dean of Women).

Unless otherwise stipulated, all scholarship awards are determined and announced by the faculty Committee on Loans and Scholarships in October of the college year. Applications for scholarships for the fall semester must be filed with the office of the Associate Dean of Students (Dean of Women) prior to October 15th. The following scholarships are available for 1953-54.

**ALPHA GAMMA DELTA.** This sorority presents a $50 award each year to the student in the sorority with the highest grade point average.

**ALTRUSA CLUB.** Two scholarships of $50 each are made available annually by the Altrusa Club of San Diego. Applications are considered from women students enrolled in San Diego State College who are worthy and in need.

**ALPHA PHI OMEGA.** A $50 scholarship will be awarded each semester to a student whose grade point average is 1.5 or better. If an entering freshman, the student must have had a "B" average in high school. Students must apply through the Committee on Loans and Scholarships. The Committee will select three applicants for recommendation to Alpha Phi Omega for final selection.

**AMERICAN ASSOCIATION OF UNIVERSITY WOMEN—SAN DIEGO BRANCH.** A scholarship to be awarded annually by Mrs. W. O. Shackelford, a member of the San Diego Branch of the American Association of University Women, to encourage qualified and gifted women to enter the teaching profession. Sixty dollars a semester will be given to an undergraduate woman student in her junior or senior year of college who is preparing for elementary or secondary school teaching. She must have a "B" average or better. The recipient is required to teach at least one year after graduation or repay the amount received from this award. Applications are obtained from the Office of the Dean of Women and selection of candidate is made by the Loans and Scholarships Committee with the approval of the Scholarship Committee of the San Diego Branch of A. A. U. W.

**AMERICAN ASSOCIATION OF UNIVERSITY WOMEN.** One scholarship of $100 is given each year in June to a graduating senior who will begin work in an accredited college or university toward a higher degree or credential. The scholarship is made available by the San Diego Branch of the American Association of University Women. Interviews with representatives of that organization are required.

**AMERICAN ASSOCIATION OF UNIVERSITY WOMEN, EL CAJON VALLEY BRANCH.** An annual scholarship of $50 is presented to a young woman entering San Diego State College. Selection for the award is made by the club.

**ANONYMOUS (B).** A scholarship of $100 is given each year to be divided among students in financial need, at the discretion of the Committee on Loans and Scholarships. The committee gives consideration to scholastic attainment, financial need, and character.

**ANONYMOUS (E).** A $50 scholarship, awarded each semester through the Committee on Loans and Scholarships, is made available by a public spirited citizen who prefers to assist a student majoring in science.

**ASSOCIATED ARTS OF SAN DIEGO.** A $150 scholarship for a period of two years to a student outstanding in the Speech Arts Department.

**ASSOCIATION OF CHILD EDUCATION.** The Association of Child Education makes available each year a $50 scholarship to a student in the Kindergarten-Primary program. The award is customarily made to an upper division student showing promise in a particular field who is in need financially.

**BARNES CHASE COMPANY BASEBALL SCHOLARSHIP.** Donated by Mr. and Mrs. Norman R. Barnes. Twenty-five dollars a month for 10 months, from September through June. Applicant must be officially enrolled in the college as a regular student in good standing; must maintain a satisfactory scholastic record and be progressing toward an academic objective; must be a member of the freshman or varsity baseball team; and be of sound moral character. The selection of the recipient will be recommended by the baseball coach and approved by the athletic department with the final approval of the Committee on Loans and Scholarships.

**BARNES CHASE COMPANY BASKETBALL SCHOLARSHIP.** (Same as above except for basketball player.)

**BLUE KEY.** Two scholarships of $50 each shall be given annually; one each term. One shall be awarded an entering male freshman student, preferably from San Diego County. The other scholarship will be awarded to a male student in the lower division who has completed at least one semester (12 units) of work at San Diego State College. Selection will be made by the Committee on Loans and Scholarships.

**BURGENER, CLAIR W., SPEECH SCHOLARSHIP.** A four-year scholarship of $50 per semester will be awarded to an entering freshman who is outstanding in public speaking and general scholarship. Recommendations will be made by the Speech Arts Department with final selection by the Committee on Loans and Scholarships.

**CAP AND GOWN.** One $50 scholarship is awarded annually to an upper division woman student who has attended San Diego State College for at least one semester and who has maintained at least a "B" average in scholarship for her entire college career. Applications may be secured from the Office of the Dean of Women or the San Diego State College chapter of Cap and Gown.

**CHI OMEGA FRATERNITY** awards annually a $20.00 scholarship to a student outstanding in the Sociology Department.

**CONVAIR MANAGEMENT CLUB.** Three awards are offered to seniors graduating from high school who are sons or daughters of Convair employees. The money is held in trust at the college and funds administered by the college under the rules laid down by the Committee on Loans and Scholarships. Applications are made through the Convair Management Club.

**CORDTZ SCHOLARSHIP IN SPEECH.** Fifty dollars a semester for eight semesters will be awarded to a student with a major in speech with advertising as a possible vocational goal. The student must have a 1.3 grade point average or better. The applicant will be selected by the Speech Arts Department with final approval by the Cordtz Outdoor Advertising Company. Application should be made to the Chairman of the Speech Arts Department.

**DANCE CLUB OF SAN DIEGO STATE COLLEGE.** The Dance Club of San Diego State College has established a $50 scholarship to be awarded an outstanding dancer from the club to be used for tuition at a recognized summer school of the dance.

**DAUGHTERS OF THE AMERICAN REVOLUTION.** Two scholarships of $25 each are presented each spring, one to a young man and the other to a young woman outstanding in citizenship and Americanism. Applicants should have at least a "B" average in scholarship, should be able to demonstrate need for financial assistance, and should have junior standing in the college when selected. The selection is made by the faculty Committee on Loans and Scholarships and presentation of awards is made at a luncheon on Flag Day, which is given by the Daughters of the American Revolution.

**DEBATE SCHOLARSHIP.** $50 will be given to a student enrolled at San Diego State College who is outstanding in debate. Selection will be made by the Speech Arts Department with final approval by the Committee on Loans and Scholarships.

**DELTA DELTA DELTA NATIONAL FRATERNITY ALLIANCE.** $100 a year will be given for five years in memory of Georgia Aiman Shattuck. This scholarship is to be awarded to a woman student, in the upper division, who has been admitted to the teacher education curriculum, with a "B" average in all college work, and who is in financial need. Applications should be secured from the Office of the Dean of Women.

**ENGINEERS CLUB OF SAN DIEGO.** Awards of from $50 to $100 are made annually by this organization to students majoring in engineering. Applications are made through the Loans and Scholarships Committee of the college which recommends three candidates to the Engineers Club of San Diego for final selection.

**ESCONDIDO BUSINESS AND PROFESSIONAL WOMENS CLUB.** Two $100 scholarships are given anually to two high school graduates who plan to attend San Diego State College. These students are selected by the club on basis of good citizenship, good grades and participation in activities.

**FACULTY DAMES.** Two scholarships of $50 each are given annually to deserving women students selected by the Loans and Scholarships Committee.

**FLEMING, HARVEY, GOLF.** Through a trust fund set aside for awards to exceptional golf players who enroll in college, scholarships of $250 are given. This is a competitive award.

**FOOTHILL BUSINESS AND PROFESSIONAL CLUB.** Two $50 scholarships will be awarded to young women students entering San Diego State College from Grossmont High School.

**FRESHMAN CLASS, 1952-1953.** Two scholarships of $50 each will be awarded in the fall of 1953, one to an entering freshman man and one to an entering freshman woman. The scholarships will be awarded to students who have demonstrated leadership in high school activities. Final selection will be made by the Committee on Loans and Scholarships.

**HALE, E. T., ATHLETIC SCHOLARSHIPS.** $25 a month or more is donated for use of the Athletic Department in scholarships to outstanding athletes.

**HALE, E. T., TUITION SCHOLARSHIPS.** Four $30 scholarships are awarded annually by Mr. Hale to give financial aid to deserving students. Applicants must be officially enrolled in the college as regular students, or must be entering freshmen with evidence that they are capable of doing college work; must be interested in playing freshman or varsity basketball; and must be of sound moral character. Selection of the recipients will be recommended by the basketball coach and approved by the athletic department with final approval of the Loans and Scholarships Committee.

**HOLTVILLE, WOMAN'S CLUB OF.** A scholarship of $100 is made available to an outstanding student by the Senior and Junior Woman's Club of Holtville. Selection of the student is made by the club.

**JOB'S DAUGHTERS BETHEL NO. 40.** One deserving young woman is selected by Bethel No. 40 to receive a four-year scholarship of $1,000. The applicant must be an outstanding member in the Bethel, have need for scholastic aid, and have at least a "B" average.

**JONES, SYBIL ELIZA MEMORIAL.** A scholarship of $100 is awarded annually to a student in drama. Applicant must be officially enrolled in at least his fourth semester in speech and drama with participation in dramatic productions on the campus. He must have at least a "C" average in all college work. Applications are made to the Speech Arts Department for action and awards are made after approval of the faculty Committee on Loans and Scholarships.

**KAPPA ALPHA PSI FRATERNITY—SAN DIEGO ALUMNI.** An annual $50 scholarship ($25 per semester) is awarded a student graduating from high school for fees at San Diego State College. The fraternity makes the selection.

**KAPPA ALPHA THETA MOTHERS CLUB.** A scholarship of $50 is awarded annually to the member in the local chapter who has made the highest grade point average for the school year.

**KAPPA BETA NU.** A $100 scholarship is offered annually to a junior or senior woman student in elementary teacher education. Applicant must be a resident of San Diego County who is in financial need. Final selection rests with a scholarship committee of Kappa Beta Nu.

**KAPPA DELTA PI.** Two $25 scholarships are awarded annually by Kappa Delta Pi of San Diego State College. Selection for awards is made by the group.

**KAY JEWELERS SCHOLARSHIP.** $30 a semester for eight semesters is awarded an entering freshman. This scholarship is to be given alternating years to men and women students. In the fall semester, 1953, the scholarship will be awarded to a young woman. Selection is made by the Committee on Loans and Scholarships from applications received from high school students.

**KNIGHTS TEMPLAR EDUCATIONAL FOUNDATION OF CALIFORNIA.** Ten scholarships of $50 each will be given annually to students enrolled at San Diego State College. Applications are received by the Committee on Loans and Scholarships of the College. Final awards are made on basis of ability, need, and personality, with preference shown upper division students.

**LA MESA EVENING WOMEN'S CLUB.** A $75 scholarship is awarded a senior in high school who is entering San Diego State College. Selection is made by the club.

**LINKLETTER, ART.** Each June four $50 awards will be made to students graduating from San Diego City and County high schools: (1) one to a girl and one to a boy graduating from high schools with enrollment of 1,000 or over; and (2) one to a boy and one to a girl from high schools with enrollment under 1,000. Applications must be sent to the Committee on Loans and Scholarships of the College. Selection is based on scholarship, citizenship, and need.

**MARCY, MAY FINNEY.** Fifty-dollar scholarships are awarded from this fund to women students in upper division. Applications are made to the Dean of Women and awards made upon recommendation of the faculty Committee on Loans and Scholarships to Mrs. Marcy and a committee of members of Cap and Gown on San Diego State College campus.

**MUSIC DEPARTMENT SCHOLARSHIPS.** A limited number of Music Department scholarships covering the costs of tuition, books, and other supplies are available to regular course music majors upon application to the Chairman of the Music Department. The awards of these scholarships are based upon financial need, scholarship, and performing talent as demonstrated in auditions before a Scholarship Committee of the Music Department. All recommendations of this Committee are subject to the approval of the Committee on Loans and Scholarships of the college.

**NATIONAL LEAGUE OF AMERICAN PEN WOMEN—SAN DIEGO BRANCH.** A scholarship of $50 will be awarded annually to an outstanding woman student. Selection will be made from students in the fields of art, music, and creative writing. In the first term of 1953-54, consideration will be given a student specializing in creative writing. Recommendations must come from the English Department and be approved by the Committee on Loans and Scholarships.

**NOMA SCHOLARSHIP.** Presented by the National Office Management Association. $100 a year is provided to a student planning to major in Office Management. The scholarship will be restricted to students desiring to major in Office Management beginning with their junior year. Applications may be secured from the Office of the Dean of Women or the Chairman of the Department of Business Education, Secretarial and Office Management, not later than May 15th each year. The student chosen will be notified by June 10th.

**NORTH PARK KIWANI-ANNES.** One scholarship of $50 a semester for a year is awarded annually by this group to a male student preparing for teaching. The recipient must have at least junior standing at the time and be approved by the Committee on Loans and Scholarships.

**OPTOMETRIC ASSOCIATION OF SAN DIEGO COUNTY—WOMAN'S AUXILIARY.** Fifty dollars is awarded annually during the spring semester to a student who meets the qualifications set up by the Auxiliary. The award is based on scholarship, qualities of character and personality, high moral integrity, and need. Applications should be made to the Woman's Auxiliary of the San Diego County Optometric Association.

**OSTEOPATHY AUXILIARY** of San Diego County awards annually $100 to a student who has graduated from San Diego State College and has been accepted for enrollment in the College of Osteopathy in Los Angeles.

**PANHELLENIC OF SAN DIEGO STATE COLLEGE.** $50 is given annually to the sorority member who has made the highest grade point average in the fall semester.

**P. E. O. SCHOLARSHIPS.** Various chapters of this organization assist worthy students in amounts ranging from $15 a month to $50 a semester. Usually the selection for the awards is made by the chapter itself.

**PI LAMBDA THETA.** An annual scholarship of $50 will be given to a senior student in education. The selection will be made by the fraternity with approval of the Committee on Loans and Scholarships.

**ROTARY INTERNATIONAL CLUB.** Scholarships of various amounts have been awarded students by El Cajon, Escondido, Old Mission, San Diego, Oceanside, and Vista Rotary Clubs. Applications should be made to the Rotary Club.

**SAN DIEGO BUSINESS AND PROFESSIONAL WOMEN'S CLUB.** A $50 scholarship is awarded annually to a worthy young woman attending San Diego State College having at least a "C" average.

**SAN DIEGO CITY PANHELLENIC.** Two $50 scholarships are awarded annually to two upper division women students. Applications are made through the faculty Committee on Loans and Scholarships and selection is left to the discretion of the committee.

**SAN DIEGO CITY TEACHERS ASSOCIATION.** Two scholarships of $50 each are presented each year to prospective teachers with no restrictions as to college year. Applications are made on forms supplied by the San Diego City Teachers Association and are reviewed by the association's committee on scholarships. Personal interviews are required, and final selection is made by that committee.

**SAN DIEGO COUNTY TEACHERS ASSOCIATION.** Two $100 scholarships are made available annually by this group of teachers. Awards are made to students in the field of elementary education and final selection rests with the Committee on Loans and Scholarships.

**SAN DIEGO SOCIAL WORKERS CLUB.** A scholarship of $50 each semester is made available for an upper division student intending to enter the field of social work, who has above average scholarship and shows evidence of financial need. Awards are made each semester by the Committee on Loans and Scholarships. Applications may be secured at the Office of the Dean of Women.

**SENN, PERCIE BELL, SCHOLARSHIP IN PUBLIC SPEAKING.** An annual scholarship is made possible by the generosity of Admiral Elliott Senn, who has donated $1,500 to the San Diego State College Foundation for the purpose of assisting students in public speaking. This will be awarded to an entering freshman or any qualified student in the field of debate. Awards are made by a committee appointed from the Speech Department, with the final approval of the faculty Loans and Scholarships Committee.

**SOUTHLAND CLUB SCHOLARSHIP.** $50 award made available by the Southland Club for Business and Professional Women to a junior or senior woman student who plans to enter business or a profession. The student must have at least a "B" average; she must have been graduated from a San Diego City or County high school and must be of good moral character and in financial need. Applications made at the Office of the Dean of Women and approved by the Committee on Loans and Scholarships.

**STEINMAN-HILLEL.** Mr. and Mrs. Lou Steinman, members of the San Diego Lasker Lodge of the B'nai B'rith, which sponsors the Hillel organization on the San Diego State College campus, have set aside $400 for scholarships, $50 to be awarded annually for the next 8 years to a student who has done the most to further the cause of interfaith cooperation among the students of the campus. The selection of the awardee shall be made by a committee of three judges.

**STOTT, DOROTHY CRANSTON.** Each June a scholarship of $100 will be awarded to a student who has attended the San Diego State College for at least two years and who is being graduated or has been graduated by the San Diego State College with a major in English who begins or continues work in the San Diego State College, or in any other accredited college or university, towards a higher degree or credential. The selection is made by the Department of English with approval by the Committee on Loans and Scholarships.

**STOTT, K. W.** Each June a scholarship of $100 will be awarded to a student who has attended the San Diego State College for at least two years and who is being graduated or has been graduated by the San Diego State College with a major in History who begins or continues work in the San Diego State College, or in any other accredited college or university, towards a higher degree or credential. The selection is made by the Department of History with approval by the Committee on Loans and Scholarships.

**TEACHER EDUCATION SCHOLARSHIP.** The California Congress of Parents and Teachers, Inc., each year gives $300 to be awarded to one or two students. Selections are made upon the following conditions: (1) The recipient must have high qualifications and be in financial need; (2) The scholarship will be granted to students training to teach in the public elementary schools of California; and (3) The award shall be limited to students in the junior and senior years and graduate level.

**TOWN AND COUNTRY CLUB, ESCONDIDO, CALIFORNIA.** A $200 scholarship is given an outstanding student graduating from Escondido High School who plans to attend San Diego State College. Qualifications for this award and final selection are made by the Town and Country Club.

**VISTA BUSINESS AND PROFESSIONAL WOMEN'S CLUB.** $100 scholarship made available to one or more International students to assist them with tuition fees.

**WALKER, RALF MARC.** A scholarship in the amount of $500 is made available by the Walker-Scott Corporation in memory of the late Mr. Ralf Marc Walker to a woman student majoring in merchandising or retail trade at the San Diego State College. The scholarship is presented to a girl in Walker's Hi-Debber Council each year. The total scholarship is deposited in the San Diego State College Foundation and is handed to the recipient at the rate of $50 a semester for each of the first three years and $100 a semester for the two senior semesters.

**WEINBERGER, HENRY, INTERFAITH SCHOLARSHIP.** A scholarship $100 is awarded in April of each year to the student of any religious faith enrolled San Diego State College who is judged to have done the most to further inter-th ideals among the students of the college during the year of the award. This ıolarship is made available by Mr. Henry Weinberger of the Lasher Lodge of ıai B'rith, under auspices of the B'nai B'rith-Hillel Councilorship on San Diego ıte College Campus.

**WOMEN'S AUXILIARY OF SAN DIEGO DENTAL SOCIETY.** An annual ard of $100 is made available by the Women's Auxiliary of San Diego Dental Society an outstanding male student in pre-dentistry.

## LOANS

Short term loans are available to students who have attended San Diego State llege for at least one semester and who have demonstrated ability to do satisfactory lege work.

Several long term loans are also available including loans from the Martha rnum Memorial Loan Fund which is for the benefit of students in teacher education.

Applications for loans are made through the Office of the Associate Dean of ıdents (Dean of Women).

# ADMISSION AND REGISTRATION

## GENERAL ADMISSION REQUIREMENTS

High school graduates and other applicants possessing equivalent preparation may be admitted to this college upon evidence of fitness to profit by college instruction, such fitness to be shown by previous scholastic records, by evidence of good moral character and personal qualifications, and by satisfactory scores on tests which the college may require.

Application for admission should be made at the Admissions Office.

## ADMISSION OF HIGH SCHOOL GRADUATES

(1) A high school transcript must be presented showing satisfactory scholarship, and (2) applicants must demonstrate readiness for college instruction by making satisfactory scores on such tests as the college may designate.

Admission to freshman standing with **regular status** will be granted if the student has earned A or B grades in not less than 16 semester courses during the tenth, eleventh and twelfth grades. Individuals who fall slightly below this standard may be admitted if qualifying examination scores are sufficiently high to indicate probable success in college. In preparing for college admission, high school students are urged to consult their advisers and plan a program in high school that will prepare them adequately to pursue their chosen curriculum at the college level.

## ADMISSION BY EXAMINATION

Certificates of successful examination before the College Entrance Examination Board will be accepted when candidates cannot meet the above scholarship requirements.

## ADMISSION OF ADULTS TO SPECIAL STATUS

**Adult special status** (non-matriculated) may be granted, in exceptional cases, to persons over 21 years of age who do not fully meet the college entrance requirements provided that ability to do college work is satisfactorily demonstrated through qualifying examinations administered by the college. Such students may be transferred to regular status upon completion of 24 or more units of college work taken in residence with grade average of C or better. Full credit is allowed for all regular college work completed.

**Special students** (non-matriculated) are those students carrying courses in the Extended Day Program only or other students who may be granted permission to take limited work. Special students are not eligible as candidates for a degree until all entrance requirements have been met; however, courses satisfactorily completed carry full college credit.

**Special graduate students** (non-matriculated) are graduates who have not qualified for admission to graduate status. (See *Admission to Graduate Study.*)

## ADMISSION WITH ADVANCED STANDING

Credit earned in recognized institutions of collegiate grade will be evaluated as advanced standing toward the graduation requirements of this institution. For admission with advanced standing, an applicant must have earned at least 12 semester units in an accredited four-year institution, or 24 semester units in an accredited junior college, with a C average or better for all college work undertaken. If the applicant has completed less than 12 semester units, he may be considered for freshman admission on the basis of his high school record; however, all work undertaken at the college level must be reported by the student and be of C average or better. If the applicant from a junior college has met the freshman requirements for admission to this institution, he may be admitted to advanced standing with less than 24 units of college work with a C average or better for all work undertaken. **A maximum of 64 units of work earned in a junior college may be transferred to this institution.**

Any student applying for admission to this college must report all high school and college work undertaken by furnishing official transcripts from each school or college. No part of this work may be disregarded.

An applicant from a non-accredited college may be admitted by action of the Board of Admissions if his college record and qualifying examination scores meet the admission requirements. Credits earned in non-accredited colleges or universities may be accepted provisionally, but will not be counted toward graduation requirements until the student has earned 24 semester units in residence with at least a C average.

Students seeking admission with advanced standing must furnish complete transcripts of all work attempted beyond the eighth grade. If an official evaluation is desired, a fee of $2 must accompany the application and be received together with all transcripts at least 30 days before the date of registration. At least 45 semester units must be completed before a student may apply for an evaluation.

## ADMISSION TO GRADUATE STUDY

Admission to the college must first be secured. A re-application must be filed upon re-entrance following graduation with a bachelor's degree from San Diego State College. Apply at the Office of Admissions.

**Graduate status** may be granted to applicants who have regularly applied at the Office of Admissions and have filed official transcripts as evidence of their possession of a bachelor's degree from an accredited institution. Refer to master of arts degree and to Teaching Credentials.

**Graduate special status** is granted to those who are provisionally admitted to graduate study. It is given to a student (1) who has not completed all admission procedures required for graduate status and (2) to a student whose bachelor's degree was earned at a non-accredited college. A student from a non-accredited college will be eligible for graduate status when he has earned a grade point average of 1.5 on 12 or more units of approved upper division work at this college and has cleared all undergraduate deficiencies.

**Admission to candidacy** for the master's degree or for a teaching credential may be achieved by meeting the respective specific requirements. Refer to the section of the bulletin on the master of arts degree.

**Admission to courses numbered 200-299** requires graduate status and the meeting of specific prerequisites. A graduate student who may be permitted to enter a graduate course pending full graduate status will be given only upper division credit if graduate status is not achieved by the end of the term in which the course is given.

## DEGREES OFFERED

The following degrees are offered by the college: bachelor of arts, bachelor of science, bachelor of education, bachelor of vocational education, and master of arts.

## CERTIFICATES OFFERED

The following certificates are offered by the college: Certificate in Public Administration and Certificate in Social Work Administration. Requirements for these certificates may be completed in the extended day program. For further explanation of requirements, refer to the section of the bulletin on public administration.

## EXTENDED DAY PROGRAM

In order to meet the needs of adults in the community for work on the college level, courses are offered in the late afternoon and evening under an extended day program. These include both undergraduate and graduate courses and carry full college credit. Classes offered under this program consist of those courses normally scheduled as part of the regular college offerings and are taught by faculty of the college, but moved to a late afternoon or evening hour to permit in-service teachers, public personnel, businessmen, and others to attend. These courses cover a wide range of academic and educational subjects including education, business administration, public administration, engineering, and the sciences. A special bulletin describing the current offerings is issued each semester and may be obtained upon request from the Office of the Dean of Educational Services.

## EXTENSION PROGRAM

In order to serve more adequately the needs of the community, the colle cooperates with off-campus organizations and groups in arranging extension class in response to expressed needs when the group is sufficiently large to finance t instruction. Offerings are made each semester in a number of departments includi education, business administration, and the arts and sciences. Classes may be orga ized at various points within San Diego and Imperial Counties. A minimum of 15 20 students is usually required in order to establish a class. The usual class carri two units of credit and meets once a week, either in the late afternoon or evenin The minimum basic fee is $7.50 per unit. Interested persons desiring detailed inform tion regarding organization of classes or current offerings should contact the Dean Educational Services.

## AUDITORS

Properly qualified persons may apply for admission to attend classes as auditor Such students pay the same fees as those who take equivalent work for credit.

A student enrolled in a course for "audit" who wishes to change his program "credit" or a student who is enrolled in a course for "credit" who wishes to chan his program to "audit" must apply for this change of program at the Registrar's Offi within the time allowed for changes of program.

## TESTS REQUIRED AT REGISTRATION TIME AND LATER

1. A physical examination is required of all students entering or reentering t college after an absence of more than one semester, except that students carrying s units or less or students enrolled in Extended Day classes only are not required to ta the physical examination. This examination is scheduled during the testing and advisi period.

2. All entering students are required to take a college aptitude test, and tes for competence in English, mathematics and in speech. Remedial courses are establish in mathematics and speech for students failing these tests. Exceptions may be made f graduate students and for those who register for six units or less and for tho registered only in Extended Day classes.

3. All entering freshmen and college transfer students who present less th 12 semester units of college credit must take the regular battery of achievement a aptitude tests, including tests for competence in English, mathematics, and speec Remedial courses are established for students failing these tests.

4. Students entering teacher education should see admission requirements ou lined under Admission to Teacher Education.

## LATE REGISTRATION

Students who register after the scheduled registration days are subject to a la registration fee of $2. Students may be accepted for late registration with the approv of the Admissions Officer within five days beginning with the first day of class instru tion. Registration will be closed after that date. Students failing to complete all reg tration requirements within the period allowed, as announced in registration instru tions, are subject to cancellation of registration.

## CHANGES IN REGISTRATION

A student is responsible for any change in his program after the registratio book has been filed. Forms for changes in program must be secured at the Registrar' Office. A fee of $1 is charged.

### Regular Session Tuition Fee Refunds

(1) A portion of the tuition and service fees charged a regular session studen may be refunded if written application for refund is made not later than two week following the day of the term that instruction begins; and provided, further, that th amount of $1 shall be retained to cover the cost of registration.

(2) The late registration fee is not refundable.

The Business Office should be consulted for further refund details.

# GENERAL REGULATIONS

## INFORMATION

Inquiries relative to the college should be directed to the Registrar's Office.

## NUMBERING OF COURSES

Courses numbered 1 through 99 are in the lower division; those numbered 100 hrough 199 are in the upper division; and those numbered 200 or over are in the raduate division. Courses numbered 300 or over are professional education courses n the graduate level.

## GRADES AND GRADE POINTS

### Grades

The following grades are used in reporting the standing of students at the end of ich semester: A, excellent; B, good; C, fair; D, passing; F, failed; I, incomplete; r., credit (without grade); WP, withdrawal passing; and WF, withdrawal failing.

### Grade Points

Grade points are assigned as follows: Grade A, 3 points per unit; B, 2 points er unit; C, 1 point per unit; D, no point per unit; F or WF, no point per unit. Grades I, Cr, or WP are disregarded in computing grade points. The number of grade points student has earned in a subject is determined by multiplying the number of points e has received by the number of units allowed. The grade point average is determined dividing the grade points earned by the number of units attempted. A student ust earn at least a C average in all work undertaken at the college to qualify for degree or a transcript of record with recommendation to another collegiate insti-tion. Any course may be repeated, but not for additional credit; however, only the cond grade earned is considered in the student's average.

## INCOMPLETE GRADE

One calendar year beyond the end of the term when an incomplete grade is signed will be allowed for making up the incomplete without repeating the course, cept that incompletes in courses numbered 299 may be made up within the time lowed for completion of the M.A. degree.

## CLASS, UNITS OF WORK, AND STUDY LIST LIMITS

### Class

Students who have completed 0 to 29 units of work are classified as freshmen; to 59 units as sophomores; 60 to 89 units as juniors; and 90 or more as seniors.

### Units of Work

A unit of credit represents 50 minutes of lecture or recitation combined with o hours of preparation per week through one semester, or three hours of laboratory field work in the case of laboratory credit.

### Study List Limits

Students are not ordinarily permitted to enroll for more than 16½ units of credit vard graduation. A normal semester's program is 16 units.

Certain exceptions to this rule exist. If during the preceding semester the student s carried at least 12 units: (1) and a grade point average of at least 1.5 was earned, ½ units may be carried for credit toward graduation; (2) and a grade point average 2.0 was earned, 18½ units may be carried.

Students who enroll for more units than authorized, including concurrent college ırses taken outside this college, will not receive graduation credit for the excess its.

Exceptions to these regulations may be secured only through a petition to the Scholarship Committee.

No student may register for less than 12 units (the minimum full-time load) without the approval of the Dean of Instruction.

# PROBATION AND DISQUALIFICATION

## PROBATION

Any student whose scholarship record shows a cumulative deficit of seven or more grade points below a C average for all college work undertaken or for all work taken at this college will be placed on probation. A student transferring from another college may also be placed on probation by the Board of Admissions because of scholarship deficiencies at the other college.

Probation may be continued provided the student obtains a C average or better each semester while on probation and is not disqualified. The transfer student who was admitted on probation will remain on probation until all grade point deficiencies from the other college have been removed and until all work taken at this college is a C average or better. Other students will remain on probation until the grade point deficiency at this college has been reduced below seven.

## DISQUALIFICATION

Any student on probation whose scholarship falls belows a grade point average of 1.0 in any single semester is disqualified from further attendance at the college.

Any student who fails to pass one-half of the units attempted during any single semester is disqualified from further attendance at the college.

A disqualified student may be reinstated for reasons satisfactory to the Board of Admissions. Applications for reinstatement must be made on forms which may be obtained at the Admissions Office.

# WITHDRAWALS

Forms for withdrawal from class or withdrawal from college may be obtained at the Registrar's Office. If a student withdraws by the end of the eighth week of the semester, a grade of WP (withdrawal passing) will be recorded upon his permanent record for each class from which he has withdrawn. If he withdraws after the eighth week and not later than the end of the fourteenth week of the semester, either a WP or WF (withdrawal failing) will be recorded, depending upon whether he is passing or failing the course on the date of filing the request for withdrawal. (WF is equivalent to a failing grade.) After the fourteenth week, a final grade will be recorded for each class for which the student is enrolled.

**NOTE:** A student unofficially withdrawing from class or from college will receive failing grades in all courses for which he is enrolled. Applications for withdrawal must be filed officially at the Registrar's Office within the time limits stated above.

### Withdrawal to Enter Military Service

A student withdrawing from college to enter military service is entitled to apply for refund of tuition or for partial credit (but not both). One-third credit is allowed for completion of the first six weeks of the semester in courses for which the student is enrolled and has been in regular attendance; two-thirds credit for completion of the first 12 weeks of the semester in courses for which the student is enrolled and in which he is passing at the time of withdrawal. Entrance upon extended active military duty must be without unreasonable and unnecessary delay (normally 30 days) after the date of withdrawal from college to qualify the student for refund of tuition or partial credit. A student electing to receive a refund of tuition or partial credit must file official verification of the date of entry upon extended active duty.

# TRANSCRIPTS OF RECORD

Students may secure upon request one transcript of record without fee. Thereafter, a fee of $1 is charged for each transcript secured upon request. Once a student has matriculated in this college, transcripts from other schools will not be returned, or copies of them made. No fees are charged for transcripts required for military purposes.

Transcripts in the possession of students are to be regarded as unofficial records.

## EVALUATIONS

An evaluation is a summary of college work completed and of requirements to
e completed for a degree or credential. An evaluation fee of $2 is charged, unless the
tudent is fully matriculated and enrolled for four units or more in a regular semester.

**A student who has earned 45 semester units, or more, of college work should
pply at the Evaluations Office for an official evaluation.** The evaluation is made on
he regulations in effect at the time the student entered this college, provided that he
as been in uninterrupted attendance as a full-time student at this college; otherwise,
he evaluation is made on regulations currently in effect at the time the evaluation is
nade. An evaluation remains in effect so long as the student earns a minimum of 12
emester units in residence within each two-year period, beginning with the term
mmediately following the one in which the evaluation is made. Each summer session
erm is counted as a term. All evaluations are subject to changes imposed upon the
ollege by the State Board of Education. After an interval of five years from the time
n evaluation is made, courses in education to be applied toward a teaching credential
re subject to re-evaluation.

## ELIGIBILITY FOR DIRECTED TEACHING

No student shall be eligible for directed teaching (Education 116) leading to the
indergarten-primary, general elementary, general junior high, and special secondary
redentials who has not completed 75 units, education course prerequisites, been ad-
itted to Teacher Education, and whose entire record, as well as for the preceding
emester, does not average at least a 1.2 for all credentials except the junior high and
eneral secondary credentials which require a 1.5 grade average.

No student shall be eligible for directed teaching (Education 116 and 316) lead-
ng to the general secondary credential who has not been admitted to the teacher edu-
ation program prescribed for admission to candidacy for this credential.

## THE HONORS PROGRAM

Any student who at the end of the sophomore year has either attained an over-all
rade point average of 2.5 or who has attained a grade point average of 2.75 in his
ajor and not less than 2.0 in fields outside his major, and who has received the
pproval of his department or departments, may elect the honors program. Such
lection will enable the student to pursue a special program as outlined below. Any
tudent who feels that his qualifications approximate closely the scholarship standards
tated above may request admission to the honors program, subject to the approval of
is department or departments, and of the Committee on Honors.

Any student who wishes to apply for entrance into the honors program may
o so by filling out cards to be obtained from the Registrar's Office. The application
hould be approved by the 10th calendar day following the first day of instruction.
nits earned by students doing individual study under this plan will be recorded
nder the symbol 166 and will be subject to the formulated rules dealing with limita-
ions of student load.

Students in the honors program, so far as the facilities of the department and
e best interests of the students under its charge allow, shall be treated as benefits
eir individual needs and as their individual capabilities warrant. They shall be
ligible to enroll in honors or special study courses, credit in such courses to be limited
six units per semester unless otherwise recommended by the major department or
epartments and approved by the Honors Committee. In addition, they shall not be
eld to regular attendance in the established courses of their departments if, in the
pinion of the instructor, the objectives of such courses can be achieved through
ecial assignments and examinations. With the consent of the major department or
epartments, requirements concerning minors and specific courses or sequences in the
ajor may be modified. Each honor student shall be assigned to a member of his
ajor department for advice and direction.

Students in the honors program who fail to take advantage of the opportunities
ere offered may at the end of any semester be required to withdraw from the honors
rogram upon notification of the major department or departments. Students not in
e honors program who show unusual capacity, may request to be transferred to the
onors program contingent upon recommendation of the department and the Com-
ittee on Honors at the end of any semester.

## DEGREE WITH HONORS

Upon recommendation of the Committee on Honors, and with the approval o the faculty, graduation with honors shall be granted to those students in each graduating class who have done highly superior work as shown by high grade point averages

## DEGREE WITH DISTINCTION IN THE MAJOR

Upon recommendation of his major department, with the approval of the Committee on Honors and of the faculty, a student doing superior work in his major fiel may be graduated with distinction in that field.

## FINAL EXAMINATIONS

No final examination shall be given to individual students before the regula time. Any student who finds it impossible to take a final examination on the date scheduled must make arrangements with the instructor to have an incomplete grade reporte and must take the deferred final examination within the time allowed for making u incomplete grades.

## CREDIT BY EXAMINATION

Credit may be earned by examination under the following conditions: (1) th student must be a fully matriculated bona fide resident student enrolled in a regula semester at the college at the time the examination is administered; (2) approval t take the examination must be obtained from the Dean of Instruction and from th chairman of the department concerned, prior to the administration of the examination and (3) the student must pay the additional fees, if needed, to qualify as a regula student.

## CREDIT FOR EXTENSION COURSES

The maximum amount of extension credit which may be accepted toward th minimum requirements for the bachelor's degree is 24 semester units, not more tha 12 of which may be transferred from another college or university except that course taken through the United States Armed Forces Institute, or other official militar correspondence schools, shall not be included within these limits. The term "extensio credit" refers to both extension class work and work taken by correspondence. Extension credit does not count in satisfaction of the minimum residence requirement Extension courses are not accepted for graduate credit toward the master's degree

## CREDIT GRANTED FOR MILITARY SERVICE

The college is guided by the recommendations of the American Council on Education in granting undergraduate credit toward the bachelor's degree for military service. To obtain credit, the student must apply at the Admissions Office and file a photostat of discharge papers showing dates of active duty and service schools completed. These records should be submitted at the time of applying for admission t the college.

## TRANSFER TO GRADUATE SCHOOLS

Attention of students who plan to transfer to the graduate school of the University of California is called to the fact that the university reserves the right t evaluate and possibly reduce the credit in certain work in which this college has given credit toward the baccalaureate. Examples of such work would be credit for nurse's training, credit transferred from certain foreign schools, and certain vocational courses in junior colleges.

# THE MASTER OF ARTS DEGREE

## NATURE OF THE DEGREE

The master of arts degree is offered at San Diego State College in the field of teaching and for other teaching and supervisory services. Students receiving the degree for school service must hold a valid regular day school service California credential other than an emergency or provisional credential; or be a foreign citizen preparing to teach in foreign countries; or be a licensed teacher from another state with one year of experience. The master's degree is also offered in specified curricula for approved applicants preparing to teach in institutions not requiring teaching credentials, provided that a minimum of 12 units in professional education be included in their graduate year. Students may elect to concentrate in a subject matter major, in education, or in personal supervision and training. The following areas of concentration are now available:

*Teaching Majors:* Art, business education, chemistry, English, foreign language (Romance Language, French, and Spanish), health and physical education, history, life science (botany and zoology), mathematics, music, physics, and social science.

*Education:* Audio-visual education, elementary education, secondary education, elementary administration, secondary administration, elementary supervision, secondary supervision, pupil personnel services, and special education.

*Psychology:* Psychology, educational psychology, school psychologist.

*Personnel Supervision and Training:* For instructional and supervisory service in business, government, and industry.

## REQUIREMENTS

**Students who meet the following requirements are eligible for graduation with the master's degree:**

A. A minimum of 30 units of approved graduate work beyond the bachelor's degree. Thirty units must be completed within the seven year period immediately preceding the date when all of the requirements for the degree are completed. For justifiable reasons, the college may extend this period.

**B. 24 units in residence. Courses taken prior to the summer session of 1946 at San Diego State College, or any other California State College, may NOT be used as graduate work.**

C. Grade point average of 2.0 in all work taken after the bachelor's degree. Only grades of A, B, and C are acceptable toward the master's degree. (Marking system: Grade of A, 3 grade points; B, 2 grade points; C, 1 grade point; D, 0 grade points.)

D. Completion of the requirements for an approved California teaching credential, or the holding of one, such as the general elementary, general secondary, junior high, special secondary school, and school psychometrist credentials; or be a foreign citizen preparing to teach; or be a licensed teacher in another state, with one year of experience; or be preparing to teach or supervise in an institution which does not require a credential.

**E. Satisfactory completion of the candidate's degree program as approved by the Graduate Council.**

F. Satisfactory completion of a thesis or project, except in foreign language and business education.

## ADMISSION TO GRADUATE STUDY

A. Graduate Status may be granted to applicants who have regularly applied and have filed official transcripts at the Office of Admissions as evidence of their possession of a bachelor's degree from an accredited institution. (Two transcripts must be filed by students who expect to become candidates for the master's degree.)

B. Provisional admission to graduate study (Graduate Special Status) may be granted to one who holds a bachelor's degree from a non-accredited college. Such a student will be eligible for Graduate Status when he has earned a grade point average of 1.5 on 12 or more units of approved upper division work at this college and has cleared all undergraduate deficiencies. Special status is given also to those students who have not completed the regular admission procedures.

C. Apply at the Office of Admissions for admission to the college. For further detail refer to the section of the bulletin on Admission and Registration.

## ADMISSION TO CANDIDACY

A candidate for the master's degree must qualify as follows:

A. Apply for admission to candidacy at the Graduate Office. Students should appl during the first graduate term in attendance.* Admission cannot be complete however, until the student has earned 12 units at San Diego State College, c six units if his undergraduate grade point average was 1.5 or better.

B. Earn and maintain a grade point average of 2.0 on all graduate work.

C. Satisfactorily complete the following: (a) scholastic aptitude test for graduate (b) scholastic achievement test, and (c) such departmental tests as may l required.

D. Receive approval of candidate's major department.

E. File with the Graduate Office a complete program of study, which has been approve by the adviser.

## GENERAL REGULATIONS

A. Extension and correspondence courses are not acceptable toward the degree.

B. Maximum study load: Summer session, one unit per week of attendance; fall o spring, 15 units per semester of full-time attendance. (If employed full time three units of courses numbered 200-298 and two additional units of course numbered 100-199; or six units of courses numbered 100-199. Any courses i excess of these amounts must be approved in advance by the Chairman o Graduate Studies.)

C. All candidates who are taking the degree with school service credentials must com plete two units in Education 290 and one additional unit in a course in bibliog raphy (290) in the major department. Candidates preparing to teach or super vise in institutions that do not require a credential will substitute an approve course in procedures of investigation and report.

D. Candidates in all majors, excepting foreign language and business education shal complete a project or thesis, for which three units of credit are allowed. Student majoring in foreign language must pass a comprehensive examination and com plete eight units of courses in foreign language numbered 200-298. Student majoring in business education may select either the regular thesis plan or a comprehensive examination in lieu of the thesis.

E. The minimum requirement for a concentration in a major shall be: (1) eigh units of courses numbered 200-299, which may include credit for a project o thesis and one unit in bibliography, and (2) six additional units in the major o an approved related field, selected from upper division or graduate courses Candidates who are preparing to teach or supervise in institutions which do no require a teaching credential must take 12 units in education courses.

F. 12 units of work must be earned after admission to candidacy.

G. 10 units must be in courses numbered 200-299.

H. Two official conferences between the student and his thesis committee are required one for planning, which is to be held immediately after the appointment of th committee, and one for evaluation at the time of completing the first draft of th thesis.

I. A project or thesis, when required, must be completed four weeks in advance of th date of the convocation at which the degree is to be conferred.

J. An application for graduation must be filed at the Graduate Office four weeks befor date of graduation.

K. Candidates are advised to keep in touch with the Graduate Office concerning specific requirements for the typing of the project or thesis and final dates for submitting bound copies, dates of graduation, and other routine procedures concerning the degree.

---

* (Fall or Spring: Apply during first six weeks of semester. Summer Session: Apply during first two weeks of term.)

# GENERAL REQUIREMENTS FOR THE BACHELOR OF ARTS AND BACHELOR OF SCIENCE DEGREES

## TYPES OF CURRICULA

San Diego State College offers the following types of curricula:

(1) Teacher education, leading to a degree and/or teaching credential.
(2) Arts and Sciences curricula, leading to a degree.
(3) Occupational curricula, leading to a degree or certificate.
(4) Preprofessional curricula, leading to admission to professional schools.

## GRADUATION REQUIREMENTS

Students entering San Diego State College for the first time, beginning with Summer Session, 1951, or thereafter, must complete a minimum of 124 semester units or the A.B. degree or a minimum of 128 semester units for the B.S. degree and comply vith other regulations specified by the college beginning with the academic year 1951-952 with subsequent changes.

Students having completed 12 semester units in residence at San Diego State College prior to Summer Session, 1951, who were eligible for graduation under the 950-51 regulations, must complete a minimum of 12 semester units in residence durng each successive two-year period, beginning with Summer Session, 1951, in order o continue eligibility for graduation under those regulations. Students not meeting his requirement or those who wish to graduate with majors, curriculums, or degrees ot in effect during the academic year 1950-1951, must meet the requirements which ecame effective with the academic year 1951-1952 with subsequent changes.

### GRADUATION REQUIREMENTS

**(a) A minimum of 124 semester units for the A.B. degree or 128 semester units for the B.S. degree, representing a four-year college course, are required for raduation.**

(b) The last 24 units of work leading to the bachelor's degree must be comleted at this college, including registration in at least two semesters, or summer ession equivalent on a week for week and unit for unit basis, for a total of 36 weeks f attendance.

**(c) At least a C average (1.0) in scholarship is required in all college work ttempted, in all work taken at this college, and in all upper division work in the major field.**

**(d) At least 40 upper division units are required for the A.B. degree or at east 36 upper division units for the B.S. degree.**

(e) The state requirements in American history, institutions, and ideals, United tates Constitution, and California state and local government must be completed for he bachelor's degree.

**(f) All requirements in general education, the major and minor fields and ny other requirements made by the college must be completed for graduation.**

### TESTS IN ENGLISH, MATHEMATICS, AND SPEECH

**Each student must demonstrate competence in the use of English, mathematics, nd speech as determined by tests administered by the college. Students failing to ass these tests satisfactorily are required to enroll in special remedial courses desigated by each department concerned. Passing the tests or completion of designated ourses is a requirement for graduation.**

## AMERICAN HISTORY, INSTITUTIONS AND IDEALS, UNITED STATES CONSTITUTION, AND CALIFORNIA GOVERNMENT

Each student of a state college to qualify for graduation shall demonstrate competence in the Constitution of the United States, and in American history, includin the study of American institutions and ideals, and of the principles of state and loca government established under the Constitution of this State, by completing appropriat courses, or by passing a comprehensive examination on these fields prepared an administered by each college. Students transferring from other institutions of collegiate grade, who have already met this requirement in college, shall not be require to take further courses or examinations therein.

**This graduation requirement may be fulfilled by any one of the followin alternatives:**

(1) By satisfactorily passing comprehensive examinations in both America history, institutions and ideals, and in the United States Constitution and principle of California government.

(2) By satisfactory completion of one of the following groups of courses:

- (a) History 17A and 17B
- (b) History 172A and 172B
- (c) Political Science 71A and 71B
- (d) Political Science 139A and 139B

(3) By satisfactorily passing a comprehensive examination in American history institutions and ideals and completion of one of the following groups of courses:

- (a) Political Science 101
- (b) Political Science 137A and 137B

(4) By satisfactorily passing a comprehensive examination in the United State Constitution and principles of California government and completion of one of th following groups of courses:

- (a) History 8A and 8B
- (b) History 179A and 179B

(5) By completion of one of the following groups of courses covering America history, institutions and ideals and completion of one of the following groups o courses covering the United States Constitution and principles of California government:

| *Courses on U. S. History* | *Courses on U. S. Constitution and California Government* |
|---|---|
| (a) History 8A and 8B | (a) Political Science 101 |
| (b) History 179A and 179B | (b) Political Science 137A and 137B |

(6) By completion of the graduation requirement in American history, institutions and ideals and the United States Constitution and principles of California government in other institutions of collegiate grade.

### Requirement in California State and Local Government

Students who have met the graduation requirements in American history, institutions and ideals and in the Constitution of the United States by completion o courses in institutions of collegiate grade outside the State of California, but wh have not met the graduation requirement in principles of California State and local government, may satisfy this requirement by satisfactory completion of one of the following courses:

- (a) Political Science 142 (also numbered under Journalism)
- (b) Political Science 143 (also numbered under Journalism)
- (c) Political Science 101 (provided that this course is not a repetition of a course taken elsewhere)
- (d) Political Science 71B or 139B (provided that the course is not a repetition of a course taken elsewhere)
- (e) History 17B or 172B (provided that the course is not a repetition of a course taken elsewhere)
- (f) History 189

## LOWER DIVISION AND UPPER DIVISION COURSES

A student is considered to have lower division standing until he has earned 60 semester units, at which time he attains upper division standing.

Courses numbered 1-99 are lower division courses; courses numbered 100-199 are upper division courses.

A student with lower division standing is not eligible to take upper division ourses, with the following exceptions: A student in the last semester of his sopho- ore year who is approaching upper division standing carrying sufficient lower division nits to complete the required minimum of 60 units may carry upper division units r the remainder of his study load. A student with sophomore standing may carry pper division courses for upper division credit provided that he has the written pproval of the chairman of the department and the Dean of Instruction. This written pproval must be filed in the Office of the Registrar on the form "Adjustment of cademic Record." Blank forms may be obtained by the student at the Office of the egistrar.

## GENERAL EDUCATION REQUIREMENTS

Forty-five semester units in courses designated in the college bulletin and in e schedule of classes as general education must be completed in addition to courses the major field, unless such courses are ones specifically required of all students as art of the general education program. These courses must be selected from the fields sted below with completion of the minimum number of units required and not ex- eding the maximum number of units allowed in each field in order to satisfy the quirement of 45 units in general education. The pattern requirements in general ucation may be fulfilled by examinations with an accompanying reduction in the 45 its but without course credit.

For specific explanation of the requirements within each field of general educa- on, refer to the explanation of requirements below.

| | *Minimum* | *Maximum* |
|---|---|---|
| (a) Social Sciences | 9 | 12 |
| (b) Natural Sciences | 9 | 12 |
| (c) Literature, Philosophy, and the Arts | 6 | 12 |
| (d) Communication: | | |
| Oral Communication | 2 | 2 |
| Written Communication | 3 | 6 |
| (e) Psychology | 3 | 6 |
| (f) Physical and Health Education: | | |
| Physical Education | 2 | 2 |
| Health Education | 2 | 2 |
| (g) Mathematics | 0 | 6 |
| (h) Foreign Languages | 0 | 6 |
| (i) Family Life Education | 0 | 6 |
| (j) Air Science and Tactics | 0 | 6 |
| **Total number of units required** | 45 | |

### EXPLANATION OF REQUIREMENTS

(a) **Social Sciences:** A minimum of nine or maximum of 12 units must be lected from general education courses with at least three units in two or more of e following fields: anthropology, economics, geography (except Geography 1), his- ry, political science, social science, sociology, and similar fields, including the required struction in United States history, Constitution, and American ideals. **NOTE:** urses in business, library science, philosophy, or psychology may not be used to tisfy the social science requirement.

(b) **Natural Sciences:** A minimum of nine or maximum of 12 units must be ected from general education courses in the natural sciences. At least one course not less than three units must be selected in the life sciences from biology, botany, ysiology, zoology, and similar fields; and at least one course of not less than three its in the physical sciences from astronomy, chemistry, Geography 1, geology, ysics, physical science, and similar fields. At least one unit of either physical or life ences or the three-hour equivalent must represent laboratory work. **NOTE:** Courses engineering, industrial arts, mathematics, or photography, may not be used to satisfy natural science or laboratory requirement.

(c) **Literature, Philosophy, and the Arts:** A minimum of six or maximum o 12 units must be selected from general education courses in literature, philosophy and the arts. At least one course of not less than three units must be selected i literature or in philosophy from courses in English, comparative literature, philosophy or similar fields. Courses in the arts must be selected from the fine arts, includin aesthetics, art, and music, or from the practical arts. A maximum of three units ma be counted in the practical arts toward general education.

(d) **Oral and Written Communication:** Two units must be completed in ora communication by passing Speech Arts 3. Students failing the Speech Interview ar required to register concurrently in Speech Arts 2, Oral Communication Laboratory for one unit of credit which may not be counted toward general education requirements

A minimum of three units, with a maximum of six units, must be selected fron courses in written communication. All students must complete three units in Englis 1. Students failing the English Test are required to complete English A for thre units as a prerequisite for other courses in English. English A may not be counted toward general education requirements.

(e) **Psychology:** Three units must be completed in Psychology 1. An additiona three units may be selected from other general education courses in psychology.

(f) **Physical Education and Health Education:** Two units must be completed in Health Education 21 and two units must be selected from general education courses in physical education.

The physical education requirement must be satisfied by completion of fou semesters of activity courses for a minimum and maximum of two units. **NOTE:** No more than one activity course may be counted within any semester and an activity course may not be repeated for credit, except courses designated as varsity sports.

(g) **Mathematics:** From zero to six units may be selected from general education courses in mathematics. Students failing the Mathematics Test must complete Mathematics X. This course may not be counted toward the general education requirements. **NOTE:** Any year-course in mathematics completed in high school may not be repeated in college for credit.

(h) **Foreign Languages:** From zero to six units may be selected from general education courses in foreign languages. **NOTE:** Year-courses in foreign languages completed in high school may not be repeated in college for credit, except that the last year-course in any foreign language sequence completed in high school may be repeated in college for a maximum of three units of repeated work to be applied toward graduation.

(i) **Family Life Education:** From zero to six units may be selected from general education courses in family life education. Courses in family life education may be found in the fields of business, health education, home economics, psychology, and sociology.

(j) **Air Science and Tactics:** Three units will be granted upon completion of the eight units given in the Basic Course and three units upon completion of the 12 units given in the Advanced Course. These six units correspond to the parts of the AFROTC program which lie in the areas of social science, natural science, communication, and other areas of the general education pattern; however, these units will not be included within the unit minima or maxima specified in any such area.

## COURSES IN GENERAL EDUCATION

Courses selected from the following groups may be counted toward the 45 units required in general education, unless the course is part of the student's major field and within the limitations indicated in the section on General Education Requirements. These courses are described in the section of the bulletin on Announcement of Courses. An asterisk (*) preceding the course number designates the course as a general education course. If additional general education courses are offered during the year, they will appear in the Class Schedule, designated as general education courses.

The courses listed below carry the number of units for the course in parentheses following the course title.

## SOCIAL SCIENCES

**Anthropology**
1A-1B—General Anthropology (3-3)
54—Social Anthropology (3)
152—World Ethnography (3)
165—Ethnology and Race Psychology (3)

**Economics**
1A-1B—Principles of Economics (3-3)
102—Comparative Economic Systems (3)
111—Economic History of U. S. (3)
115—Current Economic Problems (3)
131—Public Finance (3)
170—Government and Business (3)

**eography**
2—Introduction: Natural and Cultural Regions (3)
10—Economic Geography (3)
12A-12B—Culture Worlds (3-3)
145—Conservation of Natural Resources (3)

**istory**
4A-4B—Modern Europe (3-3)
8A-8B—The Americas (3-3)
17A-17B—American Civilization (3-3)
121A-121B—Medieval History (3-3)
172A-172B—Constitutional History of U. S. (3-3)
179A-179B—Intellectual History of the American People (3-3)

**Political Science**
1A-1B—Introduction to Government (3-3)
71A-71B—Introduction to American Government and Politics (3-3)
101—American Institutions (3)
105—American Political Thought (3)
111A-111B—Theory of the State (3-3)
137A-137B—Constitutional Government (3-3)
139A-139B—American Constitutional Development (3-3)
150A-150B—International Relations (3-3)

**Social Science**
40—Contemporary Problems (3)

**Sociology**
45—Marriage and the Family (3)
50—Contemporary Social Problems (3)
51—Principles of Sociology (3)
110—Race Relations (3)
135—Marriage and the Family (3)
145—Social Psychology (3)

## NATURAL SCIENCES

**Astronomy**
1—Descriptive Astronomy (3)
2—Modern Astronomy (3)
9—Practice in Observing (1)
101—Principles of Astronomy (3)
105—Historic Development of Astronomy (3)

**iology**
1—Survey of Biology (3)
3—Principles of Biology (3)
4—Plant and Animal Types (3)

**tany**
150—Readings in Biology (2)
160—Evolution (2)

**emistry**
2A-2B—Fundamentals of Chemistry (3-3)

**ography**
1—Introduction: Physical Elements (3)

**Geology**
2—General Geology (3)
3—General Geology Laboratory (1)
4—Physiography of U. S. (3)

**Oceanography**
100—The Oceans (2)

**Physical Science**
1—Introduction to Physical Science (3)
2—Introduction to Physical Science (3)
41—Man and His Physical World (3)
150—Readings in the Physical Sciences (2)

**Physics**
2A-2B—General Physics (3-3)
3A-3B—Physical Measurements (1-1)
5—Physics of the Home (4)
148—Introduction to Modern Physics (3)

**Zoology**
150—Readings in Biology (2)
160—Evolution (2)
165—Human Heredity (2)

## LITERATURE, PHILOSOPHY, AND THE ARTS

### Aesthetics
2—Introduction to Music (3)
5—Art Orientation (2)
50—Appreciation and History of Art (2)
51—Survey of Mexican Art (2)
102—Great Music (3)
138—Introduction to Aesthetic Appreciation (1)
150—Appreciation and History of Art (2)
162—History and Philosophy of the Dance (2)

### Art
6A—Design (2)
8—Costume and House Furnishings (2)

### Comparative Literature

# BACHELOR OF ARTS DEGREE IN ARTS AND SCIENCES

## MAJOR REQUIREMENTS

One major field is required for the A.B. degree in addition to 45 units in general education courses. At least 40 units of the 124 required for graduation must be in courses carrying upper division credit.

The major in arts and sciences consists of a minimum of 24 upper division units with prerequisite and related lower division courses as prescribed by the department offering the major. The occupational major consists of a minimum of 36 upper division units with prerequisite and related lower division courses as prescribed by the department offering the major.

### Majors

Majors in Arts and Sciences are offered in the following fields:

- Art
- Bacteriology
- Botany
- Chemistry
- Economics
- English
- French
- Geography
- History
- Industrial Arts
- Journalism
- Language Arts
- Life Science
- Mathematics
- Music
- Physical Education
- Physical Science
- Physics
- Political Science
- Psychology
- Romance Languages
- Social Science
- Sociology
- Spanish
- Speech Arts
- Zoology

Occupational majors are offered in the following fields:

- Personnel Management
- Public Personnel Management
- Public Administration
- Recreation
- Social Service

### The General Major

Occupational curricula are also offered under the general major in the following elds: Home Arts, Inter-American Relations, and Prelegal. Students not electing one f these curricula who need a general type of training for other vocational objectives must consult with the Dean of Instruction before permission may be granted to follow he pattern for the general major.

In addition to the general education requirements, a student taking the general major must complete 36 upper division units chosen from three fields with not more han 15 units nor fewer than nine units from any one field. A minimum of a year-course n each field must be completed in the lower division as foundation for upper division work in the general major. A minor is not required; however, four additional upper ivision elective units must be completed to meet the minimum requirement of 40 upper ivision units for graduation.

All students following the pattern for the general major must obtain forms from he Office of the Dean of Instruction, complete the forms, and have the general major pproved by the Dean of Instruction. The forms will then be submitted by the student o the chairman of each of the three departments comprising the general major for pproval, revision, or rejection.

## MINOR REQUIREMENTS

A minor in arts and sciences may be required by the department offering the ajor. In departments not requiring a minor, the minor is optional with the student. minor generally consists of a minimum of 15 units, or maximum of 22, six to nine nits of which must be in courses carrying upper division credit as specified by the epartment. A few minors may exceed the 22 unit maximum. The minor may include ourses which are also included in the general education requirements.

## Minors

Minors in Arts and Sciences are offered in the following fields:

- Air Science
- Anthropology
- Art
- Astronomy
- Bacteriology
- Botany
- Business
- Chemistry
- Comparative Literature
- Economics
- Education
- Engineering
- English
- French
- Geography
- Geology
- German
- Health Education
- History
- Home Economics
- Industrial Arts
- Journalism
- Life Science
- Mathematics
- Music
- Philosophy
- Physical Education
- Physical Science
- Physics
- Political Science
- Psychology
- Public Administration
- Recreation
- Secretarial Management
- Sociology
- Spanish
- Speech Arts
- Zoology

# BACHELOR OF SCIENCE DEGREE IN ARTS AND SCIENCES

## REQUIREMENTS FOR THE MAJOR

One major field is required for the B.S. degree in addition to 45 units in general education courses. A minimum of 128 units is required for graduation. A minor field is not required.

The major consists of a minimum of 36 upper division units with prerequisites and related courses in the lower division as prescribed by the department offering the major. These lower division courses are considered part of the major and may not be counted toward the 45 units in general education, except as may be specified in each major field.

### Majors

Majors in Arts and Sciences are offered in the following fields:

- Bacteriology
- Botany
- Chemistry
- Engineering
- Life Science
- Physics
- Zoology

Occupational majors are offered in the following fields:

- Accounting
- Banking and Finance
- Business Management
- Credit Management
- General Business
- Insurance
- Laboratory Technique
- Marketing
- Office Management
- Secretarial Management

# PROFESSIONAL CURRICULA IN TEACHER EDUCATION

## ADMISSION TO TEACHER EDUCATION

Students who plan to earn credentials for teaching or other school service should apply for admission to teacher education during either the second semester of the freshman year or the first semester of the sophomore year. Students entering the college at the end of the sophomore year will apply at the beginning of the junior year. No courses in education may be taken until admission is granted; any exception to this rule must have the approval of the Chairman of the Education Department. The standards for admission to Teacher Education are different from those for admission to the college; therefore, admission to the college does not guarantee that the student will be admitted to teacher education. The committee on admission to teacher education will base its decision upon the following factors:

1. A satisfactory score on the college aptitude test taken at the college.
2. Competence in the use of English and satisfactory ability in arithmetic, handwriting, reading and spelling as indicated by scores on fundamentals tests. (See college calendar for dates of these tests which should be taken in the second semester of the freshman year.)
3. Satisfactory scores on the General Culture Test in the case of candidates for junior high school, special secondary, general secondary, or school psychometrist credentials. (See college calendar for dates of this test, which should be taken in the second semester of the sophomore year.)
4. Quality of speech habits and voice control as indicated by the satisfactory completion of a speech test given at the college or satisfactory completion of a course in corrective speech.
5. Results of the college health examination given for teaching credential candidates.
6. Interviews with representatives of the Admissions Committee and with a representative of the department in which the student is a major. The interviewing committee will base its evaluation upon the following factors established by the State Board of Education: intelligence, scholarship, professional aptitude, personality and character, speech and language usage, and many-sided interests.
7. Satisfactory grade point averages of the first two years or more of a given curriculum or its equivalent and of all subsequent work taken for the credential. Minimum grade point averages are indicated below:
   a. Elementary, Kindergarten-Primary, Special Secondary credentials, 1.2.
   b. General Secondary credential: all subjects, 1.5, and major field, 1.75.
   c. Junior High School and School Psychometrist credentials, 1.5.
8. For administration and supervision credential candidates, a satisfactory grade point average (minimum 1.75) on all work applicable to that credential, exclusive of the work applied to the basic credential.
9. For general secondary credential candidates, an official evaluation and program approved by the authorized departmental representative in the student's major field and by a representative in secondary education.

### Transfer Students

Students who have completed two or more semesters of work in another college, upon transferring to San Diego State College, should make application for admission to teacher education as soon as they enroll in the college. Transfer students admitted to the college with either upper division or graduate standing must take the necessary tests for admission to teacher education given during the testing and advising program before the beginning of their first semester at the college. (See college calendar for dates.)

### Transfer Students With Emergency Credentials in Elementary Education

Certain adaptations in the education courses have been made to meet the needs of experienced teachers who hold an emergency credential in elementary education. See the Coordinator of Elementary Education for details.

### Advanced Standing in Teacher Education

A student transferring into San Diego State College with advanced standing must complete a minimum of six units of professional education work in residence at San Diego State College before recommendation for a credential, regardless of extent of education work already completed elsewhere. Whenever a transfer student has had teaching experience, the college requires that a statement from the employer(s) be filed with the Evaluations Office.

### Evaluation of Credits

After an interval of five years, courses in education are re-evaluated and subject to reduction in credit, in light of such new requirements as may have been put into effect and changes in educational procedures. Students formerly in attendance will not be considered to be working in the curriculum until an evaluation and statement of credit has been secured from the Evaluations Office. All courses taken either at this college or elsewhere must be approved by an official adviser in order to be credited toward meeting credential requirements or pattern requirements for a degree.

## TEACHING CREDENTIALS

San Diego State College is authorized by the State of California to recommend students for the teaching credentials listed below. To be recommended, students must complete, or have completed, the bachelor's degree in one of the curricula offered for teachers.

| *The credential* | *Subjects and grades for which it is valid* |
|---|---|
| General Elementary | All grades through the eighth. |
| Kindergarten-Primary | Kindergarten through third. |
| General Junior High (must be taken with a minor in industrial arts or home economics, or with another credential) A special program is offered in combination with the General Elementary Credential | All subjects in grades seven, eight, and nine in all elementary or secondary schools. |
| General Secondary | All subjects in the public schools in grade 7 and above. |
| Health and Development | Authorizes to serve as supervisor of health in the capacity of school nurse. |
| Special Secondary in Art | Art in all grades of the public schools. |
| Special Secondary in Business Education | Business education subjects in all grades of the public schools. |
| Special Secondary in Music | Music in all grades of the public schools. |
| Special Secondary in Physical Education | Physical education in all grades of the public schools. |
| Special Secondary in Speech Arts | Speech in all grades of the public schools. |
| Special Secondary in Correction of Speech Defects | Correction of speech defects in all grades of the public schools. |
| Special Secondary for teaching the Mentally Retarded Child | To teach mentally retarded children in elementary and secondary schools. |

| | |
|---|---|
| **School Psychologist** | **To serve as school psychologist.** |
| **School Psychometrist** | **To serve as assistant to the school psychologist.** |
| **Administration in Elementary Education** | **Authorizes for credential to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in elementary schools.** |
| **Supervision in Elementary Education** | **Authorizes for credential to supervise instruction in elementary schools.** |
| **Administration in Secondary Education** | **Authorizes for credential to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in secondary schools.** |
| **Supervision in Secondary Education** | **Authorizes for credential to supervise instruction in secondary schools.** |
| **Special Subject Supervision** | **Supervision in the special subject in all grades.** |

### Application Pending

| | |
|---|---|
| Special Secondary in Industrial Arts | Industrial Arts in all grades of the public schools. Application for this credential is being made during the school year 1953-54. Potential candidates for this credential may obtain information from the chairman of the Industrial Arts Department. |

## COMBINATION OF CREDENTIALS

Students who seek more than one teaching credential must complete in full the curriculum for each, with only such exceptions as are indicated in the statement of requirements.

A combination of the elementary school credential and the junior high school credential may be secured by completing the requirements for the elementary school credential and the following additional requirements.

(a) A junior high school teaching major.
(b) Education 100B in the major field or equivalent elementary education course.
(c) Three units of directed teaching, or equivalent, in a junior high school.
(d) Education 115B or 184A.

A combined program leading to the junior high and general elementary credentials is available. Entering students interested in such a program should request an adviser for the general junior high credential.

A combination of the junior high school credential and a special secondary credential may be secured by completing the requirements for the special secondary credential and the following additional requirements:

(a) A junior high school teaching major, excluding the special secondary credential majors, and a teaching minor. This minor may be the special secondary field.
(b) Education 100B in the junior high school teaching major.
(c) Three units of student teaching in the junior high school teaching major.

The general elementary credential and the special secondary credential in the Correction of Speech Defects may be combined by (1) completing a speech minor, (2) directed teaching in speech correction, and (3) completing additional upper division requirements in speech, education, and psychology.

## GENERAL ELEMENTARY AND KINDERGARTEN-PRIMARY CREDENTIALS WITH THE BACHELOR OF ARTS DEGREE

The general elementary and kindergarten-primary credentials are granted with the A.B. degree in teacher education. One major in Education, in addition to 45 within general education courses, and one teaching minor are required for either credentials and the degree. Curricular outlines for these credentials may be obtained from the Coordinator of Elementary Education.

Summary of unit requirements:

| | *Units* |
|---|---|
| General education | 45 |
| Major in education | 39–42 |
| Additional units, including minor and pattern requirements for the credential | 40–41 |
| Total number of units required for graduation | 124 |

### Major for the General Elementary Credential

The major consists of 39 upper division units to include the following courses: Education 102A-102B (6 units); Education 147 (10 units); Education 148 (12 units); Education 115A (2 units); Education 116 (7 units); and Health Education 151 (2 units).

Lower division background courses for the credential include: Social science to include regional geography (9 units); natural science to include physical geography (12 units); literature, philosophy, and the arts to include courses in music fundamentals, music methods, arts and crafts, and design (12-15 units); physical education to include games and activities for the elementary school (2½ units).

### Major for the Kindergarten-Primary Credential

The major consists of 43 upper division units to include the following courses: Education 102A-102B (6 units); Education 147 (10 units); Education 148 (12 units); Education 116 (7 units); Education 146 (4 units); Education 115A (2 units); and Health Education 151 (2 units).

Lower division background courses for the credential include: Social science (9 units); natural science (12 units); literature, philosophy, and the arts to include courses in music fundamentals, music methods, piano, arts and crafts, and design (13-15 units); physical education to include games and activities for the elementary school (2½ units).

### Minor

A teaching minor for the general elementary and kindergarten-primary credentials consists of a minimum of 15 units in one field, six units of which must be in courses carrying upper division credit. Minors are offered in the following fields.

- English
- Foreign Languages
- General Science
- Industrial Arts
- Mathematics
- Physical Education
- Social Science
- Speech Arts (creative or speech correction)

The *minor in English* must include three units in American literature.

The *minor in foreign languages* may be in one or more of the foreign language fields.

The *minor in general science* shall consist of laboratory courses in Biology 3 and 4 or approved equivalents, and Physical Science 1 and 2 or equivalents, plus six upper division units chosen from Botany 119 or 150, Industrial Arts 185 or 186, Physics 148, Zoology 119, 160, or 165.

The *minors in industrial arts, mathematics, and physical education* are the same as the arts and sciences minors described under the respective departments.

The *minor in social science* must include six upper division units in history or six upper division units in geography and further work in either lower or upper division selected from anthropology, economics, geography, history, political science, or sociology.

The *minor in speech arts* (creative) is the same as the arts and sciences minor described under the department. This minor is open to students in the general elementary or the kindergarten-primary credential curriculum. The minor in speech

oe planned and approved by the education adviser for the speech correction mu ential and may be used only as part of the general elementary credential correction c
curricu second minor, though not required, may be chosen from art, health education, e economics, music, or recreation.

Students taking the general elementary or kindergarten-primary credential in combination with a special secondary credential may use the special secondary major for the minor in the elementary or kindergarten-primary fields.

## GENERAL JUNIOR HIGH SCHOOL CREDENTIAL WITH THE BACHELOR OF ARTS DEGREE

The general junior high school credential is offered to students with minors in home economics or industrial arts or to students who wish to take this credential in combination with a general elementary, kindergarten-primary, or special secondary credential. The general junior high school credential is granted with the A.B. degree in teacher education.

One teaching major and one teaching minor, in addition to 45 units in general education courses, are required of all students taking this credential. Students not taking this credential in combination with another credential are required to complete 24 units in professional education courses and a minor in home economics or industrial arts. Students taking this credential in combination with another credential should refer to the section of the bulletin entitled: Combination of Credentials.

### Teaching Majors and Minors

Teaching majors and teaching minors are offered in the following fields:

| *Teaching Majors* | *Teaching Minors* |
|---|---|
| English | Home Economics |
| Foreign Languages | Industrial Arts |
| General Science | or |
| Mathematics | The special secondary field major when the combination credentials are earned |
| Social Science | |

Summary of unit requirements:

| | *Units* |
|---|---|
| General education | 45 |
| Teaching major (minimum requirements) | 24 |
| Teaching minor | 15 |
| Professional courses in education | 24 |
| Electives | 16 |
| Total number of units required for graduation | 124 |

### Teaching Major

A *teaching major* consists of 24 to 33 units as specified below. Courses in the major are in addition to the 45 units required in general education courses, unless otherwise indicated.

A *teaching major in English* shall consist of six units in a lower division year-course, and 18 units in English courses carrying upper division credit, including three units in American literature and three units in Shakespeare. Recommended as part of the major: English 192.

A *teaching major in foreign languages* may include one or more of the foreign languages for a minimum of 24 units, 18 units of which must be in courses carrying upper division credit.

A *teaching major in general science* shall consist of a minimum of 33 units, at least 12 units of which must be in courses carrying upper division credit. Nine units may be applied toward general education requirements. The lower division courses must cover all of the following areas of science: astronomy, botany, chemistry, geology, physics, and zoology. Lower division minimum requirements: Biology 3 and 4, and Physical Science 1 and 2, or equivalent courses. Upper division requirements: Botany

119 or Zoology 119, and Physical Science 150 or Physics 148, plu t least one more course in each of life and physical sciences for a minimum of 12 upp division units. These elective courses, Industrial Arts 85, Physics 22, Physiology 1 oology 20, Botany 150, Industrial Arts 185, Zoology 160 and 165 and the alternate ses in upper division above are available to students who take only the minimu wer division courses. Electives may be used to complete the required minimum of 33 A student electing this major must have one year each of high school algebra a geometry, or equivalent.

A *teaching major in mathematics* shall consist of a minimum of 24 units, at least 18 units of which must be in courses carrying upper division credit.

A *teaching major in social science* shall consist of a minimum of 24 units, at least 18 units of which must be in courses carrying upper division credit. There shall be a concentration of 12 units, at least six units of which must be in courses carrying upper division credit, selected from one of the following fields: anthropology, economics, geography, history, political science, or sociology. A year-course in American history must be included in the lower or upper division.

### Teaching Minors

A *teaching minor* consists of a minimum of 15 units, six units of which must be in courses carrying upper division credit. Teaching minors are offered in home economics or industrial arts.

A *teaching minor in home economics* consists of a minimum of 15 units to include Home Economics 5 or 62 and 10 or 11 in the lower division; and Home Economics 150 and 170 in the upper division. Three additional units should be chosen in consultation with the adviser in home economics.

A *teaching minor in industrial arts* consists of a minimum of 15 units, six units of which must be in courses carrying upper division credit. Required: Industrial Arts 21 and 122A, and at least one lower division and one upper division course in two of the following areas: general woodworking, general metalworking, electricity and radio, transportation, and graphic arts.

### Professional Courses in Education

Professional courses include 24 units in the following: Education 184A-184B-184C, 100B (methods in the major and minor fields), 116; plus Health Education 151.

## SPECIAL SECONDARY SCHOOL CREDENTIAL WITH THE BACHELOR OF ARTS DEGREE

The special secondary school credential is granted with the A.B. degree in teacher education in the following fields: art, business education, music, physical education, and speech arts. Majors in these fields are in addition to 45 units in general education courses. Professional courses in education are also required. Certain of these credentials require, in addition, a teaching minor in an academic field. For a statement of requirements in the major and in professional education, refer to the credentials below.

Summary of unit requirements:

| | *Units* |
|---|---|
| General education | 45 |
| Major for the credential | 39–58 |
| Professional courses in education | 22–26 |
| Minor, if required, and electives | 0–18 |
| Total number of units required for graduation | 124 |

### TEACHING MINORS FOR THE SPECIAL SECONDARY CREDENTIAL

A teaching minor is required for the special secondary credential in men's physical education. A minor is optional for the other special secondary credentials. The minor consists of a minimum of 15 units, or maximum of 22, six units of which must be in courses carrying upper division credit, except for the general science minor sical science and general science. Courses in the minor may include selected from general education courses. Teaching minors are offered in the following fields:

English
Foreign languages
General science
Health education
Home economics
Industrial arts
Mathematics
Social science

The teaching minors include certain requirements:

*English:* Nine upper division units in English are required, including three units in American literature. Students who plan later to secure a general secondary credential with a minor in English must follow the program outlined under the general secondary credential.

*Foreign languages:* The minor must be in one foreign language field.

*General science:* Courses in the minor are to be selected from either of the following two general secondary credential minors: (1) life science and general science, (2) physical science and general science.

*Health education:* The minor must include Health Education 65, 90, 152, 145 or 153, 199, and Physical Education 151.

*Home economics:* The minor must include Home Economics 5 or 62, and 10 or 11 in the lower division; and Home Economics 150 and 170 in the upper division. Three additional units should be chosen in consultation with the adviser in home economics.

*Industrial arts:* The minor must include Industrial Arts 21 and 122A and one lower division and one upper division course in each of two of the following areas: general woodworking, general metalworking, electricity and radio, transportation, and graphic arts; and electives to make a total of nine upper division units.

*Mathematics:* See general statement above.

*Social science:* The minor must include courses selected from anthropology, economics, geography, history, political science, or sociology. Six units must be in a year-course sequence and six units are required in American history or three units in American history and three units in political science.

## SPECIAL SECONDARY CREDENTIAL IN ART

Courses in the major are in addition to 45 units of general education courses.

The teaching major in art for the special secondary ceredential consists of 44-46 units to include the following courses: Lower division: in general education: Aesthetics 5 or 51 and 50 (4 units); in the major: Art A (or high school equivalent), Art B, 6A-6B, 14A, 61A-61B, and six to eight units of art electives (20-22 units). Upper division: Aesthetics 150, Art 106A, 112A, 116A, 119A, 194A, 195A, Speech Arts 140A, and five units of art electives (22 units).

Professional courses in education consist of 22 upper division units to include the following courses: Education 184A-184B-184C, 116, 119, and 100B-A. Health Education 151 (2 units) is also required.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors above.

## SPECIAL SECONDARY CREDENTIAL IN BUSINESS EDUCATION

Courses in the major are in addition to 45 units of general education courses. The major in business education must include the following courses: Lower division: Economics 1A-1B and Business 20 (these courses may be counted as part of general education requirements); Business 1B, 8, 14A-14B, 18A, 25; and the requirements in *two* of the subfields listed below, of which *accounting* or *secretarial* must be one. Recommended: Geography 10.

Subfields:

*Accounting:* Select three units from Business 2, 21, 24, or 27.
*Business Management:* Business 18B.
*Merchandising:* Business 24.
*Secretarial:* Business 5B. (If satisfied, select three units from Business 2, 21, 24, or 27.)

Upper division: Business 105A-105B, 108, 121, 190; and the requirements in *two* of the subfields listed below, of which *accounting* or *secretarial* must be one. The two fields selected in the lower division must be continued in the upper division. Subfields:

*Accounting:* Select six units from Business 160A, 160B, 161A, or 164A.

*Business Management:* Select six units from Economics 140, Business 103A, 125, 133, 154 or 184.

*Merchandising:* Select seven units from Business 123, 185, 187A, 187B, 186, or Art 107.

*Secretarial:* Business 113A-113B.

Professional courses in education consist of 22 upper division units to include the following courses: Education 184A-184B-184C, 116, 100B-T, and one of the following: Education 100B-B, 100B-ME, or 100B-S. Health Education 151 (2 units) is also required.

In addition to the requirements stated above, the student must present satisfactory evidence of one-half year, or 1,000 hours of approved experience in the field named in the credential.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors above.

## SPECIAL SECONDARY CREDENTIAL IN MUSIC

Students planning to work for the special secondary credential in music should consult with the chairman of the Music Department before registering and plan their course in view of individual variations in background and needs.

General basic requirements for the credential are as follows:

1. Demonstration of proficiency in vocal or instrumental *performance* comparable to a level of difficulty of the Bach two-part inventions or the easier Haydn sonatas for the piano before admission to the major may be granted.
2. Selection of a major instrument or of voice before admission to the major program and demonstration of *performance ability* developed through class or individual instruction after admission to the program.
3. Appearance as a soloist in at least one student recital during each semester in residence, after completion of two semesters of college work.
4. Competence in elementary keyboard technique. (The student's attention is directed to the Music 10A-B-C-D requirement.)
5. As laboratory experience participation in two activities *each* semester, beginning with the first year and continuing until the student has completed 14 units of activities. (During the semesters when the student is in the directed teaching program, one activity each semester is required.)
6. Before recommendation for admission to directed teaching will be granted, credential candidates must have completed all lower division courses in beginning class study of orchestral instruments and voice, Music 146A-146B, and must have passed the minimum state credential requirements in voice and piano, with or without credit, which are as follows:

(a) Piano: Ability (1) to play a Bach two-part invention; (2) to play an artistic accompaniment; (3) to play at sight four-part hymns.

(b) Voice: Ability (1) to sing at least one song representative of each of the following periods of vocal literature: Classic, Romantic, Modern; (2) to sing at sight any part of a four-part hymn.

Students whose background in piano is inadequate for these requirements must register in their first semester for appropriate private or class instruction, with or without credit. Students with insufficient background in voice must register for voice instruction no later than the third semester.

### Specific Requirements for the Major

Courses in the major are in addition to 45 units of general education courses, xcept that nine units of music activity courses may be counted in general education toward degree requirements in the area of literature, philosophy, and the arts.

*Lower division requirements:* Music 9A-9B, 10A-10B-10C-10D (may be omitted in part or in full upon evidence of satisfactory piano technique), 15A-15B, 52A- 52B, 59A-59B; two units selected from 20A-20B, 25A-25B, 30A-30B, and 35; and eight units of music activity courses selected from courses numbered 70 to 87 (see general basic requirements above). Total: 37 lower division units.

*Upper division requirements:* Music 109A, 146A-146B-146C; five units selected from 120A-120B, 125A-125B, 130A-130B, and 135; four units selected from 111, 112, 116, 117, 121, 122, 126, 127, 131, 132, 150A-150B-150C-150D; six units of music activity courses selected from courses numbered 170 to 187; and four units of upper division electives selected from the areas of applied music, music history and literature, and composition and instrumentation. Total: 24 upper division units.

### Professional Courses in Teacher Education

Professional courses in education consist of 24 upper division units to include the following courses: Education 184A-184B-184C, 116, 117A, 145A, and 100B-Mu. Health Education 151 (2 units) is also required.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field selected from the teaching minors for the general secondary credential.

## SPECIAL SECONDARY CREDENTIAL IN PHYSICAL EDUCATION (MEN)

Courses in the major are in addition to 45 units of general education courses.

The major in physical education consists of 42 units to include the following: Lower division: Physical Education 53, 63, 64, 72, Health Education 65 (11 units); and Physiology 1A and Zoology 8 (6 units). Upper division: Physical Education 141, 142, 145, 146, 151, 155, 168, 170A or 170B, 177, 190, and two units of physical education electives (25 units).

Professional courses in education consist of 22 upper division units to include the following courses: Education 184A-184B-184C, 116, 100B-PE, and 100B in the minor field. Health Education 151 (2 units) is also required.

A teaching minor is required. Refer to the teaching minors for the special secondary credential listed above.

## SPECIAL SECONDARY CREDENTIAL IN PHYSICAL EDUCATION (WOMEN)

Courses in the major are in addition to 45 units of general education courses.

The major in physical education consists of 41½ units, including general education courses in physical education. Lower division: Physical Education 1A, 2A, 2B, 3A, 3B, 4, 5, 6, 13A, 53, and 72; and Physiology 1A or Zoology 20; and Zoology 8. (14½ units.) Upper division: Physical Education 151, 155, 156A, 156B, 160, 161, 164A, 164B, 168, 170B, 185, and 190. (27 units.) A minor is not required; however, a teaching minor selected from the general secondary teaching minors is strongly recommended.

Professional courses in education consist of 20 upper division units to include the following courses: Education 184A-184B-184C, 116, and 100B-PE. Health Education 151 (2 units) is also required.

## SPECIAL SECONDARY CREDENTIAL IN SPEECH ARTS

Courses in the major are in addition to 45 units of general education courses.

The major in speech arts consists of 45 units to include the following: Lower division: Speech Arts 4, 11A, 55A or 55B, 56A, 60A, 81 and three units in speech electives (21 units). Upper division: Speech Arts 150, 159, 176 or 179A; three units selected from 162, 191, or 192A; nine units selected from 108, 118, 140, 154A, 154B, 155, 182, or 183; and three units selected from upper division courses in English literature.

Professional courses in education consist of 20 upper division units to include the following courses: Education 184A-184B-184C, 116, and 100B-SA. Health Education 151 (2 units) is also required.

A teaching minor is not required, but students are urged to complete a minor and the methods course (Ed. 100B) in an academic field. Refer to the teaching minors for the special secondary credential listed above.

## SPECIAL SECONDARY CREDENTIAL IN CORRECTION OF SPEECH DEFECTS

This credential is granted only to students who can verify two years of successful eaching experience or four semester hours of superior student teaching completed in an approved teacher education institution and who hold a valid California teacher ertificate, credential, or life diploma of elementary or secondary grade. (In other words, this credential accompanies a special secondary, general secondary, or general elementary credential.) Students must show credit in the following subjects, or their equivalents:

| | Units |
|---|---|
| *Lower Division* | |
| Psychology 1 and Oral Communication | 5 |
| *Upper Division* | |
| Speech Arts 150, Phonetics | 3 |
| Speech Arts 176, Articulatory Problems | 3 |
| Speech Arts 179A-179B, Nervous Speech Disorders | 6 |
| Psychology 131, Foundations of Personality | 2 |
| Education 181, Exceptional Children | 3 |
| Education 102A, or 102D or 184C | 2-4 |
| Psychology 151, Introduction to Clinical Appraisal | 3 |
| Education 155, 230 or Psychology 152 | 3 |
| Education 116 or 316, 88 hours of supervised speech correction | 3 |
| Total | 33-35 |

## SPECIAL SECONDARY CREDENTIAL FOR TEACHING THE MENTALLY RETARDED CHILD

An applicant for the special secondary credential for teaching the mentally retarded child must have completed the following minimum requirements:

1. Possession of a valid kindergarten-primary, general elementary, junior high school, or general secondary credential.
2. Completion of 18 semester hours of professional work selected from the following fields:
    a. Required group: Education 102B, 102C or 184B; 181; 182 or 185; Art 61A or 161A; and three units of directed teaching of the mentally retarded.
    b. Additional work to complete the required total of 18 semester hours selected from any of the following electives: Education 176, 144, Psychology 132, 150, or 151.
3. The 18-unit requirement will be reduced 4 units for each year of verified, successful experience in teaching special classes for mentally retarded children, the total reduction not to exceed 12 units.
4. At least six semester units of the 18 required must have been completed within five years of the time application is made for the credential.
5. Twelve units of work must have been completed at this college.

## HEALTH AND DEVELOPMENT CREDENTIAL

This credential is offered for school nurses only. Requirements for this credential include:

1. Possession of a valid license issued by the official California State board or agency in charge of this profession in California.
2. Possession of the Public Health Nurse certificate.
3. The completion of six semester units of work including courses in:
    a. Educational Psychology (Education 130)
    b. Administration of the School Health Program (Health Education 153)
    c. Social case work, or rural education, or child hygiene (Health Education 151)

Pattern of work to be approved by adviser appointed by the Chairman of the Department of Education.

## SCHOOL PSYCHOLOGIST CREDENTIAL

Each applicant for recommendation for the school psychologist credential shal have completed the following minimum requirements:

1. Possession of a valid general elementary or general secondary credential.
2. One year of successful teaching experience.
3. Possession of a master's degree in psychology or educational psychology.
4. Each applicant must complete the following course requirements:

A. Child development, mental hygiene, and counseling and guidance, including interviewing:

| | *Units* |
|---|---|
| Education 102B, Child Growth and Development, or Psychology 106, Development Psychology | 3 |
| Psychology 132, Personality Adjustment | 2 |
| Psychology 152, Introduction to Methods of Counseling or Education 233, Guidance Counseling Techniques | 3 |

B. Psychology and education of exceptional children, social case practice including field work and clinical psychology:

| | |
|---|---|
| Education 181, Exceptional Children | 3 |
| Sociology 230, Principles of Social Case Work | 3 |
| Psychology 151, Introduction to Clinical Appraisal or Psychology 211, Advanced Clinical Psychology | 3 |

C. Educational psychology and educational measurements including field work and elementary statistics:

| | |
|---|---|
| Psychology 130, Educational Psychology | 2 |
| Education 102A, Measurement and Evaluation in Elementary Education, Education 102D, Measurement and Evaluation in Secondary Education, or Education 184C, The Teaching Process | 2-4 |
| Psychology 104A, Statistical Methods in Psychology | 3 |

D. Individual and group mental tests including field work:

| | |
|---|---|
| Psychology 105A, Introduction to Psychological Testing | 3 |
| Psychology 105B, Individual Mental Testing | 3 |
| Psychology 205, Advanced Mental Testing | 3 |

E. Remedial instruction including laboratory or classroom practice:

| | |
|---|---|
| Education 144, Diagnosis and Remedial Treatment of Difficulties in Reading | 3 |
| Education 176, Problems of Speech Correction and Articulation or Education, 179A, Nervous Speech Disorders | 3 |

These courses include laboratory practice.

## SCHOOL PSYCHOMETRIST CREDENTIAL

An applicant for the school psychometrist credential must have completed the following requirements:

1. Possession of a California general teaching credential (General Elementary, Junior High School, or General Secondary) or a four-year college course with a bachelor's degree.

2. Admission to teacher education by all undergraduate students or by graduate students who do not hold a California teaching credential. Courses in the Department of Education will not be open to students who are not admitted to teacher education. A special examining committee of members of both the Departments of Education and Psychology is established to interview applicants.

3. As a part of the undergraduate or graduate program the applicant must have completed 18 semester units of training distributed approximately as follows and approved by the credential adviser:

A. At least six units selected from the following areas with one course in each area: (1) Education 102A or 102D or 184C; (2) Education 102B or 102C; (3) Education 130. Education 184B will meet requirements in both area 2 and 3.

B. Six units as follows: Education 181 and Psychology 151.

C. Six units as follows: Psychology 105A and Psychology 105B.

# CURRICULA LEADING TO THE GENERAL SECONDARY SCHOOL CREDENTIAL

## INFORMATION CONCERNING THE GENERAL SECONDARY SCHOOL CREDENTIAL

A candidate for this credential must complete the requirements for the bachelor's degree from an accredited institution with a major and a minor commonly taught in the secondary schools of California. Admission to candidacy for this credential should be sought during the second semester of the sophomore year or immediately upon admission to San Diego State College with advanced or graduate status. For admission requirements, refer to the section entitled: Admission to Teacher Education.

Students desiring a major for which San Diego State College is authorized should complete a program leading to the A.B. or B.S. degree at the end of four years and the General Secondary Credential upon completion of the graduate year requirements outlined on the following pages.

Students desiring a major in art, business education, music, physical education or speech arts may complete the requirements for the special secondary credential simultaneously with the bachelor's degree; then continue with the graduate program. For further details regarding these majors, refer to these credentials.

Any person desiring the General Secondary Credential should consult with the Coordinator of Secondary Education during his first semester of attendance at San Diego State College.

## RECOMMENDED PROGRAM FOR THE GENERAL SECONDARY SCHOOL CREDENTIAL

1. The following courses should be completed before receiving the bachelor's degree: Health Education 151 (may be taken any semester); Education 184A and 184B (should be taken consecutively). Those persons changing from another vocational objective to education during the senior year may take Education 184A and 184B concurrently by special permission of the Coordinator of Secondary Education, following admission to Teacher Education and a check of the student's qualifications.

| | *Units* |
|---|---|
| Health Education 151, Health Education for Teachers | 2 |
| Education 184A, The Secondary School | 4 |
| Education 184B, Development and Learning | 4 |

2. After completion of requirements in (1) above, the following courses may be taken either before or after receiving the bachelor's degree; however, they should be taken concurrently with the first directed teaching assignment unless the student has equivalent teaching experience.

| | *Units* |
|---|---|
| Education 184C, The Teaching Process | 4 |
| Education 116 or 316, Directed Teaching (or equivalent) | 3 |
| Education 100B (methods in field of directed teaching assignment) | 2–4 |

3. The graduate work must consist of San Diego State College's standard year of work, 24 to 30 semester units of upper division or graduate work, including the following specific requirements:

(a) At least 12-15 semester units must be completed at San Diego State College.

(b) At least one course of graduate level work (200 number) in the major field. Most departments require two courses.

(c) At least six upper division or graduate semester units in fields outside of education.

(d) Enough units to complete at least a 21 semester unit minor, with a minimum of six semester units of upper division credit in the minor subject area.

For a statement of requirements in the teaching major and minor fields, refer to these majors and minors below.

4. Professional Education during the graduate year: Completion of the courses listed in (1) and (2) above and the following:

| | Units |
|---|---|
| Education 100B (in the field of the second directed teaching assignment) if not taken under (2) above | 2 |
| Education 230, Guidance Problems in Secondary Education | 3 |
| Education 250, Curricular Problems in Secondary Education | 3 |
| Education 316, Directed Teaching, in both major and minor fields, or equivalent teaching experience | 3–6 |

## MAJORS AND MINORS FOR THE GENERAL SECONDARY CREDENTIAL

The following pages outline tentative programs for the majors and minors for which San Diego State College is authorized to recommend for the General Secondary Credential. Every candidate for the general secondary credential must have a program approved in writing by the departmental representative in the major teaching field and in education as part of admission to the teacher education program.

Persons with majors in broad fields (Language Arts, Life Science and General Science, Physical Science and General Science, Romance Languages, or Social Science) cannot take a minor within the area of their major.

*Teaching Majors*

- Art
- Business Education
- English
- French
- Health Education
- Language Arts
- Life Science and General Science
- Mathematics
- Music
- Physical Education (Men)
- Physical Education (Women)
- Physical Science and General Science
- Psychology
- Romance Languages
- Social Science
- Spanish
- Speech Arts

*Teaching Minors*

- Art
- Business Education
- Economics
- English
- French
- Health Education
- History
- Home Economics
- Industrial Arts
- Life Science and General Science
- Mathematics
- Music
- Physical Education (Men)
- Physical Education (Women)
- Physical Science and General Science
- Social Science
- Spanish
- Speech Arts

## Outline of Requirements

### Major in Art

The requirements for the A.B. degree and the special secondary credential in art should be completed simultaneously. (Students transferring from another institution with the A.B. degree and a major in art should consult with the departmental representative for special program planning.) Refer to the special secondary credential in art. After the above requirements have been met, and the candidate has been accepted by the art staff for graduate work in art, the candidate for the general secondary credential shall complete a graduate year including the following courses in his major:

| *Graduate Year* | *Units* |
|---|---|
| Art 200A-200B, Special Problems in Art | 4 |

### Minor in Art

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Art A-B, Drawing and Composition | 2–4 |
| Art 6A-6B, Design | 4 |
| Art elective (Art 14A, Lettering, recommended) | 3–5 |
| Aesthetics 50, Appreciation and History of Art | 2 |
| Aesthetics 5, Art Orientation, or Art 51, Survey of Mexican Art | 2 |
| *Upper Division* | |
| Aesthetics 150, Appreciation and History of Art | 2 |
| Art electives | 4 |

**Major in Business Education**

The requirements for the A.B. degree and the special secondary credential in Business Education should be completed simultaneously. Refer to the special secondary credential in Business Education. After the above requirements have been met, the candidate for the general secondary credential shall complete a graduate year including the following courses in his major:

*Graduate Year*

| Select four units from the following: | *Units* |
|---|---|
| Business 200, Readings in Current Literature in Business Education | 2 |
| Business 203, Office Management | 2 |
| Business 213, Problems in Business Education | 2 |
| Business 221, Basic Business Education | 2 |
| Business 223, Problems of Distributive Business | 2 |
| Business 233, Administration and Supervision of Business Education | 2 |
| Business 260, Advanced Problem Analysis (Accounting) | 2 |

**Minor in Business Education**

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| Business 1A-1B, Typewriting | 6 |
| Business 14A-14B, Principles of Accounting | 6 |

*Upper Division*

| | |
|---|---|
| Nine upper division units should be selected in consultation with adviser in business education | 9 |

**Minor in Economics** (Not available to Social Science majors)

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| Economics 1A-1B, Principles of Economics | 6 |
| A year course in another social science area | 6 |

*Upper Division*

| | |
|---|---|
| Economics 100A, Intermediate Economic Thought | 3 |
| Economics electives | 6 |

**Major in English**

*Lower Division*

| | |
|---|---|
| One year-course from lower division English electives | 6 |
| Lower division English electives | 6 |

*Upper Division*

| | |
|---|---|
| Upper Division English courses selected under the supervision of the departmental representative | 24 |

*Graduate Year*

| | |
|---|---|
| One of the graduate seminars | 2 |
| English 192, The English Language (if not taken as an undergraduate) or 191, 195, or an additional seminar | 2–3 |

**Minor in English** (Not available to Language Arts majors)

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| English 1, Freshman Composition | 3 |
| A year course chosen from: English 50A-50B, 52A-52B, 56A-56B, or 60A-60B | 6 |

*Upper Division*

| Select one course from each of the following areas: | |
|---|---|
| Nineteenth Century English Literature: select from English 119A, 119B, 126A, 126B, or 143B | 3 |
| Shakespeare: select from English 117A or 117B | 3 |
| American Literature: select from English 131, 132, 133, or 134 | 3 |
| Language: English 192 | 3 |

### Major in French

| | *Units* |
|---|---|
| *Lower Division* | |
| French 1, 2, 3, 4, 5, 6, or equivalents | 16 |
| Spanish 1, 2, or German 1, 2, or Latin 1, 2, or their equivalents | 6 |
| History 4A-4B (recommended) | |
| Six units from courses 1, 2, 3, 4 in Spanish, German, or Latin may be applied toward general education requirements. | |
| *Upper Division* | |
| French 101A-101B, Conversation and Composition | 6 |
| French 198, Comprehensive Reading and Survey | 3 |
| Upper division courses in French with a maximum of six units which may be selected from related fields with the approval of the departmental representative | 15 |
| *Graduate Year* | |
| French 214, Contemporary French Literature | 2 |
| French 220, Explication de Textes | 2 |

### Minor in French (Not available to Romance Languages majors)

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| French 1, 2, 3, 4, 5, 6, or equivalents | 16 |
| History 4A-4B (recommended) | |
| *Upper Division* | |
| French 101A-101B, Conversation and Composition | 6 |

### Major in Health Education

This teaching major may be used as a major for the A.B. degree if the student has been admitted to candidacy for the general secondary credential and has completed at least eight units in professional education courses, including Education 184A-184B, or equivalent, by the date of degree candidacy. The major is designed around the general major, with health education as the field of concentration.

| | |
|---|---|
| *Lower Division* | |
| Health Education 65, Community Health | 3 |
| Health Education 90, Physiology of Reproduction | 1 |
| Home Economics 61A, Nutrition | 2 |
| Physiology 1A, Human Physiology | 3 |
| Zoology 8, Human Anatomy | 3 |
| *Upper Division* | |
| 36 upper division units to include the following: | |
| Health Education 145, Safety Education and Accident Prevention | 3 |
| Health Education 151, Health Education for Teachers | 2 |
| Health Education 152, Health Education Programs | 3 |
| Health Education 153, Administration of the School Health Program | 3 |
| Health Education 199, Special Study in Health Education | 3–6 |
| Physical Education 151, Instructor's Course in First Aid | 2 |
| Sociology 135, Marriage and the Family | 3 |
| Psychology 131, Foundations of Personality | 2 |
| Psychology 132, Personality Adjustment | 2 |
| Bacteriology 101, General Bacteriology | 4 |
| Six to nine upper division units selected from one of the teaching major or minor fields for the general secondary credential, selected with approval of the departmental adviser | 6–9 |

### Minor in Health Education

A minimum of 21 semester units required.

Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | |
|---|---|
| *Lower Division* | |
| Health Education 21, Principles of Healthful Living | 2 |
| Health Education 65, Community Health | 3 |
| Health Education 90, Physiology of Reproduction | 1 |

| *Upper Division* | *Units* |
|---|---|
| Health Education 145, Safety Education and Accident Prevention | 3 |
| Health Education 151, Health Education for Teachers | 2 |
| Health Education 152, Health Education Programs | 3 |
| Health Education 153, Administration of School Health Program | 3 |
| Health Education 199, Special Study in Health | 2–3 |
| Physical Education 151, Instructor's Course in First Aid | 2 |

**Minor in History** (Not available to Social Science majors)

A minimum of 21 semester units required. A year course in United States History must be included.

| *Lower Division* | |
|---|---|
| History 4A-4B, Modern Europe, or 8A-8B, The Americas, or 17A-17B, American Civilization | 6 |
| Electives chosen from anthropology, economics, geography (except Geography 1 or 3), political science, sociology | 6 |
| Additional social science electives | 0–3 |
| *Upper Division* | |
| History electives | 6–9 |

**Minor in Home Economics**

A minimum of 21 semester units required.

| *Lower Division* | |
|---|---|
| Home Economics 5, Foods | 3 |
| Home Economics 10, Clothing Fundamentals, or 11, Advanced Clothing | 3 |
| Electives in Home Economics | 3–6 |
| *Upper Division* | |
| Home Economics 105, Family Meals | 3 |
| Home Economics 150, Home Management | 3 |
| Home Economics 170, Child Care and Development | 3 |
| Electives in Home Economics | 3–6 |

Electives for enrichment—see department chairman.

**Minor in Industrial Arts**

A minimum of 21 semester units required.

| *Lower Division* | | |
|---|---|---|
| Industrial Arts 21, Industrial Drawing | | 3 |
| Select at least three courses from the following: | | 9 |
| Industrial Arts 31, General Metalworking | 3 | |
| Industrial Arts 51, General Woodworking | 3 | |
| Industrial Arts 61, Electricity and Radio | 3 | |
| Industrial Arts 71, Transportation | 3 | |
| Industrial Arts 81, Graphic Arts | 3 | |
| *Upper Division* | | |
| Industrial Arts 122A, Industrial Drawing | | 2 |
| Select appropriate upper division electives | | 7 |

**Major in Language Arts**

This major requires 46 units to be taken in the fields of composition, dramatics, journalism, language, literature, radio or motion pictures, and speech arts. Education courses to be taken with this major include the standard program for all general secondary credentials plus Education 154, Reading in the Secondary School, and Education 100B in both English and speech arts. A methods course in a teaching minor is also required for the credential. Students using this major for the A.B. degree must complete a minimum of eight units in education courses by date of degree candidacy.

| *Lower Division* | |
|---|---|
| English 50A-50B, or 52A-52B, or 60A-60B (or two upper division courses may be substituted, selection to be made from English 116A-116B, or 118A-118B, or 119A-119B, or 120A-120B, or 126A-126B, or 143A-143B) | 6 |
| Journalism 51A | 3 |
| Speech Arts 60A, or 60B, or 55A, or 55B | 3 |
| Speech Arts 81 | 3 |

*Upper Division*

| | *Unit* |
|---|---|
| English 192 | 3 |
| English 106 or 191 | 3 |
| English 131, or 132, or 133, or 134 | 3 |
| English 117A, or 117B, or 152A, or 152B | 3 |
| Journalism 152 | 3 |
| Speech Arts 108, 159, and 176 | 9 |
| Speech Arts 191, or 192A, or 192B | 3 |

If lower division English sequence is taken in American Literature, the upper division course work in literature should be taken in other areas.

*Graduate Year*

| | |
|---|---|
| One 200 numbered course in speech arts | 2 |
| One 200 numbered course in English | 2 |

### Major in Life Science and General Science

*Lower Division*

| | |
|---|---|
| Zoology 1A-1B, General | 8 |
| Botany 2A-2B, General, or 1, Introduction | 4–8 |
| Zoology 20, Human Anatomy and Physiology, or Physiology 1C, Human Physiology | 2–3 |
| Chemistry 2A-2B | 6 |
| Physics 2A-2B | 6 |

Geology 2, General, Astronomy 1, Descriptive, and Physics 3A-3B, Physical Measurements, recommended.

12 units in natural science courses may be applied toward general education requirements.

*Upper Division*

| | |
|---|---|
| Zoology 119, Field Zoology | 4 |
| Botany 114, Plant Taxonomy, or Botany 119, Field Botany | 3–4 |
| Bacteriology 101, General Bacteriology | 4 |
| Botany 155, Genetics, or Zoology 165, Human Heredity | 2 |
| Zoology 160, Evolution | 2 |
| Zoology 150, Readings in Biology | 2 |
| Two courses chosen from the following: | |
| Zoology 110, 112, 113, 115, 118, 121 | 7–8 |

*Graduate Year*

| | |
|---|---|
| Zoology 200, Seminar | 3 |
| Zoology 202, Hydrobiology, or Zoology 213, Advanced Studies in Ornithology | 2 |

### Minor in Life Science and General Science

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| Biology 3, Principles, and Biology 4, Plant and Animal Types | 6 |
| Physical Science 1 and 2, Introduction | 6 |
| Physiology 1C, Human Physiology | 2 |

*Upper Division*

| | |
|---|---|
| Botany 114, Plant Taxonomy, Botany 119, Field Botany, or Zoology 119, Field Zoology | 3–4 |
| Botany 150, Readings in Biology | 2 |
| Zoology 160, Evolution | 2 |

### Major in Mathematics

| | |
|---|---|
| Mathematics 3A, Analytic Geometry | 3 |
| Mathematics 3B, First Course in Calculus | 3 |
| Mathematics 4A, Second Course in Calculus | 3 |
| Additional mathematics or work in related areas | 3 |

***Suggested courses in related areas:*** Astronomy 1, Descriptive Astronomy; Business 2, Mathematics of Finance; Engineering 1A, Plane Surveying; Engineering 21, Descriptive Geometry; Physics 4A, Mechanics of Solids and Fluids; Physics 2A, General.

| *Upper Division* | *Units* |
|---|---|
| At least one course in Algebra | 3 |
| At least one course in Geometry | 3 |
| Mathematics 140A, Mathematical Statistics | 3 |
| Mathematics 117, Intermediate Calculus (unless 4B, Third Course in Calculus taken in lower division) | 3 |
| Mathematics 104, History of Mathematics | 3 |
| Additional upper division units in mathematics or related areas | 9 |

*Graduate Year*

Four units selected from the following:

| | |
|---|---|
| Mathematics 201, Concepts of Geometry from an Advanced Point of View | 2 |
| Mathematics 202, Concepts of Algebra from an Advanced Point of View | 2 |
| Mathematics 204, Advanced Work in the History of Mathematics | 2 |
| Mathematics 224, Functions of a Complex Variable | 3 |

### Minor in Mathematics

A minimum of 21 semester units required.

*Lower Division*

| | |
|---|---|
| Mathematics D, Trigonometry (or high school equivalent for which pattern credit may be allowed) | 3 |
| Mathematics 3A, Analytic Geometry | 3 |
| Mathematics 3B, First Course in Calculus | 3 |
| One course selected from courses in related areas<br>(See above under teaching major in mathematics) | 3 |

*Upper Division*

| | |
|---|---|
| Mathematics 104, History of Mathematics | 3 |
| Mathematics electives | 6 |

### Major in Music

The requirements for the A.B. degree and the special secondary credential in music should be completed simultaneously. Students transferring from another institution with the A.B. degree and a major in music should consult with the departmental representative for special program planning. Refer to the special secondary credential in music. After the above requirements have been met, the candidate for the general secondary credential shall complete a graduate year including 4 units selected from the following courses in his major:

*Graduate Year*

Four units selected from the following:

| | |
|---|---|
| Music 200A-200B, Special Problems in Music | 2–2 |
| Music 203A-203B, Musicology | 2–2 |
| Music 206A-206B, Composition | 2–2 |

### Minor in Music

A minimum of 21 semester units required. The student is required to demonstrate vocal or instrumental proficiency before admission to the minor program may be granted. As laboratory experience, the student with music as a minor is required to participate in one music activity each semester for seven semesters. (In special cases this requirement may be waived by the chairman of the Music Department.)

*Lower Division*

| | |
|---|---|
| Music 9A, Elementary Harmony | 3 |
| Music 52A, History of Music | 3 |
| Music 10A-10B, Piano (may be omitted in part or in full upon demonstration of proficiency) | 2 |
| Music activities chosen from courses numbered 70 to 87 | 4 |
| Selected from the following: Music 15A, 20A, 25A, 30A | 3–5 |

*Upper Division*

| | |
|---|---|
| Music 146A, Fundamentals of Conducting | 1 |
| Music 146B, Instrumental Conducting, or 146C, Choral Conducting | 1 |
| Music activities chosen from courses numbered 170 to 187 | 3 |
| Selected from the following: Music 111, 112, 116, 117, 121, 122, 126, 127, 131, 132, or 150 | 1 |

## Major in Physical Education for Men

The requirements for the A.B. degree and the special secondary credential in physical education should be completed simultaneously. After the major field requirements for the special secondary credential in physical education have been met, the candidate for the general secondary credential shall complete a graduate year, including two of the following courses in his major:

| | *Units* |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |
| Physical Education 298, Special Study | 2 |

## Minor in Physical Education for Men

A minimum of 21 semester units required.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

*Lower Division*

| | |
|---|---|
| Physical Education 53, Physical Education in the Elementary Schools | 2 |
| Physical Education 72, Introduction | 2 |
| Electives | 2–4 |

*Upper Division*

| | |
|---|---|
| Professional activity courses (should be selected in consultation with departmental representative) | 4 |
| Physical Education 151, Instructor's Course in First Aid | 2 |
| Physical Education 190, Administration of Physical Education in Secondary Schools | 3 |
| Physical Education 170A or 170B Recreational Leadership | 2 |
| Electives | 2–4 |

## Major in Physical Education for Women

The requirements for the A.B. degree and the special secondary credential in physical education should be completed simultaneously. After the major field requirements for the special secondary credential in physical education have been met, the candidate for the general secondary credential shall complete a graduate year including two of the following courses in the major:

| | |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education, and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |
| Physical Education 298, Special Study | 2 |

## Minor in Physical Education for Women

A minimum of 21 semester units required.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

*Lower Division*

| | |
|---|---|
| Physical Education 1A, Fundamental Skills | ½ |
| Physical Education 2A, Folk Dancing | ½ |
| Physical Education 3A, Modern Dance | ½ |
| Physical Education 4, 5, 6, Team Sports | 1½ |
| Physical Education 53, Physical Education in the Elementary School | 2½ |
| Physical Education electives | 3½–4½ |

*Upper Division*

| | |
|---|---|
| Physical Education 156A-156B, Sports Methods | 4 |
| Physical Education 161, Folk Dancing Materials and Advanced Techniques | 2 |
| Electives selected from Physical Education 190, 170B, 164A-164B | 5–6 |

### Major in Physical Science and General Science

To obtain a teaching major in physical science and general science for the general secondary credential a student obtaining the A.B. or B.S. degree in chemistry or physics, or the A.B. degree in physical science, must include in his program the following courses, which will also satisfy the natural science requirements for general education.

| *Lower Division* | *Units* |
|---|---|
| Astronomy 1, Descriptive | 3 |
| Biology 3 and 4, General, and Plant and Animal Life | 6 |
| Geology 2 or 1A, General or Physical | 3–4 |

Recommended electives: Astronomy 9, Geography 3, Geology 3; general education courses in literature, philosophy, and the arts: Industrial Arts 5, 6, or 85.

*Upper Division*

Same as for the A.B. or B.S. major in chemistry, physics, or physical science.

Recommended electives, if not included as part of the major: Botany 119, Chemistry 101A, Physics 107, 158, Zoology 119, and Geography 145 (a general education course in social science).

*Graduate Year*

Select four units from the following:

| | |
|---|---|
| Chemistry 200, Seminar | 2–4 |
| Physics 200, Seminar | 2–4 |

### Minor in Physical Science and General Science

This minor may be used for the A.B. degree only if the student has been admitted to the teacher education program and has completed eight units in professional education courses by the date of degree candidacy.

This minor consists of 26 units in courses specified below.

| | |
|---|---|
| Astronomy 1, Descriptive Astronomy | 3 |
| Biology 3 and 4, Principles, and Plant and Animal Types | 6 |
| Chemistry 2A-2B, or 1A-1B, Fundamentals, or General | 6–10 |
| Geology 2 or 1A, General, or Physical | 3–4 |
| Physics 2A-2B and 3A-3B, or 4A-4B-4C, General, or Principles | 8–12 |

The following courses are recommended as electives: Astronomy 9, Geology 3, Chemistry 101A, Geography 3, Geography 145, Physical Science 150, Physics 148, Botany 119 or Zoology 119, Industrial Arts 5, 6, and 85.

### Major in Psychology

This major can be used for a general secondary credential only if the candidate completes *two* teaching minors.

*Lower Division*

| | |
|---|---|
| Psychology 5 and 6, Principles | 6 |

*Upper Division*

| | |
|---|---|
| Psychology 104A, Statistical Methods | 3 |
| Psychology 105B, Individual Mental Testing | 3 |
| Psychology 131, Foundations of Personality | 2 |
| Psychology 132, Personality Adjustment | 2 |
| Psychology 151, Introduction to Clinical Appraisal | 3 |
| Psychology 160A, Experimental Psychology | 3 |
| Electives to be selected with approval of the departmental representative | 8 |

*Graduate Year*

| | |
|---|---|
| Psychology 201, Seminar in Psychology | 2 |
| Education 230, Guidance Problems in Secondary Education | 3 |

### Major in Romance Languages

*Lower Division*

| | |
|---|---|
| Spanish 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| French 1, 2, 3, 4, 5, 6, or the equivalents | 16 |

History 4A-4B, or 8A-8B (recommended)

Six units from courses 1, 2, 3, 4 in French or Spanish may be applied toward general education requirements.

| *Upper Division* | *Units* |
|---|---|
| Spanish 101A-101B, Conversation and Composition | 6 |
| French 101A-101B, Conversation and Composition | 6 |
| Spanish 198 or French 198, Comprehensive Reading and Survey Course | 3 |
| Courses in Spanish literature, French literature or Spanish-American literature, selected with the approval of the departmental representative | 9 |

NOTE: At least nine units of upper division courses must be taken in each language.

*Graduate Year*

Any two of the following courses:

| | |
|---|---|
| French 214, Contemporary French Literature | 2 |
| French 220, Explication de Textes | 2 |
| Spanish 201, Old Spanish | 2 |
| Spanish 204, Seminar in Spanish-American Literature | 2 |

### Major in Social Science

This teaching major may be used as a major for the A.B. degree if the lower and upper division requirements listed below are completed and the student has been admitted to candidacy for the general secondary credential and has completed at least eight units of professional courses in education by the date of degree candidacy. Twelve units of social science courses in the major may be applied toward general education requirements in social science.

The major must include six units in United States history and work from at least four of the social science fields listed below.

*Lower Division*

A student must complete a minimum of six units in each of at least three fields he may select from the departments named below:

Economics
Geography
History
Political Science
Sociology and/or Anthropology

*Upper Division*

A student must complete a minimum of 30 units with the approval of the departmental representative as follows:

| | |
|---|---|
| 1. A minimum of 12 units from any field named above | 12 |
| 2. A minimum of six units from each of two fields named above, excluding the field selected for the major upper division concentration | 12 |
| 3. Electives from social science fields | 6 |

*Graduate Year*

| | |
|---|---|
| Post-bachelor work selected with approval of the departmental representative | 4 |

### Minor in Social Science

(Not available to a student with a major in a specific social science.)

This minor may be used for the A.B. degree only if the student has been admitted to the teacher education program and has completed eight units in professional education courses by the date of degree candidacy.

This minor consists of 27 units in courses specified below.

*Lower Division*

A student must complete a six unit sequence from each of three of the following fields:

Anthropology 1A-1B
Economics 1A-1B
Geography 12A-12B
History 4A-4B or 8A-8B
Political Science 1A-1B or 71A-71B
Sociology 50 and 51

*Upper Division*

| | |
|---|---|
| One upper division sequence in American history | 6 |
| Elective from social science fields named above | 3 |

### Major in Spanish

| *Lower Division* | *Units* |
|---|---|
| Spanish 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| French 1, 2, or German 1, 2, or Latin 1, 2, or their equivalents | 6 |
| History 4A-4B, or 8A-8B (recommended) | |
| Six units from courses 1, 2, 3, 4 in French, German, or Latin may be applied toward general education requirements. | |
| *Upper Division* | |
| Spanish 101A-101B, Conversation and Composition | 6 |
| Spanish 198, Comprehensive Reading and Survey | 3 |
| Upper division courses in Spanish with a maximum of six units which may be selected from related fields with the approval of the departmental representative | 15 |
| *Graduate Year* | |
| Spanish 201, Old Spanish | 2 |
| Spanish 204, Seminar in Spanish-American Literature | 2 |

### Minor in Spanish (Not available to Romance Languages majors)

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Spanish 1, 2, 3, 4, 5, 6, or equivalents | 16 |
| History 4A-4B, or 8A-8B (recommended) | |
| *Upper Division* | |
| Spanish 101A-101B, Conversation and Composition | 6 |

### Major in Speech Arts

The requirements for the A.B. degree and the special secondary credential in Speech Arts should be completed simultaneously. Refer to the special secondary credential in Speech Arts. After the above requirements have been met, the candidate for the general secondary credential shall complete a graduate year including the following courses in his major:

*Graduate Year*

Select four units from the following courses:

| | |
|---|---|
| Speech Arts 260, Seminar in Oral Interpretation | 2 |
| Speech Arts 221, Seminar in Articulatory Problems in Speech | 2 |
| Speech Arts 245, Seminar in Technical Practice | 2 |
| Speech Arts 259, Seminar in Stage Direction | 2 |
| Speech Arts 200, Seminar in History or Oratory | 2 |

### Minor in Speech Arts

A minimum of 21 semester units required.

| | |
|---|---|
| *Lower Division* | |
| Speech Arts 3, Speech for Communication | 2 |
| Speech Arts 4, Extemporaneous Speaking | 3 |
| Speech Arts 11A-11B, Interpretation | 6 |
| Speech Arts 82, Radio Announcing | 3 |
| Electives in speech from 61 or 63 | 0–1 |
| *Upper Division* | |
| Speech electives (should be selected in consultation with departmental representative) | 6–7 |

## CURRICULA LEADING TO CREDENTIALS IN ADMINISTRATION AND SUPERVISION

Courses and field experience are available which lead to credentials in Elementary and Secondary Administration, Elementary and Secondary Supervision and Special Subject Supervision. A selection and admission program is employed to select candidates for these credentials who have the promising background experiences and competencies necessary to enable them to serve in positions of supervision and administration.

## GENERAL REQUIREMENTS FOR ADMINISTRATION AND SUPERVISION CREDENTIALS

In addition to the general requirements of the State of California for all credentials the following requirements are common for admission to and completion of al supervision and administration credentials:

1. Maintain a grade point average of 1.75 on all work applied toward the credential exclusive of courses required for the basic credential.
2. Admission to the program of Administrative Studies, which includes:
   a. Completion of information on a personal data sheet and the filing of official transcripts of all college work. (Forms and information available in Division of Education Offices.)
   b. Completion of a minimum of two counseling interviews, one with the Chairman of Administrative Studies and one with a resident staff member teaching courses on the level, elementary or secondary, at which the candidate is working. The sequence of courses for the credential will be planned with the candidate at this time.
4. Admission to the program should be completed at any time previous to enrolling in Education 262, 263, 264, or 265.
5. Candidate must present a letter of acceptance from his administrator before enrolling in any course requiring field projects: Education 262, 263, 264, or 265.
6. Candidate may not enroll for more than three semester units of 200 numbered courses applied toward the credential during any single semester when he has a full-time teaching position.
7. Candidate must have completed a minimum of one full year of successful teaching experience before he may be admitted to courses in the core subjects, Education 262, 263, 264, or 265.
8. Candidate must have completed a minimum of two full years of successful teaching experience before he may be admitted to Education 266 or 267 (Field Experience) or to Education 316B (Internship in School Administration or Supervision).

## CURRICULA LEADING TO CREDENTIALS IN ELEMENTARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the requirements listed above, the candidate shall:

1. Possess a valid General Elementary Credential.
2. Present written evidence of two years of successful teaching experience on the elementary level.
3. Complete 30 semester units for the Administration Credential (24 units for the Supervision Credential) of upper division or graduate work in addition to the holding of the General Elementary Credential. These units shall include specific courses designated by the California State Department of Education and San Diego State College.
4. Complete a minimum of 15 units of work in residence at San Diego State College.
5. Make formal application for an evaluation for the credential at San Diego State College and at the completion of all requirements, make application for the credential.

### Course Requirements for the Elementary Administration and Elementary Supervision Credentials as Designated by the State Board of Education

A. Courses in undergraduate or graduate training (letters and numbers correspond with State Department Bulletin Credential Regulations):

*1. The scope, functions, and place of the system of public education of elementary and secondary schools; rural and urban schools; vocational education; education for adults; special school programs; auxiliary agencies:
Education 115A ________________________________________ 2 units

2. Principles and practices of curriculum construction and evaluation:
Education 240 or 245 ____________________________________ 3 units

3. Measurement and appraisal of educational achievements and aptitudes:
Education 102A ________________________________________ 3 units

4. Pupil personnel, counseling and guidance, including techniques and practices of child study and parent education:
   Education 155 or 230 ---------- 3 units

B. Concurrently with or subsequently to teaching experience, graduate or undergraduate training shall include work in the following subject groups, including directed field work of such a nature as to give the applicant first-hand knowledge of problems and issues as they exist in the public schools:

*1. Federal, state, county and city school organization, administration, and supervision:
   Education 260 ---------- 3 units
*2. School finance, business administration, and law:
   Education 270 ---------- 3 units
3. The organization and administration of elementary schools:
   Education 262 ---------- 3 units
4. Elementary school supervision:
   Education 264 ---------- 3 units
5. Field work or internship in school administration or supervision:
   Education 266 or 316B ---------- 3-6 units

C. Elective courses in general or professional education to complete 30 units (24 for supervision) *after receiving the General Elementary Credential or the A.B. degree.*

---

* Courses not required for the Supervision Credential.

## CURRICULA LEADING TO CREDENTIALS IN SECONDARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the common requirements listed above, the candidate shall:

1. Possess a valid General Secondary Credential.
2. Present written evidence of two years of successful teaching experience on the secondary level.
3. Complete 18 semester units for the Administration Credential (15 units for the Supervision Credential) of upper division or graduate work after the receipt of the General Secondary Credential. These units shall include specific courses designated by the California State Board of Education and San Diego State College.
4. Complete a minimum of 12 units of work in residence at San Diego State College.
5. Make formal application for an evaluation for the credential at San Diego State College and at the completion of all requirements make application for the credential.

### Course Requirements for the Secondary Administration and Secondary Supervision Credentials as Designated by the State Board of Education

A. Courses in undergraduate or graduate training (letters and numbers correspond with State Department Bulletin Credential Regulations):

*1. The scope, functions, and place in the system of public education of elementary and secondary schools; vocational education; education for adults; special school programs; auxiliary agencies:
   Education 115A and 115B or 184A ---------- 4-5 units
2. Principles and practices of curriculum construction and evaluation:
   Education 250 ---------- 3 units
3. Measurement and appraisal of educational achievement and aptitudes:
   Education 102D or 184C ---------- 3-4 units
4. Pupil personnel, counseling and guidance, including techniques and practices of child study and parent education:
   Education 230 ---------- 3 units

B. Concurrently with or subsequently to teaching experience, graduate or undergraduate training shall include work in the following subject groups, including directed field work of such a nature as to give the applicant first-hand knowledge of problems and issues as they exist in the public schools:

*1. Federal, state, county and city school organization, administration, and supervision:
  Education 260 ---------------------------------------------- 3 units

*2. Finance, law, business administration:
  Education 270 ---------------------------------------------- 3 units

3. The organization and administration of secondary schools:
  Education 263 ---------------------------------------------- 3 units

4. Supervision of instruction and curriculum in the secondary schools:
  Education 265 ---------------------------------------------- 3 units

5. Directed field work or internship in administration or supervision:
  Education 267 or 316B------------------------------------- 2-6 units

C. Elective courses in general or professional education to complete 18 units (15 for supervision) *after receiving the General Secondary Credential.*

---

* Courses not required for the Secondary Supervision Credential.

## SPECIAL SUBJECT SUPERVISION CREDENTIAL

This credential is available for persons who wish to supervise in a special subject area. Those desiring this credential should see the Chairman of the Division of Education.

# THE BACHELOR OF EDUCATION DEGREE AND THE GENERAL ELEMENTARY CREDENTIAL

## ELIGIBILITY FOR CANDIDACY

Teachers in California public schools with a minimum of 60 semester units of standard college work are eligible for candidacy for the Bachelor of Education degree. The purpose of this degree is to increase the professional competence of teachers in California public schools who do not hold a bachelor's degree. The educational program of each applicant shall be determined on the basis of his previous preparation and of he services he is to render. In the period of professional preparation the applicant hall be guided into those learning experiences designed to meet his cultural and pro-essional needs.

## MINIMUM REQUIREMENTS

An applicant for the general elementary credential and the Bachelor of Educa-ion degree shall comply with the procedures for application and with the requirements or personal qualifications and general training and shall have completed a program ncluding the following minimum requirements:

a. A four-year college course of 124 semester units, or the equivalent.

b. Eighteen semester units, or the equivalent, of professional work in education, constituting an organized program designed to prepare candidates in the following areas:

   (1) The evolution of educational thought and practice as to the function of the school in a democratic society, with emphasis on the elementary school.

   (2) The nature of individual growth and development; the psychological aspects of learning; child study, with emphasis on directed observation of children; mental hygiene and personality development; parent education; guidance practices.

   (3) The selection and arrangement of learning experiences, instructional materials, learning methods and appraisal techniques related to all statutory requirements for teaching, including reading, writing, spelling, language study, arithmetic, geography, history of the United States and of California, civics including the Constitution of the United States, music, art, physical education, healthful living, morals and manners, safety education, and fire prevention.

   (4) The use of audio-visual aids in instruction.

c. Directed teaching in the elementary school, eight semester units, or the equivalent, under the supervision of superior teachers in actual classroom situations of the elementary school level.

d. Sixty-one semester units or the equivalent in basic subject fields, distributed approximately as follows:

   (1) *Social Studies.* Twelve semester units, or the equivalent, with emphasis upon current economic, political, and social problems and world history and geography, sociology and anthropology. The legal requirement in United States Constitution, American history, institutions, and ideals, and principles of California state and local government shall be included in the social studies program.

   (2) *Science.* Twelve semester units, or the equivalent, in the fields of physical and biological science, with emphasis upon the study and use of the environment.

(3) *English*, including speech. Twelve semester units, or the equivalen including oral and written expression, world literature, children's liter ture, dramatics, detection and correction of speech defects, and the use books and libraries.

(4) *Mathematics.* Three semester units, or the equivalent, including subje matter and techniques essential in the teaching of mathematics in th elementary school.

(5) *Health and Hygiene.* Three semester units, or the equivalent, includin personal hygiene, subject matter and techniques essential in health ed cation to elementary school pupils.

(6) *Physical Education.* Three semester units, or the equivalent, includin subject matter and techniques essential in the teaching of physical educ tion to elementary school pupils.

(7) *Music.* Eight semester units, or the equivalent, including content an techniques appropriate for the elementary school.

(8) *Art.* Eight semester units, or the equivalent, in graphic art and indu trial arts applicable to learning experiences appropriate for elementar school children.

e. The remaining units necessary to complete the requirements for the Bachel of Education degree shall be distributed among those offerings of the instit tion that best serve the cultural and professional needs of the candidate, exce that a course or the equivalent in fire prevention must be included.

## EVALUATION OF TEACHING EXPERIENCE AND SUBJECT MATTER FIELDS

a. A candidate with two or more years' teaching experience may be awarde a maximum of 8 semester units of credit, or the equivalent, in directed teachin provided he demonstrates satisfactory skill to a representative of the instit tion under whose direction he is completing his degree program, or provide other conditions set by the institution to insure classroom skill are met. Th credit shall not be applied until the candidate has completed at least 11 semester units, or the equivalent, of his program.

b. Credit toward the B. Ed. degree may be secured by passing comprehensiv examinations in the fields of study mentioned in paragraphs (b) and (d above. These examinations must be in courses regularly offered by the colleg

## INSTITUTION AND RESIDENCE REQUIREMENTS

a. A minimum of 30 semester units, or the equivalent, must be secured from th college conferring the degree.

b. A least 12 semester units, or the equivalent, must be earned in campus res dence course work at the college conferring the degree and must be secure after completion of at least 90 semester units, or the equivalent. (This residenc requirement is subject to possible change during the current school year.)

c. A maximum of 30 units may be secured by examination.

# BACHELOR OF VOCATIONAL EDUCATION DEGREE

The purpose of this degree is to promote the professional advancement of the ocational teachers of the State. Eligible candidates for this degree shall be limited to hose vocational teachers who meet the requirement established in the Education Code f the State of California and who are recommended by the Board of Examiners for ocational Teachers.

The educational program for each applicant shall be determined by the College n terms of the needs of the individual applicant and the standards of the institution.

Each applicant for the degree shall have completed, with a grade point average of .0 (grade of C) or better, a course of 124 semester units, including the credits recomnended by the Board of Examiners, and shall have met the general education requireents prescribed for the bachelor of arts or bachelor of science degree.

The credits recommended by the Board of Examiners for Vocational Teachers or the applicant's occupational, managerial and supervisory experience shall be pplied toward a major in vocational arts. The vocational teacher training completed y the applicant may be used toward a minor in education or toward electives if some ther minor is used.

The candidate for this degree must complete a minimum of 24 semester units n residence at this College, including registration in 36 weeks of residence work. The andidate must also meet all institutional requirements prescribed for candidates or other bachelor degrees, including requirements in American history, institutions, nd ideals, U. S. Constitution, and California state and local government.

# PREPROFESSIONAL AND OCCUPATIONAL CURRICULA

Preprofessional and occupational curricula, which usually require four years o collegiate work, are offered. Curricular outlines of preprofessional study, which ar presented on the following pages, meet the typical requirements for admission to pr fessional schools. Students expecting to complete their professional training at othe institutions should modify the suggested outlines of study to meet the requirements o the professional schools of their choice. Curricular outlines for complete training lea ing to vocations are also presented on the following pages.

Curricular outlines are presented for the following:

Preagricultural
Business
Predental
Engineering
Home Arts
Inter-American Relations
Journalism
Laboratory Technique
Prelegal
Life Science Vocational
Premedical
Personnel Management
Prepharmacy
Public Administration
Recreation
Social Service

Students planning to enter professional or occupational fields in forestry, nursin optometry, or veterinary science may obtain assistance from advisers in these areas i planning lower division courses leading to further education in these fields.

## PREAGRICULTURAL CURRICULA

These curricula are provided for students who plan to enter the field of agricultur to enable them to obtain basic science and general education courses before transferrin to an agricultural institution. These students should ascertain the lower division r quirements of the college to which they expect to transfer and include such requirement in the plan suggested below.

Students in high school preparing to study agriculture should include the follow ing subjects: Elementary algebra, plane geometry, intermediate algebra, trigonometr chemistry, physics, mechanical drawing, and three years of one foreign language, i required by the college to which the student expects to transfer.

*Curriculum in Plant Science:* Freshman year, physical education activitie Health Education 21, Chemistry 1A-1B, Botany 2A-2B, Physics 2A-2B, English 1, an Speech Arts 3 (32 units); sophomore years, physical education activities, Economic 1A-1B, English 2A or other literature course, Chemistry 101A-101B, Geology 1A o 2A, Bacteriology 1, Zoology 1A and Psychology 1 (32 units).

*Curriculum in Animal Science:* Freshman year, physical education activitie Chemistry 1A-1B, Zoology 1A-1B, Physics 2A-2B, English 1, Speech Arts 3, Healt Education 21 (32 units); sophomore year, physical education activities, Psychology English 2A or other literature course, Economics 1A-1B, Bacteriology 1, Botany Chemistry 101A-101B, Zoology 20 or 8, and 100 (36 units).

Students should consult with the adviser in the preagricultural curriculum fo selection and arrangement of courses.

## BUSINESS CURRICULA

The Division of Business consists of three departments: Accounting and Busines Management; Marketing; and Business Education, Secretarial and Office Manag ment. Each department offers majors in business in various fields of specializatio within the department, leading to the bachelor of science degree.

The Department of Accounting and Business Management offers specializatio in accounting, banking and finance, business management, insurance, and credit man agement. The Marketing Department offers specialization in marketing and in personne management. The Business Education, Secretarial and Office Management Department offers specialization in general business, secretarial and office management and in teacher education leading to the special secondary and general secondary school credentials.

The first two years of the business curricula are introductory. During this period the student acquires a basis for further study and an understanding of the place that business fills in modern economic life. There are some differences in the lower division requirements in the various fields of specialization. A selection of the field of specialization should be made as early as possible by the student. A student may transfer from one field of specialization to another, but with possible loss in time because of the differences in requirements among the various fields. The student follows a program of studies that is designed to provide a vocational ability in at least one area.

Refer to the section of the catalog: Announcement of Courses, under the heading of Business Curricula, for specific requirements in business majors. Students should consult with the departmental adviser in selection and arrangement of courses.

## PREDENTAL CURRICULUM

Candidates for a degree in dentistry should ascertain the entrance requirements of the dental college to which they expect to transfer and should make whatever changes in the following typical requirements that may seem desirable in satisfying the requirements of the specific dental college.

The curriculum for dental hygiene is essentially the same as for predentistry.

High school students planning to enter dentistry should include in the high school program the following subjects: Elementary algebra, plane geometry, intermediate algebra, chemistry, physics, mechanical drawing, and three units in one foreign language if required by the college to which a student expects to transfer.

*Course of Study for Predental Curriculum:* Freshman year, physical education activities, Health Education 21, Psychology 1, Speech Arts 3, English 1, English 2A or other literature course, Chemistry 1A-1B, Physics 2A-2B and 3A-3B (32 units); sophomore year, physical education activities, Chemistry 5A, Zoology 1A-1B, Mathematics C and D, social science including courses in U. S. history, Constitution, and California government, and electives in general education (32 units).

The following courses for a third year in preparation for dentistry are suggested for students who fail to receive acceptance from a dental college after completing the prescribed 60 units: Chemistry 101A-101B; Zoology 100 and 106; Art 119A, Psychology 11; additional courses in general education.

## ENGINEERING CURRICULA

The engineering program is designed to give a student a sound training in the undamentals of general engineering with a minimum of specialization, and at the same ime provide the broad training and experiences which constitute a liberal education. The program leads to the degree of Bachelor of Science in Engineering.

Students graduating in engineering will find employment in various functions of heir chosen field. For example, a student who has selected the mechanical engineering ption may find employment in the operation of a steam plant, or in the application and ales of construction equipment.

The program is intended to provide the essential training in those functions which re within the scope of a four year program. These, specifically, are the production, peration, maintenance, service, sales, and management functions of engineering. Curicula and individual courses are designed to emphasize these functions. Students who esire training for work in such fields as research, design, and development should plan o complete their education at a university where these fields are emphasized.

### FIELDS OF SPECIALIZATION

The freshman and sophomore years of the engineering curricula concentrate pon the development of an adequate scientific and mathematical background together with introductory engineering courses. With minor variations the first two years of tudy are the same for all engineering students.

The junior and senior years concentrate upon the application of this backgroun to the study of engineering theory and practice. In the junior and senior years, tw different types of programs are available:

(1) A general engineering program.

(2) A program which provides limited specialization in the major fields c engineering.

The general engineering program recognizes the mutual interdependence of th fields of engineering and the overlapping of these fields which occur in a high pe centage of engineering positions. This program emphasizes the subject material mos common to the major fields of engineering and includes a high percentage of shop an laboratory work.

The second type of program, while retaining most of the features of the genera program, provides the opportunity for limited specialization in several optiona engineering fields. These options include: aeronautical, chemical, civil, electrical, electronics, and mechanical engineering, and engineering economics.

Students may elect either type of program, depending upon their occupationa or vocational objectives.

## HIGH SCHOOL PREPARATION

**The high school program should include the following subjects: Elementar algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; solid geometr ½ unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawin 1 unit.**

## GENERAL REQUIREMENTS

For general requirements for the B.S. degree, refer to the section of the catalo entitled: Bachelor of Science Degree in Arts and Sciences and to the section entitled General Requirements for the Bachelor of Arts and Bachelor of Science Degree

## SPECIFIC REQUIREMENTS

For specific outline of courses in the engineering curricula including recommended electives to fulfill the requirements for general education, refer to Engineerin in the section entitled: Announcement of Courses.

# HOME ARTS CURRICULUM

The Home Arts curriculum is designed to meet the needs of those student who wish to apply their knowledge to the various problems of home living. This curriculum is based on the *general major* in arts and sciences with a field of concentration i Home Economics combined with two other fields to be selected by the student in consultation with the home arts adviser and the Dean of Instruction. (Refer to the General Major in the section of the bulletin entitled: Bachelor of Arts Degree.) By appropriate selection of courses, the student may prepare for several related fields, suc as radio, community recreation, home service in industry, merchandising, and socia work.

| *Summary of unit requirements:* | *Unit* |
|---|---|
| General education | 4 |
| Preparation for the general major | 2 |
| General major (upper division) | 3 |
| Electives | 1 |
| Total units required for graduation | 12 |

*Specific requirements for the major:* Lower division: Home Economics 1, 5, 10 55, 61A-61B; Sociology 50 and 51; six lower division units in a third field. Uppe division: 15 upper division units to be selected from Home Economics 100, 101, 105 135, 150, 160A-160B, 170, with the approval of the adviser in home arts; nine uppe division units to be selected from a second field; and 12 upper division units to b selected from a third field. A minimum of six lower division units is usually required i each field of the general major as preparation for upper division work.

Students should consult with the adviser in the home arts curriculum for selection and arrangement of courses.

## INTER-AMERICAN RELATIONS

This curriculum, designed around the general major, provides (1) a basis for a
ore effective understanding of the opportunities and problems of international rela-
ions in the western hemisphere; (2) facilities for a basic education and training for a
usiness or professional career involving international relations; (3) undergraduate
reparation for the comprehensive examinations required for appointment in the
oreign Service, Department of State.

High school students preparing to enter this area of Foreign Service should
clude in the high school program three years in one foreign language, preferably
panish.

Students should consult with the adviser in Inter-American Relations regarding
n appropriate program of studies.

## JOURNALISM CURRICULUM

The purpose of the journalism curriculum is to prepare students for positions
n mass communications media and to offer to teacher candidates background for
ducational work in journalism. The four-year program contemplates that in addition
professional training, majors shall acquire a broad background in such related
elds as English, sociology, psychology, political science, economics, and history. All
ajors are required to take survey courses in newspaper and radio techniques and
hotography. Introductory courses in mass communications research are offered. The
rogram is so designed that during the final two years, majors may take specialized
ork in newspaper reporting and editing, magazine writing, advertising and radio
roduction. Producing the campus newspaper serves as a laboratory for students.
rrangements are made for students to serve internships on daily and weekly news-
apers, industrial magazines and radio stations.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 11–14 |
| Major (upper division) | 24 |
| Electives | 41–44 |
| Total units required for graduation | 124 |

*Specific requirements for the major:* Lower division: Journalism 51A-51B,
ournalism 50, Speech Arts 81, and Business 2A, or proficiency in typing. Upper
ivision: 24 upper division units in journalism including Journalism 102 and 151.
minor is not required.

## LABORATORY TECHNIQUE CURRICULUM

The laboratory technique curriculum is offered with the B.S. degree. This cur-
culum, with modifications for the types of licensures, is provided to satisfy the
ademic requirements to qualify for the examinations given by the State of Cali-
rnia Public Health Department for Public Health Bacteriologist, Clinical Laboratory
echnician, and Medical Technologist. If the curriculum outlined by this College is
llowed, only six months of apprenticeship are required to complete the qualifications
r the licensing examinations for Public Health Bacteriologist and Clinical Laboratory
echnician. Five years of experience as a Clinical Laboratory Technician are necessary
qualify for the examination for licensure as a Medical Technologist.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major required for State licensure exclusive of General Education courses | 23–37 |
| Major (upper division) | 36–44 |
| Electives | 2–24 |
| Total number of units for graduation | 128 |

*Specific requirements for the major:* Lower division (including courses in General Education, but required for licensure): Chemistry 1A-1B, * Chemistry 5, Biology 3 and 4 or Zoology 1A-1B, Bacteriology 1 or 101, Physiology, 1A and 1C, * Physics 2A and 3A. Upper division: 36 upper division units, including Chemistry 101A, *Chemistry 114A-114B, Bacteriology 102, 103 and one or more courses selected from Bacteriology 105, 106 or 107, * Zoology 109, Zoology 128, 104, 126, and 108, and additional electives to complete the major. Twelve units of science courses in the major field may be counted as general education in natural science.

Students should consult with the adviser in the Laboratory Technique Curriculum for selection and arrangement of courses.

## PRELEGAL CURRICULUM

The entrance requirements of schools of law range from two years to three and four years of prelegal work. The lower division requirements of the arts and sciences curricula should be met in full whether the prelegal curriculum extends over a period of two, three, or four years.

The following curriculum is designed to meet the recommendations of standard American schools of law for a broad and liberal education. For the majority of pre-legal students a general major with concentration in economics, political science, and history, or a major-minor combination in these fields will constitute the most effective preparation for later professional study in law and for later activities in the field of business.

*Preparation for the major:* Lower division: Business 14A-14B, Economics 1A-1B, Political Science 71A-71B or 1A-1B, and a year-course in history. Recommended: six units from Philosophy 1A-1B, 3A-3B, or 20. Twelve units from courses in this lower division sequence may be applied toward general education requirements.

### Upper Division

In the junior and senior years the student will plan his course with the counsel of his adviser in terms of the field of law in which he plans to work, but keeping in mind the entrance examinations and other requirements for admission to schools of law. The course selected will be drawn from the preferred and recommended lists below. Optional courses, that is courses not found in the preferred and recommended lists, may be taken to satisfy the general major pattern requirement, but only with the consent of the student's prelegal adviser. These courses are not to be considered as general electives.

The student must complete a master plan approved by the prelegal adviser and filed with the Registrar.

*Preferred List*

Economics 133, 150, 151, 170.
History 151A-151B, 172A-172B, 175A-175B.
Philosophy 121, 129.
Political Science 139A-139B.
Psychology 145.
Sociology 173, 174.

*Recommended List*

Economics 102, 110, 111, 128, 131, 135, 142, 171, 172, 185, 190, 195.
English 106, 120, 126A-126B, 129, 131, 192.
History 111A-111B, 121A-121B, 143A-143B, 175A-175B, 179A-179B, 181A-181B.
Philosophy 101, 111A-111B, 130.
Political Science 105, 111A-111B, 120, 121, 122, 140A, 140B, 142, 143, 150A-150B, 152, 153, 154, 158A-158B, 198.
Sociology 152, 170, 174, 187.
Speech Arts 162, 191, 192.

## LIFE SCIENCE MAJORS

Within the life science majors, curricula are offered for the fields of entomology, fish and game, plant quarantine, and wild life. Requirements for these curricula are the same as for the B.S. degree in zoology or in botany; the specialization for a particular occupation lies within the upper electives of the B.S. degree program.

Students in high school planning to enter any of these life science curricula should include in the high school program the following subjects: Elementary algebra, plane geometry, intermediate algebra, trigonometry, chemistry, and physics. Three years of French or German recommended.

---

* These courses are not required for the Public Health Bacteriologist license.

Courses in the field of specialization may be selected from the following: Bacteriology 101; Botany 102, 105, 107, 119, 126; Chemistry 101A; Economics 140 or Psychology 104; Political Science 140A-140B; and Zoology 101, 104, 110, 113, 115, 118, 119, 121, 122, 125, 126, 128, 153, 158.

Students should consult with the adviser in the life science curricula for selection and arrangement of courses.

## PREMEDICAL CURRICULUM

The entrance requirements of medical colleges ordinarily range from three to four years of premedical work. The lower division requirements of the liberal arts curricula include the general requirements of standard medical colleges and should therefore be met in full whether the curriculum extends over a period of three or of four years. All plans for premedical work should include an arrangement of courses to meet the requirements of the medical college which the student expects to enter.

Students ordinarily elect to concentrate in chemistry and zoology with a major in one and a minor in the other. Requirements for these majors and minors are described under these departments.

High school students planning to enter medicine should include in the high school program the following subjects: Elementary algebra, plane geometry, intermediate algebra, chemistry, physics, two or three years of French or German. Two years of Latin also recommended.

Course of study for premedical curriculum in addition to general education requirements:

Freshman year: Chemistry 1A-1B, Zoology 1A-1B or Physics 2A-2B, 3A-3B.

Sophomore year: Chemistry 5A, Physics 2A-2B, 3A-3B or Zoology 1A-1B, and foreign language.

Junior year: Chemistry 101A-101B, foreign language to 12 units, Zoology 100 and 106.

Senior year: Completion of requirements for graduation with a major preferably in chemistry or zoology.

Students should consult with the adviser in the premedical curriculum for selection and arrangement of courses.

## NURSING CURRICULUM

It is anticipated that by fall, 1953, a four-year curriculum leading to the bachelor of science degree in nursing will be introduced in the Division of Life Sciences. Specific requirements for this curriculum will be announced later.

## PERSONNEL MANAGEMENT CURRICULA

A student desiring to prepare for personnel management may follow one of the three plans outlined below. Emphasis is placed on different areas, depending upon the vocational objective. A student preparing for graduate work in personnel management should consult with the adviser in his selected field in choice and arrangement of courses. Courses in the major are in addition to 45 units in general education courses.

*Personnel Management:* This curriculum includes work in three fields: business, economics, and psychology. Lower division requirements: Business 14A and 20, Psychology 6, and Economics 1A-1B (15 units). Upper division requirements: Business 121, 153, 154, 198A; Economics 150, 151, 185; Psychology 104A, 105A, 121, 131, 152 (36 units). Other courses in business may be substituted for Business 14A and 198A on the basis of individual counseling. Four additional upper division units must be completed for graduation. It is recommended that these units and additional electives be chosen from the following: Business 186; Psychology 104B, 122, 132; Sociology 110, 170, 185; Political Science 71A, 71B and 143.

*Public Personnel Management:* This curriculum includes work in three fields: political science, economics, and psychology. Lower division requirements: Political Science 71A-71B, Economics 1A-1B, and Psychology 6 (15 units). Upper division requirements: Political Science 140A-140B or 147A-147B, 144, 145, 146, 198; Economics 150, 151, 185; Psychology 104A, 105A, 121, 131, 152 (36 units). Another political science course may be substituted for Political Science 198 on the basis of individual counseling. Four additional upper division units must be completed for graduation. It is recommended that these units and additional electives be chosen from the following: Business 121; Economics 131; Political Science 142, 143.

*Pre-Industrial and Personnel Psychology:* This curriculum is offered under tl major in psychology. For details, refer to Psychology in the section of the bulletir Announcement of Courses.

## PREPHARMACY CURRICULUM

Some colleges of pharmacy offer a four-year curriculum, others a six-year cu riculum of pharmacy. Students should ascertain the extent and requirements of th curriculum of the college of pharmacy they expect to enter. Colleges of pharmacy whic offer the four-year curriculum normally permit not more than one year of credit i time for work completed in an institution other than a college of pharmacy. Colleges c pharmacy which offer a six-year curriculum normally permit not more than two year of credit in time for work completed in an institution other than a college of pharmac California state law requires that an applicant for the State Board Examination i Pharmacy must be a graduate of a recognized college of pharmacy which requires resident attendance of not less than four years.

The high school program should include the following subjects: Elementar algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonometry ½ unit; chemistry, 1 unit; physics, 1 unit; foreign language, 2 units.

At San Diego State College the following prepharmacy curricula are offered:

*Course of study for the four-year curriculum:* Freshman year, physical educa tion activities, English 1 and a literature course, Chemistry 1A-1B, Zoology 1A-1B Botany 1, Mathematics 3A or 1, and electives (32 units).

*Course of study for the six-year curriculum:* Freshman year same as for th four-year curriculum. Sophomore year, physical education activities, foreign languag if needed, social science including U. S. history and Constitution courses, Physic 2A-2B and 3A-3B, Psychology 1, Health Education 21, and electives (32 units).

Students should consult with the adviser in the prepharmacy curricula for selec tion and arrangement of courses.

## PUBLIC ADMINISTRATION CURRICULUM

The program of training in public administration can be obtained by completion of the occupational major in public administration or through a major in political science. In either case, the student will follow a sequence of work dealing with the principles and problems of organization for the carrying out of the functions of government, and public management. This latter aspect deals primarily with the directing and coordinating of work operations, the staffing of public agencies, the processes of budgeting and financial control, and the dynamics of management, namely planning, research, communications, leadership and human relations in the administrative process.

The public administration curriculum may be adapted to several goals, one being the taking of junior administrative examinations for entrance into the government service at the local, state or federal levels, and preparation for advancement up the governmental ladder. It is designed also to prepare students for graduate work in public administration.

Selected students may participate in an internship program in local government offices. Working under the close supervision of governmental officials and the adviser in public administration, the intern deals with actual administrative procedures and problems in government.

### Occupational Major

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 12 |
| Major (upper division) | 36 |
| Electives | 31 |
| Total units required for graduation | 124 |

*Specific requirements for the major:* Lower division: Political Science 71A-71B, Economics 1A-1B. Upper division: 36 upper division units, including Political Science 140A-140B, 198, Economics 131, and 140.

Students planning to enter public administrative fields should consult with an adviser in public administration.

### Minor

A *minor in public administration* is offered in arts and sciences for students majoring in fields other than political science or public administration. This minor onsists of Political Science 71A-71B, 140A-140B, and three units of upper division work selected from Political Science 198, Internship in Government Administration, or other political science course.

### Certificate Programs in Public Administration and in Social Work Administration

*Certificate in Public Administration:* Admission to candidacy for the Certificate n Public Administration is open to all public service employees without reference to revious academic experience. Candidacy will be established by approval of the Coordinator of Public Administration. To receive the Certificate in Public Administration, the candidate must complete an approved pattern of eight courses, with a grade point average of 1.5.

*Certificate in Social Work Administration:* Admission to candidacy for the Certificate in Social Work Administration will be established by approval of the Coordinator of Public Administration. To receive the Certificate in Social Work Administration, he candidate must complete an approved pattern of 30 units in courses at San Diego State College with a grade point average of 2.0. Prerequisites for admission to candidacy are 20 units in approved social science courses.

Candidates for the certificate programs may obtain further information on equirements by writing to the Coordinator of Public Administration, San Diego State College.

## RECREATION CURRICULUM

The curriculum in recreation is designed to provide a program of training for recreation and camp leadership, work with youth groups, and related activities.

| *Summary of unit requirements:* | *Units* |
|---|---|
| General education | 45 |
| Preparation for the major | 20–22 |
| Major (upper division) | 36 |
| Electives | 21–23 |
| **Total number of units required for graduation** | 124 |

*Specific requirements for the major:* Lower division: Sociology 50 and 51; Physical Education 53. In addition, men are required to complete Physical Education 64. Women must include Physical Education 2A, 4, 5, and 6. Required in related fields: 12 units selected from the fields of art, industrial arts, music, physical education, and speech arts, with a maximum of five units in any one field. Courses in related fields which are designated as general education courses may be applied toward general education requirements. Upper division: 36 units distributed as follows: Recreation 165, 170A-170B, 184A-184B; Psychology 106, 145; Education 174; Physical Education 151; Political Science 143; nine units selected from Sociology 110, 174, 185, 187, 190. Four additional upper division units in electives are required to complete the 40 upper division units for graduation.

Students should consult with the adviser in the Recreation Curriculum for selection and arrangement of courses.

## SOCIAL SERVICE CURRICULUM

### (PRESOCIAL WORK)

The professional curriculum in social service prepares for admission to graduate work in recognized American schools of social work. This curriculum should be pursued by those who plan careers in federal, state and local welfare work; social work in public schools including preparation for a teaching credential; family and children's private case work agencies; social settlement work; county probation work; child welfare agencies; statistical and investigational work in private and public agencies; work in public institutions for the defective and delinquent; medical social service and psychiatric social work in hospitals and clinics; executive positions in social worl and social work in numerous other organizations.

The lower division requirements of the arts and sciences curricula include the ge eral requirements of recognized professional schools of social work and should therefo ordinarily be met in full. The courses indicated below meet the requirements for tl general major. For description of the general major, refer to the section in the bullet on the bachelor of arts degree in arts and sciences.

*Summary of unit requirements:*

| | Units |
|---|---|
| General education | 45 |
| Preparation for the major | 21 |
| Major (upper division) | 38 |
| Electives | 20 |
| Total number of units for graduation | 124 |

*Specific requirements for the major:* Lower division: Sociology 50 and 51, Ec nomics 1A-1B, Political Science 71A-71B or 1A-1B, and Psychology 11 (21 units Biology 1 or 3 and 4 should be taken as general education courses in natural scienc Recommended: courses from anthropology, foreign language, and speech arts. Uppe division requirements: Sociology 103, 187, 190, and an upper division elective (1 units); Economics, nine units selected from 102, 131, 150, 170, 185, 195; Politic Science, six units selected from 140A, 140B, 142, 143; Psychology 145, 150, and 15 or 152 (nine units); Zoology 165 or 155 (two units). An additional two units in uppe division electives must be taken to complete the 40 upper division units required fo graduation. Twelve units of social science in the major field may be counted as genera education in social science.

Students should consult with the adviser in the social work curriculum fo selection and arrangement of courses.

### Certificate in Social Work Administration

A certificate in Social Work Administration is available to persons professionall engaged in the field of social work. This program is described under the Publi Administration Curriculum.

# ANNOUNCEMENT OF COURSES

## COURSE NUMBERS

Courses numbered from 1 to 99 are lower division (freshman or sophomore) courses; those numbered 100 to 199 are upper division (junior or senior) courses; those numbered 200 to 299 are graduate courses (see section on Admission and Registration for information concerning eligibility to enroll in these courses) those numbered 300 to 399 are professional education courses to be taken at the graduate level.

## CREDIT FOR UPPER DIVISION AND GRADUATE COURSES

A student with lower division standing is not eligible to take upper division courses, with the following exceptions: A student in the last semester of his sophomore year who is approaching upper division standing must carry sufficient lower division units to complete the required minimum of 60 units may carry upper division units for the remainder of his study load. A student with sophomore standing may carry upper division courses for upper division credit provided that he has the written approval of the chairman of the department and the Dean of Instruction. This written approval must be filed in the Office of the Registrar on the form "Adjustment of Academic Record." Blank forms may be obtained by the student at the Office of the Registrar.

Graduate credit for courses numbered 200 to 299 is limited to students with graduate status. (See Admission to Graduate Study in section on Admission and Registration.)

## GENERAL EDUCATION COURSES

Course numbers preceded by an asterisk (*) are general education courses which may be applied toward the 45 unit requirement in general education, unless specifically required as part of the major. Refer to the list of general education courses in the section of the bulletin entitled: General Requirements for the Bachelor of Arts and Bachelor of Science Degrees.

## UNITS

Figures in parentheses indicate the unit value of the course.

One "unit" represents 50 minutes of recitation or lecture, together with the required preparation, or three hours laboratory work each week for a semester of 18 weeks.

## SEMESTER IN WHICH COURSES ARE OFFERED

Roman numeral I indicates course is offered in Fall semester. Roman numeral II indicates course is offered in Spring semester.

Following the course title are designations of credit and the semester in which course is offered. Examples:

(3) I____________________________________Three units. Offered first semester

(3) I, II_______________Three units. Offered first semester and second semester

(3-3) Year, I
Three units each semester. Year sequence beginning in the first semester

(3-3) Year, I, II
Three units each semester. Year sequence beginning either semester

Although the college fully expects to carry out the arrangements planned in the list of courses, it reserves the right to make changes. Classes in which the enrollment does not come up to the minimum number set by the State Department of Education may not be offered or may be postponed.

### PREREQUISITES

Prerequisites for courses are stated. A student should not enroll in a course f which he is not eligible.

Admission to all graduate courses requires graduate status and permission of t instructor.

# AESTHETICS

## IN THE DIVISION OF FINE ARTS

Major or minor work is not offered in aesthetics; however, certain courses i this field are required as part of the majors in art and in music. For specific inform tion, refer to these departments.

### Lower Division Courses

*** 2. Introduction to Music** (3) I
Practical approach to hearing music with understanding and pleasure, throug study of representative compositions of various styles and performance media, grea musicians and their art. Music correlated with other arts through lectures, recording concerts. Closed to music majors or minors.

*** 5. Art Orientation** (2) II
An illustrated lecture course dealing with aesthetic meaning and its relatio to the structure of art products. Designed to increase both understanding and appre ciation of the visual world in general and of the fine arts in particular.

*** 50. Appreciation and History of Art** (2) I
A survey of art development in the painting, sculpture, architecture, and handi crafts from dawn of art to the Renaissance. Illustrated.

*** 51. Survey of Mexican Art** (2) I
A study of Mexican and Middle American Art from earliest time to present.

**52A-52B. Survey of Oriental Art** (3-3) Year, I
A study of the art of the great cultures of the Orient. (52A is a prerequisit for 52B.)

### Upper Division Courses

*** 102. Great Music** (3) II
Instrumental and vocal music in the larger forms studied through directe listening. Artistic trends and their effect upon music composition and performance. N prerequisite, but completion of Aesthetics 2 recommended. Not open for credit to musi majors. Formerly Aesthetics 100.

*** 138. Introduction to Aesthetic Appreciation** (1) I
Major forms of expression and aesthetic experience in art, music and literature, presented by an interdepartmental staff through lectures, demonstration, and panel discussions. Not open to students with credit for Comparative Literature 138.

*** 150. Appreciation and History of Art** (2) II
The period from the Renaissance through the modern school treated in the same manner as in Aesthetics 50.

**160. Techniques and Procedures of the Art Museum Worker** (3) I
Designed to acquaint the student with the nature and function of the art museum in the community and to give him experience in the methods by which it serves the public. Prerequisite: Aesthetics 5 or 50 and 150.

*** 162. History and Philosophy of the Dance** (2) I
A study of the historical background of the dance, with special emphasis upon its development in America and its present status in education and the creative arts. Not open to students with credit for Physical Education 162.

# AIR SCIENCE

## IN THE DIVISION OF AIR SCIENCE AND TACTICS

### Air Force Reserve Officers' Training Corps

The Department and Division of Air Science and Tactics at San Diego State College offers the curriculum prescribed by the Air Force Reserve Officers' Training Corps. This curriculum consists of a four-year course, including a two-year basic course and a two-year advanced course.

The objectives of the Air Force ROTC program are the development of qualities of leadership and character essential to civil and military responsibility and the training of officer reserve personnel. Completion of the four-year course and a bachelor's degree leads to commission in the Air Force Reserve. Students who have demonstrated outstanding qualities of scholarship and leadership may receive regular commissions in the Air Force.

Flight training is not offered as part of this program; however, Air Force ROTC graduates have a high priority for such training and, if accepted, serve as reserve officers on active duty during the training period.

*Eligibility:* A regularly enrolled male student is eligible for admission to the basic course if he is a citizen of the United States, not less than 14 years of age and has not reached his 23d birthday, and is physically qualified for military training. For admission to the advanced course, the student must not have reached his 25th birthday and must have completed the basic course or its equivalent. At the discretion of the Professor of Air Science and Tactics, up to two years of pattern credit in the basic course may be allowed for prior active service in the armed forces. Normally, a student entering the advanced course must have two years of college work remaining. The applicant must pass required screening tests and be selected by the Professor of Air Science and Tactics and the President of the College.

Attendance at one summer camp is required of each student to qualify for the commission. The summer camp is six weeks in length and is held at an active Air Force base. The student receives $75 per month during this training period. Uniforms, equipment, subsistence, and transportation are furnished by the Air Force.

Students in the basic and advanced courses are furnished uniforms, equipment, and textbooks for military science. Students in the advanced course are given, in addition, commutation of subsistence allowance of approximately $27 per month. Upon acceptance of this allowance, the student executes a written agreement with the United States Government and with the President of the College to complete the advanced course, completion of such course becoming a prerequisite to graduation.

### Basic and Advanced Courses

The basic course requires three hours of instruction and drill per week each semester. The advanced course requires five hours. In addition, each student in the advanced course must attend one summer camp of six weeks. The basic course is designed to interest the student in national problems and the Air Force. The advanced course prepares the student to assume the duties and responsibilities of junior officers in the U. S. Air Force. Students enrolled in the AFROTC program pursue their regular courses of study in fields of their choice. Major work is not offered in air science and tactics, but a minor is offered.

### Minor

A *minor in arts and sciences* is offered in *air science and tactics.* The minor consists of 15 to 20 units in air science and tactics, six units of which must be in courses carrying upper division credit.

### Lower Division Courses

**1A-1B. First-Year Basic Air Science** (2-2) Year, I

Two hours of classroom instruction and one hour of drill per week. Introduction to the AFROTC program; moral and statutory obligations for military service; introduction to aviation; fundamentals of global geography; international tensions and security organizations; instruments of national military security; drill in basic military training.

**21A-21B. Second-Year Basic Air Science** (2-2) Year, I

Two hours of classroom instruction and one hour of drill per week. A course that develops the purpose, processes, and primary elements of aerial warfare; the mission of the Air Force and the media for its accomplishment; career guidance; drill in cadet noncommissioned officer training.

### Upper Division Courses

**131A-131B. First-Year Advanced: General Technical** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. A course that introduces command and staff concepts in the Air Force; basic problem solving techniques, fundamental communication processes, and principles of learning and teaching; military courts and boards; elements of applied Air Science; the Air Force base; leadership laboratory.

**133X. First-Year Advanced** (3) Summer Camp

A six-week camp required of all advanced students; normally completed between junior and senior year. Credit granted through the Extension Division on basis of individual student application with approval of the Professor of Air Science and Tactics.

**142A-132B. Second-Year Advanced: Administration and Logistics** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. Purpose and basic functions of the staff, administration of personnel at wing-base level, functions of Comptroller and Food Service Supervisor.

**143A-143B. Second Year Advanced: Flight Operations** (3-3) Year, I

Four hours of classroom instruction and one hour of drill per week. Advanced instruction in navigation and bombing and the theory of radar as applied to both.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## ANTHROPOLOGY

### IN THE DIVISION OF SOCIAL SCIENCES

Major work is not offered in anthropology; however, courses in anthropology may be included as part of a general major or social science major. Students wishing to use anthropology as a field of concentration in the *general major* should include the following courses in the lower division: Anthropology 1A-1B, 2 or 3; Geography 1, 2 or Geology 1A-1B; Sociology 50, 51; recommended: Spanish or German. The following supplementary fields of study are recommended in the upper division with a view to later specialization in anthropological work: For *archaeology:* art, geography, geology; for *physical anthropology:* psychology, statistics, and zoology; for *museum work:* art, education, and psychology. For further information on the *general major*, refer to the section on the Bachelor of Arts Degree.

Courses in anthropology may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of the requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in anthropology. The minor consists of 15 to 22 units in anthropology, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in anthropology for the general secondary credential; however, anthropology may be used as a part of the *social science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the requirements for the teaching minor for these credentials.

### Lower Division Courses

*** 1A-1B. General Anthropology** (3-3) I

Origin and antiquity of man. Theories of human descent. Classification of races. Origin and early development of civilization.

**2. Physical Anthropology** (3) I

An introduction to the studies of primatology and anthropometry. The comparative anatomy of the monkeys and great apes, the emergence of the anthropoids, the reconstruction of early man from fossil evidence. The landmarks, measures and indices used in the metrical study of the living human body and skeletal material. Sexual differences and growth changes in the skull and skeleton. Medico-legal applications.

**3. Survey of Archaeology** (3) II

A review of the history of modern archeology and a discussion of its methods. The development of archaeological techniques in reconstructing the ancient cultures of the Mediterranean world. The problems of present day archaeology in the Near East, the Orient and the Americas. The principles and basic techniques used in the excavation of sites and the reporting of findings.

*** 54. Social Anthropology** (3) II (Not offered in 1952-53)

An anthropological study of social institutions in primitive and civilized societies. The evolution of family organization, religion, property right, and government traced in elementary and advanced civilization.

### Upper Division Courses

**151A. The North American Indian** (3) I

Pre-Columbian cultures of the North American Indian. The origin and migration of New World peoples. Industries, arts, crafts, social organization, religion and other phases of American Indian civilization.

**151B. Indian Civilization of Middle America** (3) II

The development of civilization in Pre-Columbian Mexico and Central America: Aztec, Mayan, and related cultures.

*** 152. World Ethnography** (3) I (Not offered in 1952-53)

The cultural patterns of representative aboriginal peoples. Industries, arts, social organization and supernaturalism considered with a view to environmental adjustment, historical development and functional interrelation. Ethnological theories reviewed and applied in interpreting illustrative aboriginal societies.

**153. Primitive Religion** (3) II (Not offered in 1952-53)

Beliefs and ritual of primitive man. Magic and religion. Forms of animism and polytheism. Primitive mentality and the supernatural.

**161. The California Indian** (3) Summer

A survey of native California Indian culture with stress on the Indian groups of Southern California. The industries, arts, social organization, folklore and religion will be considered as revealed through the study of living peoples and archaeological evidences.

*** 165. Ethnology and Race Psychology** (3) I (Not offered in 1952-53)

The biological basis of race, somatic and serologic typology, racial mentality, tests and their ethnopsychological significance, abnormality in ethnic groups. Race and culture; ethnic aspects of demography.

**172. Indian Cultures of the Southwest** (3) Summer

Indian cultures of the past and present in the Southwestern states. Arts, crafts, architecture and religion as revealed through archaeology and ethnology.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## ART

### IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is offered in *art* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Every student who plans to major in art, whether in arts and sciences or in the teacher education program, must complete the following basic courses: Required in the major: Art A (or high school equivalent), Art B, 6A-6B, and 14A. Required in general education: Aesthetics 5 or 51 and 50.

In arts and sciences the student majoring in art may choose either a group of courses in which the crafts are emphasized or a group of courses in which the graphic arts are emphasized. One of the following plans should be selected:

*Emphasis on crafts:* The student should add to the list of basic courses required of all art majors the following courses in the major: lower division: Art 6D, 7, 61B and two units of art electives; upper division: Aesthetics 150, Art 106A or B or C, 106D, 111A, 117A-117B, 119A-119B, and eight units of art electives. This program leads in the direction of industrial design, interior design, cabinet making, sculpture, weaving, textile design, ceramics, etc.

*Emphasis on graphic arts:* The student should add to the list of basic courses required of all art majors the following courses in the major: lower division: Art 15A, 16A, and four units of art electives; upper division: Aesthetics 150, Art 106A or 106B, 112A-112B, 115A-115B, 116A-116B, 117A, and six units of art electives. This program leads in the direction of illustration, portraiture, landscape painting, mural design, poster design, production illustration, advertising design, fashion design, etc.

Art majors are not required to complete a minor.

A *teaching major in art* is offered for the general secondary and special secondary credentials. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *art*. The minor consists of 15 to 22 units in art, six units of which must be in courses carrying upper division credit.

A *teaching minor* is offered in *art* for the general secondary credential. Art may be offered only as a second minor for the general elementary and kindergarten-primary credential. For statement of requirements, refer to these credentials.

### Art Appreciation, History and Orientation

For courses in appreciation, history of art, and art orientation, see aesthetics. Many students, regardless of the field in which they may be majoring, recognize the need for an intelligent approach to the subject of art and art appreciation. However, due to the erroneous popular feeling that art is a subject requiring "talent," these students may refrain from enrolling in art courses. For students who desire a better understanding of art, but who do not hope to acquire any of the art skills, the following courses are recommended.

| | *Units* |
|---|---|
| Aesthetics 5, Art Orientation | 2 |
| Aesthetics 50, History and Appreciation of Art | 2 |
| Aesthetics 51, Survey of Mexican Art | 2 |
| Aesthetics 52A-52B, Survey of Oriental Art | 6 |
| Art 8, Costume and Home-furnishing | 2 |

Other courses which require certain skills but which are not beyond the ability of the average college student are:

| | |
|---|---|
| Art 61B, Crafts | 2 |
| Art 6A, Design | 2 |
| Art A, Drawing and Composition | 2 |
| Art 94, Costume design | 2 |

### Lower Division Courses

**Art A. Drawing and Composition** (2) I, II

Problems involving perspective to develop ability to draw still life, furniture, exteriors, interiors, and the like. (High school equivalent may excuse the student from this course.)

**Art B. Drawing and Composition** (2) I, II

Drawing of mechanical and natural forms by the use of line and value. Emphasis on proportion and structure. Some quick sketching, gesture and contour drawing. Prerequisite: Art A.

***6A. Design** (2) I, II

Fundamentals of design and composition and theory of color. Basic course used as a prerequisite for all advanced work.

**6B. Design** (2) I, II

Original work in creative design and representation with special stress on modern tendencies. Prerequisite: Art 6A.

**6D. Furniture Design** (2) I, II

Study of the principles of design through the making of furniture. Prerequisite: 6A.

**7. Line, Color and Display** (2) I, II
The principles of line, color and arrangement applied to store and window display. Study and observation of windows, color and materials used in display. Building models and practical problems in arranging colors, textures, and forms in windows to fit different kinds of merchandise. (Students taking this course for upper division credit, Art 107, will be required to do additional work.)

***8. Costume and House Furnishings** (2) I, II
An appreciative study of modern architecture and modern house furnishings, with emphasis on the spirit of gracious living and an appreciative study of the modern dress with emphasis on suitability to the figure, the personality and the occasion.

**14A. Lettering** (2) I
Fundamental art principles applied to lettering. Practice for quick, accurate lettering; original problems using letters as design. Prerequisite: Art 6A.

**14B. Posters and Commercial Art** (2) II
The application of lettering to posters, newspaper and magazine advertising, and other forms of commercial art. The study of composition combined with lettering and special study of modern tendencies in publicity. Prerequisites: Art 6A, 14A.

**15A-15B. Life Drawing** (2-2) Year, I, II
Drawing from the nude model. Prerequisite: Art A-B.

**16A-16B. Painting** (2-2) I, II
Semester I: Composition of still life in oil. Semester II: Landscape and more advanced composition in oil. Prerequisite: Art A-B.

**17A-17B. Sculpture** (2-2) I, II
Creative design in such materials as clay, wood, stone, concrete, etc. Prerequisites: Art 6A-6B.

**61A. Crafts in the Elementary Schools** (2) I, II
A foundation course which develops unification of work of the elementary grades through activities and experiences. These experiences grow out of environmental activities. They include study and working of clay, lumber and tools, textiles, and cardboard construction. Prerequisite: Art 6A.

**61B. Crafts** (2) I, II
Problems involving the application of design principles to various fields—pottery, textiles, weaving, metal work, wood-carving, and book-binding. Prerequisite: Art. 6A.

**94A-94B. Costume Design** (2-2) Year, I, II
Original designs of modern costumes suitable to the individual or to distinct types; the drawing of fashion figures; the rendering of fabrics and textures. Prerequisite: Art 6A.

**95A-95B. Interior Design** (See Art 195A-195B)

## Upper Division Courses

**106A-106B. Printmaking** (2-2) I, II
Study of print crafts which includes the making of linoleum blocks, wood engravings, etchings and lithographs. Prerequisites: Art A. B. 6A.

**106C. Illustration** (2) II
Same as 106A-B except that printmaking is applied to problems of book illustration. Prerequisites: Art A, B, 6A.

**106D. Advanced Furniture Design** (2) I, II
(See Art 6D) Prerequisite: Art 6D.

**107. Advanced Line, Color and Display** (2) I, II
(See course description under Art 7)

**111A-111B. Industrial Design** (2-2) Year, I, II
Design of objects for manufacture with reference to their use, materials, and in accordance with factory practices and machine techniques. Practice in the techniques of presentation, working drawings, renderings in perspective and scale models. Prerequisite: Art 6A-6B.

**112A. Design and Composition** (2) I
Structure in picture making. The controlled use of line, value, color, and texture to organize the effect of depth, movement, volume, etc., in the recognizable image. Oil technique. Prerequisites: Art A-B, 6A-6B.

**112B. Design and Composition** (2) II
Continuation of Art 112A. Prerequisite: Art 112A.

**115A-115B. Life Drawing and Painting** (2-2) I, II
Drawing and painting from nude and costume models. Prerequisite: Art A-B.

**115C-115D. Advanced Life Drawing and Painting** (2-2) Year, I, II
Study of human figure in terms of form patterns. Prerequisite: Art 115A-115B.

**116A-116B. Advanced Painting** (2-2) Year, I, II
Painting in oil from still life, landscape, or models, stressing composition. Prerequisite: Art 16A or 16B.

**117A-117B. Advanced Sculpture** (2-2) Year, I, II
Creative design in such materials as clay, wood, stone, concrete, etc. Prequisites: Art 6A-6B and 17A or 17B.

**119A. Ceramics** (2) I
Building of pottery on the basic techniques of coil, slab, mold making, and slip casting. Ceramic sculpture, glazing and kiln operations: Art 6A.

**119B. Ceramics** (2) II
Study of glazes and elementary clay technology. Mold making, slip casting with application to individual creative problems. Prerequisite: Art 119A.

**120A-120B. Advanced Design** (2-2) Year I, II
Advanced work in pure design, two and three dimensional. Re-examination of color theory and design principles. Prerequisites: Art A-B, 6A-6B.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**194A-194B. Costume Design** (2-2) Year, I, II
For description, see Art 94A-94B. Prerequisite: Art 6A.

**195A-195B. Interior Design** (2-2) I, II
The consideration of the house as a unit; the arrangement of garden, house, floor plan, and furniture as functional and decorative problems. Prerequisite: Art A and 6A; 195A is a prerequisite for 195B.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## Graduate Courses

**200A-200B. Special Problems** (2-2) I, II
A graduate course in which students may carry out projects in various fields of art under the direction of faculty members who are specialists in the field chosen. Students registering for this course must apply for work within a certain field after discussions with the art faculty.

**290. Bibliography** (1) I, II
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Pererquisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis or Project** (3) I, II
Guidance in the preparation of a project or thesis for the master's degree.

# ASTRONOMY

## IN THE DIVISION OF PHYSICAL SCIENCES

Major work is not offered in astronomy. Students desiring to prepare for advanced work in astronomy should include the following courses: Astronomy 1, 2, 3, 9, and 10; Mathematics 3A-3B, 4A-4B; Physics 4A-4B-4C; a reading knowledge of French and German.

Courses in astronomy may be used as part of the general science major for the general junior high school credential. For specific information, refer to the outline of requirements for the general science teaching major for this credential.

### Minor

A *minor in arts and sciences* is offered in astronomy. The minor consists of 15 to 22 units in astronomy, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in astronomy; however, astronomy may be used as part of the *general science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

***1. Descriptive Astronomy** (3) I, II
A cultural course planned to develop an appreciation of astronomy with emphasis on the solar system. Attention is given to the methods by which astronomical knowledge has been gained. A six-inch refractor and an eight-inch reflecting telescope are available for observation.

***2. Modern Astronomy** (3) II
A study of the stellar system in the light of modern research, especially photographic and spectrographic. Prerequisite: Astronomy 1 or permission of the instructor.

***9. Practice in Observing.** (1) I, II
A course designed to supplement Astronomy 1. The course will include constellation study, use of astronomical coordinates, and descriptive observations of celestial objects with the telescope. One three-hour evening laboratory period each week. Recommended: Astronomy 1 or concurrent registration in Astronomy 1.

**10. Advanced Observational Astronomy** (1) II
A continuation of Astronomy 9. More advanced problems in observing will be taken up such as the determination of latitude by observations of Polaris, transit observations, astronomical photography, etc. One three-hour evening laboratory period each week. Prerequisite: Astronomy 9.

**12. Elementary Navigation** (3) I
A study of compass corrections, time, line of position, use of celestial coordinates, etc. A few class hours devoted to the use of tables such as H.O. 214 for the solution of astronomical triangle. One laboratory period each week. Astronomy 1 and 9 desirable.

### Upper Division Courses

***101. Principles of Astronomy** (3) I (Not offered 1953-54)
A course designed particularly to provide background for teachers. It consists of two lectures and one laboratory period each week. Students will be required to become familiar with the prominent constellations, brighter stars in the sky, and with the general characteristics of the solar and stellar system.

**103. Astronomical Optics** (2) II
This course aims to acquaint the students with the optics and methods of testing of an astronomical telescope. The course consists of one lecture and one laboratory period each week. The student is required to grind a four-inch astronomical telescope mirror. Prerequisite: Astronomy 1 or permission of instructor.

***105. Historic Development of Astronomy** (3) I (Not offered 1953-54)
A study of the more important problems and astronomical concepts in the light of their historical development. Particular attention is given to the biography and contributions of the more important astronomers, such as, Galileo, Kepler, Newton, Herschel, Bessel, etc.

**107. Method of Least Squares and Computing Practices** (3) I (Not offered 1953-54)

Fundamental principles with applications in the fields of astronomy, physics, and engineering. Prerequisite: Math 4A or equivalent.

**110. Introduction to Study of Variable Stars** (3) II

A study will be made of the various types of variable stars, their spectra, periods, methods of observing, etc. In the laboratory the light curve of several typical variables will be observed. Two lectures and one laboratory period each week. Prerequisite: Astronomy 2. Astronomy 9 desirable.

**112. Elementary Astrophysics** (3) I (Not offered 1952-53)

A lecture course in the application of physics to astronomy: Much of modern astronomical research is in the field of astrophysics. An occasional laboratory period will be substituted by appointment for the lecture period. Prerequisites: Astronomy 2 or college physics.

**113. Surveyor's Course in Practical Astronomy** (3) II

The principles of spherical astronomy adapted to the needs of engineering students. Computation and observation. Two lectures and one three-hour laboratory period each week. Prerequisite: Engineering 1A or permission of the instructor. Astronomy 1 and 9 desirable.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisites: three units in astronomy and permission of instructor.

## BACTERIOLOGY

### IN THE DIVISION OF LIFE SCIENCES

A *major in arts and sciences* is offered in bacteriology for the A.B. degree. Courses in the major are in addition to 45 units in general education courses, except that nine units in natural science may be applied toward general education requirements. Lower division requirements: in the major, Bacteriology 1; in related fields, either Biology 3 and 4, or Zoology 1A-1B, or equivalent; Chemistry 1A-1B and Chemistry 5A. Recommended: French or German, Math C and D or 7A-7B; Physics 2A-2B and 3A-3B; and Physiology 1A. Upper division requirements: 24 units in bacteriology and related fields to include Bacteriology 102, 103, Chemistry 101A, 114A, and additional courses in bacteriology. Zoology 128 and 109 are recommended as courses to be included in the major. A minor is not required of students majoring in bacteriology.

A *major in arts and sciences* is offered in bacteriology for the B.S. degree. Courses in the major are in addition to 45 units in general education courses, except that nine units in natural science may be applied toward general education requirements. Lower division requirements: in the major, Bacteriology 1; in related fields, either Biology 3 and 4, or Zoology 1A-1B, or equivalent; Chemistry 1A-1B and Chemistry 5A. Recommended: German or French, Math C and D or 7A-7B; Physics 2A-2B and 3A-3B; and Physiology 1A and 1C. Upper division requirements: 36 units in bacteriology and related fields to include Bacteriology 102, 103, four units of 105, 106, and 107; Zoology 128; and Chemistry 101A, 114A. A minor is not required for the B.S. degree.

A *teaching major* is not offered in bacteriology; however, courses in bacteriology are included in the *major in life science and general science* for the general secondary credential and the *major in general science* for the junior high school credential. For specific information, refer to these credentials.

#### Minor

A *minor in arts and sciences* is offered in *bacteriology*. The minor consists of 15 to 22 units in bacteriology to include Bacteriology 1 or 101, 102, 103, and the remainder of the units to be chosen from Bacteriology 105, 106, 107, and 199. Recommended courses to supplement the minor: Physiology 1A and 1C; Zoology 20; Chemistry 101A, 114A.

A *teaching minor* is not offered in bacteriology; however, bacteriology may be used as part of the *general science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials or as part of the *minor in life science and general science* for the general secondary credential. For specific information, refer to these credentials.

### Lower Division Courses

**1. General Bacteriology** (4) I, II

An introduction to bacteriology. Effects of physical and chemical agencies upon bacteria; biochemical activities of bacteria; microscopic examination and cultivation of bacteria; the bacteria of air, water, soil, milk and dairy products, other foods; industrial applications. Introduction to disease-producing bacteria. Two hours of lecture and six hours of laboratory per week. Prerequisite: Chemistry 1A or 2A. (Chemistry 1A-1B for minor in bacteriology.)

### Upper Division Courses

**101. General Bacteriology** (4) I, II

Lectures and laboratory work of Bacteriology 1 with additional work to be prescribed by the instructor. Prerequisite: Chemistry 1A or 2A. (Chemistry 1A-1B for minor in bacteriology.)

**102. Advanced Bacteriology** (5) I

A survey of the agents of disease and methods of host resistance. Laboratory experience in diagnosis and immunologic techniques. Two lectures and three laboratories per week. Prerequisites: Bacteriology 1 or 101, and Chemistry 101A. Recommended: Biochemistry, physiology.

**103. Serology** (4) II

A survey of the principles and techniques used in serological diagnosis of disease agents. The course is planned for students interested in research or laboratory technology. Two lectures and two laboratories per week. Prerequisites: Bacteriology 1 or 101, Bacteriology 102, and Chemistry 101A. Recommended: Biochemistry, physiology.

**105. Bacterial Metabolism** (2) II

A course to provide a basic knowledge of the principles by which micro-organisms derive energy to support the life processes. Prerequisites: Bacteriology 1 or 101, Chemistry 101A. Recommended: Biochemistry, Bacteriology 102 and 103. This course is offered every third semester.

**106. Immunology** (2) I

A lecture course dealing with the factors underlying virulence in microorganisms, and the mechanisms of bacterial infection. Specific and nonspecific antimicrobial immunity; the antigen-antibody reaction; and consideration of the immunochemistry of protein and nonprotein cell substances. Prerequisites: Bacteriology 102, Chemistry 101A. Recommended: Bacteriology 107, Chemistry 114A. This course is offered every third semester.

**107. Virology** (2) II (Not offered 1953-54)

A survey of viruses and Rickettsias as agents of disease. An introduction to virological techniques, and routes of infection with further consideration of concepts of epidemiology, diagnosis, pathology, and host-responses. Prerequisite: Bacteriology 102, 103, or equivalent.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisites: 15 units of work in the life sciences (including courses in bacteriology) with grades of A or B; and permission of instructor.

### Graduate Courses

**290. Bibliography** (1) I, II

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis or Project** (3) I, II

Guidance in the preparation of a project or thesis for the master's degree.

# BIOLOGY

## IN THE DIVISION OF LIFE SCIENCES

Major or minor work is not offered in biology (see bacteriology, botany, life science, and zoology); however, courses in biology may be used as part of the general science major for the general junior high school credential, or the general science minor for the general elementary, kindergarten-primary, and special secondary credentials, or the life science and general science minor for the general secondary credential.

### Lower Division Courses

**A. Solution and Dosage** (2) I

Arithmetic review with computing of dosage, percentage of solutions, apothecaries weights. Two hours per week.

*** 1. Survey of Biology** (3) I, II

A survey of life science with emphasis on the biology of man in relation to modern life. Three lectures per week. If laboratory credit is wanted by the student, Biology 3 should be taken instead of Biology 1; or Biology 1 may be followed by Biology 4. Not open to students with credit for Biology 3, 4, 10A, 10B, 40, Zoology 1A, 1B, Botany 2A, or 2B.

*** 3. Principles of Biology** (3) I, II

A consideration of basic biological phenomena. Two hours of lecture and three of laboratory each week. Not open to students with credit for Biology 1, 40, 10A, 10B; Botany 1, 2A, 2B; or Zoology 1A, 1B.

*** 4. Plant and Animal Types** (3) I, II

An introduction to the major groups of plants and animals with emphasis on local forms. Two hours of lecture and three of laboratory each week. Not open to students with credit for Biology 10B; Botany 1, 2A, 2B; or Zoology 1A, 1B. Prerequisite: Biology 1 or 3.

# BOTANY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in botany for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Botany 1 or 2A-2B, Chemistry 1A-1B or 2A-2B. Recommended: German, French or Spanish, Zoology 1A-1B, Bacteriology 1, and Geology 1A-1B or 2 and 3. Upper division requirements: A minimum of 24 upper division units, at least 18 units of which must be in botany and six of which may be related courses in bacteriology, chemistry, geology, zoology, selected with the approval of the departmental representative. Nine units in natural science may be applied toward general education requirements. Botany majors are not required to complete a minor.

A *major in arts and sciences* is offered in botany for the B. S. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: in the major, Botany 1 or 2A-2B; in related fields, Chemistry 1A-1B or 2A-2B. Recommended: German, French, or Spanish, Zoology 1A-1B, Bacteriology 1, and Geology 1A-1B or 2 and 3. Upper division requirements: 36 units in botany and approved related fields, to include Botany 102, 107, 114, 150, and 155. Chemistry 101A is strongly recommended. Nine units in natural science may be applied toward general education requirements. A minor is not required.

A *teaching major* is not offered in botany; however, courses in botany are included in the *major in life science and general science* for the general secondary credential and the *major in general science* for the junior high school credential. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in botany. The minor consists of 15 to 22 units in botany, six units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in botany; however, botany may be used as part of the *general science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials or as part of the *minor in life science and general science* for the general secondary credential. For specific information, refer to these credentials.

### Lower Division Courses

**1. Introduction to Botany** (4) I, II

Designed primarily for students who desire a general acquaintance with the fundamentals of botany. Not open to students who have credit for Botany 2A or 2B, but may be used as a prerequisite to upper division courses. Three lectures, and one three-hour laboratory per week.

**2A-2B. General Botany** (4-4) I, II

Year course covering fundamentals of structure, general behavior, morphology and relationship of plants, including an introduction to classification and distribution of seed plants. Two lectures and six hours of laboratory work per week. Botany 2A is a prerequisite for 2B.

**4. California Plants** (2) II

Classification and ecology of representative orders of wild flowers, trees, and chaparral of San Diego region, including practice in the use of keys. One lecture and three hours laboratory per week. Occasional Saturday field trips.

### Upper Division Courses

**102. Mycology** (4) I

A study of the different groups of fungi. Special attention will be given to the parasitic and economic forms, their life history, structure, and classification. Prerequisite: Botany 2B or Botany 1.

**107. Plant Physiology** (4) II

The activities of plants, including food manufacture, absorption, conduction, transpiration, respiration, growth and movement. Two lectures and two laboratory periods per week. Prerequisites: Botany 1 or Botany 2A, and Chemistry 2A-2B or equivalent.

**112. Cultivated Trees and Shrubs** (3) I

Recognition of the common cultivated trees and shrubs of the San Diego region. Trips to local parks and private gardens. One lecture and six hours per week laboratory or field work. Prerequisites: Botany 1, 2A-2B, 4, or equivalent.

**114. Plant Taxonomy** (3) II

Identification, classification and distribution of representative orders of flowering plants. One hour lecture and six hours per week of laboratory and field work. Prerequisites: Botany 1, or 2A-2B, or 4.

**119. Field Botany** (4) Summer

Study of the local native vegetation with emphasis on ecological units within floristic areas. Field trips to be supplemented with laboratory work in herbarium procedure.

**126. Plant Pathology** (3) II

A practical course dealing with the principles of disease in plants, control measures, and quarantine procedures. Emphasis is placed on the determination and control measures of those pathogenic organisms which affect crops, trees and shrubs and nursery stock. Two lectures and one laboratory period per week. Prerequisite: Botany 1 or 2A-2B and 102.

*** 150. Readings in Biology** (2) II

Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles,, ecology, economic zoology, zoogeography, breeding habits and animal behavior. Not open to students with credit for Zoology 150.

**152. Plant Geography** (2) I

Principles of geographic distribution of plants. Two lectures per week. Prerequisite: A college course in botany (Formerly Botany 102).

**153. Economic Biology (2) I**
Study of uses of plants and animals to man and their destructive effects. Consideration also given to general methods of control and conservation. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor. Not open to students who have credit for Zoology 153.

**155. Genetics (3) II**
Principles of plant and animal genetics, with experiments and demonstrations illustrating the mechanisms of heredity. Two hours of lecture and three hours of laboratory per week. Not open to students with credit for Zoology 155. Prerequisites: Biology 3 and 4, Zoology 1A-1B, or Botany 2A-2B.

**158. Conservation of Wildlife (3) II**
A survey of plant and animal resources with emphasis on their conservation and intelligent use. Prerequisite: a college course in biology or consent of the instructor. Not open to students with credit for Zoology 158.

*** 160. Evolution (2) II**
The development of theories of evolution. Two lectures per week. Prerequisite: Biology 1 or equivalent. Not open to students with credit for Zoology 160.

**162. Agricultural Botany (2) I**
A study of California crop plants, their general identification, cultural methods, and regional distribution. Field trips to be arranged. Prerequisite: Botany 1 or Botany 2A-2B.

**166. Honors Course (Credit to be arranged) I, II**
Refer to the Honors Program.

**199. Special Study (1-6) I, II**
Individual study. Six units maximum credit. Prerequisites: 15 units in botany with grades of A or B; and permission of instructor.

### Graduate Courses

**290. Bibliography (1) I, II**
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study (1-6) I, II**
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis or Project (3) I, II**
Guidance in the preparation of a project or thesis for the master's degree.

## BUSINESS CURRICULA

### IN THE DIVISION OF BUSINESS

*Occupational majors* in various fields of *business* are offered for the B.S. degree by the Division of Business, which consists of three departments: Accounting and Business Management; Business Education, Secretarial and Office Management; and Marketing. Each major is in addition to 45 units in general education courses. A minor is not required for the B.S. degree. Students electing to take a minor must select one outside the field of business.

### DEPARTMENT OF ACCOUNTING AND BUSINESS MANAGEMENT

#### Majors

**Accounting:** Lower division: Business 2, 8, 14A-14B, 18A-18B; and Economics 1A-1B (which may be counted toward general education requirements). Upper division: A minimum of 36 upper division units to include Economics 111 or 170 or Business 123; Economics 140; Business 121; and 27 units selected from Business 118A-118B, 133, 160A-160B, 161A-161B, 162, 163, 164A-164B, 165A-165B, 167, and 169.

**Banking and Finance:** Lower division: Business 2, 8, 14A-14B, 18A-18B; and Economics 1A-1B (which may be counted toward general education requirements). Upper division: A minimum of 36 upper division units to include Economics 111 or 170 or Business 123; Economics 140; Business 121; and 27 units selected from Business 105A, 118A-118B, 125, 133, 134, 137, 153, 154, 162, 163; Economics 102, 131, 135, 142, and 190.

**Business Management:** Lower division: Business 2, 8, 14A-14B, 18A-18B; and Economics 1A-1B (which may be counted toward general education requirements). Upper division: A minimum of 36 upper division units to include Economics 111 or 170 or Business 123; Economics 140; Business 121; and 27 units selected from Business 118A-118B, 123, 125, 126, 133, 134, 137, 153, 154, 163, 184; Economics 128, 135, and 150.

**Credit Management:** Lower division: Business 2, 8, 14A-14B, 18A-18B; and Economics 1A-1B (which may be counted toward general education requirements). Upper division: A minimum of 36 upper division units to include Economics 111 or 170 or Business 123; Economics 140; Business 121; and 27 units selected from Business 103A, 123, 133, 134, 137, 162, 163, 186; Economics 105, 131, 135, and 170.

**Insurance:** Lower division: Business 2, 8, 14A-14B, 18A-18B; and Economics 1A-1B (which may be counted toward general education requirements). Upper division: A minimum of 36 upper division units to include Economics 111 or 170 or Business 123; Economics 140; Business 121; and 27 units selected from Business 118A-118B, 125, 126, 127A-127B, 128A-128B or 128C-128D or 128E-128F, 133, 134; Economics 128, 135, and 142.

### Minor

A *minor in arts and sciences* is offered in *business* with specialization in one of the major fields listed above. The minor consists of 15 to 22 units in business courses, six units of which must be in upper division courses selected from one of the major fields listed above. Business 14A-14B must be included in the minor.

## DEPARTMENT OF BUSINESS EDUCATION, SECRETARIAL AND OFFICE MANAGEMENT

### Majors

**General Business:** Lower division: Business 1A-1B, 8, 14A-14B, 18A-18B, plus the requirements in one of the following subfields:

(1) *Accounting:* Nine units selected from Business 2, 21, 24, 25, 27.
(2) *Accounting-Secretarial:* Business 5A-5B, or nine units selected in consultation with the adviser if the student has the equivalent of 5A-5B.
(3) *Merchandising:* Business 24, 25, and 27.
(4) *Secretarial:* Business 5A-5B, or nine units selected in consultation with the adviser if the student has the equivalent of 5A-5B.

Upper division: A minimum of 36 units to include Business 103A, 105A-105B, 108, and 24 units selected from courses in one of the following subfields which corresponds to the lower division preparation:

(1) *Accounting:* Business 121, 160A, 164A, and 15 units selected with the approval of the adviser from the following recommended courses: Business 123, 125, 133, 134, 137, 153, 154, 160B, 161A, 161B, 185; Economics 135, 140, 150, 170.

(2) *Accounting-Secretarial:* Business 121, 160A, 164A, or 113A-113B; and 11-15 units selected with the approval of the adviser from the following recommended courses: Business 123, 125, 134, 153, 154, 160B, 161A, 161B, 164B; Economics 150, 170.

(3) *Merchandising:* Business 121 and seven units selected from Business 185, 186, 187A, 187B, and Art 107; and 14 units selected with the approval of the adviser from the following recommended courses: Business 120, 123, 124, 125, 134, 137, 153, 154, 184; Economics 150, and 170.

(4) *Secretarial:* Business 113A-113B, and 14 units selected from the following recommended courses: Business 120, 121, 123, 125, 134, 153, 154, 164A, 185; Economics 150, and 170.

**Secretarial Management:** Lower division: Business 1A-1B, 5A-5B, 8, 14A-14B, and 18A-18B. Upper division: 39 upper division units consisting of the following courses: Business 103A, 105A-105B, 108, 113A-113B, 125, 134, 153, 164A, 185, and 196.

**Office Management:** Lower division: Business 1A, 2A (or equivalent), 2, 8, 14A-14B, and 18A-18B. Upper division: 42 upper division units consisting of the following courses: Business 103A, 105A-105B, 108, 121, 137, 153, 154, 160A, 161A, 196; Economics 140, 170; and Psychology 121.

### Major for Teaching Credentials

A teaching major in business education is offered for the special secondary and the general secondary credentials. For a statement of requirements, refer to these credentials.

### Minors

A *minor in arts and sciences* is offered in *business* with specialization in one of the major fields listed above. The minor consists of 18 to 22 units to include Business 14A-14B and either Business 1A-1B or Economics 1A-1B; and six or more upper division units selected from courses in one of the major fields listed above.

A *minor in arts and sciences* is offered in *secretarial management*. This minor consists of 23 units. The student must demonstrate competency equal to that required in Business 1A-1B before he can be admitted to the minor program. The minor must include Business 5A-5B, or their equivalent, in the lower division, and 13 units in the upper division to include Business 113A-113B and one of the following: Business 105A, 105B, or 108.

### Minor for Teaching Credentials

A *teaching minor in business education* is offered for the general secondary credential. For a statement of requirements, refer to this credential.

## DEPARTMENT OF MARKETING

### Major

**Marketing:** Lower division: Business 8, 14A-14B, 18A-18B, 24, 25, 27; Economics 1A-1B (which may be counted toward general education requirements); and Business 20 and Art 7 (Business 120 and Art 107 may be substituted if taken in the upper division as part of the major). Upper division: A minimum of 36 upper division units to include Business 121, Economics 140, one of the following courses: Business 123, 153, Economics 111, 170; and 27 units chosen from Business 120, 123, 124, 137, 153, 154, 155, 181, 184, 185, 186, 187A, 187B, 188, 189, 196, 198A, 198B, Home Economics 160A, 160B, Art 107.

An *occupational major in personnel management* is offered by this department. For specific requirements in this major, refer to the section of the catalog on Preprofessional and Occupational Curricula.

### Minor

A *minor in arts and sciences* is offered in *business* with specialization in marketing. The minor consists of 15 to 22 units in business, six units of which must be in courses carrying upper division credit. Students electing business as a minor with specialization in marketing should consult with the adviser in marketing for selection of courses.

## BUSINESS COURSES

### Lower Division Courses

**A. Business Mathematics** (1) I, II

A practical course in the mathematics of business. A thorough study of interest, compound interest, discount, insurance rates, etc.

**1A-1B. Typewriting** (3-3) Year, I, II

Development of a command of a keyboard, acquisition of speed and the artistic arrangement of typewritten material with special reference to commercial forms, tabulation and billing. (1A is a prerequisite for 1B.) Business 1A is not open to students with credit for Business 2A.

**. Mathematics of Finance** (3) I, II
Interest and annuities; amortization; sinking funds; valuation of bonds; depre-
iation; mathematics of building and loan associations. Prerequisites: Two years of
lgebra in high school, or equivalents.

**A. Personal-Use Typewriting** (3) I, II
A short course designed for those not wishing to enter the business office but
esiring a knowledge of or skills in the use of the typewriter. Five hours laboratory
ractice. Not open to students with credit for Business 1A.

**A. Office Machines: Rotary Calculator** (1) I, II
A six-weeks course designed to teach students the operation of the rotary calcu-
ator. Operations basic to statistics, accounting, and other areas needing this skill will
e stressed. Not open to students with credit for Business 105A.

**B. Office Machines: Key-Driven Calculator** (1) I, II
Same as 3A, except the key-driven calculator is substituted for the rotary calcu-
ator. Not open to students with credit for Business 105A.

**C. Office Machines: Printing Calculator** (1) I, II
Same as 3A, except the printing calculator is substituted for the rotary calculator.
ot open to students with credit for Business 105A.

**. Introductory Typewriting** (1) I, II
A short, introductory course building the fundamentals of typing in a six-weeks
eriod. Students enroll for the first six weeks, the second six weeks, or the third six
eeks in a semester. Not open to Business Education or Secretarial majors.

**A-5B. Shorthand** (5-5) Year, I
An intensive course designed for the practical preparation of office secretaries.
thorough study of the Gregg System. Development of the ability to read and write
horthand rapidly and correctly, both literary and commercial. The shorthand speed
ecessary to pass a civil service examination is attained by the end of the year. (5A is
prerequisite for 5B.)

**A-6B. Advanced Shorthand** (3-3) Year, I or II
Development of speed in writing and transcription. Advanced dictation on letter
orms, legal forms, speeches, and literary and technical material. Prerequisite: Busi-
ess 5A-5B or equivalent. (6A is a prerequisite for 6B.)

**. Business Communication** (3) I, II
A course designed to give training in writing as a means of solving modern
usiness problems. Prerequisites: English 1 and Business 2A or its equivalent.

**14A-14B. Principles of Accounting** (3-3) I, II
The balance sheet; profit and loss statement; the opening, conducting, and closing
f books for different kinds of businesses; organizations, reorganizations, dissolutions,
nd consolidations, etc., keeping in view the best modern accounting practice. Five
ours lecture and laboratory. (14A is a prerequisite for 14B.)

**18A-18B. Business Law** (3-3) I, II
The fundamental principles of business law. Cases showing the actual applica-
ion of the principles to business transactions. The subjects covered: Contracts, sales,
gency, negotiable instruments, insurance, and wills. Either semester may be taken first.

**20. Consumer Income Management** (3) I, II
Consumer incomes; bases of consumer choice-making; practical problems of
uying food, clothing, shelter, transportation, insurance, etc.; family budgeting; market
structure and functions seen from the consumer's point of view. Not open to students
with credit for Business 120. A general education course in family life education.

**21. Organization and Management of Small Business** (3) I
Problems confronting the small business man with regard to finance, organization,
management. Reasons for failures and success in small business. Specific study of
various kinds of small businesses.

**24. Retailing (3) I, II**

Study of retail stores, emphasizing the problems of store managers and merchandising executives; store location, organization, personnel, sales promotion, buying and handling of merchandise, inventory, turnover, and control methods. Problems of profitable operation under changing conditions.

**25. Salesmanship (3) I, II**

Theoretical and psychological backgrounds of salesmanship, newer concepts of selling; the selling of ideas and services; steps in a sale: Attention, interest, desire, closing; the development of clienteles and of good will; the personal factor in salesmanship.

**26. Applied Salesmanship (2) II**

Practice in selling; supervised work in cooperating stores, or outside selling; relationships between theory and practice. Prerequisite: Business 25 and permission of instructor.

**27. Advertising Principles (3) I, II**

Advertising as a sales promotional tool in marketing activities; consumer, market and product analysis; advertising media; preparation of advertisements; measurement of advertising effectiveness; economic and legal aspects of advertising; public relations; advertising campaigns.

**65A-65B. Record Keeping. (1-3 each semester) Year, II**

Application of accounting practice and principles to accounting practice; the technical arrangement of accounting forms, records and reports found in business. Prerequisite: Business 14A. Business 65A is a prerequisite for 65B.

## Upper Division Courses

**103A. Office Management (3) I, II**

A study of the functions of the office, duties of the office manager, organization of the office, communication functions, physical facilities involved, personnel relationships of management and worker, and the controls necessary for efficient output.

**105A. Office Systems (3) I, II**

A course designed to develop fundamental skills in the instructional figuring and bookkeeping machines used in offices, together with their interrelating functions as these affect office systems. Not open to students with credit for Business 3A or 3B or 3C.

**105B. Office Systems (3) I, II**

The relationship of voice-writing, addressing, and duplicating machines to office procedures and routines is studied and skills developed in these areas of use.

**105C. Office Systems: Accounting Machines (1) I, II**

An introduction to the use of machines in accounting systems, their operation, potentialities, and limitations. Designed primarily to acquaint accounting majors with the operational aspects of accounting machines.

**108. Records Management (3) I, II**

Intensive survey of the various means of preparing, keeping, storing, and disposing of office records to facilitate the efficient management of business. Various systems of records management will be studied together with the equipment and supplies required.

**113A-113B. Secretarial Office Practice (5-5) Year, I**

Practice in the duties and routines of office work as required of the stenographer and secretary with special emphasis on the shorthand dictation and transcription problems arising in various types of offices. Prerequisite: Business 1A-1B, 5A-5B, or their equivalent.

**118A-118B. Advanced Business Law (3-3) Year, I, II**

An advanced study of the law of personal and real property, partnership, corporation and the laws regulating trade and trade practices and competition. Elective for business majors.

**120. Consumer Income Management** (3) I, II

Functions and responsibilities of consumers; problems of choice-making; planning expenditures for housing, household operation, insurance and investments. Economics of installment buying, borrowing procedures, control of frauds, legislation affecting consumers. Not open to students with credit for Business 20.

**121. Business Management** (3) I, II

Problems of business management as an interrelated whole. A discussion of the problems of the business manager with particular reference to the character of the problems involved and to the control policies and devices of the manager. Prerequisite: Economics 1A-1B and senior standing or consent of instructor.

**123. Marketing Principles** (3) I, II

Study of marketing functions; activities of producers, wholesalers, retailers and other middlemen; channels of distribution; integration of marketing activities; price policies; government regulation. Prerequisite: Economics 1A-1B.

**124. Marketing Administration** (3) II

An advanced course dealing with practical aspects of marketing. Solutions of problems faced by producers, wholesalers, retailers and other middlemen in the marketing of their products. Prerequisite: Business 123.

**125. General Insurance** (3) I

Economic theory of risk; transfer of risk; distribution and prevention of loss; types of insurance carriers; problems of rate making; the insurance contract; coverages; special forms of life, fire, marine and casualty insurance; state supervision.

**126. Casualty Insurance** (3) II

The nature and reasons for existing practices in compensation and casualty insurance. The social and legal bases of insurance, fundamental principles of rate making, policy provisions, state regulation and state insurance. Prerequisite: Business 125.

**127A. Life Insurance—Principles and Practice** (3) I

Types of life insurance companies and associations, home office and agency organization, types of contracts, surrender value, policy loans and extended insurance, surplus and dividend policies, reserves, group, industrial and social insurance, and state supervision.

**127B. Life Insurance Salesmanship** (3) II

Special problems of life insurance selling, with emphasis on the psychological aspects of insurance selling, on specific techniques for finding prospects, for managing the sales interview. For students interested in life insurance selling, and those planning to obtain life underwriter's certification.

**128A-128B. Advanced Life Insurance** (3-3) Year, I

An advanced course in life insurance. The emphasis is on preparation for the C. L. U. Certificate. 128A is a prerequisite for 128B.

**128C-128D. Advanced Life Insurance** (3-3) I

Prepares the student for Part D of the Chartered Life Underwriters examination showing how life insurance strengthens banking credit, financial structure of corporations, and partnerships; also, life insurance as an investment. Business 128C is a prerequisite for Business 128D.

**128E-128F. Advanced Life Insurance** (3-3) Year, I

Prepares for part of the Chartered Life Underwriters examination. Covers the four sections, "Life Insurance Fundamentals," "General Education," "Law, Trust and Taxes," and "Finance"; teaches proficiency in the analysis of cases or problems. Business 128E is a prerequisite for Business 128F.

**133. Corporation Finance** (3) I

The corporate form of organization, instruments of long-time finance, methods of raising capital, efficient financial management, the financing of reorganizations, and governmental control. Not open to students who have credit for Economics 133.

**134. Investments** (3) I, II

Investment principles and practices with emphasis upon problems of the sma investor, such as tests of a good investment, sources of information, types of stocks an bonds, mechanics of purchase and sale, investment trusts, real estate mortgages, an the like.

**137. Credits and Collections** (3) I, II

The credit man and his work, including the instruments with which he work sources of credit information, the technique of his department, collection method legislation for the protection of debtor and creditor, and credit insurance.

**153. Personnel Management** (4) I, II

Problems in the management of personnel relations, including techniques o selecting, training, supervising and rating employees. Methods used by managemen in job evaluation; wage and salary payment plans; employee services; health an safety; union relationships; stimulation of interest.

**154. Wage and Salary Administration** (3) I

Problems of job analysis; major techniques of job evaluation, including ranking classification, point system, factor comparison; problems of wage and salary administration, incentive pay methods; merit rating plans. Not open to students with credi for Political Science 146.

**155. Supervisory Staff and Employee Training** (3) II

Training as a management function and as an aspect of communication; operating methods and structure of training departments; types of training; use of community facilities; evaluation of training results. Projects designed to meet specia student needs. Not open to students with credit for Political Science 181.

**160A-160B. Advanced Accounting** (3-3) Year, I

An intensive study of the corporation, its accounting and financial problems; a thorough study of the balance sheet; depreciation; factory accounting, etc. Prerequisite: Business 14A-14B. (160A is a prerequisite for 160B.) Required of accounting majors.

**161A-161B. Cost Accounting** (3-3) Year, I

Principles and methods of cost accounting in the mercantile establishment and in the factory. A study of industrial accounting procedure, the forms used, and their application to practical problems. Prerequisites: 14A-14B; 161A is a prerequisite for 161B.

**162. Accounting Systems** (3) II

The accounting systems used in various types of business and financial concerns. Some practice in devising and installing systems. Prerequisite: Business 14A, 14B, 105C. Business 105C may be taken concurrently.

**163. Financial Statements** (3) II

The construction, composition, analysis and interpretation of accounting reports with particular emphasis on the form, content and phraseology of reports. Prerequisite: Business 160A-160B.

**164A-164B. Income Tax Procedure** (3-3) Year, I

A study of the laws and a consideration of the problems arising from state and federal income, inheritance and corporation tax. 164A is a prerequisite for 164B. Senior standing or consent of instructor is required.

**165A-165B. Auditing** (3-3) Year, I

The fundamental principles of accepted procedures of auditing and related types of accounting engagements. 165A is a prerequisite for 165B. Prerequisite: Business 160A-160B.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**167. Governmental Accounting** (3) I

A comparative study of accounting systems used by municipalities, counties, and the State of California; detailed comparisons with commercial practice; procedures in handling budget accounts, appropriations, and encumbrances; subsidiary records; cost records; internal checks; auditing. Prerequisite: 160A-160B or consent of the instructor.

**169. C. P. A. Review (3) II**
An intensive review of the accounting principles and procedures covered in the ccounting theory and accounting practice sections of the uniform C. P. A. examinaion prepared by the American Institute of Accountants. Prerequisite: Business 60A-160B, 161A-161B, 164A-164B, 165A-165B, 167.

**80. Public Relations (3) I**
Principles, methods, and objectives in the field of public relations; evaluation of he "publics" of institutions and industry; case studies of public relations problems. 'rerequisites: Journalism 51A-51B, or permission of the instructor. Not open to stuents with credit for Journalism 180.

**81. Radio Sales and Advertising (3) I, II**
A study of advertising trends in radio advertising; time buying, audience survey, nd program types in relation to products to be advertised via radio broadcasting. ncludes publicity and promotion of radio programming organization of a radio station; elationship between the business and entertainment factors of radio broadcasting. 'rerequisite: Consent of the instructor. Not open for credit to students with credit n Speech Arts 181.

**84. Sales Management (3) I**
Consideration of problems confronting the modern sales executive; selection, raining, compensation and control of the sales force; sales analysis; sales quotas; ales costs and budgets; market and product research and analysis; coordination of ersonal selling with other form of sales effort.

**85. Advertising Copy and Layout (2) II**
Introduction to principles and techniques of copy writing; types of copy; reparation of layouts; mechanical methods employed by the artist, engraver and rinter; legislation and regulations affecting advertising claims. Prerequisite: Business 27, or permission of instructor. Not open to students with credit for Journalm 185.

**86. Store Management (2) I**
Retail locations, buildings, layouts and fixtures; store supplies and maintenance; eceiving, marking, storing, wrapping and delivering merchandise; customer service, djustments, credit and collections; expense control. Prerequisite: Business 24, or ermission of instructor.

**87. Buying and Merchandising Methods (3) II**
Buying for retail stores; customer demand; merchandise resources; trading chniques; terms and discounts; dollar and unit controls; pricing, turnover, and inntory control; merchandising budgets. Prerequisites: Business 24 or permission of structor. (Formerly 187A-187B. Not open to students with credit in either of these urses.)

**88. Advertising Media (2) I**
A thorough coverage of advertising media. Market characteristics; rates and urces of information; evaluation of media; problems of coverage, duplication, costs d scheduling; advertising salesmanship. Prerequisite: Business 27, or permission instructor.

**89. Advertising Problems (3) I**
Principles of advertising applied to the solution of actual advertising problems countered by business firms. Estimating opportunities for effective use; promotional mpaigns; selection of media, retail advertising, national advertising, advertising encies; advertising services of publishers. Prerequisite: Business 27, or permission instructor.

**0. Objectives and Curricula in Business Education (3) II**
A study of the objectives of business education and a detailed analysis of the ctors involved in the construction of a business curriculum.

**6. Work Experience (2) I, II**
Supervised work in cooperating stores or offices; relationship between theory d practice in specific business conditions. Prerequisite: Permission of instructor.

**198A-198B. Investigation and Report** (1 to 3 each semester) I, II
A comprehensive and an original study of a problem connected with busine under the direction of one or more members of the business staff. Prerequisite: Senio standing and permission of the instructor. 198A is a prerequisite for 198B.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission instructor.

### Graduate Courses

**200. Readings in Current Literature in Business Education** (2) I
Specialized reading in one or more phases of business education, followed by discussion and written report of the value of each article read.

**203. Office Management** (2)
An intensive study of the problems of office management and their solution. Th relation of records, reports, budgets and manuals to managerial control. Prerequisites Business 14A-14B, 103A.

**213. Problems in Business Education** (2) II
Designed to fit the needs of individual students and their problems through th writing of research papers, of a term or individual study nature. The studies to be mad will cover the principles of good teaching, trends in Business Education, curren literature.

**221. Basic Business Education** (2)
An introduction to the content and methodology of teaching basic Business Edu cation.

**223. Problems of Distributive Business** (2)
Critical analysis of distributive business problems in the light of changing ec nomic, social and governmental conditions. Prerequisite: Business 121, 123.

**233. Administration and Supervision of Business Education** (2) I
Designed to provide students who hold, or who expect to hold, administrative pos tions in Business Education with the techniques necessary for successful executive worl

**260. Advanced Problem Analysis** (Accounting) (2)
The study of conditions causing various accounting problems with special empha sis upon the theory and practices involved in their solution. Prerequisite: Busines 160A-160B, 161, 165.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliogra phies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff to be arranged with department chairman and instructor.

**299. Thesis or Problem** (3)
Guidance in the preparation of a project or thesis for the master's degree. Stu dents have an option of a comprehensive examination or a thesis or project, wit approval of the graduate office.

## CHEMISTRY

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in chemistry for the A.B. and for the B.S degrees. Courses in the major are in addition to 45 units in general education courses These curricula are outlined below.

A *teaching major in physical science and general science* is offered for the genera secondary school credential and a *teaching major in general science* is offered for th general junior high school credential. For statement of requirements, refer to thes credentials.

### Minor

A *minor in arts and sciences* is offered in chemistry. The minor consists of 15 to units, six units of which must be in courses carrying upper division credit. Chem- try 1A-1B, or its equivalent, must be included in the minor.

A *teaching minor in physical science and general science* is offered for the general condary, special secondary, general elementary, and kindergarten-primary creden- als. For statement of requirements, refer to these credentials.

### Curricula for Chemistry Majors in Arts and Sciences

The curriculum outlined below for the B.S. degree is based upon the recom- endations of the Committee for Professional Training of Chemists of the American emical Society. It qualifies graduates for many types of positions as chemists and ovides the training required by most universities for admission to graduate work in emistry. This department is on the approved list of the American Chemical Society. udents may also arrange a program which leads to the A.B. degree and meet the commendations of the American Chemical Society and the requirements of most iversities for admission to graduate work in chemistry.

The final curriculum outlined below for the A.B. degree is designed for students ho do not intend to become professional chemists, but who desire the major in chem- ry as part of a general education or in preparation for training in a related profes- on. By proper choice of electives, graduates can meet the requirements for admission medical schools. The sequence of courses listed below represents the minimum chnical requirement for an A.B. degree with a major in chemistry. A minor is quired of chemistry majors taking the A. B. degree. A minor is not required for the S. degree.

### Plan for B.S. Degree and Certificate of the American Chemical Society

| | *Units* | |
|---|---|---|
| *rst year* | *1st Sem.* | *2d Sem.* |
| Chemistry 1A-1B | 5 | 5 |
| Physics 4A | – | 4 |
| Mathematics 3A-3B | 3 | 3 |
| Health Education 21 | 2 | – |
| Psychology 1 | – | 3 |
| Biology 1 or 3 | 3 | – |
| English 1 | 3 | – |
| P. E. activity | ½ | ½ |
| | 16½ | 15½ |

| | *Units* | |
|---|---|---|
| *Second year* | *1st Sem.* | *2d Sem.* |
| Chemistry 5A-5B | 4 | 4 |
| Physics 4B-4C | 4 | 4 |
| Mathematics 4A-4B | 3 | 3 |
| †* German 1, 2 | 3 | 3 |
| * Speech Arts 3 | 2 | – |
| * Social Science | – | 3 |
| * P. E. activity | ½ | ½ |
| | 16½ | 17½ |

| *ird year* | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Chemistry 101A-101B | 4 | 4 |
| Chemistry 102A-102B | 1 | 1 |
| Chemistry 110A-110B | 3 | 3 |
| German 8A-8B | 3 | 3 |
| Social Science | 3 | 3 |
| Lit., Phil., and Arts | 3 | – |
| | 17 | 14 |

| *Fourth year* | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Chemistry 111 | – | 3 |
| ‡ Advanced Chemistry | 9 | 8 |
| * Lit., Phil., and Arts | 3 | – |
| Electives | 4 | 4 |
| | 16 | 15 |

* General education courses (nine units of chemistry, physics, and mathematics y be applied toward general education requirements.)

† The B.S. degree may be obtained without the Certificate of the American Chemi- Society by substituting for the German courses, six units of general education rses and six units of electives.

‡ Must include four units lecture and one unit laboratory in chemistry courses re- ring three full year-courses in chemistry as prerequisites. Remainder may include rses in related subjects by approval of department.

## Plan for A.B. Degree and Certificate of the American Chemical Society

| First year | Units<br>1st Sem. | 2d Sem. |
|---|---|---|
| Chemistry 1A-1B | 5 | 5 |
| Physics 4A | – | 4 |
| Mathematics 3A-3B | 3 | 3 |
| * Health Education 21 | 2 | – |
| * Psychology 1 | – | 3 |
| * Biology 1 or 3 | 3 | – |
| * English 1 | 3 | – |
| * P. E. activity | ½ | ½ |
|  | 16½ | 15½ |

| Second year | Units<br>1st Sem. | 2d Sem |
|---|---|---|
| Chemistry 5A-5B | 4 | 4 |
| Physics 4B-4C | 4 | 4 |
| Mathematics 4A-4B | 3 | 3 |

| Chemistry 102A-102B | 1 | 1 |
| Chemistry 110A-110B | 3 | 3 |
| * Social Science | 3 | 3 |
| * Lit., Phil., and Arts | 3 | – |
| * Elective | 3 | – |
| Minor | – | 3 |
|  | 17 | 14 |

| Fourth year | 1st Sem. | 2d Sen |
|---|---|---|
| Chemistry 111 | – | 3 |
| Chemistry electives | 3 | 2 |
| * Social Science | 3 | – |
| Minor | 3 | 3 |
| Electives | 7 | 7 |
|  | 16 | 15 |

---

* General education courses.

† Six units of general education courses may be substituted for the French c German.

### Lower Division Courses

**1A-1B. General Chemistry** (5-5) Year, I, II

General principles of chemistry with emphasis on inorganic materials. Three lectures and six hours of laboratory per week. Qualitative analysis is included in the second semester. Prerequisites: Elementary algebra and plane geometry. Recommended: High school chemistry, physics, and additional mathematics.

***2A-2B. Fundamentals of Chemistry** (3-3) Year, I

A general course including inorganic, organic, and biological chemistry for students not intending to take further work in chemistry. Emphasis is placed on applications of chemistry to everyday life. Two lectures and one laboratory period per week. Not open to students with credit for Chemistry 1A-1B.

**5A. Elementary Quantitative Analysis** (4) I

Theoretical consideration of the principles of gravimetric and volumetric analysis. Practice in standardizing reagents and analyzing samples. Two lectures, and two laboratory periods per week. Prerequisite: Chemistry 1A-1B, and facility in the use of logarithms and slide rule.

**5B. Quantitative Analysis** (4) II

Further work in the theory and practice of volumetric and gravimetric analyses and the study of electro analytical methods. Two lectures and two laboratory periods per week. Prerequisite: Chemistry 5A.

### Upper Division Courses

**101A-101B. Organic Chemistry** (4-4) Year, I

The first semester lecture stresses aliphatic compounds and includes an introduction to aromatic compounds. The second semester stresses the aromatics, continues with more complex aliphatics and introduces mechanisms of organic reactions. Three lectures and three hours of laboratory per week. Prerequisite: Chemistry 1A-1B. (Chemistry 101A-101B and 102A-102B replace the former courses in Chemistry 101, 102, and 103.)

**102A-102B. Organic Chemistry Laboratory** (1-1) Year, I

Synthesis of typical aliphatic and aromatic compounds. Study of the theory and practice of laboratory operations. Three hours of laboratory per week. Must be taken concurrently with 101A-101B.

**105. Advanced Quantitative Analysis** (4) II

Advanced work in the theory and practice of volumetric, gravimetric, and electroanalysis. Prerequisite: Chemistry 5A. Not open to students with credit for Chemistry 5B.

**110A-110B. Physical Chemistry** (3-3) Year, I

Theoretical principles of chemistry with emphasis on mathematical relations. Three lectures per week, problems and reports. Prerequisites: Physics 2A-2B, or equivalent; Math. 4B, or equivalent; Chemistry 5A-5B.

**111. Physical Chemistry Laboratory** (3) II

Physico-chemical apparatus and measurements, with emphasis on technical report writing. Discussion period and three laboratory periods per week. Prerequisite: Chemistry 110B, or concurrent registration with permission of the instructor.

**114A. General Biochemistry** (4) I

The chemistry and metabolism of carbohydrates, fats, and proteins. Three lectures and one laboratory period per week. Prerequisites: Chemistry 5A, 101A-101B or permission of the instructor. Recommended: Biology or zoology.

**114B. Clinical Chemistry** (4) II

Lectures and laboratory work on the chemical composition of blood, urine, and body tissues. One lecture per week and three laboratory periods per week. *Open primarily* to students enrolled in the Laboratory Technician Curriculum. Prerequisite: Chemistry 114A.

**118. Colloid Chemistry** (2) II (Offered alternate years)
The theoretical principles of colloid chemistry and the preparation, propert
and practical applications of colloids. Two lectures per week. Prerequisite: Chemis
101A, 110A and 110B.

**122. Glass Blowing** (1) II
Elementary training in the manipulation of glass. Prerequisite: Chemist
1A-1B. One laboratory period per week.

**127. Advanced Inorganic Chemistry** (3) II (Offered alternate years)
A lecture course dealing with such topics as the physical basis of the perio
system, complex inorganic compounds, and the nature of the chemical bond. Thr
lectures per week. Prerequisite: Three years of chemistry.

**144A-144B. Principles of Chemical Engineering** (3-3) Year, I
(Offered alternate yea
Industrial stoichiometry, flow of fluids, heat transfer, unit processes and ty
of industrial equipment. Three lectures per week, problems and reports. Prerequisit
Credit or registration in Chemistry 110A-110B.

**154. Organic Qualitative Analysis** (3) II
A systematic study of the identification of organic compounds and mixtur
One lecture and two laboratory periods per week. Prerequisite: Chemistry 5B or 1
101B.

**155. Instrumental Methods of Analysis** (3) I
Theory and practice of modern methods of instrumental analysis, including u
of pH meters, colorimeters, spectro-photometers, and other analytical devices. Disc
sions, reports, field trips, special individual projects. One lecture and two laborato
periods per week. Prerequisite: Three year-courses in chemistry.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisites: open only to s
dents who have shown ability to do A or B work in chemistry; permission of instruct

## Graduate Courses

**200. Seminar** (2-2) I, II
An intensive study of some phase of advanced chemistry.

A. Advanced Organic Chemistry
B. Chemical Kinetics
C. Chemical Thermodynamics
D. Molecular Structure
E. Electrochemistry
F. Advanced Biochemistry
G. Spectrographic Analysis
H. Photochemistry
I. History of Chemistry

**290. Bibliography** (1) I, II
Exercise in the use of basic reference books, journals, and specialized bib-
ographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of sta
to be arranged with department chairman and instructor.

**299. Thesis** (3) I, II
Guidance in the preparation of a project or thesis for the master's degree.

# COMPARATIVE LITERATURE

## IN THE DIVISION OF LANGUAGES AND LITERATURE

All reading assigned for classes in Comparative Literature is in English transations, and no knowledge of any foreign language is required.

Major work is not offered in comparative literature; however, courses in this field nay be used as part of the English major in arts and sciences. For specific information, efer to English.

Courses in comparative literature may be used as part of the teaching major in nglish for the general secondary and general junior high school credentials with the pproval of the departmental representative. For specific information, refer to the utlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in comparative literature. The minor conists of 15 to 22 units in comparative literature, nine units of which must be in courses arrying upper division credit.

A *teaching minor* is not offered in comparative literature; however, courses in his field may be used as part of the teaching minor in English for the general secndary, the special secondary, the general elementary, and the kindergarten-primary redentials. For specific information, refer to the outlines of requirements for these redentials.

### Lower Division Courses

**52A-52B. Masterpieces of World Literature** (3-3) Year, I

A chronological survey from Homer to modern times. The first semester stresses he classical epic and tragedy. The second semester, beginning with the Renaissance, tresses prose fiction, the drama, and the essay. Not open to students with credit for nglish 52A-52B.

### Upper Division Courses

**101A. Modern Continental Fiction** (3) II

A survey of leading French, Russian, Scandinavian, Italian, and German novelsts and short story writers, from Tolstoy and his associates to the present day. Not pen to students with credit for English 101A.

**104A-104B. Spanish-American Literature** (3-3) I

For a description of this course, see Spanish 104A-104B, which may be taken for redit in Comparative Literature by doing the required reading in English translation.

**115. The Bible as Literature** (3) I

A study of the narrative, poetry, and prophecy of the King James version of the ible. Readings, reports, lectures, and discussions. Not open to students with credit for nglish 115.

**138. Introduction to Aesthetic Appreciation** (1) I

Major forms of expression and aesthetic experience in art, music and literature, resented by an interdepartmental staff through lectures, demonstration, and panel iscussions. Not open to students with credit for Aesthetics 138.

**140A-140B. Masterpieces of French Literature** (3-3) Year, I

A cultural course designed to be given in introduction to the great French works om the Song of Roland through Cyrano de Bergerac, with emphasis on the 16th, 17th, th and 19th century authors. The contributions to world thinking of Rabelais, Monigne, Moliere, Racine, Descartes, Pascal, Montesquieu, Voltaire, Rousseau, Hugo, alzac, Flaubert, Maupassant, Zola, will be studied through lectures and outside adings.

**142. The Golden Age of German Literature** (3) II

Masterpieces of German literature from the 18th and early 19th centuries. Not en to students with credit for German 142.

**152A-152B. Survey of Drama** (3) Year, I

Study of selected tragedies and comedies from Asiatic, European, English, and merican literature, with emphasis upon the human problems depicted therein and on the timelessness of certain themes, such as those of Electra and Medea. Lectures, scussions, and reports on readings. Not open to students with credit for English 2A-152B.

**159. The Rise of Romanticism in European Literature** (3) II
Continental origins and growth of the romantic movement. Studies in the worl of Rousseau, Goethe, Schiller, Lessing, Chateaubriand, Mme. de Stael, and others.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission instructor.

# ECONOMICS

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *economics* for the A.B. degree. Cours in the major are in addition to 45 units in general education courses. Lower divisio requirements: Economics 1A-1B; Business 14A-14B. Upper division requirements 24 units in economics to include Economics 100A, 100B and 140. Six of the 24 uni may be in related fields, selected with the approval of the departmental adviser. minor is required.

A *teaching major in social sciences* is offered for the general secondary and ge eral junior high school credentials. For a description of these majors, refer to th credentials.

### Minor

A *minor in arts and sciences* is offered in *economics*. The minor consists of 15 t 22 units in economics, nine units of which must be in courses carrying upper divisio credit.

A *teaching minor in economics* is offered for the general secondary school crede tial or as part of the *social science minor* for the special secondary, general elementar and kindergarten-primary credentials. For a statement of requirements, refer to thes credentials.

### Lower Division Courses

*** 1A-1B. Principles of Economics** (3-3) Year, I, II
The basic principles of economics: Business organization and production; mone credit and banking, depression problems; prices, competition, and monopoly; incom distribution; public finance; international trade; economic systems. Aims of course Foundation for further study, business pursuits, and intelligent economic citizenshi Prerequisite: 1A prerequisite for 1B.

### Upper Division Courses

**100A. Intermediate Economic Theory** (3) I
Economic theory with special reference to the theory of the firm and the indu try; value and distribution. Prerequisite: Economics 1A-1B.

**100B. Intermediate Economic Theory** (3) II
Economic theory with special reference to national income analysis and th theory of investment. Prerequisite: Economics 1A-1B.

*** 102. Comparative Economic Systems** (3) II
The economic aspects of laissez-faire and regulated capitalism, cooperative socialism, communism, nazism, fascism. Experience in Russia, Germany, Unite States, Great Britain. Criteria for evaluating economic systems. The individual an government in each system. Planning in a liberal capitalistic society.

**105. Economics of Consumption** (3) I (Not offered in 1952-53)
An analysis of the determination of consumer demands, the relationship of th consumer to the price system, the effects of consumption and saving upon income an employment, the effects of monopoly and advertising upon consumers' welfare.

**110. Economic History of Europe** (3) I
A general survey of economic development from the Middle Ages to the present Particular attention is given to the impact of the Industrial Revolution on nationa economics, especially on England's commerce and industry.

***111. Economic History of the United States** (3) II

A comprehensive survey of American economic development and of national legislation in the field of industry and commerce.

***115. Current Economic Problems** (3) (Summer)

Discussion of present-day economic problems of both domestic and international character.

**127. Agricultural Economics** (3) II

Major problems of finance, markets, conservation, overproduction, economic institutions and governmental policy, in relation to agriculture. Emphasis on regional problems.

**128. Urban Land Economics** (3) I

Real estate in its various aspects: Property rights, transfer of title, valuation, finance, selling, property management, taxation, insurance, city planning, etc., with special emphasis upon problems as they exist in San Diego.

***131. Public Finance** (3) II

Principles and practices of taxation and public expenditures. Economic effects of public spending, debts and taxation. Financing social security and other services. Fiscal policy and prosperity. Relation to inflation and deflation. Special emphasis on social problems involved.

**133. Corporation Finance** (3) I

The corporate form of organization; instruments of long-time finance; methods of raising capital, efficient financial management, financing of reorganizations, and government control. Not open to students with credit for Business 133.

**135. Money and Banking** (3) II

The elements of monetary theory. History and principles of banking with special reference to the banking system of the United States.

**140. Statistical Methods** (3) I, II

Statistical method in the social sciences. Tabular and graphical presentation. Frequency and time series analysis. Index numbers and correlation techniques. Prerequisite: Mathematics A-B, and C, or equivalent. Not open to students with credit for Sociology 103, Psychology 104A, 104B.

**142. Business Cycles** (3) I

Fundamental factors in business cycles are analyzed and cycle theories are examined. Study of current business conditions begins early in the course and develops into practical application of forecasting methods to both business and other data. Prerequisite: Economics 1A-1B.

**150. Labor Problems** (3) I

A study of labor organizations and their policies, wages, strikes, unemployment, social insurance, child labor, labor legislation, plans for industrial peace, and other labor problems.

**151. Labor Legislation and Public Policy** (3) II

Economic aspects of labor problems in terms of governmental action (legislative, administrative and judicial).

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

***170. Government and Business** (3) I, II

General survey of governmental activities affecting business; the state as an entrepreneur and manager; governmental assistance to business; governmental regulation of business in its historical, legal and economic aspects, including recent developments in the United States and abroad; proposed policies.

**171. Transportation** (3) I (Not offered in 1952-53)

The development of railway transportation; railroad financing; rates and rate making; governmental regulation; government operation of railroads during the war; recent development of motor and air transportation. Prerequisite: Economics 1A-1B.

**172. Public Utilities (3) II**

The growth of public utilities in the United States; economics of public utilit rates; valuation; public regulation and its legal basis; public ownership; transport tion problems. Prerequisite: Economics 1A-1B.

**185. Social Insurance (3) I**

Old age pensions, health insurance, unemployment insurance, and Soci Security Act. Strength and weakness of existing systems.

**190. International Economics—Principles (3) I**

National welfare and foreign trade. Principle of comparative costs, comparativ advantages in various nations. Foreign exchange and the balance of payments, financin foreign trade. Regulations over trade and obstructing factors. Techniques of exportin and importing. Doctrines of international trade.

**195. International Economics—Problems (3) II**

Important aspects of international cooperation and conflict in the economi sphere, conditions essential to future cooperation. The quest for foreign markets, ra materials, investment opportunities and population outlets. Commercial policies, inte national economic conferences and organizations. Colonial rivalries and postwa problems.

**198. Investigation and Report (3) I, II**

Designed to stimulate independent study and investigation; to furnish guidanc in the collection, organization, and presentation of factual material; to improve th technique of term reports. For economics majors only.

**199. Special Study (1-6) I, II**

Individual study. Six units maximum credit. Prerequisite: permission o instructor.

### Graduate Courses

**200A-200B. Seminar in the Development of Economic Thought (2-2) Year I, I**

A critical study of the development of economic thought and of contemporar economic thought, in order to provide a clearer understanding of major economi problems of the day.

**290. Bibliography (1)**

Exercises in the use of basic reference books, journals, and specialized bibliog raphies, preparatory to the writing of a master's project or thesis.

**298. Special Study (1-6) I, II**

Individual study. Six units maximum credit. Prerequisite: permission of staff to be arranged with department chairman and instructor.

**299. Thesis (3)**

Guidance in the preparation of a project or thesis for the master's degree.

# EDUCATION

## IN THE DIVISION OF EDUCATION

### Major

A *teaching major in education* is offered for the general elementary and kinder garten-primary credentials. For a statement of requirements, refer to these credential A major in education is not offered in arts and sciences.

### Minor

A *minor in arts and sciences* is offered in *education.* This minor consists of 15 t 22 upper division units in education selected with approval of the chairman of th Department of Education.

A *teaching minor* is not offered in education.

Students will be admitted to education courses only when they are admitted t teacher education or have permission from the chairman of the Department of Educa tion. Experienced teachers may take education courses for which they have the pre requisites. Students who take a minor in education must have been regularly admitte to teacher education. (See Admission to Teacher Education.)

### Lower Division Courses

**Review of Arithmetic** (0) I, II

**Review of Handwriting** (0) I, II

**Review of Reading** (0) I, II

**Review of Spelling** (0) I, II

Noncredit courses designed to increase competence in the skill subjects. For tudents who do not qualify on the respective sections of the Fundamentals Test equired of all applicants to teacher education.

### Upper Division Courses

**00B. Methods and Materials of Instruction and Audio-Visual Aids** Major (2) Minor (2)

Professional courses in specific teaching fields taken just prior to or concurrently ith the first directed teaching assignment. Each course emphasizes the application f best practice with reference to each subject area named.

Subject fields for sections in 100B are as follows:

**ffered in the Fall Semester**

100B-A.—Methods in Art
100B-B.—Methods in Accounting
100B-E.—Methods in English
100B-HE.—Methods in Home Economics
100B-L.—Methods in Romance Language
100B-Ma.—Methods in Mathematics
100B-Me.—Methods in Merchandising
100B-Mu.—Methods in Music
100B-PE.—Methods in Phys. Ed. (Men)
100B-P.Sc.—Methods in Physical Science
100B-S.—Methods in Shorthand
100B-SA.—Methods in Speech Arts
100B-S.Sc.—Methods in Social Science
100B-SS.—Methods in Secretarial Subjects
100B-T.—Methods in Typing

**Offered in the Spring Semester**

100B-E.—Methods in English
100B-H. Ed.—Methods in Health Education
100B-IA.—Methods in Industrial Arts
100B-L.Sc.—Methods in Life Science
100B-PE.—Methods in Phys. Ed. (Women)
100B-S.Sc.—Methods in Social Science

**02A. Measurement and Evaluation in Elementary Education** (3) I, II, Summer

The use of intelligence and achievement tests in the diagnosis and improvement f learning; construction of objective examinations; problems of evaluation in education; the elements of statistical techniques. Should follow 102B for elementary canidates.

**02B. Child Growth and Development** (3) I, II, Summer

Study of the mental, emotional, social, and physical development during childood and early adolescence. Directed observation required. General education course n family life education. Should precede 102A for elementary candidates.

**02C. Growth and Development of the Adolescent** (3) Irregular

Study of adolescent physiological, psychological, social, and emotional development, including principles of mental hygiene and guidance. Field work with adolescent roups in the community is required.

**02D. Measurement and Evaluation in Secondary Education** (2) Irregular

Problems of evaluation in secondary education, construction of examinations, the lements of statistics, the selection and interpretation of standardized measures, and ppraisal of audio-visual instructional materials. Field work required. Prerequisite: ducation 130.

**105A. Introduction to Psychological Testing** (3) I, II
The basic principles of testing. The selection and critical evaluation of grou tests of intelligence, personality, aptitude, interest and achievement. Prerequisite One of the following courses: Psychology 5, 11; Education 102A, 102D. Not open fo credit to students with credit for Psychology 105A.

**E112A. Methods in Teaching Americanization Classes** (2) Extension only
Methods used in teaching the various grade levels found in Americanizatio classes, including those preparing for their naturalization. Includes discussion of ne skills and techniques in learning to speak, read, and write English; aids in organizin and conducting classes; and in helping teachers to understand backgrounds of foreig born.

**115A. History and Philosophy of Education** (2) I, II, Summer
Historical backgrounds and underlying philosophies upon which the public schoc system has been established. Emphasis on the meaning of education, educational aim and values, and democracy and education. Prerequisite: Senior standing or the equiva lent; minimum of 12 units of education.

**115B. Secondary Education** (3) Irregular
An introduction to understanding the development of secondary education and it present status as a social institution. Topics developed include: Curriculum; teachin methods; audio-visual instructional materials; organization and administration; guid ance; and objectives. Field work required.

**116. Directed Teaching** (2-12) I, II
Systematic observation, participation and teaching under supervision in th campus elementary school, the affiliated elementary, junior high and senior high school During each semester of student teaching a weekly conference period is required a indicated in the time schedule. Prerequisite: Admission to teacher education; educa tion program approved by Coordinator of Elementary or Secondary Education. An grade below C is unacceptable for a credential.

**117A. Elementary Music Education** (2) I, II
Objectives of music teaching; study of the child voice; and organization of son material by grades. Procedure in presenting rote songs, ear training, elementary nota tion, music reading, and part singing. Prerequisite: Music 7A, or the equivalent. No open to students who have had Music 7B.

**117B. Methods in Instrumental Music** (2) I or II
The theory of organizing and conducting school bands and orchestras, and th selection of materials. Provides practical experience in conducting a children's orchestr and teaching sectional groups. Systematic planning for pupils of various ages an abilities.

**119. Art in the Elementary School** (2) I, II
Discussion of the elements and principles of art and their place in the art expres sion and appreciation of the elementary school child. Laboratory experience in elemen tary school problems. Not open to students taking the elementary credential. Pre requisite: Art 6A.

**122. Social Studies in Elementary Education** (2) I, II, Summer
The purpose, scope, organization and development of instructional procedures i the social studies in the elementary school. Development of curriculum units and th analysis of teaching materials.

**123. Science in Elementary Education** (3) Irregular
The construction and use of science equipment, the effective use of audio-visua aids, the use of environmental resources, and the use of texts and supplementary mate rials. Relations to social science in the elementary curriculum are also developed.

**125. Curriculum in Elementary Education** (3) Irregular
Emphasis upon the selection and development of content, teaching methods, an materials as they relate to social needs; evaluation procedures; psychological princi ples, and the nature of the learner.

**126. Literature in Elementary Education** (3) Irregular

Criteria for the selection of children's literature, children's reading interests, the development of units of instruction in the social studies, the use of the verse choir, dramatic readings and similar procedures, and the use of the library.

**129. Arithmetic in Elementary Education** (2) I, II, Summer

For teachers of arithmetic in the elementary and junior high school. Emphasis is placed upon the understanding of the systems of notation and language techniques. Opportunity will be given for the development of instructional materials and procedures.

**130. Educational Psychology** (2) I, Summer

To develop understanding of the applications of psychological research for effective classroom teaching. Observation and field work required. Prerequisite: Psychology 1. Not open to students with credit for Psychology 130.

**134. Behavior Problems in Early Childhood** (1) Summer

Lectures and related readings on the typical behavior problems of two to twelve year olds, for teachers and parents.

**136. Reading in Elementary Education** (3) I, II, Summer

Scientifically developed procedures for determining reading readiness, beginning reading, independence in word recognition, vocabularly development, word analysis, standards of attainment, types of reading programs, and the selection, preparation and use of reading materials.

**138. Workshop in Family Life Education** (3) Summer

Series of lectures, discussions, and laboratory sessions devoted to furthering understanding of the problems of family life education. The student will have an opportunity to develop units suitable for a program of family life education. Community agencies will participate in the workshop.

**143. Adult Education** (3) Irregular

Principles and procedures of providing learning experiences for adults; the nature of adult education and the psychology of leadership; evaluation of programs.

**144. Diagnosis and Remedial Treatment of Difficulties in Reading** (3) Summer

The causes of reading difficulties and the procedures for diagnosis and remedial treatment. Practical work with children with reading problems. Primarily for principals, supervisors and teachers-in-service. Prerequisites: Education 102B or Education 102A, and Education 136, or one year of successful teaching experience.

**145A. Organization and Administration of Music Education** (2) II

Administration of an instrumental music program: purchase, care, depreciation of instruments and equipment; developing interest; ethics; schedule-making; operation and maintenance of music library; personnel and equipment records; the achievement point system; the marching band show; rehearsal procedure.

**146. Education Practicum** (Kindergarten-Primary) (4) I, II, Summer

A continuation of Education 148 and will accompany Education 116 in the kindergarten. A study of the theory of early childhood education providing experience with children of nursery school and kindergarten ages. Prerequisite: Education 147, 148.

**146B. Interpretation of Early Childhood Behavior** (3) Irregular in Summers

For kindergarten-primary teachers treating the analysis and interpretation of early childhood behavior. Emphasis on understanding and interpreting the causative factors in typical behavior of children to parents, social workers, teachers, and others concerned with the guidance of kindergarten-primary children.

**147. Education Practicum** (10) I, II

Required of all students who expect to receive a credential which will qualify them to teach in the kindergarten or in the elementary school. Students should take the course during the next semester after admission to teacher education, which is usually the first semester of the junior year. Registration is strictly limited to those who have been approved by the Committee on Admission to Teacher Education.

This Practicum includes both classroom observation and the study of the principles of education. The course includes Reading (2); Social Sciences in the Elementary School (2); Language Arts (2); Arithmetic (2); Observation (1). Audio-Visual-Radio Instruction (1) is integrated with the course.

**148. Education Practicum** (10) I, II

This course is a continuation of Education 147 and is required of all studen who are candidates for the general elementary credential or the kindergarten-primar credential. An extended analysis is made of the psychology of education in variou fields and application is made through directed teaching experiences. The cours includes Elementary Science Education (2) ; Elementary Art Education (2) ; Elemen tary Music Education (2) ; Educational Psychology (learning process and theory audio-visual education) (2) ; Curriculum in Elementary Education (2) ; Educatio 116, Directed Teaching (2). Prerequisite: Education 147.

**149A. Laboratory in Elementary Education** (3) Summer

A general course in observation and theory, including a study of arithmeti reading, language, music, science, social studies, art, spelling. Students in this cours will observe in the summer demonstration school and discuss with the staff th teaching procedures.

**149C. Laboratory in Rural Education** (6) Irregular in Summers.

Observation in a one-room multigraded summer demonstration school. Student will observe demonstrations, discuss procedures with the staff, and prepare materia for their own schools.

**149D. Workshop in Elementary Education** (3 or 6) Summer

To meet the needs of individual or groups of teachers who desire to stud selected problems in elementary education. The observation of classroom teaching wi be provided for members in attendance. Interested persons should correspond with th Coordinator of Elementary Education, San Diego State College.

**154. Reading in Secondary Education** (3) II (Offered in 1952-53 and alternat years, alternating with Education 144

The nature of the reading program, development of techniques and skills, vocabu lary development, reading in the content fields, the differentiated attack, measurement diagnosis, and remediation.

**155. Guidance in Elementary Education** (3) II, Summer

A study of the basic principles of guidance and their function in the educationa process as applied in the elementary school.

**156. Guidance Conference** (1) Summer

A series of lecture and discussion sessions centering on current problems i counseling and guidance. Designed to serve the needs of any person desiring to kee informed of developments in this area. Admission upon permission of the directo of this conference. Course may be taken twice for credit.

**158. Supervision of Child Welfare and Attendance** (3) Summer

Content includes laws relating to children, guidance principles, social case work agency relationships, conference techniques, home visitation methods, employmen supervision, attendance work, child accounting, familiarity with testing techniques

**161. Legal Aspects of Education** (3) Irregular

A study of the school law of California, important court decisions, rulings of th California State Superintendent of Public Instruction and the Attorney General historical and current trends, and comparative data from throughout the Unite States.

**166. Honors Course** (Credit to be arranged) I, II Refer to the Honors Program

**171. Audio-Visual Conference** (1) Summer

A series of lectures, discussions and demonstrations, centering on problems i the use of audio-visual instructional materials. Designed for teachers, administrators audio-visual representatives, and others interested in current developments in thi area. Course may be taken twice for credit.

**174. Audio-Visual-Radio Education** (3) I, II, Summer

A study of audio-visual-radio aids as they affect learning. Analysis and develop ment of materials of instruction and their presentation ; operation of equipment.

**174BE. Audio-Visual Business Education** (3) Summer

A review of the skills and knowledges necessary to use audio-visual aids, followed by intensive study and research in the literature available and by practice with the materials and techniques that apply to business education.

**175. Creating Audio-Visual Materials for Classroom Use** (3) Irregular

Practice in the creation and evaluation of instructional materials, such as 35 mm. film strips, 16 mm. films, scripts, recordings and other audio-visual materials. Prerequisite: Education 174, or equivalent.

**176. Problems of Speech Correction and Articulation** (3) II

Analysis and discussion of the major articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Not open to students with credit for Speech Arts 176.

**177. The Teaching of Lip Reading** (2) Summer

History, theory and methods of lip reading. Aids for the classroom teacher; program and materials of instruction for the specialized teacher. Opportunities for practice teaching are offered. Not open to students with credit for Speech Arts 177.

**178. Problems of the Hard of Hearing** (3) Summer

The adjustment of the hard-of-hearing group with emphasis on the public school child. State and county hearing programs; audiometric techniques with practice; educational, classroom, and social problems. Meets audiometric certification requirement.

**179A-179B. Nervous Speech Disorders** (3-3) Year, I

Classification and study of speech defects and disorders. Training in corrective technique for public schools; observation. Required for the Special Secondary Credential in Correction of Speech Defects. Not open to students with credit for Speech Arts 179A-179B.

**181. Exceptional Children** (3) I or II

Characteristics and adjustment problems of mental, physical, and emotional deviates; emphasis upon the mentally handicapped.

**182. Curriculum and Methods for Mentally Retarded Children** (3) II or Summer

Selection, organization and presentation of curricular materials for mentally retarded children.

**183. Practicum for Teaching Mentally Retarded Children** (3) Summer

Analysis and interpretation of educational procedures utilized with the retarded learner. A demonstration class will be available for observation. Education 182 must be taken prior to, or concurrently with, Education 183.

**184A. The Secondary School** (4) I, II

To orient the student toward his function as a teacher in the public secondary schools, including basic principles, history and philosophy of education, elementary and audio-visual instruction, and to understand the school as a social institution. Field work required.

Orientation toward understanding teaching as a profession, and the public school as a social institution. Emphasizes history, aims, scope, function, outcomes, and principles of American elementary and secondary education. Field work, including audio-visual experiences, required.

**184B. Development and Learning** (4) I, II

To acquaint the student in secondary education with the nature of development and the learning process, with consideration of mental hygiene, guidance and the place of audio-visual aids. Field work required. Prerequisite: Education 184A.

**184C. The Teaching Process** (4) I, II

To develop teacher competency at the secondary level in professional and community relationships, and in planning teaching, and evaluating learning activities (with emphasis on the use of audio-visual resources and the development of class morale). Field work required. Prerequisite: Education 184B and consent of the instructor.

**185. Workshop for Teaching the Mentally Retarded** (3-6) Irregular
Curriculum and methods of teaching, integrated with a demonstration class. Particular emphasis on the arts and crafts program. Opportunities will be provided for teachers to develop materials of instruction. To meet California credential requirements in the areas described. Not open to students with credit in both Education 182 and 193.

**186. Vision Testing and Hygiene** (2) Irregular
Measurement of visual acuity including an analysis of vision tests, hygiene and physiology of the eye, conservation of sight, and classroom adaptation for the visually handicapped.

**187A-187B-187C. Child Study Laboratory** (2-2-2) I, II
Development of background and procedures for child study and their application to field situations. Field work required. For teachers in service. 187A is prerequisite for 187B, and 187B is prerequisite for 187C.

**188. Techniques of Pupil Appraisal** (3) I, II or Summer
A study of, and practice in, techniques of collecting, assembling, and interpreting data about individual pupils for guidance purposes. Field work required. Prerequisite: Education 102D or 102A, or consent of instructor. Not open to students who have credit for Psychology 105A or Education 105A.

**189. Workshop in Secondary Education** (3 or 6) Summer
Designed to meet the needs of individuals or groups of teachers who wish to develop or continue the study of some problem with the consultation of the College Staff and the San Diego County Curriculum Staff.

**191. Driver Education** (2) Summer
A workshop type course designed to prepare teachers of the course in high school. Enrollment by permission of the instructor.

**199. Special Study** (1-6) I, II, and Summer
Individual study. Six units maximum credit. Prerequisites: open only to senior and graduate students in education who have shown ability to work independently; permission of instructor.

### Graduate Courses

For general requirements for admission to graduate courses, see statement on Admission to Graduate Status in section on Admission and Registration. In addition to these general requirements, 12 units of professional education are prerequisite for enrollment in all graduate courses.

**205. History of Education** (3) Summer
Advanced study of the history of education with emphasis on educational practices as related to present day problems. Prerequisite: Education 115A or equivalent.

**206. Philosophy of Education** (3) Summer
Advanced study of philosophical backgrounds of educational thought; a study of comparative philosophies, and an analysis of selected current trends and problems. Prerequisite: Education 115A or equivalent.

**207. Educational Sociology** (3) Summer
A study of the social, economic, political and moral setting in which present day American education functions. Prerequisite: Education 115A, or equivalent, teaching experience.

**220. Advanced Educational Psychology** (3) I, II, Summer
Advanced study of the research and its application to learning and human growth. Prerequisite: Educational Psych. 130, or equivalent, teaching experience.

**230. Guidance Problems in Secondary Education** (3) I, II, Summer
Individual and group study of the theory and practice of guidance with emphasis upon practical problems of the members of the class.

**232. Problems in Vocational Guidance** (3) Summer
To prepare teachers for vocational guidance in the secondary schools. Includes occupational information, vocational aptitude measurement, and educational guidance. Prerequisite: Education 230, or equivalent.

233. **Guidance Counseling Techniques** (3) I, II
Designed for school counselors. To stress the understandings and procedures necessary for effective interviewing. Prerequisite: Education 230, or equivalent. Not open to students with credit for Psychology 233.

237. **Research in Guidance Problems** (1-3) Summer
Individual study by graduate students who have demonstrated exceptional ability and a need for such work. Admission by permission of the Coordinator of Secondary Education and instructor.

238. **Field Work in School Guidance** (3) II
Application of the principles and procedures in testing, counseling, and related personnel work in the public schools. Weekly seminar sessions with college and cooperating staff. Prerequisite: Permission of instructor and 12 units in guidance and related areas.

239. **Workshop in Pupil Personnel Services** (3) Summer
Application of principles and procedures to specific situations for improvement of pupil personnel services. Individual problems emphasized. Prerequisite: Teaching experience and permission of director of workshop.

240. **Curriculum Construction and Evaluation in Elementary Education** (3) I, Summer
Advanced study of the research in curriculum development, construction, and evaluation. Prerequisites: 12 units of work in elementary education and consent of the instructor.

241. **Problems in the Teaching of Arithmetic** (3) Summer
A study of research and practice in the methods of teaching and in the curriculum of elementary and junior high school arithmetic. Prerequisite: Education 129 or equivalent.

242. **Problems in the Teaching of Reading** (3) Summer
Advanced study of trends in reading instructions. Topics include developmental sequences in reading skills and abilities, reading in the content fields, individual differences, and interests. Students will develop individual projects or problems. Prerequisites: Education 136 and 144 or equivalents.

243. **Seminar in Social Studies in Elementary Education** (3) Irregular
Advanced study of problems in teaching social studies in the elementary school with emphasis on the study of the scientific research in the field. Prerequisite: Permission of instructor.

244. **Seminar in Language Arts in Elementary Education** (3) Irregular
Advanced study of problems in teaching language arts in the elementary school, including spelling, literature and written and oral communication. Emphasis will be on the study of scientific research in the field. Prerequisite: Permission of instructor.

245. **Seminar in Elementary Education** (3) Irregular
A study of the methodology of research with particular reference to the basic research in the psychology and teaching of the elementary school subjects. Prerequisite: 12 units in elementary education and permission of the instructor.

250. **Curricular Problems in Secondary Education** (3) I, II, Summer
Present status and development of the secondary school curriculum with emphasis upon curriculum construction and evaluation. Opportunities provided for study of problems submitted by students. Prerequisite: 12 units in secondary education and consent of the instructor.

252. **General Education in the Secondary School** (3) Summer
A course designed for teachers in service. A study of the function and implementation of general education in the secondary school. Prerequisite: 12 units in secondary education and permission of the instructor.

254. **Advanced Problems in Secondary School Instruction** (3) II, Summer
An analysis of the scientific research and philosophical principles in secondary school instruction. Prerequisite: Teaching experience and permission of instructor.

**256. Recent Trends in Secondary Curriculum** (3) Irregular

Current practices and trends in secondary schools. Extensive individual work on related problems of interest to members of the class. Prerequisite: 12 units in secondary education and permission of the instructor.

**257. Workshop in Intercultural Education** (4) Summer

A cooperative workshop sponsored by the college and the San Diego City Schools to study trends in intercultural education in American schools, including units, curricular and instructional materials and techniques. Enrollment only by application to the Chairman of the Division of Education.

**258. Research in Curricular Problems** (1-3) Irregular

Individual study by graduate students who have demonstrated exceptional ability and a need for such work. Admission by permission of the Coordinator of Secondary Education and instructor.

**260. Federal, State, County and City School Organization and Administration** (3) I, Summer

A study of federal, state, county and city school organization and administration including the inter-relationships of the four levels. Prerequisite: Possession of a valid teaching credential.

**262. The Organization and Administration of Elementary Schools** (3) I, Summer

A study of the problems of personnel, local finance, curriculum, school plant and community relations of elementary schools. Field project required. Prerequisites: Valid General Elementary Credential, teaching experience, Education 155, 240, 260, and 270 and admission to program of Administrative Studies.

**263. The Organization and Administration of Secondary Schools** (3) I, Summer

A study of the problems of personnel, local finance, curriculum, school plant, transportation and community relations of secondary schools. Field project required. Prerequisites: Possession of a valid General Secondary Credential, teaching experience, Education 230, 250, 260 and 270 and admission to program of Administrative Studies.

**264. Elementary School Supervision** (3) II, Summer

Principles and practices of supervision and methods of evaluating instruction and the curriculum in elementary education. Field project required. Prerequisites: General Elementary Credential, teaching experience, Education 155, 240, 260 and 270 and admission to program of Administrative Studies.

**265. Secondary School Supervision** (3) II, Summer

Principles and practices of supervision, curriculum and teaching methods in secondary education. Field project required. Prerequisites: General Secondary Credential, teaching experience, Education 230, 250, 260 and 270 and admission to program of Administrative Studies.

**266. Field Work in Elementary School Administration and Supervision** (2) II

Study of the administration and supervision of an elementary school with the cooperation of a local school administrator and under the supervision of a college staff member. Field projects required. Prerequisite: Admission to the program of Administrative Studies, completion concurrently of all other requirements for the Elementary Administration or Supervision Credential, permission of local school administrator and instructor.

**267. Field Work in Secondary School Administration and Supervision** (2) II

Study of the administration and supervision of a secondary school with the cooperation of a local school administrator and under the supervision of a college staff member. Field projects required. Prerequisites: Admission to the program of Administrative Studies, completion concurrently of all other requirements for the Secondary Administration or Supervision Credential, and permission of local school administrator and instructor.

**268. Seminar in School Administration** (3) Summer
An intensive study of research on selected problems in the field of school administration. Provision will be made for individual work on special topics of interest to students. Prerequisites: Permission of instructor.

**270. School Finance, Business Administration, and Law** (3) II, Summer
A study of public school finance at federal, state and local levels; an analysis of the business administration of schools and a study of school law as it applies to finance, administration and other aspects of school administration. Prerequisites: Possession of a valid teaching credential or permission of instructor.

**271. Supervision of Student Teaching** (2) II
Study of selection, orientation, induction, counseling and evaluation of credential candidates and student teachers; and helping student teachers plan lessons, conduct classroom learning, analyze pupils' difficulties and achievement. Open to experienced teachers interested in the teacher education program.

**274A. Utilizing Audio-Visual Materials in the Classroom** (3) I, Summer
A critical analysis of research evaluating the use of visual, auditory, and other sensory materials in education. Prerequisite: Education 174, or equivalent.

**275. Administering the Use of Audio-Visual Materials** (3) II, Summer
Organizing, supervising, and coordinating audio-visual centers as an integral part of educational systems. Prerequisite: Education 174, or by permission of the instructor.

**278. Educational Leadership** (3) I, Summer
An analysis of the factors and practice in procedures of group and individual leadership in four areas: (a) the community; (b) the teaching staff; (c) the student personnel; (d) the professional field of educational administration and supervision. Prerequisite: Valid teaching credential or permission of instructor.

**290. Procedures of Investigation and Report** (2-3) I, II, Summer
Emphasizes procedures in selecting and writing a project or thesis. Methods of investigation and reporting data. Extensive survey of an area of professional literature to analyze techniques and style. Separate sections for elementary and secondary levels.

**298. Special Study** (1-6) I, II, Summer
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3) I, II, Summer
Guidance in the preparation of a project or thesis for the master's degree.

**316A. Directed Teaching** (3-3) I, II
Systematic observation, participation, and teaching under supervision in an affiliated school. Thirty clock hours of student teaching will usually earn one unit of credit, but the credit finally allowed will depend upon the nature and quality of the teaching done. Any work below a grade of C is unacceptable for a credential. Prerequisites required.

No student can enroll in this course until he has completed Education 184A and 184B, enrolled in Education 100B, and has been admitted to candidacy for the teaching credential.

During the semesters in which the student takes his assignments in student teaching, he must meet with the college supervisor one hour each week for conference and discussion of problems encountered in his teaching.

Students who have had student teaching in preparation for the junior high school or special secondary credential should confer with their departmental and educational advisers concerning partial fulfillment of this requirement as the result of having completed the student teaching required for the credentials mentioned above.

**316B. Directed Internship** (2-6) I, II
Extensive daily participation or teaching in public schools in preparation for a second credential when Directed Teaching has been taken for a prerequisite credential. Application should be made during the preceding semester. Preregistration required.

# ENGINEERING

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in *engineering* for the B.S. degree. Courses in the major are in addition to 45 units of general education courses. Nine units of chemistry, physics, and mathematics may be applied toward general education requirements. Lower division requirements for all engineering students are tabulated under Engineering Curricula below. Upper division requirements: A minimum of 36 upper division units. Specific requirements for the general engineering program and for the programs providing limited specialization are listed under Engineering Curricula below. A minor is not required of engineering majors.

A *teaching major* is not offered in engineering.

### Minor

A *minor in arts and sciences* is offered in engineering. The minor consists of 15 to 22 units in engineering, nine units of which must be in courses carrying upper division credit. The courses should follow a logical sequence approved by the departmental representative.

A *teaching minor* is not offered in engineering.

## ENGINEERING CURRICULA

The curricula below specify the requirements for the general engineering program and for the indicated options. They include recommended electives to fulfill the requirements of general education. General education courses are prefixed with an asterisk (*).

### Lower Division Requirements for all Engineering Students

---

* General education courses. (Nine additional units in chemistry, physics, and mathematics may be applied toward general education requirements.)

### Upper Division Requirements for Curriculum in General Engineering

| Junior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Engr. 100A-100B | 3 | 3 |
| Engr. 101A-101B | 2 | 2 |
| Engr. 102A-102B | 3 | 3 |
| Engr. 140 | – | 3 |
| Engr. 141 | – | 2 |
| * Health Educ. 21 | 2 | – |
| * Ind. Arts 5 | 3 | – |
| Math. 118A | 3 | – |
| * Soc. Sci. elective | – | 3 |
|  | 16 | 16 |

| Senior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Engr. 127, 105 | 3 | 3 |
| Engr. 129, 106 | 2 | 2 |
| Engr. 199, 198 | 2 | 2 |
| Engr. 180 | – | 3 |
| * Econ. 170 | 3 | – |
| * Lit. or Phil. | 3 | – |
| † Electives | 3 | 6 |
|  | 16 | 16 |

* General education courses. (Nine additional units in chemistry, physics, and mathematics may be applied toward general education requirements.)

† Electives to include two additional upper division engineering courses and one additional course in industrial arts. Courses to be approved by the Department of Engineering.

### Upper Division Requirements for Curricula Providing Limited Specialization

| Junior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Engr. 100A-100B | 3 | 3 |
| Engr. 102A-102B | 3 | 3 |
| Engr. 127, 140 | 3 | 3 |
| * Health Educ. 21 | 2 | – |
| * Ind. Arts 5 | 3 | – |
| ‡ * Soc. Sci. elective | – | 3 |
|  | 14 | 9–12 |

| Senior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| † * Literature or Philosophy | – | 3 |
| * Econ. 170 | 3 | – |
| Engr. 105 | – | 3 |
| Engr. 198 | – | 2 |
| Engr. 180 | – | 3 |
|  | 3 | 8–11 |

* General education courses. (Nine additional units in chemistry, physics, and mathematics may be applied toward general education requirements.)

‡ Chemical engineers take social science elective in first semester of senior year. All students should remove U. S. history-Constitution and California State and Local Government requirements by examination or by taking appropriate social science courses.

† * Electronics engineers take literature or philosophy first semester of sophomore year.

*Additional Requirements for Various Fields of Limited Specialization*

**Aeronautical Engineering:** Engineering 101A-101B, 106, 122, 129, 141, 142, 156; Mathematics 118A.

**Chemical Engineering:** Engineering 106, 129, 141; Chemistry 101B, 110A-110B, 144A-144B; Mathematics 118A; * Social Science elective.

**Civil Engineering:** Engineering 106, 130, 135, 141, 142; Mathematics 118A; Astronomy 113.

**Electrical Engineering:** Engineering 101A-101B, 129, 141; Mathematics 118A; Physics 102, 107.

**Electronics Engineering:** Engineering 101A-101B, 104, 124, 150; Physics 102, 107, 122, 152; Mathematics 118A.

**Engineering Economics:** Engineering elective, one course from Engineering 101A, 101B, 106, 129, or 141; Economics 133, 140, 150; Business 18A, 121.

**Mechanical Engineering:** Engineering 101A-101B, 106, 122, 128, 129, 141, 145; Mathematics 118A.

## Lower Division Courses

**1A-1B. Plane Surveying** (3-3) Year, I

Two lectures and one three-hour field period per week. Semester I: Use, care and adjustment of surveying equipment. Introduction to standard procedures and techniques. Prerequisites: Engineering 2, or equivalent, Math. D, and sophomore standing. Semester II: Computations and map making; land, topographic, and city surveying. Prerequisite: Engr. 1A.

**2. Mechanical Drawing** (3) I, II

Freehand lettering, use and care of drafting equipment, simple orthographic projection, introduction to problems of dimensioning. Open to students lacking credit for a year course in senior high school mechanical drawing.

**21. Descriptive Geometry** (3) I

Fundamental principles of descriptive geometry and their application to engineering problems. Solutions of point, line and plane problems; curved lines and surfaces; intersections of surfaces. One lecture and two three-hour laboratory periods per week. Prerequisite: Engr. 2, or equivalent, and sophomore standing.

**22. Machine Drawing** (3) II

Standard drawing methods and procedures, complete sets of working drawings of simple machine parts, gears and cams; includes tolerance dimensioning, sectioning, threads and fasteners. One lecture and two three-hour laboratory periods per week. Prerequisites: Engr. 21, Math. 3A-3B.

**23. Materials of Engineering** (2) II

A concise presentation of the physical properties of the common materials used in structures and machines, with brief descriptions of their manufacture and fabrication. Two lectures per week. Prerequisite: Sophomore standing.

## Upper Division Courses

**100A-100B. Elements of Electrical Engineering** (3-3) Year, I

Theory and characteristics of electrical equipment with emphasis on industrial applications. Lectures and problems. Semester I: Direct current circuit analysis. D. C. motors and generators. Introduction to alternating current circuits. Prerequisites: Math. 4A, Physics 4B, or permission of the instructor. Semester II: Alternating current circuit analysis. Transformers, alternators, induction and synchronous motors, conversion apparatus, and transmission lines. Prerequisite: Engr. 100A.

**101A. Electrical Engineering Laboratory** (2) I

Laboratory determination of the characteristics of direct current machinery and circuits, single phase alternating current circuits. One three-hour lab. and report per week. Prerequisite: Engr. 100A, or taken concurrently.

**101B. Electrical Engineering Laboratory** (2) II

Laboratory determination of the characteristics of single phase and polyphase circuits, machines, and related equipment. One three-hour laboratory period and report per week. Prerequisite: Engr. 100B, or taken concurrently.

**102A-102B. Analytical Mechanics** (3-3) Year, I

Lectures and problems. Emphasis on engineering applications. Semester I: Principles of statics which deals with the conditions of equilibrium of bodies acted upon by forces. Prerequisites: Physics 4A-4B, Math. 4A. Semester II: Principles of dynamics which deals with the fundamentals of rectilinear and curvilinear motion of particles and rigid bodies, and the rotation of rigid bodies. Prerequisite: Engr. 102A.

**104. Communications** (3) II

Power amplifiers, oscillators, modulators and detectors. Radio transmitters and receivers for amplitude modulation and frequency modulation. Television systems. Antennas and radio wave propagation. Prerequisite: Physics 102 or permission of the instructor.

**105. Fluid Mechanics** (3) II

The statics and dynamics of incompressible and compressible fluids. Viscosity, fluid friction. Dimensional analysis. Fluid measuring instruments. Flow of compressible and incompressible fluids in pipes. Flow of liquids in open channels. Pumps. Prerequisites: Engineering 102A, and Engineering 127.

**106. Fluid Mechanics Laboratory** (2) II

Characteristics of fluid measuring instruments. Fluid flow through pumps, etc. One three-hour laboratory and report per week. Prerequisite: Engineering 105 or concurrent registration.

**122. Machine Design** (4) I

Individual design of a useful machine encompassing fundamental considerations of simple machine parts. Practical design methods utilizing professional literature are stressed. Three lectures and one three-hour laboratory period per week. Prerequisites: Engr. 23, 102A, 140.

**124. Radio Measurements** (2) II

A laboratory course on measurements of the parameters of resonant circuits at radio frequencies. Study of the properties of oscillators, modulators, detectors and wave guides. Prerequisite: Previous or concurrent enrollment in Engineering 104. Students with credit in Physics 124 may not receive credit for this course.

**127. Engineering Thermodynamics** (3) I

An introduction to the basic principles of thermodynamics; laws of perfect gases, vapors and mixtures; cycles. Applications to engineering problems such as the analysis of heat, power, and refrigeration systems, and steady-flow processes. Lecture and problems. Prerequisites: Mathmetics 4A and Physics 4B.

**128. Applied Engineering Thermodynamics** (3) I

The study of various types of heat power equipment; steam generation, turbines, reciprocating engines and auxiliaries; fuels and lubricating oils; gas and oil engines, gas turbines, refrigeration and compressors. The practical application of basic theory to proper, efficient operating practices is stressed. Lectures and problems. Prerequisite: Engineering 127.

**129. Heat Power Laboratory** (2) I

Testing of steam generators and heat balance of same; steam turbine; reciprocating engine; internal combustion engines; flue gases, lubricating oils and boiler feed water. Emphasis upon standardized testing procedures, approved by SAE and ASME, and standard operating procedures. One three-hour laboratory period and report per week. Prerequisite: Engineering 127.

**130. Route and Construction Surveying** (3) I

Application of surveying to engineering problems. Methods of route surveys for highways, railroads, utilities. Construction surveys for buildings and other structures. Earthwork computations. Two lectures and one three-hour field period per week. Prerequisite: Engr. 1B.

**135. Concrete Structures** (3) II

Concrete structures including both plain and reinforced concrete. Practical application of the mathematical theories of mechanics and strength of materials, including analysis and design of such structures as dams, walls, floor slabs, columns, beams, and frames. Prerequisite: Engineering 140 or concurrent registration.

**140. Strength of Materials** (3) II

Elastic properties and strength of engineering materials. Analysis of types of failures. Stress analysis and deformation of simple structural and machine members. Photoelasticity. Lecture and problems. Prerequisite: Engr. 102A.

**141. Materials of Engineering Laboratory** (2) II

Theory and operation of testing machines and auxiliary apparatus. Conduct of tests to determine significant characteristics of commonly used engineering materials. Included are heat treatment of metals, metallographic tests, and photoelasticity. One three-hour laboratory and report per week. Prerequisite: Engr. 140, or taken concurrently.

**142. Stress Analysis** (3) I

Determination of stresses in trusses, beams, and frames. Combined stresses; space structures; general theorems relating to elastic systems; statically indeterminate structures; deflections; analytical and graphical methods of solution. Lectures and problems. Prerequisites: Eng. 102A-102B, 140.

**145. Internal Combustion Engines** (3) II

Application of theory of thermodynamics to internal combustion engines. Esse tial features of design, operating characteristics, and application of gasoline, diesel, a gas engines, and the gas turbine. Lectures and problems. Prerequisites: Physics 4 Math. 4A. Recommended: Engr. 128.

**150. Industrial Electronics** (3) II

Photoelectricity and its applications; rectification and inversion; theory a applications of thyratrons and ignitrons including welding; radio-frequency heatin electrostatic precipitation; motor control and introduction to servomechanisms. Pr requisite: Physics 102.

**156. Aerodynamics** (3) II

Mechanics and thermodynamics of air; wing characteristics; drag; wind tunn testing technique; propellers and power plants; aircraft performance; stability a control. Introduction to compressible aerodynamics. Lectures and problems. Prerequ sites: Engr. 102A-102B.

**166. Honors Course** (Credit to be arranged) I, II

Refer to the Honors Program.

**180. Principles of Engineering Economy** (3) II

Analysis of the costs of development and promotion, construction, operatio depreciation and depletion. Capital recovery, income, return and yield. Valuations a appraisals, cost analysis and financial analysis. Application to engineering problem Prerequisite: Senior standing.

**198. Senior Report** (2) I, II

Investigation of specific problems of advanced nature. Preparation of report. Pr requisite: Advanced senior standing.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of i structor.

NOTE.—In laboratory courses special emphasis is placed upon the preparation neat, concise, complete and intelligent reports.

## ENGLISH

### IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in *English.* Courses in the major are i addition to 45 units in general education courses. Lower division requirements: A least 12 units of work, in addition to English 1 or 41; at least six must be in a yea course. Upper division requirements: A minimum of 24 upper division units in Englis and comparative literature, selected with the approval of a departmental representa tive; two years of lower division work in a foreign language or the equivalent readin knowledge of a language is strongly recommended. A minor is not required of student majoring in English.

Prospective majors of sophomore standing may, with the consent of the cours instructor and subject to general college regulations (see section on Lower Divisio and Upper Division Courses), substitute six units of upper division electives for si units of lower division work, such upper division units to be selected from the following English 101A, 116A, 116B, 118A, 118B, 119A, 119B, 126A, 126B, 143A, 143B.

Students of junior or senior standing may substitute for any deficiencies in lowe division requirements in English (except English 1 or 41) an equivalent number o units of upper division courses selected from the following: English 101A, 116A 116B, 118A, 118B, 119A, 119B, 120A, 120B, 126A, 126B, 143A, 143B, 151, 159.

A *teaching major in English* is offered for the general secondary or junior hig school credential. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *English.* The minor consists of 15 to 22 nits in English, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is offered in English for the general secondary, the special econdary, the general elementary, and the kindergarten-primary credentials. For pecific information refer to the outlines of requirements for these credentials.

### Comparative Literature

For courses in world literature, see Comparative Literature; these courses give redit toward the English major or minor or toward the minor in Comparative iterature.

### Credit in Course Sequences

All elective year courses in the department may be begun in either semester, and ither semester may be taken singly for credit.

### Lower Division Courses

**A. English Fundamentals** (3) I, II
The elements of composition, including drill in grammar and usage; exercises in ocabulary building and in fundamental reading skills; theme writing. Credit in this ourse is equivalent to passing the English A examination and may be counted toward raduation as an elective but not to satisfy lower division English requirements in any urriculum.

**R. Reading Laboratory** (0) I, II
A semi-tutorial service offered by the English Department to those wishing to mprove reading ability, or secure individual help with study problems. Open to all tudents at any level of college work. Consult department chairman.

**W. Writing Laboratory** (0) I, II
A semi-tutorial service offered by the English Department to those wishing assistance in writing projects, either remedial or advanced. Open to students at any level of college work. Consult department chairman.

***1. Freshman Composition** (3) I, II
Study and practice in the expression of ideas and factual materials; principles of organization and of effective style, with emphasis on exposition. Prerequisite: Satisfactory English A examination or credit in English A.

***2A. Freshman Literature: Imaginative** (3) I, II
Training in reading literary materials with insight and vividness.

***2B. Freshman Literature: Modern Thinking** (3) I, II
Designed to develop college reading skills through practice in the analysis of materials at various levels of difficulty.

**10. Recreational Reading** (1) I, II
Development of personal tastes for leisure-time reading through lectures and written reports. May be taken a second time with new materials.

**20. Latin and Greek Word Derivation** (3) I
A general and elementary course in philology. Study of Latin and Greek roots of most frequent occurrence in English, and of the English words derived from them. No prerequisite. Not open to students with credit for General Language 20.

**50A-50B. Masterpieces of American Literature** (3-3) Year, I
Semester I: Major American writers from the beginning to 1860. Semester II: American literature from 1860 to the present.

***52A-52B. Masterpieces of World Literature** (3-3) Year, I
A chronological survey from Homer to modern times. The first semester stresses the classical epic and tragedy. The second semester, beginning with the Renaissance, stresses prose fiction, the drama, and the essay. Not open to students with credit for Comparative Literature 52A-52B.

**A-56B. Survey of English Literature** (3-3) Year, I
The study of some important works of English literature from the Anglo-Saxo period through the Victorian age, with emphasis upon the literary history of eac period.

**60A-60B. Literature and Personality** (3-3) Year, I
The close study of a limited number of the great creators of literature. The goa of the course is to derive, from markedly different specific works, orderly and generalized methods for the interpretation of great literature.

*** 61. Sophomore Composition** (3) I
An elective course designed to give further training to the student who wishe practice in writing beyond the freshman level. Prerequisite: English 1 or equivalent

**62. The Short Story** (3) II
A practical course in writing, including a study of short story techniques and purposes, and the writing of complete short stories. Prerequisite: English 1 or equivalent

**63. Foundations of the Language** (3) II
An introduction to the study of the changes of form and meaning in Engli words with special emphasis on semantics.

## Upper Division Courses

*** 101A. Modern Continental Fiction** (3) II
A survey of leading French, Russian, Scandinavian, Italian, and German novelists and short story writers, from Tolstoy and his associates to the present day. Not open to students with credit for Comparative Literature 101A.

*** 106. Creative Writing** (3) I
A writing workshop in which students are given opportunity to criticize each other's work. Emphasis on narrative and description, but freedom to pursue whatever writing forms may interest the student most. May be taken a second time with new material. Not open to students with credit for Journalism 106.

**110. Recreational Reading** (1) I, II
An advanced course in the group reading of modern drama, poetry and fiction.

**113. American English** (3) I
The development of American English; regional and cultural differences in pronunciation, grammar, and vocabulary.

*** 115. The Bible as Literature** (3) I
A study of the narrative, poetry, and prophecy of the King James version of the Bible. Readings, reports, lectures, and discussions. Not open to students with credit for Comparative Literature 115.

**116A-116B. The Age of Elizabeth** (3-3) Year, I
Semester I: Poetry and prose, exclusive of drama. Semester II: The drama to 1642, excluding Shakespeare.

*** 117A-117B. Shakespeare** (3-3) Year, I
The first semester gives special emphasis to the histories and comedies; the second, to tragedy and the dramatic romances.

**118A-118B. Eighteenth Century English Literature** (3-3) Year, I
The first semester emphasizes the social satire of Swift, Pope, Addison, Steele, Dryden, Gay, Prior; and also the first stirrings of the romantic revolt in a number of important poems and prose works. The second semester is devoted to Johnson and Boswell and their circle and to a significant romantic literature antedating the romantic outburst.

*** 119A. English Romantic Poetry** (3) I
The culmination of the romantic movement in the poetry of Wordsworth, Coleridge, Byron, Shelley, and Keats, in relation to the thought of the revolutionary period.

**119B. The Victorian Poetry** (3) II
Tennyson and Browning with their contemporaries and successors, relating English poetry to nineteenth century life and thought.

**120A. The Seventeenth Century: Milton** (3) II (Alternate years)
The poetry and major prose works of Milton, with stress on the development of his art and mind; the political and religious background and the events in which Milton participated.

**120B. The Seventeenth Century: Milton's Contemporaries** (3) II (Alternate years)
The seventeenth century poets and prose writers, excluding Milton; the Metaphysical and Cavalier poets; the beginnings of the essay and biography.

**126A. Romantic and Victorian Prose** (3) I
Romantic and mid-Victorian prose writers, including Coleridge, Hazlitt, Lamb, DeQuincey, Carlyle, Landor, Macaulay, and Mill, related to the literary, political, and social movements of the period.

*** 126B. Late Nineteenth Century British Prose** (3) II
The essays of Arnold, Thomas Huxley, Newman, Pater, Ruskin, and Stevenson. Study of scientific, aesthetic, and ethical backgrounds.

**129. Contemporary British Literature** (3) II
Selected prose and poetry of England and Ireland from 1914 to the present, including Shaw, Yeats, Synge, Joyce, Maugham, Huxley, D. H. Lawrence, Eliot, the Oxford poets, and the principal authors belonging to the two wars.

**131. American Literature: 1820-1860** (3) I
The study of the important romantic writers, with emphasis on the New England group.

**132. The Frontier and American Literature** (3) I, II
The influence of the frontier upon American literature studied through various regions and movements. Examinations of source materials, biographies, and representative writers.

**133. American Literature: 1860-1910** (3) II
The rise of realism in American literature. Influences, foreign and native, which promoted the movement. Definition of realism. The literary creed of the realists. The romantic attack and the realist defense.

*** 134. American Literature: 1910 to the Present** (3) I, II
Ideas and forms in representative poetry and prose.

**143A-143B. The English Novel** (3-3) Year, I
The history of the English novel from its beginnings to the present century. Emphasis in the first semester will be on the eighteenth century and in the second semester on the nineteenth century.

*** 149. The Study of Poetry** (3) II
A course proceeding from simpler to more complex poetic productions, and designed to bridge the widening chasm between the poet and the ordinary man. Emphasis on current directions in poetry, and on poetry as an oral and auditory art.

**151. Chaucer** (3) I
A study of Chaucer's works, with emphasis on "The Canterbury Tales" and "Troilus and Criseyde."

*** 152A-152B. Survey of Drama** (3-3) Year, I
Study of selected tragedies and comedies from Asiatic, European, English, and American literature, with emphasis upon the human problems depicted therein and upon the timelessness of certain themes, such as those of Electra and Medea. Lectures, discussions, and reports on readings. Not open to students with credit for Comparative Literature 152A-152B.

**162. Magazine Fiction** (3) I
Coaching in constructing and writing short stories for commercial publications. Admission by consent of the instructor. Not open to students with credit for Journalism 162.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**191. Advanced Composition** (3) I

A course designed for prospective teachers of secondary school English. This is not a methods course, but a content course in grammar, composition, and journalism. Required of all teaching majors in English; open to other students as an elective.

**192. The English Language** (3) II

The study of the history of the English language, of its words and structure, of the changes in inflections, pronunciation, vocabulary, and meaning, and of its use as an instrument of communication and human living. Open only to seniors and graduate students.

**195. Literary Criticism** (3) I

A historical survey of the principles and practices of literary criticism from Greek times to the nineteenth century. Readings in the works of Aristotle, Horace, Longinus, Sidney, Boileau, Dryden, Lessing, Sainte-Beuve, Coleridge, and Arnold. Open only to senior and graduate students.

**198. Comprehensive Reading and Survey** (3) II

A study of major movements in English literature through a review of important writers and key works. Individual programs of readings to fill the needs of each student. Open only to senior and graduate students.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**203A-B-C-D. The Critical Study of a Major Author** (2-2-2-2) I, II

A seminar in (A) Shakespeare, (B) Arnold, (C) Mark Twain, or (D) Dickens.

**213A-B-C-D. The Study of a Cultural Period Through Its Literature** (2-2-2-2) I, II

A seminar in (A) the Renaissance, 1500-1660, (B) the Enlightenment, 1660-1780, (C) The Romantic Revolution, 1780-1830, or (D) Industrialism and Democracy, 1830-1914.

**223A-B-C-D. The Study of a Literary Problem** (2-2-2-2) I, II

A seminar in (A) Regionalism in American Literature, (B) the Utopian Theme in Literature, (C) the Idea of the "Gentleman," or (D) European Influences in American Literature.

**290. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

## FRENCH

### IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in *French* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: In the major, French 1, 2, 3, 4, 5, 6; in other foreign languages, German 1, 2, or Spanish 1, 2, or Latin 1, 2. Six units in elementary German, Spanish, or Latin may also be applied toward general education requirements. Recommended: History 4A-4B. Upper division requirements: A minimum of 24 upper division units, at least 21 units of which must be in French, including French 198. The remaining three units may be selected from French 115, 116; Geography 118; History 121A-121B, 131A-131B, 141, 142, 143A-143B, 144A-144B; or Comparative Literature 101A, 140A-140B, 152A-152B, 159, in consultation with the chairman of the department.

A person majoring in French must have a minor to be decided upon in consultation with his major adviser.

A *major in arts and sciences* is offered in *Romance Languages.* For specific information on this major, refer to the section on Romance Languages.

A *teaching major* is offered in *French* or in *Romance Languages* for the junior high school and general secondary credentials. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *French.* The minor consists of 15 to 22 units in French, six units of which must be in courses carrying upper division credit.

A *teaching minor* is offered in French for the general secondary, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

*1. **Elementary** (3) I, II
Pronunciation, oral practice, readings on French culture and civilization, minimum essentials of grammar.

*2. **Elementary** (3) I, II
Continuation of French 1. Prerequisite: French 1 or one year of high school French.

*3. **Intermediate** (3) I, II
Reading in French of cultural material, short stories, novels or plays; oral practice; outside reading with oral and written reports. Prerequisite: French 2 or two years of high school French.

*4. **Intermediate** (3) II
Continuation of French 3. Prerequisite: French 3 or three years of high school French.

5. **Intermediate** (2) I, II
A practical application of the fundamental principles of grammar by means of oral and written work based on French texts. Prerequisite: French 2 or two years of high school French.

6. **Intermediate** (2) II
Continuation of French 5. Prerequisite: French 5 or three years of high school French.

10. **Conversation** (2) I
Practice in the spoken language; practical vocabulary, conversation on assigned topics; simple dialogues and plays. Prerequisite: French 2 or two years of high school French.

11. **Conversation** (2) II
Continuation of French 10. Prerequisite: French 10 or French 3, or three years of high school French.

*15. **French Civilization** (2) I
The major currents and characteristics of French culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

*16. **French Civilization** (2) II
Continuation of French 15. No prerequisite.

8A-8B. **Scientific Reading** (3-3) I
Reading taken from the fields of chemistry, physics, medicine, zoology, biology, etc. Outside readings of books and periodicals, with written reports. Prerequisite: French 2 with a grade of C or two years of high school French.

### Upper Division Courses

**101A-101B. Conversation and Composition** (3-3) Year, I (Offered in 1954-55)
Translation into French from moderately difficult English prose. Outside reading of modern French prose, with written reports in French monthly. Readings and oral discussions in French of various facets of French life and culture. Prerequisite: French 4 and 6, or their equivalent, with a grade of C, or permission of instructor.

**105A-105B. Modern French Drama** (3-3) Year, I
Plays of Victor Hugo, de Vigny, de Musset, Scribe, Augier, Dumas fils, Pailleron, Brieux, Hervieu, Maeterlinck, Rostand, and others read and discussed as to subject matter and technique. Outside reading and reports. Prerequisite: French 4 and 6, or their equivalent, with a grade of C.

**107A-107B. Eighteenth Century Literature** (3-3) Year, I (Offered 1956-57)
The works of Montesquieu, Voltaire, Rousseau, the Encyclopédistes, as well as the theatre and novel of the period. Outside reading and reports. Prerequisite: French 4 and 6, or their equivalent, with a grade of C.

**110-110B. Modern French Novel** (3-3) Year, I (Offered in 1955-56)
The French novel from Victor Hugo to the present day, including such authors as: Hugo, Dumas, Stendahl, Balzac, Flaubert, Loti, Anatole France, Bourget, Bordeaux, Bazin, Barrès, Romain Rolland, A. Gide, Marcel Proust, and others. Class reading, outside reading, and reports. Prerequisite: French 4 and 6, or their equivalent, with a grade of C.

**111A-111B. Seventeenth Century Dramatic Literature** (3-3) Year, I (Offered in 1954-55)
Reading in class of plays of Molière, Corneille, and Racine. Outside readings and lectures on the background of the seventeenth century in France. Prerequisite: French 4 and 6, or their equivalent, with a grade of C.

*** 115. French Civilization** (2) I
An advanced course in French of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

*** 116. French Civilization** (2) II
Continuation of French 115. Prerequisite: sophomore standing.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**198. Comprehensive Reading and Survey Course** (3) II
Designed to fill up the gaps in the reading done in courses. Class meeting once a week for guidance, reports, and quizzes. Required of all seniors majoring in French.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**214. Contemporary French Literature** (2) I
An intensive study of the current movements and techniques in the novel, poetry, and theatre in France from 1900 to the present day. Class discussion, outside readings, written reports. Prerequisite: Nine units of upper division French and graduate status.

**220. Explication de Textes** (2) II
An introduction to the analytical French approach to the detailed study of literature. Demonstrations by instructor and students. This course aims to give teachers of French a greater mastery of French language and literature. Prerequisite: Nine units of upper division French and graduate status.

**290. Bibliography** (1) See Romance Languages

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**99. Thesis** (3)
Master's degree candidates in French are expected to substitute a comprehensive xamination for the thesis. In unusual cases a student may write a thesis with the ermission of the department.

# GENERAL CULTURE

## IN THE DIVISION OF FOREIGN LANGUAGES

Major or minor work is not offered in general culture courses. These courses re carried as part of the offerings of the Foreign Languages Department. They are onducted in English and are open to all students. A knowledge of foreign language is ot required.

### Lower Division Courses

***15. French Civilization** (2) I
The major currents and characteristics of French culture, as expressed through he centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

***16. French Civilization** (2) II
Continuation of French 15. No prerequisite.

***15. German Civilization** (2) I
The major currents and characteristics of German culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English No prerequisite.

***16. German Civilization** (2) II
Continuation of German 15. No prerequisite.

***15. Spanish Civilization** (2) I
The major currents and characteristics of Hispanic life and culture, as expressed through the centuries in literature, art, philosophy, music and science. Conducted in English. No prerequisite.

***16. Spanish Civilization** (2) II
Continuation of Spanish 15 with emphasis on Spanish America. No prerequisite.

### Upper Division Courses

***115. French Civilization** (2) I
An advanced course in French culture of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

***116. French Civilization** (2) II
Continuation of French 115. Prerequisite: sophomore standing.

***115. German Civilization** (2) I
An advanced course in German culture of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

***116. German Civilization** (2) II
Continuation of German 115. Prerequisite: sophomore standing.

***115. Spanish Civilization** (2) I
An advanced course in Hispanic culture of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

***116. Spanish Civilization** (2) II
Continuation of Spanish 115 with emphasis on Spanish America. Prerequisite: sophomore standing.

# GENERAL LANGUAGE

## IN THE DIVISION OF LANGUAGES AND LITERATURE

Major or minor work is not offered in general language.

### Lower Division Courses

**20. Latin and Greek Word Derivation** (3) I

A general and elementary course in philology. A study of Latin and Greek root of most frequent occurrence in English, and of the English words derived from them No prerequisite. Not open to students with credit for English 20.

**30. Pronunciation of French, Italian and German** (1-3) II

A course designed especially to meet the needs of singers, radio announcers, etc No prerequisite. This course may be taken for one, two or three units of credit depending on the individual student's need.

# GEOGRAPHY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *geography* for the A.B. degree. Course in the major are in addition to 45 units in general education courses. Lower division requirements: Geography 1, 2; Geology 1A-1B. Recommended: A reading knowledg of German and French. Upper division requirements: A minimum of 24 upper division units in geography, or 18 units in geography and six units selected from related field with approval of the chairman of the department. A minor is not required; however students are urged to complete one minor.

A *teaching major* is not offered in geography; however, courses in geography may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *geography*. The minor consists of 15 to 22 units in geography, six units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in geography for the general secondary credential however, it may be used as a part of the *social science minor* for the special secondary the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

*** 1. Introduction to Geography: Physical Elements** (3) I, II

The nature of maps, weather and climates of the world; natural vegetation; land forms and their associated soils, with reference to their climatic relationships; the seas and their coasts. One field trip. This course is classified as a natural science. (See general education requirements.)

*** 2. Introduction to Geography: Cultural Regions** (3) I, II

The regional differentiation of the world by human activity; areal bases of economy and nationality. Not open to students with credit for Geography 12A or 12B. Prerequisite: Geography 1.

**3. Elementary Meteorology** (3) I, II

An elementary study of the earth's atmosphere and changes in it which produce our weather and influence human affairs. Special attention given to local conditions, instruments, and records.

*** 10. Economic Geography** (3) I, II

Beginning course in economic geography designed for commerce and economic majors.

**12A-12B. Culture Worlds** (3-3) I, II
A study of the evolution, distinguishing cultural characteristics and physical features of the major culture regions of the world, with emphasis on the role man has played in the alteration of the natural landscape. Not open to students with credit for Geography 2.

### Upper Division Courses

**112. Geography of California** (3) II
The physiographic regions of California and the cultural landscapes developed by the successive cultural groups. Prerequisite: Geography 1 or consent of instructor.

**113. Climatology** (3) II
A survey of the principal classifications of climates of the world; regional characteristics of climate; relations to soils, vegetation, and human activities. Prerequisite: Geography 1 or consent of instructor.

**117. Geography of Northern and Eastern Europe** (3) II
A study of the cultural development of the countries of northern and eastern Europe in relation to physical background and historical evolution. Prerequisite: Geography 1 or consent of instructor.

**118. Geography of the Mediterranean Area** (3) II
A study of the cultural development of the countries of Southern Europe, Western Asia, and North Africa in relation to physical background and resources. Prerequisite: Geography 1 or consent of instructor.

**119. Geography of South America** (3) II
A study of the physical regions and human geography of South America, including a review of the history of colonization and the exploitation of resources. Prerequisite: Geography 1 or consent of instructor.

**120. Geography of Middle America** (3) I
A study of the physical and human geography of Mexico, Central America, and the islands of the Caribbean, including a review of the history of colonization and the exploitation of resources. Prerequisite: Geography 1 or consent of instructor.

**121. Geography of North America** (3) I
The natural regions of North America, their formation and economic and historical development. Prerequisite: Geography 1 or consent of instructor.

**124. Geography of Asia** (3) I
The cultural regions of Asia, their physical environment, and historical development. Prerequisite: Geography 1 or consent of instructor.

**125. Geography of the Pacific Basin** (3) II
A geo-political approach to the study of the islands in, and the lands marginal to, the Pacific Ocean. Prerequisite: Geography 1, or consent of the instructor.

**135. Geography of the San Diego Area** (3) II
Directed individual urban and rural field work in the San Diego area; the mapping of a small area and making its geographic interpretations. Prerequisite: Geography 1 and 2 or consent of instructor.

*** 145. Conservation of Natural Resources** (3) II
Nature and extent of mineral, soil, water, forest, and wild life resources and their conservation; with particular emphasis on the United States, against a general background of world resources. Conservation philosophies and practices, and their geographic bases. Prerequisite: Geography 1 or consent of instructor.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors program.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**200A-200B. Seminar** (2-2) Year, I

**290. Bibliography** (1)

Exercises in the use of basic reference books, journals, and specialized bibliog raphies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff to be arranged with department chairman and instructor.

**299. Thesis** (3)

Guidance in the preparation of a project or thesis for the master's degree.

## GEOLOGY

### IN THE DIVISION OF PHYSICAL SCIENCES

Major work is not offered in geology. Students preparing for later professiona training in geology should plan on completing Chemistry 1A-1B; Physics 4A-4B-4C Mathematics 3A-3B; Engineering 1A-1B, 21A; and Geology 1A-1B, 21 and 100.

A *teaching major* is not offered in geology; however, courses in this field may be used as part of the *general science major* for the general junior high school credential For specific information, refer to this credential.

### Minor

A *minor in arts and sciences* is offered in geology. The minor consists of 15 to 22 units in geology, six units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in geology; however, courses in this field may be used as part of the *general science minor* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to these credentials.

### Lower Division Courses

**1A. Physical** (4) I

The composition, origin, and distribution of earth materials, and their modification through mechanical and chemical process of change. Three lectures and one three-hour laboratory period weekly with related field study during the semester. (Not open to students who have had Geology 2.)

**1B. Historical** (4) II

Theories of earth origin, and the evolutionary history of the earth as traced through rock and fossil records. Consideration of the Paleontologic Sequence. Three lectures and one three-hour laboratory period weekly, with arrangement for field study and conference during the semester. Prerequisite: Geology 1A or equivalent.

***2. General Geology** (3) I, II

Earth materials and processes, the development of land forms, and a brief consideration of the history of the earth. Open to all students except those with previous credit in geology. No prerequisites.

***3. General Geology Laboratory** (1) I, II

Recognition of common earth materials with experience in both field and map relationships. Designed to accompany Geology 2, but entirely separate and complete in itself. One three-hour laboratory period weekly. Open to all students except those with previous laboratory credit in geology. No prerequisites.

***4. Physiography of United States** (3) II

Geologic history and present features of the main physiographic provinces of United States. Prerequisite: Geology 1A or 2.

**21. Elementary Mineralogy** (4) I

Practice in the determination of common minerals and rocks, their geologic environment, utilization and economic significance. Two lectures and two three-hour laboratory periods weekly. No prerequisite.

**2. Advanced Mineralogy** (4) II
Continuation of Geology 21 with emphasis on the origin, concurrence, identifica-ion, and classification of the rocks in which the minerals occur. Two lectures and two hree-hour laboratory periods weekly. Prerequisite: Geology 21.

### Upper Division Courses

**100. Structural Geology** (3) I
The evolution and description of the structural and topographical features of the earth. Faulting, folding, and orogenic forces with practical illustrations from the North American Continent and California geologic conditions. Lectures, discussions, and occasional field trips. Prerequisite: Geology 1A-1B or equivalent.

**101. Museum Work** (1-2) I, II
Selection and preparation of materials for the college museum collections. Emphasis upon creation of self instructive displays for use on the elementary and secondary as well as the collegiate level. Prerequisite: Geology 1A-1B, and consent of the instructor. May be repeated for maximum not to exceed six units where quality of work and student capacity justify.

**102. Geology of California** (3) II
Directed reading and group discussion of California geologic literature. Designed to acquaint the student not only with the important structural and geomorphic units of the State but with the variety of important source materials of geologic literature as well. Use of bibliographies, state and federal surveys, research publications, etc. Prerequisite: Geology 1A-1B, and consent of the instructor.

**108. Field Geology** (1-4) I, II
Field instruction in geologic methods. Reconnaissance of adjacent unmapped areas with preparation of a geologic map and accompanying report. Work accomplished primarily on week-ends with minimum classroom activity during the week for organizational details. Prerequisite: Geology 1A-1B, and consent of the instructor.

**166. Honors Course** (Credit to be arranged) I, II
Special work in any of several phases of geologic science for students of demonstrated ability. Refer to the Honors Program.

**199. Special Study** (1-6) I, II
Individual study in field, library, laboratory, or museum work. Six units maximum credit. Prerequisite: permission of instructor.

## GERMAN

## IN THE DIVISION OF LANGUAGES AND LITERATURE

Major work is not offered in German.

A minor in arts and sciences is offered in German. The minor consists of 15 to 22 units in German, six units of which must be in courses carrying upper division credit.

### Lower Division Courses

*1. **Elementary** (3) I, II
Pronunciation, oral practice, readings on German culture and civilization, minimum essentials of grammar.

*2. **Elementary** (3) I, II
Continuation of German 1. Prerequisite: German 1 or one year of high school German.

*3. **Intermediate** (3) I, II
Reading in German of cultural material, short stories, novels or plays; oral practice; outside reading with oral and written reports. Prerequisite: German 2 or two years of high school German.

*4. **Intermediate** (3) II
Continuation of German 3. Prerequisite: German 3 or three years of high school German.

**5. Intermediate (2) I, II**

A practical application of the fundamental principles of grammar by means o oral and written work based on German texts. Prerequisite: German 2 or two year of high school German.

**6. Intermediate (2) II**

Continuation of German 5. Prerequisite: German 5 or three years of high schoo German.

**10. Conversation (2) I**

Practice in the spoken language; practical vocabulary; conversation on assigne topics; simple dialogues and plays. Prerequisite: German 2 or two years of hig school German.

**11. Conversation (2) II**

Continuation of German 10. Prerequisite: German 10, or German 3, or thre years of high school German.

*** 15. German Civilization (2) I**

The major currents and characteristics of German culture, as expressed throug the centuries in literature, art, philosophy, music and science. Conducted in English No prerequisite.

*** 16. German Civilization (2) II**

Continuation of German 15. No prerequisite.

**8A-8B. Scientific Reading (3-3) I**

First semester, readings in scientific reader on chemistry, physics, etc.; occasional written reports on scientific subjects read outside of class; sight reading Second semester, readings in special scientific or technical works; weekly writte reports required; sight reading. Prerequisite for 8A: German 2 with a grade of C o two years of high school German; for 8B: German 8A or German 3, with a grade o C, or three years of high school German.

## Upper Division

**101A-101B. Advanced Conversation and Composition (3-3) Year, I**

Translation into German of moderately difficult English prose. Free composition in German, written and oral. Outside reading of modern German plays and prose discussions in German. Oral and written practice in conversational German. Prerequisite: German 4 and 6, or their equivalent, with a grade of C, or permission of instructor

*** 115. German Civilization (2) I**

An advanced course in German culture of the past and present, with emphasis on the arts, philosophy, and literature. Lectures, class discussions, outside readings, written reports on individual topics. Conducted in English. Prerequisite: sophomore standing.

*** 116. German Civilization (2) II**

Continuation of German 115. Prerequisite: sophomore standing.

**142. The Golden Age of German Literature (3) II**

Masterpieces of German literature from the 18th and early 19th centuries. Lectures in English, readings and written reports in German. Not open to students with credit for Comparative Literature 142.

**199. Special Study (1-6) I, II**

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

# HEALTH EDUCATION

## IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

### Major

An *arts and sciences major* is not offered in health education.

A *teaching major in health education* is offered for the general secondary credential. This major is designed around the plan for a general major and may be used for the A.B. degree by students who have been admitted to candidacy for the general secondary credential and have completed a minimum of eight units in professional education courses, including Education 184A-184B, by the date of degree candidacy. For a statement of requirements refer to the general secondary credential.

### Minor

A *minor in arts and sciences* is offered in *health education.* The minor consists of 15 to 22 units in health education, nine units of which must be in courses carrying upper division credit. Courses will be determined in consultation between student and departmental representative.

A *teaching minor in health education* is offered for the general secondary and the special secondary credentials. For a statement of requirements, refer to the credential.

### Lower Division Courses

***21. Principles of Healthful Living (2) I, II**

An approach to the personal health problems of college students. Scientific health information is provided, and an attempt is made to promote wholesome attitudes and desirable practices relating to healthful living. Includes instruction as required by statutes on safety, fire prevention, and harmful effects of alcohol and tobacco. Required of all freshmen.

**65. Community Health (3) I, II**

Community health problems; the role of the citizen, of the public, and of community health agencies in promoting and protecting the health of the community.

***90. Physiology of Reproduction (1) I, II**

A series of lectures and discussions dealing with normal and abnormal physiology and anatomy of reproduction; facts and frauds in sex hygiene, and related topics. Not open to students with credit for Home Economics 90.

### Upper Division Courses

**145. Safety Education and Accident Prevention (3) II**

Highway safety, the fundamentals of safety programs and techniques in home, school and industry. Partially satisfies the requirements for state credential in driver education.

**151. Health Education for Teachers (2) I, II**

The teacher's function in the different aspects of the school health program; environment, services, and instruction. Special attention is given to materials and material sources, and to community relationships and resources. Separate sections for elementary and secondary teachers are offered.

**152. Health Education Programs (3) I**

The construction of the health education program including objectives, scope and sequence of instruction, teaching methods, source materials and evaluation procedures; practice in building instructional units.

**153. Administration of the School Health Program (3) II**

Administrative responsibilities and procedures in organizing and conducting the school health program. Principles, policies, and practices involved in instruction, service, environment, and community relationships. Partially fulfills Health and Development Credential requirement for nurses.

**154. Workshop in Health Education** (2) Summer

For elementary and secondary administrators, school nurses, and teachers. Th workshop provides opportunities for participants to work together toward the improvement of the total school health program in such areas as health instruction, healt services, health environment, and community health.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**200. Evaluation Procedures in Health, Physical Education and Recreation** (2)

A study of tests and measurements in the profession with practice in their use construction and interpretation of results. Not open to students with credit for Physica Education 200.

**202. Problems in Health Education** (2) (Alternate Years)

Current problems in Health Education, studied through a review of the literature discussion of trends, observation of school situations, together with the analysis an evaluation of actual problems. Written reports required.

**298. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3) I, II

Guidance in the preparation of a project or thesis for the master's degree.

## HISTORY

### IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *history* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division: Required in the major: History 4A-4B, or 8A-8B. Recommended in general education for majors: Political Science 1A-1B, or 71A-71B, or Economics 1A-1B. Both of the above history courses are recommended for students planning to major in history. No freshman shall enroll in more than one lower division course in history during any one semester without the permission of the department. Upper division requirements: A minimum of 24 upper division units in history, including History 198, and a minimum of a year of concentration in each of three of the following fields: (a) Ancient and Medieval; (b) Modern Europe; (c) United States; (d) Latin America; (e) Pacific Area and the Far East. These courses must be selected under the guidance of the chairman of the department. A reading knowledge of one foreign language is strongly recommended. History majors are not required to complete a minor.

A *teaching major* is not offered in history; however, courses in history may be used as part of the *teaching major in social sciences* for the general secondary and general junior high school credentials. For statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *history*. The minor consists of 15 to 22 units in history, nine of which must be in courses carrying upper division credit, including a year course.

A *teaching minor in history* is offered for the general secondary credential. Courses in history may be used as part of the social teaching science minor for the special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Explanation of Courses

NOTE: History 17A-17B does not count toward credit for a major in history.

Any history course, with the exception of History 270A-270B, may be taken either semester, the A part not being a prerequisite to the B part.

### Lower Division Courses

***4A-4B. History of Modern Europe** (3-3) Year, I, II
A survey of European society, institutions and politics from about 1500 to the present. Fall semester: 1500-1799. Spring semester: 1799 to the present.

***8A-8B. History of the Americas** (3-3) Year, I
Survey of the history of the western hemisphere from its discovery to the present time. This year course meets the graduation requirement in American history, institutions and ideals.

***17A-17B. History of American Civilization** (3-3) Year, I
Survey of the political and social development of the United States, with emphasis upon the rise of American civilization and ideals. This year course meets the graduation requirement in American history, institutions and ideals, and the United States Constitution. The second semester course, 17B, also covers the required materials in California state and local government.

### Upper Division Courses

**111A-111B. Ancient History** (3-3) Year, I
(Offered in 1953-54 and alternate years)
Fall semester: Greek history to the Roman conquest. Spring semester: Roman history to the fifth century A.D.

***121A-121B. Medieval History** (3-3) Year, I
(Offered in 1952-53 and alternate years)
Survey of the main events of European social, cultural, religious, political and economic history, between 500 and 1400 A.D.

**131A-131B. Renaissance, Reformation and Counter-reformation** (3-3) Year, I
(Offered in 1953-54 and alternate years)
A history of personalities and events connected with the social, political, cultural, economic and religious change between 1300 and 1600.

**141. Europe in the Seventeenth and Eighteenth Centuries** (3) I
European thought, politics and international relations from the Thirty Years' War and Louis XIV to 1763.

**142. The French Revolution and Napoleonic Era** (3) II
Study of conditions in France prior to 1789, the Revolution, 1789-1799, the organization of France and Europe under Napoleon, character of his empire, and the reorganization of Europe at the Congress of Vienna.

**143A-143B. Europe in the Nineteenth Century** (3-3) Year, I
Reaction in Europe, the development of nationalism, the impact of industrialism, and the background of World War I. Covers period 1815-1914.

**144A-144B. The World Wars** (3-3) Year, I
(Offered in 1952-53 and alternate years)
Developments from 1914 to the present. Semester I: World War I, the peace settlements, and the background of World War II. Semester II: World War II and its aftermath.

**151A-151B. History of England** (3-3) Year, I
Political, constitutional, social and economic developments since 1066. Designed for prelegal students, majors in English, and as a background for American History.

**156A-156B. History of British Expansion** (3-3) Year, I
Study of the growth and development of the British Empire from the first overseas empire to the present. History 156B not open to students with credit for Political Science 160.

**161. Mexico and Caribbean Countries** (3) I
Special attention to relations between the United States and these countries, and to recent developments in Mexico.

**162. South America Since Independence** (3) II
Republics of South America. Development of nationality, struggles for political stability, exploitation, diplomatic and commercial relations with the United States, and other international problems of South America. Survey of present-day conditions.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**171A-171B. Rise of the American Nation** (3-3) Year, I
(Offered in 1952-53 and alternate years)
Semester I: English colonization in North America, development of colonial institutions and political customs, and areas of international conflict during 18th century. Semester II: The Revolution and establishment of the government under the Constitution of 1787. Covers period to 1814.

*** 172A-172B. American Constitutional Development** (3-3) Year, I
A study of the work of the Convention of 1787 and of significant phases of American constitutional law. Not open to students with credit for Political Science 139A-139B. This year course meets the graduation requirement in American history, institutions and ideals, and United States Constitution. The second semester course, 172B, also covers the required materials in California state and local government.

**173A-173B. The Expansion of the United States** (3-3) Year, I
(Offered in 1953-54 and alternate years)
Lectures and readings on Jacksonian democracy, territorial expansion and the Mexican War, the slavery controversy, Civil War and Reconstruction, and attention to the growth and progress of the United States to the close of the nineteenth century.

**175A-175B. The United States in the Twentieth Century** (3-3) I
The rise of the United States to the position of a world power; social and economic problems posed by the machine age; political action and adjustment, actual and proposed, intended as solutions for these problems.

**176A-176B. American Foreign Policy** (3-3) Year, I
Lectures and readings in the field of American foreign relations since 1776, with special emphasis, in the second semester, upon affairs since 1900. A general survey course. Not open to students with credit for Political Science 158A-158B.

*** 179A-179B. Intellectual History of the American People** (3-3) Year, I
A study of the ebb and flow of ideas in the United States since the founding of the English colonies, with special attention devoted to social and political thought. This year course meets the graduation requirement in American history, institutions and ideals.

**181A-181B. History of the West** (3-3) Year, I
The American frontier: Expansion, exploration, settlement and building of the new states, with emphasis upon frontier problems of defense, communications, finance, etc.; the development of cultural institutions. A critical examination of the causes, effects and results of the frontier experiences of the American people.

**189. History of California** (3) I, II
The economic, social, intellectual, and political development of California from the earliest times. Emphasis will be on the founding of California, international struggles for California; American conquest and Gold Rush Era; development of California as a state. This course meets the graduation requirement in California State and Local Government.

**190A-190B. History of the Pacific Ocean Area** (3-3) Year, I
A general survey of the history and civilization of the peoples of the Pacific, with special emphasis upon exploration, trade, international rivalries, and social evolution of the island areas. (Formerly History 9A-9B.)

**191A-191B. History of the Far East** (3-3) Year, I
Particular emphasis during the first semester upon the history, both internal and international, of the Far East through the nineteenth century. The second semester will be devoted to a consideration of developments in the twentieth century.

**192. History of Russia** (3) II
A general survey emphasizing the period since Peter the Great; the Russian Empire's relations with its national minorities; Tsarist experiments in political and social reform; revolutionary socialism; the development of the U. S. S. R.

**193. History of China** (3) I
A survey of Chinese history and institutions from antiquity to the present.

**194. History of Japan** (3) I (Offered in 1953-54 and alternate years)
A general survey of the political, economic and social development from the foundation of the empire to contemporary times. Special attention will be given to religions, philosophy, literature, and the arts.

**198. Special Course for Advanced Students** (2) II
Required of all students with a history major. To be attended during the senior year. Open to social science majors.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

### Graduate Courses

**270A-270B. Seminar** (2-2) Year, I
Required of all candidates for the M.A. degree in history. Prerequisite: permission of instructor. 270A is a prerequisite for 270B.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

## HOME ECONOMICS
### IN THE DIVISION OF FINE ARTS

Major work is not offered in home economics. Students may elect a general major with one of the fields of concentration in home economics. For specific information, refer to the Home Arts Curriculum in the section of the bulletin entitled: Preprofessional and Vocational Curricula.

A *teaching major* is not offered in home economics; however, students planning to complete requirements for a special secondary credential in home economics should take the following courses in addition to courses in home economics: Chemistry 2A-2B. Recommended: Physics 5, Biology 1 or 3, Zoology 165, English 2A, History 17A-17B or Political Science 71A-71B, Health Education 90, Art 6A, 8, and 61B, Business 20, and Sociology 135.

### Minor

A *minor in arts and sciences* is offered in *home economics*. The minor consists of 15 to 22 units in home economics, nine units of which must be in courses carrying upper division credit. Lower division requirements: Home Economics 5 or 62 and 10 or 11. Upper division requirements: Home Economics 105 or 100, 150 and 170. Electives may be chosen from Home Economics 1, 55, 61A, 101, 135, and 160A.

A *teaching minor in home economics* is offered for the general secondary, general junior high, and special secondary school credentials. For statement of requirements, refer to these credentials. A student with a minor in home economics may teach home economics in junior high school with a general junior high school credential. Through counseling with the adviser in home economics, a student may so extend the minor in home economics that the special secondary credential in home economics may be obtained with a minimum amount of additional work in the field.

## Lower Division Courses

***1. General Home Arts (3) I, II**
A general education course in family life education. Consideration of necessary preparation for marriage with emphasis on a stable, happy democratic family life family budgets and money management; finding a home to buy, build or rent; child care, proper training and guidance; home safety. Open to men and women.

***5. Foods (3) I**
A general education course in practical arts. Deals with the problems faced in planning meals in which the foods are well cooked and appetizing and serving meals in ways suited to the family situation; safety in the kitchen. Nutrition, economic and management problems are stressed. One lecture and two laboratory sections per week.

***10. Clothing Fundamentals (3) I, II**
A general education course in practical arts. Selection of clothing with self-analysis as a basis; wardrobe planning and buying procedures. Commercial patterns and their adaptation; fitting and construction principles applied to cottons.

**11. Advanced Clothing (3) I**
Fitting and construction processes applied to wool, silk, and synthetics, emphasizing fundamental principles of handling. Prerequisite: Home Economics 10 or equivalent.

**55. Household Equipment (2) I**
Selection, methods of operation and care of household appliances. Equipment of various types used and tested for safety, efficiency and cost of operation. Efficient kitchen arrangement and storage space in relation to the well-being of the family.

**61A. Nutrition (2) II**
Practical problems of nutrition including food requirements, food selection, and food habits. (For men and women.)

**61B. Nutrition Laboratory (1) II**
Nutrition principles applied to food preparation, meal preparation and special diets. Open to prenursing students. One three-hour laboratory section per week.

**62. Food and Nutrition (3) II**
Selection, purchase, and service of meals with a consideration of nutritional needs of family groups, food habits and social customs. Open to all students except prenursing students.

**90. Physiology of Reproduction (1) I, II**
A series of lectures and discussions dealing with normal and abnormal physiology and anatomy of reproduction; facts and frauds in sex hygiene, and related topics. Not open to students with credit for Health Education 90.

## Upper Division Courses

**100. Advanced Clothing Design (Tailoring) (3) II**
Principles of tailoring; planning and construction of coats and suits. Prerequisite: Home Economics 11.

**101. Clothing Selection (3) I**
Aims to develop taste in dress through a better understanding of the relation of art principles, psychology, fashion trends, personality and physical characteristics to individuals. History of costume is studied briefly as an aid in understanding recurring cycles in fashion. A consideration of buymanship information necessary in wardrobe selection to insure satisfaction and economy.

**105. Family Meals (3) II**
This course deals with the planning, preparing, and serving of attractive, well-balanced meals for different income levels, and for various occasions. The student will have responsibility for menu making, food purchasing, and meal management.

**120. Demonstration Methods (1) Irregular**
Class discussions and demonstrations with emphasis upon individual experience in organizing demonstration materials and in acquiring demonstration techniques. Observation and evaluation of professional demonstrations. Prerequisite: Nine units in Home Economics courses.

*** 135. Marriage and the Family** (3) I, II

Preparation for marriage. Prediction scales for evaluating success or failure in marriage. Parent-child relationships; factors in successful and unsuccessful marriages; higher education and the birth rate; married women in industry and professions; desertion and divorce. Not open to students who have credit for Sociology 45 or 135. A general education course in social science or in family life education.

*** 150. Home Management** (3) I, II

A general education course in family life education. Integration of the learning activity around a living situation with emphasis on cooperation and establishment of family goals. Management for more successful use of the resources of time, energy, and money to enrich personal and family life; use of credit, value of insurance and balancing budgets. Open to men and women.

**160A. Merchandise Analysis—Textiles** (2) I

Properties, uses, selection and care of textile fibers and fabrics. The aim is to develop judgment in the evaluation involved in the selection of textiles. (Open to men and women.)

**160B. Merchandise Analysis—Nontextiles** (2) II

Properties, uses, selection and care of metals, glass, rubber, fur, enamels and plastics. (Open to men and women.)

**161. General Textiles** (2) II

Factors involved in fundamental weaves, fabrics, color, and finishes with reference to selection of fabrics for home decoration and clothing. Relationships to durability and cost are emphasized. Open to all students except merchandising majors.

*** 170. Child Care and Development** (3) I

A general education course in family life education. A study of the prenatal and preschool periods of child development; particular emphasis is given to the nutrition and physical development of the young child. Directed observation and participation in the child study laboratory.

**199. Special Study** (1-6) I, II

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## INDUSTRIAL ARTS

### IN THE DIVISION OF PHYSICAL SCIENCES

Courses in industrial arts lead to the following objectives: (1) a major or minor in arts and sciences; (2) a teaching major or minor for several of the teaching credentials; and (3) general education and individual interests. Many of the courses will prove valuable to students desiring practical shop experience on an elective basis.

### Major

A *major in arts and sciences* is offered in *industrial arts.* Requirements in the major are in addition to the 45 units required in general education courses. A minor field is not required.

Specific requirements for the major: Lower division: select five courses from the following: Industrial Arts 21, 31, 51, 61, 71, and 81 (15 units). Art 6A is a prerequisite for certain upper division courses. (Art 6A may be counted toward general education requirements in the area of Literature, Philosophy, and the Arts.) Upper division: A minimum of 25 upper division units to include 10 units in *each* of two of the following areas: industrial drawing, general metalworking, general woodworking, electricity and radio, transportation, or graphic arts; and five units selected from the areas just mentioned, or from handicraft courses, photography courses, or the general shop sequence.

### Minor

A *minor in arts and sciences* is offered in industrial arts. The minor consists of 15 to 22 units in industrial arts, nine units of which must be in courses carrying upper division credit.

A *teaching minor* in industrial arts is offered for the general junior high, special secondary, general elementary, and kindergarten-primary credentials.

## Preparation for Teaching Credentials in Industrial Arts

Although teaching credentials in industrial arts are not currently offered by th College, students planning to complete a teaching major in industrial arts for th special secondary or general secondary credential should follow the major outline above. Students who are admitted to the teacher training program must complete th following professional education courses: Education 184A-184B-184C, 116, 100B-IA and Health Education 151 (22 units). Students planning to enter teacher training ar urged to complete a teaching minor in the undergraduate program. For further information on teaching credentials in industrial arts, consult the Chairman of th Department of Industrial Arts.

### Lower Division Courses

***5. General Education Shop (3) II**

A general education course in practical arts utilizing the tools and materials of the general shop area. Shop activities include individual projects, field trips, and audio-visual materials.

***6. General Education Shop (3) I**

A general education course in practical arts utilizing the tools and materials of the general metalworking area. Shop activities include individual projects, field trips, and audio-visual materials.

**21. Industrial Drawing (3) I, II**

Development of the skills of industrial drawing. Experience in sketching, architectural drafting, mechanical drawing, sheetmetal layout, design, planning, blackboard drawing, mapping and other forms of graphic presentation.

**31. General Metalworking (3) I, II**

Development of the skills of general metal working. Experience in machine shop practice, welding, bench metal, art metal, forge, foundry, and sheetmetal.

**51. General Woodworking (3) I, II**

Development of the skills of general woodworking. Experience in cabinetmaking, woodturning, patternmaking, carpentry, boatbuilding, and finishing.

**61. Electricity and Radio (3) I, II**

Development of the skills for and the understandings of the electricity and radio area. Experience with electrical and radio principles and their application.

**71. Transportation (3) I, II**

Development of the skills of transportation machinery maintenance. Experience in the maintenance of equipment for land, sea and air transportation and an understanding of the mechanical principles involved.

**81. Graphic Arts (3) I, II**

Development of the skills of graphic arts. Experience in hand composition, press work, and other activities such as bookbinding, photography, silk screen, relief and intaglio printing and other duplicating processes. An understanding of the composition of papers and inks.

***85. Introduction to Photography (3) I, II**

A consideration of photographic optics and chemistry; nature of light and image formation; photographic emulsions, exposure and development. Composition and lighting. Two lectures and one three-hour laboratory per week. May be counted toward general education requirements under practical arts, unless used as part of the major in industrial arts.

### Upper Division Courses

**101. Handicrafts for Teachers (2) I, II**

For industrial arts or recreational students who desire to teach handicrafts. Skills in handicrafts are emphasized and directed toward the instructional process. Prerequisites: permission of the instructor and some previous shop experience.

**102. Materials and Techniques for Teaching Handicrafts** (3) I, II
More advanced techniques of handicrafts. Development of audio-visual aids, projects, and resource material for handicrafts. Physical setting, organization, and other pertinent problems. A course of instruction is prepared. Prerequisite: Industrial Arts 101.

**111. General Shop for Teachers** (2) I, II
For industrial arts students who desire to teach general shop. Skill in the general shop is emphasized and directed toward the instructional process. Prerequisites: permission of the instructor and some previous shop experience.

**112. Materials and Techniques for Teaching General Shop** (3) I, II
More advanced techniques for the general shop. Development of audio-visual aids, projects, and resource material for teaching general shop. Physical setting, organization, and other pertinent problems. A course of instruction is prepared. Prerequisite: Industrial Arts 111.

**121. Industrial Drawing** (3) I, II
Further experience in sketching, architectural drafting, mechanical drawing, sheetmetal layout, design, planning, blackboard drawing, mapping, and other forms of graphic presentation. A high level of performance is expected. Prerequisite: Industrial Arts 21.

**122A-122B. Industrial Drawing for Teachers** (2-2) I, II
For industrial arts students who desire to teach industrial drawing. Advanced skills are developed and directed toward the instructional process. In 122A, emphasis is placed on the junior high school program (7th, 8th, 9th grades). In 122B, emphasis is placed on the senior high school program. Prerequisites: Industrial Arts 121 and Art 6A. Industrial Arts 122A is prerequisite for 122B.

**123. Materials and Techniques for Teaching Industrial Drawing** (3) I, II
More advanced techniques of industrial drawing. Development of audio-visual aids, projects, and resource material for industrial drawing. Physical setting, organization, and other pertinent problems. A course of instruction is prepared. Prerequisites: Industrial Arts 122B and Education 184A.

**131. General Metalworking** (3) I, II
Further experience in machine shop practice, welding, bench metal, art metal, forge, foundry, and sheetmetal. A high level of performance is expected. Prerequisite: Industrial Arts 31.

**132A-132B. General Metalworking for Teachers** (2-2) I, II
For industrial arts students who desire to teach metalworking. Advanced skills are developed and directed toward the instructional process. In 132A, emphasis is placed on the junior high school program (7th, 8th, 9th grades). In 132B, emphasis is placed on the senior high school program. Prerequisites: Industrial Arts 131 and Art 6A. Industrial Arts 132A is prerequisite for 132B.

**133. Materials and Techniques for Teaching General Metalworking** (3) I, II
More advanced techniques of metalworking. Development of audio-visual aids, projects and resource material for metalworking. Physical setting, organization and other pertinent problems. A course of instruction is prepared. Prerequisites: Industrial Arts 132B and Education 184A.

**151. General Woodworking** (3) I, II
Further experience in cabinetmaking, woodturning, patternmaking, carpentry, boatbuilding, and finishing. A high level of performance is expected. Prerequisite: Industrial Arts 51.

**152A-152B. General Woodworking for Teachers** (2-2) I, II
For industrial arts students who desire to teach woodworking. Advanced skills are developed and directed toward the instructional process. In 152A, emphasis is placed on the junior high school program (7th, 8th, 9th grades). In 152B, emphasis is placed on the senior high school program. Prerequisites: Industrial Arts 151 and Art 6A. Industrial Arts 152A is prerequisite for 152B.

**153. Materials and Techniques for Teaching General Woodworking** (3) I, II

More advanced techniques of woodworking. Development of audio-visual aids projects, and resource material for woodworking. Physical setting, organization, and other pertinent problems. A course of instruction is prepared. Prerequisites: Industrial Arts 152B and Education 184A.

**161. Electricity and Radio** (3) I, II

Further experience with electrical and radio principles and their applications A high level of performance is expected. Prerequisite: Industrial Arts 61.

**162A-162B. Electricity and Radio for Teachers** (2-2) I, II

For industrial arts students who desire to teach electricity and radio. Advanced skills and understandings are developed and directed toward the instructional process. In 162A, emphasis is placed on the junior high school program (7th, 8th, 9th grades). In 162B, emphasis is placed on the senior high school program. Prerequisites: Industrial Arts 161 and Art 6A. Industrial Arts 162A is prerequisite for 162B.

**163. Materials and Techniques for Teaching Electricity and Radio** (3) I, II

More advanced techniques for electricity and radio. Development of audio-visual aids, projects, and resource material for electricity and radio. Physical setting, organization, and other pertinent problems. A course of instruction is prepared. Prerequisites: Industrial Arts 162B and Education 184A.

**171. Transportation** (3) I, II

Further experience in the maintenance of equipment for land, sea, and air transportation, and development of an understanding of the mechanical principles involved. A high level of performance is expected. Prerequisite: Industrial Arts 71.

**172A-172B. Transportation for Teachers** (2-2) I, II

For industrial arts students who desire to teach transportation machinery maintenance. Advanced skills are developed and directed toward the instructional process. In 172A, emphasis is placed on the junior high school program (7th, 8th, 9th grades). In 172B, emphasis is placed on the senior high school program. Prerequisites: Industrial Arts 171 and Art 6A. Industrial Arts 172A is prerequisite for 172B.

**173. Materials and Techniques for Teaching Transportation** (3) I, II

More advanced techniques of transportation machinery maintenance. Development of audio-visual aids, projects, and resource material for transportation. Physical setting, organization, and other pertinent problems are discussed. A course of instruction is prepared. Prerequisites: Industrial Arts 172B and Education 184A.

**181. Graphic Arts** (3) I, II

Further experience in hand composition, press work, and other activities such as bookbinding, photography, silk screen, relief and intaglio printing, and other duplicating processes. A high level of performance is expected. Prerequisite: Industrial Arts 81.

**182A-182B. Graphic Arts for Teachers** (2-2) I, II

For industrial arts students who desire to teach graphic arts. Advanced skills are developed and directed toward the instructional process. In 182A, emphasis is placed on the junior high school program (7th, 8th, 9th grades). In 182B, emphasis is placed on the senior high school program. Prerequisites: Industrial Arts 181 and Art 6A. Industrial Arts 182A is prerequisite for 182B.

**183. Materials and Techniques for Teaching Graphic Arts** (3) I, II

More advanced techniques of graphic arts. Development of audio-visual aids, projects, and resources material for graphic arts. Physical setting, organization, and other pertinent problems. A course of instruction is prepared. Prerequisites: Industrial Arts 182B and Education 184A.

**185. Photography for Teachers** (3) I

Designed for more mature students to learn photographic skills useful in teaching.

**186. Advanced Photography** (3) II

A consideration of advanced negative control, projection printing techniques, composition and editorial content, architectural and illustrative photography, and flood photoflash techniques. Two lectures and three hours of laboratory per week. Prerequisite: Industrial Arts 85 or equivalent.

**190. Experimental Shop** (1 or 2) I, II
Individual shop work on complex projects on an experimental basis. Prerequisite: Permission of the instructor. May be repeated with permission of the instructor.

**193. Industrial Arts Organization and Management** (2) II
Study of the organization of Industrial Arts in secondary schools, review of project requirements and methods of developing student participation in shop management. Two lectures per week.

**194. Recent Trends in Industrial Arts Education** (2) I
Survey of current trends and practices in the field of Industrial Arts in Secondary Education. There will be opportunity for individual work on related problems of interest to member of the class. Two lectures per week.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## JOURNALISM

### IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in *journalism* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division: Required in the major: Journalism 50, 51A-51B, Business 2A (or equivalent performance in typing), and Speech Arts 81. Required in general education: Physical Science 10. Recommended: Business 27, Economics 1A-1B, English 20 or General Language 20, English 61. Upper division requirements: 24 upper division units in journalism to include Journalism 102 and 151. A minor is not required.

### Minor

A *minor in arts and sciences* is offered in journalism. The minor consists of 15 to 22 units in journalism, nine units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in journalism.

### Lower Division Courses

**50. News and Feature Photography** (2) II
An elementary course designed primarily for students of journalism and public relations; experience with professional photographic equipment and film processing; contact and projection printing; emphasis on composition and news value of pictures. One hour lecture and three hours laboratory.

**51A. Elements of Journalism** (3) I
Theory of news writing; introduction to the newspaper as an institution in modern society. Prerequisites: Sophomore standing and grade of B in freshman composition, or consent of instructor; and Business 2A (may be taken concurrently) or equivalent, with 30-word-per-minute performance.

**51B. News Gathering and Reporting** (3) II
Practice in writing news copy, both for class criticism and for publication in *The Aztec*. Prerequisite: Grade of C or better in Journalism 51A.

**92. Special Projects** (1-3) I, II
Special work in journalism by arrangement with instructor. Work on *The Aztec*, yearbook, other publications, with consent of instructor. Laboratory periods required. Total credit that may be earned in Special Project work limited to eight units.

### Upper Division Courses

**101. Interpretative Writing** (3) II
Practice in gathering material and writing articles for specialized areas, with emphasis on the business press. Production of eight articles and marketing of at least one article required. Prerequisite: junior standing and permission of instructor.

**102. Law of the Press** (3) II

Understanding of the law as it affects the privileges and defines the duties and responsibilities of the press. Problems of constitutional law, libel, privacy, and postal regulations pertinent to the press, with emphasis on the covering of public affairs.

**103. Picture Editing** (1) II

Editorial problems of newspaper and magazine illustration; picture selection, cropping, captioning, layout; the picture story; use of charts, diagrams, cartoons, maps; picture sources. Students will receive credit for work on the student publications.

**106. Creative Writing** (3) I

A writing workshop in which students are given opportunity to criticize each other's work. Emphasis on narrative and description, but freedom to pursue whatever writing forms may interest the student most. May be taken a second time with new material. Not open to students with credit for English 106.

**122. Public Opinion Measurement** (3) II

The history, methods, and problems of public opinion and attitude measurement. Emphasis will be placed upon the polling of consumers and voters. Students will be given field experience. Not open to students with credit for Psychology 122.

**132. Propaganda and Public Opinion** (3) II

A study of the forces which mold the American public mind, the practice of propaganda, a description and analysis of public relations, pressure groups and their effect in American public life. Not open to students with credit for Political Science 122.

**142. State Government** (3) II

A study of the political structure and its operation used in the carrying on of the functions exercised by the states; state-federal relations; state-local government relations; particular emphasis on California government. This course meets the graduation requirement in California state and local government. Not open to students with credit for Political Science 142.

**143. Municipal and County Government** (3) I

A study of the organization and its operation used to carry into effect the functions assigned to local governmental units; particular emphasis upon local government in California. This course meets the graduation requirement in California state and local government. Not open to students with credit for Political Science 143.

**151. Advanced Editing and Reporting Techniques** (3) I

Editing copy, writing headlines, making up pages, handling telegraph copy. Practice in specialized forms of journalistic writing. Laboratory periods required. Prerequisite: Journalism 51A-51B.

**152. High School Journalism** (3) II

Methods of conducting high school journalism classes. Editorial, business and mechanical aspects of school publication work, with emphasis on copy editing, headline writing and layout. Not open to journalism majors. Prerequisite: grade of C or better in Journalism 51A and approval of instructor.

**162. Magazine Fiction** (3) I

Coaching in constructing and writing short stories for commercial publications. Admission with consent of instructor. Not open to students with credit for English 162.

**166. Honors Course** (Credit to be arranged) I, II

Special study open to members of the Honors Program in journalism. Refer to the Honors Program.

**180. Public Relations** (3) I

Principles, methods, and objectives in the field of public relations; evaluation of the "publics" of institutions and industry; case studies of public relations problems. Prerequisites: Journalism 51A-51B, or permission of the instructor. Not open to students with credit for Business 180.

**3. Radio Continuity and News Writing** (3) II
Correlates news editing and writing with announcing styles. Radio news pro-
dure and organization of a radio news staff; analysis of repertorial and commentary
yles. Includes production techniques of "on-the-spot" and multiple point pickup
oadcasts. Registration with consent of the instructor. Not open to students with
edit for Speech Arts 183.

**5. Advertising Copy and Layout** (2) I
Introduction to principles and techniques of copy writing; types of copy; prepa-
ation of layouts; mechanical methods employed by the artist, engraver and printer;
gislation and regulations affecting advertising claims. Prerequisite: Business 27, or
nsent of instructor. Not open to students with credit for Business 185.

**1A-191B. Applied Journalism** (1-3) (1-3) I, II
A special course in which students work in the San Diego area on magazines,
ty and county newspapers, and on public relations, publicity, and advertising staffs
local, civic and business groups. Prerequisites: Journalism 51A-51B and permission
instructor.

**2. Special Projects** (1-3) I, II
Special work in journalism by arrangement with instructor. Work on *The Aztec*,
earbook and other publications, with consent of instructor. Laboratory periods re-
uired. Total credit that may be earned in Special Project work limited to eight units.

**9. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of in-
ructor.

## LANGUAGE ARTS

### IN THE DIVISION OF LANGUAGES AND LITERATURE

#### Major

A *language arts major in arts and sciences* is offered for the A.B. degree to
udents who have been admitted to the general secondary credential program in
acher education and provided that a minimum of eight units in professional education
urses be completed by date of degree candidacy. Requirements for the major are in
ddition to 45 units in general education courses. A minor selected from an appropriate
aching minor for the general secondary credential is required of students taking this
ajor. A minimum of 15 units in this minor, six units of which must be in upper
ivision courses, must be completed for the A.B. degree. The additional units required
r the credential may be completed either in undergraduate or postgraduate work.

Lower division requirements for the major: Six units selected from English
0A-50B, or 52A-52B, or 60A-60B (or two upper division courses may be substituted,
election to be made from English 116A-116B, or 118A-118B, or 119A-119B, or 120A-
20B, or 126A-126B, or 143A-143B); Journalism 51A; Speech Arts 60A, or 60B, or
5A, or 55B; Speech Arts 81. Upper division requirements: 27 units to include the
ollowing courses: English 192; English 106 or 191; English 131, or 132, or 133, or
34; English 117A, or 117B, or 152A, or 152B; Journalism 152; Speech Arts 108,
59, and 176; Speech Arts 191, or 192A, or 192B. If lower division English sequence
taken in American Literature, the upper division course work in literature should
e taken in other areas.

A *teaching major in language arts* is offered for the general secondary school
redential. For a statement of requirements, refer to this credential.

*Minor* work is not offered in language arts.

## LATIN

### IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* or *minor* work is not offered in Latin.

#### Lower Division Courses

**1. Elementary** (3) I, II (Not offered in 1953-54)
Study of the Latin language and Roman culture, with reading of selected prose
assages.

***2. Elementary** (3) I, II (Not offered in 1953-54)
Continuation of Latin 1. Prerequisite: Latin 1 or one year of high school Lati

***3. Intermediate** (3) I (Not offered in 1953-54)
Reading of selected passages emphasizing the contribution of the ancient cultu to our own. Prerequisite: Latin 2 or two years of high school Latin.

***4. Intermediate** (3) II (Not offered in 1953-54)
Continuation of Latin 3. Prerequisite: Latin 3 or three years of high scho Latin.

## LIBRARY SCIENCE

### IN THE DIVISION OF SOCIAL SCIENCES

*Major* or *minor* work is not offered in library science.

### Lower Division Courses

***10. Use of the Library** (2) I, II
The chief object is to give a working knowledge of some of the resources of th library which every teacher and student should understand—the decimal classific tion, the card catalog, periodical indexes, and the most important reference book together with some instruction in the preparation of bibliographies. The course wi be a requirement of those students added to the library's staff of student assistant although it will not prepare the student to become a librarian. A general educatio course in practical arts.

## LIFE SCIENCE

### IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in *life science* for the A.B. degree. Course in the major are in addition to 45 units in general education courses. Lower divisio requirements: Zoology 1A-1B or Biology 3 and 4; Zoology 20 or Physiology 1A Botany 2A-2B or 1 or Bacteriology 1; Chemistry 1A-1B or 2A-2B; Physics 2A-2B Upper division requirements: A minimum of 24 upper division units in zoology bacteriology and botany of which six units may be from a related field. The plan fo this major must be with the approval of the Chairman of the Division of Life Sciences A minor is not required of students majoring in life science.

A *major in arts and sciences* is offered in *life science* for the B.S. degree. Course in the major are in addition to 45 units in general education courses. Lower divisio requirements: Bacteriology 1 or 101, Botany 2A-2B, Zoology 1A-1B, Chemistr 1A-1B or 2A-2B, Physics 2A-2B. Upper division requirements: 36 upper divisio units in zoology, bacteriology and botany or 27 units in these fields with nine unit in a related field. The plan for this major must be with the approval of the Chairma of the Division of Life Sciences. A minor is not required of students majoring in lif science.

Note: Twelve units in natural science courses in the major for the A.B. o B.S. degree may be applied toward requirements in general education natural scienc courses.

A *teaching major in life science and general science* is offered for the genera secondary school credential and a *teaching major in general science* is offered for th general junior high school credential. For statement of requirements, refer to thes credentials.

### Minor

A *minor in arts and sciences* is offered in *life science*. The minor consists of 15 t 22 units in life science to include Biology 3 and 4, or the equivalent, and a minimum o nine units in courses carrying upper division credit selected with approval of th chairman of the division.

A *teaching minor in life science and general science* is offered for the genera secondary, special secondary, general elementary, and kindergarten-primary credentials For statement of requirements, refer to these credentials.

# MATHEMATICS

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in *mathematics* for the A.B. degree. Courses the major are in addition to 45 units in general education courses. Lower division equirements: Mathematics 1, or equivalent (unless exempted by examination); Mathmatics 3A-3B and 4A. Recommended: Business 2, Engineering 1A, 21; Physics A-4B or Physics 2A-2B, 3A-3B. A reading knowledge of French or German is desirble. Upper division requirements: A minimum of 24 upper division units in matheatics to include Mathematics 117 (unless taken as Mathematics 4B in the lower ivision); 111, 119, 121, and either 105 or 106. Six units of the remaining nine units ay be selected from upper division courses in related areas with the approval of the epartment. A minor is not required, but is recommended.

A *teaching major* is offered in mathematics for the general junior high school redential and for the general secondary credential. For specific information, refer to e outline of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in *mathematics*. The minor consists of 5 to 22 units in mathematics, six units of which must be in courses carrying upper ivision credit. Courses should be selected in consultation with the departmental epresentative.

A *teaching minor* is offered in mathematics for the general secondary, the special econdary, the general elementary, and the kindergarten-primary credentials. For pecific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**Basic Mathematics** (3) I, II

Fundamentals of mathematics with applications to everyday problems. Required f all students failing the competency examination in mathematics. Not open for credit students passing this examination. May not be used in the major or minor.

**Elementary Algebra** (3) I, II

Fundamentals of algebra. Not open for credit to students who have credit for one ear of high school algebra.

**B. Plane Geometry** (3) I, II

Fundamentals of plane geometry. Not open for credit to students who have credit or one year of high school geometry. May be counted toward general education in athematics.

**Intermediate Algebra** (3) I, II

An extensive review of elementary algebra followed by quadratic equations, imultaneous equations, ratio and proportion, variation, progressions, etc. Prerequiite: Elementary algebra and geometry or Mathematics A-B. Not open for credit to tudents who have completed two years of high school algebra.

**Trigonometry** (3) I, II

Plane trigonometry with special attention to logarithms and those aspects needed n analytic geometry and the calculus. Prerequisite: Mathematics C or its equivalent. ot open for credit to students who have completed one year of high school trigoometry.

**Solid Geometry** (2) II

Properties of lines and planes. Calculation of areas and volumes. Prerequisite: athematics C or its equivalent. Not open for credit to students who have completed ne year of solid geometry in high school.

**G. Mathematics for General Education** (3) I, II

Basic concepts of arithmetic, algebra, and geometry with applications. Recomended for students whose scores on the competency examination, while exempting hem from Mathematics X, indicate a need for further training in mathematics. A eneral education course in mathematics. May not be used in the major or minor.

**S. Slide Rule (1) I, II**
Theory and use of the slide rule. Practice in performing the fundamental operations of arithmetic. Some attention is given to more involved computations. Prerequ site: Trigonometry or Mathematics A-B or equivalents.

**1. Algebra and Trigonometry (3) II**
Review of algebra and trigonometry. Further study of identities, graphs, solution of algebraic and trigonometric equations, determinants, and mathematical proofs Prerequisite: Two years of high school algebra and trigonometry.

**3A. Analytic Geometry (3) I, II**
Equations and loci, conic sections, coordinate transformations, Cartesian an polar coordinates, and parametric representation. Prerequisite: Mathematics 1; o trigonometry and passing of qualifying examination. (Qualifying examination will b given prior to registration.)

**3B. First Course in Calculus (3) I, II**
Introduction to differential and integral calculus with applications. Prerequisite Mathematics 3A, with a grade of C or better.

**4A. Second Course in Calculus (3) I, II**
Differentiation, integration, infinite series, and applications. Prerequisite Mathematics 3B, with a grade of C or better.

**4B. Third Course in Calculus (3) I, II**
Partial differentiation, successive integration and applications. Prerequisite Mathematics 4A, with a grade of C or better. (Solid geometry is recommended.) No open to students with credit for Math. 117.

***7A. Mathematical Analysis (3) I**
Designed for students who do not intend to prepare for a professional career i physical science or in engineering. Consideration is given to the processes and applications of algebra and trigonometry. Prerequisite: High school algebra and plane geom erty. Students with credit for Mathematics 1 will not receive credit for Mathematic 7A. This course may be counted toward general education in mathematics.

***7B. Mathematical Analysis (3) II**
A continuation of Mathematics 7A including the concepts and applications o analytic geometry and an introduction to the calculus. Prerequisite: Mathematics 7A Students with credit for Mathematics 3B will not receive credit for Mathematics 7B This course may be counted toward general education in mathematics.

### Upper Division Courses

***104. History of Mathematics (3) II**
History of mathematics down to early modern times. This course may be counted toward general education in mathematics.

**105. College Geometry (3) I**
A synthetic treatment of the points and lines associated with triangles and quadrilaterals, similarity, inversion, ruler and compass construction, etc. Highly recommended for all teachers of high school geometry. Prerequisite: Mathematics 3B or 7B.

**106. Projective Geometry (3) I**
Concurrence of lines, collinearity of points and other properties of figures not altered by projections; construction and study of ellipses, hyperbolas, and parabolas by means of projections. Prerequisites: Mathematics 3B or 7B and permission of instructor.

**111. Theory of Algebraic Equations (3) I, II**
Determinants, complex numbers, and theory of algebraic equations. Prerequisite: Mathematics 3B or 7B.

**112. Analytic Geometry of Space (3) II**
The coordinate systems in space; lines, planes, and quadric surfaces; applications. Prerequisite: Mathematics 4A.

**17. Intermediate Calculus** (3) I, II
Essentially the same as Mathematics 4B. Additional special work for advanced udents may be assigned. Prerequisite: Mathematics 4A, with a grade of C or better. ot open for credit to students with credit for Math. 4B.

**18A. Advanced Mathematics for Engineering Students** (3) I
Introduction to differential equations, vector analysis, Fourier series, hyperbolic, lliptic, and Bessel functions. Prerequisite: Mathematics 117 or its equivalent.

**18B. Advanced Mathematics for Engineering Students** (3) I
Introduction to partial differentiation, partial differential equations, line and urface integrals, complex variables, etc. Prerequisite: Mathematics 118A.

**19. Differential Equations** (3) I, II
Ordinary differential equations with applications to geometry, physics, and chemtry. Prerequisite: Mathematics 117 or its equivalent.

**21. Advanced Calculus** (3) II
Review of the fundamental concepts of the calculus, partial differentiation, series, ne and surface integrals, etc. Prerequisite: Mathematics 118A or Mathematics 119.

**24. Vector Analysis** (3) I
Vector algebra, differentiation of vectors, gradient, divergence, and curl. Applicaons to geometry and physics. Prerequisite: Mathematics 4B or 117.

**40A. Mathematical Statistics** (3) I
Graphical and arithmetical characterization of observed frequency distributions, oments, use of normal curve, curve fitting, correlation, etc. Prerequisite: Matheatics 4B or 117.

**40B. Mathematical Statistics** (3) II
Theoretical discrete and continuous distributions, multiple and partial correlaion, large and small sample theory including student's T, Chi-square, and the F distriutions with applications. Prerequisite: Mathematics 140A.

**66. Honors Course** (Credit to be arranged) I, II Refer to the Honors Program.

**99. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of nstructor.

## Graduate Courses

**01. Concepts of Geometry From an Advanced Viewpoint** (2) I
An introduction to the fundamental concepts of geometry and the processes of athematical thinking in this area. Recommended for candidates for the general econdary credential. Prerequisite: One upper division course in geometry.

**02. Concepts of Algebra From an Advanced Viewpoint** (2) II
An introduction to the fundamental concepts of algebra and the processes of athematical thinking in this area. Recommended for candidates for the general econdary credential. Prerequisite: One upper division course in algebra.

**04. Advanced Work in the History of Mathematics** (2) I
Intensive study of specific phases of the history of mathematics with attention o implications for teaching mathematics. Prerequisite: Mathematics 104.

**24. Functions of a Complex Variable** (3) I
Operations on complex numbers, limits, convergence, continuity, differentiation, ntegration, Cauchy's Theorem, power series, elementary functions, etc. Prerequisite: athematics 118A or 119 and consent of the instructor.

**90. Bibliography** (1) I, II
Exercises in the use of basic reference books, journals, and specialized biblioraphies, preparatory to the writing of a master's project or thesis.

**98. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of nstructor.

**99. Thesis or Project** (3) I, II
Guidance in the preparation of a project or thesis for the master's degree.

# MUSIC

## IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is offered in *music* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses, except that nine units of music activity courses may be counted toward general education requirements in the area of literature, philosophy, and the arts. Students majoring in music are not required to complete a minor. Several plans of study are available with varying degrees of emphasis on performance, history and literature, creative activity, and teaching.

The music curricula are designed to fulfill the needs of all students: (1) Those who have professional ambitions in musical performance, or seek a foundation for graduate study leading to college or university teaching, (2) those who are preparing for one of the several state teaching credentials with music as either a major or minor (3) those whose major professional interest is in another department and are seeking musical study as a minor, and (4) those who are interested in music as an elective study area for the enrichment of their cultural background.

## GENERAL BASIC REQUIREMENTS

General basic requirements for the A.B. degree with a major in music (not the credential) are as follows:

1. Demonstration of proficiency in vocal or instrumental *performance* comparable to a level of difficulty of the Bach two-part inventions or the easier Haydn sonatas for the piano before admission to the major may be granted.
2. Selection of a major instrument or of voice before admission to the major program and demonstration of *performance ability* developed through class or individual instruction after admission to the program.
3. Appearance as a soloist in at least one student recital during each semester in residence, after completion of two semesters of college work.
4. Competence in elementary keyboard technique (the student's attention is directed to the prerequisites for certain courses and to the Music 10A-B-C-D requirement).
5. As laboratory experience participation in at least one activity each semester. (Students planning to enter the teacher training program are referred to the activity requirements for the Special Secondary Credential in Music listed in the section of the catalog under Professional Curricula in Teacher Education.)

## SPECIFIC REQUIREMENTS FOR THE MUSIC MAJOR

### (Not the teaching credential)

Music majors must complete the specific requirements listed below and in addition complete the requirements in one of the following fields of emphasis: (1) Performance, (2) Music History and Literature, (3) Creative Activity. Students desiring the Special Secondary Credential in Music should refer to this credential for specific requirements. Students are required to consult with the chairman of the Department of Music for selection of the field of emphasis.

Specific requirements for all majors (except for the Special Secondary Credential): Lower division: Music 9A-9B, 10A-10B-10C-10D (may be omitted in part or in full upon evidence of satisfactory piano technique); 52A-52B, 59A-59B; and six units of music activity courses selected from courses numbered 70 to 87. (Total: 28 lower division units.) Students electing performance as the field of emphasis must complete four additional lower division units from courses in their major instrument.

Upper division requirements: Music 107, 109A, 146A-146B-146C; four units selected from 102A-102B, 103A-103B; five units of music activity courses selected from courses numbered 170 to 187 (see activity requirement above); four units of the major instrument courses selected from 111, 112, 116, 117, 121, 122, 126, 127, 131, 132, or 150A-150B-150C-150D; and the additional upper division requirements in one of the following fields of emphasis: (Total: 25-27 units).

*Performance:* Four units selected from Music 109B and 199. Students emphasizing performance must appear in a joint public recital during the junior year and must present an entire solo public recital during the senior year. The student must pass a preliminary audition of the compositions to be performed at the public recital before the music faculty during the semester preceding the recital appearance.

*Music History and Literature:* Six units selected from Music 109B and 199. uring his senior year, the student emphasizing history and literature is required to ·ganize, prepare program notes and present two recitals consisting of recorded or ive" performances each of which will deal with representative works of a certain eriod or composer or with certain periods, composers, works or styles to be compared; ich students must pass a preliminary audition of the material to be presented before ie music faculty at least one month in advance of each performance.

*Creative Activity and Composition:* Six units selected from Music 109B and 199. he student emphasizing creative activity and composition is required to present a ncert of his compositions during the senior year and present the scores of works to performed to the music faculty one month in advance of the performance.

### Minor

A ***minor in arts and sciences*** **is offered in** ***music.*** **General basic requirements for** e minor are as follows: (1) Demonstration of vocal or instrumental performing ility before admission to the minor program may be granted; (2) as laboratory perience participation in one music activity each semester for seven semesters. (In ecial cases this requirement may be waived by the chairman of the Music Depart- ent.) Lower division: Music 9A, 10A-10B-10C-10D; six units selected from 9B, A-52B, and 59A; and four units of music activity courses selected from courses umbered 70 to 87. Upper division: Six units selected from Music 102A-102B and 3A-103B; and three units of music activity courses selected from courses numbered 0 to 187.

## THE SPECIAL SECONDARY CREDENTIAL IN MUSIC

**A** ***teaching major in music*** **is offered for the special secondary credential and r the general secondary credential. For statement of requirements, refer to these edentials.**

## ELECTIVES IN MUSIC

**The Music Department offers certain courses which fulfill the needs of students ho do not have music as a major or minor subject but who are interested in music an elective study area for the enrichment of their cultural background. Courses articularly suited to these needs are Aesthetics 2 and 102 and the music courses umbered 70 to 88 and from 170 to 188; such courses are designated as general edu- tion courses and may be taken as partial fulfillment of the Literature, Philosophy, nd the Arts requirement in general education.**

**Some students will be musically prepared to elect courses in music which may may not be included in the general education group. Enrollment by qualified stu- ents who wish to elect these courses is encouraged.**

### Lower Division Courses

**. Music Fundamentals** (3) I, II

Basic sight singing, keyboard playing, writing and aural recognition of scales, tervals, triads, and basic rhythms. Students lacking keyboard facility must enroll ncurrently for piano study. Designed for students not qualified to enter Music 9A. ot counted as part of the music major or minor. (Formerly Music 8A.)

**7A. Musicianship—For General Elementary Teachers** (3) I, II

**Elementary music theory and skills including notation, meter, rhythm, scales,** tervals, triads, sight singing, ear training, dictation, elementary keyboard facility **nd other rudiments. State adopted elementary music texts used. A general elementary** edential requirement. Open only to candidates for the general elementary credential.

**3. Music Materials for the Elementary School** (3) I, II

**Study of all phases of elementary school music: Singing, listening, reading, eative music, instruments, repertoire of songs and records, music projects. Required all general elementary credential candidates. Prerequisite: Music 7A or consent instructor.**

**A. Elementary Harmony** (3) I, II

Diatonic usage studied through written exercises, keyboard harmony, analysis, ctation, and sight singing. Prerequisites: demonstrated competency in music funda- entals, or Music X; ability to play Bach chorales at the keyboard. (Formerly usic 8B.)

**9B. Intermediate Harmony and Two-part Counterpart** (3) I, II

Continuation of Music 9A including simple harmonic alteration. Strict specie counterpoint in two parts. Prerequisite: Music 9A. (Formerly Music 58A.)

*** 10A-10B. Piano—Elementary Class Instruction** (1-1) I, II

Fundamental playing and reading techniques for the pianoforte. Emphasis upo playing by ear, and the development of interpretative ability. Music majors or minor are required to start these courses on admission unless competence of 10D level is dem onstrated.

**10C-10D. Piano—Elementary Class Instruction** (1-1) I, II

Continuation of Music 10A-10B.

**11ABCD. Piano—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactor audition before the instructor is required for admission.

**15A. Voice—Elementary Class Instruction** (1) I, II

A class for beginners in the vocal field taking up the problems of breath contro tone placement, articulation and enunciation. Frequent classroom performance o simple songs.

**15B. Class Voice—Continuation First Semester Voice** (1) I, II

Study of more advanced songs with attention being given to interpretation, a well as continued work on tone, articulation and placement. Frequent performanc before class required. Prerequisite: Music 15A or equivalent.

**16ABCD. Voice—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactor audition before the instructor is required for admission.

**20AB. Strings—Elementary Class Instruction** (1-1) I, II

Open to all students but primarily for those whose major instrument is not on of the stringed instruments and who are preparing for a teaching credential in music Not open to students with credit for Music 120A-120B.

**21ABCD. Strings—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission. Sections are offered in violin viola, cello, bass.

**25AB. Woodwinds—Elementary Class Instruction** (1-1) I, II

Open to all students but primarily for those whose major instrument is not on of the woodwind instruments and who are preparing for a teaching credential in music Not open to students with credit for Music 125A-125B.

**26ABCD. Woodwinds—Intermediate Class Instruction** .(1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission. Sections are offered in flute, oboe, clarinet, and bassoon.

**30AB. Brass—Elementary Class Instruction** (1-1) I, II

Open to all students but primarily for those whose major instrument is not one of the brass instruments and who are preparing for a teaching credential in music. Not open to students with credit for Music 130A-130B.

**31ABCD. Brass—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission. Sections are offered in horn, trumpet, trombone, tuba, and baritone.

**35. Percussion—Elementary Class Instruction** (1) I, II

Open to all students but primarily for those who are preparing for a teaching credential in music. Not open to students with credit for Music 135.

**ABCD. Intermediate Individual Study** (1-1-1-1) I, II

For the teaching credential performance requirement or for the requirements the major emphasis curricula leading to the A.B. degree with a major in music. e explanation below for conditions under which credit may be given for music udy under private instructors.

Piano
Organ
Voice
Flute
Oboe
Clarinet
Saxophone
Bassoon
French Horn
Trumpet
Trombone
Baritone Horn
Tuba
Percussion
Violin
Viola
Cello
Contrabass

**A-52B. History of Music** (3-3) Year, I

Detailed study of chronological development of musical art and forms from the iddle Ages to the present. Analytical score study and assigned recordings. Familiarity ith musicalogical resources through individual assignments. Prerequisite: Music X, equivalent, and permission of instructor. (Formerly Music 101A-101B.)

**. Opera Technique** (2) I, II

Training in the interpretation and characterization of light and grand opera. pecific work in coordination of operatic ensemble. Formerly Music 31.

**A. Advanced Harmony and Three-part Counterpoint** (3) II

Chromatic alteration with emphasis on analysis of 19th century chromatic usage d construction of examples in corresponding idioms. Strict species counterpoint in ree parts. Prerequisite: Music 9B. (Formerly Music 58B.)

**B. Twentieth Century Harmonic Practice and Four-part Counterpoint** (3) I

Study of harmonic usages and trends since Debussy. Strict species counterpoint four parts. Prerequisite: Music 59A. (Formerly Music 108A.)

## ACTIVITY COURSES

The activity courses are devoted to the study in detail and the public performance a wide range of representative literature for each type of ensemble and to provide udents with practical experience in rehearsal techniques.

**70A-70B. Chamber Music** (1-1) I, II

Sections for string, woodwind, brass, piano, and mixed ensemble groups. Perission of the instructor required.

**C-70D. Chamber Music** (1-1) I, II

Continuation of Music 70A-70B.

**A. Beginning Instrumental Ensemble** (½) I, II

Open to all instrumental students. Group performance of simple orchestral and nd scores. Prerequisite: Music 20A, 25A, 30A, or equivalents, one or more.

**B. Intermediate Instrumental Ensemble** (½) I, II

Group performance of orchestral and band scores of more advanced grade. aterials covered will prepare the student for minor parts in either the symphony rchestra or the symphony band. Prerequisites: Music 72A or equivalent.

**75ABCD. Symphony and Marching Band** (2-2-2-2) I, II

Permission of the instructor required.

**80ABCD. Symphony Orchestra** (1-1-1-1) I, II

Permission of the instructor required.

**85ABCD. Chorus** (1-1-1-1) I, II

Permission of the instructor required.

**86ABCD. Treble Clef** (1-1-1-1) I, II

Permission of the instructor required.

**87ABCD. Men's Glee Club** (1-1-1-1) I, II

Permission of the instructor required.

***88ABCD. Workshop Chorus** (½-½-½-½) I, II

Open to students who do not have music as a major or minor field and who a interested in singing standard choral works. No entrance examination required. D signed for nonmusic majors and minors.

## Upper Division Courses

(For description of courses in the field of music appreciation, see Aesthetics)

**102A. Chamber Music Literature** (2) I

Instrumental ensemble repertoire, including all ensemble combinations fro 16th to 20th centuries. Analysis by use of scores and recordings. Prerequisite: Mus 52A-52B.

**102B. Keyboard Literature** (2) II

Piano, organ, and other clavier literature from the 16th to 20th centurie Recordings, scores, and guest performers. Prerequisite: Music 52A-52B.

**103A. Symphonic Literature** (2) I

A study of the symphony and symphonic poem; the evolution of their growth an analysis with scores of the structure, harmonic content, and instrumentation c representative works of each period; an examination of their meaning and place in th history of music. Prerequisite: Music 52A-52B.

**103B. Song Literature** (2) II

Historical and musical development of the art song and of the folk song. Work of representative European and American composers in these media. Recordings an scores. Prerequisite: Music 52A-52B.

**106A. Counterpoint** (2) I

Study of the five species of counterpoint with much practice in writing in suc forms. Application of contrapuntal style to modern composition. Prerequisite Music 9B.

**106B. Counterpoint** (2) II

Species counterpoint in four parts. Analysis of contrapuntal usage in musica composition. Continuation of Music 106A. Prerequisite: Music 106A.

**107. Strict Composition** (3) II

Problems of composition in the shorter forms. Prerequisite: Music 59B. (Formerly Music 108B.)

**109A-109B. Instrumentation and Arranging** (2-2) Year, 1

Arranging of music for full orchestra. Selected works of students to be performed by standard orchestras. Prerequisites: Music 59B; 109A for 109B.

**111ABCD. Piano—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studies in detail. Satisfactory audition before the instructor is required for admission.

**112ABCD. Piano—Advanced Class Instruction** (1-1-1-1) I, II

Materials and techniques of the advanced level are studied in detail. Satisfactory audition before the instructor required for admission.

**116ABCD. Voice—Intermediate Class Instruction** (1-1-1-1) I, II

Materials and techniques of intermediate level are studied in detail. Satisfactory audition before the instructor is required for admission.

**117ABCD. Voice—Advanced Voice Instruction** (1-1-1-1) I, II

Materials and techniques of advanced level are studied in detail. Satisfactory audition before the instructor is required for admission.

**120A-120B. Strings—Elementary Class Instruction** (1-1) I, II

Open to all students but primarily for those whose major instrument is not one of the stringed instruments and who are preparing for a teaching credential in music. Not open to students with credit for Music 20A-20B.

**21ABCD. Strings—Intermediate Class Instruction** (1-1-1-1) I, II
Materials and techniques of intermediate level are studied in detail. Satisfacory audition before the instructor is required for admission. Sections are offered violin, viola, cello, and bass.

**22ABCD. Strings—Advanced Class Instruction** (1-1-1-1) I, II
Repertoire includes study of standard orchestral parts, solos, sonatas, suites and ncerti. Satisfactory auditions before the instructor are required for admission. Secons are offered in violin, viola, cello, and bass.

**25A-125B. Woodwinds—Elementary Class Instruction** (1-1) I, II
Open to all students but primarily for those whose major instrument is not one the woodwind instruments and who are preparing for a teaching credential in usic. Not open to students with credit for Music 25A-25B.

**26ABCD. Woodwinds—Intermediate Class Instruction** (1-1-1-1) I, II
Materials and techniques of intermediate level are studied in detail. Satisfacory audition before the instructor is required for admission. Sections are offered in ute, oboe, clarinet, and bassoon.

**27ABCD. Woodwinds—Advanced Class Instruction** (1-1-1-1) I, II
Repertoire includes study of standard orchestral parts, solos, sonatas, suites and oncerti. Satisfactory auditions before the instructor are required for admission. Secions are offered in flute, oboe, clarinet, and bassoon.

**30A-130B. Brass—Elementary Class Instruction** (1-1) I, II
Open to all students but primarily for those whose major instrument is not one f the brass instruments and who are preparing for a teaching credential in music. ot open to students with credit for Music 30A-30B.

**31ABCD. Brass—Intermediate Class Instruction** (1-1-1-1) I, II
Materials and techniques of intermediate level are studied in detail. Satisfacory audition before the instructor is required for admission. Sections are offered in orn, trumpet, trombone, tuba, and baritone.

**32ABCD. Brass—Advanced Class Instruction** (1-1-1-1) I, II
Repertoire includes study of standard orchestral parts, solos, sonatas, suites and oncerti. Satisfactory auditions before the instructor are required for admission. Secions are offered in horn, trumpet, trombone, tuba, and baritone.

**35. Percussion—Elementary Class Instruction** (1) I, II
Open to all students but primarily for those who are preparing for a teaching redential in music. Not open to students with credit for Music 35.

**41. Methods in Teaching Piano** (3) Summer
Teaching of beginning and intermediate piano. Survey of materials available or child and adult classes. Special consideration of the problems of the adult beginner. upervised teaching of beginning students in individual lessons and class groups.

**42. Survey of Harmony and Musical Form** (2) (Irregular)
A review of diatonic and chromatic harmony, modulation and musical form. The aterial covered will serve as refresher study for the Colleague Examination under he California Plan of the Music Teachers Association of California. Not open to usic majors or minors.

**46A. Fundamentals of Conducting** (1) I
Elements of baton technique and development of basic skills common to choral nd instrumental conducting.

**146B. Instrumental Conducting** (1) II
Study of orchestra and band scores of graduated levels of advancement. The lass will prepare and conduct instrumental works in public performances. Prerequisite: Music 146A.

**146C. Choral Conducting** (1) I
Representative literature and techniques for choral organizations will be studied and performed. Practical experience in typical conducting situations will be emphasized in various grade levels. Prerequisite: Music 146A.

**150ABCD. Advanced Individual Study** (1-1-1-1) I, II
For the teaching credential performance requirement or for the requiremen of the major emphasis curricula leading to the A.B. degree with a major in mus See explanation below for conditions under which credit may be given for music stu under private instructors.

- Piano
- Organ
- Voice
- Flute
- Oboe
- Clarinet
- Saxophone
- Bassoon
- French horn
- Trumpet
- Trombone
- Baritone horn
- Tuba
- Percussion
- Violin
- Viola
- Cello
- Contrabass

**153. Opera Technique** (2) I, II
Training in interpretation and characterization of light and grand opera. Sp cific work in coordination of opera ensemble.

**166. Honors Course** I, II (Credit to be arranged)
To be arranged after consultation with the chairman of the department. Ref to the Honors Program.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of d partment chairman.

## ACTIVITY COURSES

The activity courses are devoted to the study in detail and the public perforn ance of a wide range of representative literature for each type of ensemble and t provide students with practical experience in rehearsal techniques.

*** 170A-170B. Chamber Music** (1-1) I, II
Sections for string, woodwind, brass and piano ensemble groups. Permission c the instructor required.

**170C-170D. Chamber Music** (1-1) I, II
Continuation of Music 170A-170B.

**172A. Beginning Instrumental Ensemble** (½) I, II
Open to all instrumental students. Group performance of simple orchestral part and band scores. Prerequisites: Music 20A, 25A, 30A, or equivalents, one or more

**172B. Intermediate Instrumental Ensemble** (½) I, II
Group performance of orchestral and band scores of more advanced grade. Mate rials covered will prepare the student for minor parts in either the symphony orchestr or the symphony band. Prerequisites: Music 172A or equivalent.

*** 175ABCD. Symphony and Marching Band** (2-2-2-2) I, II
Permission of the instructor required.

*** 180ABCD. Symphony Orchestra** (1-1-1-1) I, II
Permission of the instructor required.

*** 185ABCD. Chorus** (1-1-1-1) I, II
Permission of the instructor required.

*** 186ABCD. Treble Clef** (1-1-1-1) I, II
Permission of the instructor required.

*** 187ABCD. Men's Glee Club** (1-1-1-1)
Permission of the instructor required.

*** 188ABCD. Workshop Chorus** (½-½-½-½) I, II
Open to students who do not have music as a major or minor field and who are interested in singing standard choral works. No entrance examination required. Closed to music majors and minors.

### Graduate Courses

**0A-200B. Special Problems in Music** (2-2) Year, I, II
A graduate course in which students may carry out projects in various fields of usic under the direction of faculty members who are specialists in the field chosen. tudents registering for this course must apply for work within a certain field after nference with the music faculty.

**3A-203B. Musicology** (2-2) I, II
Survey of bibliography and methods of research in music history and literature. mphasis upon interrelationship of musical developments and trends in other arts. ompletion of an acceptable project in fields of investigation chosen by the student. rerequisite: permission of the instructor. Advanced courses in harmony, composition, d form and analysis are desirable.

**6A-206B. Composition** (2-2) I, II
Music composition in the larger forms. Students will be required to submit a mplete work in one of the larger musical forms as a project in the course. Preequisite: permission of the instructor.

**0. Bibliography** (1) I, II
Exercises in the use of basic reference books, journals, and specialized bibliogaphies, preparatory to the writing of a master's project or thesis.

**8. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; be arranged with department chairman and instructor.

**9. Thesis or Project** (3) I, II
Guidance in the preparation of a project or thesis for the master's degree.

## CONDITIONS UNDER WHICH CREDIT MAY BE GIVEN FOR MUSIC STUDY UNDER PRIVATE INSTRUCTORS

Credit may be allowed for private instruction in music under the following nditions:

1. The applicant for such credit must be either a regularly enrolled student in e Music Department of the college (that is, a music major or minor), or he must ave as a prerequisite or be taking concurrently with his private study, three units hosen from these specific courses: Music X, 7A, Aesthetics 2, or 102.
2. The instructor giving such private work must be approved by the Music epartment. All private work and names of all such teachers must be registered in e office of the Music Department chairman at the beginning of the semester.
3. Under no circumstances may a student change teachers in the middle of a emester without first notifying the chairman of the Music Department and securing is permission for this change.
4. In case of first semester of private study in San Diego State College, the tudent is required to take a placement examination conducted by the Music Departent faculty at the beginning of the semester, which will show the status of the tudent at the beginning of his work.
5. Students who have dropped out of school, or have stopped taking Applied usic for credit for one semester or more, upon the resumption of that instruction for redit are required to take the placement examination.
6. Evidence that the standards of the Music Department have been met will be hown by an examination conducted by the Music Department faculty at the end of the emester.
7. Ten clock hours of lessons and adequate preparation to pass the Applied usic examinations and the curriculum requirements of the Department are required or one unit of credit.

# NURSING

## IN THE DIVISION OF LIFE SCIENCES

### Lower Division Courses

**1. Introduction to Professional Relationships** (1) I

An introduction and orientation to the profession of nursing. Considers ethic principles, the nurses' code, and the development of methods for solving person social, and professional problems which will face the student nurse.

**20A. Nursing Arts** (1) I

An orientation to hospital and nursing service with an introduction to publ health and hygiene. Prerequisites: Zoology 8 and Psychology 1.

**20B. Nursing Arts** (1) Summer

Organization and care of the environment of the patient and principles of ant sepsis, asepsis, disinfection, and immunity. Prerequisites: Nursing 20A and Ba teriology 1. Bacteriology 1 may be taken concurrently.

**20C. Nursing Arts** (4) I

Laboratory experience at the hospital in caring for the patient. Opportunity given to apply the basic, scientific principles of nursing that are learned in this an preceding nursing arts courses. Prerequisite: Nursing 20B.

# OCEANOGRAPHY

## IN THE DIVISION OF LIFE SCIENCES

### Upper Division Courses

**100. The Oceans** (2) I

Physical and biological aspects of the oceans and their significance to man problems of modern oceanography. One unit to apply as physical and one as biologic science. Prerequisites: Introductory courses in physical and life sciences.

# PHILOSOPHY

## IN THE DIVISION OF SOCIAL SCIENCES

*Major* work is not offered in philosophy.

### Minor

A *minor in arts and sciences* is offered in philosophy. The minor consists of 1 to 22 units in philosophy, nine units of which must be in courses carrying uppe division credit.

A *teaching minor* is not offered in philosophy.

### Lower Division Courses

*** 1A. Introduction to Philosophy** (3) I, II

The place of philosophy in intelligent living. The methods, values, and areas o philosophical inquiry. Through discussion procedures, each student is encouraged t think independently on issues in ethics and religion.

*** 1B. Introduction to Philosophy** (3) I, II

The nature of philosophical inquiry as applied to problems of knowledge an reality. Through discussion procedures, the student has opportunity and is encourage to formulate his own tentative conclusions.

*** 3A-3B. History of Philosophy** (3-3) Year, I

The development of the major concepts of philosophers in the western tradition Relations of philosophy to science, art, religion, and social and political conditions 3A covers the ancient and medieval period, 3B the modern. 3A is not prerequisit for 3B.

**20. Logic** (3) I

The use of logic in science and practical life. Analysis of fallacies. Logic and language. Formation and validation of hypotheses. Interpretations of probability. The logic of experimentation.

### Upper Division Courses

**101. Contemporary Philosophy** (3) II
The major philosophical issues, movements, and figures in American and uropean philosophy of the twentieth century. Prerequisite: 3 units selected from ilosophy 1A, 1B, 3A, or 3B.

**1A-111B. Theory of the State** (3-3) Year, I
The nature of the state, its organization and activities, and its relation to the dividual and to other states. Special attention is given to recent developments in e field of political thought. Not open to students with credit for Political Science 1A-111B.

**1. Deductive Logic** (3) II (Offered in 1952-53 and alternate years)
Definition, classification, and division. The forms of reasoning. Analysis of opositions. Immediate inference. The syllogism. Dilemmas. Modern symbolic logic.

**8. Theory of Ethics** (3) I
A study of significant and typical value theories and systems and of the concrete oblems such theories seek to explain. The emphasis will be placed on moral values. ie student will be encouraged to examine critically his own system of values. (Forerly Philosophy 130.)

**129. Social Ethics** (3) II
Ethical issues of contemporary life. Individualism vs. collectivism; democracy vs. ctatorship; ethical problems arising in law, medicine, business, government, and terpersonal relationships.

**6. Philosophy of Art** (3) II
The nature of esthetic experience. The principal theories of art, both traditional id contemporary, are studied at length, both in relation to actual artistic production id to the role of art in society.

**7. Philosophy of Science** (3) I (Offered in 1952-53 and alternate years)
A critical examination of the basic concepts and methods underlying conmporary scientific thought. Contributions of the special sciences to a view of the iiverse as a whole. Prerequisite: 3 lower division units in philosophy.

**9. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of inructor.

## PHYSICAL EDUCATION

### IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

### Major

A *major in arts and sciences* is offered in *physical education* for the A.B. degree. ourses in the major are in addition to 45 units in general education courses. A minor a field other than physical education is required.

*Major for Men:* Lower division requirements: Two units of physical education tivity courses in general education; Physical Education 53, 63, 64, 72; Zoology 8. pper division requirements: 26 upper division units to include seven units from iysical education courses numbered 141 to 148, inclusive; Physical Education 5, 168, 170A or 170B, 177; and eight units selected from courses in health, physical lucation, or recreation.

*Major for Women:* Lower division requirements: Four units of physical educaon activity courses to include Physical Education 1A, 2A-2B, 3A-3B, 4, 5, and 6 (two these units may be counted as general education); Physical Education 53, 72, and ology 8. Upper division requirements: 26 upper division units to include Physical ducation 155, 156A-156B, 160, 161, 168, 170A or 170B; and nine units selected from urses in health, physical education, or recreation.

A *teaching major* is offered in *physical education* for the general secondary and ecial secondary school credentials. For statement of requirements, refer to these edentials.

### Minor

A *minor in arts and sciences* is offered in *physical education*. The minor consis of 15 to 22 units in physical education, nine units of which must be in courses carryi upper division credit. The minor should be planned in consultation with the departme chairman.

A *teaching minor* is offered in *physical education* for the general secondary, ge eral elementary, and kindergarten primary credentials. For statement of requiremen refer to these credentials.

### Required Activities

All lower division students must elect one or more activity course each semest Two units of activity credit must be offered for graduation, but no more than o activity course in any one semester may be counted toward this requirement. Studen carrying fewer than 12 units during any semester may obtain permission from t Dean of Instruction to postpone taking physical education, but may not be exempt therefrom. No permanent excuses from required activity courses will be grante The college physician, in conjunction with the chairman of the department, w consider stringent cases on an individual basis and make recommendations.

A medical examination is given each student when entering college and reco mendation is made as to type of activity most beneficial. Individually adapted physic education classes to care for special needs are offered. The content of the requir courses is planned to give each student an opportunity to participate in many activiti of carry-over value, developmental nature, and recreational interest. An opportuni is afforded for students to participate in competitive sports and intramural program

## MEN'S DEPARTMENT

Freshmen are required to choose from courses numbered 1-10. Sophomores an upper division students may choose from all courses offered. An activity course ma be taken for credit once only.

### Lower Division Courses

### ACTIVITY COURSES

All activity courses are general education courses.

**1A-1B-1C-1D. Individual Adaptation** (½) I, II
**2. Basketball** (½) I, II
**3. Boxing** (½) I, II
**4. Gymnastics** (½) I, II
**5. Soccer** (½) I
**6. Softball** (½) II
**7. Touch Football** (½) I
**8. Track and Field** (½) I, II
**9. Volleyball** (½) I, II
**10. Wrestling** (½) I, II
**13. Archery** (½) I, II
**14. Badminton** (½) I, II
**15. Fencing** (½) I, II
**16. Golf** (½) I, II
**17. Handball** (½) I, II
**18. Tennis** (½) I, II
**19. Bowling** (½) I, II
**20A-20B. Swimming** (½) I, I
**21. Life Saving** (1) I, II
**23. Sailing** (½) I, II
**24. Hiking** (½) I, II

### INTERCOLLEGIATE SPORTS

**30. Baseball** (½) II
**31. Basketball** (½) I
**32. Cross Country** (½) I
**33. Football** (½) I
**34. Golf** (½) II
**35. Gymnastics** (½) II
**36. Tennis** (½) II
**37. Track** (½) II
**38. Wrestling** (½) II

## WOMEN'S DEPARTMENT

Freshmen may choose from courses numbered 1-11 or 20A-B. Sophomores may hoose from all courses offered. An activity course may be taken for credit once only.

The individual activities, tennis, golf, archery, badminton, swimming, and ancing are offered through the year. Candidates for the special secondary credential n physical education must select one as a major activity and two others as minors. kills in the activities must be maintained as prerequisite to the senior course, Physical ducation 185.

### Lower Division

### ACTIVITY COURSES

All activity courses, with the exception of Physical Education 22, are general ducation courses.

**A-1B. Fundamental Skills** (½) I, II
Practice in efficient fundamental body movements.

**A-2B. Folk Dancing** (Men and Women) (½) I, II
2A is a prerequisite for 2B.

**A-3B. Modern Dance** (Men and Women) (½) I, II
Basic dance movements, analysis of rhythmic elements in movement and their pplication to the dance. 3A is a prerequisite for 3B.

**. Fieldball, Soccer, Speedball** (½) I, II

**. Softball, Volleyball, Hockey** (½) I, II

**. Basketball** (½) I, II

**1A-11B. Ballroom Dancing** (Men and Women) (½) I, II
11A is a prerequisite for 11B.

**2A-12B. Advanced Modern Dance** (Men and Women) (1-1) Year, I
Advanced techniques and choreography. Criticism of student sketches, studies, nd completed dances. Prerequisite: 3A-3B.

**3A-13B. Archery** (½) Year, I, II

**4A-14B. Badminton** (½) Year, I, II

**6A-16B. Golf** (½) I, II

**8A-18B-18C. Tennis** (Beginning, Intermediate, Advanced) (½-½-½) I, II
18A is a prerequisite for 18B; 18B is a prerequisite for 18C.

**9A-19B. Bowling** (½) I, II

**0A. Swimming** (For non-swimmers only) (½) I, II

**0B. Swimming** (Intermediate) (½) I, II

**1. Life Saving** (1) I, II
Standard American Red Cross course in life saving and water safety, designed o qualify superior swimmers for Senior Life Saving Certificate.

**2. Water Safety Instruction** (1) II
Methods and materials for teaching swimming. Course designed to qualify expert wimmers for American Red Cross Swimming Instructors Certificate. Prerequisite: .E. 20B, or equivalent, and American Red Cross Senior Life Saving Certificate.

**3. Sailing** (½) I, II

**4. Hiking** (½) I, II

## MEN AND WOMEN

## PROFESSIONAL THEORY COURSES

### Lower Division Courses

**53. Physical Education in the Elementary School** (2½) I, II

The State program in physical education for the elementary school forms th basis of the course. Candidates for the Elementary Credential are required to tak the course section which includes two lectures and two laboratory periods per week Candidates for the Special Secondary Credential in physical education may take th course section which includes two lectures without laboratory periods.

**63. Professional Activities (Men)** (2) II

Practice in the skills and techniques of the dance, and experience in the organization and presentation of dance materials.

**64. Professional Activities (Men)** (2) I

The acquisition of skills and teaching techniques, and the development of knowledge and interest in the combative activities, primarily wrestling and boxing.

**72. Introduction to Physical Education** (2) I, II

History and principles of physical education and sports. Study of the objectives of modern physical education with a view toward the development of a basic philosophy and background for professional education.

### Upper Division Courses

**141. Professional Activities: Gymnastics** (Men) (2) I

The skills and teaching techniques in gymnastics. The place of tumbling, apparatus, self-testing and calisthenics in the school program. Knowledge of the rules for competition in gymnastics.

**142. Professional Activities: Swimming** (Men) (1) II

The development of skills in swimming with emphasis on the teaching techniques. Scope of course is from beginning swimming to life saving techniques.

**145. Professional Activities: Team Sports** (Men) (2) I

The skills, rules, teaching techniques, officiating, and organization of materials in such sports as soccer, touch football, softball, hockey, basketball, and other sports.

**146. Professional Activities: Individual Sports** (Men) (2) II

The skills, rules, teaching techniques, officiating, and organization of materials in such sports as handball, tennis, badminton, archery, golf, and other sports.

**147. Professional Activities: Coaching Baseball and Track** (Men) (1-2) II

Organization of practice sessions and drills for developing fundamental skills and special abilities; study of rules and officiating techniques; consideration of scheduling problems, coaching techniques and game strategy.

**148. Professional Activities: Coaching Football and Basketball** (Men) (1-2) I

Organization of practice sessions and drills for developing fundamental skills and special abilities; study of rules and officiating techniques; consideration of scheduling problems, coaching techniques and game strategy.

**151. Instructor's Course in First Aid** (2) I, II

Instructor's course in first aid, as outlined by The American Red Cross. Standard first aid techniques, care of injured, certification and record keeping, and practical work in first aid.

**155. Applied Anatomy and Kinesiology** (3) I

Anatomical and kinesiological analysis of human structure and movement. Application of analysis relative to mechanical principles as influenced by efficiency factors of body functions. Prerequisite: Zoology 8.

**156A-156B. Sports Methods** (Women) (2-2) Year, I

Analysis of skills in basketball, hockey, soccer, speedball, volleyball, and softball; methods of presenting sports to large groups; study of rules and officiating. Prerequisites: Physical Education 4, 5, and 6.

**160. Teaching of Body Mechanics (Women)** (3) I
Efficient use of the body in daily living; evaluation and classification of exercises, tudy of methods, and practice in planning and presenting material.

**161. Folk Dancing Materials and Advanced Techniques (Women)** (2) I
Folk customs, festivals, and costumes. Selection of dance materials for various ge groups. Practice in advanced techniques. Prerequisite: Physical Education 2A-2B.

**62. History and Philosophy of the Dance** (2) I
A study of the historical background of the dance, with special emphasis upon ts development, in America and its present status in education and the creative arts. Not open to students with credit for Aesthetics 162.

**64A-164B. Methods in Modern Dance** (2-2) Year, I
Methods in the teaching of modern dance. Selection of materials and course lanning for the secondary school. Prerequisite: Physical Education 3A-3B or atisfactory examination in dance skills.

**66. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**68. Physiology of Exercise** (3) II
A non-laboratory course emphasizing the relation of physiology to muscular xercise in physical activities. Prerequisites: Physiology 1A and Zoology 8 or quivalent.

**70A-170B. Recreational Leadership** (2-2) Year, I
Principles and practices in recreational leadership. Methods of instruction and pecial techniques in the activities of the recreation program. Attention to crafts, nusic, social programs, drama, special projects, dance, sports, campcraft, and outdoor ducation. Not open to students with credit for Recreation 170A-170B.

**77. Individual Program Adaptation** (3) II
The adaptation of programs for the typical individual, including physical examiations, training and prescribed exercises, follow-up, instructional problems, and valution. Three lectures and two laboratory periods per week.

**85. Techniques of Individual Sports (Women)** (1) I
Review of individual playing techniques, knowledge, rules, and teaching methods n tennis, archery, badminton, and swimming. Designed for senior majors in physical ducation, who are expected to demonstrate a high degree of competency in the sports ndicated.

**90. Administration of Physical Education in the Secondary School** (3) I, II
Problems and practices in the organization and administration of the secondary chool activity program. Study, selection and adaptation of activities, examination, and rouping of pupils, use and evaluation of tests. Selection and maintenance of equipment nd facilities.

**99. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of department chairman.

## Graduate Courses

**00. Evaluation Procedures in Health, Physical Education and Recreation** (2) I
A study of tests and measurements in the profession, with practice in their onstruction and use, and interpretation of results. Not open to students with credit r Health Education 200.

**01. Developmental Physical Education** (2) (Alternate years)
Intensive study of postural divergencies, lack of physical development, and ethods of correcting such conditions through exercise. Practice in making physical xaminations, constructing individual exercise programs, and teaching remedial xercises. Consideration of ethical procedures and limitations. Prerequisite: Physical ducation 155.

**203. Problems in Physical Education** (2) (Alternate years)
A survey of current problems facing the Pheysical Education profession, throug a review of literature, discussion of trends, and observation of school situation Analysis and evaluation of actual problems. Written reports required.

**204. Problems in Recreation** (2) (Alternate years)
A survey of current problems facing the recreation profession, through a revie of literature, discussion of trends, and observation of school situations. Analysis an evaluation of actual problems. Written reports required. Not open to students wit credit for Recreation 204.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff to be arranged with department chairman and instructor.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

## PHYSICAL SCIENCE

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *physical science major in arts and sciences* is offered for the A.B. degree t students who have been admitted to the teacher education program if eight units i professional education courses are completed by the date of degree candidacy. Th major is in addition to 45 units in general education, except that nine units of chemistry, physics, and mathematics may be applied toward general education requirements. Lower division requirements: Chemistry 1A-1B, Physics 4A-4B-4C (or 2A 2B-3A-3B), Mathematics 3A-3B, 4A (recommended 4B). Upper division requirements: 24 units to include a minimum of seven units in each of chemistry and physics Chemistry must include Chemistry 101A. Physics must include Physics 107 and 15 (or 148 if physics preparation is 2A-2B). Recommended: Physical Science 110 an 150. Other courses to be selected with approval of the departmental adviser. Physica Science majors are not required to complete a minor; however, candidates for the general secondary credential may wish to complete a teaching minor for the general secondary credential during the undergraduate program.

A *teaching major in physical science and general science* is offered for the general secondary and general junior high school credentials. For a statement of requirements, refer to these credentials.

### Minor

A *minor in arts and sciences* is offered in *physical science* for the A.B. degree to students who have been admitted to the teacher education program if eight units in professional education courses have been completed by the date of degree candidacy. The minor consists of a minimum of 20 units to include three or more units in at least three of the following areas: Astronomy 1; Biology 3, 4; Chemistry 2A-2B or 1A-1B; Geology 2 or 1A; Physics 2A-2B and 3A-3B or 4A-4B-4C.

A *teaching minor in physical science and general science* is offered for the general secondary, special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Lower Division Courses

*** 1. Introduction to Physical Science** (3) I, II
A general course presenting the nature of man's physical universe with materials chosen from astronomy and physics. Not open to students who have had a college course in physics or astronomy, or Physical Science 41. This course may be followed by Astronomy 9 for laboratory credit.

*** 2. Introduction to Physical Science** (3) I, II
Emphasis will be upon materials chosen from geology and chemistry to show the origins of natural materials and their use. Not open to students who have had a college course in chemistry or geology. This course may be followed by Geology 3 for laboratory credit.

***41. Man and His Physical World** (3) I, II
A general education course concerning the nature of the scientific method and selected topics in physical science. Materials will be chosen from physics, chemistry, astronomy, and geology to provide an understanding of the relations of physical science to modern life. This course may be followed by Astronomy 9 or Geology 3 for laboratory credit. Not open to students with credit for Physical Science 1.

### Upper Division Courses

***150. Readings in the Physical Sciences** (2)
Reading from selected materials with informal class discussion of topics.

# PHYSICS

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in *physics* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Physics 4A-4B-4C, Chemistry 1A-1B, or their equivalents. Recommended: a reading knowledge of French or German. Upper division requirements: 24 upper division units in physics to include Physics 105A-105B, 107, 110, 158; three units chosen from Physics 102, 160, or 170; two units chosen from Physics 120, 122, or 124; and two units of Physics 198. A minor in mathematics is required, consisting of Mathematics 3A-3B, 4A-4B, or their equivalents, and Mathematics 118A-118B. Recommended: Three units chosen from Mathematics 104, 111, 119, 121, or 124. Nine units of chemistry, physics, and mathematics may be applied toward general education requirements.

A *major in arts and sciences* is offered in *physics* for the B.S. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: Physics 4A-4B-4C, Chemistry 1A-1B, Mathematics 3A-3B, and 4A-4B, or their equivalents. Upper division requirements: A minimum of 36 upper division units including Physics 102, 105A-105B, 107, 110, 158; two units of upper division laboratory; two units of Physics 198; and Mathematics 118A-118B. The program, planned in consultation with the departmental adviser for this degree, must be designed to provide a four-year terminal program for the student. A minor is not required. Nine units of chemistry, physics, and mathematics may be applied toward general education requirements.

The following additional courses are required as a part of two options approved under this degree: *Applied Physics*: Physics 106, 112 and four units of Physics 120. Recommended: Physics 114, 160, 170 and Astronomy 107. *Electronics*: Physics 104, 122, 124, 160 and either Physics 152 or Engineering 150. Recommended: Physics 114, 170 and Astronomy 107.

A *teaching major in physical science and general science* is offered for the general secondary school credential and a *teaching major in general science* is offered for the general junior high school credential. For statement of requirements, refer to these credentials.

### Minor

A *minor in physics* is offered in arts and sciences. The minor consists of 15 to 22 units in physics, six units of which must be in courses carrying upper division credit.

A *teaching minor in physical science and general science* is offered for the general secondary, special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Lower Division Courses

NOTE: A maximum of 12 units of lower division physics credit may be applied toward the A.B. or B.S. degrees.

***2A-2B. General Physics** (3-3) Year, I, II
This course is for liberal arts and certain pre-professional students who do not desire intensive physics preparation. Lectures, demonstrations and discussions. 2A, Properties of Matter, Mechanics and Heat. 2B, Electricity, Magnetism, Sound and Light. Prerequisite: Two years of high school mathematics. Physics 2A is a prerequisite for 2B. Recommended concurrent registration in Physics 2A and 3A, and in Physics 2B and 3B.

***3A-3B. Physical Measurements** (1-1) Year, I, II

A laboratory course to accompany Physics 2A-2B. 3A: Properties of Matter Mechanics and Heat. 3B: Electricity, Magnetism, Sound and Light. One three-hour laboratory per week. Prerequisite for 3A: Concurrent or previous registration in Physics 2A. Prerequisite for 3B: Concurrent or previous registration in Physics 2B

**4A-4B-4C. Principles of Physics**

The following sequence of three courses is designed to give a thorough background in the fundamental principles of physics, with applications to practical problems. Each course three lectures and one three-hour laboratory per week.

**4A. Mechanics** (4) I, II

The mechanics of solids and fluids. Prerequisites: Credit for Mathematics 3A and concurrent registration in Mathematics 3B. Not open to first semester freshmen.

**4B. Electricity** (4) I, II

Magnetism, electricity and elementary electronics. Prerequisite: Physics 4A.

**4C. Heat, Sound and Light** (4) I, II

Heat and elementary thermodynamics, sound and light. Prerequisite: Physics 4B.

***5. Physics of the Home** (4) I

Everyday applications of physics in heating, lighting, insulating, cooking, refrigeration, air-conditioning, sound, music, mechanical and electrical appliances. Not open to students with credit for Physics 2A, 2B, 4A, 4B, or 4C. Three lectures and one laboratory period per week.

**14. Acoustics of Music** (3) II

Fundamentals of acoustics and audition underlying musical phenomena presented in descriptive and nonmathematical terms. Prerequisite: A technical understanding of music.

**22. General Radio** (2) I

Theory of vacuum tubes and their applications to communication, television, and industry. This course may be taken for credit in addition to the maximum 12 units of lower division physics toward the A.B. or B.S. degree.

## Upper Division Courses

**102. Basic Electronics** (3) I

Principles of electron tubes and resistance loaded amplifiers. Negative feedback, and its application to regulated power supplies, cathode followers and direct coupled amplifiers. Prerequsite: Physics 4B.

**104. Communications** (3) II

Power amplifiers, oscillators, modulators and detectors. Radio transmitters and receivers for amplitude modulation and frequency modulation. Television systems. Antennas and radio wave propagation. Prerequisite: Physics 102 or permission of the instructor.

**105A-105B. Analytical Mechanics** (3-3) Year, I

Fundamental principles of Newtonian mechanics by elementary vector methods. 105A: Statics and kinematics of rigid bodies. 105B: Dynamical principles underlying linear and rotary motion of rigid bodies, with additional work in vibration and impact. Prerequisite: Physics 2A-2B or 4A and a working knowledge of calculus.

**106. Optics** (3) II

A study of reflection, refraction, dispersion, interference, diffraction, double refraction and polarization, with applications to optical instruments. Also wave propagation, radiation, spectra and the nature of light. Prerequisite: Physics 2B-3B or 4C.

**107. Electrical Measurements** (2) I

The theory and application of electrical measurements, including the measurements of current, voltage, power, resistance, capacitance and inductance. Stress on determination of probable errors of measurements. An hour lecture and a three-hour laboratory per week. Prerequisite: Physics 2B-3B or 4B and a working knowledge of calculus.

**110. Alternating Current Circuits (3) I**

The operator j applied to circuits containing resistance, capacitance and inductance; series and parallel resonance; coupled circuits; transients; practical circuit elements, networks. Prerequisite: Physics 4B and Mathematics 4A.

**112. Heat and Thermodynamics (3) II**

A study of the thermal properties of matter with an introduction into the kinetic theory of gases and the laws of thermodynamics. Prerequisites: Eight units in physics and a working knowledge of calculus.

**114. Acoustics (3) II**

A study of wave motion and its application to the production, transmission and reception of sound. Material in architectural acoustics, speech and hearing, and acoustical instruments is presented. Prerequisites: Physics 2B-3B or 4C.

**120. Advanced Laboratory (2) I, II**

Advanced experimental measurements in a branch of physics listed below. The course may be repeated for each subject. With the consent of the instructor and adviser, the course may be repeated in the same subject but with new material. Prerequisite: Consent of the instructor.

A. Acoustics
B. Atomic Physics
C. Electricity
D. Heat and Pyrometry
E. Mechanics
F. Optics

**122. Electronics Laboratory (2) I**

An experimental study of electron tubes and their associated circuits. Study of cathode ray oscilloscope, vacuum tube voltmeter, characteristics of power supplies, amplifiers and filter systems. An hour lecture and a three-hour laboratory per week. Prerequisite: Previous or concurrent registration in Physics 102, or permission of instructor.

**124. Radio Measurements (2) II**

Laboratory measurements of the parameters of resonant circuits at radio frequencies. Study of the properties of oscillators, modulators, detectors and wave guides. An hour lecture and a three-hour laboratory per week. Prerequisite: Physics 122 and previous or concurrent registration in Physics 104.

***148. Introduction to Modern Physics (3) II**

A nonmathematical course covering recent developments in the field of physics, including X-rays, radio-activity, cosmic rays, atomic and nuclear energy. Prerequisite: Upper division standing. Not open to students who have credit for Physics 4A-4B-4C, or equivalent.

**152. Advanced Electronics (2) I**

Theory of vacuum tubes, ultra-high frequency systems and selected topics from contemporary electronics. Prerequisite: Physics 104.

**154. Television Circuits (2) II**

The principles, analysis, and design of television transmitting and receiving systems. Special operational mathematical techniques will be included. Prerequisite: Physics 104 or equivalent.

**158. Atomic Particles (3) I**

A study of experimental evidence for the existence and properties of the elemental atomic and nuclear particles. Introduction to the fields of atomic and nuclear physics. Prerequisite: Physics 4A-4B-4C, or equivalent.

**160. Circuit Analysis (3) II**

A study of filter design, transmission lines, and network analysis. Prerequisite: Physics 110.

**166. Honors Course (Credit to be arranged) I, II**

An individual study arrangement for students admitted to the Honors Program. Enrollment through the department chairman, subject to the approval by the Committee on Honors. Refer to the Honors Program.

**170. Electromagnetic Theory (3) II**

Electrostatics and magnetostatics treated by vector methods; chemical an thermal effects; motion of ions in electric and magnetic fields; magnetic field of current; electromagnetic induction and radiation. Prerequisites: Physics 110, and working knowledge of vector analysis and differential equations.

**198. Senior Report (2) I, II**

Each student will work on a project in physics and make oral reports to th class. A complete written report is required on each project. One discussion period an one three-hour laboratory per week. Prerequisite: permission of instructor.

**199. Special Study (1-2) I, II**

Individual study or laboratory work on a special problem in physics selected b the student. Each student will be assigned a member of the staff who will supervis his work. Credit, hours and topics to be arranged in each case. Six units maximun credit.

### Graduate Courses

**200. Seminar (2-2) I, II**

An intensive study of some phase of advanced physics.

A. Mathematical Physics
B. Theoretical Mechanics
C. Kinetic Theory of Gases
D. Advanced Acoustics
E. Advanced Electronics
F. Electromagnetic Radiation
G. Atomic Physics
H. History of Physics
I. Fluid Mechanics
J. Vibration
K. Advanced Electricity
L. Microwaves

**290. Bibliography (1)**

Exercise in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study (1-6) I, II**

Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis (3)**

Guidance in the preparation of a project or thesis in physics for the master's degree.

## PHYSIOLOGY

### IN THE DIVISION OF LIFE SCIENCES

Major or minor work is not offered in physiology. Courses in this field may be used as part of the major in zoology or life sciences, and are recommended as part of the lower division requirements for the major in psychology, and for the physical education credential.

### Lower Division Courses

**1A. Human Physiology (3) II**

A lecture course considering the functions of the human body, and including a brief review of the microscopic and gross anatomy of the structures discussed. Prerequisites: Elementary chemistry and high school or college biology or zoology. Three hours of lecture per week. Credit reduced to 2 units, for students having credit for Zoology 20.

**1C. Human Physiology (2) II**

A study of the human functions through laboratory experiments and demonstrations. Six hours of laboratory per week. Prerequisites: Physiology 1A completed or in progress, or Biology 3 and 4, or Zoology 1A-1B, and elementary chemistry.

### Upper Division Courses

**101. General Physiology (4) II**

Fundamentals of plant and animal functions. Two lectures and two laboratory periods per week. Prerequisites: Biology 3 and 4 or Zoology 1A-1B and Chemistry 1A-1B or Chemistry 2A-2B. Not open to students with credit for Zoology 101.

# POLITICAL SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *political science* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower ivision requirements: Political Science 1A-1B or 71A-71B. Upper division requirements: 24 units to include (a) three units in Political Science 199 and (b) 21 upper ivision units in political science distributed among two of the following groups: *Group : Theory and government*, courses numbered 100-139; *Group II: Administration*, ourses numbered 140-149; *Group III: International affairs*, courses numbered 150-179. A minor is required and is to be chosen under the direction of the chairman of the department.

Students majoring in political science are advised to become as familiar as possible with related social science fields. It is recommended that majors should have a eading knowledge of at least one foreign language. For students who expect to enter overnment service, two programs of study are offered: The Public Administration Curriculum and the Public Personnel Management Curriculum. For a description of hese curricula, refer to the section of the bulletin entitled: Professional and Vocational Curricula.

A *teaching major* is not offered in political science; however, courses in political cience may be used as part of the *teaching major in social science* for the general secondary and general junior high school credentials. For statement of requirements, efer to these credentials.

### Minor

A *minor in arts and sciences in political science* is offered. The minor consists f 15 to 22 units in political science, nine units of which must be in courses carrying upper division credit.

A *minor in arts and sciences in public administration* is also offered. The minor consists of Political Science 71A-71B in the lower division; Political Science 140A-140B and three units from 198 or other political science course in the upper division.

A *teaching minor in social science* is offered for the special secondary, general elementary, and kindergarten-primary credentials. For statement of requirements, refer to these credentials.

### Lower Division Courses

**1A. Introduction to Government** (3) I, II

Theories and principles of government, with special attention to the problems created by modern industrialism and population pressures.

**1B. Introduction to Government** (3) I, II

A comparative survey of selected foreign governments: Their constitutional principles, political institutions, and governmental problems.

**71A-71B. Introduction to American Government and Politics** (3-3) Year, I, II

Semester I: Governmental organization in the United States; the federal system; the organization, powers and functions of the legislative, executive and judicial branches of the government; the relations between federal, state and local units of government.

Semester II: Expansion of governmental functions and the development of means of democratic control; an examination of the increased use of government as an instrument of social control; the history, motivation, methods and control of political parties; nominations, elections and minority groups; pressure politics.

This year course meets the graduation requirement in American history, institutions and ideals, and the United States Constitution. The second semester course, 71B, also covers the required materials in California state and local government.

### Upper Division Courses

**101. American Institutions** (3) I

The principles of the Constitution of the United States of America, and a survey of the political and social institutions which have developed under the Constitution.

This course meets the graduation requirement in the United States Constitution and California state and local government.

*** 105. American Political Thought (3) II**
A survey of the development of American ideas concerning political authorit from the period of colonial foundation to the present time.

*** 111A-111B. Theory of the State (3-3) Year, I**
The nature of the state, its organization and activities, and its relation to th individual and to other states. Special attention is given to recent developments in th field of political thought. Not open to students with credit in Philosophy 111A-111B.

**120. Political Parties (3) I**
A critical analysis of the political party as a part of the process of government party organization and activities; nominating and campaign methods; theories an functions of the party system; party responsibility. Special emphasis will be place upon the function of the two-party system in American government.

**121. Basic Factors in American Politics (3) I**
An analysis of American political, legal, economic, and social factors in thei relation to our political system and the public interest.

**122. Propaganda and Public Opinion (3) II**
A study of the forces which mold the American public mind, the practice o propaganda, a description and analysis of public relations, pressure groups and thei effect in American public life. Not open to students with credit for Journalism 132.

**128. Government Report Writing (2) I**
Actual writing problems in government, including surveys, recommendations studies, analyses, progress reports, annual reports, etc., are discussed and their solu tions analyzed. Attention to methods of collecting and organizing data, and practic in effective presentation of facts and ideas. Special consideration is given to problem of class members.

**135. California Law of Municipal Corporations (2) II**
California law governing the nature, regulation and control of the counties charter cities, sixth class cities, school districts and special districts. The creation alteration, dissolution, legal actions by and against, powers and duties; rights an liabilities of local governments.

**136. Administrative Law (2) I**
The law of public office and public officers, powers of administrative authorities scope and limits of administrative powers, remedies against administrative action.

*** 137A-137B. Constitutional Government (2-2) Year, I**
Modern government and politics; its theoretical foundations, institutions and problems. Emphasis will be on American experience with useful comparisons with other countries. Either semester may be taken first. This year course meets the graduation requirement in the United States Constitution and California State and Local Government.

*** 139A-139B. American Constitutional Development (3-3) Year, I**
A study of the work of the Convention of 1787 and of significant phases of American constitutional law. Not open to students with credit for History 172A-172B. This year course meets the graduation requirement in American history, institutions and ideals, and United States Constitution. The second semester course, 139B, also covers the required materials in California state and local government.

**140A-140B. Principles of Public Administration (3-3) Year, I**
Semester I: The administration of public services, staff and line functions, theories of organization and practices, and procedures of different types of governmental agencies.

Semester II: Principles and problems in governmental budgeting, performance and capital outlay, budget procedures, organization and administration of personnel programs, controls over administrative behavior, responsible bureaucracy and professionalism in the public services. Not open to students with credit in Political Science 147A-147B.

**2. State Government (3) II**

A study of the political structure and its operation used in the carrying on of the nctions exercised by the states; state-federal relations; state-local government rela- ons; particular emphasis on California government. This course meets the graduation quirement in California State and local government. Not open to students with edit for Journalism 142.

**3. Municipal and County Government (3) I**

A study of the organization and its operation used to carry into effect the func- ons assigned to local governmental units; particular emphasis upon local government California. This course meets the graduation requirement in California State and cal government. Not open to students with credit for Journalism 143.

**4. Introduction to Public Personnel Administration (2) I**

An introduction to the field, giving general coverage of the problems involved in cruitment, placement, supervision, etc., of public employees. Prerequisite: Permis- on of instructor.

**5. Public Personnel Management (2) II**

An advanced course involving detailed examination of management of personnel public service. Prerequisite: Permission of instructor.

**6. Wage and Salary Administration (3) I**

Problems of job analysis; major techniques of job evaluation, including ranking, assification, point system, factor comparison; problems of wage and salary admin- tration, incentive pay methods; merit rating plans. Not open to students with credit r Commerce 154.

**7A-147B. Public Administration (2-2) Year, I**

Administrative organization. Relationship between federal, state, and local vernments. Budget, personnel, management, and control. Not open to students with edit for Political Science 140A-140B.

**8. The Government of Metropolitan Areas (2) I**

A study of the governmental problems of metropolitanism; overlapping of gov- nments, services, planning and financing. The use of intergovernmental contracts r public service, proper public service areas, and special authorities.

**150A-150B. International Relations (3-3) Year, I**

A historical and analytical consideration of the basic factors—historic, geo- aphic, economic, ideologic, and strategic—which underly and condition the modern nflict between the "sovereign state" and the "community of nations." Fall semester: rigins and development through the nineteenth century. Spring semester: Twentieth ntury experimentation and conflict.

**1SP. The Contemporary World (1) II**

A series of lectures by members of the faculty on selected problems of the current ternational scene. Reports required of students enrolled for credit.

**2. International Organization (3) I**

A critical analysis of the organization by which the international community eks to provide for the exercise of legislative, administrative and judicial functions the international level: Diplomatic and consular corps; conferences; administra- on through commissions and unions; amicable procedures for settlement of dis- ites; The League of Nations-United Nations experiment.

**3. Principles of International Law (3) I**

The function of law in the international community. The historical development the ideas and rules of international law and their place in the modern diplomatic d legal structure.

**4. International Law and the Courts (3) II**

A case study of the application of the rules of international law in national d international courts.

**5. Dynamics of Modern International Crises (3) I**

The determination and analysis of facts surrounding international crises since orld War II; the evaluation of these crises and their effects upon external policies the United States and the operations of the United Nations. Prerequisite: Consent the instructor.

**158A-158B. American Foreign Policy** (3-3) Year, I
Lectures and reading in the field of American foreign relations since 1776, wit special emphasis, in the second semester, upon affairs since 1900. A general surve course. Not open to students with credit for History 176A-176B.

**160. Government of the British Dominions** (3) II
Development of the new British Empire and imperial relations of the sel governing dominions; government of Canada, Australia, New Zealand, and Sout Africa; conditioning historical, economic and racial factors. Not open to students wit credit for History 156B.

**162. Government of England** (3) I
The structure and functioning of English parliamentary system with emphasi upon present day political principles and parties.

**165. Governments of Latin America** (3) II
The governments of leading and representative Latin American states. Emphasi on the background and evolution of current political institutions and philosophie

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**167. Government of the Soviet Union** (3) I
Theory and practice of government in the Soviet Union, with some attention t Russian foreign affairs.

**181. Supervisory Staff and Employee Training** (3) II
Training as a management function and as an aspect of communication; operat ing methods and structure of training departments; types of training; use of com munity facilities; evaluation of training results. Projects designed to meet specia student needs. Not open to students with credit for Business 155.

**182. Techniques of Administrative Analysis** (2) II
Areas and problems of administrative research; methods of analyzing structure and procedures in organizations; planning and administration of programs; desig of forms; job classification and salary surveys; preparation of administrative reports

**191. Field Studies in Government** (3) II, Summer
Study of organization, policies and functions of selected government agencies Discussion by responsible officers and inspection of work operations and facilitie in management, public safety, public works and utilities, and other major governmenta operations. Prerequisite: permission of instructor.

**198. Internship in Public Administration** (3-6) I, II
Students will be assigned to various government agencies and will work unde joint supervision of agency heads and the course instructor. Participation in staf and internship conferences. Admission by permission of the instructor.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## Graduate Courses

**200A-200B. Seminar in Government** (2-2) Year, I, II

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

# PSYCHOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in *psychology* for the A.B. degree. Courses the major are in addition to 45 units in general education courses. Two plans are ovided for the major: One for those students expecting to pursue the study of ychology beyond the A.B. degree; the other for those students who wish to extend eir general education in the field of psychology.

Lower division requirements for all majors: Psychology 5 and 6. Recommended lection of courses in related fields: Six units in biology, physiology, and/or zoology; ree units in philosophy; and six units in anthropology and/or sociology.

The upper division requirements for each major will be determined by the plan lected by the student, but a minimum of 24 upper division units in psychology is quired for a major.

Psychology majors are not required to complete a minor.

A *teaching major:* A major in psychology may be combined with two teaching inors for a general secondary credential. Refer to the outline of requirements for this edential.

### Minor

A *minor in arts and sciences* is offered in psychology. The minor consists of 15 22 units in psychology, nine units of which must be in courses carrying upper ivision credit.

A *teaching minor* is not offered in psychology.

### Plan A Major

Plan A is for a nonprofessional major in psychology and is designed to provide the udent with a greater understanding of his expanding group relations leading to happy nd effective family and community living. The recommended pattern of courses for is program is not designed to facilitate graduate and professional study in psychology.

The upper division requirements for Plan A majors: Psychology 106, 131, 145, nd electives to complete the major. It is expected that each student under Plan A will elect, with the assistance of his adviser, a pattern of courses in line with his particular bjectives in pursuing Plan A. For most students in Plan A, the following courses will e found particularly helpful: Psychology 105A, 107, 122, 132, 150, and 152.

To facilitate the purpose of Plan A the following courses in other departments re recommended as electives: Anthropology 1A-1B; Biology 1 or Zoology 1A-1B; conomics 1A-1B and 102; Health Education 90; Philosophy 1A-1B; Zoology 160 and 65; and courses in home economics.

### Plan B Major

The purpose of Plan B is to facilitate the specific preparation of those students ho wish to pursue graduate and professional preparation in Clinical, Industrial and ersonnel, and Theoretical-Experimental Psychology. To this end, three separate prorams are suggested under Plan B to provide an undergraduate basic preparation for urther study in these fields.

Upper division requirements for all Plan B majors: Psychology 104A, 105A, 60A or 160B, and additional courses to complete the major selected from one of the roups listed below. For each of the three patterns of special preparations under lan B, the following courses are recommended:

*Preclinical:* Psychology 105B, 106, 131, 145, 150, 151, 152, 160A. The following ourses are recommended in other departments: Anthropology 1A-1B; Biology and 4, or Physiology 1A and 1C; Philosophy 1A-1B or 3A-3B, 20, and 129; Sociology 135 and 170; Speech Arts 176 or 179A-179B; and Zoology 165. A natural science ninor is recommended.

In selecting courses and choosing electives, the student is urged to consult his dviser and the Bulletin on the requirements for special secondary credentials for chool psychometrist and for correction of speech defects.

*Pre-Industrial and Personnel:* Psychology 121, 122, 124, 131, 132, 145, 152, 60B. The following courses are recommended in other departments: Business 153 and 54; Economics 1A-1B, 100A, 150, 151, 170 and 185; Philosophy 20; Political Science 44, and 145; Sociology 50, 51; and six units selected from Sociology 135, 170, 180, 90; and Speech Arts 4; a minor in business, economics, political science, or sociology s recommended.

*Theoretical-Experimental:* Psychology 104B, 131, 140, 145, 150, 160A, 160B, an 177. The following courses are recommended in other departments: Chemistry 2A-2B Foreign Language; Mathematics 1, 3A, and 3B; Philosophy 1A, and 20; Physic 2A-2B, and 3A-3B; Physiology 1A and 1C; Zoology 1A-1B, 100, and 165. A mathematics or natural science minor is recommended.

## The Master of Arts Degree

The Master of Arts degree is offered in the department as part of the fulfillmen of requirements for the School Psychologist credential. It is also possible to obtain Master's degree if one obtains a School Psychometrist credential. Refer to these credentials and to the Master of Arts degree.

All candidates for the degree of Master of Arts in psychology are required t include Psychology 104A, 105A, 150, 160A and 160B or their equivalents in thei graduate program of study or to have had these courses in their undergraduat training.

## Lower Division Courses

***1. General (3) I, II**

An introduction to some of the facts, principles, and concepts which are basic to understanding human behavior.

**2. Psychology Laboratory (1) I, II**

Application of experimental methods to psychological problems. Includes design and execution of experiments. One lecture and three laboratory hours. Prerequisite: Psychology 1.

**5. Principles of Psychology: Basic Organization of Behavior (3) I, II**

The basic sensory, neural and motor mechanisms and their functions in human behavior. Prerequisite: Psychology 1 and sophomore standing.

**6. Principles of Psychology: Learning and Integrated Behavior (3) I, II**

Attending, perceiving, and learning, including social learning, personality development, and conditions of efficient work. Prerequisite: Psychology 1 and sophomore standing.

**11. Applied Psychology (3) I, II**

A survey of the application of the basic principles of psychology to business, education, industry, government, law, medicine and related fields. Prerequisite: Psychology 1.

**12. Mental Hygiene (3) I, II**

An examination and interpretation of the factors which go into the making of the person as he adapts himself to the social world about him. The development of the normal personality. Prerequisite: Psychology 1.

## Upper Division Courses

**104A. Statistical Methods in Psychology (3) I, II**

An introduction to the use of quantitative methods in psychology, with emphasis upon measures of central tendency and variability, graphic methods and percentiles, linear correlation, and the applications of the normal probability curve. Prerequisite: Psychology 1. Not open to students with credit for Economics 140 or Sociology 103.

**104B. Advanced Statistics (3) II**

A further study of quantitative methods in psychology with particular emphasis on methods of correlation, chi-square, and contingency, and an introduction to the analysis of variance. Prerequisites: Mathematics C and Psychology 104A, or permission of instructor.

**105A. Psychological Testing (Group) (3) I, II**

The basic principles of testing. The selection and critical evaluation of group tests of intelligence, personality, aptitude, interest and achievement. Prerequisite: One of the following courses: Psychology 5, 11; Education 102A, 102D. Not open for credit to students with credit for Education 105A.

**105B. Psychological Testing (Individual) (3) II**

The principles of individual testing. Instruction and practice in the administration of the Stanford-Binet, Wechsler-Bellevue, similar tests. Prerequisite: Psychology 105A and permission of instructor.

**106. Developmental Psychology (3) I, II**
A study of the psychological development of the normal individual from concepion through childhood, adolescence, maturity, and old age. Stress is laid upon the nterdependence of the various periods of the individual's life. Prerequisite: Psyhology 1.

**07. Psychology of Later Maturity (3) II**
The psychological, physiological, and sociological factors influencing behavior in he later years of life. Prerequisite: Psychology 1.

**21. Personnel and Industrial Psychology (3) I, II**
Psychological principles applied to problems of selection and assignment of industrial personnel, employee training, and fatigue. Prerequisite: Psychology 104A, or Economics 140, or Sociology 103.

**22. Public Opinion Measurement (3) I**
The history, methods, and problems of public opinion and attitude measurement. Emphasis will be placed upon the polling of consumers and voters. Students will be iven field experience. Not open to students with credit for Journalism 122.

**24. Engineering Psychology (2) II (Not offered in 1952-53)**
Psychological problems of man-machine systems. Visual, auditory, and other sensory factors involved in the inter-relations between man and machines. Motion-study, work arrangement, fatigue, and environmental influences in relation to production. Prerequisite: Psychology 1 and upper division standing.

**30. Educational Psychology (2) I, II**
To develop understanding of the applications of psychological research for effective classroom teaching. Observation and field work required. Prerequisite: Psycholgy 1. Not open to students with credit for Education 130.

**31. Foundations of Personality (2) I**
The human organism in its interaction with the environment and the resultant hanges in the development of the personality. Prerequisite: One full year of psyhology or equivalent.

**32. Personality Adjustment (2) II**
The application of the fundamental principles of personality to problems of adaption. Mental hygiene as a local, state, and national problem. Prerequisite: Psychology 31 or permission of instructor.

**40. Physiological Psychology (3) I, II**
The neurophysiological basis of behavior, with particular attention to the psyhophysiology of sensory and motor processes, emotion, bodily needs, and learning. Prerequisite: Psychology 5 and 6, or 10 units in biological sciences.

**145. Social Psychology (3) I, II**
The major problems and findings concerning group behavior and group memberhip, the socialization of the individual, and processes of social interaction. Not open o students with credit for Sociology 145.

**50. Abnormal Psychology (3) I, II**
The psychology of behavior disorders, with emphasis on the amentias, neuroses, nd psychoses. Prerequisite: One full year of psychology.

**51. Introduction to Clinical Appraisal (3) I**

For directors, designers and technicians in school and community theaters concerning the principles and practice of light, color, lighting instruments, and contro equipment, including the design and planning of lighting of plays. Students will serv as light crews for departmental production.

**150. Phonetics** (3) I, II
Auditory and kinesthetic analysis of the sounds of the English language. Valuable as a corrective course in pronunciation and articulation. Required of speech major and those seeking the Speech Correction Credential.

**152. History and Design of Costume** (stage) (3) II
A study of costume from Egypt to the present. Emphasis on the use of historica costumes on the stage. Costume designs for one stage production. Drawing and painting experience desirable but not necessary.

**154A-154B. History of the Theater** (3-3) Year, I, II
A study of the theater from primitive times to the present. Special attention wil be given to the theater as a mirror of the social and cultural background of the variou countries and periods in which it is studied. Carries aesthetics credit. (Speech Art 154B may be taken without 154A.)

**155. Advanced Acting** (3) I
Problems in characterization: Acting styles of the Elizabethan and Eighteenth Century periods. Prerequisite: 55A-55B or the equivalent.

**156. Advanced Dramatic Production** (3) II
Problems and projects in scenery and lighting in connection with the workshop and major productions of the department.

**159. Stage Direction** (3) I
Planned for prospective directors of plays in schools, colleges and community theaters. Through lectures, discussions, and exercise projects the student will become acquainted with the principles, procedure and methods of stage direction. Each student will be required to direct several short plays during the course.

**160. Stage Direction Laboratory** (1) I, II
This will consist of experience in directing a one-act play before a departmental or public audience. It may be taken with or it may be preceded by 159. Prerequisite or corequisite: 159. May be repeated once for credit.

**161A-161B-161C-161D. Advanced Intercollegiate Debate** (1-1-1-1) I, II
Students are limited to four units, including lower and upper division courses.

**162. Advanced Argumentation** (3) I
Presents a further and more detailed study in the preparation of briefs and the organizing of evidence; opportunity for participation in intramural debates, intercollegiate debate, and community speaking activity. Prerequisite: 2A or 2B.

**163A-163B-163C-163D. Advanced Verse Choir** (1-1-1-1) I, II
Participation in verse speaking chorus to develop quality, range of tone, and ability in dramatic visualization of poetry. Students are limited to four units, including lower and upper division courses.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**176. Problems of Speech Correction and Articulation** (3) II
Analysis and discussion of the major articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. (Minimum of 25 laboratory hours required.) Not open to students with credit for Education 176.

**177. The Teaching of Lip Reading (2)**

History, theory and methods of lip reading. Aids for the classroom teacher; program and materials of instruction for the specialized teacher. Opportunities for practice teaching are offered. Not open to students with credit for Education 177.

**179A-179B. Nervous Speech Disorders (3-3) Year, I**

Clinical survey of newest methods of speech correction with special emphasis given to stuttering. (Minimum of 25 laboratory hours required per semester.) Required course for Special Corrective Credential. Not open to students with credit in Education 179A-179B. (Speech Arts 179A is a prerequisite for 179B.)

**180A-180B. Rehearsal and Performance (1) I, II**

One unit of technical practice followed by one unit of acting. One unit may be repeated, making a total of three units.

**181. Radio Sales and Advertising (3) I, II**

A study of advertising trends in radio advertising; time buying, audience survey, and program types in relation to products to be advertised via radio broadcasting. Includes publicity and promotion of radio programming organization of a radio station; relationship between the business and entertainment factors of radio broadcasting. Open to students with consent of instructor. Not open to students with credit for Business 181.

**182. Advanced Radio Production (3) II (Offered in 1951-52 and alternate years)**

Advanced radio production techniques. Students are responsible for the execution of Radio Guild productions. Projects in program types include the use of sound and music. Material includes production analyses and script editing. Prerequisite: Speech Arts 83.

**183. Radio Continuity and News Writing (3) II**

Correlates news editing and writing with announcing styles. Radio news procedure and organization of a radio news staff; analysis of reportorial and commentary styles. Includes production techniques of "on-the-spot" and multiple point pickup broadcasts. Registration with permission of instructor. Not open to students with credit for Journalism 183.

**184. Radio Writing (3) II**

Includes original half-hour scripts, play or novel adaptations for radio, and the documentary program. Study of pacing and timing, the use of sound and music for bridges and cues, and radio format. Plays written by students are read and discussed during their development; the better plays to be produced by the Radio Guild for broadcast. Open to students with consent of instructor.

**191. Organized Discussion (3) II**

Consideration of the symposium, the panel, the open forum, the business session, and varieties of conference speaking. Emphasis upon organization and presentation. Attention to parliamentary procedure for informal groups. Prerequisite: Speech Arts 60 or equivalent.

**192A-192B. Advanced Public Speaking (3-3) Year, I, II**

Careful attention given to the preparation and delivery of longer speeches, using as models classics in the field of oratory. Prerequisite: 4.

**199. Special Study (1-6) I, II**

Individual study. Six units maximum credit. Prerequisite: permission of instructor.

## Graduate Courses

**200. Seminar in History of Oratory (2) II**

An advanced course for those already familiar with the techniques and theories of public speaking and debate. A history of public address from the time of Greece up to the present, organized around the theories of representative orators and their relationships to the social environment.

**221. Articulatory Problems of Speech (2) I**

Analysis and discussion of articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Prerequisite: Speech Arts 150.

**245. Seminar in Technical Practice (2)**
Advanced technical projects in planning school theaters and their mechnical equipment, lighting control and lighting instruments and the design of lighting layouts for elaborate plays will be assigned, executed and discussed.

**259. Seminar in Stage Direction (2)**
An advanced course for those who are ready to direct full-length plays and to consider the problems of handling various styles and types of drama in the great periods of dramatic literature for modern production. For graduates with experience in directing plays.

**260. Seminar in Oral Interpretation (2)**
Aesthetic discipline applied to oral reading of masterpieces of poetry and prose. Analysis of thought and emotional content and aesthetic form, including unity and harmony, variety and contrast, balance and proportion, rhythm.

**298. Special Study (1-6) I, II**
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

## ZOOLOGY

### IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in *zoology* for the A.B. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: in the major, Zoology 1A-1B; in related fields, Botany 1 or 2A-2B, Chemistry 1A-1B or 2A-2B, Physics 2A-2B, 3A-3B. Upper division requirements: 24 units in zoology to include Zoology 100, 101, 106, 155. A minor is not required. Reading knowledge of a foreign language is recommended.

A *major in arts and sciences* is offered in *zoology* for the B.S. degree. Courses in the major are in addition to 45 units in general education courses. Lower division requirements: in the major, Zoology 1A-1B; in related fields, Botany 1 or 2A-2B, Chemistry 1A-1B or 2A-2B, Physics 2A-2B, 3A-3B, Geology 2, 3, and Mathematics 7A-7B. Upper division requirements: 36 units in zoology or approved related fields to include Zoology 100, 101, 106, 155. A minor is not required. Reading knowledge of a foreign language is recommended.

Nine units in physical science and life science may be applied toward general education requirements in the natural sciences.

A *teaching major* is not offered in zoology; however, courses in zoology may be used as part of the *life science major* for the general secondary credential or as part of the *general science major* for the general junior high school credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in zoology. The minor constists of 15 to 22 units in zoology, six units of which must be in courses carrying upper division credit.

A *teaching minor* is not offered in zoology; however, it may be used as part of the *teaching minor in life science* for the general secondary credential, or as part of the *teaching minor in general science* for the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A-1B. General Zoology (4-4) Year, I, II**
An introduction to animal biology. Designed for those who expect to do advanced work. Two lectures and 6 hours of laboratory work each week. Prerequisite for Zoology 1B; Zoology 1A.

**8. Human Anatomy (3) I**
A study of human structure through the use of models, prepared dissections and microscope slides. Prerequisite: High school biology, Biology 3, 1, or Zoology 1A. Two hours of lecture and three hours of laboratory per week. Required of prenursing students. Credit reduced to 2 units if student has credit for Zoology 20.

**20. Human Anatomy and Physiology (3) II**

An elementary course in human anatomy and physiology. Prerequisite: High school biology, or Biology 1 or 3 or Zoology 1A. Lectures three hours per week. Credit reduced to two units if student has credit for Zoology 8 or Physiology 1A.

## Upper Division Courses

**100. Embryology (4) I, II**

The development of vertebrates as illustrated by the frog, chick, and pig. Six hours of laboratory and two hours of lecture and quiz per week. Prerequisite: Zoology 1B, or Biology 3 and consent of instructor.

**101. General Physiology (4) II**

Fundamentals of plant and animal functions. Two lectures and six hours of laboratory per week. Prerequisites: Biology 3 and consent of instructor, or Zoology 1A-1B, Chemistry 1A-1B or Chemistry 2A-2B. Not open to students with credit for Physiology 101.

**104. Microtechnique (3) I, II**

Introduction to methods of preparation of tissues for microscopic study. Six hours of laboratory and one hour of lecture per week. Prerequisite: One year college chemistry and Zoology 1A-1B, Botany 2A-2B, or Biology 4 and consent of instructor.

**106. Comparative Anatomy of the Vertebrates (4) I**

Dissection, study and comparison of organ systems of typical vertebrates. Two hours per week of lecture and six hours of laboratory. Prerequisite: Zoology 1B, or Biology 3 and consent of instructor.

**108. Histology (4) I**

A study of the microscopic structures and differentiation of tissues and organs of the vertebrates, especially mammals. Two lectures and six hours of laboratory per week. Prerequisites: Zoology 1A-1B; recommended Zoology 100.

**109. Hematology (3) I, II**

Microscopic and chemical examination of blood. One lecture and six hours of laboratory per week.

**110. Limnology (4) II**

A biological survey of available fresh waters, followed by a selected problem on the relationship of an organism or group of organisms to the environment. Two lectures and six hours of laboratory or field work per week. Prerequisites: Zoology 1A-1B and elementary chemistry.

**112. Marine Invertebrates (4) I**

Identification and study of behavior and life histories of invertebrates of the San Diego region. Frequent collecting trips to the beaches required. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor. Two hours of lecture and six hours of laboratory or field work per week.

**113. Ornithology (4) II**

The study and identification of birds, especially those of the Pacific Coast and the San Diego region. One hour of lecture and six hours per week of laboratory, or field excursions, and a field project. Prerequisite: Zoology 1B, or Biology 4 and consent of instructor.

**113F. Field Ornithology (1) I**

A field study of local birds with special emphasis upon the fall migration.

**115. Cold-blooded Vertebrates (3) II**

The classification, natural history and distribution of fishes, amphibians, and reptiles. Practice in the techniques of collection and the use of keys for identification. Frequent field trips. One lecture and six hours of laboratory per week. Prerequisites: Zoology 1B, or Biology 4 and consent of instructor.

**118. Mammalogy (3) II**

Lectures on classification, adaptations, and ecological relationships of mammals. Laboratory and frequent field trips to familiarize students with local mammals, taxonomic procedures and field techniques. One lecture and six hours of laboratory per week. Prerequisites: Zoology 1A, or Biology 4 and consent of instructor.

**119. Field Zoology** (4) I, Summer
Designed to give a working knowledge of the animals of Southern California; field trips, lectures and laboratory emphasizing ecology, behavior, observational methods, collecting techniques and taxonomy. Two hours of lecture and six hours of laboratory or field work per week. Prerequisite: A course in college biological science or permission of instructor.

**121. General Entomology** (3) I
The classification, life history, structure, and physiology of insects. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor. Two hours of lecture and three hours of laboratory per week.

**122. Systematic Entomology** (3) II
Intensive study of the classification of insects with special emphasis on a group of the student's choice. One hour of lecture, six hours of laboratory per week. Prerequisite: Zoology 121 or permission of instructor.

**125. Economic Entomology** (4) II
Course designed for students of agriculture and horticulture. Emphasis is placed on determination and control of insects affecting plants. Quarantine measures are also studied. Two lectures and two laboratory periods per week. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor.

**126. Medical Entomology** (3) I
The role of insects and other arthropods in transmission and causation of human diseases. Three hours of laboratory and two hours of lecture per week. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor.

**128. Parasitology** (4) I
Study of animal parasites with special reference to those of man. Laboratory including identification of important parasites of man, and collection and preservation of local forms. Two hours of lecture and six hours of laboratory per week. Prerequisite: Zoology 1A-1B, or Biology 4 and consent of instructor.

*** 150. Readings in Biology** (2) II
Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles, ecology, economic zoology, zoogeography, breeding habits, animal behavior. Not open to students who have credit for Botany 150. Prerequisite: Biology 3 or equivalent.

**153. Economic Biology** (2) I
Study of uses of plants and animals to man and their destructive effects. Consideration also given to general methods of control and conservation. Prerequisite: Zoology 1A, or Biology 4 and consent of instructor. Not open to students who have credit for Botany 153.

**155. Genetics** (3) II
Principles of plant and animal genetics, with experiments and demonstrations illustrating the mechanisms of heredity. Two hours of lecture and three hours of laboratory per week. Not open to students with credit for Botany 155. Prerequisites: Zoology 1A-1B, or Botany 2A-2B, or Biology 3 and consent of instructor.

**158. Conservation of Wildlife** (3) II
A survey of plant and animal resources with emphasis on their conservation and intelligent use. Prerequisite: a college course in biology or consent of the instructor. Not open to students with credit for Botany 158.

*** 160. Evolution** (2) II
The development of theories of evolution. Two lectures per week. Prerequisite: Biology 1 or equivalent. Not open to students with credit for Botany 160.

*** 165. Human Heredity** (2) I
Presentation of selected principles of heredity as related primarily to human inheritance. Designed primarily for nonscience majors. Two lectures per week. Not open to students with credit for Zoology 155 or Botany 155.

**166. Honors Course** (Credit to be arranged) I, II
Refer to the Honors Program.

**199. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisites: 15 units in zoology with a grade of A or B; permission of instructor.

### Graduate Courses

**200. Seminar** (3) I
Especial emphasis will be placed on current concepts in the various fields of biology including problems of migration, distribution, speciation, evolution. Required of all graduate students.

**202. Hydrobiology** (2) II
A course in aquatic ecology with special emphasis on fresh water but with reference to marine biology.

**213. Advanced Studies in Ornithology** (2) I
Lectures and seminar on advanced problems of morphology, distribution, behavior and classification of birds.

**290. Bibliography** (1)
Exercises in the use of basic reference books, journals, and specialized bibliographies, preparatory to the writing of a master's project or thesis.

**298. Special Study** (1-6) I, II
Individual study. Six units maximum credit. Prerequisite: permission of staff; to be arranged with department chairman and instructor.

**299. Thesis** (3)
Guidance in the preparation of a project or thesis for the master's degree.

# DIRECTORY

## 1952-53

LOVE, MALCOLM A. (1952)----President
A.B., Simpson College; M.A., Ph.D., University of Iowa; LL.D., Simpson College.

ACKLEY, JOHN W. (1947)----Associate Professor of Speech Arts
A.B., University of Redlands; M.A., Ph.D., University of Southern California.

ADAMS, EILEEN (Mrs. Bert) (1949)----Junior Librarian
A.B., Willamette University; B.S. in L.S., University of Denver.

ADAMS, JOHN R. (1928)----Chairman, Division of Languages and Literature; Professor of English
A.B., A.M., University of Michigan; Ph.D., University of Southern California.

ALCORN, MARVIN D. (1941)----Professor of Education
A.B., Southwestern College; A.M., Teachers College, Columbia University; Ed.D., University of Southern California.

AMSDEN, GEORGIA C. (1925)----Associate Professor of Secretarial Management
Diploma, Gregg College, Chicago; special secretarial training in various colleges.

ANDERSON, GRAYDON K. (1949)----Assistant Professor of Economics
A.B., Willamette University; Ph.D., University of Wisconsin.

ANDREWS, JULIA G. (Mrs. F. S.) (1947)----Assistant Professor of Art
A.B., Northwestern University; M.A., Columbia University; two and one-half years of graduate study at Teachers College, Columbia University.

APPLE, JOE A. (1947)----Professor of Education
A.B., Southeastern State College; M.A., University of Oklahoma; Ed.D., Teachers College, Columbia University.

ATKINSON, DAVID F. (1949)----Instructor in Accounting and Business Management
A.B., San Jose State College; M.A., Stanford University; graduate study at Redlands University. On military leave, January, 1951.

BACON, GUINIVERE KOTTER (Mrs. George) (1928)
Associate Professor of Education
B.S., Utah Agricultural College; M.A., Stanford University; one year of graduate study.

BAKER, CLIFFORD H., JR. (1937)----Assistant Professor of Spanish
A.B., San Diego State College; M.A., and four years of graduate study at the University of California.

BAKER, DOUGLAS L. (1952)----Assistant Professor of Education
A.B., Lynchburg College; M.S., Ed.D., University of Southern California.

BALLANTINE, FRANCIS A. (1949)----Assistant Professor of Education
A.B., Michigan State Normal College; A.M., Ph.D., University of Michigan.

BARNHART, KENNETH EDWIN (1939)----Professor of Sociology
A.B., Southwestern University; B.D., Southern Methodist University; Ph.D., University of Chicago.

BECK, FOY H. (1951)----Assistant Professor of Education
B.A., Iowa State Teachers College; M.A., Colorado State College of Education; graduate study at Universities of Iowa and Southern California.

BECKER, CALLIE D. (Mrs. E. J.) (1946)----Senior Librarian
A.B., Shorter College; A.B. in L.S., Emory University.

BENTON, CARL W. (1948)----Instructor in Physical Education
B.S., University of California at Los Angeles; M.S., University of Southern California.

BIGGER, WILLIAM R. (1952)----Assistant Professor of Political Science
B.A., M.A., University of Wisconsin; graduate study at University of California at Los Angeles.

BILTERMAN, KATHRYN S. (Mrs. H. L.) (1952)----Assistant Professor of Education
B.S., University of New Mexico; M.A., Ph.D., University of Iowa.

* BIRCH, AILEEN J. (Mrs. C. E.) (1949)----Instructor in Education
A.B., San Diego State College; graduate study at Claremont College.

---

* On leave.

BLOCK, EDWARD A. (1946)------------------------Associate Professor of English
A.B., M.A., Ph. D., University of California.

BRITTAN, MARTIN R. (1950)----------------------Assistant Professor of Zoology
A.B., San Jose State College; Ph.D., Stanford University.

BROADBENT, HARRY H. (1949)----------Assistant Professor of Physical Education
A.B., University of Oklahoma; M.S., University of Pennsylvania.

BROOKS, BAYLOR (1931)--------------------------Assistant Professor of Geology
B.A., Stanford University. Two years graduate study at University of Arizona and Stanford University.

BROWN, ELIZABETH McPIKE (Mrs. L. P.) (1926)------------Professor of French
Ph.B., M.A., Ph.D., University of Chicago; one year graduate study at the Sorbonne, Paris, France; Certificat d'Etudes Françaises; Diplõme de l'Association Générale de Phonétique, Paris, France; Officier d'Académie.

BROWN, EUGENE P. (1947)-------------------Associate Professor of Accounting
B.S., Southeastern Teachers College; B.A.,M.A., University of Oklahoma. Two years graduate study at University of Chicago, University of Southern California and University of Mexico.

BROWN, LESLIE PARKER (1922)----------------Professor of Spanish and French
B.A., Yale College; M.A., Harvard University; Ph.D., University of Southern California.

BRUBECK, HOWARD R. (1950)----------------------Associate Professor of Music
B.A., San Francisco State College; M.A., Mills College.

BRUNER, WILLIAM S. (1948)----------------------Assistant Professor of English
B.S., University of Virginia; M.A., Claremont College.

* BRYDEGAARD, MARGUERITE A. (Mrs. H.) (1936)---------Associate Professor of Education
A.B., San Diego State College; M.A. and graduate study at Claremont College.

BURNETT, GAIL A. (1947, except 1951-52)----------Assistant Professor of English
A.B., Randolph-Macon Woman's College; M.A., University of California at Los Angeles; Ph.D., University of Southern California.

CADE, C. MARSHALL (1951)----------------------------Lecturer in Engineering
B.S., Michigan Agricultural College; M.A., Michigan State College. Licensed Engineer in Civil Engineering.

CAMERON, ROY ERNEST (1929)-------------------------Professor of Economics
A.B., Ph.D., University of California.

CAMPBELL, LOIS B. (1947)----------------------Assistant Professor of Education
A.B., University of California; M.A., Teachers College, Columbia University.

CARLSON, HILDING B. (1948)
Coordinator, Personnel Services; Professor of Psychology
Ph.B., M.S., Ph.D., University of Chicago.

CARLSON, THORSTEN R. (1948)
Principal of Campus Laboratory School; Professor of Education
B.E., St. Cloud State Teachers College; M.A., Ph.D., University of Minnesota.

CAVE, MARY F. (1946)------------------Assistant Professor of Physical Education
B.S., University of North Dakota. Graduate study at Bennington College and University of California at Los Angeles.

CHADWICK, LEONARD E. (1949)----------------Assistant Professor of Economics
B.S. and two and one-half years graduate study at the University of California.

CORBETT, Katherine E. (1921)---------------------Associate Professor of Education
B.Pd., Michigan State Normal College; B.S., A.M., Teachers College, Columbia University.

* CROUCH, JAMES ENSIGN (1932)----------------------------Professor of Zoology
B.S., M.S., Cornell University; Ph.D., University of Southern California.

CUNKLE, ELIZABETH C. (Mrs. L.) (1948)-------------------------Junior Librarian
A.B., University of California; B.S. in L.S., Columbia University. Graduate study University of California.

CUNNINGHAM, CORNELIUS C. (1947)--------------------Professor of Speech Arts
A.B., Beloit College; M.A., Northwestern University; Ph.D., University of Iowa.

DEBRECHT, EUGENE F. (1949)
Coordinator of Extension Services; Assistant Professor of Marketing
A.B., San Francisco State College; M.A., Stanford University. On military leave, April, 1951.

---

* On leave Semester I.

DEPUTY, ERBY CHESTER (1931)--------------------------Professor of Education
A.B., University of Denver; A.M., Ph.D., Columbia University.

DAVIS, GUY P. (1953)--------------------------Lecturer in Education
B.S., Teachers College, Columbia University; Ed.M., Ed.D., Harvard University.

DIRKS, JOHN H. (1947)--------------------------Assistant Professor of Art
A.B., San Diego State College. Graduate study at University of Southern California.

DORRIS, HELEN L. (1952)----------------Assistant Professor of Home Economics
B.S., Southern Illinois University; M.S., University of Illinois.

EAGLE, JOHN E. (1946)--------------------------Professor of Mathematics
B.S., Montana State College; M.A., Ed.D., Stanford University.

EARNEST, SUE W. (Mrs. L. E.) (1947)----------Associate Professor of Speech Arts
A.B., San Diego State College; M.A., Ph.D., University of Southern California.

EMERSON, ARTHUR T. (1952)----------------Assistant Professor of Mathematics
B.S., U. S. Naval Academy; one year graduate study at Naval War College.

EVENSON, PATTEE E. (1949)------------------------Associate Professor of Music
B.S., University of Minnesota; M.M., University of Michigan; specialized training at Universities of Minnesota, Michigan, Southern California, and Eastman School of Music; private instruction in Paris, London and the United States.

FLYE, RICHARD C. (1950)--------------------------Assistant Professor of Music
B.A., University of Virginia; M.A., and Professional Diploma, Columbia University.

FOX, DOROTHEA B. (1951)--------------------------------------Junior Librarian
B.A., San Diego State College; B.S. in L.S., M.A., University of Southern California; graduate study at University of New Mexico.

FRIEDRICH, KURT (1949)------------------------Assistant Professor of Education
A.B., Columbia College; M.A., Columbia University; Ed.D., Columbia Teachers College.

GALLUP, AVERY H. (1952)--------------------Assistant Professor of Zoology
A.B., San Diego State College; M.A., Claremont Graduate School; Ph.D., University of Michigan.

GANDERUP, JANIE F. (Mrs. M. T.) (1953)--------------------Lecturer in Education
A.B., San Diego State College.

GELDREICH, EDWARD W. (1947)----------------Assistant Professor of Psychology
A.B., M.A., University of Cincinnati; Ph.D., University of Chicago.

GENERALES, MINOS D. (1949)------------Associate Professor of Political Science
Degree in Law and Political Science, including six years of graduate study at the University of Athens, University of Paris Law School, and Institute of International Studies.

GERMANN, LULA (1926)----------------------------------------Senior Librarian
B.S., State Teachers College, Hays, Kansas.

GIBSON, ERNEST DANA (1947)------------------Professor of Business Education
Secretarial and Office Management
B.S., University of Minnesota; M.A., Colorado State College of Education; Ed.D., New York University.

GJERDE, CLAYTON M. (1948)------------------Associate Professor of Education
A.B., Augsburg College; M.A., Ph.D., University of Minnesota.

GRISIER, DONALD W. (1951)------------------Assistant Professor of Education
B.S., Bowling Green State University; M.A., Ed.D., Teachers College, Columbia University.

GULICK, SIDNEY L., JR. (1945)------------------------------Professor of English
B.A., M.A., Oberlin College; Ph.D., Yale University.

HAMMACK, ISABELLA STEWART (1936)--------Associate Professor of Education
A.B., M.A., and one year graduate study at the University of California.

HARRINGTON, AWONA B. (1949)--------------------------------Junior Librarian
A.B. and one year graduate study at San Diego State College; M.S. in L.S., University of Southern California.

HARRINGTON, NEIL J. (1948)----------------------------Instructor in Chemistry
B.S., Monmouth College; one year of graduate study at DePaul University and Northwestern University.

HARRIS, VINCENT C. (1950)----------------Assistant Professor of Mathematics
B.A., M.A., Ph.D., Northwestern University.

HARTIGAN, SELWYN C. (1946)--------------------------------Business Manager
A.B., San Diego State College.

HARVEY, A. R. (1949)--------------------------Assistant Professor of Mathematics
B.S., Bates College; A.M., Ph.D., Harvard University.

HARVEY, DOROTHY R. (Mrs. F. A.) (1924)----------Assistant Professor of Botany
A.B., San Diego State College; M.A., University of Southern California. One year graduate study at University of Southern California and University of Chicago.

HARWOOD, ROBERT DANIEL (1928)----------Chairman, Division of Life Science; Professor of Zoology
A.B., Pomona College; Ph.D., Cornell University.

HASKELL, HARRIET (1940, except 1943-45)---------Associate Professor of English
A.B., Mills College; M.A., Bryn Mawr College; Ph.D., University of Wisconsin.

HAYNES, GERALDINE K. (Mrs. L.) (1931)----------------------Senior Librarian
A.B., Indiana Central College; B.S. in L.S., University of Illinois.

HAYS, MAHELA W. (1946-47 and 1952)--------------------Lecturer in Psychology
B.S., Ph.D., University of California.

HAYS, MARTHA F. (1952)----------------------------------Lecturer in Education
A.B., San Diego State College.

HODGSON, FRANK M. (1953)--------------------Assistant Professor of Education
B.A., University of California at Santa Barbara; M.S. and graduate study at University of Southern California.

HOLMES, DARRELL C. (1952)------Assistant Professor of Education and Psychology
B.A., M.A., Ph.D., Ohio State University.

HOUSEMAN, RICHARD A. (1948)--------------------------Professor of Education
B.S., Central Michigan College of Education; M.A., Ed.D., Teachers College, Columbia University.

HOUSER, LOWELL (1938)------------------------------Associate Professor of Art
Diploma, Chicago Art Institute. Five years' special study in Mexico, Yucatan, Haiti, and New York City.

HOWARD, FRANCIS J. (1950)----------------------------Instructor in Physics
A.B., University of California at Los Angeles; M.S., University of California (Scripps Institution of Oceanography).

HUGHES, DONALD H. (1950)--------------------Assistant Professor of Education
B.A., Hastings College; M.Ed.; Ph.D., University of Colorado.

HUNTER, JAMES J., JR. (1946)------------Executive Dean; Professor of Education
A.B., Cornell University; M.S., Ph.D., Syracuse University.

ISENSEE, ROBERT W. (1948)-------------------Associate Professor of Chemistry
A.B., Reed College; M.A., Ph.D., Oregon State College.

JACKSON, EVERETT GEE (1930)-----------------------------Professor of Art
A.B., San Diego State College; M.A., University of Southern California. Three years special study in Mexico.

JACOBSEN, HELEN M. (1946)---------------------------------Senior Librarian
A.B., San Diego State College; B.S. in L.S., University of California.

JOHNSON, FRANK LOUIS (1939)------------------Associate Professor of English
A.B., M.A., University of Minnesota; Ph.D., University of Wisconsin.

JONES, KENNETH K., JR. (1948)---------------Assistant Professor of Speech Arts
B.S., Northwestern University; M.A., Stanford University.

JOSEPH, LIONEL (1947)------------------------Associate Professor of Chemistry
B.S., St. Louis University; M.S., Ph.D., Washington University.

JULIAN, JAMES L. (1951)---------------Publications and Public Relations Officer; Lecturer in Journalism
B.S., B.A., University of Houston; M.A., University of Texas; graduate study at Universities of Iowa and Miami.

KALBFELL, DAVID C. (1948)--------------------Associate Professor of Physics
A.B., University of California at Los Angeles; M.A., Ph.D., University of California. Registered Electrical Engineer

KAPLAN, OSCAR J. (1946)-------------------------------Professor of Psychology
B.A., M.A., University of California at Los Angeles; Ph.D., University of California.

KASCH, FREDERICK W. (1948)---------Associate Professor of Physical Education
B.S., M.S., University of Illinois; graduate study at New York University and University of Illinois.

KEENEY, JOSEPH SUMNER (1933)------------------------Professor of English
A.B., Yale University; M.A., Ph.D., University of California.

KENNEDY, CHESTER B. (1937)------------------------------Professor of English
A.B., Chico State College; M.A., Ph.D., Stanford University.

KIDWELL, WILLIAM M. (1949)------------Placement Officer; Assistant Professor of Psychology
B.A., M.S., University of Oregon; Ed.D., Stanford University.

KINDER, JAMES S. (1953)-----------------Coordinator of Audio-Visual Services; Assistant Professor of Education
B.S., Southeast Missouri State College; M.A., Ph.D., Teachers College, Columbia University.

KITZINGER, ANGELA M. (1945)----------Associate Professor of Health Education
A.B., Barnard College, Columbia; M.A., Teachers College, Columbia University. Additional work at Central School of Hygiene and Physical Education and at Folk High School, Ollerup, Denmark.

KLAPP, ORRIN E. (1948)------------------------Associate Professor of Sociology
M.A., Ph.D., University of Chicago.

KOESTER, GEORGE A. (1950)--------------------Assistant Professor of Education
B.S., Midland College; M.A., University of Colorado; Ph.D., University of Minnesota.

LAMDEN, CHARLES W. (1946)----------Dean of Educational Services and Summer Sessions; Professor of Accounting and Business Management
A.B., M.A., University of California at Los Angeles; Ph.D., University of California. Certified Public Accountant.

LAURITSEN, WILLIAM H. (1947)-----------------Professor of Health Education
A.B., M.A., University of Nebraska; Ph.D., Ohio State University.

LEBARRON, EVANGELINE O. (Mrs. H. E.) (1946, except 1948-49)
Assistant Professor of Secretarial Management
B.A., B.S., University of Iowa; B.A., Sioux Falls College; one and one-half years graduate study at Claremont Colleges, Universities of Southern California, Minnesota and Hawaii.

LEIB, JULIUS (1938)--------------------------------Associate Professor of Music
Three years special study at Leipzig Conservatory.

LEIFFER, DONALD B. (1948)--------------Coordinator of Public Administration; Professor of Political Science
A.B., University of California at Los Angeles; M.A., Ph.D., Harvard University.

LEMME, MAURICE M. (1948)--------------------------Professor of Mathematics
A.B., Oakland College; M.A., Indiana University; Ph.D., Purdue University.

LEONARD, CHARLES B. (1921)------------------------------Professor of History
A.B., M.A., Ph.D., University of California.

LESLEY, LEWIS B. (1924)-----------------------------------Professor of History
A.B., Stanford University; M.A., Ph.D., University of California.

LINLEY, JAMES M. (1945)-----------------------Associate Professor of Education
Ph.B., University of Chicago; M.S., Ph.D., University of Southern California.

LOCKMAN, EVELYN (1948)------------Associate Professor of Physical Education
B.A., Vanderbilt University; M.A., George Peabody College; graduate study at New York University, and University of Wisconsin; three years special study in dance.

LUCE, LAWRENCE W. (1949)---------------Assistant Professor of Industrial Arts
B.S., Illinois Wesleyan University; M.S., Iowa State College.

LUCIO, WILLIAM H. (1939)-----------------Coordinator of Elementary Education
A.B., M.A., Ph.D., University of California. Professor of Education

* MADDEN, RICHARD (1939)---------------------Chairman of Graduate Studies; Professor of Education
A.B., Nebraska (Peru) State Teachers College; M. A., Ph.D., Columbia University.

MARCHAND, ERNEST L. (1946)----------------------------Professor of English
A.B., M.A., University of Washington; Ph.D., University of Wisconsin.

MARKOWITZ, ABRAHAM (1952)--------------Assistant Professor of Bacteriology
B.A., New York University; M.S., Ph.D., University of Southern California.

McBLAIR, WILLIAM (1948)----------------------Assistant Professor of Zoology
A.B., San Diego State College; two years of graduate work at the University of California.

McCLINTIC, JOSEPH O. (1946)----------------------------Professor of Economics
A.B., Central College; A.M., University of Missouri; Ph.D., University of Wisconsin.

---

* On leave Semester II.

McCOLLOM, IVAN N. (1946) Professor of Psychology
A.B., Central Washington College of Education; B.S., M.S., University of Oregon; Ed.D., Colorado State College of Education.

McLONEY, WIRT L. (1949) Assistant Professor of Physical Science
A.B., Western State College; M.A., Colorado State College of Education.

* MENDENHALL, MARY (1939) Dean of Women; Professor of Philosophy
B.A., University of Colorado; M.A., University of Southern California; Ph.D., Yale University.

MERRILL, JOHN E. (1946) Assistant Professor of History
A.B., Stanford University; A.M., Harvard University. Two years graduate study at Stanford University.

MERZBACHER, CLAUDE FELL (1947) Assistant Professor of Physical Science
B.S., University of Pennsylvania; M.A., Claremont Graduate School. Certificat d'Etudes Francaises. Licensed Professional Chemical Engineer.

MESSIER, LEONARD N. (1946) Associate Professor of French
A.B., San Diego State College; M.A., Ph.D., University of California.

MILNE, DAVID S. (1946) Professor of Sociology
A.B., University of California at Los Angeles; M.A., University of Southern California; Ph.D., University of Chicago.

MOE, CHESNEY R. (1931) Professor of Physics
A.B., M.A., Stanford University; Ph.D., University of Southern California. Registered Mechanical Engineer. On military leave, April, 1951.

MORGAN, CHARLES (1949) Assistant Professor of Engineering
M.E., Stevens Institute of Technology; M.S., University of California. Registered Professional Mechanical Engineer.

MULLIN, DONALD C. (1952) Assistant Professor of Speech Arts
B.A., M.A., University of Iowa.

MYERS, MABEL A. (1946) Professor of Bacteriology
A.B., M.A., Pomona College; Ph.D., Cornell University.

NASATIR, ABRAHAM PHINEAS (1928) Professor of History
A.B., M.A., Ph.D., University of California.

NICHOLS, AMBROSE R., JR. (1939) Professor of Chemistry
B.S., University of California; Ph.D., University of Wisconsin.

NIEBAUER, RUBY R. (1949) Assistant Professor of Education
B.S., M.S., University of Wisconsin.

NORLAND, CALVERT E. (1947) Assistant Professor of Zoology
A.B., Pomona College; M.S., University of California. Graduate study at Claremont Colleges.

NUTTALL, EDMUND C. (1953) Instructor in Speech Arts
A.B., San Diego State College; M.A., University of Southern California.

ODMARK, VERNIE E. (1952) Assistant Professor of Accounting
B.S., St. Cloud State Teachers College; M.A., University of Minnesota; Ph.D., University of Missouri.

OLSON, ANDREW C., JR. (1946) Assistant Professor of Zoology
A.B., San Diego State College; M. S., University of Idaho; graduate study at Oregon State College.

OSBORN, CLARENCE G. (1928-29 and 1937) Professor of History and Political Science
A.B., A. M., Ph.D., Stanford University.

PARKER, MARION L. (1951) Registrar
A.B., San Diego State College; M.A., University of Southern California.

PASCOE, DAVID D., JR. (1952) Assistant Professor of Education
B.A., M.Ed. and graduate study at University of California at Los Angeles.

PEIFFER, HERBERT C., JR. (1937) Dean of Students
Professor of Psychology and Guidance
A.B., University of California at Los Angeles; M.A., Ph.D., Stanford University.

PEREZ, ROSE MARIE (1948) Junior Librarian
A.B., San Diego State College; B.S. in L.S., University of Southern California; M.A., University of Chicago.

PERRY, FAY V. (Mrs. J. M.) (1936) Coordinator of Guidance for Provisional Students; Professor of Sociology
A.B., San Diego State College; M.A., Ed.D., University of Southern California.

---

* On leave.

PETERSON, CHARLES E. (1921) ______ Dean of Men; Professor of Physical Education
A.B., San Diego State College; M.A., Claremont Colleges.

PFAFF, PAUL LEWIS (1931) ________________ Associate Professor of Speech Arts
A.B., Stanford University; M.A. and two years graduate study at the University of Southern California.

PHILLIPS, GEORGE L. (1947) ____________________ Associate Professor of English
A.B., Dartmouth College; M.A., Harvard University; Ph.D., Boston University.

PHILLIPS, KENNETH (1950) ________________ Associate Professor of Industrial Arts
B.S., State College for Teachers (Buffalo); M.A., Ph.D., Ohio State University.

PHILLIPS, WALTER THOMAS (1927) ______________________ Professor of Spanish
A.B., University of Washington; M.A., Stanford University; Ph.D., University of Southern California.

POST, LAUREN CHESTER (1937) _________________________ Professor of Geography
A.B., M.A., Ph.D., University of California.

POVENMIRE, E. KINGSLEY (1946) ____________ Associate Professor of Speech Arts
B.S., Ohio State University; M.F.A., Yale University.

PRESTON, DUDLEY A. (1948) _____________________ Assistant Professor of Botany
B.S., Washington State College; M.S., Ph.D., University of Minnesota.

PROUTY, HELEN L. (1950) ______________________ Assistant Professor of Education
B.S., University of Nebraska; M.A., Ph.D., University of California.

RAGEN, KATHERINE M. (1947) ________________ Acting Dean of Women; Associate Professor of History
A.B., Penn College; M.A., Bryn Mawr College; Ph.D., University of Wisconsin.

RANDALL, EDWARD W. (1952) ________________ Assistant Professor of History
B.A., San Diego State College; M.A., Claremont College; graduate study at University of Wisconsin and Claremont College.

RICHARDSON, M. BRUCE (1948) ______________ Associate Professor of Engineering
A.B., Aeronautical Engineer, Stanford University. Registered Mechanical Engineer.

RICHARDSON, ROBERT W. (1939, except 1946-48) _____ Chairman, Division of Social Sciences; Professor of Geography
A.B., Ph.D., University of California.

RIDOUT, LIONEL U. (1946, except 1949-50) ________ Assistant Professor of History
A.B., San Diego State College; M.A., University of California; Ph.D., University of Southern California.

RIGGS, LESTER G. (1950, except 1951-52) ________ Assistant Professor of Mathematics
B.S., University of Illinois; M.S., Syracuse University; Ph.D., Northwestern University.

ROBERTS, ELLIS E. (1949) _______________________ Assistant Professor of Geology
B.S., Michigan College of Mining and Technology; M.S., California Institute of Technology; Ph.D., Stanford University.

ROBINSON, DUDLEY HUGH (1928) ________ Chairman, Division of Physical Science; Professor of Chemistry
B.S., Louisiana State University; M.S., State University of Iowa; Ph.D., University of Southern California. Registered Chemical Engineer.

ROGERS, SPENCER LEE (1930) ______________________ Professor of Anthropology
A.B., San Diego State College; M.A., Claremont Colleges; Ph.D., University of Southern California.

ROHFLEISCH, KRAMER J. (1947) ___________________________ Professor of History
A.B., M.A., Ph.D., University of California.

ROST, NORMAN (1951) _______________________________________ Lecturer in Music
B.M., University of Michigan.

ROWE, ROBERT D. (1946) _________________________________ Professor of Chemistry
A.B., Ph.D., Stanford University.

RUJA, HARRY (1947) ____________ Assistant Professor of Philosophy and Psychology
A.B., University of California at Los Angeles; M.A., University of Chicago; Ph.D., Princeton University; one year postdoctoral study at the University of California at Los Angeles.

RUOCCO, ILSE H. (Mrs. L.) (1934) ______________________ Associate Professor of Art
B.E., University of California at Los Angeles; M.A., Columbia University.

RYAN, FREDERICK L. (1946) ____________________________ Professor of Economics
B.S., Tufts College; Ph.D., University of California.

SAMPLES, HOWELL GORDON, JR. (1950) ______________________ Junior Librarian
A.B., University of Georgia; B.S. in L.S., George Peabody College for Teachers.

SCHALLES, FRANCES IRENE (1950) ........ Junior Librarian
A.B., San Diego State College. One year graduate study.

SCHRUPP, MANFRED H. (1948) ........ Chairman, Division of Education; Associate Professor of Education
B.S., M.Ed., Ph.D., University of Minnesota.

SCHUNERT, JIM R. (1948) ........ Coordinator of Secondary Education; Associate Professor of Education
B.S., M.A., Ph.D., University of Minnesota.

SCHUTTE, WILLIAM H. (1947) ........ Assistant Professor of Physical Education
B.S., University of Idaho; M.S., University of Southern California.

SCHWOB, MARION L. (Mrs. W. E.) (1934) ........ Associate Professor of Physical Education
B.A., State University of Iowa; M.S., University of Southern California.

SCOTT, FRANK L. (1947) ........ Associate Professor of Physical Education
A.B., Grinnell College; M. A., University of Michigan; additional study at the University of Michigan.

SCOTT, HELEN M. (1950) ........ Instructor in Education
A.B., M.A., Colorado State College of Education.

SELLMAN, HUNTON D. (1946) ........ Professor of Speech Arts
B.S., Purdue University; M.S., University of Arizona. Three and one-half years graduate study at University of California, University of North Carolina and Yale University.

SHANNON, FLORENCE S. (Mrs. E. L.) (1933)
Assistant Professor of Physical Education
A.B., University of California; M.S., University of Southern California.

SHIELDS, ALLEN E. (1949) ........ Assistant Professor of Philosophy
A.B., University of California; M.A., Ph.D., University of Southern California

SHOUSE, CLAUDE F. (1946) ........ Assistant Professor of English
A.B., Georgetown College; M.A., University of Kentucky; Ph.D., University of Southern California.

* SILVERNAIL, CHESTER J. (1949) ........ Assistant Professor of Astronomy
A.B., San Diego State College; M.A., Claremont Graduate School.

SKOLIL, LESTER L. (1951) ........ Assistant Professor of Physics
A.B., Doane College; M.A., University of Nebraska; Ph.D., University of California.

SMITH, CHARLES ROBERTS (1933) ........ Coordinator of Athletics; Assistant Professor of Physical Education
A.B., San Diego State College; M.S., University of Southern California.

SMITH, CLIFFORD EDWARD (1937) ........ Professor of Astronomy
A.B., Carleton College; M.A., Swarthmore College; Ph.D., University of California.

SMITH, DEANE FRANKLIN (1939) ........ Associate Professor of Music
B.M., M.M., Northwestern University.

SMITH, LOUIS E., JR. (1946) ........ Professor of Physics
A.B., San Diego State College; Ph.D., University of Washington.

SORENSON, GEORGE N. (1946) ........ Chairman, Division of Fine Arts; Associate Professor of Art
A.B., San Diego State College; M.A., University of Southern California; graduate study at University of California and University of Minnesota.

SPANGLER, JOHN A. (1946) ........ Associate Professor of Chemistry
A.B., Ph.D., West Virginia University. On military leave, June, 1952.

SPORTSMAN, CHARLES C. (1947) ........ Associate Professor of Physical Education
B.S., North Texas State College; M.S., and one year additional study at the University of Southern California.

SPRINGSTON, CHRISTINE (1930) ........ Associate Professor of Music
B.A., B.M., University of Redlands; M.A., University of Washington, Diplomée d'execution, Conservatoire Americain, Fontainebleau, France.

STEINMETZ, HARRY C. (1930) ........ Associate Professor of Psychology
A.B., University of California; M.A., University of Southern California; Ph.D., Purdue University.

STONE, HAMILTON L. (1947) ........ Assistant Professor of Engineering
B.S., U. S. Naval Academy. Two and one-half years of graduate study. Registered Mechanical Engineer.

---

* On leave.

STONE, JOHN PAUL (1930)----------Head Librarian; Professor of Library Science
B.S., Northwest Missouri State Teachers College; B.S., M.S., University of Illinois; Ph.D., University of Chicago.

STORM, ALVENA (Mrs. Eugene) (1926)----------Associate Professor of Geography
A.B., M.A., University of California.

STOUGH, MORROW F. (1950)--------------------Assistant Professor of Education
A.B., Wittenberg College; M.A., University of Pennsylvania; Ph.D., University of California.

STOVALL, HARRIET B. (Mrs. S. L.) (1925)----------------------Senior Librarian
Graduate, Berkshire Athenaeum, Massachusetts.

STRAUB, LURA LYNN (1948)-------Assistant Professor of Secretarial Management
A.B., Jamestown College; M.C.S., Indiana University; graduate study at University of Wyoming and University of Denver.

SUTTON, JOSEPHINE M. (1947)--------------------------------Junior Librarian
A.B., University of Oklahoma.

SWIGGETT, JEAN D. (1946)---------------------------Associate Professor of Art
A.B., San Diego State College; M.F.A., University of Southern California; graduate study at Claremont Colleges.

TALBOY, RUTH A. (1947)-----------------Assistant Professor of Home Economics
B.S., Iowa State College; M.A., Stanford University; graduate study at Universities of Minnesota, Iowa, and California.

TAYLOR, JAMES W. (1950)----------------------Assistant Professor of Geography
A.B., Northwestern State College; M.A., Louisiana State University.

TAYLOR, KENNETH M. (1949)--------------------Assistant Professor of Zoology
A.B., M.A., Ph.D., University of California.

TAYLOR, MERREL A. (1946)---------------------Assistant Professor of Zoology
A.B., Indiana University; B.S., M.S., University of Michigan.

TERHUNE, JOHN A. (1947)-----------------------------------Lecturer in Physics
B.S., U. S. Naval Academy; M.S., Harvard University.

TERRY, WILLIAM L. (1946)----------Chairman, Division of Health, Recreation, and Physical Education; Lecturer in Physical Education
A.B., Western Kentucky Teachers College; M.S., Indiana University; two years of additional study at University of Kentucky, University of Illinois, and Columbia University.

* THEOBALD, JOHN R. (1946)--------------------------------Professor of English
B.A., St. Catherine's College, Oxford University; M.A., Mansfield College, Oxford University; Ph.D., University of Iowa.

TIDWELL, JAMES N. (1947)----------------------------------Professor of English
A.B., Simmons University; M.A., University of Oklahoma; Ph.D., Ohio State University.

TOLLEFSEN, DOROTHY J. (1946)-------Assistant Professor of Physical Education
A.B., M.A., University of California.

TORBERT, FRANCES B. (Mrs. H.) (1937)--------Associate Professor of Marketing
A.B., Stanford University; M.A., University of Southern California; one year graduate study at Stanford University.

TRAIL, MABEL COY (1935)---------------------------------Professor of English
A.B., Parsons College; M.A., State University of Iowa; Ph.D., University of Southern California.

TREAT, WOLCOTT C. (1950)------------------Assistant Professor of Psychology
A.B., Harvard College; A.M., Harvard University; Ph.D., Stanford University.

TUCKER, GORDON H. (1945)--------------------------------Professor of Zoology
B.S., M.S., University of South Carolina; Ph.D., University of North Carolina.

TURNER, MERLE B. (1950)-------------------Assistant Professor of Psychology
A.B., Willamette University; M.A., Stanford University; Ph.D., University of Colorado.

* VOEKS, VIRGINIA W. (1949)-----------------Assistant Professor of Psychology
B.S., M.S., University of Washington; Ph.D., Yale University.

WALBA, HAROLD (1949)-----------------------Assistant Professor of Chemistry
B.S., Massachusetts State College; Ph.D., University of California.

---

* On leave Semester II.

WALKER, DONALD E. (1949) ---------- Assistant Professor of Sociology
A.B., M.Th., University of Southern California; two years graduate study at Stanford University.

WALLING, CURTIS R. (1931) ---------- Associate Professor of Engineering
A.B., E.E., Stanford University; one and one-half years of graduate study at Stanford University and the University of Southern California. Registered Electrical Engineer.

WATENPAUGH, FRANK M. (1935) ---------- Associate Professor of Accounting
A.B., Pomona College; M.A., University of Southern California. Two years graduate study at University of Southern California and University of Oregon. Public Accountant.

WATSON, DONALD R. (1939) ----- Dean of Instruction; Professor of Physical Science
A.B., B.S., A.M., Ed.D., University of Southern California.

WEBB, CHARLES R., JR. (1949) ---------- Assistant Professor of History
A.B., M.A., University of California; M.A., Ph.D., Harvard University.

WEST, EDNA A. (1948) ---------- Assistant Professor of Secretarial Management
B.A., Santa Barbara State College; M.A., Claremont Colleges; graduate study at Claremont Colleges, Columbia University and Oregon State College.

WHITE, ALFRED E. (1946) ---------- Admissions Officer; Coordinator of Educational Research; Associate Professor of Guidance
A.B., M.A., University of California; Ed.D., Stanford University.

WILCOX, ROBERT F. (1950) ---------- Assistant Professor of Political Science
A.B., M.A., Stanford University; M.A., Columbia University; Ph.D., Stanford University.

WIMER, ARTHUR C. (1950) ---------- Lecturer in Journalism
B.Lit., Columbia University; M.A., University of Iowa.

WOLF, ERNEST M. (1947) ---------- Assistant Professor of German and Spanish
Study at the Universities of Berlin, Paris, Muenster, Cambridge and Bonn. Ph.D., University of Bonn.

WRIGHT, JOHN S. (1952) ---------- Assistant Professor of Marketing
Ph.B., University of North Dakota; M.B.A., and graduate study at Ohio State University.

WRIGHT, WILLIAM H. (1921) ---------- Chairman, Division of Business; Professor of Accounting and Business Management
B.S., M.A., University of California; Ph.D., University of Southern California. Public Accountant.

ZIEGENFUSS, GEORGE (1948) ---------- Associate Professor of Physical Education
B.A., University of Washington; M.A., Ed.D., Teachers College, Columbia University.

## LECTURERS

BACK, GILBERT (1950) ---------- Lecturer in Music
Professional musician.

BAKER, ROSS A. (1952) ---------- Lecturer in Chemistry
Ph.D., University of Wisconsin.

BURDICK, HUNTINGTON (1951) ---------- Lecturer in Music
Professional musician.

BURGERT, ROBERT H. (1948) ---------- Lecturer in Education
San Diego City Schools.

CARNEGIE, JANE H. (1953) ---------- Lecturer in Sociology
San Diego County Department of Public Welfare.

CARTER, DAVID (1953) ---------- Lecturer in Physics
Consolidated Vultee Aircraft Corporation.

CLARK, HELEN S. (1952) ---------- Lecturer in Mathematics
B.A., Macalester College.

COMIN, NORITA N. (1949) ---------- Lecturer in Home Economics
B.S., University of Minnesota.

DE JULIEN, LORENZ F. (1949) ---------- Lecturer in Marketing
Self employed.

FRAZIER, MARTIN E. (1953) ---------- Lecturer in Accounting
Security Trust and Savings Bank.

GOODWIN, JOHN H. (1947) ---------- Lecturer in Insurance
Insurance broker.
